We have no record of the introduction into the Christian church of uninspired hymnody. It would be only very gradually that Greek hymns, with corresponding music, would come into use. At first, probably, Christian hymns would be little more than centos of the Hebrew psalms, or evangelical imitations of them, or compositions after their model—the angels' song at the nativity, and the songs of Zacharias and Simeon leading the way. The earliest Christian hymns seem to have been simple glorifications of Christ.

Eusebius intimates that private individuals wrote hymns to Christ as God, which were generally

sung (*H. E.*, book v., ch. 28; vii. 24; ii. 17). In his letter to Trajan, Pliny says, 'the Christians are accustomed to sing alternately between themselves, and to praise Christ as a God' (Pliny, *Epist.*, lib. x. ep. 39), alluding probably to the 'Gloria in Excelsis,' the morning hymn of the early church.

The earliest extant fragment of Greek hymnody is found in the *Pedagogue* of Clemens Alexandrinus (*Op.*, pp. 312, 313. Potter's ed.) Bunsen says, however, that this was never used in the public worship of the church (*Christianity and Mankind*, vol. ii. p. 156).

Three early Christian hymns are preserved in the venerable Alexandrine MS. as an appendix to the O. T. psalms. The first is the morning hymn of the primitive church, commencing with the introductory verse of the nativity song of the angels, hence called the Angelical Doxology. It is found in the liturgy of the Greek Church, whence, about the year 380, it was transferred by Hilary to the communion service of the Latin Church, thence again to the communion service of the English Church.

The other two are another short morning hymn in which the verse occurs, 'Vouchsafe, O Lord, to keep us this day without sin,' afterwards incorporated in the Latin *Te Deum*; and an evening psalm, consisting of a cento of verses of the O. T. Psalms.

Besides these, there is an evening hymn of the Greek Christians, *ᾠδὴ τοῦ λυχνικοῦ*, the 'Hymn of the Kindling of the Lamp,' corresponding to the 'Ave Maria' hymns of Italy; concerning which Basil says, it is 'so ancient that he knows not who is the author of it' (Bingham, B. xiii. c. 5, sec. 5, 6).

The Ter Sanctus, or Seraphic Hymn, also belongs to the first three centuries, and is found in almost all the ancient liturgies. It is little more than the Trisagium of the seraphim in Is. vi.—See Palmer's *Origines Liturgicæ*, vol. ii. p. 126.

These are the only fragments of Greek hymnody that have been presented to us. Of course they are rhythmical, and would require a rhythmical tune or chant. Much of early Christian song was probably antiphonal; Socrates, *H. E.*, lib. vi. cap. 8; Theodoret, *H. E.*, lib. ii. cap. 24; as also Hahn, *Ueber den Gesang in der Syrischen Kirche*, p. 54.

The hymnody of the Syrian churches was much more copious. They had an ampler music, and poets of higher inspiration. Its invention is attributed by Ephræm Syrus to the Gnostic Bardesanes. *Hom. ad Heret.*, 53, quoted by Dr. Burgess in his *Introduct. to the Select Metrical Hymns and Homilies of Ephræm Syrus*, p. 30. Metres were called after his name. Next to him as an author of Syrian hymnody stands his son Harmonius, who is said to have invented new metres. Ephræm Syrus flourished in the 4th century. For an account of his contributions, see Burgess's *Metrical Hymns*, and *Introduct.* The Benedictine preface to the works of Ephræm Syrus, vol. v., says, 'While the Greeks reduced their sacred hymnology to about eight tunes, and to this day confine themselves to these limits, the Syrians expatiate on two hundred and seventy-five, which their ecclesiastical books exhibit here and there, inscribing the proper tunes at the beginning of individual hymns.' The Syrians are said to have possessed a hymnology of twelve or fourteen thousand hymns.

Great use was made of hymnody by the early

heretics;—by the Gnostic Bardesanes, who endeavoured to supersede the Hebrew Psalter by one of his own, containing also one hundred and fifty psalms (Theodoret, *Heret. Fab.* 209);—by Paul of Samosata, who largely beguiled the faithful by his captivating hymns and music (Euseb. *H. E.*, lib. vii. cap. 30);—by the Donatists in Africa, who adapted their hymns to common airs of a wild and passionate character, thereby inflaming the enthusiasm of the people as with a trumpet (August. *Confess.*);—and by Arius, who made the streets of Constantinople resound with ballads written to well-known and seductive melodies, sung in torch-light processions.

Patristic notices of early Christian hymnology are very numerous; our limits forbid more than mere references to a few in addition to those already given. Justin Martyr, *Apol.* ii.; Tertullian, *Apol. Contra Gent.*, c. 39; *De Anima*, c. 3; *De Jejunio*; Cyprian, *Epist. ad Donat.*; Origen, *Contra Cels.*, lib. viii. c. 67; Eusebius, *E. H.*, lib. ii. c. 17, lib. v. c. 28, lib. vii. c. 24, lib. viii. c. 9; *Apost. Const.*, lib. xx. c. 57; Athanasius, *Ep.* 7, *ad Lat.*; Basil in *Psalms*; Gregory of Nyssa, *Ps.* ii.; Jerome, *Comm. Eph.*, lib. iii. c. 5; *Epist. 17 ad Marcell.*; *Epist. ad Uxorem*, lib. ii. c. 8; Ambrose, *Hexam.*, lib. iii. c. 5; Augustine, *Confess.*, lib. ix. sec. 14, 15, 31, lib. x. sec. 49, 50; Chrysostom on 41st *Ps.*; Hilary, quoted by Bingham, book xiii. c. 5, sec. 7. See also Neander, Kurtz, and other church histories; Milman's *History of Christianity*, vol. iii. book ii. c. 3, 4; Bingham, *Orig. Eccl.*, book xiv. c. 2. [MUSIC; MUSICAL INSTRUMENTS; PSALMS.]—H. A.

**PSALMS, BOOK OF.** This collection of sacred poetry received its name, *Ψαλμοί*, in consequence of the *lyrical* character of the pieces of which it consists, as intended to be sung to stringed and other instruments of music. The word (from *ψάλλω*, to touch or strike a chord) is thus aptly defined by Gregory of Nyssa (*Tract. ii. in Psalmos*, cap. 3): *ψαλμός ἐστὶν ἡ διὰ τοῦ ὄργανου τοῦ μουσικοῦ μελωδία*. Another name, *Psalter*, was given to this book from the Greek *ψαλτήριον*, the stringed instrument to which its contents were originally sung. The Hebrew title *תהלים* (Rab-

binic form, with the ה elided, *תלים* or *תלן*) signifies *hymns* or *praises*, and was probably adopted on account of the use made of the collection in divine service, though only a part can be strictly called songs of praise, not a few being lamentations and prayers. There is evidently no proper correspondence between the titles in the two languages, though each is suitable. The word answering to *תהלים* is *ᾠδοί*, and not *ψαλμοί*, which rather corresponds to *מוֹנוֹרִים*, *lyrical odes*—a name which, though so plainly appropriate, does not appear to have been generally given to the book, at least so far as the Hebrew usage can now be ascertained. This is the more singular, inasmuch as no fewer than sixty-five of the songs distinctly bear the title of *מוֹנוֹר*, while only one (*Ps.* cxlv. 1) is styled *תהלה*. That the name *מוֹנוֹרִים* did, however, obtain in ancient times, rather than the present title *תהלים*, may be presumed from the use of *ψαλμοί* in the Septuagint and the N. T., and of *פססם* in the Peshito.

In Ps. lxxii. 20 we find all the preceding compositions (Ps. i.-lxxii.) styled *Prayers of David*, because many of them are strictly prayers, and most, if not all, are pervaded by the spirit and tone of supplication or devotion.

All the best judges—as Lowth, Herder, De Wette, Ewald, Tholuck, Delitzsch, and others—pronounce the poetry of the Psalms to be of the *lyric* order. ‘They are,’ says De Wette (*Einleitung in die Psalmen*,\* p. 2), ‘lyric in the proper sense; for among the Hebrews, as among the ancients generally, poetry, singing, and music were united, and the inscriptions to most of the Psalms determine their connection with music, though in a way not always intelligible to us. Also as works of taste these compositions deserve to be called lyric. The essence of lyric poetry is the immediate expression of feeling; and feeling is the sphere in which most of the Psalms move. Pain, grief, fear, hope, joy, trust, gratitude, submission to God, everything that moves and elevates the heart, is expressed in these songs. Most of them are the lively effusions of the excited susceptible heart, the fresh offspring of inspiration and elevation of thought; while only a few are spiritless imitations and compilations, or unpoetic forms of prayer, temple hymns, and collections of proverbs.’ For fuller information on this subject, see POETRY.

TITLES.—All the Psalms, except thirty-four, bear superscriptions. According to some there are only twenty-five exceptions, since they reckon

הללויה as a title in all the Psalms which commence with it. To each composition that has no title, the Talmud (*Babyl. Cod. Avoda Sarah*, fol. 24, col. 2) gives the name מְזוֹמָרָא יְתוֹכָחָא, *Orphan Psalm*.

The *authority* of the titles is a matter of doubt. By most of the ancient critics they were considered genuine, and of equal authority with the Psalms themselves, while most of the moderns reject them wholly or in part. They were wholly rejected at the close of the 4th century by Theodore of Mopsuestia, one of the ablest and most judicious of ancient interpreters (Rosenmüller, *Hist. Interpretationis Librorum Sacrorum*, P. iii. p. 256). On the other hand it deserves to be noticed that they are substantially received by Tholuck, Hengstenburg, and Delitzsch in their works on the Psalms. Of the *antiquity* of the inscriptions there can be no question, for they are found in the Sept. They are supposed to be even much older than this version, since they were no longer intelligible to the translator, who often makes no sense of them. Their obscurity might, however, have been owing not so much to their antiquity as to the translator’s residence in Egypt, and consequent ignorance of the psalmody of the temple-service in Jerusalem. At any rate the appearance of the titles in the Sept. can only prove them to be about as ancient as the days of Ezra. Then it is argued by many that they must be as old as the Psalms themselves, since it is customary for Oriental poets to prefix titles to their songs. Instances are found in Arabic poems, but these are very unlike the Hebrew inscriptions. Much more important traces of the custom appear in Is. xxxviii. 9, in Hab. iii.

1, and in 2 Sam. i. 17, 18 (Tholuck’s *Psalmen*, p. xxiv.) The other instances commonly appealed to in Exod. xv. 1; Deut. xxxi. 30; Judg. v. 1; 2 Sam. xxii. 1, furnish no evidence, since they are not proper titles of the songs so much as brief statements connecting them with the narrative. But in 2 Sam. xxiii. 1, and Num. xxiv. 3, there is strong proof of the usage, if, with Tholuck, we take the verses as inscriptions, and not as integral parts of the songs, which most hold them justly to be from their poetical form.

The following considerations militate against the authority of the titles. 1. The analogy between them and the *subscriptions* to the Apostolical Epistles. The latter are now universally rejected: why not the former? 2. The Greek and Syriac versions exhibit them with great and numerous variations, often altering the Hebrew (as in Ps. xxvii.), and sometimes giving a heading where the Hebrew has none (as in Ps. xciii.-xcvii.) Would the ancient translators have taken such liberties, or could such variations have arisen, if the titles had been considered sacred like the Psalms themselves? At any rate the existence of these glaring variations is sufficient to induce a distrust of the titles in their present form, even though they had been once sanctioned by inspired authority. If ever Ezra settled them, the variations in versions and manuscripts (Eichhorn’s *Einleitung*, iii., pp. 490, 495) have tended since then to make them doubtful. 3. The inscriptions are occasionally at variance with the contents of the Psalms. Sometimes the author is incorrectly given, as when David is named over Psalms referring to the captivity, as in Ps. xiv. 7; xxv. 22; li. 20, 21; lxix. 36. It is possible, however, as Tholuck thinks, that these references to the exile were added during that period to the genuine text of the royal singer. Others, as Calvin and Hengstenberg, with far less probability, take these passages in a figurative or spiritual sense. Also Ps. cxxxix. cannot well be David’s, for its style is not free from Chaldaisms. Then sometimes the occasion is incorrectly specified, as in Ps. xxx., unless indeed this refers to the dedication of the *site of the Temple* (1 Chron. xxii. 1), as Rosenmüller, Tholuck, and Hengstenberg think after Venema.

On the whole, as the result of this investigation, it seems the part of sober criticism to receive the titles as historically valid, except when we find strong internal evidence against them.

The *design* of these inscriptions is to specify either the author, or the chief singer (never the latter by name, except in Ps. xxxix.), or the historical subject or occasion, or the use, or the style of poetry, or the instrument and style of music. Some titles simply designate the author, as in Ps. xxv., while others specify several of the above particulars, as in Ps. li. The longest and fullest title of all is prefixed to Ps. lx., where we have the author, the chief musician (not by name), the historical occasion (comp. 2 Sam. viii.), the use or design, the style of poetry, and the instrument or style of music. It is confessedly very difficult, if not impossible, to explain all the terms employed in the inscriptions; and hence critics have differed exceedingly in their conjectures. The difficulty, arising no doubt from ignorance of the Temple music, was felt, it would seem, as early as the age of the Septuagint; and it was felt so much by the translators of our A. V., that they generally re-

\* Of this valuable *Einleitung* a translation, rather too free to be faithful, is given in the American *Biblical Repository*, vol. iii.

tained the Hebrew words, even though Luther had set the example of translating them to the best of his ability. It is worth observing that the difficulty appears to have determined Coverdale, 1535, to omit nearly all except names of authors; thus in Ps. lx., which is lix. in his version, he gives only —a *Psalm of David*.

Of the terms left *untranslated* or *obscure* in our Bible, it may be well to offer some explanation in this place, taking them in alphabetical order for the sake of convenience. On this subject most commentators offer instruction, but the reader may especially consult Rosenmüller, *Scholia in Comp. Redacta*, vol. iii. 14-22; De Wette, *Commentar über die Psalmen*, pp. 27-37; Ewald, *Poet. Bücher*, i. 169-180, 195; and Davidson, *Introduction*.

*Aijeeth shahar*, אֵילֵת הַשָּׁחַר, *hind of the morning*—i. e., the sun, or the dawn of day. This occurs only in Ps. xxii., where we may best take it to designate a song, perhaps commencing with these words, or bearing this name, to the melody of which the psalm was to be sung. So most of the ablest critics after Aben-Ezra. Yet Tholuck and Hengstenberg, after Luther, suppose it to denote the subject of the psalm, meaning David himself, or typically the Messiah.

*Alamoth*, עֲלָמוֹת, Ps. xlvi., probably signifies *virgins*, and hence denotes music for female voices, *soprano* or *treble*. So Gesenius, Delitzsch, and Hengstenberg, after Gueset, who, in *Comment.*

*Ling. Hebr.* sub voce עֲלָמִים, explains it—*vox clara et acuta, quasi virginum* (see below under *Sheminith*).

*Al-taschith*, אַל-תַּשְׁחִית, *destroy thou not*, is found over Ps. lvii. lviii. lix. lxxv., and signifies, by general consent, some well-known ode beginning with the expression, to the tune of which these compositions were to be sung.

*Degrees*, הַמַּעֲלוֹת, *the ascents*, appears over fifteen Psalms (cxx.—cxxxiv.), called *Songs of Degrees*, and has been explained in various ways, of which the following are the chief. 1. The ancients understood by it *stairs* or *steps*, as appears from the Sept. version of the title, *ὁδὴ τῶν ἀναβαθμῶν*, and the Vulgate, *carmen graduum, song of the steps*; and in accordance with this, Jewish writers relate (Mishna, *Sucah*, cap. v. 4), that these fifteen Psalms were *sung on fifteen steps* (one on each), leading from the court of the women to the court of Israel. This explanation is now exploded, though Fürst, in his *Concordance*, sanctions it. 2. Luther, whom Tholuck is inclined to follow, renders the title *a song in the higher choir*, supposing the Psalms to have been sung from an elevated place or ascent, or with elevated voice. 3. Gesenius and De Wette think the name refers to a peculiar rhythm in these songs, by which the sense advances by *degrees*, and so *ascends* from clause to clause. Thus in Ps. cxxi.—

1. I will lift up my eyes to the hills,  
From whence cometh my help.
2. My help cometh from the Lord,  
The maker of heaven and earth.
3. He will not suffer thy foot to be moved,  
Thy keeper will not slumber:
4. Behold, he will neither slumber nor sleep,  
The keeper of Israel.

5. *Jehovah* is thy keeper,  
*Jehovah*, thy shade on thy right hand.

7. *Jehovah* will keep thee from all evil,  
He will keep thy soul:

8. *Jehovah* will keep thy going out and thy coming in,  
From this time even for evermore.

To this very ingenious explanation it is objected, that this *rhythm by gradation* (as De Wette calls it) is not at all obvious in the structure of most of these songs, and therefore could hardly suggest the name. 4. According to the most prevalent and probable opinion, the title signifies *song of the ascents*, or *pilgrim song*, meaning a song composed for, or sung during, the journeyings of the people up to Jerusalem, either as they returned from Babylon, or as they stately repaired to the national solemnities. So Herder (*Geist der Ebr. Poesie*, ii. 353-357), Ewald (*Poet. Bücher*, i. 195), Hengstenberg and Hupfeld. Journeys to Jerusalem are generally spoken of as *ascents*, on account of the elevated situation of the city and temple (see Ezra vii. 9, and especially Ps. cxxii. 4). This explanation of the name is favoured by the brevity and the contents of these songs, and by the versions of Aquila, Symmachus, and Theodotion, who render מעלות by ἀναβάσεις.

*Eduth*, see below under *Shushan*.

*Githith*, גִּיטִית, appears over Ps. viii. lxxxi. lxxxiv., and is of very uncertain meaning, though not improbably it signifies an instrument or tune brought from the city of *Gath*. So Rosenmüller, De Wette, Ewald, Hengstenberg, and Delitzsch. In the opinion of not a few the word comes from גַּת, *winepress*, and denotes either an instrument or a melody used in the vintage. So the Sept. renders it ὑπὲρ τῶν λαγῶν. Gesenius in his *Thesaurus*, and Fürst in his *Lexicon*, prefer other explanations. [MUSICAL INSTRUMENTS].

*Higgaion*, הִגְּגִיִן, is found in Ps. ix. 16, and probably means either *musical sound*, according to the opinion of most, and the Sept. ὁδὴ; or *meditation* according to Tholuck and Hengstenberg (see more below, under *Selah*).

*Jeduthun*, יְדֻתָּן, is found over Ps. xxxix. lxii. lxxvii., and is generally taken for the name of choristers descended from Jeduthun, of whom we read in 1 Chron. xxv. 1, 3, as one of David's three chief musicians or leaders of the Temple music. This use of the name Jeduthun for Jeduthunites is just like the well-known use of Israel for the Israelites. It is most probable that in Ps. xxxix. Jeduthun himself is meant, and not his family. So Rosenmüller and Hengstenberg [JEDUTHUN].

*Jonath-elm-rechokim*, יוֹנָת אֵלֶם רְחוֹקִים, *the mute dove among strangers*, found only over Ps. lvi., may well denote the subject of the song—viz., David himself, 'when the Philistines took him in Gath;' or it is the name or commencement of an ode to the air of which this psalm was sung, as Dr. Davidson thinks, who translates it *dove of the distant terebinths*.

*Leannoth*, לַעֲנוֹת, in the title of Ps. lxxxviii. means to *sing* or *respond*, denoting that it was to be recited in the way described.

*Mahalath*, מַחֲלֵת, occurs in Ps. liii. and lxxxviii., and denotes, according to some, a sort of

*flute*, according to Gesenius in his *Thesaurus*, a *harp*, but in the opinion of Fürst, a *tune*, named from the first word of some popular song. Upon *Mahalah Leannoth*, Ps. lxxxviii., is accordingly a direction to chant it to the instrument or tune called *mahalah*.

*Maschil*, מִשְׁכִּיל, is found in the title of thirteen psalms. According to De Wette, Delitzsch, and others, it means a *poem*, so called either for its *skilful* composition or for its *wise and pious* strain. The common interpretation, which Gesenius, Tholuck, and Hengstenberg favour, makes it a *didactic poem*, from הִשְׁכִּיל, *to teach* or *make wise*. There seems very little to choose between the two opinions.

*Micham*, מִכְתָּם, is prefixed to Ps. xvi., lvi.-lx., and is subject to many conjectures. Many, after Aben-Ezra, derive it from כֶּתֶם, *gold*, and understand a *golden psalm*, so called either on account of its *excellence*, or because written in *golden letters*. Hengstenberg understands *mystery*, and supposes that these psalms, more than others, have a deep or *occult* sense. Others, after the Sept., which gives στήλογραφία, fancy that the word means a *poem engraved on a pillar* or monument. But the true explanation is most likely that offered by Gesenius, De Wette, Rosenmüller, and Delitzsch, who hold מִכְתָּם to be only another form of מִכְתָּב, by the familiar interchange of the kindred letters מ and ב, and to signify a *writing* or *poem*. It is actually found in this form over Hezekiah's song in Is. xxxviii. 9.

*Muth-labben* (Ps. ix.) presents a perfect riddle, owing to the various readings of MSS., and the contradictory conjectures of the learned. Besides the common reading עַל-מוֹת לִבִּי, *upon death to the son* (or, *death makes white*: so Delitzsch), we have עַל-מוֹת and עַל-מוֹת, the same word that is used in Ps. xlii. (see above, *Alamoth*). Some explain it as the *subject* or *occasion* of the song, but most refer it to the music. Gesenius, in his last edition, renders it *with virgins' voice for the boys*—i.e., to be sung by a choir of boys in the *soprano* or *treble*. Dr.

Davidson holds that לִבִּי must be taken for to *Ben*, one of the singers named in 1 Chron. xv. 18.

*Neginoth*, נְגִינוֹת, Ps. iv. and four others; over Ps. lxi. *neginah* in the singular, though some MSS. give *neginoth* here also. This name, from נָגַן, *to strike* a chord, like ψάλλω, clearly denotes *stringed instruments* in general.

*Nehiloth*, נְחִילוֹת (Ps. v.), comes most likely from חָלַל, *to perforate*, and denotes *pipes* or *flutes*. Hengstenberg, however, fancies it means *lots* or *heritages*, from נָחַל, *to possess*, and points out the subject of the psalm.

*Selah*, סֵלָה, is found seventy-three times in the Psalms, generally at the end of a sentence or paragraph; but in Ps. lv. 19 and lvii. 3 it stands in the middle of the verse. While most authors have agreed in considering this word as somehow relating to the *music*, their conjectures about its precise meaning have varied greatly. But at present these two opinions chiefly obtain. Some, including Herder, De Wette, Ewald (*Poet. Bücher*, i. 179), and Delitzsch, derive it from סָלַח or סָלַל, *to raise*, and understand an *elevation* of the voice or music;

others, after Gesenius, in *Thesaurus*, derive it from

סָלַח, *to be still* or *silent*, and understand a *pause* in the singing. So Rosenmüller, Hengstenberg, and Tholuck. Probably *selah* was used to direct the singer to be silent, or to pause a little, while the instruments played an interlude (so Sept. διάψαλμα) or symphony. In Ps. ix. 16 it occurs in the expression *higgaion selah*, which Gesenius, with much probability, renders *instrumental music, pause*—i.e., let the instruments strike up a symphony, and let the singer pause. By Tholuck and Hengstenberg, however, the two words are rendered *meditation, pause*—i.e., let the singer meditate while the music stops.

*Sheminith*, שְׁמִינִית (Ps. vi. and xii.), means properly *eighth*, and denotes either, as some think, an instrument with *eight* chords, or, more likely, music in the lower notes, *octave*, or *bass*. So Gesenius, De Wette, Delitzsch, and Hengstenberg. This is strongly favoured by 1 Chron. xv. 20, 21, where the terms *alamoth* and *sheminith* clearly denote different *parts* of music; the former answering to our *treble*, and the latter to the *bass*, an *octave* below.

*Shiggaion*, שִׁגְגָּיוֹן (Ps. vii.), denotes, according to Gesenius and Fürst, a *song* or *hymn*; but Ewald, Delitzsch, and Hengstenberg derive it from שָׁגָה, *to err* or *wander*; and hence the two former understand a *dithyrambic song, uttered in the greatest excitement*; but the latter, *error* or *wandering*, supposing that the *aberrations* of the wicked are the subject of the psalm. According to Rosenmüller, De Wette, and Tholuck, it means a *plaintive song* or *elegy*.

*Shushan*, שֹׁשָׁן (Ps. lx.), and in plural *shoshanim* (Ps. xlv., lxix., lxxx.) This word commonly signifies *lily*, and probably denotes either an instrument bearing some resemblance to a lily (perhaps *cymbal*), or a melody named lily for its pleasantness. Hengstenberg contends that it expresses the subject—i.e., some delightful theme. *Eduth*, עֲדוּת, is joined to it in Ps. lx. and lxxx., giving the sense *lily of testimony*, the name of a tune, according to Tholuck and Delitzsch, or *lily of song*, according to others, who understand a *lyric poem*.

AUTHORS.—Many of the ancients, both Jews and Christians, maintained that all the psalms were written by David: which is one of the most striking proofs of their *uncritical* judgment. So the Talmudists (*Cod. Pesachim*, c. x., p. 117); Augustine, who is never a good critic (*De Civ. Dei*, xvii. 14); and Chrysostom (*Prol. ad Psalmos*). But Jerome, as might be expected, held the opinion which now universally prevails (*Epist. ad Sophronium*). The titles and the contents of the psalms most clearly show that they were composed at different and remote periods, by several poets, of whom David was only the largest and most eminent contributor. In the titles the author is indicated

by לְ, *to*, i.e., 'belonging to,' prefixed to his name, hence called *lamed auctoris*. Some suppose, with-

out good reason, that לְ prefixed to a musician's name—*ex. gr.*, Asaph—indicates, not the author, but simply the head singer. According to the inscriptions, we have the following list of authors:—

1. *David*, 'the sweet Psalmist of Israel' (2 Sam. xxiii. 1). To him are ascribed seventy-three psalms in the Hebrew text (not seventy-four, as De Wette and Tholuck state; nor seventy-one, as most others have counted); and at least eleven

others in the Sept.—namely, xxxiii., xliii., xci., xciv.-xcix., civ., cxxxvii.; to which may be added Ps. x., as it forms part of Ps. ix. in that version. From what has been advanced above respecting the authority of the titles, it is obviously injudicious to maintain that David composed all that have his name prefixed in the Hebrew, or to suppose that he did not compose some of the eleven ascribed to him in the Sept., and of the others which stand without any author's name at all. We cannot feel sure that Ps. cxxxix. is David's, for its Chaldaisms (ver. 2, 8, 16, 17) betray a later age; and Ps. cxxii. can scarcely be his, for its style resembles the later Hebrew, and its description of Jerusalem can hardly apply to David's time. Besides, it is worthy of notice that the Sept. gives this and the other Songs of Degrees without specifying the author. Of those which the Sept. ascribes to David, it is not improbable that Ps. xcix. and civ. are really his; and of those which bear no name in either text, at least Ps. ii. appears to be David's.

When we consider David's eminence as a poet, and the delight he took in sacred song, we cannot wonder that he should be the author of so many of the psalms—no fewer, in all likelihood, than half the collection: the wonder rather should be, that we do not find more of his fine odes, for it is certain he wrote some which are not in this book; see in 2 Sam. i. 19-27 his lament over Saul and Jonathan, and in 2 Sam. xxiii. 1-7 his last inspired effusion.

His character and merit as the father of Hebrew poetry and music—for it was in his hands and under his auspices that these flourished most\*—are thus set forth by the Son of Sirach (ch. xlvii. 8-10), 'In all his work he gave thanks. To the Holy and Most High he sang songs with all his heart, in words of praise (ῥήματα δόξης), and he loved his Maker. He set singers also before the altar, and from their music (ᾠχου) sweet melody resounded. He gave splendour to the feasts, and adorned the solemn seasons unto perfection (μέχρι συντελείας), in that they praised his holy name, and the sanctuary pealed with music from early morn.'

David's compositions are generally distinguished by sweetness, softness, and grace; but sometimes, as in Ps. xviii., they exhibit the sublime. His prevailing strain is plaintive, owing to his multiplied and sore trials, both before and after his occupation of the throne. How often was he beset with dangers, harassed by foes, and chastised of God! And, under these circumstances, how was his spirit bowed down, and gave vent to its plaints and sorrows on the saddened chords of the lyre! But in the midst of all he generally found relief, and his sorrow gave place to calm confidence and joy in God. What wonder that a soul so susceptible and devout as his should manifest emotions so strong, so changeable, and so various, seeing that he passed through the greatest vicissitudes of life? God took him from the sheep-folds to feed Jacob his people and Israel his inheritance (Ps. lxxviii. 70, 71). See Herder's *Geist der Ebr. Poesie*, ii. 297-301; and especially Tholuck (*Psalmen, Einleitung*, sec. 3), who gives a most admirable exhibition of the Psalmist's history and services.

\* It was he, as Herder observes, that collected the scattered wild field-flowers and planted them as a royal parterre on Mount Zion.

The example and countenance of the king naturally led others to cultivate poetry and music. It appears from Amos vi. 5 that lovers of pleasure took David's compositions as a model for their worldly songs: how much more would the lovers of piety be induced to follow him by producing sacred songs and hymns! The fine psalm in Hab. iii. is a striking imitation of his style as seen in Ps. xviii. And the celebrated singers of his day were men, like himself, moved by the divine afflatus not only to excel in music, but also to indite hallowed poetry. Of these psalmists the names of several are preserved in the titles.

2. *Asaph* is named as the author of twelve psalms—viz., l., lxxiii.-lxxxiii. He was one of David's chief musicians [ASAPH]. All the poems bearing his name cannot be his; for in Ps. lxxiv., lxxix., and lxxx., there are manifest allusions to very late events in the history of Israel. Either, then, the titles of these three psalms must be wholly rejected, or the name must be here taken for the 'sons of Asaph,' which is not improbable, as the family continued for many generations in the choral service of the Temple. Asaph appears from Ps. l., lxxiii., and lxxviii., to have been the greatest master of didactic poetry, excelling alike in sentiment and in diction.

3. The *sons of Korah* was another family of choristers (see KORAH, at the end), to whom eleven of the most beautiful psalms are ascribed. The authorship is assigned to the Korahites in general, not because many of them could have been engaged in composing one and the same song, but because the name of the particular writer was unknown or omitted. However, in Ps. lxxxviii. we find, besides the family designation, the name of the individual who wrote it, viz.—

4. *Heman*, another of David's chief singers (1 Chron. xv. 19): he is called the Ezrahite, as being descended from some Ezrah, who appears to have been a descendant of Korah; at least Heman is reckoned a Kohathite (1 Chron. vi. 33-38), and was therefore probably a Korahite; for the Kohathites were continued and counted in the line of Korah; see 1 Chron. vi. 22, 37, 38 [HEMAN]. Thus Heman was both an Ezrahite and of the sons of Korah. That Ps. lxxxviii. was written by him is not unlikely, though many question it.

5. *Ethan* is reputed the author of Ps. lxxxix. He also is called the Ezrahite, but this is either a mistake, or he as well as Heman had an ancestor named Ezrah, of whom nothing is known. The Ethan intended in the title is doubtless the Levite of Merari's family whom David made chief musician along with Asaph and Heman (1 Chron. vi. 44; xxv. 1, 6). The psalm could not, however, be composed by him, for it plainly alludes (ver. 38-44) to the downfall of the kingdom.

6. *Solomon* is given as the author of Ps. lxxii. and cxxvii., and there is no decided internal evidence to the contrary, though most consider him to be the subject, and not the author, of Ps. lxxii.

7. *Moses* is reputed the author of Ps. xc., and there is no conclusive reason to doubt the tradition, as De Wette, Hupfeld, and Olshausen do. But the Talmudists—whom Origen, and even Jerome, follows—ascribe to him also the ten succeeding psalms (xci.-c.), on the principle that the anonymous productions belonged to the last-named author. This principle is manifestly false, since in several of

these psalms we find evidence that Moses was not the author. In Ps. xcv. the forty years' wandering in the wilderness is referred to as past; in Ps. xcvi. 8 mention is made of Zion and Judah, which proves that it cannot be dated earlier than the time of David; and in Ps. xcix. 6, the prophet Samuel is named, which also proves that Moses could not be the writer.

*Jeduthun* is sometimes, without just ground, held to be named as the author of Ps. xxxix. (see above, under that head.) Many conjectures have been formed respecting other writers, especially of the anonymous psalms. The Sept. seemingly gives, as authors, Jeremiah (Ps. cxxxvii.), and Haggai and Zechariah (Ps. cxxxviii.) Hitzig (*Comment. über die Psalmen*) ascribes to Jeremiah a large number of the elegiac or plaintive psalms, and some to Isaiah (Ps. xli.-xlviii.); but these are mere surmises, though perhaps consonant with fact.

The *dates* of the Psalms, as must be obvious from what has been stated respecting the authors, are very various, ranging from the time of Moses to that of the Captivity in Babylon, and even later—a period of nearly 1000 years. In the time of king Jehoshaphat (about B.C. 896) Ps. lxxxiii., setting forth the dangers of the nation, as we read in 2 Chron. xx. 1-25, was composed either by himself, as some suppose, or most likely, according to the title, by Jahaziel, 'a Levite of the sons of Asaph,' who was then an inspired teacher (see 2 Chron. xx. 14). In the days of Hezekiah, who was himself a poet (Is. xxxviii. 9-20), we may date, with great probability, the Korahitic Psalms xli. and xlviii., which seem to celebrate the deliverance from Sennacherib (2 Kings xix. 35). In the period of the Captivity were evidently written such laments as Ps. xli., lxxix., cii., and cxxxvii.; and after its close, when the captives returned, we must manifestly date Ps. lxxxv. and cxxvi.

Some have maintained that several psalms, especially lxxiv., were written even in the days of the Maccabees. This view is urged by Hitzig, Olshausen, Davidson, and others; whilst it is opposed not only by such men as Hengstenberg, Hävernick, and Keil, but even by bolder critics, such as Gesenius, Ewald, Thenius, and others. Delitzsch, however, seems inclined to admit the existence of some psalms of so late a date (see his 'Psalmen' in Herzog's *Real-Encyclopædie*, p. 273).

**COLLECTION AND ARRANGEMENT.**—As the Psalms are productions of different authors in different ages, we are led to inquire *how* and *when* they were collected. The book has been styled by some moderns the *Anthology of Hebrew lyric poetry*, as if it consisted of a selection of the most admired productions of the sacred muse; but the name is not altogether appropriate, since several pieces of the highest poetic merit are, to our knowledge, not included—namely, the songs of Moses in Exod. xv. and Deut. xxxii.; the song of Deborah in Judg. v.; the prayer of Hannah in 1 Sam. ii. 1-10; and even David's lament over Saul and Jonathan in 2 Sam. i. 18-27. To these may be added the song of Hezekiah in Is. xxxviii. 9-20; and the prayer of Habakkuk in Hab. iii. The truth seems to be, as Ewald and Tholuck maintain, that the collection was made not so much with reference to the beauty of the pieces as to their adaptation for devotional use in public worship. This view sufficiently accounts for omitting most of the above pieces, and

many others, as being either too individual or too secular in their application. It may account for not including the lament over Jonathan, and for the fact that only two of Solomon's compositions (Ps. lxxii. and cxxvii.) are professedly given, though 'his songs were a thousand and five' (1 Kings iv. 32, 33). His themes were secular, and therefore not suitable for this collection.

When the Psalms were collected and by whom, are questions that cannot be confidently answered. The Talmudists most absurdly considered David the collector (*Cod. Beracoth*, c. i. p. 9). It is certain that the book, as it now stands, could not have been formed before the building of the second temple, for Ps. cxxvi. was evidently composed at that period. In all probability it was formed by Ezra and his contemporaries, about B.C. 450 (Ewald's *Poet. Bücher*, ii. 205), or by Simon the Just, about B.C. 300. But in the arrangement of the book there is manifest proof of its gradual formation out of several smaller collections, each ending with a kind of doxology.

The Psalter is divided in the Hebrew into five books, and also in the Sept. version, which proves the division to be older than B.C. 200. Some have fancied that this five-fold division did not originally exist, but that it arose simply from a desire to have as many parts in the Psalms as there are in the law of Moses. But strong reasons demand the rejection of such a fancy. Why should this conformity to the Pentateuch be desired and effected in the Psalms, and not also in Proverbs, or in the Prophets? The five books bear decided marks of being not arbitrary divisions, but distinct and independent collections by various hands.

The *first book* (i.-xli.) consists wholly of David's songs, his name being prefixed to all except i., ii., x., and xxxiii.; and it is evidently the first collection, having been possibly made in the time of Hezekiah, who is known to have ordered a collection of Solomon's proverbs (Prov. xxv. 1), and to have commanded the Levites to sing the words of David (2 Chron. xxix. 30).

The *second book* (xlii.-lxxii.) consists mainly of pieces by the sons of Korah (xlii.-xlix.), and by David (li.-lxxv.), which may have been separate minor collections. At the end of this book is found the notice—'The prayers of David the son of Jesse are ended;' and hence some have thought that this was originally the close of a large collection comprising Ps. i.-lxxii. (Carpzov, *Introductio*, etc., ii. 107). But that the second was *originally* distinct from the first book, is proved by the repetition of one or two pieces; thus Ps. liii. is plainly the same as Ps. xiv., with only a notable variation in the divine name *God*, אלהים, being used in the former wherever *Lord*, יהוה, is found in the latter.\* So also Ps. lxx. is but a repetition of Ps. xl. 13-17, with the same singular variation in the divine name. It is not likely that this collection was made till the period of the Captivity, if interpreters are right in referring Ps. xlv. to the days of Jeremiah.

The *third book* (lxxiii.-lxxxix.) consists chiefly of Asaph's psalms, but comprises apparently two

\* On the variation in the use of the divine names יהוה and אלהים in the Psalms (as in the Pentateuch), the reader may consult Delitzsch's able tractate called *Symbolæ ad Psalmos Illustrandos Isagogicae*.

smaller collections, the one Asaphitic (lxxiii.-lxxxiii.), the other mostly Korahitic (lxxxiv.-lxxxix.) The collector of this book had no intention to bring together songs written by David, and therefore he put the above notice at the end of the second book (see De Wette's *Psalmen, Einleitung*, p. 21). The date of this collection must be as late as the return from Babylon, for Ps. lxxxv. implies as much.

The *fourth book* (xc.-cvi.) and the *fifth* (cvii.-cl.) are made up chiefly of anonymous liturgic pieces, many of which were composed for the service of the second temple. In the last book we have the Songs of Degrees (cxx.-cxxxiv.), which seem to have been originally a separate collection. The five books may, with some propriety, be thus distinguished: the first *Davidic*, the second *Korahitic*, the third *Asaphitic*, and the two others *Liturgic*.

In the mode of dividing and numbering the Psalms, some Hebrew MSS. vary from the printed text. In some, Ps. i. and ii. are given as one, the first being reckoned as only introductory; which accounts for the various reading in Acts xiii. 33. So also Ps. xlii. and xliii. are sometimes joined into one, as they evidently ought to be. In the Septuagint also, which the Vulgate follows, the arrangement varies from the common order, for it joins Ps. ix. and x. together, and thus its numbering falls one behind the Hebrew as far as Ps. cxlvii., which it cuts into two at ver. 12, and thus returns to the common enumeration. There is also in the Sept. an apocryphal psalm, numbered cli., on David's victory over Goliath.

Various *classifications* of the Psalms have been proposed (Carpzov, *Introductio*, etc., ii. 132-134). Tholuck would divide them, according to the matter, into songs of *praise*, of *thanksgiving*, of *complaint*, and of *instruction*. De Wette suggests another method of sorting them (*Einleitung*, p. 3),

into—1. *Hymns* (לְהַלֵּל in the proper sense), as viii. xviii.; 2. *National Psalms*, as lxxviii. cv.; 3. *Psalms of Zion and the Temple*, as xv. xxiv.; 4. *Psalms respecting the King*, as ii. cx.; 5. *Psalms of complaint*, as vii. xxii.; and 6. *Religious Psalms*, as xxiii. xci. It is obvious, however, that no very accurate classification can be made, since many are of diversified contents and uncertain tenor.

**CANONICITY AND USE.**—The inspiration and canonical authority of the Psalms are established by the most abundant and convincing evidence. They never were, and never can be, rejected, except by impious impugnors of all divine revelation. Not to mention other ancient testimonies [CANON], we find complete evidence in the N. T., where the book is quoted or referred to as divine by Christ and his apostles at *least seventy times*. No other writing is so frequently cited; Isaiah, the next in the scale of quotation, being cited only about fifty-five times. Twice (Luke xx. 42 and Acts i. 20) we find distinct mention of the *Book of Psalms* (βιβλος ψαλμῶν). Once, however (Luke xxiv. 44), the name *Psalms* is used not simply for this book, but for the Haglographa, or the whole of the third division of the Hebrew Scriptures [HAGIOGRAPHIA], because in it the Psalms are the first and chief part; or possibly, as Hävernick suggests (*Einleitung*, sec. xiv. p. 78), because the division consists mainly of *poetry*. It deserves notice that in Heb. iv. 7, where the quotation is taken from the anonymous Ps. xcvi., the book is

indicated by *David*, most likely because he was the largest and most eminent contributor, and also the patron and model of the other psalmists. For the same reasons many ancient and modern authors often speak of the book as the *Psalms of David* (Carpzov, *Introd.*, ii. 98), without intending to ascribe all the productions to him.

In every age of the church the Psalms have been extolled for their excellence and their use for godly edifying (Carpzov, *l. c.*, pp. 109-116). Indeed, if Paul's estimate of ancient inspired Scripture (2 Tim. iii. 15-17) can be justly applied to any single book, that book must be the Psalms. Even in the N. T. there is scarcely a work of equal practical utility. Basil the Great and Chrysostom, in their homilies (see Suiceri *Thes. Eccles.*, sub ψαλμός), expatiate most eloquently, and yet judiciously, on its excellence. The close of Basil's eulogy is to this effect: 'In it is found a perfect theology (ἐνταῦθα ἐνι θεολογία τελεία); prophecy of Christ's sojourn in the flesh, threatening of judgment, hope of resurrection, fear of retribution, promises of glory, revelations of mysteries—all things are treasured in the book of Psalms, as in some great and common store-house.' Among the early Christians it was customary to learn the book by heart, that psalmody might enliven their social hours, and soften the fatigues and soothe the sorrows of life. They employed the Psalms not only in their religious assemblies—of which use we find probable mention in 1 Cor. xiv. 26—but also at their meals and before retiring to rest, as Clement of Alexandria testifies: θυσία τῷ θεῷ ψαλμοὶ καὶ ὕμνοι παρὰ τὴν ἐστίαν, πρὸς τὴν κοίτην. Of their use at meals we find an example also in the institution of the Lord's Supper (Matt. xxvi. 30).

The great doctrines and precepts embodied in the Psalms, what views they give of God and his government, of man and his sinfulness, of piety and morals, of a future state, and of the Messiah, are most ably set forth by Tholuck in his *Einleitung*, sec. 4, and also by Delitzsch in his *Commentar*.

In this connection it may be well to notice what are called the *vindictive Psalms*, such as Ps. lix., lxix., lxxix., which present utterances of anger and imprecation against the enemies of God and his people. These and similar portions of Scripture, which indicate the spirit of resentment, if not of revenge, are very apt to shock the feelings of certain Christian readers, and to call forth the insidious cavils of men who discredit divine revelation. To avoid this offence, and to silence these objections, most of our devout commentators insist that the expressions in question are not maledictions, but mere declarations or predictions of what will come to pass. This explanation is, however, quite inadmissible; for in several of the most startling passages—such as Ps. lix. 14; lxix. 25, 28; lxxix. 6—the verbs in the original are plainly imperative and not indicative. It is possible, as Tholuck thinks (*Psalmen*, p. lxiii.), that in some of these utterances, especially the imprecations in Ps. cix., unholy personal feeling may have been mingled with godly zeal, as was the case seemingly with the two disciples James and John, when the Lord chided their desire for vengeance (Luke ix. 54-56.) But, in reality, the feeling expressed in these psalms may well be considered as virtuous anger, such as Bishop Butler explains and justifies in his sermons on *Resentment and the Forgiveness of Injuries*, and such as Paul teaches in Eph. iv.

26, 'Be ye angry and sin not.' Anger against sin and a desire that evil-doers may be punished are not opposed to the spirit of the Gospel, or that love of enemies which our Lord both enjoined and exemplified. If the emotion and its utterance were essentially sinful, how could Paul wish the enemy of Christ and the perverter of the Gospel to be accursed (*ἀνάθεμα*, 1 Cor. xvi. 22; Gal. i. 8); and especially, how could the spirits of the martyred saints in heaven call on God for vengeance (Rev. vi. 10), and join to celebrate its final execution (Rev. xix. 1-6)? Yea, resentment against the wicked is so far from being necessarily sinful, that we find it manifested by the Holy and Just One himself, when in the days of his flesh he looked around on his hearers 'with anger, being grieved for the hardness of their hearts' (Mark iii. 5); and when in 'the great day of his wrath' (Rev. vi. 17), he shall say to 'all workers of iniquity' (Luke xiii. 27), 'Depart from me, ye cursed' (Matt. xxv. 41). On this subject (*The Imprecations in the Scriptures*), the reader may find an admirable article from the accomplished pen of the amiable and much lamented Prof. B. B. Edwards, in the *American Bibliotheca Sacra* for February 1844.

The following are among the chief exegetical works on this book:—Venema, *Comment. in Psalmos*; Poli *Synopsis*; De Wette, *Commentar über die Psalmen*; Rosenmüller, *Scholia in Epit. Redacta*, vol. iii.; Maurer, *Comment. Crit. Grammaticus*, vol. iii.; Stier, *Siebzig ausgewählte Psalmen*; Ewald, *Poet. Bücher*, vol. ii.; Tholuck, *Uebersetzung und Auslegung der Psalmen*; Hengstenberg, *Commentar über die Psalmen*. This last, together with the commentaries of Hupfeld and Delitzsch, may be recommended as the best German helps for the thorough study of the book. Among English and American works the chief are by Ainsworth, Hammond, Horne, Horsley, Phillips, Noyes, Bush, and Alexander.—B. D.

#### PSALTERY. [MUSICAL INSTRUMENTS.]

PTOLEMAIS (*Πτολεμαῖς*). 1. A maritime town in Palestine. [ACCHO.] 2. A place described as *ροδοφόρος*, *rose-producing* (3 Maccab. vii. 17), and supposed to be the *ἄρμος Πτολεμαῖς* of Ptolemy (iv. 5. 57), in central Egypt, in the Arsinoite nome, a district still abounding in roses (Mannert, *Geogr. der Griechen u. Romanen*, x. 1, p. 419; Ritter, *Erdkunde*, i. 795, 797).—W. L. A.

PTOLEMY or PTOLEMEUS (*Πτολεμαῖος*), the name of several persons mentioned in the Apocrypha. Macedonian in its origin, it became the dynastic name of the Greek kings of Egypt. Of these the only one mentioned by name is Ptolemæus VI. Philometor, B.C. 181-146 (1 Maccab. i. 17; x. 51, ff.; xi. 1-18; xv. 16, ff.; 2 Maccab. i. 10; iv. 21; ix. 29; probably also Esther x. 20, sec. LXX.) This Ptolemy is referred to as 'the king of the south' in Dan. xi. 25. In this chapter also other princes of the same dynasty are alluded to—namely, Ptolemæus I. Soter, B.C. 323-283, or 285 (ver. 5); Ptol. II. Philadelphus, B.C. 285-247 (ver. 6); Ptol. III. Evergetes, B.C. 247-222 (ver. 7); Ptol. IV. Philopator, B.C. 222-205 (ver. 11, cf. 3 Maccab. i. 1-5); and Ptol. V. Epiphanes, B.C. 205-181 (ver. 14, 15).

Other persons of the name of Ptolemy mentioned in the Apocrypha are:—1. The son of Dorymeus, a courtier of influence under Antiochus Epiphanes

(1 Maccab. iii. 18; 2 Maccab. iv. 45-50; vi. 8). 2. The son of Agesarches, surnamed Macron, governor of Cyprus during the minority of Ptolemy Philometor (2 Maccab. viii. 8; x. 11-13; comp. Athenæus, vi. p. 246). 3. The son of Abubus, and son-in-law of Simon Maccabæus, who with two of his sons was murdered by him (1 Maccab. xvi. 11-16; comp. Joseph. *Antiq.* xiii. 7. 4; viii. 1). 4. The father of Lysimachus, by whom the letter [book] of Esther was translated (Esther x. 20, ap. LXX.) Whether this is the same Ptolemy who is mentioned in the same verse as the carrier of the book to Egypt remains uncertain.—W. L. A.

PUAH (*פּוּאָה*; Sept. *Φουά*). 1. The father of Tola, one of the judges of Israel (Judg. x. 1). 2. One of the sons of Issachar (1 Chron. vii. 1), elsewhere called Pua and Phurah.

PU'AH (*פּוּעָה*), one of the two midwives appointed by Pharaoh to attend on the Hebrew women (Exod. i. 15). Josephus (*Antiq.* ii. 9. 9) intimates that these were Egyptian women, and this has been adopted by some interpreters in recent times. But when it is considered that no Egyptian woman was likely to pollute herself by rendering such offices to a Hebrew woman—that Puah and Shiprah are described as fearing Jehovah (ver. 17)—that their names are Hebrew—and that though the words *לְמִיִּלֹת הַעֲבֵרִית* may be translated 'midwives of the Hebrews,' they more probably mean, as the A. V. gives them, 'Hebrew midwives,' and that had Moses intended to convey the other meaning he would have written *"לְמִיִּלֹת אֶת הָעֵבֶר"*; reason will be found for preferring the opinion that they were Hebrew women. Probably they were the heads of their profession, and so are named *instar omnium*.—W. L. A.

PUBLICAN (Gr. *τελώνης*; among the Romans *publicanus*), a person who farmed the taxes and public revenues. This office was usually held by Roman knights, an order instituted as early as the time of Romulus, and composed of men of great consideration with the government, 'the principal men of dignity in their several countries,' who occupied a kind of middle rank between the senators and the people (Joseph. *Antiq.* xii. 4). Although these officers were, according to Cicero, the ornament of the city and the strength of the commonwealth, they did not attain to great offices, nor enter the senate, so long as they continued in the order of knights. They were thus more capable of devoting their attention to the collection of the public revenue.

The publicans were distributed into three classes: the farmers of the revenue, their partners, and their securities, corresponding to the Mancipes, Socii, and Prædes. They were all under the Quæstor *Ærarii*, who presided over the finances at Rome. Strictly speaking, there were only two sorts of publicans, the Mancipes and the Socii. The former, who were generally of the equestrian order, and much superior to the latter in rank and character, are mentioned by Cicero with great honour and respect (*Orat. pro Plancio*, 9); but the common publicans, the collectors or receivers of the tribute, as many of the Socii were, are covered both by heathens and Jews with opprobrium and contempt.

The name and profession of a publican were, indeed, extremely odious among the Jews, who submitted with much reluctance to the taxes levied by the Romans. The Galileans or Herodians, the disciples of Judas the Gaulonite, were the most turbulent and rebellious (Acts v. 37). They thought it unlawful to pay tribute, and founded their refusal to do so on their being the people of the Lord, because a true Israelite was not permitted to acknowledge any other sovereign than God (Joseph. *Antiq.* xviii. 2). The publicans were hated as the instruments by which the subjection of the Jews to the Roman emperor was perpetuated; and the paying of tribute was regarded as a virtual acknowledgment of his sovereignty. They were also noted for their imposition, rapine, and extortion, to which they were, perhaps, more especially prompted by having a share in the farm of the tribute, as they were thus tempted to oppress the people with illegal exactions, that they might the more speedily enrich themselves. Theocritus considered the bear and the lion the most cruel among the beasts of the wilderness; and among the beasts of the city the publican and the parasite. Those Jews who accepted the office of publican were execrated by their own nation equally with heathens: 'Let him be unto thee as a heathen man and a publican' (Matt. xviii. 17). It is said they were not allowed to enter the temple or synagogues, to engage in the public prayers, fill offices of judicature, or even give testimony in courts of justice. According to the Rabbins, it was a maxim that a religious man who became a publican was to be driven out of the religious society (Grotius, *ad Matt.* xviii.; Lightfoot, *Hor. Heb. ad Matt.* xviii.) They would not receive their presents at the temple any more than the price of prostitution, of blood, or of anything wicked and offensive.

There were many publicans in Judæa in the time of our Saviour, of whom Zacchæus was probably one of the principal, as he is called 'chief among the publicans' (Luke xix. 2), a phrase supposed to be equivalent to our Commissioner of the Customs. Matthew appears to have been an inferior publican, and is described as 'sitting at the receipt of custom' (Luke v. 27). Jesus was reproached by the Jews as the friend of publicans and sinners, and for eating with them (Luke vii. 34); but such was his opinion of the unbelieving and self-righteous chief-priests and elders who brought these accusations, that he replied unto them, 'The publicans and the harlots go into the kingdom of God before you' (Matt. xxi. 31). The parable of the Pharisee and the Publican who went up in to the temple to pray (Luke xviii. 10) is a beautiful illustration of the distinction between hypocrisy and true piety. When Jesus visited the house of Zacchæus, who appears to have been eminently honest and upright, he was assured by him that he was ready to give one-half of his goods to the poor; and if he had taken anything from any man by false accusation, to 'restore him fourfold' (Luke xix. 8). This was in reference to the Roman law, which required that when any farmer was convicted of extortion, he should return four times the value of what he had fraudulently obtained. There is no reason to suppose that either Zacchæus or Matthew had been guilty of unjust practices, or that there was any exception to their characters beyond that of being engaged in an odious employment. Some other examples of this occur. Suetonius (*Vesp.*) mentions

the case of Sabinus, a collector of the fortieth penny in Asia, who had several statues erected to him by the cities of the province, with this inscription, 'To the honest tax-farmer.'

It has been imagined by some commentators that by the Jewish laws it was forbidden to pay tribute to foreigners, or to be employed as publicans under them (Deut. xvii. 15); but publicans that were Jews are so often mentioned in the N. T., that Dr. Lardner inclines to think the Roman tribute was collected chiefly by Jews. He conceives that in most provinces the natives were employed in the towns as under-collectors, and that the receivers-general or superior officers only were Romans. As the office was so extremely odious, the Romans might deem it prudent to employ some natives in collecting the taxes; and there is little doubt that in every district they would find Jews willing to profit by the subjection of their country, and to accept appointments from their conquerors.—G. M. B.

PUBLIUS (Πόπλιος), governor of Melita at the time of Paul's shipwreck on that island (Acts xxviii. 7, 8). Paul, having healed his father, probably enjoyed his hospitality during the three months of his stay in the island. An inscription found in Malta designates the governor of the island by the same title (πρώτος, 'first' or 'chief') which Luke gives to Publius. [MELITA.]

PUDENS (Πούδης), one of the persons whose salutations Paul, writing from Rome, sends to Timothy (2 Tim. iv. 21). Nothing is really known of him; but the martyrologies make him to have been a person of figure at Rome, of the senatorial order, and father of two pious virgins, Praxis and Pudencia. Yet, by a strange incongruity, he is also deemed to have been one of the seventy disciples. A female disciple, of the name of Claudia (Κλαυδία), is mentioned in the same verse; and as a poet of the time, Martial, speaks of the marriage of a Pudens and Claudia, the same persons are supposed to be intended. But this sort of identification requires little notice; and if Pudens and Claudia were husband and wife, it is unlikely that the apostle would have interposed another name between theirs. [CLAUDIA.]—J. K.

PUL (פול; Sept. Φουά, Φαλώχ, Φαλώς), the first of the series of Assyrian monarchs whose invasions of the kingdoms of Israel and Judah are mentioned in the Bible (2 Kings xv. 19, 20; 1 Chron. v. 26). Menahem, having succeeded in mounting the throne of Israel, proceeded to make himself master of the whole territory belonging to that kingdom. Setting forth from Tirzah he attacked and took by storm Tiphshah, or Thapsacus, on the Euphrates, which had once more been made a border town of Israel by the conquests of Jeroboam II., whose victorious career had restored the ancient boundaries of the land in that direction as they had been in the days of Solomon (2 Kings xv. 16; xiv. 25, 28; 1 Kings iv. 24). He appears to have thus drawn on himself the notice of Pul. The Assyrian monarch, having marched against him, was induced by the payment of a heavy tribute not only to withdraw his invading forces, but also to give Menahem his support 'to confirm the kingdom in his hand' against all other aspirants to the crown. There is great difficulty in determining what Assyrian king is referred to under the

name Pul. He must have ruled over Assyria as the immediate predecessor of Tiglath-pileser II., for this latter monarch, according to Sir H. Rawlinson (*Athenaeum*, No. 1793), is recorded to have received tribute in his eighth year from Menahem, whose reign occupied only ten years. For some time Sir H. Rawlinson identified him with a king whose cuneiform name he has variously represented as Iva-lush, Vul-lush, and Yama-zala-khus, and who reckoned among the countries tributary to himself that of Khumri or Samaria (Rawlinson's *Herodotus*, i. 467). This identification, however, he gave up on ascertaining that the lately deciphered Assyrian canon interposed the reigns of three kings, comprising 37 years, in addition to a probable interregnum of two or three years, between this king and Tiglath-pileser (*Athenaeum*, No. 1805). Subsequently he suggested that one and the same individual is denoted by the names Pul and Tiglath-pileser in the sacred narrative. His chief argument for this is that in 1 Chron. v. 26, the same event—namely the deportation of the tribes beyond the Jordan—is attributed to the two kings associated together as if they were one and the same individual (*Athenaeum*, No. 1869). But, as already remarked by Winer (*Realw.*, ii. 259), the passage in 1 Chron. does not necessarily ascribe to the two kings the accomplishment of the same measure. Pul is mentioned in it as the first Assyrian king who came into collision with the Israelites, and thus prepared the way for the subsequent deportation of the trans-Jordanic tribes. But that this measure is attributed solely to Tiglath-pileser, as in 2 Kings xx. 29, is manifest from the

use of the singular **יְהוֹשִׁעַ**. Dr. Julius Oppert, who accepts the account of Ctesias, and takes it to refer to the subversion of the first Assyrian empire, supposes Pul to be the Babylonian Belesys. The eminent Assyriologist Dr. Hincks maintains that 'Pul became king of Babylon, holding Assyria in subjection, in 787 B.C. Tiglath-pileser revolted from him and established an independent kingdom of Assyria in 768 B.C.' (*Athenaeum*, No. 1810). The main difference between this view and that of Dr. Oppert is, that Dr. Hincks supposes a considerable interval to have elapsed between Belesys, the conqueror of Nineveh, and Pul. It certainly appears the most plausible opinion; and it seems safest to acquiesce in it until further discoveries of cuneiform students lead to a more exact determination. It is in accordance with the scriptural chronology, and it falls in with what we can glean of Assyrian history from classical and monumental sources. The account of Ctesias, as found in Diodorus Siculus (*Hist.* ii.), though rejected by Sir H. Rawlinson and his followers (comp. Prof. Rawlinson, *Anc. Mon.*, ii. 521), has received the support of many eminent modern critics. It has been shown to be reconcilable with the narrative of Herodotus (*Hist.*, i. 102, 106), which contains intimations that there had been a subversal of the Assyrian empire prior to its final overthrow alluded to by that historian (see Winer, *Realw.*, i. 104). It is admitted that the Assyrian canon, in the period between Iva-lush IV. and Tiglath-pileser II., gives indication 'of troublous times, and of a disputed, or at any rate a disturbed succession' (Rawlinson, *Anc. Mon.*, ii. 386). The writer last cited also asserts that the inscriptions of Tiglath-pileser II. 'support the

notion of a revolution and change of dynasty in Assyria at this point of its history' (Rawlinson's *Herodotus*, i. p. 468). That Pul was a Babylonian holding rule in Assyria at this time is confirmed by the notice of Alexander Polyhistor (Euseb., *Chron.*, p. i. c. iv.) 'Post hos ait exstitisse Chaldæorum regem, cui nomen Phulus erat;' and also by the form of the name. The name Pul, while having, according to Professor Rawlinson, its counterpart among known Babylonian names, is wholly alien to the rules on which Assyrian names are formed. They are 'always compounds, consisting of two, three, or more characters' (*Anc. Mon.*, ii. 388, note).—H. C. G.

PUL (**פּוּל**; **Φούδ**; *Africa*), a country mentioned only in Is. lxvi. 19, and grouped between Tarshish and Lud. Hitzig, Knobel, and some others suppose that the true reading is **פּוּל**, which is elsewhere joined with Lud (Ezek. xxvii. 10; Jer. xli. 9; A. V. *Libyans*); and which is sometimes rendered in the LXX. **Φούδ** (Gen. x. 6; 1 Chron. i. 8), the same form which occurs here in that version; for this, however, there is no MS. authority, and we are therefore bound to receive the Masoretic reading as correct.

Bochart would identify Pul with *Phila*, an island in the Nile on the confines of Egypt and Ethiopia. The Egyptian name of that island is *Pelak*, which certainly bears some resemblance to the Hebrew *Pul*. Bochart says: *Phul* pro *Phil* scripsit Esaias permutatione literarum *Vau* et *Fod*, quâ nihil frequentius . . . Pro *Phul* Chaldaeus habet plurali numero **פּוּלַי**, *Phula*, cui proxime accedit **Φύλαι**, *Phila* (*Geogr. Sac.* in *Opp.* i. p. 269; cf. Michaelis, *Spicil.* i. p. 257). This is all very true; but it must be kept in mind that the other names here mentioned are those of great countries, while *Phila* is a very small island. Isaiah would scarcely speak of the Jewish people being driven to it. It seems much more probable that Pul was the name of some distant province of Africa; and perhaps the suggestion of Gesenius may be right, that we have a vestige of the old name in the word **Πολο**, which appears on inscriptions (*Thesaurus*, p. 1094).—J. L. P.

#### PULSE. [POL.]

PUNISHMENTS. This subject is properly restricted to the penalty imposed on the commission of some crime or offence against law. It is thus distinguished from private retaliation or revenge, cruelty, torture, popular violence, certain customs of war, etc. Human punishments are such as are inflicted immediately on the person of the offender, or indirectly upon his goods, etc. For the leading points in the literature of the question concerning future and divine punishment, see SOUL. *Capital punishment* is usually supposed to have been instituted at the deluge (Gen. ix. 5, 6): 'At the hand of every man's brother will I require the life of man: whoso sheddeth man's blood, by man shall his blood be shed; for in the image of God made he man.' Arnheim, however, contends that the words **אִישׁ אֶחָיו** must be rendered *his kinsman*, or near relative (compare xiii. 8, **אֲנָשִׁים אֶחָיו**, or margin), and thus explains the precept: if **הָאָדָם**, one stranger slay another, the kinsmen of the murdered man are the avengers of blood; but if he be slain by **אִישׁ אֶחָיו**, one of his own kindred, the other kinsmen must not spare the murderer,

for if they do, then divine providence will require the blood—that is, will avenge it. Certainly capital punishment for murder was not inflicted on Cain, who was purposely preserved from death by divine interposition (iv. 14, 15), and was simply doomed to banishment from the scene of his crime to a distant country, to a total disappointment in agricultural labour, and to the life of a fugitive and a vagabond, far from the manifested presence of the Lord (11, 14); although the same reason existed in equal force in his case, namely, the creation of man in the image of God. We are inclined to regard the whole of the ‘blessing’ pronounced upon the *Noachidae*, including this precept, as intended to encourage them to re-people the earth, by promises, etc., corresponding to the misgivings which were naturally created by the catastrophe they had just escaped; such as a *continuation* of the dread of man in the inferior creatures, a reinstatement of man in dominion over them (comp. i. 28), an assurance of God’s high regard for human life, notwithstanding his late destruction of all but themselves, and the institution of the most natural and efficient mode of preserving it, by assigning the punishment of homicide to the nearest of kin—no doubt, however, under the superintendence of the head of every family, who appears to have been the legislator till the reconstitution of things, spiritual and civil, at Sinai, when this among other ancient laws was retained, perhaps unavoidably, but at the same time regulated (Num. xxxv. 9-34). This interpretation would account for the custom of blood-revenge among all the ancient and Asiatic nations. Certainly those who *generalise* this precept into an authority for capital punishment by courts of law in *Christian* nations, ought, by parity of reason, to regard the prohibition of blood (Gen. ix. 4) of equal obligation. The punishment of death appears among the legal powers of Judah, as the head of his family, and he ordered his daughter-in-law Tamar to be burnt (xxxviii. 24). It is denounced by the king of the Philistines, Abimelech, against those of his people who should injure or insult Isaac or his wife (xxvi. 11, 29). Similar power seems to have been possessed by the reigning Pharaoh in the time of Joseph (xli. 13).

In proceeding to consider the punishments enacted by Moses, reference will be made to the Scriptures only, because, as Michaelis observes, the explanation of the laws of Moses is not to be sought in the Jewish commentators. Nor will it be necessary to specify the punishments ordered by him for different offences, which will be found under their respective names. [ADULTERY; IDOLATRY, etc.] The extensive prescription of capital punishment by the Mosaic law, which we cannot consider as a dead letter, may be accounted for by the peculiar circumstances of the people. They were a nation of newly-emancipated slaves, and were by nature perhaps more than commonly intractable; and if we may judge by the laws enjoined on them, which Mr. Hume well remarks are a safe index to the manners and disposition of any people, we must infer that they had imbibed all the degenerating influences of slavery among heathens. Their wanderings and isolation did not admit of penal settlements or remedial punishments. They were placed under immediate divine government and surveillance. Hence, wilful offences evinced an incorrigibleness which rendered

death the only means of ridding the community of such transgressors; and which was ultimately resorted to in regard to all individuals above a certain age, in order that a better class might enter Canaan (Num. xiv. 29, 32, 35). If capital punishment in Christian nations be defended from the Mosaic law, it ought in fairness to be extended to all the cases sanctioned by that law, and among the rest, as Paley argues, to the doing of any work on the Sabbath day (*Mor. Phil.*, b. v. ch. 7). We have the highest authority for saying, that the Mosaic law of divorce was a condescension to circumstances (Matt. xix. 8)—a condescension which may have extended somewhat further.

The *mode of capital punishment*, which constitutes a material element in the character of any law, was probably as humane as the circumstances of Moses admitted. It was probably restricted to lapidation or stoning, which, by skilful management, might produce instantaneous death. It was an Egyptian custom (Exod. viii. 26). The public effusion of blood by decapitation cannot be proved to have been a Mosaic punishment, nor even an Egyptian; for, in the instance of Pharaoh’s chief baker (Gen. xl. 19), ‘Pharaoh shall lift up thine head from off thee,’ the marginal rendering seems preferable, ‘shall reckon thee and take thine office from thee.’ He is said to have been ‘hanged’ (xli. 13); which may possibly mean posthumous exposure, though no independent evidence appears of this custom in ancient Egypt (Wilkinson’s *Manners and Customs*, vol. ii. p. 45). The appearance of decapitation, ‘slaying by the sword,’ in later times (2 Sam. iv. 8; xx. 21, 22; 2 Kings x. 6-8), has no more relation to the Mosaic law than the decapitation of John the Baptist by Herod (Matt. xiv. 8-12); or than the hewing to pieces of Agag before the Lord by Samuel, as a punishment *in kind* (1 Sam. xvi. 33); or than the office of the Cherethites, כרתים (2 Sam. viii. 18; xv. 18; xx. 7, 23), or headsmen, as Gesenius understands by the word, from כרת, ‘to chop off’ or ‘hew down’ (executioners belonging to the body-guard of the king); whereas execution was ordered by Moses, probably adopting an ancient custom, to be begun first by the witnesses, a regulation which constituted a tremendous appeal to their moral feelings, and afterwards to be completed by the people (Deut. xiii. 10; xvii. 7; Josh. vii. 25; John viii. 7). It was a later innovation that immediate execution should be done by some personal attendant, by whom the office was probably considered as an honour (2 Sam. i. 15; iv. 12). Stoning, therefore, was probably the only capital punishment ordered by Moses. It is observable that neither this nor any other punishment was, according to his law, attended with insult or torture (comp. 2 Maccab. vii.). Nor did his laws admit of those horrible mutilations practised by other nations. For instance, he prescribed stoning for adulterers (comp. Lev. xx. 10; Ezek. xxiii. 25; xvi. 38, 40; John viii. 5); but the Chaldeans cut off the noses of such offenders (Ezek. xxiii. 25). According to Diodorus, the Egyptian monarch Actisanes punished robbers in like manner, and banished them to the confines of the desert, where a town was built called Rhinocolura, from the peculiar nature of their punishment, and where they were compelled to live by their industry in a barren and inhospitable region (i. 60). Mutilation of such a nature amounts to a perpetual condemnation to infamy and

crime. It will shortly be seen that the *lex talionis*, 'an eye for an eye,' etc., was adopted by Moses as the *principle*, but not the mode of punishment. He seems also to have understood the true end of punishment, which is not to gratify the antipathy of society against crime, nor moral vengeance, which belongs to God alone, but prevention. 'All the people shall hear and fear, and do no more so presumptuously' (Deut. xvii. 13; xix. 20). His laws are equally free from the characteristic of savage legislation, that of involving the family of the offender in his punishment. He did not allow parents to be put to death for their children, nor children for their parents (Deut. xxiv. 16), as did the Chaldeans (Dan. vi. 24) and the kings of Israel (comp. 1 Kings xxi. ; 2 Kings ix. 26). Various punishments were introduced among the Jews, or became known to them by their intercourse with other nations—viz., *precipitation*, or throwing or causing to leap from the top of a rock, to which 10,000 Idumæans were condemned by Amaziah, king of Judah (2 Chron. xxv. 12). The inhabitants of Nazareth intended a similar fate for our Lord (Luke iv. 29). This punishment resembles that of the Tarpeian rock among the Romans. *Dichotomy*, or *cutting asunder*, appears to have been a Babylonian custom (Dan. ii. 5; iii. 29; Luke xii. 46; Matt. xxiv. 51); but the passages in the gospels admit of the milder interpretation of scourging with severity, discarding from office, etc. *Beating to death*, *τυμωανσμός*, was a Greek punishment for slaves. It was inflicted on a wooden frame, which probably derived its name from resembling a drum or timbrel in form, on which the criminal was bound and beaten to death (2 Maccab. vi. 19, 28; comp. v. 30). In Josephus (*de Maccab.*) the same instrument is called *τροχός*, or 'wheel' (secs. 5, 9). Hence to beat upon the tympanum, to drum to death, is similar to 'breaking on the wheel' (Heb. xi. 35). David inflicted this among other cruelties upon the inhabitants of Rabbath-ammon (1 Chron. xx. 3). *Fighting with wild beasts* was a Roman punishment, to which criminals and captives in war were sometimes condemned (Adam, *Roman Antiq.*, p. 344; 2 Tim. iv. 17; comp. 1 Cor. xv. 32). *Drowning* with a heavy weight around the neck, was a Syrian, Greek, and Roman punishment. This, therefore, being the custom of the enemies of the Jews, was introduced by our Lord to heighten his admonitions (Matt. xviii. 6). Josephus records that the Galileans, revolting from their commanders, drowned the partizans of Herod (*Antiq.* xiv. 15. 10). The Persians had a singular punishment for great criminals. A high tower was filled a great way up with ashes, the criminal was thrown into it, and the ashes, by means of a wheel, were continually stirred up and raised about him till he was suffocated (2 Maccab. xiii. 4-6). *The lion's den* was a Babylonian punishment (Dan. vi.), and is still customary in Fez and Morocco (see accounts of by Hoest, c. ii. p. 77). *Bruising and pounding to death in a mortar* is alluded to in Prov. xxvii. 22. For crucifixion, see the Article.

*Posthumous insults* offered to the dead bodies of criminals, though common in other nations, were very sparingly allowed by Moses. He permitted only hanging on a tree or gibbet; but the exposure was limited to a day, and burial of the body at night was commanded (Deut. xxi. 22). Such persons were esteemed 'cursed of God' (comp.

Josh. viii. 29; x. 26; 2 Sam. iv. 12)—a law which the later Jews extended to crucifixion (John xix. 31, etc.; Gal. iii. 13). *Hanging alive* may have been a Canaanitish punishment, since it was practised by the *Gibeonites* on the sons of Saul (2 Sam. xxi. 9). Another posthumous insult in later times consisted in heaping stones on the body or grave of the executed criminal (Josh. vii. 25, 26). To 'make heaps' of houses or cities is a phrase denoting complete and ignominious destruction (Is. xxv. 2; Jer. ix. 11). *Burning the dead body* seems to have been a very ancient posthumous insult. It was denounced by Judah against his daughter-in-law Tamar, when informed that she was with child (Gen. xxxviii. 24). Selden thinks that this means merely branding on the forehead (*De Jure N. et G.*, vii. 5). Moses retained this ancient ignominy for two offences only, which from the nature of things must have been comparatively rare—viz., for *bigamy* with a mother and her daughter (Lev. xx. 14), and for the case of a priest's daughter who committed whoredom (xxi. 9). Though 'burning' only be specified in these cases, it may be safely inferred that the previous death of the criminals, probably by lapidation, is to be understood (comp. Josh. vii. 25). Among the heathens this merciful preliminary was not always observed, as, for instance, in the case of Shadrach, Meshach, and Abednego (Dan. iii.)

Among the *minor corporal punishments* ordered by Moses, was scourging, or the infliction of blows on the back of an offender with a rod. It was limited by him to forty stripes—a number which the Jews in later times were so careful not to exceed, that they inflicted but thirty-nine (2 Cor. xi. 24). It was to be inflicted on the offender lying on the ground, in the presence of a judge (Lev. xix. 20; Deut. xxii. 18; xxv. 2, 3). We have abundant evidence that it was an ancient Egyptian punishment. Nor was it unusual for Egyptian superintendents to stimulate labourers to their work by the persuasive powers of the stick. Women received the stripes on the back, while sitting, from the hand of a man; and boys also, sometimes with their hands tied behind them. The modern inhabitants of the valley of the Nile retain the predilection of their forefathers for this punishment. The Moslem say, 'Nezel min e'semma e'nebóot báraka min Allah:' 'The stick came down from heaven a blessing from God.' Corporal punishment of this kind was allowed by Moses, by masters to servants or slaves of both sexes (Exod. xxi. 20). Scourging was common in after times among the Jews, who associated with it no disgrace or inconvenience beyond the physical pain it occasioned, and from which no station was exempt (Prov. xvii. 26; comp. x. 13; Jer. xxxvii. 15-20). Hence it became the symbol for correction in general (Ps. lxxxix. 32). Solomon is a zealous advocate for its use in education (Prov. xiii. 24; xxiii. 13, 14; comp. Eccles. xxx. 1). In his opinion 'the blueness of a wound cleanseth away evil, and stripes the inward parts of the belly' (Prov. xx. 30). It was inflicted for ecclesiastical offences in the synagogue (Matt. x. 17; Acts xxvi. 11). The Mosaic law, however, respecting it, affords a pleasing contrast to the extreme and unlimited scourging known among the Romans, but which, according to the Porcian law, could not be inflicted upon a Roman citizen (Cicero, *Pro Rabirio*, 3; *ad Famil.* x. 32; *in Verrem*, v. 53; comp. Acts

xvi. 22-37; xxii. 25). Reference to the scourge with scorpions—*i.e.*, a whip or scourge armed with knots or thorns—occurs in 1 Kings xii. 11. So in Latin, *scorpio* means 'virga nodosa vel aculeata.'

*Retaliation*, the lex talionis of the Latins, and the ἀντιπεπονθός of the Greeks, is doubtless the most natural of all kinds of punishment, and would be the most just of all, if it could be instantaneously and universally inflicted. But, when delayed, it is apt to degenerate into revenge. Hence the desirableness that it should be regulated and modified by law. The one-eyed man, mentioned by Diodorus Siculus (xii.), complained that if he lost his remaining eye, he would then suffer more than his victim, who would still have one left. Phavorinus argues against this law, which was one of the twelve tables, as not admitting literal execution, because the same member was more valuable to one man than another: for instance, the right hand of a scribe or painter could not be so well spared as that of a singer. Hence that law, in later times, was administered with the modification, 'Ni cum eo pacet,' except the aggressor came to an agreement with the mutilated person, *de talione redimenda*, to redeem the punishment by making compensation. Moses accordingly adopted the principle, but lodged the application of it in the judge. 'If a man blemish his neighbour, as he hath done so shall it be done to him. Life for life, eye for eye, tooth for tooth, wound for wound, stripe for stripe, breach for breach' (Exod. xxi. 23-25; Lev. xxiv. 19-22). His system of compensations, etc., occurs in Exod. xxi. He, however, makes wilful murder, even of a slave, always capital, as did the Egyptians. Roman masters had an absolute right over the life of their slaves (Juvenal, vi. 219). The Egyptians doomed the false accuser to the same punishment which he endeavoured to bring on his victim, as did Moses (Deut. xix. 19). Imprisonment, not as a punishment, but custody till the royal pleasure was known, appears among the Egyptians (Gen. xxxix. 20, 21). Moses adopted it for like purposes (Lev. xxiv. 12). In later times it appears as a punishment inflicted by the kings of Judah and Israel (2 Chron. xvi. 10; 1 Kings xxii. 27; Jer. xxxvii. 21); and during the Christian era, as in the instance of John (Matt. iv. 12), and Peter (Acts xii. 4). Murderers and debtors were also committed to prison; and the latter 'tormented' till they paid (Matt. xviii. 30; Luke xxiii. 19). A common prison is mentioned (Acts v. 18); and also an inner prison or dungeon, which was sometimes a pit (Jer. xxxviii. 6), in which were 'stocks' (Jer. xx. 2; xxix. 26; Acts xvi. 24). Prisoners are alluded to (Job iii. 18), and stocks (xiii. 27). Banishment was impracticable among the Jews. It was inflicted by the Romans on John (Rev. i. 9). *Cutting or plucking off the hair* is alluded to (Is. l. 6; Neh. xiii. 25). *Excision*, or 'cutting off from his people,' is denounced against the uncircumcised as early as the covenant with Abraham (Gen. xvii. 14). This punishment is expressed in the Mosaic law by the formulæ—'that soul shall be destroyed from its people' (Lev. xvii. 9, 10); 'from Israel' (Exod. xii. 15); 'from the midst of the congregation' (Num. xix. 20); 'it shall be destroyed' (Lev. xvii. 14; xx. 17); which terms sometimes denote capital punishment (Exod. xxxi. 14; comp. xxxv. 2; Num. xv. 32, etc.) [ANATHHEMA.]

*Ecclesiastical punishments* are prescribed, as might be expected, under a theocracy, but these were moderate. Involuntary transgressions of the Levitical law, whether of omission or commission, were atoned for by a sin-offering (Lev. iv. 2, etc.; v. 1, 4-7). This head embraced a rash or neglected oath, keeping back evidence in court (Lev. iv. 2, etc.; v. 1; iv. 7), breach of trust, concealment of property when found, or theft, even when the offender had already cleared himself by oath, but was now moved by conscience to make restitution. By these means, and by the payment of twenty per cent beyond the amount of his trespass, the offender might cancel the crime as far as the church was concerned (Lev. vi. 1-7; Num. v. 6-10). Adultery with a slave was commuted from death to stripes and a trespass-offering (Lev. xix. 20-22). All these cases involved public confession and the expenses of the offering.

*Future punishment*.—Though the doctrine of a future state was known to the ancient Hebrews, yet temporal punishment and reward were the immediate motives held out to obedience. Hence the references in the O. T. to punishment in a future state are obscure and scanty. [See HADES; HEAVEN; HELL.]—J. F. D.

PUNON, one of the stations of the Israelites in the desert. [WANDERING.]

PURIFICATIONS. [ABLUTIONS; UNCLEANNES.]

PURIM (פּוּרִים), the annual festival instituted by Mordecai, at the suggestion of Esther, to commemorate the wonderful deliverance of the Jews from the destruction with which they were threatened through the designs of Haman.

1. *Name of the Festival and its Signification*.—The name פּוּרִים (singular פּוּר), which is derived from the Persian *parē*, cognate with *pars*, *part*, and which is explained in Esther (iii. 7; ix. 24) by the Hebrew גּוּרַל, *lot*, has been given to this festival because it records the casting of lots by Haman to ascertain when he should carry into effect the decree which the king issued for the extermination of the Jews (Esther ix. 24). The name Φορπαλ, which, as Schleusner (*Lex. in LXX.*, s. v. Φορπαλ) and others rightly maintain, is a corruption of Φορπαλ, is the Greek pronunciation of the Hebrew term. In 2 Maccab. xv. 36, this festival is denominated ἡ Μαρδοχαϊκὴ ἡμέρα.

2. *The manner in which it was and still is observed*.—All that the Bible tells us about it is that Mordecai ordered the 14th and 15th of Adar to be kept annually by the Jews, both night and day, that these two days are to be made days of feasting and of joy as well as of interchange of presents and of sending gifts to the poor, and that the Jews agreed to continue to observe this festival every year in the same manner as they had begun it (Esther ix. 17-24). No further directions are given about its observance, and the Bible here, as elsewhere, left the rites and ceremonies to develop themselves with the circumstances of the nation. The following is the mode in which this festival is kept at the present day. The day preceding the festival—*i.e.*, the 13th of Adar—is kept as a fast day, and is called the *Fast of Esther*, תַּעֲנִית אֶסְתֵּר, in accordance with the command of this Jewish queen (Esther iv. 5, 6); and sundry prayers expressive of repentance, humiliation, etc. (סְלִיחוֹת), are intro-

duced into the regular ritual for the day. As on all the fast days, Exod. xxxii. 11-14; xxxiv. 1-11, is read as the lesson from the Law, and Is. lv. 6-lvi. 9, as the Haphtara. If the 13th of Adar falls on a Sabbath, the fast takes place on the Thursday previous, as no fasting is allowed on this sacred day, nor on the preparation-day for the Sabbath. Some people fast three days, as Esther enjoined it at first. On the evening of this fast day—i.e., the 13th of Adar—the festival commences, when all the Israelites resort to the synagogue, and after the evening service the Book of Esther, called *kar'*

ἐξοχὴν, the *Megilla* (מגילה, the *Roll*), is read by the prelector. Before commencing to read it he pronounces the following benediction: 'Blessed art thou, O Lord our God, king of the universe, who hast sanctified us with thy commandments, and hast enjoined us to read the *Megilla*! Blessed art thou, O Lord our God, king of the universe, who hast wrought miracles for our forefathers in those days and at this time. Blessed art thou, O Lord our God, king of the universe, who hast preserved us alive, sustained us, and brought us to this season! The *Megilla* is then read. As often as the reader pronounces the name of Haman, the congregation stamp on the floor, saying, 'Let his name be blotted out. The name of the wicked shall rot!' whilst the children spring rattles. The passage in which the names of Haman and his sons occur (ix. 7-9) is read very rapidly, and if possible in one breath, to signify that they were all hung at the same time, the congregation stamping and rattling all the time. It is for this reason that this passage is written in the MSS. in larger letters than the rest, and that the names are arranged under one another. After the *Megilla* is read through, the following benediction is pronounced by the reader, 'Blessed art thou, O Lord our God, king of the universe, who hast contended our contest, judged our cause, hast avenged our wrongs, requited all the enemies of our souls, and hast delivered us from our oppressors. Blessed art thou who hast delivered thy people from all their oppressors, thou Lord of salvation!'

In the morning of the 14th of Adar the Jews again resort to the synagogue, insert several appointed prayers into the ordinary daily ritual; Exod. xvii. 8-16 is read as the lesson from the Law, and the *Megilla* or the Book of Esther as the Haphtara, under the same circumstances as those of the previous evening. The rest of the festival is spent in great rejoicings, presents are sent backwards and forwards amongst friends and relations, and gifts are liberally forwarded to the poor.

From the canons which obtained in the time of Christ, we learn that the *Megilla* had to be written in Hebrew characters, on good parchment, and with ink (*Mishna, Megilla*, ii. 2); that if the 14th of Adar fell on a Tuesday or Wednesday, the inhabitants of villages read the *Megilla* on the Monday in advance, or a Thursday, because the country people came to town to attend the markets and the synagogues in which the law was read and tribunals held (*Megilla*, i. 1-3); that any one was qualified to read it except deaf people, fools, and minors (*Ibid.*, ii. 4), and that it was lawful to read it in a foreign language to those who understood foreign languages (*Ibid.* ii. 1). But though the *Mishna* allows it to be read in other languages, yet the *Megilla* is generally read in Hebrew, and

Mr. S. Clark, the writer of the article PURIM in Smith's *Dictionary of the Bible*, is certainly wrong when he says that the reader 'makes comments on particular passages,' as any one may convince himself by going to the synagogue on this festival. The rejoicings continue on the 15th, and the festival terminates on the evening of this day. During the whole of the festival the Jews may engage in trade, or any labour, if they are so inclined, as there is no prohibition against it. So popular was this festival in the days of Christ, that Josephus tells us, 'that even now, all the Jews that are in the habitable earth keep these days festivals, and send portions to one another' (*Antiq.* xi. 6. 13), and certainly its popularity has not diminished in the present day. For the much-disputed question whether ἐορτὴ τῶν Ἰουδαίων in John v. 1 means the feast of Purim, we must refer to the commentaries on St. John's Gospel.—C. D. G.

#### PURPLE. [COLOURS.]

PURVER, ANTHONY, was born at Up-Hursborn, in Hampshire, about 1702. Though his early education was very limited, his capacity and inclination for the acquisition of learning were very great. Determined to study the original languages of the Scriptures, he secured the assistance of a Jew in the acquisition of Hebrew, Chaldee, etc., and other aid for learning Greek and Latin. He joined the Society of Friends, and was a minister among them. Whilst labouring as a schoolmaster he occupied himself in preparing a new version of the Scriptures; and this, after spending more than 30 years over it, he published, by the aid of Dr. Fothergill, who gave him £1000, and carried it through the press at his own expense. It appeared in 1764, entitled, *A New Translation of the O. and N. T., with Notes, Critical and Explanatory*, in two volumes fol., beautifully got up. Notwithstanding the enormous labour bestowed upon it by its author, and though there is now and then a better rendering to be found in it than in the A. V., Purver's translation, as a whole, is not of much critical value. The style is crude and bombastic, the very reverse of what might have been expected from a member of the society whose language is so simple; whilst the notes, though containing much valuable matter, abound in contemptuous expressions about the labours of others in the same department. Purver's Bible is therefore deservedly scarce. He died in 1777, in the seventy-fifth year of his age.—C. D. G.

PURVEY, JOHN, the friend and fellow-labourer of Wycliffe, with whom he lived in his latter years. His denunciations of the errors of the Romish Church, as well as his endeavours to make the Bible accessible to the people at large, by translating it into English, drew upon him the severest penalties which it was in the power of the hierarchy to inflict. He was forbidden, by a mandate of the Bishop of Bristol, dated Aug. 1387, to preach in the diocese where he officiated after the death of Wycliffe; his books were declared as erroneous and heretical, and were among those which the bishops of Worcester, Salisbury, and Hereford were authorised to seize (May 29, 1388; Jan. 18, Dec. 16, 1389). Some years after, however, he made a recantation at St. Paul's Cross (Sunday, March 6, 1401), and was admitted (Aug. 11, 1401), on the presentation of the Archdeacon of Canterbury, to

the vicarage of Westthite in Kent, which he resigned Oct. 8, 1403. He then returned to the simple teaching of the Bible, denouncing the erroneous doctrines of the church, for which he was again imprisoned, and, in 1421, recanted a second time at Saltwood before Archbishop Arundel. He is supposed to have died about 1427. Purvey immortalised his name through his translation of the Scriptures into English. As the Bible, of late translated by Wycliffe, required correction, he tells us in the general introduction that he undertook to make the version more faithful, intelligible, and popular. The plan which he adopted to effect this, according to his own description, was as follows:—With the assistance of several fellow-labourers he (*i.*) corrected the Latin text by comparison of Bibles, doctors, and glosses; (*ii.*) Studied the text thus corrected with the gloss and other authorities, particularly de Lyra on the O. T. [LYRA]; (*iii.*) Made special reference to the works of grammarians and theologians for the meaning of difficult words and passages; and (*iv.*) Did not translate literally but according to the sense and meaning as clearly as he could, taking care to have many persons of ability present at the correction of the translation. He inserted numerous textual glosses in the O. T., and only occasionally omitted those of Wycliffe's version, but made no such insertions in the N. T., and carefully excluded all the glosses which were introduced into the former version. That he improved upon Wycliffe's translation is beyond doubt, as may be seen from a comparison of the following passages in the respective versions:—Gen. ix. 13; Exod. xxix. 2; Deut. xxxii. 2; xxxiii. 7; Josh. v. 15; vi. 25; Job x. 1; xi. 12; xiv. 12; Matt. xii. 5; xiii. 52; 1 Cor. iii. 13-15; which are pointed out by the erudite editors, the Rev. Josiah Forshall and Sir Frederic Madden, who for the first time published this early English version, together with Wycliffe's translation, in an entire form, in parallel columns, four volumes 4to, Oxford University Press, 1850. Purvey's translation of the N. T. was first published by Lewis, London 1731, fol., as Wycliffe's translation; it was then erroneously reprinted as Wycliffe's by Baber, London 1810, 4to, and by Bagster in the English Hexapla. Comp. Foxe, *The Acts and Monuments*, Townsend's edition, vol. iii. pp. 285, 292, 822, 826, London 1844; and the elaborate preface by Forshall and Madden to their edition of Wycliffe's and Purvey's translations of the Bible.—C. D. G.

PUTEOLI (Ποιόλοι), a maritime town of Campania, in Italy, on the north shore of the bay of Naples, and about eight miles north-west from the city of that name, where it still exists under the name of Pozzuoli. It derived its name from its tepid baths, whence the district in which it exists is now called Terra di Lavoro. The ancient Greek name of the place was Δικαίρχεια. It was a favourite watering-place of the Romans, as its numerous hot-springs were judged efficacious for the cure of various diseases. It was also the port where ships usually discharged their passengers and cargoes, partly to avoid doubling the promontory of Circeium, and partly because there was no commodious harbour nearer to Rome. Hence the ship in which Paul was conveyed from Melita landed the prisoners at this place, where the apostle stayed for a week (Acts xxviii. 13). The harbour

was protected by a celebrated mole, the remains of which are still to be seen.

PYGARG. [DISHON.]

PLYLE, THOMAS, born at Stodey in Norfolk in 1674, was ordained in 1698 to a curacy at King's Lynn, where he became greatly distinguished as a preacher, and was appointed lecturer at the chapel of St. Nicholas. He published, before 1718, six sermons in defence of the succession of the House of Brunswick. He afterwards distinguished himself in the famous Bangorian controversy, which arose out of a sermon preached by Hoadley, bishop of Bangor, before George I., on the text, 'My kingdom is not of this world,' to prove that the clergy ought to have no temporal jurisdiction. He sided with the bishop, who rewarded him with the gift of a canonry in Salisbury cathedral, when he was himself translated to that see. His views of Christian doctrine, like those of Hoadley, were strongly tainted with Socinianism—so much so, as to be a bar to that advancement in the church which his talents and political principles might otherwise have gained for him. His Biblical works were—1. *A Paraphrase, with Notes on the Acts of the Apostles and Epistles*, London 1737 and 1765, 2 vols. 8vo. This is a supplement to Dr. Samuel Clarke's *Paraphrase on the Four Gospels*. 2. *The Scripture Preservative against Popery; being a Paraphrase with Notes on the Revelation of St. John*, 1735, 1795, 8vo.. 3. *A Paraphrase, with Short and Useful Notes on the Books of the Old Testament*, published from time to time between 1715 and 1725, and united under one title in an edition of 1738, 4 vols. 8vo. Father Chais has made use of this work in the Bible, with a commentary drawn from several English authors, which he published at the Hague, in 8 vols., from 1763 to 1790.—M. H.

Q.

QAATH (קֶאֶת; Syr. ܩܐܬܐ, *qogo*; Arab. قوق, *quq*; LXX. πελεκάν). By this is denoted the *Pelican*. The name is supposed to be derived from the action of throwing up food, which the bird really effects when discharging the contents of the bag beneath its bill (*vomitor*, from נִקֵּי, Ges.) But it may be suggested, as not unlikely, that all the above names are imitative of the voice of the pelican, which, although seldom heard in captivity, is uttered frequently at the periods of migration, and is compared to the braying of an ass. It may be likewise that this characteristic has influenced several translators of the Hebrew text in substituting on some, or on all occasions, where *Qaath* occurs, *bittern* for *pelican*, but we think without sufficient reason [KIPPOD; BITTERN]. *Qaath* is found in Lev. xi. 18; Deut. xiv. 17; Ps. cii. 6; Is. xxxiv. 11; Zeph. ii. 14.

Pelicans are chiefly tropical birds, equal or superior in bulk to the common swan; they have powerful wings, fly at a great elevation, are partially gregarious, and though some always remain in their favourite subsolar regions, most of them migrate to our hemisphere with the northern spring, occupy Syria, the lakes and rivers of temperate Asia, and extend westward into Europe up the

Danube into Hungary, and northward to some rivers of southern Russia. They likewise frequent salt-water marshes, and the shallows of harbours, but seldom alight on the open sea, though they are said to dart down upon fish from a considerable height.

The face of the pelican is naked; the bill long, broad, and flat, is terminated by a strong crooked and crimson-coloured nail, which, when fish is pressed out of the pouch, and the bird is at rest, is seen reposing upon the crop, and then may be

445.

fancied to represent an ensanguined spot. This may have occasioned the fabulous tale which represents the bird as wounding her own bared breast to revive its young brood; for that part of the bag which is visible then appears like a naked breast, all the feathers of the body being white or slightly tinged with rose colour, except the great quills, which are black. The feet have all the toes united by broad membranes, and are of a nearly orange colour. *Pelicanus onocrotalus*, the species here noticed, is the most widely spread of the genus, being supposed to be identical at the Cape of Good Hope and in India, as well as in western Asia. It is very distinctly represented in ancient Egyptian paintings, where the birds are seen in numbers congregated among reeds, and the natives collecting basketfuls of their eggs. They still frequent the marshes of the Delta of the Nile, and the islands of the river high up the country, and resort to the lakes of Palestine, excepting the Dead Sea. With regard to the words 'of the wilderness or desert,' often added to the pelican's name in consequence of their occurrence in Ps. cii. 6, there is not sufficient ground to infer from them any peculiar capability in the genus to occupy remote solitudes; for they live on fish, and generally nestle in reedy abodes; and man, in all regions, equally desirous to possess food, water, and verdure, occupies the same localities for the same reasons. We think the Psalmist refers to one isolated by circumstances from the usual haunts of these birds, and casually nestling among rocks, where water, and consequently food, begins to fail in the dry season, as is commonly the case eastward of the Jordan—a such a supposition offering an image of misery and desolation forcibly applicable to the context.—C. H. S.

QALI (קָלִי). [FOOD.]

QANEH. [KANEH.]

QAYITS (קַיִץ). [FRUITS.]

QERACH. [KERACH.]

QETSACH. [KETZACH.]

QETZIAH. [KETZIOTH.]

QIDDAH. [KIDDAH.]

QINNAMON. [KINNAMON.]

QIPPOD. [KIPPOD.]

QIPPOZ (קִּפּוֹז). This is rendered in the A. V. by 'great owl' (Is. xxxiv. 15). Bochart has shewn, however, that the word denotes the *arrow-snake*, *serpens jaculus*, the same as the Arab. قَفَاةٌ, *qiphphaza* (Hieroz., bk. i. ch. 9). It abounds in Arabia; it springs suddenly and with much vigour on its victim, and its sting is fatal.—W. L. A.

QIQAYON. [KIKAYON.]

QISHUIM. [KISHUIM.]

QORE (קֹרֶה, 1 Sam. xxvi. 20; Jer. xvii. 11; Sept. κέρδιξ; Vulg. *perdix*, Ecclus. xi. 30). Late commentators state that there are four species of the *tetrao* (grouse) of Linnæus abundant in Palestine; the francolin (*T. francolinus*), the katta (*T. alchata*), the red-legged or Barbary partridge (*T. petrosus*), and the Greek partridge (*T. saxatilis*). In this now obsolete classification there are included not less than three genera, according to the more correct systems of recent writers, and not one strictly a grouse occurs in the number, though the real *T. Urogallus*, or cock of the woods, is reported to frequent Asia Minor in winter, and in that case is probably no stranger in Libanus. There is, however, the genus *Pterocles*, of which the *P. alchata* is the katta, ganga, cata, and pin-tailed grouse of authors, a species very common in Palestine, and innumerable in Arabia; but it is not the only one, for the sand-grouse of Latham (*P. arenarius*) occurs in France, Spain, Barbary, Arabia, Persia, and on the north side of the Mediterranean, or all round Palestine. *P. Arabicus*, and probably *P. exustus*, or the Arabian and singed gangas, occur equally in the open districts of the south, peopling the desert along with the ostrich. All are distinguished from other genera of *Tetraonidae* by their long and powerful wings, enabling them to reach water, which they delight to drink in abundance; and by this propensity they often indicate to the thirsty caravan in what direction to find relief. They feed more on insects, larvæ, and worms than on seeds, and none of the species having a perfect hind toe that reaches the ground, they run fast: these characteristics are of some importance in determining whether they were held to be really clean birds, and consequently could be the *selav* of the Israelites, which our versions have rendered 'quail.' [SELAV.]

The Francolin forms a second genus, whereof *F. vulgaris*, or the common tree-partridge, is the Syrian species best known, though most likely not the only one of that country. It is larger than the ganga; the male is always provided with one pair of spurs (though others of the genus have two), and has the tail longer than true partridges. This species is valued for the table, is of handsome plumage, and common from Spain and France, on both sides of the Mediterranean, eastward to Bengal.

The partridge is a third genus, reckoning in Syria the two species before named, both red-legged and furnished with orange and black cres-

446. Partridge of Syria. *Francolinus Vulgaris*.

cents on the sides; but the other markings differ, and the Barbary species is smaller than the Greek. They are inferior in delicacy to the common partridge, and it is probable that *Perdix rufa*, and the

447. The Katta. *Pterocles Alchata*.

Caspian partridge, both resembling the former in many particulars, are no strangers in Syria.

The expostulation of David with Saul, where he says, 'The king of Israel is come out to seek a flea, as when one doth hunt a partridge on the mountains,' is perfectly natural; for the red-legged partridges are partial to upland brushwood, which is not an uncommon character of the hills and mountains of Palestine; and the koria sitting on her eggs and not hatching them (Jer. xvii. 11), we take to allude to the liability of the nest being trodden under foot, or robbed by carnivorous animals, notwithstanding all the care and interesting manœuvres of the parent birds to save it or the brood; for this genus is monogamous, nestles on the ground, and both male and female sit and anxiously watch over the safety of their young.

The name *Qorè*, is, we think, derived from the voice of a bird, and more than one species of bustard is thereby indicated in various tongues to the extremity of Africa and of India; among which *Otis cory* and *Otis Arabs* are so called at this day, although the first-mentioned resides on the plains of Western India, the second in Arabia. We take both these, however, to be the same species. 'Cory' is likewise applied in Caffraria to a bustard, which from an indigenous word has been converted

by the Dutch into knorhaan. Notwithstanding the pretended etymology of the word, by which it is made to indicate a long beak, none of the genus, not even *Otis Denhami* (a large bird of Northern Africa), has it long, it being, in fact, middle-sized in all. Thus it would appear that the type of the name belongs to *Otis*, and it might be maintained that species of that genus were known to the Hebrews, by their name קֹרָא, *kora* or *koria*, were it not for the fact that birds bearing this name were hunted by the Hebrews, which could not well have been the case had they not included other genera; for bustards, being without a hind toe, were considered unclean, while partridges having it were clean. The ganga or katta, being provided with a small incomplete one, may have offered an instance where the judgment of the priesthood must have decided. We give figures of both *Francolinus vulgaris* and *Pterocles alchata*.—C. H. S.

QOTZ. [KOTZ.]

QUAIL. [SELAV.]

QUARTUS (*Kobaptos*), a Christian, resident a Corinth, and, from his name, apparently a Roman, whose salutations Paul communicated to the church of Rome in his epistle thereto (Rom. xvi. 23). In the old church books he is alleged to have been one of the seventy disciples, which is altogether unlikely; and it is on the same authority stated that he was eventually bishop of the church at Berytus.—J. K.

QUATERNION (*τετραδιον*), 'a quaternion of soldiers' (Acts xii. 4), was a detachment of four men, which was the usual number of a Roman night-watch. Peter, therefore, was guarded by four soldiers, two within the prison, and two outside the doors; and as the watch was usually changed every three hours, it was necessary that the 'four quaternions' mentioned in the text should be appointed for the purpose (Veget., *De Re Milit.*, ii. 8; Philo, *In Flacc.*, p. 98).—J. K.

QUEEN. The Hebrews had no word properly answering to our term 'queen,' which is the feminine of 'king;' neither had they the dignity which that word denotes. The Hebrew word usually translated 'queen' is מַלְכָּה, *gebirah*, which means 'mistress,' or 'lady,' being the feminine of מַלִּיךְ, *gebir*, 'master,' or 'lord.' The feminine is to be understood by its relation to the masculine, which is not applied to kingly power, or to kings, but to general authority and dominion. It is, in fact, the word which occurs twice with reference to Isaac's blessing of Jacob:—'Be *lord* over thy brethren;' and, 'I have made him thy *lord*' (Gen. xxvii. 29-37).

The limited use which is made even of the restricted term *gebirah* is somewhat remarkable. It is only employed twice with reference to the wife of a king. In one of these two cases it is applied to the wife of the king of Egypt, where the condition of the royal consort was more *queenly* than in Palestine (1 Kings xi. 19; comp. Wilkinson, *A. Egypt.*, ii. 59; iii. 64; v. 28); and in the other to Jezebel, the wife of Ahab, who, as the daughter of a powerful king, appears to have enjoyed peculiar privileges in her matrimonial state (2 Kings x. 13). In two other places it is not clear whether the king's wife or mother is intended (Jer. xiii. 18;

xxix. 2) ; and in the remaining passages it is pointedly referred to the king's mother in such terms as clearly show that the state which *she* held was one of positive dignity and rank (1 Kings xv. 13 ; 2 Chron. xv. 16).

There is another word, שֶׁגֹּל, *shegol*, also translated 'queen,' which simply denotes the king's wife or (in the plural) his wives, as distinguished from his concubines. It occurs in Ps. xlv. 9 ; Neh. ii. 6 ; Dan. v. 2, 3, 23.

The result of all inquiry into the subject seems to show that among the Jewish kings the usages bearing on this point were not different from those which are still exhibited in Western Asiatic courts. Where woman never becomes the head of the state, there can be no queen regnant ; and where polygamy is allowed or practised, there can be no queen consort. There will, however, be a chief wife in the harem ; and this is no doubt the rank indicated in the Bible by the words which we render 'queen.' This rank may be variously acquired. The first wife of the king, or the first whom he took *after his accession*, usually obtained it ; and if she is both of high birth and becomes the mother of the first son, her position is tolerably secure : but if she possesses neither of these advantages, she may be superseded in her position as head of the harem by a wife of higher birth and connections, subsequently espoused, or by one who becomes the mother of the heir-apparent. The king, however, will sometimes act according to his own pleasure in this matter, promote any favourite lady to this dignity, and also remove her from it at his pleasure ; but more generally he finds it convenient to follow the established routine. The king of Egypt's daughter was, doubtless, from her high rank, the chief wife of Solomon ; as was Jezebel, for the same reason, the chief wife of Ahab. In like manner the high-born mother of Absalom was probably the chief wife of David, although it is possible that the mother of the eldest son Amnon at first enjoyed that distinction, which, we may safely presume, eventually devolved on Bathsheba, after her son Solomon had been recognised as the heir (comp. Chardin, *Voyages*, edit. Langles, vi., ch. xii. ; Thornton's *Turkey*, ii. 264-286).

Very different was, and is to this day, in Western Asia, the position of the king's mother, whose state is much the nearest to that of an European queen of any with which the East is acquainted. It is founded on that essential principle of Oriental manners which in all cases considers the mother of the husband as a far superior person to his wife, and as entitled to more respect and attention. This principle should be clearly understood, for it extends throughout the Bible, and is yet entirely different from our own social arrangements, under which the mother, as soon as she becomes widowed, abandons her place as head of the family to the daughter-in-law (Urquhart, *Spirit of the East*, ii. 387, seq.)

This usage is by no means peculiar to the modern East, or to the Jews among the ancient Orientals. Heeren, indeed, thinks that the power 'of the queen-mother' was even more considerable among the ancient Persians than among the modern Turks (*Hist. Researches*, i. 400) ; and the narratives of Herodotus and Ctesias respecting the tyrannical influence exercised by Parysatis, Amestris, and others, bear ample testimony to this fact. The

careful reader of Scripture will easily be able to trace the same ideas respecting the position of the king's mother among the Israelites (comp. 1 Kings i. ii. ; xv. 13 ; 2 Kings ix. 22, 30, 37 ; x. 13 ; xi. 1, ii.)—J. K.

QUEEN OF HEAVEN. [ASHTORETH.]

QUEEN OF SHEBA. [SHEBA.]

QUESNEL, PASQUIER, was born at Paris 14th July 1634. He studied at the Sorbonne ; in 1657 he entered the congregation of the Oratory ; and two years after he was ordained priest. Having been appointed to the office of President of the Institute of the order, he composed for the benefit of the pupils a work containing moral reflections on the four gospels (Paris 1671). He subsequently extended these notes over all the N. T. books, and re-wrote those on the gospels ; the whole work appeared in 2 vols. 12mo, at Paris, in 1687, and having passed through many editions was finally revised and much enlarged by the author, and issued in 8 vols. in 1736, with the title *N. T. en françois avec des reflexions morales*. This work, at first received with much fame, was afterwards denounced, and gave rise to the famous Bull Unigenitus, in which 101 propositions from it are condemned. This, together with his having attached himself to the Jansenists, exposed Quesnel to much persecution, from which he had to take refuge in Holland. He died at Amsterdam 2d Dec. 1719. His notes have been translated into German by J. A. Gramlich, Frankf. 1718, 4to, and into English, Lond. 1719-25, 4 vols. 8vo. The part on the gospels was translated in an expurgated form ['the Popish errors expunged'] by 'a presbyter of the Church of England,' 2 vols. 8vo, Bath 1790. This was republished, with an introductory essay by Dr. D. Wilson, late Bishop of Calcutta, 3 vols. 12mo. These notes are much esteemed for their spirituality and richness.—W. L. A.

QUICKSAND (σύρτις). In Acts xxvii. 17, it is mentioned that when the ship in which Paul was embarked was driven past the Isle of Clauda on the south, the mariners, as would now be said, struck the sails and scudded under bare poles, lest they 'should fall into the quicksands.' The original word *syrtis* denotes a sandbank or shoal, dangerous to navigation, *drawn*, or supposed to be *drawn* (from σύρω, 'to draw') together by the currents of the sea. Two syrtis, or gulfs with quicksands, were particularly famous among the ancients ; one called Syrtis Major, between Cyrene and Leptis, and the other, Syrtis Minor, near Carthage. Both then lay nearly to the south-west of the west end of Crete, adjoining which, on the south, lay the Isle of Clauda. These Syrtis were the great dread of those who navigated the seas in which the vessel was driven, and one of them was probably in this case the object of alarm to the mariners. The danger was not so imaginary in this case, we apprehend, as Dr. Falconer (*Dissert. on St. Paul's Voyage*, p. 13) conceives. For the apprehension does not appear to have been entertained till the ship had been driven *past* the isle of Clauda ; which, as we take it, is mentioned merely as the last point of land which had been seen till the ship was wrecked on the isle of Melita. The position of that island must be regarded as indicating the course in which they were driven ; and if that were Malta, it is

clear, that had that course not been arrested by the intermediate shipwreck, they would in all probability have been driven upon the Syrtis Minor, which we may therefore conclude to have been the subject of their apprehension. That apprehension only becomes 'imaginary' when Meleda in the Adriatic is taken, as Dr. Falconer himself takes it, for the Melita of Scripture. It may therefore be added to the arguments in favour of Malta, that its identification with Melita gives reality to the fear entertained by the mariners, which under the other alternative must be supposed to have been imaginary. [MALTA.]

QUIRINUS. [CYRENIUS.]

QUIVER. [ARMOUR; ARMS.]

QUOTATIONS. The quotations contained in Scripture are of three classes—I. Those which the later writers of the O. T. make from the earlier, such as Micah iv. 1-3 from Is. ii. 2-4; Heb. ii. 14 from Is. xi. 9; Jon. ii. 3 from Ps. xlii. 8; ii. 5 from Ps. lxxix. 2; Obad. i. 8 from Jer. xlix. ; and several passages in the later Psalms, which are found also in the earlier. 2. The quotations made by St. Paul from heathen authors—viz., Acts xvii. 28; from Aratus, *Phaenomena*. 5; or Cleanthes, *Hymn. ad Jov.* 5; 1 Cor. xv. 33 from Menander's *Thais*; and Tit. i. 12 from Callimachus *Hymn. ad Jov.* 8, according to Theodoret, or Epimenides according to Jerome, Chrysostom, Epiphanius, and others. To these may be added Gal. v. 23, where the words *κατὰ τῶν τοιοῦτων οὐκ ἔστι νόμος* are identical with the words of Aristotle, *Pol.* iii. 8 (Gill, *Notes and Queries*, v. 175). Perhaps also Acts xiv. 17, and James i. 17, from their rhythmical form, may be quotations. 3. Those which the N. T. contains from the O. T. This third class is the most important, and the only one demanding special notice here. In regard to it there are three points requiring to be considered—I. The sources whence these quotations are taken; 2. The mode of their introduction; and 3. The purpose for which they are made.

I. *Sources whence the quotations are made.*—These are two, the Hebrew original and the Septuagint translation. On comparing the passages in order to apportion the quotations between these two sources, we find that by far the larger number are taken either wholly or chiefly from the Septuagint, while a very few materially differ from both the Septuagint and the Hebrew. The latter were probably quoted from memory; the occasion not requiring punctilious accuracy in the citation. For the most part the deviations from the text of the Hebrew or the Septuagint are not material. They may be classed as follows:—

1. Changes of person, number, or tense, in particular words. Thus in Matt. xxvi. 31, we read, *πατάξω τὸν ποιμένα, καὶ διασκορπισθήσεται τὰ πρόβατα τῆς ποιμνῆς*, whilst the LXX. gives it, *πάταξον τὸν ποιμένα, καὶ διασκορπισθήσονται,\* κ.τ.λ.*, Zech. xiii. 7. John xix. 36, *Ὅστος οὐ συντρίβεται αὐτοῦ*, for *Ὅστος οὐ συντρίψεται ἀπ' αὐτοῦ*, Exod. xii. 46. 1 Pet. ii. 24, *Ὁὐ τῷ μῶλωπι αὐτοῦ ἰδὼντες, for τῷ μῶλωπι αὐτοῦ ἰδθηνεν*, Is. liii. 5, etc. Comp. also Matt. xi. 10 with Mal. iii. 1; and John xix. 37 with Zech. xii. 4.

\* This is the reading of the Alexandrine Codex; that of the Vatican differs considerably: *πατάξατε τοὺς ποιμένας καὶ ἐκσπάσατε τὰ πρόβατα*.

2. Substitution of synonymous words or phrases for those used in the LXX. or Heb.: *ex. gr.*, John xiii. 18, *Ὁ τρώγων μετ' ἐμοῦ τὸν ἄρτον, ἐπῆρεν ἐπ' ἐμὲ τὴν πτέρην αὐτοῦ*, for *Ὁ ἐσθίων ἄρτους μου ἐμεγάλυνεν ἐπ' ἐμὲ πτερνισμόν*, Ps. xl. (xli.) 9.

Comp. Heb. viii. 8, ff. Matt. xii. 20, where *ἡμεῖς* *ἐκβάλλει εἰς νίκος τὴν κρίσιν*. Sometimes the words thus substituted are synonymous with those for which they are used only *historically*; as when Paul (Gal. iv. 30) calls Isaac *ὁ υἱὸς τῆς ἐλευθέρας*, in a passage quoted from Gen. xxi. 10, where, in the words of Abraham, he is mentioned by name as *ὁ υἱὸς μου Ἰσαάκ*. Occasionally also this kind of substitution is effected by the use of a word describing a species for one designating the genus to which it belongs; as when Paul, in 1 Cor. iii. 20, substitutes the words *τῶν σοφῶν* for the more general expression *τῶν ἀνθρώπων*, used in the passage (Ps. xix. 11) which he quotes; or as in Matt. xxii. 37, where *διανοία* is put for *ἦν*, the special kind of strength intended being that of the mind.

3. Words and phrases transposed: *ex. gr.*, Rom. x. 20, *Εὐρέθην τοῖς ἐμὲ μὴ ζητοῦσιν, ἐμφανὲς ἐγενήθη τοῖς ἐμὲ μὴ ἐπερωτῶσιν*, for *Ἐμφανὲς ἐγενήθη τοῖς ἐμὲ μὴ ἐπερωτῶσιν, εὐρέθην τοῖς ἐμὲ μὴ ζητοῦσιν*, Is. lxxv. 1,\* etc.

4. Words and clauses interpolated or added: *ex. gr.*, John vi. 31, *ἄρτον ἐκ τοῦ οὐρανοῦ ἔδωκεν αὐτοῖς φαγεῖν*, where the words *ἐκ τοῦ* and *φαγεῖν* are an addition (comp. Ps. lxxviii. 24). 1 Cor. xv. 45, *Ἐγένετο ὁ πρῶτος ἀνθρώπος Ἀδάμ εἰς ψυχὴν ζῶσαν*, where the words *πρῶτος* and *Ἀδάμ* are added by the apostle (comp. Gen. ii. 7). These additions are made sometimes from parallel passages, and sometimes of the writer's own device, for the purpose of rendering the meaning of the passage clearer, or connecting it more readily with the preceding or subsequent context.

5. Words omitted, and passages abridged: *ex. gr.*, Matt. iv. 6, *τοῖς ἀγγέλοις αὐτοῦ ἐντελεῖται περὶ σοῦ, καὶ ἐπὶ χειρῶν ἀρουσί σε, μήποτε προσκύψῃς πρὸς λίθον τὸν πόδα σου*, for *τοῖς ἀγγέλοις αὐτοῦ ἐντελεῖται περὶ σοῦ, τοῦ διαφυλάξαι σε ἐν πάσαις ταῖς ὁδοῖς σου ἐπὶ χειρῶν ἀρουσί σε, μήποτε προσκύψῃς πρὸς λίθον, τ. π. σ.* Ps. xc. 11, 12. Comp. also Matt. xxii. 24 with Deut. xxv. 5; Rom. ix. 27, 28, with Is. x. 22, 23; Heb. iv. 4 with Gen. ii. 3, etc.

6. Passages paraphrastically rendered, or the general sense only given: *ex. gr.*, Rom. ix. 25, where we have a paraphrastic rendering of Hosea ii. 23; Rom. x. 6, ff., a free rendering of Deut. xxx. 12, ff.; 1 Cor. i. 31, where the general sense of Jer. ix. 24 is given; comp. also 1 Pet. ii. 22 with Is. lix. 9.

7. Several passages quoted together, so as to form one connected sense: *ex. gr.*, in 2 Cor. vi. 16-18 we have a passage made up of no less than three different passages—Lev. xxvi. 11; Is. liii. 11; Jer. xxxi. 1; comp. also Mark i. 2, 3, where Mal. iii. 1 and Is. xl. 3 are combined; also Rom. xi. 8, where Is. xxix. 10 and Deut. xxix. 4 are strangely mixed together.

8. Several of these species of deviations combined together: *ex. gr.*, Rom. ii. 24, *τὸ γὰρ ὄνομα τοῦ Θεοῦ δι' ὑμῶν διασφμεῖται ἐν τοῖς ἔθνεσι*, for *δι'*

\* The Codex Alex. gives this passage exactly as cited by Paul.

οὐμὰς διὰ παντὸς τὸ ὄνομά μου βλασφημεῖται ἐν τοῖς ἔθνεσι. Here we have the substitution of τοῦ Θεοῦ for μου, and the omission of διὰ παντὸς. Comp. also Rom. xi. 3 with 1 Kings xix. 14, for an instance of the combination of omission, substitution, and transposition.

9. Passages rather indicated, or hinted at, than formally quoted: *ex. gr.*, Eph. v. 14, Ἐγείραι ὁ καθεύδων, καὶ ἀνάστα ἐκ τῶν νεκρῶν, καὶ ἐπιφαύσει σοι ὁ Χριστός. The difficulty of assigning this quotation to any passage in the O. T. has been felt by all interpreters, and various theories have been proposed for the sake of removing it. The most probable, however, seems that which regards these words as formed upon Is. lx. 1-3, and the passage as rather hinted at than quoted.\* Comp. also Heb. xiii. 15, with Hos. xiv. 2. To this head may be also referred John vii. 38, where no particular passage is quoted, but such passages as Is. xlv. 3; lv. 1; lviii. 11; Zech. xiv. 8; xiii. 1, are alluded to.

Of these none, it is obvious, amounts to a destruction of the identity of the quotation. Some of them are evidently the result of intention on the part of the writer or speaker; as, for instance, where a word or phrase is added for the fuller exposition of the passage, or when such grammatical changes are made as are required by the context into which the quotation is introduced. Many of them may be attributable to various readings, so that we cannot be certain that at the time the autographs of the N. T. were issued, all the discrepancies existed which we now find on comparing their quotations with the LXX, or Heb. In fine, it is to be remembered that the N. T. writers appear to have, in the majority of cases, quoted from memory, which will easily account for their transposing and altering words and phrases, omitting words, or indicating in a general way, instead of fully quoting the passage to which they refer. That they chiefly quoted from memory must be admitted when we consider the circumstances in which their writings were, for the most part, composed—sometimes on a journey—sometimes in prison—very seldom if ever where access to books could be had,—and observe the vagueness and generality which frequently characterise their references to the O. T. Scriptures; as when, instead of naming the book from which they cite, they merely say ἔστι γεγραμμένον, or ἡ γραφή λέγει, or still more vaguely, διεμαρτύρητο δέ που τις, 'some one has somewhere testified,' Heb. ii. 6; Εἶρηκε γὰρ πον, 'he hath somewhere said,' iv. 4. Comp. Σόλων γὰρ πον εἶπε, κ.τ.λ. Plato, *Erast.*, *Opp.*, ed. Stallbaum, vi. 2, p. 276.

Some passages appear in the N. T. as quotations which are not to be found in the O. T. Of these the most remarkable are Matt. ii. 15; ii. 23; John vii. 38; James iv. 5. The two first we think are best accounted for by supposing them to be quotations of prophecies traditionally handed down and current among the Jews. That there must have been many such, no one who remembers the names of Samuel, and Nathan, and Gad, and Elijah, and Elisha, and others who are mentioned in Scripture, all of whom doubtless prophesied concerning Christ, will see much reason to doubt.†

That Matthew should refer to any of these it may be more difficult to admit; but when it is considered, in the first place, that, supposing such to exist, it was as natural and as desirable to show their fulfilment in Christ as it was to show that of the written prophecies; and secondly, that it is just as probable that the evangelist should have referred to traditional prophecies, as that the apostles should have referred to traditional facts, as they repeatedly do,—this difficulty may, perhaps, be surmounted.

The attempts that have been made to trace these quotations to parts of the O. T. have only succeeded in showing how futile such attempts are. It is true that Matt. ii. 15 finds a parallel in Hos. xi. 1, but beyond a verbal correspondence the two passages have nothing in common. The subject of the one is entirely different from that of the other; the one being the deliverance of the Israelites from their bondage in Egypt, the other being the return of our Saviour from his place of safety in Egypt. Nor does the language of the prophet bear the remotest semblance of a prediction, but on the contrary is entirely expostulatory and historical. And, in fine, if his words are to be viewed as containing a prediction of Christ, they must mean, that though God loved him when a child and called him out of Egypt, yet when he grew up he ceased to please Jehovah and departed from him. This is plainly the statement of the prophet, but who would by any means apply this to Christ? Various attempts have been made to show that Matthew merely accommodated this passage to the case of our Saviour; but this appears to be forbidden by the obviously argumentative purpose for which he introduces it. Nearly akin to this is the opinion of those who argue that as Israel was a type of Christ, what was said of the one might be applied to the other; for this after all just amounts to the assertion that Matthew accommodated what Hosea said of the literal Israel to what is supposed to have been the antitype of that people. Had the evangelist quoted the supposed type itself as fulfilled in the antitype, his reasoning would have been direct and free from any accommodation; but to suppose him to affirm that Hosea foretold Christ's being carried into Egypt, because he referred to the fact of the deliverance of the type of Christ from Egypt, is only to affirm in a roundabout way that he accommodated the prophet's words to suit his own purpose. Besides, how absurd to talk of the deliverance of Israel from Egypt being a type of our Saviour's being carried down to Egypt and back again by his parents! One historical fact the type of another! and that, when hardly any analogy subsists between them!

With regard to Matt. ii. 23 it is admitted that no such prophecy as that here cited occurs in the O. T.; but, nevertheless, attempts have been made to trace it somehow to the written prophecies. The favourite hypothesis appears to be that, since many prophets foretold the mean and despised estate of the Messiah, and as 'Nazarene' was a synonym with the Jews for a mean and despicable person, so the affixing of this name to our Lord was a fulfilment of these prophecies concerning him. The assumption here made as to the use

\* See Bloomfield *in loc.* Greek N. T., 3d ed.

† 'Non dubitandum est,' says Surenhusius, 'quin apud Judæos multa veterum prophetarum oracula VOL. III.

memoria tantum conservata fuerint sine scriptis eaque interdum ad memoriam juvandam a quibusdam annotata fuisse.'—*Bib. Kat.*, p. 25.

of the term Nazarene among the Jews is entirely without authority; but, passing this by, let us see what this hypothesis involves. It would follow from it—1st, that the *only* way in which our Lord fulfilled these prophecies was by bearing the name of Nazarene; for Matthew does not say that he thereby fulfilled *part* of what was spoken, but the *whole*; and 2dly, that Joseph was divinely directed to take up his abode in Nazareth, in order that our Lord might acquire a nickname for the fulfilment of prophecies which make no allusion to his bearing such a name, and which would have been fulfilled, whether he had borne that name or not! It is amazing that a supposition fraught with such consequences should have found any quarter.

No less futile appears to be the hypothesis that Matthew here refers to Is. xi. 1. The reasoning of those who support this opinion seems to be this—Nazareth was originally and properly called *Nezer*; but Isaiah in that passage calls the Messiah *Nezer*; therefore, when Jesus Christ was taken down to Nazareth and was called a Nazarene, this prediction was fulfilled. It may be allowed, for the reasons advanced by Hengstenberg (*Christology*, ii. 106 ff., E. T.), that Nezer or Netser was probably the original name of Nazareth. But conceding this, what follows? It follows that what Matthew calls a fulfilment of prophecy, was really nothing better than a sort of play upon words. Isaiah said that the Messiah should be a Nezer, and in fulfilment of this, says Matthew, he was carried to Nezer that he might be called a Nazarene. Can we really suppose that this is the meaning of the sacred writer?

A recent learned and devout writer has advanced the opinion that the term Nazarene was applied to our Lord as a sort of aggregate of all that is said in the prophets concerning the Messiah that may fairly be expressed by the word *Ναζωραῖος*; and thus he proposes to include the נָצִיר of Is. xi. 1, etc., the references to circumstances of humiliation under which the Messiah was to appear, and the general reproach attaching to the town of Nazareth (Ellicott, *Life of our Lord*, p. 81, note). Now, if the learned prelate had *proved* that *Ναζωραῖος* includes these ideas—the idea of נָצִיר, a branch, and also the idea of humiliation and contumely, and had he shown in any articulate way how by becoming and being called a Nazarene our Lord fulfilled certain prophecies in the O. T. concerning him, he would have done something of importance towards establishing his hypothesis. As it is, he assumes the very things that require to be proved, and so leaves his hypothesis without a basis.

It has been alleged as a fatal objection to the hypothesis we have embraced that the phrase 'by the prophets' in the N. T. refers exclusively to the canonical books of the O. T. (Smith's *Dictionary of the Bible*, s.v. *Nazarene*.) To this it may be replied—(1.) That the phrase *διὰ τῶν προφητῶν*, without any qualifying adjunct, occurs only *once* besides in the N. T.—viz., Rom. iii. 21—and even there it is so coupled with *τοῦ νόμου* that its application to the written prophecies is *specially* indicated; (2.) So far is the phrase by itself from indicating properly the canonical prophets, that the apostle, when he wishes to specify these, finds it necessary to add *ἐν γραφαῖς ἀγλαῖς* (Rom. i. 1); (3.) The altogether equivalent phrase, 'by [or by the mouth of] his holy prophets,' occurs where others besides

the canonical prophets are included (comp. Luke i. 70; Acts iii. 21); (4.) The appellation of *προφήται* is used so as include many besides the canonical prophets (Matt. v. 12; xxiii. 37; Luke xi. 50; 1 Thess. ii. 15); and the mere addition of *διὰ* cannot affect the meaning or application of the word; (5.) Even supposing it proved that the phrase in question invariably elsewhere in the N. T. refers to the canonical prophets, this is accounted for by the fact that they had no occasion to refer to any others, and can never be held to prove that a writer who had occasion to refer to others to whom it was equally applicable was thereby precluded from so using it.

On John vii. 38 it may suffice here to remark that perhaps the best solution of the difficulty is to regard our Lord as not making any direct quotation from any part of the O. T., but as only referring in metaphorical language, suited to the strain of his previous address (comp. ver. 37), to a fact which in plainer style is unquestionably announced in the ancient prophecies—viz., the abundant possession of divine knowledge by those who should live under the Messiah's reign.

The passage James iv. 5 is beset with difficulty. Not only is there doubt as to what 'Scripture' is cited, but much obscurity hangs over the meaning of the words themselves so adduced. We cannot enter into the details of the investigation. Referring for these to Huther's note on the passage in Meyer's *Kommentar*, Abt. 15, the substance of which is given by Dean Alford in his notes, we content ourselves here with saying, that some interpreters understand *πνεῦμα* of the human spirit, and translate 'the spirit [temper, feeling of mind] which dwells in us lusts to envy [covetousness];' while others understand it of the Holy Spirit, or the Spirit implanted in the soul by God, and translate either, 'The Spirit which dwelleth in us lusts (desires, inclines) against envy;' or, 'The Spirit which he [God] hath placed in us jealously desireth [us for himself]. In neither case can the statement be referred to any single passage in the O. T.; but, if the last rendering be adopted, the writer may be supposed to refer generally to those parts of the O. T. in which God is represented as dwelling in his people (Num. xxxv. 34; Ezek. xxxvi. 27), and as desiring them with a jealous affection (Deut. xxxii. 10, ff.) This is far from satisfactory, but it seems the best solution that has been offered.

II. *Mode in which quotations from the O. T. in the N. T. are introduced.*—For this purpose certain formulæ are employed, of which the following is a list: *καθὼς* or *οὕτω* *γράφεται*, *πὼς* *γράφεται*; *Ἔστι* *γεγραμμένον*, *Ὁ λόγος* *ὁ γεγραμμένος*, *κατὰ* *τὸ* *γεγραμμένον*, *Ἐβρήθη*, *καθὼς* *εἴρηται*, *κατὰ* *τὸ* *εἰρημένον*, *Ἡ γραφή* *εἶπε* or *λέγει*, or simply *λέγει* (sup. *Θεὸς* vel *προφήτης*), *περιέχει* *ἐν* *τῇ* *γραφῇ*, *Ὁ νόμος* *ἔλεγεν*, *Ἐῖρηκε* *δέ* *τις*, *Βλέπετε* *τὸ* *εἰρημένον*, *Οὐδέποτε* *ἀνέγνωτε*; *Καθὼς* *ἐλάλησε*, *Τότε* *ἐπληρώθη* *ἡ* *γραφῇ*, *Ἦνα* (*ὅπως*) *πληρωθῇ* (*τελειωθῇ*) *τὸ* *ῥηθὲν* (*ἡ* *γραφῇ*). Surenhusius is of opinion, and labours to prove, that by attending to the force of these different formulæ, we may ascertain with what intent the words they respectively introduce are quoted, as each formula, he asserts, involves a different meaning (*Præf. in Bib. Catal.*) A fatal objection, however, to this opinion is, that we find the very *same* quotations, expressed in the same words, and brought to prove the very same points, introduced

by *different* formulæ in different gospels (Horne, *Introd.*, ii. 339). At the same time, there are obviously two classes of these formulæ, the difference between which is distinctly marked by the circumstance that, whilst some of them merely express the fact that what follows is a quotation, others of them intimate the existence of a material relation between the passage quoted and the subject of which the writer quoting it is treating. Thus, when it is simply said, 'The Scripture saith,' nothing more is *necessarily* implied than that what follows is taken from the O. T.; but when it is said, 'Then was the Scripture fulfilled which saith,' or 'This was done that the Scriptures might be fulfilled,' we immediately perceive that the writer would intimate a real connection of some sort between the event he is recording and the statement with which he compares it in the passage quoted. We may, therefore, so far adopt the hypothesis of Surenhusius, as to admit a distinction between these two classes, and expect to find in the passages introduced by the latter of them something more than a mere verbal quotation.

Beside the quotations introduced by these formulæ there is a considerable number scattered through the writings of the apostles which are inserted in the train of their own remarks without any announcement whatever of their being cited from other writers. To the cursory reader the passages thus quoted appear to form a part of the apostle's own words, and it is only by intimate acquaintance with the O. T. Scriptures, and a careful comparison of these with those of the N. T., that the fact of their being quotations can be detected. In the common version every trace of quotation is in many of these passages lost, from the circumstance that the writer has closely followed the LXX., whilst our version of the O. T. is made from the Hebrew. Thus, for instance, in 2 Cor. viii. 21, Paul says, *προνοούμενοι καλὰ οὐ μόνον ἐνώπιον Κυρίου, ἀλλὰ καὶ ἐνώπιον ἀνθρώπων*, which, with a change in the mood of the verb, is a verbatim citation of the LXX. version of Prov. iii. 4. Hardly any trace of this, however, appears in the common version, where the one passage reads, 'Providing for honest things not only in the sight of the Lord, but also in the sight of men;' and the other, 'So shalt thou find favour and good understanding in the sight of God and man.' So also in 1 Pet. iv. 18, the apostle quotes word for word from the LXX. version of Prov. xi. 31, the clause, *εἰ δὲ δίκαιος μόλις σώζεται, ὁ ἀσεβὴς καὶ ἀμαρτωλὸς ποῦ φανείται*;—a quotation which we should in vain endeavour to trace in the common version of the Proverbs, where the passage in question is rendered, 'Behold, the righteous shall be recompensed in the earth; much more the wicked and the sinner.' Such quotations evidently show how much the minds of the N. T. writers were imbued with the sentiments and expressions of the O. T., as exhibited in the Alexandrine version.

III. *Purposes for which these quotations are introduced.*—These, as appears from an examination of the passages, are three.

1. *For the explanation or proof of some doctrinal position.*—Thus Paul, for the sake of explaining and confirming his doctrine of the efficacy of faith, quotes repeatedly from Habak. ii. 4, the sentence 'The just shall live by faith.' So also, in order to prove that mere natural descent from Abraham did

not of itself entitle any one to the divine favour, the same apostle quotes the terms of God's promise to Abraham, in which he expressly declares that in Isaac alone of all Abraham's family was the *seed* of Abraham—*i.e.*, the spiritual Israel—to be called or chosen. Comp. also Rom. iv. 7, 8; ix. 12, 13, 15, 17, 20, 21; xii. 19, 20; xiv. 10, 11, etc. It is to be observed that the passages thus adduced are almost always found in writings addressed to Jews, and are therefore to be regarded as containing *argumenta e concessis*. They are always applied, if not in the words, at least in the sense of the original from which they are taken.

2. *For the purpose of pointing out the application of the passage quoted to some statement or description in the context into which it is introduced.* From the circumstance that several of the passages thus adduced are in the phraseology of the N. T., as well as in that of the Rabbinical writings, said to be 'fulfilled,' it has been hastily inferred by some that they are all to be regarded as designed prophecies of the events to which they are applied. For this opinion, however, no adequate support seems to be afforded by the phrase in question. The general idea attached to the verb *πληρῶω* is that of filling up to its full capacity anything of which it is predicated. Thus the Jews are said by Christ to have filled up the measure (*πληρώσατε τὸ μέτρον*) of their fathers, Matt. xxiii. 32. The phrase in question consequently is susceptible of application to whatever is thought of as supplying the complement of any given capacity, and that whether it is used in a literal or tropical sense. Hence it is appropriately used in the N. T. with respect to passages quoted from the O. T. in the following cases:—

*First*, when it announces the accomplishment of a prophecy contained in the words quoted. As the prediction is a mere empty declaration, as it were, until the fact predicted has occurred; so that fact, by giving meaning and force to the prediction, is viewed as its complement or filling up. Thus the N. T. writers, in recording the facts of our Lord's history, when they come to any which formed the subject of ancient prophecy, whether explicit or typical, direct the attention of their readers to the circumstance by adducing the prediction and intimating its *fulfilment* in the fact they have recorded.

*Secondly*, when it introduces some description or statement which affords a *parallel* to what the writer has been saying. Such a description being regarded as involving a fact of general applicability to the human race, or to certain portions of it, is thought of as being, so to speak, in a state of deficiency until the measure of its applicability has been filled up. Each new case, therefore, which affords a parallel to that to which the description was originally applied goes so far to supply this deficiency, by affording another instance in which the description holds; and hence the N. T. writers are in the habit of quoting such descriptions as having been fulfilled in the cases to which they are applied by them. Thus a passage from the prophecies of Jeremiah, in which a description is given of the desolation caused by the divine judgments upon the Jews, under the beautiful personification of Rachel rising from the dead looking in vain for her children, and refusing to be comforted because they are not, is adduced by Matthew (ii. 17, 18)

as fulfilled in the sorrow which was produced by the massacre of the babes in Bethlehem by order of Herod. No person who studies the context of the passage as it occurs in the O. T. can suppose for a moment that it contains a *prediction* of the cruelties which were perpetrated on the occasion related by the evangelist. The sole purport of the quotation seems to be to intimate, as Bishop Kidder remarks, that 'such another scene of sorrow appeared then (upon the murder of the innocents) as was that which Jeremy mentions upon another sad occasion' (*Demonstration of the Messiah*, Pt. ii. p. 215; see also Sykes, *Essay on the Truth of the Christian Religion*, etc., pp. 217, 218; Blaney, *in loc.*; Henderson, *in loc.*, and on Hos. ii. 1; De Wette, on Matt. ii. 17, 18; and Marsh's *Notes to Michaelis*, vol. i. p. 473). Comp. Matt. xv. 7, 8, with Is. xxix. 13; Matt. xiii. 14 with Acts xxviii. 25 and Is. vi. 9, etc.

It appears, then, that even when a quotation is introduced by a part of the verb *πληρώω*, it does not necessarily follow that it is to be regarded as containing a prophecy. This is true as well of the conditional formula *ἵνα* (*ὅπως*) *πληρωθῇ*, as of the more direct *τότε* *ἐπληρώθη*, for these particles, as used in the N. T., frequently express nothing more than that occasion is given for a particular action or remark.

Besides the passages introduced as *fulfilled*, there are others referable to the same general head, which are introduced by others of the formulæ above mentioned. Of these, some belong to both the classes just described—*prophecies* of which the N. T. announces the fulfilment, and *general descriptions* to which something parallel is brought forward. Another class consists of moral and religious maxims, which are adduced as applicable to the state of things of which the writer or speaker is discoursing, and which, though not said to be fulfilled thereby, are quoted under essentially the same idea. Such sentences embody, as it were, certain laws of human nature and conduct, certain general facts in the human economy, of which we are to expect the verification wherever the necessary conditions are exemplified. Like the laws of physical science, therefore, they are dependent for their verification upon the examination of the phenomena appropriate to that region to which they belong; and as no law of science can be said to lie absolutely beyond the possibility of refutation until every one of the phenomena which it embraces has been examined and been found to support it, every experiment or occurrence that favours it may be said to fill up what is wanting to its perfect and undeniable certainty. Hence the N. T. writers, in recording events or describing characters which accord with and so exemplify the truth of the moral maxims of the O. T., speak of these as if they had contained actual pre-intimations of the occurrence to which they are applied. They contain, in fact, the *norm* or *rule* according to which the matter in question has occurred.

The usage of the N. T. writers in the cases we have been considering is illustrated by that of the Rabbinical writers in their quotations from the O. T., as Surenhusius has largely shown in his work upon this subject (*Βίβλος Καταλλαγῆς*, etc. etc., lib. i.; see also Waehner, *Antiquitates Hebraeorum* vol. i. p. 527, ff.) Instances have also been adduced of a similar usage by the classical and ecclesiastical writers. Thus, Ælian introduces

Diogenes Sinopensis as saying that 'he fulfilled and endured the curses out of the tragedy' (*ὅτι αὐτὸς ἐκπλήροι καὶ ὑπομένει τὰς ἐκ τῆς τραγωδίας ἀράς*). Olympiodorus says of Plato that 'a swarm of bees made honey on his lips (*ἵνα ἀληθὲς περὶ αὐτοῦ γένηται*,

Τοῦ καὶ ἀπὸ γλώσσης μέλιτος γλυκίων ῥέεν αὐδῇ,  
Il., A. 249),

that it might become true concerning him, 'And from his tongue flowed a strain sweeter than honey,' which is what Homer says of Nestor. Epiphanius says of Ebion, 'But in him is fulfilled that which is written: I had nearly been in all mischief, between the church and the synagogue' (*ἀλλ' ἐν αὐτῷ πληροῦται τὸ γεγραμμένον*, κ. τ. λ. *Hæresis Ebion.*, cap. i.) So also the Latin *implere* is used by Jerome: 'Cæterum Socraticum illud impletur in nobis, Hoc tantulum scio, quod nescio' (*Ep. 103 ad Paulin.* (Cf. Clem. Rom., *Ep. I. ad Cor.*, sec. 3.)

Thirdly, the N. T. writers make quotations from the Old, for the purpose of *clothing their own ideas in language already familiar to their readers, or attractive from its beauty, force, or dignity*. The writings of the O. T. were the great classics of the Jewish nation, venerable at once for their literary value and their divine authority. In these the youth of Judæa were carefully instructed from their earliest years, and with their words all their religious thoughts and feelings were identified. Hence it was natural, and nearly unavoidable, that in discoursing of religious subjects they should express their thoughts in language borrowed from the books which had formed the almost exclusive objects of their study. Such quotations are made for merely literary purposes—for ornament of style, for vigour of expression, for felicity of allusion, or for impressiveness of statement. The passages thus incorporated with the writer's own thoughts and words, are not appealed to as proving what he says, or as applying to any circumstance to which he refers; their sole use appears to be to express in appropriate language his own thoughts. Thus, when Paul, after dissuading the Roman Christians from the indulgence of vindictiveness, adds in the words of Solomon (Prov. xxv. 21, 22), 'Therefore, if thine enemy hunger, feed him; if he thirst, give him drink, for in so doing thou shalt heap coals of fire upon his head;' the quotation evidently serves no other purpose than to express in language of an appropriate and impressive kind, the duty which the apostle would enjoin, and which would have been equally intelligible and equally binding if expressed in his own words, as when uttered in those of the inspired author of the Proverbs. On what other principle, moreover, are we to account for the quotation made by Paul, in Rom. x. 18, from the 19th Psalm, where, in speaking of the diffusion of the gospel among the Jews, he says, 'But I say, have they not heard? Yes, verily, their sound went into all the earth, and their words into the end of the world'—a passage originally applied by the Psalmist to the heavenly bodies? To insist upon regarding this as a prediction of the diffusion of the gospel, or as furnishing even a parallel to it, is surely to sacrifice reason and common sense to prejudice or some favourite theory.

It has appeared to some that the hypothesis of an *accommodation* of words originally used of one

thing to designate another, is inconsistent with due reverence to the divine word. But wherein does the alleged irreverence of such a practice lie? To employ the words of Scripture to express low and unworthy ideas, or for the sake of giving point to mere worldly reasonings, is to use them irreverently; but to use them to convey ideas as elevated as those originally attached to them, if not more so (which is the case, *ex. gr.*, in Rom. x. 18), has but little appearance of treating them with irreverence. The only ground on which such a charge could be maintained is, that words once employed by an inspired writer in a peculiar combination become thenceforward *sacred to the expression in that combination of the one idea they were first used to designate*, whatever others they may be susceptible of expressing. But who is there who could seriously attempt to defend such a position as this? If this were the case, every quotation not made expressly as authority would be liable to censure; and, as the number of such in the N. T. is indisputably considerable, hardly any of its writers would stand clear of blame. [ACCOMMODATION.]

The truth is, the practice of making use, in this way, of previous and popular writers, is one which was common, not only in the days of the apostles, but which can hardly fail to be common wherever an established national literature exists. In proof of this, we have only to examine the writings of the later classics of Greece and Rome, which abound in quotations direct and accommodated from their earlier authors. We see the same course pursued by the Rabbinical writers towards the O. T., and by the Christian Fathers towards both the O. T. and the N. T., as well as towards the profane classics. Indeed, such quotations form so apt and natural an ornament of style, that writers of all ages and countries, where the means of doing so exist, have availed themselves of it. Why, then, should we wonder that such a practice should have been followed by the sacred writers, who in other respects appear to have obeyed in the preparation of their works the ordinary rules and usages, both grammatical and rhetorical, of literary composition?

## R.

RAAMAH (רַעְמָה or רַעְמָא; *Regmá*; but in Ezek. xxvii. 22, *Ῥαμμά*; Alex. *Ῥαγμά*; *Regma*, and *Reema*), the fourth son of Cush, and the father of Sheba and Dedan (Gen. x. 7; 1 Chron. i. 9). It appears that the descendants of Cush colonised a large part of the interior of Africa, entering that great continent probably by the straits of Babel-mandeb. A section of the family, however, under their immediate progenitor Raamah, settled along the eastern shores of the Arabian peninsula. There they founded nations which afterwards became celebrated, taking their names from Raamah's two sons, Sheba and Dedan [CUSH]. Though Sheba and Dedan became nations of greater importance and notoriety, yet the name Raamah did not wholly disappear from ancient history. Ezekiel, in enumerating the distinguished traders in the marts of Tyre, says, 'The merchants of Sheba and *Raamah*, they were thy merchants; they occupied in the fairs with chief of all spices, and with all precious stones, and gold' (xxvii. 22). The eastern provinces of Arabia were famed in all ages for their spices. The position of Sheba is well known [SHEBA], and Raamah must have been near it.

There can be little doubt that in the classic name Regma (*Regmá*), which is identical with the Septuagint equivalent for Raamah, we have a memorial of the O. T. patriarch and of the country he colonised. The town of Regma was situated on the Arabian shore of the Persian Gulf, on the northern side of the long promontory which separates it from the ocean. And it is interesting to note that, on the southern side of the promontory, a few miles distant, was a town called *Dadena*, evidently identical with *Dedan*. Around Regma Ptolemy locates an Arab tribe of the Anariti (*Geog.* vi. 7). Pliny appears to call them *Epimaranite* (vi. 26), which, according to Forster (*Geog. of Arabia*, i. 64), is just an anagrammatic form of *Ramanite*, the descendants of *Raamah*—an opinion not improbable. Forster traces the migrations of the nation from Regma along the eastern shores of Arabia to the mountains of Yemen, where he finds them in conjunction with the family of Sheba (*Id.*, pp. 66-71). There the mention of the *Rhamanite* tribe by Strabo, in connection with the expedition of Galkus (xvi., p. 781), seems to corroborate the view of Forster [SHEBA]. Be this as it may, however, there can be no doubt that the original settlements of the descendants of Raamah were upon the south-western shores of the Persian Gulf. Probably, like most of their brethren, while retaining a permanent nucleus, they wandered with their flocks, herds, and merchandise, far and wide over Arabia. For the different views entertained regarding Raamah, see Bochart, *Opp.* i. 218; Michaelis, *Spicileg.* i. 193.—J. L. P.

## RAAMESSES. [RAMESES.]

RAB, properly *Abba Areka*, or Abba of Areka, a city on the borders between Susiana and Babylon, on the river Tigris. This eminent expositor of the Pentateuch was born about 165 A.D., and obtained the Babylonian appellation *Rab* (רב) = *the Teacher*, in consequence of the great reverence in which

he was held by his numerous disciples; just as Jehudah the Holy was called in Palestine *Rabbi* (רַבִּי), i.e., *the Teacher*, or *Rabbenu* (רַבֵּנוּ), i.e., *our Teacher*. After the death of his father Aibu, he went to Judæa and became the disciple of R. Jehudah, whose redaction of the Mishna he afterwards took back with him to Babylon, where it became the basis of discussion, and of the Babylonian Talmud. Having brought a codex of the Mishna with him, Rab now founded the celebrated college at Sora (219 A.D.), which maintained its celebrity for nearly 800 years, and which attracted about 1200 students from all parts of Babylon in the lifetime of its founder. In this college, which was called *Be-Rab* (בֵּרַב), being an abbreviation of *Beth-Rab* (בֵּית רַב), the school of Rab, the disciples assembled two months in the year—viz., *Adar* and *Elul*—in autumn and spring, for which they were denominated *Farhe Kalla* (יֹרְהֵי כֵלָה), the months of assembly; and into it all the people were admitted a whole week before each principal festival, when this distinguished luminary delivered expository lectures for the benefit of the nation at large. So eager were the people to hear him, and so great were the crowds, that many could find no house accommodation, and were obliged to take up their abode in the open air on the banks of the Sora river (*Succa*, 26 a). These festival discourses were

denominated *Rigle* (רִגְלֵי), and during the time in which they were delivered all courts of justice were closed (*Baba Kama*, 113 a). After holding the presidency of the college for twenty-eight years (219–247 A.D.), and raising the literature and authority of Babylon to that of Palestine, Rab died, A.D. 247, lamented by the whole nation (*Berachoth*, 43 b; *Sabbath*, 110 a). His contributions to Biblical literature and exegesis are contained in his compilation and redaction of the ancient traditional expositions of Leviticus, Numbers, and Deuteronomy, in two volumes, which bear his name—viz., (i.), *Siphra of the school of Rab* (סִפְרָא דְּבֵי רַב), or simply *Siphra*, being a commentary on Leviticus; and (ii.), *Siphri D'be Rab* (סִפְרֵי דְּבֵי רַב), on Numbers and Deuteronomy. When it is remembered that these works embody the ancient principles of interpretation which guided the authors of the Sept., the Syriac version, the Chaldee paraphrases, etc., their importance to the criticism of the O. T. will be apparent. An analysis of these works is given in the article *MIDRASH*. Comp. Graetz, *Geschichte der Juden*, vol. iii. p. 312, etc., Berlin 1853; Fürst, *Kultur und Literaturgeschichte der Juden in Asien*, p. 33, etc., Leipzig 1853; and by the same author, *Bibliotheca Judaica*, iii. 125, etc. See also the article *EDUCATION*.—C. D. G.

**RABBAH** (רַבָּה; Sept. 'Ραββᾶθ). This name, which properly denotes a great city or metropolis, is given in Scripture to the capital of the Ammonites (Josh. xiii. 25; 2 Sam. xi. 1; xii. 27; 1 Chron. xx. 1; Jer. xlix. 3); the full name of which, however, as given in Deut. iii. 11, appears to have been Rabbath-beni-Ammon. It was in this place that the great iron bedstead of Og king of Bashan was preserved (Deut. iii. 11). Here also, during the siege of the place by Joab, the unsuspecting Uriah was slain, through the contrivance of David, that he might possess himself of his wife Bathsheba; after which the king went in person and took the city, the im-

portance of which is shown by the solicitude of the monarch thus to appropriate to himself the glory of its subjugation (2 Sam. xi. xii.) After this Rabbah was included in the tribe of Gad. After the separation of the ten tribes, Rabbah, with the whole territory beyond the Jordan, adhered to the kingdom of Israel, till it was ravaged by the Assyrians under Tiglath-pileser, and the inhabitants expatriated to Media. The Ammonites then recovered possession of Rabbah and the other cities and territories which had in former times been taken from them by the Israelites (Jer. xlix. 3; Ezek. xxv. 2-5) [*AMMONITES*]. Some centuries later, when these parts were subject to Egypt, Rabbah was restored or rebuilt by Ptolemy Philadelphus, and called by him Philadelphia (Euseb. *Onomast.*, s. v. 'Ραμᾶθ and 'Αμμᾶν), and under this name it is often mentioned by Greek and Roman writers (Plin., *Hist. Nat.*, v. 16; Ptol., *Geog.*, v. 15); by Josephus (*De Bell. Jud.*, i. 6. 3; i. 19. 5; ii. 18. 1), and upon Roman coins (Eckhel, iii. 351; Mionnet, v. 335), as a city of Arabia, Coele-Syria, or Decapolis. The old name was not, however, altogether superseded, for Polybius (*Hist.*, v. 7. 4) calls it 'Ραββαῖνα.

Rabbah appears to have consisted, like Aroer, of two parts; the city itself, and 'the city of waters,' or royal city, which was probably a detached portion of the city itself, insulated by the stream on which it was situated. The 'city of waters' was taken by Joab; but against the city itself he was obliged to call for the assistance of David with a reinforcement (2 Sam. xii. 29).

The ancient name has been preserved among the natives of the country. Abulfeda calls it *Amman*, and by that name it is still known. It was in ruins in his time (*Tab. Syr.*, p. 19). The ruins stand about 19 miles south-east of Szalt, in a long valley traversed by a stream, the Moiet Amman, which at this place is arched over, the bed as well as the banks being paved. The ruins are extensive, but there remains nothing of much interest excepting the theatre, which is very large and perfect, and a small odeum close to it. There are also an ancient castle and some vestiges of Roman buildings and of Christian churches. The prophet Ezekiel foretold that Rabbah should become 'a stable for camels,' and the country 'a couching place for flocks' (Ezek. xxv. 5). This has been literally fulfilled, and Burckhardt actually found that a party of Arabs had stabled their camels among the ruins of Rabbah. Too much stress has however been laid upon this minute point by Dr. Keith and others (*Evidence from Prophecy*, p. 150). What the prophet meant to say was that Ammon and its chief city should be desolate; and he expressed it by reference to facts which would certainly occur in any forsaken site in the borders of Arabia; and which are now constantly occurring not in Rabbah only, but in many other places. Seezen, in *Zach's Monat. Corresp.*, xviii. p. 428; Burckhardt's *Syria*, p. 356, seq.; Irby and Mangles, *Travels*, p. 474.

The Rabbah of Josh. xv. 60 was in the tribe of Judah.—J. K.

**RABBATH-AMMON.** [*RABBAH.*]

**RABBATH-MOAB.** [*AR.*]

**RABBI** (רַבִּי; 'Ραββί), a title of honour given by the Jews to their learned men, authorised teachers

of the law, and spiritual heads of the community, and which in the N. T. is frequently given to Christ.

1. *Different forms, and the signification of the Title.*—The term רַבִּי, *Rabbi*, is the noun רַב *Rab* (from רָכַב, *to multiply, to become great, distinguished*), with the pronominal suffix י, and in the Biblical Hebrew denotes a *great man*; *one distinguished either for age, position, office, or skill* (Job xxxii. 9; Dan. i. 3; Prov. xxvi. 10), only that in canonical books it does not occur with the pronominal suffix. It is in post-biblical Hebrew that this term is used as a title, indicating sundry degrees by its several terminations for those who are distinguished for learning, who are the authoritative teachers of the law, and who are the appointed spiritual heads of the Jewish community. Thus, for instance, the simple term רַב, *Rab*, without any

termination, and with or without the name of the person following it, corresponds to our expression *teacher, master*, διδάσκαλος, and is the lowest degree; with the pronominal suffix first person singular י, viz., רַבִּי, *Rabbi*, Παῖσι, *my Rabbi* (Matt. xxiii. 7, 8; xxvi. 25, 49; Mark ix. 5; xi. 21; xiv. 45; John i. 38, 49; iii. 2, 26; iv. 31; vi. 25; ix. 2; xi. 8), it is a higher degree, like the Syriac

ܪܒܝ, and with the pronominal suffix first person plural ִי, viz., רַבֵּנּוּ, *Rabbon*, Παῖσιν, *our teacher, our master*, Chaldee form like the Syriac ܪܒܝܢ, it is the highest degree, and was given to the patriarchs (נְשִׂאִים) or the presidents of the Sanhedrim. Gamaliel I., who was patriarch in Palestine A.D. 30-50, was the first that obtained this extraordinary title, and not Simon b. Hillel as is erroneously affirmed by Lightfoot (*Harmony of the Four Evangelists*, John i. 38), and by Mr. Eddrup (in *Smith's Dictionary of the Bible*, s.v. *Rabbi*). This is evident from the following statement in the *Aruch* of R. Nathan (s. v. אַבִּי): 'We do not find that the title *Rabbon* began before the patriarchs Rabbon Gamaliel I., Rabbon Simon his son, who perished in the destruction of the second Temple, and Rabbon Jochanan b. Zakkai, all of whom were presidents.' Lightfoot's mistake is all the more strange since he himself quotes this passage elsewhere (comp. *Hebrew and Talmudical Exercises*, Matt. xxiii. 7). רַבֵּנּוּ, however, which, as we have said, is the noun רַב, with the Chaldee pronominal suffix first person plural, is also used in Aramaic as a noun absolute, the plural of which is רַבֵּנִים and רַבֵּנִין (comp. Chaldee paraphrase on Ps. lxxx. 11; Ruth i. 2); pronominal suffix second person singular רַבֵּנִי (Song of Songs vi. 4); pronominal suffix third person plural רַבֵּיהֶן (Ps. lxxxiii. 12). Accordingly Παῖσιν in Mark x. 51, which in John xx. 16 is spelled Παῖσιν, is the equivalent of רַבֵּנִי, *my master*, giving the Syriac

pronunciation to the *Kametz* under the *Beth*.

2. *Origin and date of these Titles.*—Nathan b. Jehiel tells us, in his celebrated lexicon denominated *Aruch* (s. v. אַבִּי), which was finished A.D. 1101 [NATHAN B. JECHIEL], that Mar Rab Jacob asked Sherira Gaon, and of his son Hai the co-Gaon (A.D. 999), for an explanation of the origin and import of these different titles, and that these spiritual heads of the Jewish community in Babylon

replied as follows:—'The title *Rab* (רַב) is Babylonian, and the title *Rabbi* (רַבִּי) is Palestinian.' This is evident from the fact that some of the Tanaim and Amoraim are simply called by their names without any title—*ex. gr.*, Simon the Just, Antigonus of Soho, Jose b. Jochanan, Rab, Samuel, Abaje and Rabba; some of them bear the title *Rabbi* (רַבִּי)—*ex. gr.*, Rabbi Akiba, Rabbi Jose, Rabbi Simon, etc.; some of them have the title *Mar* (מַר)—*ex. gr.*, Mar Ukba, Mar Januka, etc.; some the title *Rab* (רַב)—*ex. gr.*, Rab Hana, Rab Jehudah, etc.; whilst some of them have the title *Rabbon* (רַבֵּן)—*ex. gr.*, Rabbon Gamaliel, Rabbon Jochanan b. Zakkai, etc. The title *Rabbi* (רַבִּי) is that of the Palestinian sages, who received there of the Sanhedrim the laying on of the hands, in accordance with the laying on of the hands as transmitted in unbroken succession by the elders (זִקְנִים), and were denominated *Rabbi*, and received authority to judge penal cases; whilst *Rab* (רַב) is the title of the Babylonian sages who received the laying on of hands in their colleges. The more ancient generations, however, who were far superior, had no such titles as *Rabbon* (רַבֵּן), *Rabbi* (רַבִּי), or *Rab* (רַב), either for the Babylonian or Palestinian sages, as is evident from the fact that Hillel I., who came from Babylon, had not the title *Rabbon* (רַבֵּן) attached to his name; and that of the prophets, who were very eminent, it is simply said 'Haggai the prophet,' etc.; 'Ezra did not come up from Babylon,' etc., without the title *Rabbon* being affixed to their names. Indeed, we do not find that this title is of an earlier date than the patriarchate. It began with Rabbon Gamaliel the Elder (A.D. 30), Rabbon Simon, his son, who perished in the destruction of the second temple, and Rabbon Jochanan b. Zakkai, all of whom were patriarchs or presidents of the Sanhedrim (נְשִׂאִים). The title *Rabbi* (רַבִּי), too, comes into vogue among those who received the laying on of hands at this period—as, for instance, Rabbi Zaddok, Rabbi Eliezer b. Jacob, etc., and dates from the disciples of Rabbon Jochanan b. Zakkai downwards. Now the order of these titles is as follows—*Rabbi* is greater than *Rab*; *Rabbon* again is greater than *Rabbi*; whilst the simple name is greater than *Rabbon*. No one is called *Rabbon* except the presidents.' From this declaration of Sherira Gaon and Hai, that the title *Rabbi* obtained among the disciples of Jochanan b. Zakkai, the erudite Graetz concludes, that 'we must regard the title *Rabbi*, which in the gospels, with the exception of that by Luke, is given to John the Baptist and to Jesus, as an anachronism. As an anachronism must also be regarded the disapprobation put into the mouth of Jesus against the ambition of the Jewish doctors, who love to be called by this title, and the admonition to his disciples not to suffer themselves to be styled *Rabbi* καὶ φιλοῦσι (οἱ γραμματεῖς)—καλεῖσθαι ὑπὸ τῶν ἀνθρώπων ῥαββὶν ῥαββῖν. 'Ταῦτ' ἐστὶν κληρονομία ῥαββῖν, Matt. xxiii. 7, 8). This, moreover, shows that when the gospels were written down, namely at the time when the title *Rabbi* stood in so high a repute that the fathers could not but transfer it to Christ' (*Geschichte der Juden*, iv. 500, Berlin 1853). But even supposing that the title *Rabbi* came into vogue in the days of Jochanan b. Zakkai, this would by no means warrant Graetz's conclusion, inasmuch as Jochanan lived upwards of a hundred years, and survived four presidents—viz., Hillel I. (B.C. 30-10), Simon I. (A.D. 10-30), Ga-

maliel I. (A.D. 30-50), and Simon II. (A.D. 50-70), and it might therefore obtain in the early days of this luminary, which would be shortly after the birth of Christ [EDUCATION]. The *Tosaphoth* at the end of *Edujoth*, however, quoted in the *Aruch* in the same article, gives a different account of the origin of this title, which is as follows:—He who has disciples, and whose disciples again have disciples, is called *Rabbi*; when his disciples are forgotten (*i.e.*, if he is so old that his immediate disciples already belong to the past age), he is called *Rabbon*; and when the disciples of his disciples are also forgotten, he is simply called by his own name. This makes the titles coeval with the origin of the different schools, and at the same time accounts for the absence of them among the earliest doctors of the law.—C. D. G.

RABBINIC BIBLES, or MIKRAOTH GEDOLTH (מקראות גדולות)=Great Bibles, as they are called in Hebrew. This name is given to the following seven editions of the Hebrew Scriptures, because they contain the commentaries of sundry Jewish rabbins.

i. The Hebrew Bible (מקרא גדולה), with Jewish commentaries, published by Bomberg, and carried through the press by Felix Pratensis, Venice, Kislev 27, 278 (רעה)=1516-17, fol. This is properly the first edition of the Rabbinic Bible. It consists of four parts, with a separate title-page to each part, and its contents are given in the article PRATENSIS. Comp. also Wolf, *Bibliotheca Hebraea*, ii. 336; *Bibliotheca Sacra*, i. 96-99, who erroneously dates this edition 1518; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 6.

ii. The Bible which is entitled (שער יהוה) *Porta Dei Sancta*, was also published by Bomberg, Venice, Kislev 25, 285 (רפה), Tishri 24, 286 (רפו)=1524-25, four vols. fol. This, though properly the second edition of the Rabbinic Bible, is the first edition carried through the press by the celebrated Jacob b. Chajim, who corrected the numerous errors in the text of the foregoing edition, published for the first time the entire Massoretic apparatus, and made sundry other additions detailed in the article JACOB b. CHAJIM. The celebrated Introduction of Jacob b. Chajim, written for this edition, which gives an account of the different views about the origin of the various readings, has recently been published separately in Hebrew, with an English translation and notes by Ginsburg, Longman, 1865. Comp. also Masch, *Ibid.*, i. 100-102; who erroneously dates this edition 1526; Steinschneider, *Ibid.*, col. 11.

iii. The Rabbinic Bible, which is Bomberg's third edition, Venice, Kislev 25, 307 (שן)—Tishri 4, 309 (שט)=1546-48, four vols. fol., and Jacob b. Chajim's second edition. This edition contains as follows:—

The first volume, embracing the Pentateuch (תורה), begins with the elaborate Introduction of Jacob b. Chajim; an Index of the sections of the whole O. T. according to the Massorah, and Ibn Ezra's preface to the Pentateuch. Then follow the five books of Moses in Hebrew, with the Chaldee paraphrase, the commentaries of Rashi, Ibn Ezra, and Jacob b. Asher.

The second volume, comprising the earlier prophets (נביאים ראשונים), with the Chaldee paraphrase, the commentaries of Rashi, David Kimchi,

and Levi b. Gershon, as well as the comments of Isaiah di Trani on Judges and Samuel.

The third volume embraces the later prophets (נביאים אחרונים), with the Chaldee paraphrase and the commentaries of Rashi and Kimchi.

The fourth volume comprises the Hagiographa (כתובים) with the Chaldee paraphrase, the commentaries of Rashi on the Psalms, Proverbs, Job, the Five Megilloth, Ezra, Nehemiah, and Chronicles; of Ibn Ezra on the Psalms, Job, the Five Megilloth, Daniel; of Moses Kimchi on Proverbs, Ezra, and Nehemiah, falsely ascribed to Ibn Ezra [KIMCHI, MOSES]; of David Kimchi on Chronicles; of Levi b. Gershon on Proverbs and Job; of Saadia (spurious) on Daniel; the Massorah finalis; the treatise on the points and accents by Moses the Punctuator, the variations of Ben Asher and Ben Naphtali, and the variations between the Western and Eastern Codices. On comparing this edition with the editio princeps of Jacob b. Chajim, as described in the article Jacob b. Chajim, it will be seen that in this second edition, which is undoubtedly the best, are omitted Ibn Ezra's commentaries on Isaiah and the Minor Prophets, some portions of the Massorah, etc., etc.; whilst Jacob b. Asher's commentary on the Pentateuch, and Isaiah di Trani's commentary on Judges and Samuel are inserted. Comp. Masch, *Ibid.*, i. 102, 103, who erroneously dates this edition 1549; Steinschneider, *Ibid.*, col. 24.

iv. Bomberg's fourth Rabbinic Bible, by Di Gora, carried through the press and corrected by

Isaac b. Joseph סלם, and Isaac b. Gershon Treves, Venice, Elul 17, 328 (שכח)=1568, four vols. fol. The correctors remark, at the end, that they have re-inserted in this edition the portion of the Massorah which was omitted in the edition of 1546-48. Appended to this volume is the so-called Jerusalem Targum on the Pentateuch. The assertion that Ibn Ezra's commentaries on Isaiah and the Minor Prophets, which were also omitted in the previous edition, are given in this is incorrect. Wolf (*Bibliotheca Hebraea*, ii. 372), says: 'In catalogo quodam MSto Codicum Hebr. Bibl. Bodlej. observatum vidi, quod hæc editio opera Genebrardi passim sit castrata in iis, quæ contra rem Christianum et præcipue contra Romanos dicuntur.' Masch (*Bibliotheca Sacra*, i. 103) repeats it, and characterises this edition as castrated by Genebrard. No less an authority, however, than Steinschneider, positively states, 'sed. expl. tale in Bodl. non exstat' (*Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 37).

v. *Mikra Gedolah* (מקרא גדולה), or the Great Bible, published in Venice 1617-19, 4 vols. fol., by Pietro and Lorenzo Bragadin, and edited by the celebrated Leo di Modena and Abraham Chaber-Tob b. Solomon Chajim Sopher. It contains the Chaldee paraphrases, the Massorahs, and the Rabbinic commentaries of the foregoing edition, and is preceded by a preface written by Leo di Modena. This edition, however, is of less value to the critical student, being castrated by the Inquisition, under whose censorship it was published, as may be seen from the remark of the censor at the end, 'Visto per me Tr. Renato da Mod. a 1626.' Comp. Wolf, *Bibliotheca Hebraea*, ii. 375; Masch, *Bibliotheca Sacra*, i. 104; Steinschneider, *Catalogus*, etc., col. 70.

vi. *Biblica Sacra Hebraica et Chaldaica cum Masora*, etc., by John Buxtorf, Basle 1618-19, 2

vols. fol. This Bible is divided into four parts, the latter of which, consisting of the later prophets and Hagiographa, is dated 1619. The title-page is followed by a Latin preface by Buxtorf, a table of the number of chapters in the Bible, and a poem of Ibn Ezra on the Hebrew language. Besides the Hebrew text and the Chaldee paraphrases, it contains as follows:—(1.) Rashi on the whole O. T.; (2.) Ibn Ezra on the Pentateuch, Isaiah, the Minor Prophets, Psalms, Job, the Five Megilloth, and Daniel; (3.) Moses Kimchi on Proverbs, Ezra, and Nehemiah, falsely ascribed to Ibn Ezra, in whose name they are given [KIMCHI, MOSES]; (4.) David Kimchi on Chronicles; (5.) Levi b. Gershon on the Earlier Prophets and Proverbs; (6.) Saadia's spurious commentary on Daniel; (7.) Jacob b. Asher on the Pentateuch; (8.) Jachja on Samuel; (9.) The Massorah finalis and Buxtorf's *Tiberias*, etc.; (10.) The various readings of Ben Asher and Ben Naphtali; (11.) The variations between the Eastern and Western Codices; (12.) A treatise on the Accents. The whole is formed after Jacob b. Chajim's second edition (1546-48), with some corrections and alterations by Buxtorf. There is also a Hebrew edition in three volumes folio, differing from the previous one in the following particulars:—(1.) It has a Hebrew title-page, enumerating the various commentaries inserted; (2.) A Hebrew preface, stating that this edition was published by Lud. Rönicg at Basil, and that it was revised by Abraham b. Eleazar of Brunswick, assisted by Buxtorf; and (3.) At the end of Buxtorf's address on the study of the sacred tongue there is an index to the chapters, a Clavis Massoræ, and an index to the Massoretic commentaries, in the Latin language; whereupon follows an address to the reader on the Massorah by the younger Buxtorf. In the Duke of Sussex's library there was also the first volume of Buxtorf's Bible, dated 1620 on the title-page. Comp. Wolf, *ibid.*, ii. 375; Masch, *ibid.*, i. 105, etc.; Pettigrew, *Bibliotheca Susexiana*, London 1827, vol. i. part ii. pp. 164-167.

vii. Moses Frankfurter's Great Rabbinic Bible, entitled *קהילת משה*, the *Congregation of Moses*, Amsterdam 1724-27, 4 volumes royal folio. This gigantic edition, which is by far the most complete of all the Rabbinic Bibles, is described in the article FRANKFURTER, and it is to this edition that the references in this Cyclopædia are made.—C. D. G.

RABBINICAL LITERATURE. [KAB-BALAH; TALMUD.]

RABBONI. [RABBI.]

RABE. [IBN EZRA.]

RAB-MAG. [NERGAL SHAREZER.]

RAB-SARIS (רַב־סָרִיס; Sept. *'Paphs*), one of the three Assyrian generals in command of the army which appeared before Jerusalem (2 Kings xviii. 17) [RAB-SHAKEH]. The word means 'chief of the eunuchs'; which could scarcely have been a proper name; but whether his office was really that which the title imports, or some other great court office, must be determined by the considerations which have been offered under the article EUNUCH. The chief of the eunuchs is an officer of high rank and dignity in the Oriental courts; and his cares are not confined to the harem, but

many high public functions devolve upon him. In the Ottoman Porte the Kislar Aga, or chief of the black eunuchs, is one of the principal personages in the empire, and in an official paper of great solemnity is styled by the sultan the most illustrious of the officers who approach his august person, and worthy of the confidence of monarchs and of sovereigns' (D'Ohsson, *Tab. Gén.*, iii. 308). It is, therefore, by no means improbable that such an office should be associated with a military commission; perhaps not for directly military duties, but to take charge of the treasure, and to select from the female captives such as might seem worthy of the royal harem.—J. K.

RAB-SHAKEH (רַב־שָׁקֶה; Sept. *'Paphs*).

This name is Aramaic, and signifies *chief-cup-bearer*. Notwithstanding its seemingly official significance, it appears to have been used as a proper name, as butler with us; for the person who bore it was a military chief in high command, under Sennacherib king of Assyria. Yet it is not impossible, according to Oriental usages, that a royal cup-bearer should hold a military command; and the office itself was one of high distinction. He is the last named of three Assyrian generals who appeared before Jerusalem; and was the utterer of the insulting speeches addressed to the besieged. 'He stood and cried with a loud voice in the Jews' language;' perhaps because he was the only one of the three who could speak that language freely. 2 Kings xviii. 17, 19, 26, 28, 37; xix. 4, 8; Is. xxxvi. 2, 4, 12, 13, 22; xxxvii. 4, 8.—J. K.

RACA (רָקָא), a word which occurs in Matt. v. 22, and which remains untranslated in the A. V. It is expressive of contempt, from the Chaldee רִיקָא, and means an empty, worthless fellow. Jesus, contrasting the law of Moses, which could only take notice of overt acts, with his own, which renders man amenable for his motives and feelings, says in effect: 'Whosoever is rashly angry with his brother is liable to the judgment of God; whosoever calls his brother Raca is liable to the judgment of the Sanhedrim; but whosoever calls him fool (*Μωρῶ*) becomes liable to the judgment of Gehenna.' To apprehend the higher criminality here attached to the term fool, which may not at first seem very obvious, it is necessary to observe that while 'raca' denotes a certain looseness of life and manners, 'fool' denotes a wicked and reprobate person: foolishness being in Scripture opposed to spiritual wisdom.—J. K.

RACE. [GAMES.]

RACHAL. [SHEEP.]

RACHAL (רָכַל, *traffic*; omitted in the Vatican Cod.; but in the Alex. *Ραχῆλ*; *Rachal*), a town mentioned only in 1 Sam. xxx. 29, as one of those to which David sent portions of the spoil captured in his raid against the Amalekites. It was situated in the tribe of Judah, and apparently towards the south, but nothing more is known of it.—J. L. P.

RACHAM (רָחַם; Sept. *κύκλον*; Vulg. *porphyrio*; Lev. xi. 18; Deut. xiv. 16) is now admitted to be the white carrion vulture of Egypt, *Pernopterus Neophron Egyptiacus*. Gesner had already figured (*De Aquila quem Pernopterus vocant*, p. 199) the Barbary variety, and pointed

out the Racham of Scripture as the identical species, but Bruce first clearly established the fact. The Rachama of that writer is apparently the Ak-bobha ('white father') of the Turks, and forms one of a small group of Vulturidæ, subgenerically distinguished by the name of *Percnopterus* and *Neophoron*, differing from the other vultures in the bill being longer, straight, more attenuated, and then uncinated, and in the back of the head and neck being furnished with longish, narrow, suberectile feathers, but, like true vultures, having the pouch on the breast exposed, and the sides of the head and throat bare and livid. The great wing-coverts are partly, and the quill-feathers entirely, of a black and blackish ash-colour; those of the head, nape, smaller wing-coverts, body, and tail, in general white, with tinges of buff and rufous; the legs are flesh-colour, and rather long; and the

448. Vultur percnopterus.

toes are armed with sharp claws. The females are brownish. In size the species is little bulkier than a raven, but it stands high on the legs. Always soiled with blood and garbage, offensive to the eye and nose, it yet is protected in Egypt both by law and public opinion, for the services it renders in clearing the soil of dead carcasses putrefying in the sun, and the cultivated fields of innumerable rats, mice, and other vermin. The Racham extends to Palestine in the summer season, but becomes scarce towards the north, where it is not specially protected; and it accompanies caravans, feasting on their leavings and on dead camels, etc.

Gesner's figure represents the Barbary variety; but there are two other species besides—viz., the *Percnopterus Angolensis*, and *Percnopterus Hypoleucus*—both similarly characterised by their white livery, and distinguished from the Egyptian by a different arrangement of colour, a shorter bill, and more cleanly habits.

In our version the name of Gier-eagle is certainly most improper, as such a denomination can apply only to a large species, and is most appropriate to the bearded vulture of the Alps. The Lämmer-geyer of the Swiss (*Gypatus Barbatus*), which in the shape of varieties, or distinct species, frequents also the high snowy ranges of Spain, Macedonia, Asia Minor, Crete, Abyss-

sinia, Caffraria, Barbary, and most likely of Libanus, was no doubt the bird intended by our translators to represent the Racham; nor was the application unreasonable. The *Percnopterus* is somewhat singularly classed, both in Lev. and Deut., along with aquatic birds; and it may be questioned whether any animal will eat it, since, in the parallel case of *Vultur aura*, the turkey-buzzard or carrion-crow of America, we have found even the ants abstaining from its carcase, and leaving it to dry up in the sun, though swarming around and greedy of every other animal substance [NESHER].—C. H. S.

RACHEL (רָחֵל, *a ewe*; Sept. 'Ραχήλ), the most beloved of the two daughters of Laban whom Jacob married (Gen. xxix. 16, *seq.*), and who became the mother of Joseph and Benjamin, in giving birth to the latter of whom she died near Bethlehem, where her sepulchre is shown to this day (Gen. xxx. 22; xxxv. 16). For more minute particulars, see JACOB, with whose history Rachel's is closely involved.—J. K.

RADDAI (רָדַי; Sept. *Zaddai*; Alex. *Zafδai*), one of David's brothers (1 Chron. ii. 14), by Ewald conjectured to be the same as Rei.

RAGAU ('Ραγᾶ), one of the ancestors of our Lord (Luke iii. 35); the same as Reu son of Peleg.

RAGES (this word appears in different forms, as *Ραγή*, *Ραγᾶ*, *Ράγαια*, etc.), a city and province of Media, connected with the later history of the Jews, as one of the places in which they were located during the captivity (Tob. v. 5; vi. 13; ix. 2; Judith i. 5). It stood in the north-eastern part of Media, and not far from the site of the modern Teheren; according to Arrian (*Exped. Alex.*, iii. 20), it was distant eleven days' march from Ekbatana, and near the celebrated pass called the Caspian Gates, which lead across the mountain-range from the central plains of Media to the shores of the Caspian Sea. Strabo states that it received its name from certain *chasms* (*παράς*, *a rent*) made in the ground near the pass by earthquakes (*Geog.*, i. 3; xi. 9). Rages appears to have been one of the chief cities of the country. It suffered much from war, having been repeatedly captured and destroyed. It was always rebuilt again, however (*Id.*, xi. 13, p. 524), and continued to flourish down to the close of Grecian dominion in Western Asia. The history of its decline and fall is unknown. It is now ruined and deserted, little remaining save the massive foundations of the ancient walls, and immense heaps of ruins and rubbish. Sir Ker Porter describes some singular colossal sculptures on the rocks at Rages. The place still bears its ancient name under the form *Rhey*. The modern city of Teheren, a few miles westward, has been built to a large extent of the remains of Rages (See Ker Porter, *Travels*, i. p. 358).—J. L. P.

RAGUEL, or REUEL (רְעוּאֵל, *friend of God*; Sept. 'Ραγουήλ). 1. A son of Esau (Gen. xxxvi. 4, 10). 2. The father of Jethro (Exod. ii. 18; Num. x. 29). Some confound him with Jethro; but, in the text last cited, he is called the father of Hobab, who seems to have been the same as Jethro. In Exod. ii. 18, *seq.*, indeed, the daughters of the 'priest of Midian' relate to 'Reuel

their father' their adventure with Moses; which might seem to support his identity with Jethro; but it is quite a Scriptural usage to call a grandfather 'father,' and a granddaughter 'daughter' (Gen. xxxi. 43; 2 Sam. xix. 25; 1 Kings xiv. 3; xvi. 2; xviii. 3). The Targum in this place reads, 'They came to Reuel their father's father' [HAB]. 3. Another person of this name occurs in 1 Chron. ix. 8.—J. K.

RAHAB (רַהַב; Sept. *Ῥαβ*), a name, signifying 'sea-monster,' which is applied as an appellation to Egypt in Ps. lxiv. 13, 14; lxxvii. 4; lxxxix. 10; Is. li. 9 (and sometimes to its king, Ezek. xxix. 3; xxxiii. 3, comp. Ps. lxxviii. 31); which metaphorical designation probably involves an allusion to the crocodiles, hippopotami, and other aquatic creatures of the Nile.

RAHAB, properly RACHAB (רַחַב, *large*; Sept. *Ῥαχαβ*), a woman of Jericho who received into her house the two spies who were sent by Joshua into that city; concealed them under the flax laid out upon the house-top, when they were sought after; and, having given them important information, which showed that the inhabitants were much disheartened at the miracles which had attended the march of the Israelites, enabled them to escape over the wall of the town, upon which her dwelling was situated. For this important service Rahab and her kindred were saved by the Hebrews from the general massacre which followed the taking of Jericho (Josh. ii. 1-21; vi. 17; comp. Heb. xi. 31).

In the narrative of these transactions Rahab is called זונה, *zonah*, which our own, after the ancient versions, renders 'harlot.' The Jewish writers, however, being unwilling to entertain the idea of their ancestors being involved in a disreputable association at the commencement of their great undertaking, chose to interpret the word 'hostess,' one who keeps a public-house, as if from זון, 'to nourish' (Joseph. *Antiq.* v. 1; ii. and vii.; comp. the Targum, and Kimchi and Jarchi on the text). Christian interpreters also are inclined to adopt this interpretation for the sake of the character of a woman of whom the Apostle speaks well, and who would appear from Matt. i. 4 to have become by a subsequent marriage with Salmon, prince of Judah, an ancestress of Jesus. But we must be content to take facts as they stand, and not strain them to meet difficulties; and it is now universally admitted by every sound Hebrew scholar that זונה means 'harlot,' and not 'hostess.' It signifies harlot in every other text where it occurs, the idea of 'hostess' not being represented by this or any other word in Hebrew, as the function represented by it did not exist. There were no inns; and when certain substitutes for inns eventually came into use, they were never, in any Eastern country, kept by women. On the other hand, strangers from beyond the river might have repaired to the house of a harlot without suspicion or remark. The Bedouins of the desert constantly do so at this day in their visits to Cairo and Baghdad. The house of such a woman was also the only one to which they, as perfect strangers, could have had access, and certainly the only one in which they could calculate on obtaining the information they required without danger from male inmates. This concurrence of analogies in the word, in the thing,

and in the probability of circumstances, ought to settle the question. If we are concerned for the morality of Rahab, the best proof of her reformation is found in the fact of her subsequent marriage to Salmon: this implies her previous conversion to Judaism, for which indeed her discourse with the spies evinces that she was prepared. The Jewish writers abound in praises of Rahab, on account of the great service she rendered their ancestors. Even those who do not deny that she was a harlot, admit that she eventually became the wife of a prince of Israel, and that many great persons of their nation sprang from this union. The general statement is, that she was ten years of age at the time the Hebrews quitted Egypt, that she played the harlot during all the forty years they were in the wilderness, that she became a proselyte when the spies were received by her, and that after the fall of Jericho no less a personage than Joshua himself made her his wife. She is also counted as an ancestress of Jeremiah, Maaseiah, Hanameel, Shallum, Baruch, Ezekiel, Neriah, Seriah, and Huldah the prophetess. (See *T. Babyl. tit. Megilla*, fol. 14, col. 2; *Juchasin*, x. 1; *Shalshet Hakabala*, vii. 2; Abarbanel, Kimchi, etc., on Josh. vi. 25; *Mitzvot Torah*, p. 112; Lightfoot, *Hor. Heb.* ad Matt. i. 4; Meuschen, *N. T. Talmud*, p. 40).—J. K.

RAIN. See under the head *Climate*, in art. PALESTINE.

RAINBOW (קֶשֶׁף; Sept. *ῥέβων*; N. T. *ῥίς*). This is mentioned in connection with the covenant which God made with Noah as the second father of the race after he came out of the ark. God set his bow in the clouds as the token or assurance of that covenant; not that the rainbow then for the first time *appeared*, but that for the first time this special significance was attached to its appearance. In its symbolical usage the rainbow appears as the symbol of mercy returning after and triumphing over judgment (Ezek. i. 27, 28; Rev. iv. 3).

RAKKATH (רַקַּת, probably = Arabic رَقَّة, *a shore*; *Δακῆ*; Alex. *Ῥακκᾶ*; *Raccath*), a town of Naphtali, mentioned only in Josh. xix. 35, where it is grouped between Hammath and Chinnereth. We may hence infer that it lay on the western shore of the lake of Galilee, not far distant from the warm baths of Tiberias, which, as has been seen [HAMMATH], are on the site of the ancient Hammath. According to the Rabbins, Rakkath stood upon the spot where the city of Tiberias was afterwards built (see the references in Lightfoot, *Opp.*, ii. 223). This is probably true, as has already been stated in the article CHINNERETH. Rakkath appears to have fallen to ruin at an early period; or at least it was not a place of sufficient note to be mentioned in history; and the name passed away altogether when Tiberias was founded. The statement of Josephus that ancient tombs had to be removed to make room for the buildings of Tiberias, does not, as Dr. Robinson supposes, make it impossible that the city stood on the site of Rakkath (Joseph. *Antiq.* xviii. 2. 3; Robinson, *Bib. Res.*, ii. 389). Rakkath may have stood close on the shore where there were no tombs; while Tiberias, being much larger, extended some distance up the adjoining rocky hill-sides, in which the tombs may still be seen.—J. L. P.

RALBAG (ר' ל'בג). This eminent commentator, grammarian, metaphysician, mathematician, astronomer, and philosopher, was born at Banolas, not far from Gerona, in 1288. He is called Ralbag =

רב' לבג, by the Jews, from the initial letters of his

proper name, ר' לוי בן גרשון, *R. Levi b. Gershon*, and is quoted by Christian writers by the name *Magister Leo de Bannolis* or *Gersonides*. Very little is known about the personal history of this remarkable Hebrew, beyond the fact that by virtue of his residence in Orange and Avignon he was providentially exempted from the fearful sufferings inflicted upon his brethren (1306, etc.) by the cruel government of Philip IV. *the Fair* and his successors, and that he was thus enabled quietly to consecrate his extraordinary powers to the elucidation of the Scriptures as well as to the advancement of science. It is beyond the range of this article to notice the peculiar system of moral philosophy propounded by Ralbag, or to describe his valuable contributions to the science of medicine and to astronomy: we must confine ourselves to his exegetical works, and these we shall detail as much as possible in chronological order. Though he began his authorship with philosophical and scientific productions when about thirty (1317), yet he published no exegetical work till he was thirty-seven years of age, from which time he unremittingly devoted himself to the exposition of the Bible. His first commentary is on the Book of Job, and was finished 1325. Twelve months later (1326) he published a commentary on the Song of Songs; and in 1328 a commentary on *Cohemoth* or *Ecclesiastes*. These three books afforded him ample scope for propounding his philosophical theories, inasmuch as Job and *Ecclesiastes* discuss the moral government of God, whilst the Song of Songs by its allegory disclosed to him the profoundest metaphysical secrets,—"Jerusalem" being man—for 'just as man was chosen from the creatures for the service of God, so Jerusalem was selected from all other cities for the worship of the Most High'; 'the daughters of Jerusalem are the powers of the soul'; and King Solomon is 'the spirit in man which rules.' About the same time (1328) Ralbag finished his commentary on the first chapters of Genesis treating on the hexahemeron, and shortly after issued an exposition of Esther (1329). The Pentateuch now engaged his attention; and, after labouring over it eight years (1329-1337), he completed the interpretation of this difficult part of the O. T.—Genesis in 1329; Exodus, 1330; Leviticus—Deuteronomy, 1337. Whilst engaged on this portion of the Bible, he also worked (1334-1338) at a commentary on the Earlier Prophets—*i.e.*, Joshua, Judges, Samuel, and Kings—which he finished in 1338, as well as on commentaries on Proverbs, Daniel, Ezra, Nehemiah, and Chronicles, all of which are dated 1338. The following are

the editions of his works:—(1.) פ'וש על התורה, *Commentary on the Pentateuch*, first printed at Mantua before 1480, then by Corn. Adelkind, Venice 1547, and then again in Frankfurter's Great Rabbinic Bible, Amsterdam 1724-1727 [FRANKFURTER]. (2.) פ'וש על נביאים ראשונים, *Commentary on the Earlier Prophets*, Leiria 1494, and in all the Rabbinic Bibles [RABBINIC BIBLES]. Excerpts of the commentaries on the Pentateuch and the Earlier Prophets, entitled תועליות, *Utility*,

have been published 1550, and a Jewish-German version of them is given in Jekutiels German translation of the Bible, Amsterdam 1676-78 [JEKUTIEL].

(3.) פ'וש על משלי, *Commentary on Proverbs*, Leiria 1492, and in all the Rabbinic Bibles. A Latin translation of this commentary by

Giggeius appeared in Milan 1620. (4.) פ'וש על איוב, *Commentary on Job*, Ferrara 1477, Naples 1486; and in the Rabbinic Bibles, ch. i.-v. of this commentary have been translated into Latin by Lud.

Hern. Aquinate, Paris 1623. (5.) פ'וש על שיר

רוח, *Commentary on the Song of Songs*, *Ecclesiastes*, and *Ruth*, with an introduction by Jacob Morkaria, Riva 1560; the commentaries on the Song of Songs, Ruth, and Esther, are also given in Frankfurter's Rabbinic Bible, and the whole four books were published in

Königsberg 1860. (6.) פ'וש על דניאל, *Commentary on Daniel*, published in Italy before 1480, in Pratensis' Rabbinic Bible, and in Frankfurter's Great Bible. The commentaries on Ezra, Nehemiah, and Chronicles, which he finished in 1338, are still in MS., Codd. MSS., Opp. 288 Q, and Mich. 623. As to his mode of interpretation, Ralbag first gives an explanation of the words (ביאור)

(המלות) in each section, then propounds the meaning according to the context (ביאור הפירוש), and finally gives the utility or application of the pas-

sage (תועליות). The extreme liberality of his mind will be seen from the following principle which he enunciates,—'Truth must be brought to light even if it contradicts the revealed law most emphatically; as the Bible is no tyrannical law which intends to impose untruth for truth, but its design is to lead us to true knowledge' (comp. his

philosophical work entitled מלחמות השם, Riva di Trenta 1560, Introduction, p. 2 b, and sec. vi. p. 69 a). Ralbag died about 1342. (Comp. Wolf, *Bibliotheca Hebræa*, i. 726, etc.; iv. 892; Fürst, *Bibliotheca Judaica*, i. 82-84; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 1607-1615; Joel, in Frankel's *Monatschrift*, vol. ix. p. 223, etc., Leipzig 1860; vol. x. 41-60; 93-111; 137-145; 297-312; 333-344; vol. xi. 20-31; 65-75; 101-114; Graetz, *Geschichte der Juden*, vol. vii. p. 367-373, Leipzig 1863.—C. D. G.

RAM. 1. (רם; Sept. Ῥάμ; Alex. Ῥάβαν in Ruth, Ῥάμ in 1 Chron.; N. T. Ῥάμ), the second son of Hezron, and father of Amminadab (Ruth iv. 9; 1 Chron. ii. 9, 10, 25; Matt. i. 3, 4; Luke iii. 34).

2. (Sept. Ῥάμ.) The nephew of the preceding, and son of Jerahmeel (1 Chron. ii. 25, 27).

3. The chief of the family or sept to which Elihu belonged (Job xxxii. 2). The Targum identifies this Ram with Abraham; an opinion which Rashi and other Rabbins support, on the ground that Abram was first called Ram, *i.e.*, *exaltus*. Cocceius, whom Ewald follows (*Gesch.*, i. 414), suggests that he is the person called Aram (Gen. xxii. 21). By others Ram is supposed to be the same as Aram, the Heb. name for Syria; and they translate 'of the family of Syria,' or 'of an Aramæan family' (comp. 2 Chron. xxii. 5, where the Chetibh has ארמים for רמים, 'Syrians').—W. L. A.

## RAM. [SHEEP.]

RAM, BATTERING (רַמָּה; Sept. Βελδοτασις), an implement used for the purpose of effecting a breach in the wall of a town or fortification. It derived its name—not only among the Hebrews, but also among the Greeks (κρίδος) and the Romans (*aries*)—from its shape; it consisted of a heavy beam of wood fortified with iron plates, and terminating in an iron head made like that of a ram. Either carried by the soldiers or suspended by ropes or chains, it was driven with force against the wall till a breach was effected. It is expressly mentioned by Ezekiel (iv. 2; xxi. 27 [A. V. 22]), and is probably also referred to by him in xxvi. 9

under the words מִחֵי קַבְלֵי, though some would understand this of projectiles. An instrument of this kind was also apparently used by the followers of Joab at the siege of Abel (2 Sam. xx. 15). Vitruvius says (*Architect.*, x. 19) the battering-ram was first used by the Phœnicians. On the Assyrian battering-rams, see Rawlinson, *Ancient Monarchies*, ii. 78, ff.—W. L. A.

RAMA (Ραμᾶ), the Greek form of the Hebrew *Ramah* (רָמָה, see below, No. 1), used only in Matt. ii. 18, in the quotation from Jer. xxxi. 15: 'In Rama was there a voice heard, lamentation, and weeping, and great mourning, Rachel weeping for her children,' etc. The allusion is doubtless to Ramah, one of the leading cities of Benjamin, and not, as many have supposed, to some place of that name near Bethlehem. The passage is a difficult one, but the difficulty may be solved by a careful examination of the topography of the district. The difficulties are these:—1. Why is Rachel, the mother of Benjamin, represented as weeping for her children, seeing that Bethlehem was in *Judah* and not in *Benjamin*? The reply is: Rachel died and was buried near Bethlehem (Gen. xxxv. 19); the border of the tribe of Benjamin reached to her sepulchre (1 Sam. x. 2); not only were the children of Bethlehem slain, but also those 'in all the coast thereof,' thus including part of Benjamin. The spirit of the departed Rachel is then represented as rising from the tomb and mourning her slaughtered children. 2. But why was the voice of lamentation heard in Ramah, nearly ten miles distant? The answer is now easy. So deep was the impression made by the cruel massacre, that the cry of distress went through the whole land of Benjamin, reaching to the capital of the tribe.—J. L. P.

RAMAH (רָמָה) signifies a *height*, or a *high place*, from the root רָמָה, *to be high*; and thus it is used in Ezek. xvi. 24. Very many of the ancient cities and villages of Palestine were built on the tops of hills so as to be more secure; and hence, as was natural, such of them as were especially conspicuous were called by way of distinction הַרְמָה (with the article), *the Height*; and this, in the course of time, came to be used as a proper name. We find no less than five Ramahs mentioned in Scripture; and in modern Palestine the equivalent Arabic name is of very frequent occurrence. In regard to most of them the traveller can still see how appropriate the appellation was. In the A. V. we have various forms of the word—*Ramath* (רָמַת),

the *status constructus* (Josh. xiii. 26); *Ramôth* (רָמֹת and רָמֹת), the plural (Josh. xxi. 36; 1 Sam. xxx. 27); and *Ramathaim* (רָמַתַּיִם), a dual form (1 Sam. i. 1). *Remeth* (רֵמֶת) appears to be only another form of the same word.

1. *A city of Benjamin* (Ραμᾶ and Ῥαμᾶ; Alex. Ῥαμᾶ, Παμᾶ and Παμᾶν; *Rama*), frequently mentioned in Scripture. Joshua, in enumerating the towns of Benjamin, groups Ramah between Gibeon and Beeroth (xviii. 25). It is probably this place which is mentioned in the story of Deborah, 'She dwelt under the palm-tree of Deborah, between Ramah and Bethel in Mount Ephraim' (Judg. iv. 5.) Its position is clearly indicated in the distressing narrative of the Levite recorded in Judges xix. He left Bethlehem for his home in Mount Ephraim in the afternoon. Passing Jerusalem he journeyed northward, and crossing the ridge, came in sight of Gibeah and Ramah, each standing on the top of its hill; and he said to his servant, 'Come and let us draw near to one of these places to lodge all night, in Gibeah or in Ramah' (ver. 13). The towns were near the road on the right, and about two miles apart. The position of these two ancient towns explains another statement of Scripture. It is said of Saul (1 Sam. xxii. 6), that 'he abode in Gibeah under a tree in Ramah.' The meaning appears to be that the site of his standing camp was in some commanding spot on the borders of the two territories of Gibeah and Ramah. When Israel was divided Ramah lay between the rival kingdoms, and appears to have been destroyed at the outbreak of the revolt; for we read that 'Baasha king of Israel went up against Judah, and *built* Ramah' (1 Kings xv. 17). It was a strong position, and commanded the great road from the north to Jerusalem. The king of Judah was alarmed at the erection of a fortress in such close proximity to his capital, and he stopped the work by bribing the Syrians to invade northern Palestine (ver. 18-21), and then carried off all the building materials (22). Ramah was intimately connected with one of the saddest epochs of Jewish history. The full story is not told, but the outline is sketched in the words of Jeremiah. In the final invasion of Judæa by the Babylonians, Nebuchadnezzar established his headquarters on the plain of Hamath at Riblah (Jer. xxxix. 5). Thence he sent his generals, who captured Jerusalem. The principal inhabitants who escaped the sword were seized, bound, and placed under a guard at Ramah, while the conquerors were employed in pillaging and burning the temple and palace, and levelling the ramparts. Among the captives was Jeremiah himself (xl. 1, 5, with xxxix. 8-12.) There, in that heartrending scene of captives in chains wailing over slaughtered kindred and desolated sanctuaries, was fulfilled the first phase of the prophecy uttered only a few years before: 'A voice was heard in Ramah, lamentation and bitter weeping; Rachel weeping for her children, refused to be comforted for her children because they were not' (xxxi. 15.) That mourning was typical of another which took place six centuries later, when the infants of Bethlehem were murdered, and the second phase of the prophecy was fulfilled (Matt. ii. 17; see RAMA).

Ramah was rebuilt and reoccupied by the descendants of its old inhabitants after the Captivity

(Ezra ii. 26; Neh. xi. 33). According to Josephus it was forty *stadia* distant from Jerusalem (*Antiq.* viii. 12. 3); and Eusebius and Jerome place it in the sixth mile north of the Holy City (*Onomast.*, s.v. *Rama*; but in his commentary on Hosea v. 8, Jerome says *in septimo lapide*); and the latter states that in his day it was a small village (*ad Sophoniam*, i. 15).

Modern travellers are right in identifying Ramah of Benjamin with the village of *er-Ram* (Brocardus, vii.; Robinson, *B.R.*, i. 576); though Maundrell and a few others have located it at Neby Samwil. *Er-Ram* is five miles north of Jerusalem, and four south of Bethel. The site of Gibeah of Saul lies two miles southward, and Geba about the same distance eastward. Ram is a small miserable village; but in the walls and foundations of the houses are many large hewn stones, and in the lanes and fields broken columns and other remains of the ancient capital. The situation is commanding, on the top of a conical hill, half a mile east of the great northern road, and overlooking the broad summit of the ridge; the eastern view is intercepted by bleak ridges and hill-tops. The whole country round Ramah has an aspect of stern and even painful desolation; but this is almost forgotten in the great events which the surrounding heights and ruins recal to memory.

2. *Ramah of Asher* (Ραμά; *Horma*), a town mentioned only in Josh. xix. 29, in the description of the boundaries of Asher. It would appear to have been situated near the sea-coast, and not far from Tyre, towards the north or north-east. Eusebius and Jerome mention this place, but in such a way as shows they knew nothing of it farther than what is stated by Joshua. In the Vulgate Jerome calls it *Horma*, making the Hebrew article a part of the word. This, however, is plainly an error (*Onomast.*, s.v. *Rama*; and note by Bonfrer.) Robinson visited a village called *Rameh*, situated on the western declivity of the mountain-range, about seventeen miles south-east of Tyre. It 'stands upon an isolated hill in the midst of a basin with green fields, surrounded by higher hills.' In the rocks are numerous ancient sarcophagi, and the village itself has some remains of antiquity. He says, 'There is no room for question, but that this village represents the ancient *Ramah* of Asher' (*Bib. Res.*, iii. 64). Its position, however, notwithstanding the assertion of so high an authority, does not at all correspond with the notice in Scripture; and the name *Ramah* was too common to indicate identity with any degree of certainty. Another *Rameh* has been discovered on a little tell, two miles south-east of modern Tyre, and about one mile north-east of Ras-el-Ain, the site of ancient Tyre (Van de Velde, *Map and Memoir*, p. 342). In position this village answers in all respects to the *Ramah* of Asher. The writer did not visit it, and has not been able to find any description of its site or remains.

3. *Ramah of Naphtali* (Ῥαμήλ; Alex. *Ῥαμά*; *Arama*), one of the strong cities of the tribe, mentioned only in Josh. xix. 36, and situated apparently to the south of Hazor, between that city and the Sea of Galilee. Reland seems inclined to identify it with the *Ramah* of Asher; but they are evidently distinct cities, as indicated both by ancient geographers and the sacred writer. (Reland, *Pal.*, p. 963). Eusebius and Jerome record the name, though they appear to have known nothing

of the place (*Onomast.*, s.v. *Rama*). About six miles west by south of Safed, on the leading road to Akka, is a large modern village called *Rameh*. It stands on the declivity of the mountain, surrounded by olive groves, and overlooking a fertile plain. It contains no visible traces of antiquity; but the name and the situation render it highly probable that it occupies the site of *Ramah* of Naphtali. It was visited by Schultz in 1847 (Ritter, *Pal. und Syr.*, iii. p. 772), and by Robinson in 1852 (*Bib. Res.*, iii. p. 79).

4. *Ramah*, the birth-place and home of the prophet Samuel, and the city elsewhere called *RAMATHAIM-ZOPHIM*, which see (1 Sam. i. 19; ii. 11, etc.).

5. *Ramah, a City of Gilead* (2 Kings viii. 29; 2 Chron. xxii. 6), identical with *RAMOTH-GILEAD*, which see.

It has been supposed that the *Ramah* of Neh. xi. 33 is distinct from *Ramah* of Benjamin (Mr. Grove, in Smith's *Dict. of Bible*, ii. p. 1000); if so this would make a sixth Scripture town of the same name. The only reason for the supposition is that its position in the list of towns seems to remove it farther west than *Ramah* of Benjamin. Mr. Grove is inclined to identify it with *Rameh* in the plain of Philistia. This supposition is of little weight, for the grouping of the names would lead us to place *Ramah* as near to Nob and Anathoth as to Lod and Ono. If the sites of Ananiah, Hazor, and Gittaim were satisfactorily identified we might be able to pronounce more definitely regarding *Ramah*.—J. L. P.

**RAMATH-LEHI** (רַמַּת לֵחִי; Ῥαμαθισ σα- γόβος; *Ramath-lechi*). The origin of this name, which occurs only in Judg. xv. 17, forms one of the most romantic episodes in Scripture history. Samson, having been bound with two new cords, was given up to the Philistines at a place called *Lehi*, a name which signifies 'jaw-bone.' When the enemy attacked him he burst his bonds, seized the *jaw-bone* (*lehi*) of an ass that lay upon the ground, and with this odd weapon slew a thousand of them. Then he threw away the jaw-bone, and, as a memorial of the event, and by a characteristic play upon the old name, he called the place *Ramath-Lehi*, that is the lifting (or wielding?) of the jaw-bone; and so it is interpreted in the Vulgate—*elevatio maxille*; and in the LXX. The same word differently pointed (רַמַּת, from the root רָמַה, 'to cast') would signify 'the casting away' (see Gesenius, *Thes.*, p. 752). For the topography of the place, see *LEHI*.—J. L. P.

**RAMATH-MIZPEH** (רַמַּת הַמִּצְפֶּה), with the art. 'The high-place of the watch-tower;' Ῥαμᾶς κατὰ τὴν Μασσφά; Alex. *Ῥαμᾶς κατὰ τὴν Μασφά*; *Ramoth, Masphe*). In defining the boundaries of the tribe of Gad, Joshua states that Moses gave them inheritance. . . . 'From Heshbon unto Ramath-mizpeh, and Betonim' (Josh. xiii. 26). This place is nowhere else mentioned; and it appears to have constituted one of the landmarks on the northern border of the tribe, which ran from the banks of the Jabbok in the parallel of Jerash to the southern end of the Sea of Galilee. Somewhere in this region therefore *Ramath-mizpeh* must have stood. It was in this region Jacob and Laban had their remarkable

interview and entered into the covenant. The place where they vowed to each other was marked by a heap of stones, and called both *Galeed* and *Mizpah* (Gen. xxxi. 48, 49). This would seem to suggest the identity of the Mizpah of Jacob and Ramath-mizpeh (see GAD and JEGAR-SAHADUTHA). There was, however, another Mizpeh in Gilead, on the north-east border of Gad, and close to the territory of the Ammonites. In later times it became the great gathering-place of Israel east of the Jordan. It may perhaps have been the same as Ramath-mizpeh (see MIZPEH, No. 5). Such minute points of topography cannot be settled until we have a careful survey of the whole country east of the Jordan.—J. L. P.

RAMATH-NEGEB, or RAMATH OF THE SOUTH (רָמַת נֶגֶב; *Βαρεθὰ κατὰ λίβα*; Alex. *Ῥαμὲθ κατὰ λίβα*; *Ramath contra Australem plagam*), a place apparently on the extreme southern border of Simeon. In this form it is only mentioned in Josh. xix. 8, and from the peculiarity of the construction, there being no copulative, it would seem to be only another name for Baalath-beer, as suggested by Reland (*Pal.*, p. 964), and interpreted by Keil (*ad loc.*) Yet the Septuagint makes the places distinct. Be this as it may, Negeb is manifestly the name of a district, and not a general term signifying 'south.' [NEGEB.]

In 1 Sam. xxx. 27, SOUTH RAMOTH (רָמֹתֵי נֶגֶב; in the plural; *Ῥαμὰ νότον*; Alex. *Ῥαμὰς νότον*; *Ramoth ad meridiem*) is mentioned as one of the cities to which David sent portions of the spoils of the Amalekites. Doubtless it is the same place called by Joshua Ramath-negeb. The name should be written *Ramoth-negeb*. The site is unknown, and the region where it stood is in a great measure unexplored.—J. L. P.

RAMATHAIM-ZOPHIM or RAMAH (רָמַתַּיִם זֹפִיִּים; *Ῥαμασαιμ Ζοφιμ*; Alex. *Ῥαμασαιμ Ζωφιμ*, both MSS. making the art 7 part of the word; *Ramathaim Sophim*; and *הָרָמָה*; *Ῥαμασαιμ*; *Ramatha*). In its full form this name only occurs in 1 Sam. i. 1; in all other places it is written simply *Ramah*, of which *Ramathaim* appears to be the dual, and Zophim is added by way of distinction. It was the birth-place of the prophet Samuel (1 Sam. i. 19), his own permanent and official residence (vii. 17; viii. 4), and the place of his sepulture (xxv. 1). This is all we know of it with any degree of certainty.

Gesenius questions the identity of Ramathaim-Zophim and Rama (*Thesaurus*, p. 1275); but a comparison of 1 Sam. i. 1 with ver. 19 shows without doubt that the same place is referred to. This, too, was the view of the Septuagint translators, who uniformly render the name *Ῥαμασαιμ*. The word *Zophim* has been variously explained. The most natural explanation appears to be that *Zuph*, one of Samuel's ancestors, had migrated from his home in Ephrata (1 Sam. i. 1; 1 Chron. vi. 35), and settled in a district to which he gave his own name, and which was afterwards called the land of *Zuph* (1 Sam. ix. 5). Ramah, or Ramathaim, was the chief town of this district, and was hence called *Ramathaim-Zophim*, that is, 'Ramah of the Zuphites' (see Robinson, *B. R.*, ii. 7).

The position of Ramathaim-Zophim is one of the

puzzles of Biblical geography. Though the ablest students have exercised all their learning and ingenuity upon it, it remains to this day without a satisfactory solution. As the city is one of great interest, it may be well to give the principal theories as to its site, and then to state the data on which alone the site can be determined.

(1.) Eusebius and Jerome locate it near Diospolis or Lydda (*Onomast.*, s. v. *Armatha Sophim*) and identify it with the Arimathæa of the N. T. (Matt. xxvii. 57). The latter may be correct, for the Septuagint *Ῥαμασαιμ* seems to be the same name as the N. T. *Ῥιμαθα*, and represents the Hebrew *הֶרְמָתַיִם*, with the article. There is no doubt there was a city called Armatha or Ramathem, on the plain near Lydda, at an early period, and its modern representative may be Ramleh, as suggested by Reland and others (Reland, *Pal.*, pp. 580, 959; see, however, Robinson, *B. R.*, ii. 238); but Ramah of Samuel could not have been so far distant from Gibeah of Saul, and was besides situated in the mountains. (2.) Some would identify this city with Ramah of Benjamin (Gesenius, *Thes.*, p. 1275; Winer, *R. W.*, s. v. *Rama*); but this Ramah was much too close to Saul's residence at Gibeah to suit the requirements of the sacred narrative (1 Sam. ix. xix. 18). (3.) Dr. Robinson has suggested that the site of Ramah may be that now occupied by the village of Sôba, which stands on a lofty and conspicuous hill-top, about six miles west of Jerusalem. Sôba, he thinks, may be a corruption of the old name *Zuph*; its elevation would answer well to the designation *Ramah*; it might be regarded as included in the mountains of Ephraim, or at least as a natural extension of them; and a not very wide detour would take the traveller from Sôba to Gibeah by the tomb of Rachel (*Bib. Res.*, ii. 7-9). The arguments are plausible but not convincing; and it must be admitted that even Dr. Robinson's remarkable geographical knowledge has failed to throw light on the site of Ramathaim-Zophim. (4.) Mr. Wolcott, seeing on the spot the difficulties attending Robinson's theory, and finding a remarkable ruin called *Ramet el Khulil*, near Hebron, concluded that this was the site of Samuel's city. A summary of his reasons is given by Robinson in the *Biblical Cabinet* (vol. xliii. p. 51; see also *Bib. Res.*, iii. 279). They are not more convincing than those advanced in favour of Sôba, yet they have been adopted and expanded by Van de Velde (*Narrat.*, ii. 48-54; *Memoir*, 341). (5.) Gesenius thinks that *Ῥαμα* is, or as it is usually called, *Frank Mountain*, the conspicuous conical hill three miles south-east of Bethlehem, is the true site of Ramah (*Thesaurus*, p. 1276). This, however, is pure conjecture, without any evidence to support it. (6.) Ewald is in favour of the little village of *Ramallah*, a mile west of Beeroth (*Geschichte*, ii. 550, note). It is doubtless situated in Mount Ephraim, retains the old name, and the name *Allah*, 'God,' might be an indication of some old peculiar sanctity; but it is open to the same objections as all others north of Rachel's tomb. (7.) One of the most ancient, and certainly one of the most plausible theories is that which locates Ramathaim-Zophim at *Neby Samwîl*. It is most probably to this place Procopius alludes in the statement that Justinian caused a well and a wall to be erected for the convent of St. Samuel (*De Edific. Just.*, v. 9; cf. Robinson, *B. R.*, i. 459). From the 7th century, when Adamnanus de-

scribed Palestine, and spoke of 'the city of Samuel, which is called Ramatha' (*Early Travels*, Bohn, p. 5), down through the Middle Ages to the present day, the name of the prophet has been connected with this spot, and the uniform tradition of Jews, Christians, and Mohammedans, has made it the place of his birth and burial (see authorities cited in Robinson, *l. c.*) The Crusaders built a church over the alleged tomb, which after the fall of the Latin kingdom was converted into a mosque; and its walls and tall minaret are still visible from afar (Quaresmius, ii. p. 727; Pococke, ii. p. 48). Neby Samwil is unquestionably the site of a very ancient city; its position on the summit of a high conical hill would give it a just title to the name Ramah; it probably lay within the region termed the 'Mountains of Ephraim,' and it would form an appropriate residence for the great judge of Israel. Yet there are very formidable objections to its identification with Ramathaim-Zophim. It appears to be much too near Gibeah, the capital of Saul's kingdom, to form a safe refuge for David when he fled from that monarch. It is not an hour's ride distant, and it is in full view. Then if the scene of Saul's first interview with Samuel when in search of his father's asses be fixed at Samuel's home in Ramah, as appears most natural, Neby Samwil cannot possibly be the place. It has been shown besides, that Neby Samwil is most probably the site of Mizpah (MIZPAH, No. 4).

Those scriptural allusions which tend to indicate the position of Ramathaim-Zophim are the following; and they are our only trustworthy guides. The statements of Eusebius and later writers can have little weight; and indeed it appears that all knowledge of the city was lost before their time.

(a.) In 1 Sam. i. 1 we read: 'There was a certain man of Ramathaim-Zophim, of Mount Ephraim.' From this it would appear at first sight that Ramathaim was situated in the district called Mount Ephraim. The construction of the Hebrew, however, does not make this quite certain. The phrase מְנַדְהֶרֶמְתַּיִם צוֹפִים מוֹהַר אֶפְרַיִם might possibly mean, not that Ramathaim was in Mount Ephraim (which would be expressed rather by מוֹהַר), but that Elkanah was in some way of Mount Ephraim (the Hebrew is מוֹהַר), though residing in Ramathaim. The statement of the sacred writer, therefore, does not form an insuperable objection to a theory that would locate Ramathaim beyond the bounds of Mount Ephraim. And besides, the extent of the region called Mount Ephraim is nowhere defined. It may mean that section of mountain allotted to the tribe of Ephraim, or it may have extended so as to include part, or even the whole of Benjamin. It could scarcely have embraced any portion of Judah, since the two tribes were rivals for sovereignty. The allusions to Mount Ephraim in 1 Sam. ix. 4; Josh. xvii. 15; Judg. xvii. 1; appear to confine the name to the territory of the tribe.

(b.) Ramah would appear to have been at some considerable distance from the residence of Saul at Gibeah; such at least is the conclusion one would naturally draw from the following passages: 1 Sam. xv. 34, 35; xix. 18-23.

(c.) It is generally supposed that the first interview between Saul and Samuel took place at Ramah. This is not directly stated. Dr. Robinson admits that it is not, and says that 'the answer of the maidens (1 Sam. ix. 11, 12) would perhaps

rather imply that Samuel had just arrived, possibly on one of his yearly circuits, in which he judged Israel in various cities' (*Bib. Res.*, ii. 10). Mr. Grove argues that the interview *could not* have taken place in Ramathaim, because the place of the interview was near the sepulchre of Rachel close to Bethlehem, while Mount Ephraim did not extend farther south than Jerusalem (Smith's *Dict. of the Bible*, ii. 999). This assumes that Ramathaim-Zophim was in Mount Ephraim, which is not certain. It cannot be questioned that, apart from all theories, the whole course of the narrative leaves the impression that Samuel was in his own house in Ramah when Saul visited him. He was there when the Lord informed him, apparently on the preceding day (cf. 1 Sam. viii. 4, 22; ix. 15, 16), of his intention to appoint a king. The words of Saul's servant, too, convey the same impression: 'When they were come to the land of Zuph, Saul said, Let us return;' but the servant said, 'Behold now, there is *in this city* a man of God . . . let us go thither' (ix. 5, 6). This would scarcely apply to a place in which Samuel was but a casual visitor. And it ought not to be forgotten that the interview took place *in the land of Zuph*. Samuel's ancestor, as has been seen, was called *Zuph*, and his city was Ramathaim-Zophim. The Hebrew words are identical (רַמְתַּיִם צוֹפִים) the plural form of צוֹפִים. It is granted that all this is not conclusive. It is impossible to say with absolute certainty that the interview took place at Ramah. But if it did, it is clear that Neby Samwil cannot occupy the site of that city. The place of the interview could not have been within the tribe of Benjamin, because (a) the Lord, in foretelling to Samuel the coming of Saul, said, 'To-morrow, about this time, I will send thee a man out of the land of Benjamin' (1 Sam. ix. 16); and (b) Saul when in search of the asses 'passed through Mount Ephraim, and passed through the land of Shalisha; then through the land of Shalim; and he passed through the land of the Benjamites' (ver. 6). Then they came 'to the land of Zuph.' The land of Zuph was consequently south of Benjamin. So in returning home (apparently to Gibeah) from the place of the interview, Saul's way led past Rachel's tomb, the site of which is well known near Bethlehem. The city where the interview took place, therefore, must have stood somewhere to the south or south-west of Bethlehem.

This seems to be all that can be said upon the subject. To attempt greater definiteness would be only to put theories in the place of facts.—J. L. P.

RAMBACH, JOHANN JAKOB, was born at Halle 24th Feb. 1693, and died 19th April 1735 at Giessen, where he was professor of theology and first superintendent. During his comparatively short life he devoted himself to sacred studies, and produced some valuable works. Besides assisting Michaelis in the preparation of his Hebrew Bible, and of his *Adnotationes uberores in Hagiographa*, he was the author of *Institutiones Hermeneutice sacrae*, of which the 8th edition appeared in 1764; *Exercitationes Hermen.*, sive p. ii. *Instit. Herm.*, Jena 1728, ed. sec. 1741; *Comment. Herm. de sensus mystici criterii*, Jen. 1728, 1731. His other works are dogmatical and polemical.—W. L. A.

RAMBAM. [MAIMONIDES.]

RAMBAN. [NACHMANIDES.]

RAMESES (רַעַמְסֵס; Sept. 'Ραμεσση), an Egyptian city in the land of Goshen, built, or at least fortified, by the labour of the Israelites (Gen. xlvii. 11; Exod. i. 11; xii. 37; Num. xxxiii. 3-5). The name of the city seems to have been sometimes given to the whole province (Gen. xlvii. 11), by which it would appear to have been the chief city of the district. It has been supposed that it was situated on the watershed between the Bitter Lakes and the Valley of the Seven Wells, not far from Heroöpolis, but not identical with that city (See Robinson's *Bibl. Researches*, i. 70, 547-550). This, however, is very doubtful. In Exod. i. 11, the name is, by a difference in the points, spelt רַעַמְסֵס, Raamses. The name means 'son of the sun,' and was borne by several of the ancient kings of Egypt, one of whom was probably the founder of the city.

RAMMAK (רַמָּאָק). This word occurs once in the plural combined with בָּנִי (Esther viii. 10). In the A. V. the conjoined words are rendered 'young dromedaries;' but for this there is no authority. These words are evidently in apposition with what precedes; and the whole may be rendered thus: 'persons riding on swift horses [RECHESH], mules, sons of brood-mares;' or, as Bertheau (with strong reasons in support of his rendering) gives it, 'riding on runners [horses], noble (or royal) sons of stallions' (*Exeget. Hdb.*, in loc.) The word stands allied with Syr. ܪܡܟܐ, *ramko*, a herd (especially of horses), and the Arab. رماكة, *ramakat*, a mare. *Rammak*, as a strong form, is held by Bertheau to designate 'that animal which in the herd or in the stud is pre-eminent in energy, the stallion.'—W. L. A.

RAMOTH (רָאֲמוֹת), an article of value (Job xxviii. 18), and an object of commerce on the part of the Syrians (Ezek. xxvii. 16). In the A. V. it is rendered by *coral*, an interpretation which is vouched for by tradition, but has little else in its favour. The word properly means 'high things' (Prov. xxiv. 7), and Lee proposes to retain this meaning in Job in the sense of things in *high estimation, costly things*; but both in Job and in Ezekiel it seems to denote some special precious thing. It may have been coral, and the name may be derived from רָאָם, *to be high, to branch out*; or from רָאָם, comp. Arab. رعى, *to be red*; or perhaps from רָאָם, the *Re'em*, or *wild ox*, whose branching horns it may have been thought to resemble.—W. L. A.

RAMOTH-GILEAD and RAMOTH IN GILEAD (רָאֲמוֹת גִּלְעָד and רָאֲמוֹת גִּלְעָד) also written *plene*, רָאֲמוֹת, in 2 Chron. xxii. 5; and simply רָאֲמוֹת in 2 Kings viii. 29 and 2 Chron. xxii. 6; Ραμῶθ ἐν τῇ Γαλααδ; Ραβῶθ Γαλααδ; Ρεμμῶθ; Ρεμμῶθ, etc.; *Ramoth-Galaad*, one of the chief cities of the tribe of Gad, on the east side of the Jordan. It was allotted to the Levites, and appointed a city of refuge (Deut. iv. 43; Josh. xx. 8). The latter fact would seem to indicate that it occupied a central position in the tribe, and also pro-

bably in the country assigned to the Israelites east of the Jordan. If so it could scarcely have stood, as some have supposed, on the extreme north-eastern border of Gad. Ramoth played for a time an important part in Israelitish history, and was the scene of many a hard struggle. It was apparently a strong fortress, and considered the key of the country. Hence when taken by the Syrians the kings of Israel and Judah regarded it as a national loss, affecting both kingdoms; and they combined to drive out the common enemy (1 Kings xxii. 4, *seq.*) The united attack was unsuccessful, and the king of Israel was mortally wounded in the battle (xxii. 34-37).

At a later period, apparently in the reign of Joram (2 Kings ix. 14, 15; with Joseph. *Antiq.* ix. 6. 1), Ramoth was taken from the Syrians, and held notwithstanding all the efforts of Hazael to regain it. Joram having been wounded in the struggle left his army under the command of Jehu, and returned to Jezreel to be healed (2 Kings viii. 29). During his absence Jehu was anointed by order of Elisha (ix. 1, 2), and commissioned to execute vengeance on the wicked house of Ahab (ver. 7-10). Leaving Ramoth, Jehu drove direct to Jezreel. The king, expecting news from the seat of war, had watchmen set on the towers who saw his chariot approaching (16, 17). The rest of the story is well known.

After this incident Ramoth-Gilead appears no more in Jewish history.

The exact position of Ramoth is nowhere defined in Scripture. The name (*Ramoth*, 'heights') would seem to indicate that it occupied a commanding position on the summit of the range of Gilead. In 1 Kings iv. 13 we read that when the districts of Solomon's surveyors were arranged, the son of Geber was stationed in Ramoth, and had charge of all the cities of Jair the son of Manasseh, both in Gilead and Bashan; and these cities extended over the whole north-eastern section of Palestine beyond Jordan. Various opinions have been entertained regarding the site of this ancient city. Some would identify it with *Jerash*, the old Roman *Gerasa*, whose ruins are the most magnificent and extensive east of the Jordan (see *Ben-jamin of Tudela*, by Asher), but this is too far north, and Jerash besides lies in a valley. Ewald would locate it at the village of *Reimun* among the mountains, five miles west of Jerash (*Gesch.*, iii. p. 500; Winer, *R. W.*, s. v. *Ramoth*). For this there is no evidence whatever.

The most probable opinion regarding the site of Ramoth is that which places it at the village or *es-Salt*. This is indicated—(a), by its position on the summit of a steep hill; (b), by its old ecclesiastical name *Salut Hieraticus*, which appears to point to its original 'sacerdotal' and 'holy' character, Ramoth having been both a Levitical city and a 'city of refuge' (see Reland, *Pal.*, p. 213); (c), by the fact that about two miles to the north-west of *es-Salt* is the highest peak of the mountain-range still bearing the name *Jebel Jilad*, 'Mount Gilead;' and (d), by the statement of Eusebius that Ramoth-Gilead lay in the fifteenth mile from Philadelphia towards the west, and this is the exact distance of *es-Salt* from Rabbath-Ammon (*Onomast.*, s. v. *Rammoth*).

It may therefore be concluded that *es-Salt* occupies the place of the celebrated Ramoth-Gilead. The situation is strong and picturesque. The hill

on which it stands is separated by deep ravines from the loftier mountains that encompass it; and its lower slopes are covered with terraced vineyards, while the neighbouring hill-sides and valleys abound with olive groves. On the summit stands the castle, a rectangular building with towers at the corners, and defended by a deep moat hewn in the rock. The foundations appear to be Roman, if not earlier, but the upper walls are Saracenic. In the town itself, which contains some three thousand inhabitants, there are few remains of antiquity. In the cliffs and ravines beneath it are great numbers of tombs and grottoes (*Handbook for S. and P.*, p. 308). Es-Salt is famed for its vineyards; and its raisins are esteemed the best in Palestine. They are carried in large quantities to Jerusalem (Burckhardt, *Syria*, p. 349; Irby and Mangles, *Travels*, p. 321; Ritter, *Pal. und Syr.*, pp. 1121-38; Abulfeda, *Tüb. Syr.*, p. 92; Buckingham, *Travels*, p. 20).

Winer and others identify Ramoth-Gilead, Ramath-Mizpah, and Mizpah of Gilead. On this, see the articles MIZPAH, No. 5; and RAMAH.—J. L. P.

RAMS' HORNS. [MUSICAL INSTRUMENTS.]

RAMS' SKINS DYED RED (עֲרֹת אֵילִים מֵאֲדָמִים, *Exod.* xxv. 5, and xxxv. 7). One of the materials employed for the covering of the tabernacle. The words may be rendered 'red rams' skins,' and may be understood as the produce of the African Aoudad, the *Ovis tragelaphus* of naturalists, whereof the bearded sheep are a domesticated race. The *tragelaphus* is a distinct species of sheep, having a shorter form than the common species, and incipient tear-pits. Its normal colour is red, from bright chestnut to rufous chocolate; which last is the cause of the epithet *purple* being given to it by the poets. We agree, however, with Dr. Mason Harris, that the skins in question were most likely tanned and coloured crimson; for it is well known that what is now termed red morocco was manufactured in the remotest ages in Libya, especially about the Tritonian Lake, where the original ægis, or goat-skin breastplate of Jupiter and Minerva, was dyed bright red; and the Egyptians had most certainly red leather in use, for their antique paintings show harnessmakers cutting it into slips for the collars of horses and furniture of chariots.—C. H. S.

RANDOLPH, THOMAS, was born at Canterbury in 1701. He was educated at Oxford, where he ultimately became president of Christ Church College, and Lady Margaret professor of divinity. He was also archdeacon of Oxford, and held other pieces of ecclesiastical preferment. He died in 1783. His only contribution to Biblical literature is entitled, *The Prophecies and other texts cited in the N. T., compared with the Hebrew original and with the LXX. version*, Oxf. s. a.; a careful collation of passages, with judicious notes.—W. L. A.

RAPHEL, GEORG, pastor and superintendent at Lüneburg, was born 10th September 1673, at Lüden, in Silesia, and died 7th June 1740. He was the author of *Annotations in S.S. historice in Vet., philol. in N. T. ex Xenophonti, Polybio, Arriano et Herodoto Collectæ*, Lugd. Bat. 1747, 2 vols. 8vo.—W. L. A.

RAPHION (Ῥαφών), a place where Judas Macabæus obtained a victory over Timotheus (1 Maccab. i. 37). Josephus calls it a πῶλις (*Antiq.* xii. 8. 4); and it has been suggested that it is probably the Raphana mentioned by Pliny (*Hist. Nat.*, v. 16) as one of the towns of the Decapolis. From ver. 45 it appears it was near to Carnaim—i.e., Ashtaroth-Carnaim. Near to it was a torrent, but there are no means of identifying it.—W. L. A.

RASHBAM (רש"ב) is the acrostic of רבי

שמואל בן מאיר, *Rabbi Samuel b. Meir*, the celebrated commentator and Tosafist, and Rashi's daughter's son. He was born at Ramero about 1085, and died about 1154. Till the beginning of the last century this exquisite scholar was chiefly known as having completed the commentaries on certain tractates of the Talmud (viz., *Pesachim*, *Baba Bathra*, etc.), which his grandfather Rashi had left unfinished, and by his discussions on sundry legal points in the Pentateuch which are embodied in the Tossaphoth. In 1705, however, his *commentary on the Five Books of Moses*, entitled פֶּרֶשׁ הַרֶשֶׁבֶם, *the Exposition of Rashbam*, was for the first time published in the edition of the Hebrew Pentateuch, with the Haphtaroth, the Five Megilloth, the Massorah, the three Chaldee paraphrases, the Chaldee paraphrases of the Megilloth, the second Chaldee paraphrase of Esther, the commentaries of Rashi, Ibn Ezra, Jacob b. Asher, Aaron Pesaro, David Kimchi on the Haphtaroth, etc., Berlin 1705—which at once established his reputation as one of the most distinguished expositors of the Scriptures belonging to the French school. Rashbam's commentary, which was published from Oppenheim's MS., begins with Gen. xviii. and ends with Deut. xxxiii. 3. It was republished in this imperfect condition in the excellent edition of the Hebrew Pentateuch, with the Chaldee paraphrases, sundry commentaries, etc., Amsterdam 1727-29, though it was evident from his quotations (*Gen.* xxv. 27; *Exod.* xiv. 30; xx. 10; *Lev.* ii. 1), as well as from the writings of others (comp. Jacob b. Asher on *Gen.* iv. 26), that the other portions existed in MS. The erudite and indefatigable Geiger published, from a Munich MS., a portion of this missing commentary, extending from *Gen.* i. 1 to 31, in the Hebrew Annual called *Kerem Chemed*, vol. viii. p. 41-51, Berlin 1854, and it is to be regretted that this portion is not inserted in the excellent edition of the Pentateuch, with sundry Rabbinic commentaries, published at Vienna 1859, in which Rashbam's commentary is given. A super-com-

mentary, entitled קֶרֶן שְׁמוּאֵל, *the Horn of Samuel*, on Rashbam's exposition, by S. Hessel, was published in Frankfurt-on-the-Oder 1721. Rashbam also wrote פֶּרֶשׁ הַמֵּשׁ מִנְלוֹת, *A Commentary on the Five Megilloth*, of which only that on two Megilloth—viz., the Song of Songs and Ecclesiastes—has been published by Jellinek, Leipzig 1855. Excerpts from the other three Megilloth are given

in פְּרָשִׁים עַל אֶסְתֵּר וְעַל רֹת וְאִיכָה, edited by the same indefatigable scholar, Leipzig 1855. An English translation of the first chapter of the commentary on Ecclesiastes is given by Ginsburg, *Historical and Critical Commentary on Ecclesiastes*, Longman, 1861, p. 42-46. The commentary on the Psalms, edited by Isaac Satanov, Berlin 1794,

and reprinted Vienna 1816, which is ascribed to Rashbam, is not his. He also completed Rashi's commentary on Job, and we learn from the quotations by the expositors of the north of France school, that he both wrote independent commentaries and glosses to Rashi's comments on the whole O. T. The extraordinary influence which his literal, grammatical, and exegetical commentaries exercised upon his contemporary fellow-labourers, may be judged of from the fact, that no less a person than his own grandfather—the immortal Rashi—was convinced by the soundness of Rashbam's principles of interpretation, and declared to him, that if he had to re-write his expositions, he would adopt those principles of interpretation. Comp. Rashbam's *Commentary on Gen.* xxxvii. 2; Geiger, *נכטעני נעמנים*, p. 29-39, Breslau 1847. By the same author, *Parschandata*, p. 20-24; Fürst, *Bibliotheca Judaica*, iii. 239, etc.—C. D. G.

RASHI (רש"י), formed from the initials of רבי

שלמה יצחקי, *Rabbi Solomon Iachaki* or *Isaaki* = *b. Isaac*, is the name of that eminent commentator and Talmudist who was the founder of the Germano-French school of Biblical exegesis, and who is erroneously called *farchi*. He was born, 1040, at Troyes in Champagne, and not at Lunel in Perpignan, as some will have it, who have been misled by the erroneous assertion of Münster and Buxtorf,

that *Rashi*, רש"י, is the acrostic of שלמה רבי ירחי, *R. Salomon farchi* = of Lunel (from *luna*).<sup>\*</sup> Being the son of a thorough Talmudist, he imbibed from his youth an insatiable desire to become master of all the Rabbinic lore, and for this purpose went to the Rabbinic school at Mayence which was founded by R. Gershon, and which was then conducted by R. Jacob b. Jakar. He after-

wards attended the lectures of R. Isaac Ha-Levi, and Isaac b. Jehudah, at Worms, as well as the school of R. Elijah at Spire, leaving his home and wife, and suffering from want of food and garments in order to acquire divine knowledge. At the age of twenty-five (1064), he permanently settled down at Troyes, where he was already recognised as a high authority in Rabbinic learning, and was consulted by some of the most distinguished Talmudists about difficult civil and religious questions. He soon after became Rabbi of the Jewish community in Troyes, and founded a school to which numerous disciples resorted both from Germany and France (1070). Here he delivered those famous lectures on the Talmud and the Bible which form the substance of his commentary on the Talmud and the Scriptures, and which secured for him the distinguished and witty title of *Parschandata* (פרשנדרה) = *Interpreter of the Law*, which is the name of one of Haman's sons (Esther ix. 7). With the exception of Chronicles and part of Job, Rashi wrote commentaries on the whole O. T. And though the order of his commentaries cannot be traced, as there are no dates affixed to them, internal evidence goes far to show that he began with expounding the Talmud, then wrote his exposition of the traditional commentary on Genesis called *Bereshith Rabba* [MIDRASH], and last of all wrote his comments on the Hebrew Scriptures. As a commentator Rashi combines the traditional exposition contained in the Talmud and Midrashim with a simple and literal explanation of the text; and does not see any inconsistency in putting side by side with the Halachic and Hagadic interpretation his own verbal interpretations, which are sometimes at variance with tradition. Though unacquainted with the labours of the Spanish grammarians and expositors, he incorporates in his commentaries all the lore contained in the cyclopædias of Jewish tradition, as well as the learning of the French expositors. The accents (Num. xi. 9; Deut. xi. 30, *al.*); the Chaldee paraphrases (Gen. iii. 15; vi. 6; xiv. 17, *al.*); the Massorah (Deut. xxxiii. 23; Prov. xiii. 23); the Midrash Bereshith (Gen. i. 5, and almost on every page); Midrash Samuel (Gen. xxxvi. 3; 1 Sam. ii. 30); Midrash Tanchuma (Gen. xi. 5; xiv. 13; Deut. xxxiii. 1, *al.*); Midrash Tillim (Ps. frequently); the Mishna (Gen. xxxvii. 25; Exod. xvi. 31; Num. xxxiv. 3, *al.*); Pesikta (Jer. xl. 1; Lament. i. 14); Siphri (Exod. xviii. 1); Siphri ii. (Levit. x. 19); the Talmuds, both Babylon (Gen. xlviii. 2) and Jerusalem (Gen. xxix. 26); Tosephta (Ezek. xlviii. 8); the expositions and grammatical works of Baruch b. Eliazar (Exod. vi. 9); Dunash b. Labrat (Exod. xxviii. 28; Num. xi. 8, *al.*); Eliazar b. Isaac Gaon (Ps. lxxvi. 11; Job xxiv. 6); Gershon b. Jehudah (Is. xlv. 1); Hai Gaon (Judg. iv. 18; Hos. iii. 3); Jacob b. Jakar (Job xxii. 30); Jacob b. Manachem (Exod. iii. 19); R. Isaac Ha-Levi, one of Rashi's teachers (1 Sam. i. 24; Prov. xix. 24); Jehudah Ha-Darshan (Is. xxxi. 22); Jehudah Ibn Koreish (Jer. xi. 19); Joseph Kara (Prov. iv. 4; v. 14; vi. 20, *al.*); Josippon (2 Kings xx. 13; Is. xxi. 4; xxix. 2, *al.*); Eliazar Kalir (Gen. xxx. 22; Is. xxiv. 22; Ezek. xlii. 20, *al.*); Kalonymos b. Shabtai (Deut. xviii. 2; 1 Sam. xxv. 18; Dan. viii. 14); R. Machir (Gen. xliii. 10); Meier b. Isaac (Ps. lxxiii. 12; Amos iii. 14; Hos. vi. 9); Menachem b. Chelbo (1 Sam. xix. 24; 1 Kings vi. 9; 2 Kings iv. 39,

<sup>\*</sup> Simon (*Hist. Crit. V. T.*, p. 152) and Wolf (*Bibliotheca Hebraea*, i. 1057, etc.) are perfectly right in their assertion that the name *farchi*, by which Christians call this celebrated commentator, is a blunder, and that the Jews of France, and throughout the world, for more than five hundred years after the birth of Rashi, did not even know him by the appellation of *farchi*. The first Jew who mentions Rashi by the name *farchi* is Manasseh b. Israel (1604-1657 [MANASSEH B. ISRAEL]); but even he only uses this name in his Latin works, *De Resurrectione*, 1636; *De Fragilitate*, 1642; and *Spes Israelis*, 1650, which he wrote for Christians who knew this name from Münster and Buxtorf. Sabbatai Bass (1641-1718), who next uses this name in his Bibliographical work, entitled *שפתי שנים*, Amst. 1680, has not only borrowed it from Buxtorf and Bartolucci, but copied it from the Leyden Catalogue, 1674; and he again was followed by Solomon Oliveyra (1640-1708) in his work *דרכי נועם*, Amst. 1683; by Jechiel Heilprin in his *סדר הדורות*, Carlsruhe 1769; and by Abraham Asulai (died 1644) in his *שם הגדולים*, vol. ii., Leghorn 1774. It is therefore astonishing that Pressel (in Herzog's *Real-Encyclopädie*, s. v. 'Rashi'), who refers to Zunz's researches on *Rashi*, should yet repeat De Rossi's objection to Simon, Wolf, etc., without having seen Zunz's thorough refutation of De Rossi's objection (Jost, *Annalen*, i. 328, 335).

*al.*); Menachen b. Saruk (Gen. xv. 2; Exod. iii. 22; xxi. 13; xxviii. 12, *al.*); Menachem the physician (Job vi. 7); Moses Ha-Darshan (Gen. xxxv. 8; xlviii. 7; Num. viii. 7, *al.*); Nathan Ishmaelite (1 Sam. xiv. 27); Saadia Gaon (Exod. xxiii. 12; Ps. xl. 10; Zech. vi. 10; Dan. vii. 25); R. Simon (Is. lviii. 14; Amos vi. 3); R. Tanchuma (Gen. iv. 24)—are all made tributary to the elucidation and illustration of the Scriptures. So great was Rashi's piety and learning, and so extraordinary was the influence which his expositions exercised upon the Jewish nation, that his comments are almost looked upon as part of the Bible, and his interpretation is to the present day regarded by most orthodox Jews as the authoritative import of Holy Writ. Yet it greatly redounds to his honour that when he, in after life, studied the commentaries of his grandson Rashbam, he frankly confessed that if another opportunity were offered to him he would make his expositions more literal [RASHBAM.] Rashi died July 13, 1105, in the sixty-fifth year of his age. The following are the editions, super-commentaries, and translations of his commentaries:—The Commentary on the Pentateuch was first published in Calabria 1475, then before 1480, then again 1487, and has since been printed in almost every Jewish edition of the Hebrew text. His comments on the other portions of the Bible soon followed. Without entering into particulars about the several editions of the sundry portions, it suffices to say that all Rashi's commentaries are given in the Rabbinic Bibles; that Breithaupt translated the whole of Rashi's commentaries into Latin (four vols. 4to, Gotha 1710-1714), and that this translation is accompanied by very learned and extensive annotations, and contains the super-commentaries entitled *נורי שפת חכמים*, by Löwe, Prague 1578; and *שפת סבבטאי* Bass. The best German translation of the commentary on the Pentateuch is by Leopold Dukes, printed in Hebrew letters with the original of Rashi, and the Hebrew text, Prague 1833-1838, five vols. 8vo. Comp. the elaborate essay on Rashi by the erudite Zunz, *Zeitschrift für die Wissenschaft des Judenthums*, Berlin 1822, p. 277, etc.; by the same author, *Heisst Raschi 'farchi?* in Jost's *Annalen*, vol. i. pp. 328 and 385, etc., Frankfurt-on-the-Maine 1839, and *Zur Geschichte und Literatur*, Berlin 1845, p. 62, etc.; Fürst, *Bibliotheca Judaica*, ii. 78-90; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2340-2357; Geiger, *Parschanda*, Leipzig 1855, p. 12, etc.; Graetz, *Geschichte der Juden*, vol. vi., Leipzig 1861, p. 77, etc.—C. D. G.

RASSES, CHILDREN OF, a people whose country was ravaged by Holofernes (Judith ii. 23). The Vulg. reads *Tharsis*, which has led some to suppose that the original was *תַּרְשִׁישׁ*, and that Tarsus is meant. The Syr. has *Thiras* and *Ra'm-sis*, the old Lat. *Thiras et Rasis*. Fritzsche proposes to find the place in *Pāsoos*, *Pāsoos*, a mountain-range and town south from Amanos (*Exeg. Hdb.*, p. 143).—W. L. A.

RAVEN. [OREB.]

RAZIS (*Pašís*; Alex. *Pašéis* = *רָזִי* or *רִזְנִי*; comp. Syr. *رَازِي*), a patriotic Jew who committed suicide rather than fall into the hands of the enemy (2 Maccab. xiv. 37-46). In dying he pro-

fessed his faith in the resurrection (ver. 46). As suicide was wholly repugnant to Jewish modes of thought, the evident commendation with which the writer records this act has been urged as an argument against the canonicity of the book.—W. L. A.

REBEKAH (*רִבְקָה*, a *noosed cord*; Sept. *Ῥεβέκκα*), daughter of Bethuel, and sister of Laban, who became the wife of Isaac, and the mother of Jacob and Esau. The particulars of her history and conduct, as given in Scripture, chiefly illustrate her preference of Jacob over Esau, and have been related in the article JACOB: see also ISAAC.

RECENSION. After the critical materials at the basis of the N. T. text had accumulated in the hands of Mill and Bentley, they began to be examined with care. Important readings in different documents were seen to possess resemblances more or less striking. Passages were found to present the same form, though the MSS. from which they were derived belonged to various times and countries. The thought suggested itself to Bengel, that the mass of materials might be definitely classified in conformity with such peculiarities. The same idea afterwards occurred to Semler. Bengel classified all the documents from which various readings are collected into two *nations* or *families*—the Asiatic and the African. To the former belonged the codex Alexandrinus as the chief; to the latter the codices Græco-Latini. At first the eminent critic does not seem to have had a very distinct apprehension of the subject; and therefore he speaks in general terms of it in his edition of the Greek Testament published in 1734; but in the posthumous edition of the *Apparatus Criticus* (1763, edited by Burkius) he is more explicit. Semler was the first that used the term *recension* of a particular class of MSS., in his *Hermeneutische Vorbereitung* (1765). This critic, however, though acquainted with Wetstein's labours on the text of the N. T., had nothing more than a dim notion of the subject. He followed Bengel without clearly understanding or enlarging his views. Griesbach was the first scholar who treated the topic with consummate learning and skill, elaborating it so highly that it became a prominent subject in the criticism of the N. T. But he had the benefit of Wetstein's abundant treasures. The term *recension* applied to MSS. quotations by ancient writers, and versions of the Greek Testament bearing an affinity to one another in characteristic readings, became a classical word in his hands; and has continued so. The appellation is not happily chosen. *Family*, *nation*, *class*, or *order*, would have been more appropriate; because *recension* suggests the idea of revision, which is inapplicable. If it be remembered, however, that the word denotes nothing more than a certain class of critical documents characterised by distinctive peculiarities in common, it matters little what designation be employed.

The sentiments of Griesbach, like those of Bengel, developed and enlarged with time. Hence we must not look for exactly the same theory in his different publications. In his *Dissertatio Critica de codicibus quatuor Evangeliorum Origenianis*, pars prima, published in 1771, he says, that there are perhaps three or four recensions into which all

the codices of the N.T. might be divided (*Opuscula Academica*, edited by Gabler, p. 239, vol. i.)

In the preface to his first edition of the Greek Testament (1777) he states that at the beginning of the 3d century there were two recensions of the gospels, the Alexandrian and the Western.

In the prolegomena to the first volume of his second edition of the Greek Testament, the matured sentiments of this able critic are best set forth. There he illustrates the Alexandrian recension, the Western, and the Constantinopolitan. The first two are the more ancient, belonging to the time in which the two collections of the N. T. writings, the *εὐαγγέλιον* and *ὁ ἀπόστολος*, were made. The Alexandrian was an actual recension arising at the time when the two portions in question were put together; the Western was simply the accidental result of carelessness and arbitrary procedure on the part of transcribers and others in the MSS. current before the *ἀπόστολος* or epistles were collected. The Constantinopolitan arose from the intermingling of the other two, and, like the Western, is no proper *recension*, but was rather the result of a condition of the documents brought about by the negligence and caprice of copyists or meddling critics. The Alexandrian is presented by the MSS. C L 33, 102, 106, and by B in the last chapters of the four gospels; by the Memphitic, Ethiopic, Armenian, and Philoxenian versions; and the quotations of Clemens Alexandrinus, Origen, Eusebius, Athanasius, Cyril of Alexandria, and Isidore of Pelusium. The Western accords with the codices Graeco-Latini, with the Ante-Hieronymian Latin version, and with B in the gospel of St. Matthew; also with i. 13, 69, 118, 124, 131, 157; with the Thebaic and Jerusalem-Syriac versions, and the quotations of Irenæus in Latin, Cyprian, Tertullian, Ambrose, and Augustine. The third or Constantinopolitan is shown in A E F G H S of the gospels, the Moscow codices of the Pauline epistles, the Gothic and Slavonic versions; and in the quotations of such fathers as lived during the 4th, 5th, and 6th centuries in Greece, Asia Minor, and the neighbouring provinces.

The text in Chrysostom he describes as a mixed one; and of P Q and T he says, that they accord sometimes with the Alexandrian, sometimes with the Western. The Alexandrian recension sought to avoid and change whatever might be offensive to Greek ears; but the Western preserved the harsher genuine readings when opposed to the genius of the Greek language; Hebraising ones; readings involving solecism or unpleasant to the ear. The Alexandrian sought to illustrate words and phrases rather than the sense: the Western endeavoured to render the sense clearer and less involved by means of explanations, circumlocutions, additions gathered from every side, as well as by transpositions of words and sentences. It also preferred the readings which are more full and verbose, as well as supplements taken from parallel passages; sometimes omitting what might render the sense obscure or seem repugnant to the context or parallel passages; in all which respects the Alexandrian is purer. The Alexandrian critic acted the part of a grammarian; the Western that of an interpreter. In all these points Griesbach asserts that the Constantinopolitan commonly agrees with the Alexandrian; but with this difference, that it is still more studious of Greek propriety, admits

more glosses into the text, and intermingles either Western readings, which differ from the Alexandrian, or else readings compounded of Alexandrian and Western. No recension is exhibited by any codex in its original purity (*Prolegomena in Novum Testamentum*, 3d edition, by Schulz, vol. i. p. lxx., *et seqq.*)

Michaelis thinks that there have existed four principal editions:—

1. The Western, used in countries where the Latin language was spoken.

2. The Alexandrian or Egyptian, with which the quotations of Origen coincide, and the Coptic version.

3. The Edessene edition, embracing the MSS. from which the old Syriac was made.

4. The Byzantine, in general use at Constantinople after that city became the capital of the Eastern empire.

This last is subdivided into the ancient and the modern (*Introduction to the N. T.*, translated by Marsh, vol. ii. p. 175, *et seq.*, 2d edition).

Assuredly this classification is no improvement upon Griesbach's.

Somewhat different from Griesbach's system is that of Hug, which was first proposed in his *Einführung in das Neue Testament* (1808).

1. The *κοινή* *ἐκδοσις*, i.e., the most ancient text, unrevised, which came into existence in the 2d century, found in D, 1, 13, 69, 124, of the gospels; in D E F G of Paul's epistles; in D E of the Acts; and in the old Latin and Thebaic versions. The Peshito also belongs to this class of text; though it differs in some respects from D.

2. About the middle of the 3d century, Hesychius, an Egyptian bishop, made a recension of the *κοινή* *ἐκδοσις*. To this belong B C L of the gospels; A B C, 40, 30, 367, in the Acts; A B C, 40, 367, in the Catholic epistles; A B C, 46, 367, 17, of the Pauline epistles; and A C of the Apocalypse. It appears in the citations of Athanasius, Marcus and Macarius the monks, Cyril of Alexandria, and Cosmas Indicopleustes. This recension had ecclesiastical authority in Egypt and Alexandria.

3. About the same time, Lucian, a presbyter of Antioch in Syria, revised the *κοινή* *ἐκδοσις* as it then existed in the Peshito, comparing different MSS. current in Syria. In this way he produced a text which did not wholly harmonise with the Hesychian, because he was less studious of elegant Latinity. It appears in E F G H S V of the gospels, and b h Moscow *Evangelistaria* collated by Matthæi, with most of the cursive MSS.; in f, a, i, b, d, c, m, k (Matthæi), of the Acts; in g (Matthæi), f, k, l, m, c, d, of the Pauline and Catholic epistles; in r, k, p, l, o, Moscow MSS., of the Apocalypse; in the Gothic and Slavonic versions, and the quotations of Theophylact, though his text is no longer pure.

4. A fourth recension Hug attributes to Origen during his residence at Tyre. To it belong A K M, 42, 106, 114, 116, and 10 of Matthæi in the gospels, the Philoxenian Syriac, the quotations of Theodoret and Chrysostom.

From this summary it appears that Hug's *κοινή* *ἐκδοσις* agrees substantially with the Western recension of Griesbach. It is more comprehensive, as including the Peshito, with the quotations of Clement and Origen. The Hesychian recension of Hug coincides with the Alexandrian of Griesbach.

Eichhorn's system is substantially that of Hug, with one important exception. He assumed an unrevised form of the text in Asia, and, with some differences, in Africa also. This unrevised text may be traced in its two forms as early as the 2d century. Lucian revised the first, Hesychius the second. Hence, from the close of the 3d century there was a threefold phase of the text—the African or Alexandrian, the Asiatic or Constantinopolitan, and a mixture of both. Eichhorn denied that Origen made a new recension (*Einleitung in das Neue Testament*, vol. iv. sec. 35 and following).

In 1815 Nolan published an *Inquiry into the integrity of the Greek Vulgate*, in which he propounded a peculiar theory of recensions. He divided all the documents into three classes—the Palestinian, equivalent to Griesbach's Alexandrian; the Egyptian, identical with Griesbach's Western; and the Byzantine. The three forms of the text are represented, as he assumed, by the Codex Vaticanus and Jerome's Vulgate, with the Codices Vercellensis and Brixianus of the Latin version. The last two contained a more ancient text than that represented by the version of Jerome. The Palestinian recension, which he attributes to Eusebius of Cæsarea, is greatly censured as having been executed by this Father with arbitrariness and dishonesty, since he tampered with passages because of their opposition to his Arian opinions. At the end of the 5th century this recension was introduced into Alexandria by Euthalius, and was circulated there.

Scholz made two classes or families—the Alexandrian or Occidental, and Constantinopolitan or Oriental. Griesbach's western class is contained in the former. He referred to the Alexandrian, several of the ancient MSS., and a few later ones—the Memphitic, Thebaic, Ethiopic, and Latin versions, and the ecclesiastical writers belonging to western Europe with those of Africa. To the Constantinopolitan he referred the MSS. belonging to Asia Minor, Palestine, Syria, eastern Europe, especially Constantinople, with the Philoxenian, Syriac, Gothic, Georgian, and Slavonic versions, besides the fathers of these regions. To the latter he gave a decided preference, because of their alleged mutual agreement, and also because they were supposed to be written with great care after the most ancient exemplars; whereas the Alexandrian documents were arbitrarily altered by officious grammarians. Indeed, he traces the Constantinopolitan to the autography of the original writers.

Rinck agrees with Scholz in classifying all documents under two heads—the Occidental and the Oriental—the former exhibited in A B C D E F G in the Epistles; the latter containing the cursive MSS. The former he subdivides into two families—the African (A B C) and the Latin codices (D E F G). He finds in it the result of arbitrary correction, ignorance, and carelessness.

Tischendorf's view, given in the prolegomena to the seventh edition of his Greek Testament, is, that there are two pairs of classes, the Alexandrian and Latin, the Asiatic and Byzantine. The oldest form of the text, and that which most bears an Alexandrian complexion, is presented in A B C D I L P Q T X Z Δ, perhaps also R in the gospels. A later form, bearing more of an Asiatic complexion, is in E F G H K M O S U V Γ Δ. For the Acts and catholic epistles the oldest text is

given in A B C; for Acts probably D and I also. For the Pauline epistles the oldest text is represented by A B C H I D F G, the first five being Alexandrian, the last two Latin; D standing between the two classes. A and C in the Apocalypse have a more ancient text than B.

Lachmann has disregarded all systems of recensions, and proceeded to give a text from ancient documents of a certain definite time—the text which commonly prevailed in the 3d and 4th centuries, drawn from Oriental MSS.; with the aid of Occidental ones in cases where the former disagree among themselves. In his large edition he follows the united evidence of eastern and western MSS. His merits are very great in the department of N. T. criticism; but this is not the place to show them. He does not, however, profess to give a text as near as possible to that which he judges to proceed from the sacred writers themselves, as Griesbach and Tischendorf have done. On the contrary, he has simply undertaken to present that form of the text which is found in documents belonging to a certain period, as a basis contributing to the discovery of the authentic text itself. His text is an important aid to the work of finding out the original words; not the original itself, as he would have given it. For this reason his edition contains readings which, in his own opinion, could not have been original. His object was therefore somewhat different from that of most editors. But he set an example of rigid adherence to the task proposed, and of critical sagacity in eliminating the true text from ancient documents of the time, evincing the talents and skill of a master. Since his time it has been the fashion among inferior critics and imitators to attach undue weight to antiquity. Uncial MSS. and their readings have been too implicitly followed by some.

Tischendorf has recently adopted the same views as those of Lachmann, holding that the most ancient text alone should be edited; though it may not always be what the sacred authors wrote. If this principle be laid at the basis of his eighth edition now in progress, it will make a considerable difference between it and the *seventh*. The internal goodness of readings, the context, and sound judgment, are thus excluded. And they are excluded at the expense of something more valuable; for mere outward and ancient testimony can never elicit what ought to be an editor's chief object—the presentation of a text as near the original one as can be procured. The oldest text of the best MSS. and versions is valuable only as far as it assists in attaining that object. It is owing to the undue elevation of antiquity that such a reading as *ὁ μονογενὴς θεός* in John i. 18 has been given in the text of a recent edition. The same excessive veneration for antiquity has led to the separation of *ὁ γέγονεν* from *οὐδὲ ἐν* (John i. 3) in modern times. Lachmann is exceeded by smaller followers; not in his own exact line.

To Griesbach all must allow distinguished merit. He was a consummate critic, ingenious, acute, candid, tolerant, and learned. His system was elaborated with great ability. It exhibits the marks of a sagacious mind. But it was assailed by many writers, whose combined attacks weakened its basis. In Germany, Eichhorn, Bertholdt, Hug, Schulz, Gabler, and Schott, made various objections to it. In consequence of Hug's acute remarks the venerable scholar himself modified his

views. He did not, however, give up the three recensions, but still maintained that the Alexandrian and Western were distinct. He admitted that the Syr ac, which Hug had put with the *κοινή*, was nearer to that than to the Alexandrian class; but he hesitated to put it with the Western, because it differed so much. He denied that Origen used the *κοινή*; maintaining that the Alexandrian, which existed before his time, was that which he employed. He conceded, however, that Origen had a western copy of Mark besides an Alexandrian one; that in his commentary on Matthew, though the readings are chiefly Alexandrian, there is a great number of such as are western, and which therefore appear in D 1, 13, 28, 69, 124, 131, 157, the old Italic, Vulgate, and Syriac. Thus Origen had various copies at hand, as he himself repeatedly asserts. Griesbach also conceded that Clemens Alexandrinus had various copies, differing in the forms of their texts. Hence his citations often agree with the *κοινή ἑκδοσις* and D. Thus Origen and Clement cease in some measure to be standard representatives of the Alexandrian recension. The concessions of Griesbach, resulting from many acute observations made by Hug and others, amounted to this, that the nearness of MSS. and recensions to one another was greater than he had before assumed—that his two ancient recensions had more points of contact with one another in existing documents than he had clearly perceived. The line between his Alexandrian and Western classes became less perceptible. This indeed was the weak point of the system; as no proper division can be drawn between the two. In the *application* of his system he professed to follow the consent of the Alexandrian and Western recensions, unless the internal marks of truth in a reading were so strong as to outweigh this argument. But he departed from his principle in several instances, as in 1 Cor. iii. 4; Gal. iv. 14; Philip. iii. 3; 1 Thes. ii. 7; Heb. iv. 2.

In the year 1814, Dr. Laurence published objections to Griesbach's system, many of which are unfounded. Some of his observations are pertinent and fair; more are irrelevant. He does not show much appreciation of the comparative value of MSS. and texts; and reasons in a sort of mechanical method against Griesbach. It is evident that he was somewhat prejudiced against the Alexandrian recension. Observations like the following show an animus against the German critic: 'Too much dazzled, perhaps, by the splendour of intricate and perplexing research, he overlooked what lay immediately before him. When he threw his critical bowl among the established theories of his predecessors, he too hastily attempted to set up his own, without having first totally demolished theirs; forgetting that the very nerve of his criticism was a principle of hostility to every standard text' (*Remarks upon the Systematic Classification of MSS. adopted by Griesbach*, p. 57). The pamphlet of the Oxford scholar is now almost forgotten; yet it produced considerable effect at the time of its appearance, when the reprinting of Griesbach's Greek Testament in England was associated with the active dissemination of Unitarian tenets, and the accomplished German himself was unjustly charged with leaning to similar views.

In America, Mr. Norton subsequently animadverted upon the same system with considerable acuteness and plausibility. It is evident, however, that he did not fully understand all Griesbach's

sentiments. He had not studied the peculiar readings of MSS., the quotations of the Fathers, and the characteristics of ancient versions. Yet he has urged some objections forcibly and conclusively against the adoption of the system.

Hug's theory of recensions, as far as it differs from Griesbach's, is without foundation. It makes Origen use the *κοινή ἑκδοσις*; whereas his usual text agrees with the Alexandrian. The Hesychian recension was employed at least a hundred years previously by Clement of Alexandria; and that Hesychius was really the author of a recension is historically baseless. He may have corrected, in some places, a few copies which he used. The recension attributed to Lucian is also destitute of historical proof. The basis of this is supposed to have been the *κοινή ἑκδοσις* as it existed in Syria. Again, it is very improbable that Origen undertook to revise the *κοινή ἑκδοσις*. It is true that Jerome appeals to the *exemplars* of Origen; but this does not imply that the latter made a revision of existing copies. The Alexandrian father used copies of the N. T. selected with care, and probably corrected them in various places; but he did not undertake in his old age the laborious task of making a peculiar revision. The silence of ancient writers, especially of Eusebius, who is most copious in his praises of Origen, speaks strongly against the critical studies of the Alexandrian father in the N. T. text. We believe, therefore, that the recension-system of Hug is unsustained by historical data. Succeeding critics have refused to adopt it. Griesbach himself made several pertinent objections to it. It was also assailed by Schott, Kinck, Gabler, and others. Mr. Norton, too, opposed it.

Nolan's system is fundamentally wrong. There is no evidence that the Codex Brixianus contains the Latin version in its oldest form; and therefore the assumed connection of it with the Byzantine text fails to show that the latter is the most ancient and best representative of the original Greek. The Codex Brixianus, on the contrary, is itself a revision of the old Latin text. Nolan thinks that the Codex Vercellensis has a text corrected by Eusebius of Vercelli, after that which he brought from Egypt on his return from exile. But this form of the text circulated in the West before Eusebius; and the Palestinian recension, which he supposes to have been introduced into Alexandria by Euthallus, was there before. Thus the system so ingeniously elaborated by the critic is historically erroneous. It introduces arbitrary and baseless conjectures into the department of criticism, ignores facts, and deals in unjust accusations against ancient writers, such as Eusebius of Cæsarea, who were as honest as the zealous upholder himself of the Byzantine text. All attempts to maintain the most recent, in opposition to the most ancient text, must necessarily fail.

Thoroughly erroneous as Nolan's theory is, it was eagerly welcomed by some advocates of the received text in England. Mr. Horne could say of it, even in the ninth edition of his *Introduction to the Critical Study and Knowledge of the Scriptures*, 'The integrity of the Greek Vulgate he has confessedly established by a series of proofs and connected arguments, the most decisive that can be reasonably desired or expected!'

With regard to Scholz's system, which is identical with Bengel's, it may be preferable to

Griesbach's as far as it allows but two classes of documents. It is certainly simpler. His estimate, however, of the value of families is erroneous. He failed to prove that the particular form of the text current in Asia Minor and Greece during the first three centuries was the same as that presented by the Constantinopolitan MSS. of a much later date. He did not show that the Byzantine family was derived from the autographs of the original writers in a very pure state; and he was obliged to admit that the text which obtained at Constantinople in the reigns of Constantine and Constantine was collated with the Alexandrian; a circumstance which would naturally give rise to a mingling of readings belonging to both. Eusebius states that he made out fifty copies of the N. T. for the use of the churches at Constantinople, at the request of Constantine; and as we know that he gave a decided preference to Alexandrian copies, it cannot be doubted that he followed those sanctioned by Origen's authority. Constantinopolitan codices differ in their characteristic readings from the Alexandrian; but the preference belongs to the latter, not the former. Why should junior be placed above older documents? Antiquity may be overbalanced by other considerations; and certainly the Alexandrian MSS. are neither faultless nor pure. But the Byzantine and later MSS. are more corrupt. Numbers must not be considered decisive of right readings in opposition to antiquity; yet numbers had an undue influence on Scholz's mind. Rinck has refuted his supposed proofs of the superiority of Constantinopolitan MSS.; and Tischendorf has more elaborately done the same, in the preface to his first edition of the Greek Testament (1841). In fact, Scholz's historical proofs are no better than fictions which true history rejects.

No definite system of recensions, such as those of Griesbach, Hug, and Scholz, can be made out, because lines of division cannot be drawn with accuracy. Our knowledge of the ways in which the early text was deteriorated, of the influences to which it was exposed, the corrections it underwent in different places at different times, the methods in which it was copied, the principles, if such there were, on which transcribers proceeded, is too meagre to build up a secure structure. The subject must, therefore, remain in obscurity. Its genius is such as to give rise to endless speculation, without affording much real knowledge. It is vague, indefinite, shadowy; awakening curiosity without satisfying it. Yet we are not disposed to reject the entire system of classification as visionary. It is highly useful to arrange the materials. The existence of certain characteristic readings may be clearly traced in various monuments of the text; however much we may speculate on their causes. It is true that in several cases it is very difficult to distinguish the family to which a particular reading belongs, because its characteristics may be divided between two classes. Or they may be so mixed that it is almost impossible to detect the family with which it should be united. The evidences of its relationship may be so obscure as to render the determination of its appropriate recension a subtle problem. It is also unquestionable, that no one MS. version or Father exhibits a recension in a pure state; but that each form of the text appears more or less corrupted.

The speculations of the critics to which we have

referred have had one advantage—viz., that they have made the characteristic readings of MSS. better understood, and enabled us to group together certain documents presenting the same form of text. Thus in the gospels—

Ν Α Β C D I L P Q T X Z present an older form of the text than Ε F G H K M S U V I'. Among the former, Ν Β Ζ have a text more ancient and correct than that of the others.

Matthæi repudiated the whole system of recensions as useless and absurd. We question whether he was warranted by learning, penetration, or judgment, to use the contemptuous language which he applied. His industry in collating MSS. and editing their text, was praiseworthy; but he had not the genius to construct a good text out of the materials within his reach. He over-estimated his Moscow codices, and looked on Griesbach's merits with envious eye. Hence his diatribe on recensions shows more ardent zeal than discretion. What sentence can show the spirit of the man better than this?—'Griesbach has been hammering, filing, and polishing for thirty years at this masterpiece of uncriticism, unbelief, and irreligiousness, in Semler's recension - manufactory' (*Ueber die sogenannten Recensionen welche der Herr Abt Bengel, Der Herr Doctor Semler, und der Herr Geheim-Kirchenrath Griesbach, in dem Griechischen Texte der N. T. wollen entdeckt haben*, p. 28). Professor Lee employed language equally strong as Matthæi's, but not so scurrilous, though of the same tendency—'Ingeniosæ illæ familiarum fabricæ, ut mihi videtur, in unum tantummodo finem feliciter extructæ sunt; ut se rem in seipsa haud valde obscuram, tenebris Ægyptiacis obscuriorem reddant; Editoresque eos qui se omnia rem acu tetigisse putent, supra mortalium labendi statum, nescio quantum, evehere' (*Prolegomena in Biblia Polyglotta Londinensia minora*, p. 69). Neither is sufficiently eminent to be justified in the employment of phraseology from which masters in criticism, like Griesbach, would refrain. Hear the veteran scholar, in his last publication, speaking of Hug—'Dubitationis igitur causas exponere mihi liceat, sed paucis et modeste, nec eo animo, ut cum viro doctissimo quem permagni me facere ingenue profiteor, decerem, sed ut tum alios viros harum rerum peritos, tum in primis ipsum excitem et humanissime invitem ad novum instituendum causæ, quæ in universa re critica Novi Testamenti maximi momenti est, examen, quo ea, si ullo modo fieri id possit, ad liquidum tandem perducatur' (*Meletemata de vetustis textus Novi Testamenti recensionibus*, particula ii. p. 42).

The preceding observations will help to account for the varying schemes of different critics. Some may look for greater exactness and nicety than others. Hence they will make more families of documents. Others, with less acuteness or ingenuity, will rest satisfied with classes more strongly marked by the number of materials they embrace, or the breadth of territory over which they were supposed to circulate. There is no possibility of arriving at precision. The commingling of readings has obliterated many peculiarities in the progress of time; though enough has been left to form the basis of a rough classification.

It is more difficult to classify the ancient versions, such as the Peshito Syriac, because their texts have suffered frequent interpolations and changes.

In the quotations of the fathers we must make allowance for *memoriter* citation, without expecting great care or attachment to the letter. Griesbach, however, denies that Origen quoted from memory; and none has investigated the citations of the Alexandrian father with equal labour. But the state of his commentaries is far from being what we could wish; and the original is often lost or corrupted.

The term *recension* is sometimes applied to the O. T. as well as the N. T. There the materials hitherto collated all belong to one recension—viz., the Masoretic. Some, indeed, have divided them into Masoretic and Ante-Masoretic; but the latter cannot be traced. At present, we are acquainted with only one great family; though it is probable that particular revisions of parts of the O. T. preceded the labours of the Masoretes. Whether the Karaite Hebrew MSS., of which many have been recently brought to St. Petersburg, present a different form of the text from the Masoretic, will be seen after they have been collated. It is certain that their vowel-system is different from the present one. We expect, therefore, that important readings may be furnished by these very ancient codices.

D.

RECHAB (רֶכָב, *rider*; Sept. Ῥηχάβ), son of Hemath the Kenite, and probably a descendant of Jethro [KENITES]: he is only known as the father of Jonadab, the founder of the sect of Rechabites, which took from him its name (2 Kings x. 15; 1 Chron. ii. 55; Jer. xxxv. 6).

RECHABITES. The tribe or family of Kenites, whom Jonadab, the son of Rechab, subjected

to a new rule of life; or rather bound to the continued observance of ancient usages which were essential to their separate existence, but which the progress of their intercourse with towns seemed likely soon to extinguish. By thus maintaining their independent existence as a pastoral people, they would keep themselves from being involved in the distractions and internal wars of the country, would be in no danger of becoming objects of jealousy and suspicion to the Israelites, and would be able at all times to remove from a country in which they were strangers. The Rechabites found so much advantage in these rules, that they observed them with great strictness for about 300 years, when we first become aware of their existence. Jeremiah brings some Rechabites into one of the chambers of the Temple, and sets before them pots full of wine, and cups, saying, 'Drink ye wine;' on which it is well observed by Gataker and others that the prophet omits the usual formula, 'Thus saith the Lord,' which would have constrained obedience in men so pious as the Rechabites, even at the expense of infringing their rule of life. But now they answer, 'We will drink no wine; for Jonadab, the son of Rechab, our father, commanded us, saying, Ye shall drink no wine, neither ye nor your sons for ever. Neither shall ye build house, nor sow seed, nor plant vineyard, nor have any: but all your days ye shall dwell in tents, that ye may live many days in the land where ye be strangers' (Jer. xxxv. 6, 7). They added that to the present time they had observed these injunctions, although they had been constrained to take refuge in Jerusalem when the Chaldaean armies swept the face of the land. The Vulgate, by *translating* all the proper names in 1 Chron. ii. 55, has given currency to an impression that the Rechabites were employed in some of the inferior offices of the temple; and has led to the inference that they were taken as captives to Babylon, from which they returned, and resumed their duties under the second temple, Jabesh in Gilead being the chief place of their residence. There is no shade of authority, beyond this assumption of proper names as appellatives, for a statement every point in which is contrary to the probabilities of the case. The Septuagint, though prone to regard Hebrew proper names as appellatives, does not do so in this text, with the exception of Sopherites, which it renders by 'scribes,' in which it is followed by the A. V. But there is no apparent ground for thus taking one only as an appellative in a list of proper names, unless an intelligible sense could not be otherwise obtained. But the sense is better with this also as a proper name than as an appellative. We may then read, much as in Geddes' version, 'But the Sopherite families who inhabited Jabesh, the Tirathites, the Shimathites, and the Suchathites, were Kenites who came from Hemath Abi-Beth-Rechab.' The translator remarks on the last words, 'I do not translate these words, because I do not understand them. There is probably some corruption of the text. The literal version would be, 'Hemath, father of the house of Rechab.' This Rechab was doubtless the same from whom the Rechabites took their name; and it appears to us that the text is far from meaning to say that the families at Jabesh (whether 'scribes' or not) were Rechabites in the limited sense; their residence at Jabesh being indeed conclusive against that notion: but that these families

were Kenites descended from the Hemath who was *also* the progenitor of that Rechab from whom the Rechabites took their name. We doubt if a clearer explanation of this difficult text can be obtained: and if so, it conveys no other information concerning the Rechabites than that their progenitor was a descendant of Hemath, who was likewise the founder of other Kenite families.

What eventually became of the Rechabites is not known. The probability is that, when they found themselves no longer safe among the Hebrews, they withdrew into the desert from which they at first came, and which was peopled by men of similar habits of life, among whom, in the course of time, they lost their separate existence. The various attempts to identify them with the Assideans, mentioned in the books of Maccabees (1 Maccab. ii. 42; vii. 13; 2 Maccab. xiv. 6), and with the later Jewish sect of Essenes, will not bear examination. We can as little recognise as Rechabites the body of people in Arabia of whom Benjamin of Tudela (*Itinerary*, i. 112-114, ed. Asher), Niebuhr, Wolf (*Journals*, ii. 276, 331-334; iii. 17), and others, have given hearsay accounts. The details, however, whether correct or not, apply to Talmudical Jews more than to Rechabites. They are described as living in caverns and low houses, not in tents—and this in Arabia, where Bedouin habits would cease to be singular; nor are any of the Rechabite rules observable in them except that of refraining from wine—an abstinence which ceases to be remarkable in Arabia, where no one does drink wine, and where, among the strongholds of Islam, it could probably not be obtained without danger and difficulty. There were large numbers of Talmudical Jews in Arabia in the time of Mohammed, and these supposed Rechabites are probably descended from a body of them. It is to be hoped that some competent traveller will penetrate to the spot which they are said to inhabit, and bring back some more satisfactory accounts than we yet possess. (See Witsius, *Dissert. de Rechabitis*, in *Miscell. Sacra*, ii. 176, seq.; Carpzov, *Apparat.*, p. 148; Calmet, *Dissert. sur les Rechabites*, in *Commentaire Littéral*, vi. 18-21.)—J. K.

RECHESH (רֶכֶשׁ), an animal for riding and draught. The A. V. (Esther viii. 10, etc.) renders by 'mules,' but the word rather denotes a swift horse, from רָכַשׁ, to run swiftly. See Bochart, *Hieroz.*, i. p. 100. In Micah i. 13 the A. V. has 'swift beast.'

RECORDER (מְזַכֵּר; Sept. ἀναμνησκων or ὑπομνηματογράφος), the title of a high officer in the court of the kings of Judah (2 Sam. viii. 16; 1 Kings iv. 3; 2 Kings xviii. 18; 1 Chron. xviii. 15; Is. xxxvi. 3). As the idea of memory, memorials, is prevalent in the etymology of the word, 'remembrancer' would perhaps be a more exact translation of it. We have no office with which it can be compared; for the functions of the Master of the Rolls do not sufficiently correspond with the title to warrant the parallel which it might suggest. The Hebrew *mazkir* seems to have been not only the grand custodian of the public records, but to have kept the responsible registry of the current transactions of the government. This was an employment of the very first rank and dignity in the courts of the ancient East.—J. K.

RED HEIFER. [SACRIFICE.]

RED SEA. [SEA.]

RED SEA, PASSAGE OF. [EXODUS.]

REDAK. [KIMCHI.]

REED. [KANEH.]

RE'EM (רֵעֵם) or REYM (רֵיִם). A wild animal

of fierce and untamable character. The word is always rendered *unicorn* in the A. V., our translators in this following the LXX. (μυροκέρας); but this may be at once set aside, on the ground that the unicorn, if not certainly a fabulous animal, is so exceedingly rare and doubtful, as not to answer to the allusions made in Scripture to the Re'em, which was evidently well known to the inhabitants of Palestine and the neighbouring countries—not to mention that in Deut. xxxiii. 17 the re'em is said to have *horns*, not a *horn*. By some the *rhinoceros* is supposed to be the animal intended; but this also is open to the objection that it does not suit the allusions. Bochart contends (*Hieroz.*, ii. 952, ff.) for the *oryx*, a large and fierce kind of antelope; but his conclusion rests mainly on the application to this animal of the Arab. ريم, *rim*, which, though corresponding to

the Hebrew word, is not identical with it, and is by the Arabs widely used, so as to include animals of the bovine as well as the cervine class. From the fact that the re'em is classed in Scripture with bulls or bullocks (comp. Deut. xxxiii. 17; Ps. xxii. 12-21; xxix. 6; Is. xxxiv. 7), and that he is presented as untamable, so as not to be used for agricultural purposes (Job xxxix. 9, 10), it has been concluded that he was of the *bovine* species, and probably the buffalo or the wild ox. From the last-cited passage, it would appear that the re'em stood to the domestic ox in the same relation as the wild ass and the wild goat to the domesticated ass and goat. In Num. xxiii. 22, the re'em appears as the emblem of strength; and emphasis is laid on its horns as the instruments of its power (Deut. xxxiii. 17; Ps. xcii. 10). All this accords with the supposition that it is the buffalo or the wild ox (*ulcephalus bubalus*) that is meant. The latter is common in Arabia.—W. L. A.

REFINER. [METALS.]

REFUGE, CITIES OF. [ASYLUM; CITIES OF REFUGE.]

REGEM-MELECH (רֵגֶם מֶלֶךְ), a person sent with Sherezer by Bethel (*i.e.*, the Jews dwelling in Bethel) to entreat the face of the Lord and make enquiry concerning fasting and humiliation (Zech. vii. 2). The whole passage is obscure; see Henderson, *Minor Prophets*, in loc.

REGGIO, ISAAC SAMUEL, was born August 15, 1784, at Görz, in Illyria. His father, as the Rabbi of the place, gave him a thorough Jewish education, and Reggio, with his brilliant powers, soon became master of the literature of his nation, and acquired an extraordinary knowledge of Hebrew. His talents and fame secured for him the government appointment to the professorship of literature, history, and geography, at the Lyceum, when Illyria became a French province. At the death of his father Reggio succeeded to the Rabbinate of his native place, when he conceived the plan of founding a Rabbinic college. The govern-

ment having sanctioned the plan (1825), the representatives of the Jewish communities throughout Lombardy met at Venice (1826), drew up the constitution, and the *Collegium Rabbinicum* was opened at Padua in 1829. In the midst of all his professional duties Reggio devoted himself to the elucidation of the Scriptures and the advancement of Hebrew literature. The results of his labours in these departments are—(1.) A treatise on the inspiration of the Mosaic law, entitled *מאמר תורה*, being an introduction to the Pentateuch, Vienna 1818; (2.) An Italian translation of the Pentateuch, with a Hebrew commentary and a most elaborate introduction, in which he gives an account of one hundred and forty-eight Hebrew expositions of the Pentateuch, of various ages, Vienna 1821, 5 vols. 8vo; (3.) *Il libro d'Isaia. Versione poetica fatta sull' original texte ebraico*, Vienna 1831; (4.) A historico-critical introduction to the book of Esther, entitled, *מפתח אל מוגלת אסתר*, Vienna 1841. Besides these Reggio wrote numerous treatises on various points connected with the Hebrew Scriptures and literature in the different Jewish periodicals. He died August 29, 1855, at the age of seventy-one. Comp. Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2135-2137; and Fürst, *Bibliotheca Judaica*, iii. 139-142, where a complete list of Reggio's various treatises is given. See also Geiger, *Leo da Modena*, Breslau 1856, pp. 57-63.—C. D. G.

REHOB (רחוב; Sept. *Padβ*), the father of Hadadezer, king of Zobah, in Syria (2 Sam. viii. 3).

REHOB. 1. רחוב, 'a street'; also written *רְחוֹב*; *Ῥοβ*; *Ῥοῦβ*; Alex. *Ῥοῦβ*; *Rohob*), a city on the northern border of Palestine. It is first mentioned in connection with the mission of the spies:—They 'searched the land, from the wilderness of Zin unto *Rehob*, as men come to Hamath' (Num. xiii. 21). Rehob was thus the extreme point of their journey northward. Its situation is described as on the leading route to Hamath. From southern and central Palestine there was just one way to Hamath, leading up the valley between Lebanon and Anti-Lebanon. That valley, however, extends from the base of Hermon to the fountain of the Orontes, a distance of eighty miles; but it seems probable that the spies did not proceed farther than its southern end, and there Rehob may have been situated. From 2 Sam. x. 6, 8, we learn that it was a city of the Syrians; and it is grouped with Zoba and Maacah. The latter province lay at the base of Hermon [MAACAH]. One other incidental notice appears to fix its position definitely at the southern end of the great valley. In describing Laish, or Dan, the sacred writer says, 'it was in the valley that lieth by Beth-Rehob' (Judg. xviii. 28). These statements led Dr. Robinson to suggest that the site of Rehob may be marked by the village and castle of Hunin [BETH-REHOB].

2. (רחב; *Ῥαβ*; Alex. *Ῥοῦβ*; *Rohob*), a town on the northern or north-eastern border of Asher, and apparently not far distant from 'Great Zidon.' It is mentioned only in Josh. xix. 28; and its site is unknown.

3. (*Ῥαῦ*; *Ῥαβ*; *Ῥεῶ*; *Ῥοῦβ*; Alex. *Ῥαῦβ* and *Ῥοῦβ*; *Rohob*), another city of Asher,

situated on the southern border of the tribe (Tosh. xix. 30). It was assigned to the Levites (xxi. 31; 1 Chron. vi. 75); the Israelites, however, were unable to drive out the old Canaanites (Judg. i. 31). Eusebius and Jerome identify the Rehob of Asher with the Syrian city of Rehob, or Beth-Rehob, and locate it at the distance of four miles from the Scythopolis (*Onomast.*, s. v. *Rehob*). In this they are in part followed by Reland (*Pal.*, p. 119) and Winer (*R. W.*, s. v. *Rehob*). But the cities of Asher are manifestly distinct from Beth-Rehob, as the territory of that tribe lay along the shore of the Mediterranean. The site of Rehob is unknown.—J. L. P.

REHOBOAM (רְחִבְעָם, *he enlarges the people*;

Sept. *Ῥοβοῦμ*), only son of Solomon, born of an Ammonitess called Naamah (1 Kings xiv. 21, 31). His reign commenced B.C. 975, when he was at the age of forty-one, and lasted seventeen years. This reign was chiefly remarkable for the political crisis which gave rise to it, and which resulted in the separation of the previously single monarchy into two kingdoms, of which the smaller, which took the name of Judah, adhered to the house of David. All the points involved in this important event, and its immediate results, have been considered in the articles ISRAEL, JEROBOAM, JUDAH, and little remains to be added in this place. It is highly probable, from the considerations adduced in those articles, that the imprudent and imperious answer of the misguided son of Solomon to the public cry for redress of grievances only precipitated a separation which would in any case have occurred, and could not have been long delayed. The envy of Ephraim at the sceptre being in the house of Judah naturally led to this result; and the popular voice was, moreover, represented by a man whose presence was an insult to Rehoboam, and whose interest and safety lay in widening the difference, and in producing the separation. Although this consideration may relieve Rehoboam from the sole responsibility of the separation, it cannot excuse the unwise and foolish answer which threatened a heavier yoke to those who sought to have their existing burdens lightened (1 Kings xii. 1-16). Rehoboam at first thought of nothing less than of bringing back the revolted tribes to their obedience by force of arms; but the disastrous war thus impending was arrested by the interference of a prophet (1 Kings xii. 21-24); and the ample occupation which Jeroboam found in settling his own power left the king of Judah some years in peace, which he employed in fortifying his weakened kingdom. Concerning this, and the invasion of the land in the fifth year of Rehoboam's reign, by Shishak, king of Egypt, see JUDAH, KINGDOM OF. Jeroboam, king of Israel, being in alliance with Egypt, not only escaped this storm, but may possibly have instigated the invasion as the most effectual means of weakening his adversary. The treasures which David and Solomon had laid up in, or lavished on, the temple of God and the royal palaces, offered an adequate temptation to the Egyptian king, and they became his prey. The brass with which Rehoboam replaced the plundered gold of Solomon furnished no inapt emblem of the difference between his own power and that of his glorious predecessors (1 Kings xiv. 27). Idolatry, and the worshipping in high places, which had grown up in the last days of Solomon,

gained strength in the early years of his son's reign, and were not discouraged by the example or measures of the king (1 Kings xiv. 22-24); and it is probably for the sake of indicating the influence of early education in producing this culpable indifference that it is so pointedly recorded in connection with these circumstances that his mother was Naamah an Ammonitess (2 Chron. xii. 13). The invasion of the land by Shishak seems to have been intended as a punishment for these offences, and to have operated for their correction; which may account for the peace in which the subsequent years of this king's reign appear to have been passed.

REHOBOTH (רְחֹבֹת, also רְחֹבָת). This name occurs in three passages in Scripture. It is derived from the root רָחַב, 'to be wide,' or 'spacious'; and may thus signify 'open, roomy places,' as plains (it is a plural form) or 'streets.' It is applied by the sacred writers to three distinct places.

1. *Rehoboth the City, or Rehoboth-Ir* (רְחֹבֹת עִיר); *ῥῥωβῶν πῶλις*; Alex. *ῥωβῶν*; *placas civitatis*). The passage in which this word occurs may be rendered in two ways: 'Out of the land came he (that is Nimrod) forth to Asshur, and builded Nineveh, and *Rehoboth-Ir*,' etc.; or, 'Out of that land came forth Asshur, and builded Nineveh, and the city Rehoboth,' etc. The former rendering is more in accordance with the general scope of the context; but the latter is grammatical, and is supported by the Septuagint and Vulgate. However this may be, Rehoboth was one of the four cities then founded. It has been supposed by recent commentators that these four constituted *one great city*. They argue that the first name, *Nineveh*, is the chief, and that the other three are subordinate. 'He built Nineveh, with (taking *ἡ*, not as a copulative, but as the sign of subordination) *Rehoboth-ir*, Calah, and Resen between Nineveh and Calah.' From this it would follow that the four places formed a large composite city, or range of towns, to which the general name 'Nineveh' was given (see Keil and Delitzsch, *ad loc.*) This appears to put too great a strain upon the passage; and it is better, because more natural, to take them as distinct places. They were most probably not far distant from each other; and as Nineveh and Calah stood on the Tigris, the others may be looked for there also. [CALAH.] This prevents us from identifying Rehoboth-ir with Rehoboth of the river, which must have stood on the Euphrates (see below, No. 2). The name Rehoboth has not been discovered upon the Tigris's plain; and no ruins or mounds have yet been found that would seem to mark its site (Michaelis, *Spicileg.*, p. 240).

2. *Rehoboth by the river*, or more accurately, *Rehoboth of the river* (רְחֹבֹת הַנָּהָר); *ῥῥωβῶν τῆς παραποταμοῦ*; in 1 Chron. *ῥῥωβῶν*; but Alex. *ῥωβῶν*; *de fluvio Rehoboth*; but in Chron. *Rohoboth, quæ juxta amnem sita est*). In enumerating the kings who reigned in Edom before the time of the Israelitish monarchy, the following occurs: 'And Samlah died, and Saul of Rehoboth by the river reigned in his stead' (Gen. xxxvi. 37; 1 Chron. i. 48). The kings of Edom were not all natives of that country. *The river* is doubtless the

Euphrates (cf. Gen. xxxi. 21; xv. 18; Deut. i. 7; Exod. xxiii. 31). The Targum of Onkelos adds, 'Rehoboth, *which is on the Phrat*.' Though some have attempted to identify the city with that founded by Nimrod, there are no good grounds for it; and as the Euphrates was far distant from the site of Nineveh, there is a strong probability against it (Bochart, *Opp.*, i. 225; Winer, *R. W.*, s.v. *Rechoboth*).

Rehoboth has been identified with a ruin called *Rahabah* (رَحْبَة), situated on the bank of the

Euphrates, a short distance below the mouth of the Khabûr. Chesney says: 'On the right bank of the Euphrates, at the north-western extremity of the plain of Shinar, and three and a half miles south-west of the town of Mayadin, are extensive ruins around a castle still bearing the name of Rehoboth' (i. p. 119; ii. p. 222). Rahabah is mentioned by Abulfeda. In his day there was a small village on the site. Schultens in his note (*Index Geogr. in vii. Salad.*, s.v. *Rahaba*) identifies it with Rehoboth of Gen. xxxvi. 37; and this is the view of Bochart (*l.c.*), Winer, Gesenius (*The-saurus*, p. 1281), and others. It is probably correct, though the same name is given to another place at some distance, and nearer the river.

3. *Rehoboth* (*εὐρυχωρία, latitudo*), the name given by Isaac to a well which he digged in the valley of Gerar. He had digged several wells before, but was obliged to abandon them in consequence of the quarrels of the Philistines. When this one was completed, they did not strive for it; 'and he called the name of it *Rehoboth*;' and he said, For now the Lord *hath made room* (רְחִיבָה) for us' (Gen. xxvi.

22). The name was intended to indicate the fact that the patriarch had at length got *space* to rest in. Most of the ancient versions translate the word, though it must evidently be regarded as a proper name. It is a remarkable fact that the name clings to the spot still. In the wilderness of *et-Tih* ('The Wandering'), about twenty-three miles south-west of Beersheba, is a wady called *er-Ruhaibeh* (رُحَيْبَة), radically identical with the Hebrew

(רְחִיבָה), in which and on the adjoining heights are remains of antiquity thus described by Robinson:

—'In the valley itself is the ruin of a small rough building with a dome, built in the manner of a mosque. On the right of the path is a confused heap of hewn stones, the remains of a square building of some size, perhaps a tower. On the acclivity of the eastern hill we found *traces of wells*; a deep cistern, or rather cavern, and a fine circular threshing-floor, evidently antique. But on ascending the hill on the left of the valley we were astonished to find ourselves amid the ruins of an ancient city. Here is a level track of ten or twelve acres in extent entirely and thickly covered over with confused heaps of stones, with just enough of their former order remaining to show the foundations and form of the houses, and the course of some of the streets. The houses were mostly small, all solidly built of bluish limestone, squared and often hewn on the exterior surface. Many of the dwellings had each its cistern, cut in the solid rock; and these still remained quite entire. . . . Once, as we judged upon the spot, this must have been a city of not less than twelve or fifteen thousand inhabitants' (*Bib. Res.*,

i. 196). Dr. Robinson thinks Ruhaibeh too far south for the Rehoboth of Isaac, and Mr. Grove appears to agree with him. It is said, however, in Genesis that after leaving Rehoboth Isaac *went up* to Beersheba (ver. 23). Now the phrase 'going up' usually indicates progress towards Palestine. There can be little doubt that it does so here; and consequently we would look for Rehoboth in this very direction. It seems in the highest degree probable that this is the place where the patriarch had his station; and that after his time the wells of water attracted round them some border tribe, and thus became the nucleus of a city' (Williams, *Holy City*, i. 465; Van de Velde, *Memoir*, 343; Bonar, *Sinai*, 316).—J. L. P.

REINECCIUS, CHRISTIAN, rector of the academy at Weissenfels, was born 22d January 1668, and died 18th October 1752. He is known as the editor of an edition of the Hebrew Bible (Lips. 1725), frequently reprinted, and which was anew edited with various readings from Kennicott and De Rossi by Meisner and Döderlein (Lips. 1793). Reineccius also issued an edition of the LXX. (Lips. 1730, 1756).

REINS (רֵינִים), properly the *kidneys*, from Lat. *renes*. From the sensitiveness to pain of this part of the body it was regarded by the Hebrews as the seat of sensation and feeling, as also of desire and longing (Ps. lxxiii. 21; Job xvi. 13; xix. 27). It is sometimes used of the inner nature generally (Ps. xvi. 7; Jer. xx. 12), and specially of the judgment or directive reason (Jer. xi. 20; xii. 2). When the word is thus metaphorically used our translators render it by *reins*; when used literally they render it by *kidneys*; except in Is. xi. 5, where it is used to designate the lower part of the back, Lev. xv. 2, where 'flesh' is used, and Lev. xxii. 4, where they have substituted 'issue,' with 'reins' in the margin in both passages.—W. L. A.

REKEM (רֶקֶם, 'variegated,' perhaps = رֶקֶם, 'a flower-garden,' Alex. 'Ρεκέμ; *Recem*), a town of Benjamin. From its position in the group it would seem to have been situated towards the western part of the tribe. It is only mentioned in Josh. xviii. 27, and Eusebius evidently knew nothing of it. Its site is unknown.—J. L. P.

RELAND, HADRIAN, was born in the village of Ryp, in Holland, 17th July 1676. In 1699 he became professor of philosophy at Harderwyk, and in 1718 professor of Oriental languages and Christian antiquities at Utrecht, where he died 5th February 1718. His works are numerous, and all valuable for their erudition, perspicacity, and solidity. The principal are *Dissertationes Miscellanæ*, 3 vols. 1706-8; *Decas Exercitationum philol. de vera pronuntiatione nominis Jehovah* [by different authors, with a preface and analysis by Reland], Traj. 1707; *De nummis vet. Heb. qui Samaritani appellantur*, Utr. 1709; *Analecta Rabbinnica*, sm. 8vo, Traj. 1713, a collection of tracts by different authors on the rabbinical writings and their authors; *Antiquitates sacræ vet. Heb.*, Lips. 1713 (sec. ed. enlarged by Vogel, Halle 1769, also in Ugolin. *Thes.* 2, 'amplissimis comment. philol. illustratæ'); *Palestina ex Monumentis veteribus illustrata*, 2 vols. 4to, Traj. 1714, still the standard work on the geography of Pales-

tine; *De Spoliis templi Hierosol. in arcu Titiano Conspicuis*, Utr. 1616 (new edition by Schulze, Utr. 1775; reprinted by Ugolinus, *Thes.* 9); *De Religione Mohammedica*, Traj. 1717.—W. L. A.

REMETH (רֵמֶת = רֵמָה; 'Ρεμμᾶς; Alex. 'Ραμῶς; *Rameth*), one of the cities of Issachar, grouped with En-gannim (Josh. xix. 21). The border of Issachar appears to have run along the southern side of the plain of Esdraelon, and as En-gannim lies in the plain at the base of the hills, Remeth must have been situated to the north of it. No such name now exists in that locality. The word Rameth signifies 'a height'; and, as has been stated [RAMAH], was given to such towns as were situated on lofty and conspicuous positions. On one of the rocky summits of Mount Gilboa, about five miles north of En-gannim (*Jentn*), stands a little village called *Wexlar*, which is seen from the whole surrounding country. It was a fortress in former days, and may perhaps mark the site of the Rameth of Issachar (*Handbook*, p. 353; Robinson, *B. R.*, iii. 339; Ritter, *Pal. und Syr.*, ii. 422).

The Arabic رَمَّ signifies 'a height,' and is thus identical in meaning with the Hebrew רֵמֶת (*Kamus Dj.* s. v.)—J. L. P.

REMMON (רֵמּוֹן; 'Ερεμμών; Alex. 'Ρεμμών; *Remmon*), a town of Simeon, mentioned only with this orthography in the A. V. of Josh. xix. 7; it is the same which is elsewhere and properly written *Rimmon*.

REMMON-METHOAR (רֵמּוֹן הַמֶּתָאָר; 'Ρεμμωνὰ Μαθαραοῦ; Alex. 'Ρεμμώνη Μαθαρῆ; *Remmon Anthar*; Josh. xix. 13). Various renderings and interpretations have been given of these words. The Septuagint translators regarded them as forming a compound proper name. Jerome made them two distinct names. Symmachus rendered the *הַמֶּתָאָר* a descriptive epithet attached to Rimmon—'Rimmon the Renowned' (Rosenmüller, *ad loc.*) It seems most probable that the *הַמֶּתָאָר* is the participle *תָּאָר*, and is to be connected with the word which follows. Hence *הַמֶּתָאָר הַנֶּעָה* would signify, according to Rosenmüller, '*qui* (terminus) *describitur*, i. e., porrigitur *Neam*;' according to Gesenius, 'which pertains to Neah;' according to Jarchi, 'it turned to Neah.' The marginal rendering of our A. V. appears to convey the same general idea: 'And goeth out to Remmon which is drawn to Neah.' The object of the sacred writer is to describe as minutely as possible the exact course of the border line.

The proper orthography of the name is *Rimmon*, and it is supposed to be identical with the Rimmon of 1 Chron. vi. 77 (62), which was allotted out of Zebulun to the Levites [RIMMON]. From the connection in which the name is placed, the city would seem to have stood somewhere near the north-east border of the tribe. It is not mentioned by any of the ancient geographers. About six miles north of Nazareth, on the edge of the upland plain of Buttauf, is a little village called *Rummâneh*, noticed by Pococke (ii. 62), Robinson (*B. R.*, iii. 110), Thomson (*Land and the Book*, 426), and others. This is in all probability the Remmon or Rimmon of Zebulun.—J. L. P.

REMPHAN, or REPHAN ('Ρεμφάν, 'Ρεφάν), a name quoted in Acts vii. 43, from Amos v. 26, where the Septuagint has 'Ραιφάν, for the Hebrew רַיִן, *Chium*. It is clear that, although thus changing the letter כ into ר, the Sept. held the original to be a proper name, in which interpretation our own and most other versions have concurred. But this is by no means clear; for, according to the received pointing, it would better read, 'Ye bore the tabernacle of your king (idol), and the statue (or statues) of your idols, the star of your god, which ye make to yourselves;' and so the Vulgate, which has 'Imaginem idolorum vestrorum.' According to this reading, the name of the idol so worshipped by the Israelites is in fact not given, although the mention of a star still suggests that some planet is intended. Jerome supposes it may be Lucifer or Venus. But the

Syriac renders the Hebrew by ܠܬܡܚܢ ܕܫܬܪܐ, 'Saturn your idol,' who was worshipped by the Semitic nations along with Mars as an evil demon to be propitiated with sacrifices. This now seems to be the general conclusion, and Winer, indeed, treats the subject under the head Saturn. It has been alleged, but not satisfactorily proved, that Remphan and Rephan were Egyptian names of the planet Saturn. They, indeed, occur as such in the Coptic-Arabic Lexicon of Kircher (*Ling. Aegypt. Restit.*, p. 49; *Cedip. Aegypti*, i. 386); but Jablonsky has long since shown that this and other names of planets in these lexicons are of Greek origin, and drawn from the Coptic versions of Amos and the Acts (Jablonsky, *Remphan Aegyptior.*, in *Opusc.*, ii. 1, seq.; Schroeder, *De Tabernac. Molochi et Stella Dei Remph.*, 1745; Maius, *Dissert. de Kium et Remphan*, 1763; Harrenberg, *De Idolis Chium et Remphan*, 1723; Wolf, *Dissert. de Chium et Remph.*, 1741; Gesenius, *Thesaurus*, pp. 669, 670).

RENANIM (רִנִּים, from רָנַן, to utter a shrill cry), a poetical name for the female ostrich, so called from its peculiar cry (Job xxxix. 16). See Bochart, *Hieroz.*, ii. p. 240, ff.

REPHAIM (רִפְאִים; Sept. ῥιγάντες), an ancient people of unusual stature, who, in the time of Abraham, dwelt in the country beyond the Jordan, in and about Ashtoreth-Karnaim (Gen. xiv. 5). [See next article.]

REPHAIM, VALLEY OF, also VALLEY OF THE GIANTS (עֵמֶק־רִפְאִים; τὴν κοιλάδα τῶν Τιτάνων; κοιλάδι 'Ραφαῖν, and τῶν γιγάντων; also γῆς 'Ραφαῖν, and Ἑμεκ 'P. in Josh.; also in Is. xvii. 5, ἐν φάραγγι στερεᾷ; *vallis Raphaim*, and *gigantum*). The origin and meaning of the word Rephaim have not been satisfactorily determined. It is a fact that most of, if not all, the proper names in primeval times were descriptive. If Rephaim be so understood then it may be derived from an

obsolete root equivalent to the Arabic رَفَعَ, 'to be high;' and רִפְאִים will signify, as commonly rendered, 'giants' (see Kalisch on Gen. xiv. 5; Gesen., *Thes.*, p. 1302). Ewald gives another etymology. He takes the root רָפַח as equivalent to רָפַח, which he renders 'stretched' (*gestreckt*), and then he thinks it may also signify 'great,' and

'giants,' like the German *Recke* (*Geschichte*, i. p. 327, 2d ed.) Others suppose the name to be a patronymic, derived from a common ancestor *Rapha*, as may perhaps be indicated by 2 Sam. xxi. 16, and 1 Chron. xx. 4.

The Rephaim were an aboriginal nation which dwelt in Palestine in primeval ages, and left their traces in the names, history, and traditions of various sections of the country both east and west of the Jordan. Their gigantic stature and military prowess made them formidable and celebrated even at a time when the race was almost extinct [GIANTS]. They had settlements in Bashan at a very remote period; and that country was called 'the land of the Rephaim' (A. V. 'giants') at and even after the conquest (Gen. xiv. 5; Deut. iii. 11-13; Josh. xiii. 12). The country occupied by the Ammonites also was called the 'land of the Rephaim' (Deut. ii. 11, 20); and a section of Western Palestine adjoining the mountains of Ephraim (probably the plain of Esdraelon) received the same name (Josh. xvii. 15). But the name *Rephaim* clung much longer to a 'valley' or 'plain' (עֵמֶק) situated between Jerusalem and Bethlehem.

The valley of Rephaim was a noted place, and was the scene of a few stirring incidents in Jewish history. It is first mentioned in the description given by Joshua of the northern border of Judah. The passage is important:—'The border went up by the valley of the son of Hinnom unto the south side of the Jebusite: the same is Jerusalem; and the border went up to the top of the mountain that lieth before the valley of Hinnom westward, which is at the end of the valley of the giants northward' (xv. 8). The last clause in the Hebrew is not quite clear (בְּקֶצֶת עֵמֶק־רִפְאִים צְפוֹנָה). It may mean that the boundary-line was north of the valley, or that the valley was north of the boundary. The latter construction is possible; but the former is unquestionably the more natural, and is supported by the Septuagint and the Vulgate, and also by most commentators. If this interpretation be admitted, the situation of the valley is certain: it lay on the south of the hill which enclosed Hinnom on the west. This view is farther strengthened by the notice in Josh. xviii. 16.

When David was hiding from Saul in the cave of Adullam, we are told that the Philistines, no doubt taking advantage of intestine troubles, invaded the mountain fastnesses of Israel. A band of them pitched in the valley of Rephaim, and at the same time seized and garrisoned Bethlehem, David's native-place (2 Sam. xxiii. 13, 14). It was then that three of his warriors, to gratify a wish of their chief, broke through the enemies' lines and drew water from the well by the gate of Bethlehem. The narrative shows clearly that the valley of Rephaim could not have been far distant from Bethlehem (1 Chron. xi. 15-19). On two other occasions, soon after David was proclaimed king, the Philistines invaded the mountains and drew up their armies on the same plain; they were at once attacked by David's veterans and routed with great slaughter (2 Sam. v. 18, 22; 1 Chron. xiv. 9-13). But from neither of these notices do we learn anything of the position of the valley; and there is only one other mention of it in the Bible (Is. xvii. 5). Josephus in one place (*Antiq.* vii. 4. 1) says that the valley of the giants was near Jerusalem; and in another place (vii. 12. 4), when narrating the story

of the drawing of water from the well at Bethlehem, in which he makes a strange blunder, he says the valley extended from Jerusalem 'to the city of Bethlehem.' Eusebius and Jerome, on the other hand, place it on the north of Jerusalem (*Onomast.*, s. v. *Raphaim*), and in the territory of Benjamin (*Id.*, s. v. *Emec Raphaim*). Their notices, however, are brief and unsatisfactory (see *Onomast.*, s. v. *Coelas Titanorum*, and the excellent note by Bonfrerius).

On the west side of the valley of Hinnom rises a bare rocky ridge, beyond which commences an upland plain, considerably lower than the ridge, but almost on a level with the city. It extends southward towards Bethlehem more than a mile. Declining gradually on the south-west, it contracts at length into a narrow and deep valley called Wady el-Werd. The plain is flat and fertile, but is shut in on all sides by rocky hill-tops and ridges. This appears to be the valley of Rephaim; and its position certainly agrees well with all the notices in the Bible and in Josephus (Robinson, *Bib. Res.*, i. 219; *Handbk.*, p. 75; Bonar, *Land of Promise*, p. 121). It has been objected that this is a plain, and not a valley; and it is said the Hebrew word עמק signifies a low-lying enclosed valley (Grove in Smith's *Dict. of Bible*, iii. 1030). It is true that *Emek* could not be applied to an open plain; it means a plain or valley shut in, and lower than the ground around it. But these are just the features of this little plain. The writer has viewed it from all sides, and he was struck with the correctness of the term. Dr. Bonar has well said:—'When passing through it, and looking at its wide extent, with its scarcely perceptible south-west slope, you naturally call it a plain, as we found ourselves generally doing; but marking the low hills which hem it in on all sides, you see that it is really a valley, and understand the accuracy of the Scripture name, which is always valley, not plain; an *emek*, a wide depression between hills, such as 'the vale of Hebron' and the 'valley of Ajalon' (*Land of Promise*, p. 177). The attempt of Tobler and others to transfer the valley of Rephaim to the north or north-west side of Jerusalem appears to be at variance with the words of the sacred writer as shown above (see, however, Tobler, *Dritte Wanderung*, p. 202; Fürst, *Handwb.*, ii. 383).—J. L. P.

REPHIDIM (רִפְדִּים; also רִפְדִּים, 'supports'; Ῥαφιδῆν; Ῥαφιδῖν; *Raphidim*), one of the principal stations of the Israelites in the wilderness. Though its position is not described in Scripture, yet if the identity of Sinai with the modern Jebel Mûsa is established, no great difficulty can be felt in ascertaining approximately the site of Rephidim [SINAI; WANDERING]. The order of march to the encampment at Sinai was as follows:—On the 15th of the second month they encamped in the desert of Sin (Exod. xvi. 1). From Sin, according to the narrative in Exodus (xvii. 1), they marched to Rephidim. But on turning to the more detailed list of the stations given in Num. xxxiii. 12-15, we find that between Sin and Rephidim there were two stations, Dophkah and Alush, and consequently three marches. It appears, however, from both narratives, that from Rephidim to Sinai there was only one march (cf. Exod. xix. 2; Num. xxxiii. 15). An incidental remark in Exod. xvii. shows that Rephidim could not have been far distant from

Mount Horeb. While encamped at Rephidim, 'there was no water for the people to drink,' and they murmured against Moses. He was therefore commanded to 'go on before the people,' and with his rod to smite 'the rock in Horeb.' He did so. Water sprang from the smitten rock; and in consequence of this incident Rephidim was called *Massah* ('temptation') and *Meribah* ('chiding'). As the Israelites, though encamped in Rephidim, were able to draw their needful supply of water from 'the rock in Horeb,' the two places must have been adjacent. Assuming Jebel Mûsa to be Sinai (or Horeb), and that the Israelites approached it by Wady esh-Sheikh, which is the only practicable route for such a multitude coming from Egypt, it follows that Rephidim was in Wady esh-Sheikh, and not more than one march—and apparently a very short one—distant from the mountain. Perhaps the solitary sanctuary of Sheikh Saleh, one of the most sacred spots in the whole peninsula, and which gives its name to the great valley, may mark the position of Rephidim. The valley is here of considerable width, and it opens out still more towards Sinai, affording space for the conflict of armies (*Handbook for S. and P.*, p. 37; Robinson, *B. R.*, i. 146; Stanley, *S. and P.*, p. 78).

The position of Rephidim has created much discussion among travellers and sacred geographers. Josephus appears to locate it very near to Sinai, and states that the place was entirely destitute of water, while in their preceding marches the people had met with fountains (*Antiq.* iii. 1. 7; and 5. 1). Eusebius and Jerome say it was near Mount Horeb (*Onomast.*, s. v. *Raphidim*). Cosmas places it at the distance of six miles, which agrees pretty nearly with Sheikh Saleh (*Topographia Christiana*, v. 207, seq.). Robinson removes it some miles farther down Wady esh-Sheikh to a narrow gorge, which forms a kind of door to the central group of mountains. He gets over the difficulty in regard to the proximity of Horeb by affirming that that name was given, not to a single mountain, but to the whole group (*B. R.*, i. 120). Mr. Sandie places Rephidim at the extreme end of Wady er-Râhah, and identifies it with a *Wady Rudkwan*. He supposes that the Israelites marched from the coast-plain of el-Kâa by Wady Daghadah (*Horeb and Jerusalem*, p. 159). This route, however, would scarcely be practicable for such a multitude. Lepsius (ed. Bohn, pp. 310, seq.), Stewart (*Tent and Khan*), Ritter (*Pal. und Syr.*, i. pp. 738, seq.), Stanley (*S. and P.*, 40, seq.), and others, locate Rephidim in Wady Feirân, near the base of Mount Serbâl. The great distance from Sinai—twelve hours' march; and the abundance of water at Feirân, appear to be fatal to this theory. No spot in the whole peninsula has such a supply of water; and Feirân is on this account called 'the paradise of the Bedawin.'

Rephidim was one of the most noted stations in the wilderness journey. There the Israelites were supplied with water by a miracle. There, too, they were enabled to triumph over the Amalekites by a miracle. Moses, Aaron, and Hur sat upon a hill-top hard by, overlooking the battlefield. And it came to pass, when Moses held up his hand, that Israel prevailed. . . . And Aaron and Hur stayed up his hands . . . until the going down of the sun' (Exod. xvii. 8-12). There, too, Jethro came to Moses, and by his wise counsel helped

him to marshal the whole host of Israel (xviii.). The time spent at Rephidim is not stated; but it could not have been more than a week, seeing they encamped in the desert of Sin on the 15th of the second month, thence it was three days' march to Rephidim and one to Sinai, which they reached on the 1st of the third month (xvi. 1; xix. 1).—J. L. P.

RESEN (רֶסֶן; Sept. Δασή), an ancient town of Assyria, described as a great city lying between Nineveh and Calah (Gen. x. 12). Biblical geographers have been disposed to follow Bochart (*Phaleg*. iv. 23) in finding a trace of the Hebrew name of Larissa, which is mentioned by Xenophon (*Anab.* iii. 4. 7) as a desolate city on the Tigris, several miles north of the Lycus. The resemblance of the names is too faint to support the inference of identity; but the situation is not irreconcilable with the Scriptural intimation. Ephrem Syrus (*Comment.*, in loc.) says that ܠܝܣܫܐ Rassa, which he substitutes for Resen (the Peshito has ܠܝܣܫܐ Ressin), was the same as ܠܝܣܫܐ Rish-Ain (*fountain-head*); by which Assemani understands him to mean, not the place in Mesopotamia so called, but another Rish-Ain in Assyria, near Saphsaphre, in the province of Marga, which he finds noticed in a Syrian monastic history of the middle age (Assemani, *Biblioth. Orient.*, iii. 2, p. 709). It is, however, still uncertain if Rassa is the same with Rish-Ain; and whether it is so or not, a name so exceedingly common (corresponding to the Arabic Ras-el-Ain) affords a precarious basis for the identification of a site so ancient.—J. K.

#### RESURRECTION OF CHRIST. [JESUS CHRIST.]

REUBEN (רֹבֵן, *behold a son*; Sept. Ρουβήν), eldest son of Jacob by Leah (Gen. xxix. 32; xxxv. 23; xlv. 8). His improper intercourse with Bilhah, his father's concubine wife, was an enormity too great for Jacob ever to forget, and he spoke of it with abhorrence even on his dying bed (Gen. xxxv. 22; xlix. 4). Yet the part taken by him in the case of Joseph, whom he intended to rescue from the hands of his brothers and restore to his father, and whose supposed death he so sincerely lamented, exhibits his character in an amiable point of view (Gen. xxxvii. 21, 22, 29, 30). We are, however, to remember that he, as the eldest son, was more responsible for the safety of Joseph than were the others; and it would seem that he eventually acquiesced in the deception practised upon his father. Subsequently, Reuben offered to make the lives of his own sons responsible for that of Benjamin, when it was necessary to prevail on Jacob to let him go down to Egypt (Gen. xlii. 37, 38). The fine conduct of Judah in afterwards undertaking the same responsibility, is in advantageous contrast with this coarse, although well-meant, proposal. For his conduct in the matter of Bilhah, Jacob, in his last blessing, deprived him of the pre-eminence and double portion which belonged to his birth-right, assigning the former to Judah, and the latter to Joseph (Gen. xlix. 3, 4; comp. ver. 8-10; xlviii. 5). The doom, 'Thou shalt not excel,' was exactly fulfilled in the destinies of the tribe descended from Reuben,

which makes no figure in the Hebrew history, and never produced any eminent person. At the time of the Exodus, this tribe numbered 46,500 adult males, which ranked it as the seventh in population; but at the later census before entering Canaan, its numbers had decreased to 43,739, which rendered it the ninth in population (Num. i. 21; xxvi. 5).—J. K.

REUBEN, TRIBE AND POSSESSIONS OF. It is a remarkable fact that the tribe of Reuben, Jacob's first-born, was in almost every respect the least distinguished of the twelve. The unnatural crime of the head left a stain upon the whole race, and destroyed at once both the prestige of birth and the spirit of leadership (Gen. xlix. 4; 1 Chron. v. 1).

In the order of march through the wilderness, the station of the tribe was a subordinate one. Judah had the post of honour, and led the van. The chief of the Reubenites commanded the three tribes on the south, or right wing of the host (Num. ii. 10). The only incident recorded of the tribe during the forty years' wandering is one which brought upon them new dishonour. Three of the four leaders in the wicked rebellion against Moses were 'sons of Reuben' (xvi. 1), and suffered the terrible punishment which God inflicted (ver. 32; Deut. xi. 6). The plague which followed may have chiefly affected the Reubenites, and caused that marked diminution in their numbers which is observable in the second census (cf. Num. i. 21; xxvi. 7).

It is not stated in Scripture how the Israelites were employed during the long period of their residence in Egypt. Some of them were doubtless dispersed in little groups and colonies throughout the great cities; a few were engaged, at least for a time, as royal shepherds (Gen. xlvii. 6); but the vast body was concentrated in the pastoral territory of Goshen, where they probably united the cultivation of the soil to their old occupation (xvi. 34; xlvii. 1-6). It seems likely that some of the tribes, having taken up a position on the confines of the desert, continued their wandering mode of life, and pastured their flocks and herds over a wide region, running up to the borders of Philistia on the one side, and away to the mountains of Sinai on the other. Among these may have been the tribe of Reuben. During the forty years' wandering, all their pastoral habits would naturally not only be retained but strengthened. And thus, on reaching the confines of Palestine, and on seeing the broad grassy plains of Moab, and the rich pastures of Gilead and Bashan, they resolved, with their pastoral brethren of Gad and Manasseh, to settle there:—'Now the children of Reuben, and the children of Gad, had a very great multitude of cattle; and when they saw the land of Jazer, and the land of Gilead, that, behold, the place was a place for cattle . . . they came and spake unto Moses . . . saying . . . If we have found grace in thy sight, let this land be given unto thy servants for a possession' (Num. xxxii. 1-5). Their prayer was granted; and that act determined to a large extent the manner of their after life, and the events of their history. A wide territory was bestowed upon the Reubenites. Its pastures are to this day reckoned among the finest in Palestine. On its eastern border lay the broad plain of Arabia, then as now thinly peopled, and affording to bold and hardy shepherds a boundless extent of country,

and an inexhaustible supply of grass for their flocks. Upon their borders hovered restless and warlike hordes, whose sudden raids made cultivation difficult and harvests insecure. The Reubenites were thus compelled to devote themselves chiefly to pastoral pursuits, and at the same time to keep up a number of fortified cities for refuge in cases of sudden invasion, and for the defence of their territory (Num. xxxii. 16, 37-39). Their position brought them into contact with the wandering Ishmaelites; and the only war in which we find them acting energetically and successfully was one against these desert tribes. Here they were opposed to men like themselves. They were doubtless driven to war by repeated acts of aggression, and they felt that they must conquer or give up their possessions altogether. By the aid of their brethren of Gad and Manasseh they did conquer, and gained immense booty. Their weapons were those of nomads—the sword, buckler, and bow; and their booty was such as nomads prize—cattle, camels, sheep, and asses (1 Chron. v. 18-22).

While the geographical position of the Reubenites brought them into close contact with the desert tribes, it separated them in a great measure from their brethren, and gradually alienated them in heart and form from the national religion. The deep valley, and the rapid river Jordan, formed an almost impassable barrier between Eastern and Western Palestine. The Reubenites and their brethren felt this. When returning home after the conquest of Western Palestine, they feared that the ten tribes might at some future time ignore the tie of brotherhood, and cast them off. Hence they raised up, at the ford of the river, a vast, altar-shaped mound, to serve in all generations as a witness of common origin and of common rights (Josh. xxii. 10-34). In the wars of the western tribes the Reubenites do not appear to have taken any part. Their own country was too open to be left exposed by the withdrawal of their warriors; and their flocks required to be constantly guarded against the raids of the Ishmaelites. We can thus understand the reason of the reproachful stanza in the war-song of Deborah:—‘For the divisions of Reuben there were thoughts of heart. Why abodest thou among the sheepfolds, to hear the bleatings of the flocks?’ (Judg. v. 15, 16). But even the distant and almost isolated tribe of Reuben came under the control of King David. Probably his relationship to the Moabites may have brought him into closer connection with that tribe. Be this as it may, ‘an hundred and twenty thousand men of war’ from Reuben, Gad, and Manasseh, marched with their brethren to Hebron, to place David upon the throne (1 Chron. xii. 37, 38); and among the number of his ‘mighty men’ was ‘Adina the Reubenite, a captain of the Reubenites, and thirty with him’ (xi. 42). Of the subsequent history of the tribe only two facts are related—their territory was overrun by the Syrians, under Hazael, about B.C. 884 (2 Kings x. 32, 33), and the whole people were taken captive by Tiglath-pileser, and carried off to Halah, Habar, and Hara, in Assyria, about a century later (1 Chron. v. 6, 26; 2 Kings xv. 29).

The country allotted to the Reubenites extended on the south to the river Arnon, which divided it from the Moabites (Josh. xiii. 8, 16). On the east it touched the desert of Arabia. On the west were the Dead Sea and the Jordan.

VOL. III.

border was probably marked by a line running eastward from the Jordan through Wady Hesbân (ver. 17-21; Num. xxxii. 37, 38). This country had originally been conquered and occupied by the Moabites; but they were driven out a short time before the Exodus by Sihon king of the Amorites, who was in his turn expelled by the Israelites (Deut. ii.; Num. xxi. 22-31). Immediately after the captivity the Moabites again returned to their old country, and occupied their old cities. This is the reason why, in the later prophets, many of the cities of Reuben are embraced in the curses pronounced upon Moab (Jer. xlviii.) The territory was divided naturally into two sections; the western declivities towards the Dead Sea and the Jordan valley, which were steep, rugged, and bare, with the little section of the lower plain of Jordan (called in Scripture ‘the plains of Moab,’ Num. xxii. 1) at their base; and the high table-land stretching from the summit of the ridge away towards Arabia. The latter, from its even surface, as contrasted with the rocky soil of Western Palestine, received from the accurate sacred writers the appropriate name Mishor (MISHOR; see also MOABITES). The whole region is now deserted. There is not a single settled inhabitant within its borders. Its great cities, mostly bearing their ancient names, are heaps of ruins. The wild wandering tribes of the desert visit it periodically to feed their flocks and herds on its rich pastures, and to drink the waters of its fountains and cisterns (see article PALESTINE; Burckhardt, *Travels in Syria*, pp. 365, seq.; Irby and Mangles, *Travels*, pp. 460, seq.; *Handbook*, pp. 298, seq.)—J. L. P.

REUCHLIN, JOHANN VON, who adopted the Grecised name of CAPNIO, was born at Pforzheim in 1454. After serving in different political functions he became, in 1520, professor of Greek and Hebrew at Ingoldstadt, whence he removed to Tübingen, thence to Stuttgart, where he died 28th Dec. 1521. Besides his memorable services in connection with classical literature and general culture he may be regarded as the principal promoter of the study of Hebrew in his day. He published a Hebrew grammar and lexicon under the title *Ad Dionysium fratrem suum de rudimentis hebraicis, libri iii.*, s. l. 1506, 4to, of which an improved edition by Seb. Münster appeared in 1537, Bas. fol. Reuchlin wrote also *De accentibus et orthographia ling. heb.*, Hagenau 1518, 4to.—W. L. A.

REVELATION, BOOK OF. 1. *Authorship.*—The prevailing opinion has always been that John the apostle, the son of Zebedee, wrote the book before us. In favour of this view both external and internal evidence unite to speak. In relation to the former, some begin the series of witnesses with Polycarp, the apostle’s disciple; as Hengstenberg does. In the Epistle to the Philippians he writes, ‘Let us therefore so serve him with fear and all reverence, as he himself hath commanded, and as the apostles who have preached the gospel unto us, and the prophets who have foretold the coming of our Lord; being zealous of what is good,’ etc. The Berlin critic supposes that the prophets are not personally different from the apostles; and that the apostle John in the Apocalypse is their representative. But we believe that the O. T. prophets are spoken of.

2 U

The most ancient testimony in favour of the authenticity of the Apocalypse comes to us indirectly. Two Cappadocian bishops, belonging to the latter part of the 5th century, Andreas and Arethas, relate, that Papias knew the Apocalypse and *looked upon it as an inspired book*; which in their day was tantamount to the belief of its apostolic origin. It is true that Papias does not speak of it as the work of John the apostle in express terms; but it is a fair inference that his regarding it as of *divine authority* and *credible*, comports best with the idea of its being written by none other. We may admit with Eusebius, that Papias was not the hearer of John the apostle, but of John the presbyter; especially as he himself intimates thus much; and at the same time cite him as a good witness for the apostolic authorship of the Apocalypse. It has seemed singular that Eusebius should have omitted the testimony of this early writer. But his silence is capable of an easy explanation. The historian was unfavourable to Papias because of the latter's millenarian views; calling him weak-minded on that account. The extravagant expectations of John the presbyter's hearer, and of his day, were probably derived from oral tradition, in the view of Eusebius; if not, Dionysius of Alexandria had influenced the mind of the historian, leading it to doubt the authenticity of the book. One thing is clear, that Eusebius would not have omitted all mention of Papias in relation to the point, if the latter had expressed himself hesitatingly on it. This he did not, for he belonged to a country where he had good opportunities of knowing the origin of the Apocalypse, and the presbyter John himself to whom Dionysius ascribes it. The testimony of Melito, bishop of Sardis, is on the same side with Papias's. Eusebius states that he wrote a book 'about the devil and the Apocalypse of John.' The fact of the bishop of Sardis, one of the cities to which an epistle is addressed in the introductory part of Revelation, writing upon the book, proves its apostolicity.

Justin Martyr is the earliest writer who attributes the book expressly to John the apostle, at Ephesus. It is true that Rettig tried to impugn the authenticity of the passage in Justin, but without effect; as Lücke and Schott have ably proved. And Eusebius states, that Justin wrote his Dialogue or Disputation with Trypho, in which the place alluding to the Apocalypse occurs, at Ephesus; the first city of the seven to which an epistle was addressed by the author (Rev. i. 11; ii. 1). Surely the worthy father must have known the authorship well by historical tradition. In the circle within which he lived and acted, Justin knew of none other than the apostle as the author. We conclude, therefore, that before the middle of the 2d century the opinion that John the presbyter was the writer had not originated. There is no reason for thinking that Justin rested on *exegetical* grounds. Neither the time nor the place agrees with such hypothesis. The earliest Christian period relied more upon persons than writings, for the support of their faith. Not long after, Justin, and in the same century, Apollonius, presbyter at Ephesus, drew proofs from the Apocalypse, even against the Montanists, as Eusebius states. The context of the passage in which the historian speaks of him, leaves no room for doubt that Apollonius used the book as the production of John the apostle. Irenæus is also a

witness in favour of the apostolic origin of the Apocalypse. He appeals, besides, to ancient MSS. for the genuineness of the number 666, as well as to persons who had seen the apostle John. Great weight belongs to this testimony, because Irenæus must have learned the truth about the writer in proconsular Asia before he went to Gaul. The seven churches would carefully preserve the document addressed to themselves. We do not see that the witness of Irenæus is weakened because he was mistaken in the *date* of the book; or because he received superstitious and absurd accounts of John from the presbyters who professed to have seen him. It is probable that the Father drew the late date he assigns to the Apocalypse from a false interpretation of itself; or from vague report. And as to the superstitious opinions of John, received from the elders, they have nothing to do with the composition of a work like the present, because they were deduced from the interpretation of places in the O. T. The epistle of the churches of Lyons and Vienne, given by Eusebius, also presupposes the apostolic origin of the Apocalypse—so that from Asia Minor to Gaul the book is well attested as St. John's in the 2d century.

Tertullian uses it as an apostolic one, showing that Africa participated in the historical tradition which prevailed in other countries.

But the want of one witness during the 2d century appears suspicious at first sight—viz., the Syriac translation of the N. T. The Apocalypse is absent from the Peshito. Nor did this old version admit the book afterwards; though scholars in the Syrian church subsequently put it on a level with the other parts of the N. T.; and another Syriac translation of the Apocalypse was made, which was never thought to be equal in authority to what the Peshito would have been considered had the latter existed. It is true that Hug and others suppose the Peshito to have had the book at first; but this is incorrect. How, then, is the exclusion of the Apocalypse from this very ancient version to be accounted for? Perhaps by this, that at the commencement of the 2d century when the Peshito was made, the Apocalypse had not found its way to Edessa, the birth-place of the version. It is certain that Theophilus of Antioch, at the end of the same century, accepted the book as apostolic. In the 2d century, also, the Alogi ascribed the Apocalypse, as well as the other writings of John, to Cerinthus. Caius of Rome, from opposition to Montanism, ventured to make the same statement; as a fragment of Proclus's, preserved by Eusebius, asserts: 'But Cerinthus, by means of revelations, which he pretended were written by a great apostle, falsely introduces wonderful things to us, as if they were showed to him by angels,\* etc. This passage has given rise to discussion; some affirming that the revelations spoken of do not mean the present Apocalypse, but *forged revelations* as a counterpart to it. We agree with Lücke, in opposition to Paulus and Hug, in referring it to the Apocalypse, not to fictitious revelations.

Marcion and his followers excluded the book from their canon, and therefore they rejected its

\* Ἀλλὰ καὶ Κήρυθος ὁ δὲ ἀποκαλύψαν ὡς ὑπὸ ἀποστόλου μεγάλου γεγραμμένον, τερατολογίας ἡμῶν ὡς δὲ ἀγγέλων αὐτῷ δεδειγμένους ψευδόμενος ἐπεισάγει, κ. τ. λ. (H. E., iii. 28).

apostolic authorship. This arose from their peculiar tenets, and is of no weight as evidence.

When we pass to the 3d century, the evidence for the apostolic authority of the book is most favourable. Clement of Alexandria ascribed it to John; as did also Origen, notwithstanding his opposition to millennarianism. Cyprian, Lactantius, and Methodius were of the same opinion. And Hippolytus of Ostia probably wrote a commentary on the Apocalypse directed against the Montanists. But critical doubts began with Dionysius of Alexandria, owing, as it would seem, to doctrinal disputes with the millennarian adherents of Nepos. This Father ascribed the work to John the presbyter, not to the apostle. His testimony has been so often and so much insisted on, that it is necessary to adduce it at length. 'Some who were before us have utterly rejected and confuted this book, criticising every chapter, showing it to be throughout unintelligible and inconsistent; adding, moreover, that the inscription is false, forasmuch as it is not John's; nor is it a revelation which is hidden under so obscure and thick a veil of ignorance; and that not only no apostle, but not so much as any holy or ecclesiastical man was the author of this writing; but that Cerinthus, founder of the heresy called after him Cerinthian, the better to recommend his own forgery, prefixed to it an honourable name. For this (they say) was one of his particular notions, that the kingdom of Christ should be earthly; consisting of those things which he himself, a carnal and sensual man, most admired,—the pleasures of the belly and of concupiscence; that is, eating and drinking and marriage; and for the more decent procurement of these, feastings, and sacrifices, and slaughters of victims. But for my part, I dare not reject the book, since many of the brethren have it in high esteem; but allowing it to be above my understanding, I suppose it to contain throughout some latent and wonderful meaning; for though I do not understand it, I suspect there must be some profound sense in the words; not measuring and judging these things by my own reason, but ascribing more to faith, I esteem them too sublime to be comprehended by me. Nor do I condemn what I have not been able to understand; but I admire the more, because they are above my reach. . . . And having finished in a manner his prophecy, the prophet pronounceth those blessed that keep it, and also himself. For 'blessed is every one,' says he, 'that keepeth the words of the prophecy of this book; and I John, who saw and heard these things' (Rev. xxii. 7, 8). I do not deny then that his name is John, and that this is John's book, for I acknowledge it to be the work of some holy and divinely inspired person. Nevertheless, I cannot easily grant him to be the apostle the son of Zebedee, brother of James, whose is the Gospel inscribed according to John, and the Catholic epistle; for I conclude, from the manner of each, and the turn of expression, and from the conduct (or disposition) of the book, as we call it, that he is not the same person. For the Evangelist nowhere puts down his name, nor does he speak of himself either in the gospel or in the epistle.' Then a little after he says again: 'John nowhere speaks as concerning himself nor as concerning another. But he who wrote the Revelation, immediately at the very beginning prefixeth his name: 'the Revelation of Jesus Christ, which God gave unto him to show

unto his servants things which must shortly come to pass. And he sent and signified it by his angel unto his servant John, who bare record of the word of God, and his testimony, the things which he saw' (Rev. i. 1, 2). And then he writes an epistle, 'John unto the seven churches in Asia. Grace be unto you and peace' (ver. 4). But the Evangelist has not prefixed his name, no, not to his catholic epistle; but without any circumlocution begins with the mystery itself of the divine revelation, 'that which was from the beginning, which we have heard, which we have seen with our eyes' (1 John i. 1). And for the like revelation the Lord pronounced Peter blessed, saying, 'Blessed art thou, Simon Bar-jona; for flesh and blood has not revealed it unto thee, but my father which is in heaven' (Matt. xvi. 17). Nor yet in the second or third epistle ascribed to John, though, indeed, they are but short epistles, is the name of John prefixed; for without any name he is called the elder. But this other person thought it not sufficient to name himself once and then proceed, but he repeats it again, 'I, John, who am your brother and companion in tribulation, and in the kingdom and patience of Jesus Christ, was in the isle called Patmos for the testimony of Jesus' (Rev. i. 9). And at the end he says, 'Blessed is he that keepeth the sayings of the prophecy of this book; and I, John, who saw and heard these things' (ch. xxii. 7, 8). Therefore, that it was John who wrote these things, ought to be believed because he says so. But who he was is uncertain; for he has not said, as in the gospel often, that he is 'the disciple whom the Lord loved;' nor that he is he 'who leaned on his breast;' nor the brother of James; nor that he is one of them who saw and heard the Lord: whereas he would have mentioned some of these things if he had intended plainly to discover himself. Of these things he says not a word; but he calls himself our 'brother and companion, and witness of Jesus,' and 'blessed,' because he saw and heard those revelations. And I suppose there were many of the same name with John the apostle, who for the love they bore to him, and because they admired and emulated him, and were ambitious of being beloved of the Lord like him, were desirous of having the same name: even as many also of the children of the faithful are called by the names of Paul and Peter. There is another John in the Acts of the Apostles, surnamed Mark, whom Paul and Barnabas took for their companion: concerning whom it is again said, 'and they had John for their minister' (Acts xiii. 5). But that he is the person who wrote this book, I would not affirm. But I think that he is another, one of them that belong to Asia; since it is said that there are two tombs at Ephesus, each of them called John's tomb. And from the sentiments and words, and disposition of them, it is likely that he is different (from him that wrote the gospel and epistle). For the gospel and epistle have a mutual agreement, and begin alike. The one says, 'In the beginning was the word;' the other, 'That which was from the beginning.' The former says, 'And the word was made flesh, and dwelt among us, and we beheld his glory, the glory as of the only-begotten of the Father.' The latter has the same with a slight variation: 'That which we have heard, which we have seen with our eyes, which we have looked upon, and our hands have handled, of the word of life. For

the life was manifested.' He is uniform throughout, and wanders not in the least from the points he proposed to himself, but prosecutes them in the same chapters and words, some of which we shall briefly observe: for whoever reads with attention will often find in both 'life,' frequently 'light,' the 'avoiding of darkness;' oftentimes 'truth, grace, joy, the flesh and the blood of the Lord: judgment, forgiveness of sins, the love of God toward us, the commandment of love one toward another; the judgment of this world, of the devil, of antichrist; the promise of the Holy Spirit, the adoption of the sons of God, the faith constantly required of us, the Father and the Son,' everywhere. And, in short, throughout the gospel and epistle it is easy to observe one and the same character. But the Revelation is quite different and foreign from these, without any affinity or resemblance, not having so much as a syllable in common with them. Nor does the epistle (for I do not here insist on the gospel) mention or give any hint of the Revelation, nor the Revelation of the epistle. And yet Paul, in his epistles, has made some mention of his Revelations, though he never wrote them in a separate book. Besides, it is easy to observe the difference of the style of the gospel and the epistle from that of the Revelation; for they are not only written correctly, according to the propriety of the Greek tongue, but with great elegance of phrase and argument, and the whole contexture of the discourse. So far are they from all barbarism or solecism, or idiom of language, that nothing of the kind is to be found in them; for he, as it seems, had each of those gifts, the Lord having bestowed upon him both these, knowledge and eloquence. As to the other, I will not deny that he saw the Revelation, or that he had received the gift of knowledge and prophecy. But I do not perceive in him an accurate acquaintance with the Greek language; on the contrary, he uses barbarous idioms, and some solecisms, which it is necessary that I should now show particularly, for I do not write by way of ridicule; let none think so. I simply intend to represent in a critical manner the difference of these pieces.'

Thus Dionysius bases his opinion on internal grounds—on style, language, and characteristic peculiarities—arguing from the differences of the fourth gospel and first epistle general of John, that the same person could not have written the Apocalypse also. His reasoning has a subjective value merely; and is valid on the assumption that the gospel and first epistle proceeded from the apostle. But it has no worth as an independent historical testimony; because it contradicts the current of ecclesiastical tradition. When Dionysius appeals to some of his predecessors who utterly rejected the book, and thought that it should be excluded from the canon, he could only have alluded to the few who looked upon the production as the work of Cerinthus—to Caius, the Alogi, and other Antimontanists.

In the 4th century, Eusebius the historian seems undecided about retaining or rejecting the Apocalypse. His opposition to millenarianism inclined him to the latter course, not less than the critical doubts of Dionysius. On the other hand, a constant and firm tradition was arrayed on behalf of the apostolicity. The historian conjectures, with Dionysius, that the writer may be John the presbyter; but affirms that he will not refuse to put it

among the *ὁμολογούμενα* if cause for doing so should appear (*εἴτε φανεῖη*). This wavering policy tells unfavourably on behalf of his honesty as a historian; since it is not improbable that he could have cited older witnesses for the apostolic authority of the book, had he been so disposed.

It is scarcely necessary to follow the series of external testimonies farther than Eusebius. Later witnesses belong to the history of the canon, rather than to criticism. Enough has been given to prove that the apostolic origin of the Apocalypse is as well attested as that of any other book in the N. T. How can it be proved that Paul wrote the Epistle to the Galatians, for example, on the basis of external evidence, if it be denied that John the apostle wrote the closing book of the canon? With the limited stock of early ecclesiastical literature that survives the wreck of time, we should despair of proving the authenticity of any N. T. book by the help of ancient witnesses, if that of the Apocalypse be rejected as insufficiently attested.

Let it not be urged that the patristic tradition was unanimous but divided in character; and that little weight should be attached to the testimonies of the Fathers, discordant as they frequently are on topics that came under their notice. The historical tradition relative to the Apocalypse seems to have been interrupted by doctrinal views merely. Had no Montanism or millenarianism appeared in the earliest times, we should not have heard of voices doubting the authorship of John. We do not deny that the ecclesiastical writers of the first three centuries occasionally adopted vague traditions, without inquiring whether they rested on a good foundation; and that they were generally incapable of critical investigation, if not disinclined to it; or that they often followed their immediate predecessors, contented to glide down the ecclesiastical stream without examining the correctness of their belief. There were, however, noble exceptions. It is an undoubted fact that, from the middle of the 2d century, several of the most distinguished Fathers connected with the church in Asia Minor, who had excellent opportunities of knowing the truth of the prevailing tradition there, received the work as an authentic document of the apostle John. Even Clement and Origen, whose doctrinal standpoint hardly agreed with the book, did not doubt its apostolicity. The basis of the tradition cannot be explained away without violence to the principles of historical evidence.

We should not have drawn out the argument to such extent, had not the apostolicity of the book been doubted or denied by some of the ablest scholars in Germany. At the time of the Reformation, Erasmus intimated his doubts of it; thinking it strange that one writing revelations should repeat his name so carefully—I *John*, I *John*—as if he were drawing up a bond, not a book, which is contrary both to the custom of other apostles, and especially his own; for in the gospel he speaks more modestly, and never gives his name. When Paul is forced to speak of his visions, he explains the thing in the person of another. Erasmus goes on to say, that in the Greek copies he had seen, the title was, of *John the Divine*, not *John the Evangelist*; and that the language is not a little different from that in the gospel and epistle.\*

\* *Annotationes in Apocalypsin Joannis, Novum Testamentum*, ed. 1, p. 625.

Luther speaks more decidedly against the apostle's authorship: 'More than one thing presents itself in this book as a reason why I hold it to be neither apostolic nor prophetic. First, and most of all, that the apostles do not concern themselves with visions, but with prophecy in clear, plain words, as Peter, Paul, and Christ in the gospel do; for it belongs to the apostolic office clearly, and without image or vision, to speak about Christ and his work. Moreover, there is no prophet in the O. T., not to speak of the N. T., who is occupied with visions throughout; so that I almost imagine to myself a fourth book of Esdras before me; and certainly can find no reason for believing that it was set forth by the Holy Spirit. Besides, it seems to me far too arrogant in him to enjoin it upon his readers to regard his own as of more importance than any other sacred book, and to threaten that if any one shall take aught away from it, God will take away from his part in the book of life. Moreover, even were it a blessed thing to believe what is contained in it, no man knows what that is. The book is believed in (and is really just the same to us) as though we had it not, and many nobler books exist for us to believe in. . . . But let every man think of it as his spirit prompts him. My spirit cannot adapt itself to the production; and this is reason enough for me that I should not highly esteem it, that Christ is neither taught nor perceived in it—which is the great business of an apostle.\*' Though he used milder language afterwards, he never retracted his doubts.

Zwingle would not accept passages in proof from the Apocalypse, 'because it is not a Biblical book,' i.e., a canonical one. Oecolampadius and Bucer appear to have had the same opinion. Carlstadt shared their doubts. Oeder and Semler also denied the apostolicity; but the latter changed his opinion, and admitted it. Michaelis assigned better reasons for the negative view. In the same path followed Heinrichs, Bretschneider, Bleek, De Wette, Ewald, Lücke, Schott, Hitzig, Credner, Reuss, Neander, and Dürstendieck. Respectable names are found on the other side; but the arguments of Lücke, Ewald, Bleek, De Wette, and Dürstendieck are ably advanced. Ewald and Bleek, two of the latest writers on the subject, deserve respect for their learning, honesty, and integrity. No critical opinion of theirs ought to be summarily dismissed. In England the book has been uniformly assigned to the apostle; but a conservative tendency in general has been more influential in this respect than the result of thorough investigation; as appears from the fact that the fourth gospel and first general epistle of John have been generally attributed to the apostle. English theologians do not yet see, with De Wette, that if the apostle wrote the Apocalypse, he did not write the fourth gospel; or if he wrote the latter, that he could not have been the author of the former. We believe, however, that this proposition is beginning to be acknowledged as possible, or even probable. The more it is considered, it will appear the more reasonable.

Does internal evidence correspond to the external as regards authorship? In four places John calls himself the author (i. 1, 4, 9; xxii. 8), sometimes with a predicate, at other times in the phrase, *servant of Jesus Christ; or, your brother*

*and companion in tribulation, and in the kingdom and patience of Jesus Christ*, in relation to his readers; while in xxii. 9 he is styled by the angel *a fellow-servant and brother of the prophets*. He presents himself in the character of a man who was well known to the Christian churches of proconsular Asia; an influential personage, in whose divine mission they could have no reason to doubt. The predicates he attributes to himself show a consciousness of his dignity, yet a modesty withal, arising from a sense of the unity of true Christians. Though he does not call himself *an apostle*, yet he is commanded to write what he had seen, and *to send it to the seven churches* (i. 11). He is *the prophet of the Messiah*, not his *apostle* in this instance. There was no apparent necessity for the writer to designate himself *an apostle*, because the epithets accompanying the name John were sufficient to indicate his person. He was the immediate witness of the Messiah, the announcer of the revelations of God, the prophet of the new covenant. Like Daniel, he speaks of himself, *I John*. He treats of the apostolic time, when Jewish ideas prevailed and the expectation of Messiah was fresh in the general mind. When he wrote, several apostles were living, and probably near the sphere in which John himself acted. No other man could then lay claim to the position and privilege which the writer of the book asserts. Contemporary apostles would have frowned upon the work; John himself would have disowned it. A work bearing his name, and composed about thirty years before his death, would have certainly called forth a contradiction, because he saw that it would be taken for his; and such contradiction would have reached us from the circle of his disciples through Irenæus. The later assertions of its non-apostolic authorship arose from doctrinal interests. None of them, as far as we can judge, sprang from a historical tradition.

Two passages, however, have been adduced as unfavourable to the apostolic authorship—viz., xviii. 20; xxi. 14. In the former, the writer speaks of saints, and apostles, and prophets, rejoicing over the downfall of Babylon; in the latter, of the names of the twelve apostles being inscribed upon the foundations of the walls of the New Jerusalem. Now it is argued that the apostle would not speak so if he himself were living. But in the context of xviii. 20, the seer had transferred himself from the future into the past and present, anticipating the judgment upon Babylon. Taken strictly, the language would imply that no believer whatever was upon earth at the time; which proves too much. As to xxi. 14, the language is not very different from that of Paul in Eph. ii. 20, where he affirms that the Christian church is built upon the foundation of apostles and prophets, not excluding himself; nor from that in 1 Cor. iii. 10, where he speaks of himself as a wise master builder, laying the foundation of the church at Corinth. Why then should John not speak of himself as one of the foundations? Is it inconsistent with modesty to do so? If so, did not the sons of Zebedee covet the two highest places in the kingdom of Christ, as we read in Matt. xx. 20? We need not wonder at the number twelve being employed, rather than thirteen, including St. Paul. The types and symbols of the book exclude the idea of minute exactness. Twelve is a number often used by the writer; the twelve tribes of

\* *Preface to the Revelation*, 1522.

Israel; twelve thousand sealed ones, etc.; and Matthew himself, in speaking of the thrones allotted to the apostles, regards them as twelve, without relation to St. Paul, whom he must have known. Nothing more is needed than a comparison of Paul's own language in the epistles to the Galatians and Corinthians, to show that he never lost the feeling of conscious dignity implied in the apostolic office, though he retained his Christian humility. And surely the consciousness of a like dignity was not less among the Palestinian apostles, as we may infer from 2 Cor. xi. 5; xii. 11, etc. Thus nothing in either passage is fitted to shake our belief in the apostolicity of the work.

Do the contents of the book agree with the assumption of its proceeding from an apostolic man; or do they present phenomena inconsistent with the known character of John, and the time when he wrote? To answer this question, we must take a general survey of the contents. These are certainly apostolic; chiefly the *eschatology* (doctrine of the last things) of the book, which is the prominent feature. When we survey the N. T., it is remarkable to observe the deep impression which the idea of their Lord's speedy coming had made upon the minds of the apostles. He was to appear in the clouds of heaven with great power and glory, like the Messiah in Daniel whom the Jews expected. The near approach of Christ's advent was the enlivening and consolatory motive held out in all the apostolic epistles. It was ever present to the mind of St. Paul, who proclaims Maran-atha, speaks of his coming with all his saints, of his descending from heaven with the voice of the archangel and the trump of God; believes that *the day of the Lord*, which is equivalent to *the day of Jesus Christ, that day, the day of redemption*, is at hand; and that he himself shall live to see it. Then shall the saints be judges of the world, and even of angels. Because of the nearness of this day, the apostle exhorts his readers to watchfulness. Now St. Paul assures us, that he received nothing from the other apostles; but that all his Christian ideas came from immediate revelation; which shows that the eschatological element in the first gospel and the Apocalypse was an essential part of Christianity. Nor is it confined to Paul's epistles. We find it in the letter to the Hebrews. Peter teaches the same thing, saying, 'the end of all things is at hand.' The epistles of John express it also. The forerunners of antichrist are already come. James recommends patience unto the coming of the Lord, which he affirms to be near. And Jude proves, from the existence of mockers, that it is the last time. The description of Christ's advent thus hoped for and expected by all the N. T. writers, is most developed in the 24th chapter of Matthew's Gospel, where ideas of retribution are embodied in a solemn judicial process preceded by great distress, and of Messiah's appearance in splendour, introducing a new dispensation in which the faithful should be recompensed for their present sufferings. Such ideas are common to it and the Apocalypse. The main difference between the Revelation and other apostolic writings, in regard to the expected coming of the Lord, consists in the wide interval which John puts between the manifestation of Messiah and the end of the world—the space of a thousand years; while they place the time of the Messianic kingdom very near the process of final judgment.

In like manner, the *Christology* of the Apocalypse contains genuine apostolic elements. The idea of Jesus the Messiah is, that he existed before the world; that he is the highest spirit; that by virtue of his Messianic nature he is like to Jehovah from the beginning; that he is the Alpha and the Omega; yet that he is a created spirit, having received his Messianic-nature from the Father. Hence he is termed 'the beginning of the creation of God' (iii. 14). So also the expression, 'Son of God' (ii. 18), refers merely to the divine sovereignty bestowed upon him by the Father, according to Ps. ii. 8. Divine qualities and powers are assigned to Jesus, as far as the Messiah appeared in him. Accordingly, he sits upon the same throne with his Father; and the Jehovah-name is a *new* name. The spiritual and potential perfections he possesses were bestowed upon him as a reward for his faithful and victorious career. He is the organ of communication between God and his people; and therefore he is the 'Word of God,' not 'God the Word,' as in John i. 1. When he has accomplished the purposes for which the government of the world was given into his hands, he will resign the power and kingdom into the hands of the Father, and reign under him (xi. 15, 17). This agrees with the Pauline Christology in the main; though it is unfolded here in a more Jewish form than in St. Paul's epistles.

The conception of antichrist in the Apocalypse manifests the apostolic time also. The name of this power, which became stereotyped from the beginning of the 2d century, does not appear in the book. The idea is found in its concrete form; but the appellation is wanting. The antichrist of the Revelation is a worldly prince, in whom the evil powers are concentrated. Bearing the symbolical name of the Beast, he is conceived of as a definite historical character; and other hostile beast-forms are latent in him. So also in the Second Epistle to the Thessalonians, antichrist has the same concrete form, and receives general appellations, such as, the *Man of sin*, the *Son of perdition*, etc. It is in John's epistles that we first meet with the name *antichrist*. Thus the idea of the great enemy of Christ, in the Apocalypse, is in the same stage of development with that in the Second Epistle to the Thessalonians.

Need we add, that the *pneumatology* of the Revelation agrees with all that we find in the apostolic writings; and that it contains no later ideas on the subject than the Pauline ones? The power of the devil in relation to the kingdom of Christ is presented under the same aspect in the Apocalypse as in the epistles of Paul. Though the arch-enemy of man was vanquished by Christ at his first advent, he was not for ever subdued. He is still active; and the contest with him continues till the second advent of the Redeemer. This prince of darkness has legions of spirits associated with himself; and the Messiah, by whom he is subdued, must therefore be the *King of kings* and *Lord of lords*; or, as it is expressed by Paul, *the head of all principality and power*. Thus the book before us contains no ideas of the spiritual world additional to the Pauline.

As far as the individuality of John is reflected in the N. T. and in tradition, it is in harmony with the contents of the Apocalypse. The sons of Zebedee were fiery, zealous, impetuous spirits, whose feelings readily led them to excess or re-

venge. They wished to call down fire from heaven to consume the inhabitants of a Samaritan village ; and begged for the foremost places in the kingdom of heaven. John forbade one who presumed to cast out devils in the name of Jesus. He was a Boanerges, or son of thunder ; with a decided individuality, and an ardent disposition that needed checks. As far as he appears in the Acts and Pauline epistles, he is somewhat narrow and Judaic, not wholly emancipated from national prepossessions. Accordingly, the Quartodecimans appealed to the Jewish practice of the apostle John ; while Polycrates of Ephesus states that he was a priest, and wore the sacerdotal plate. This agrees with the priestly character of the seven epistles ; and if he were of a priestly family, as is not improbable, he might appropriate to himself the insignia of priestly dignity, designating himself as one initiated into the mysteries of Jesus. Tradition in Asia Minor represented him as a mediator between Christ and the Church. He had the surname of *Παρθένος*, *the virgin* (comp. Rev. xiv. 4) ; and appeared as an ascetic who received divine communications. Continuing as he did for a while in Jerusalem, we are unable to tell with what his mind was chiefly occupied. Perhaps he was tracing out in the Scriptures the signs of the returning Messiah, and looking for the great future at hand. Probably the dissolution of the bond existing between the Jews and Jewish Christians there, broken as it was by the latter, caused him to feel that the place was unfit for his presence. With the enemies of Christ, as he must have considered the unbelieving Jews, he could have no more communion ; they were rejected. The very metropolis they prided in, with its ancestral renown, was to be overthrown, and a *new kingdom of Israel* brought down to earth. Hence it was time to depart.

After he had removed to Asia Minor, he is depicted as indignantly contending against erroneous teachers, both of the Jewish and Gentile parties. Irenæus states from Polycarp, that the apostle, going into a bath on one occasion, discovered Cerinthus there, and, leaping out of it, hastened away, saying he was afraid lest the building should fall on him and crush him along with the heretic. Very faithfully are these traits of character reflected in the book before us ; whose prevailing tone is that of an impassioned spirit, full of rage against the despisers of God and his anointed One, suggesting images of dragons, murder, blood and fire, vials of wrath. Hence too, the souls of the martyrs invoke vengeance on their persecutors ; and all heaven is called upon to rejoice over the downfall of Babylon the great.

We have represented the apostle as retaining some of his old Judaic prepossessions—one whose Christianity was narrowed by the national type of thought. This opinion is justified by the Apocalypse itself, where *the elders*, who are always numbered in relation to *the twelve tribes*, appear a selected body, representing the faithful church of God on earth ; and sit upon thrones immediately surrounding that of God, as if they were a kind of assessors participating in judicial functions. They are the elect, the first-fruits to God and the Lamb (vii. 4, 5 ; xiv. 1, etc. ; xxi. 12). On the other hand, the saved of the heathen, though a great multitude, are farther from the Almighty's throne, behind and distinguished from the former (vii. 13).

The latter are the crowd—an appendix as it were to the chosen representatives of the true people of God. It is true that the 144,000, presented to view in vii. 1-9 ; xiv. 1-5 ; xv. 2-4, may be regarded as the whole multitude of Christians collected out of all nations and peoples : yet even there the very universalism of the Apocalyptist has a Judaising character, since the entire number of believers is classified according to the old division of the twelve tribes ; and every Christian is put into one tribe or another. The title to the kingdom of God is bound up with such classification. The heathen are enrolled among the twelve tribes when they become Christian. Thus their formulising proves the Judaising view of the apostle. Yet it must not be supposed that the apostle was a narrow-minded Jew of the kind which Schwegler has depicted him. He was emphatically a Christian. Primitive Christianity stood upon a Jewish basis, being developed out of Judaism. Hence the victory of Christianity assumes in the Apocalypse the external form of a kingdom co-extensive with the world itself ; but with Christ reigning in the royal city of Jerusalem purified and transformed—no longer the old apostate Jerusalem which crucified the Lord and is called Sodom and Egypt on that account. While we see the partiality with which the Jews in particular are called and converted ; the national Judaism of the twelve tribes reappearing in the New Jerusalem in elevated splendour and glory ; the Apocalyptist regards *Christians* as the only orthodox Jews, having the commandments of God and the testimony of Jesus. He looks upon them as an elect Jewish church, admitting the heathen to their communion. The nationality of the apostle had assumed a Christian type. He had fairly abandoned empirical Judaism, by teaching that the Judaism which embraced Christ was *the only genuine one*. This accounts for the fact that he describes the cause of Christ triumphing over Judaism ; and exalts the person of that Redeemer whom the Jews crucified. As soon as union ceased to exist between the Jews who believed in Christ and such as still adhered to the old religion, the former must have looked upon the latter no longer as brethren but enemies ; and John would repair to Asia Minor, a theatre of activity, already impressed with Pauline ideas. There he lived and laboured in the spirit of a Christian Judaism, so to speak, which differed from Paul's in the method of its development and limitations, more than in the essential result. When the freer Pauline tendency, which set up an opposition to *the spirit* of Judaism from the beginning, had prevailed over the Judaised Christianity of John, the fourth gospel could be written in Asia Minor.

So far we have endeavoured to keep the evidence in favour of apostolic authorship distinct from the fourth gospel, in order to simplify the discussion. But when one is treated of, the other must be regarded ; because both have been so long current in the church under the name of John, and because a partial comparison at least is necessary to a complete knowledge of either. Though the two may be understood apart, their authorship cannot be properly investigated without mutual reference ; such reference placing general characteristics, as well as individual points, in a better light. It will not satisfy the demands of criticism merely to assume the non-authenticity of the gospel from the

authenticity of the Apocalypse, or *vice versa*; because respectable English scholars still maintain that both were written by the same author. Having shown, as clearly as the nature of the question allows, that the one was written by the son of Zebedee, it remains for the critic to bring into view the points of resemblance and discrepancy as evidence for identity or diversity of origin.

The *Christology* of the Apocalypse is in apparent unison with that of the gospel. As the latter describes Jesus as the incarnate wisdom of God, the former uses language of similar tendency (Apoc. iii. 14). His preexistence is asserted in the gospel as it is in Apocalypse (iii. 14). The appellation *λόγος*, distinctive of person, occurs only in the gospel, first epistle, and Apocalypse. And as the evangelist says that the Logos was God; so Jesus bears the name of Jehovah in the Apocalypse.

We find the favourite *μαρτυρέω* and *μαρτυρία* of the gospel in the sense of *public profession*, or declaration of belief in the Saviour. The use of *νικᾶν* expressive of overcoming evil, opposition, and enmity in the world, is peculiar to the Apocalypse, First Epistle of John, and fourth gospel.

*Τηρεῖν τὸν λόγον*, to keep the word, a frequent phrase in the fourth gospel and first epistle, often occurs in the Apocalypse.

*Σκηνὴν*, to tabernacle, is found only in the fourth gospel besides the Revelation.

*Σφάττειν*, to slay, appears twice in the first epistle, and frequently in the Apocalypse.

*ἔχειν μέρος*, to have part or share, is in the fourth gospel and the present book. So is *περιπατεῖν μετὰ Χριστοῦ*, to walk with Christ.

*Ἐρχεται ὥρα*, the hour is coming, is frequent in the gospel, and occurs twice in the Apocalypse.

Christ or God is often termed *ἀληθινός*, the true. So in the gospel Christ is called the true light; and God is the true God in the first epistle.

In Apocalypse ii. 17, Jesus promises believers the hidden manna; in the gospel, the true bread from heaven.

Christ is often styled in our book a lamb; an epithet nowhere else applied to him except in the fourth gospel.

The image of Christ as a shepherd is found in Apoc. vii. 17, and in the gospel, x. 1, etc.

*Living water*, or the water of life, is promised to the believer in Apocalypse xxi. 6, xxii. 17, and gospel, vii. 38.

The comparison of Christ with a bridegroom in the fourth gospel, iii. 29, should be put by the side of Apocalypse xix. 7; xxi. 2; xxii. 17; on account of the diction. In the Apocalypse it is said of the Jews who do not believe in Jesus that they are not true Jews; so in the fourth gospel, viii. 39, 40.

In ii. 11 a promise is made to him that overcometh that he shall not be hurt by the second death; in the fourth gospel, it is said of him that keeps Jesus's word that he shall never see death.

In xiv. 15 a call is addressed to the angel to thrust in his sickle and reap, because reaping-time is come and the harvest of the earth is ripe. So in the gospel Jesus says to his disciples, 'Look on the fields, for they are white already to harvest.'

In Apocalypse vii. 15, he that sits upon the throne is said to dwell among the saints; an idea similar to that in the gospel (xiv. 23), where the father and the son are said to take up their abode with the believer. The same thought is in Apocalypse iii. 20; xxi. 22; xxii. 5.

In xiv. 4, the hundred and forty-four thousand sealed ones follow the Lamb whithersoever he goes (*ἀκολουθεῖω, ὁπᾶγω*); so Jesus says to Peter, 'Whither I go (*ὁπᾶγω*), thou canst not follow (*ἀκολουθεῖω*) me now,' etc.

The phrase 'Lord, or sir, thou knowest' *κύριε, σὺ οἶδας*, is common to the Apocalypse and the fourth gospel.

*Γράφειν* followed by *εἰς* before the noun signifying the object on which the writing is made, is peculiar to the Apocalypse and gospel.

In the gospel there is an account of piercing Jesus's side with a spear; to which act is applied a prediction in Zechariah (xii. 10). In the Apocalypse, the same version as that of the gospel is exhibited. And as it is a new one (*ἐξεκέντησαν*), not that of the Seventy, it has been inferred that the same hand appears in both passages.

The manner of writing in the Apocalypse often reminds one of that in the fourth gospel and first epistle, where the same idea is expressed both positively and negatively; and where a certain parallelism of thought and expression may be noticed.

More specimens of resemblance than these have been collected by such writers as Donker-Curtius, Dannemann, and Stuart, to prove identity of authorship in the Apocalypse and fourth gospel. We have given the most striking and plausible ones. The reader must judge of their force, and draw his own conclusion. Some may be thought far-fetched; though most do not appear in that light. Stuart's list needs sifting, because he does not scruple to use the 21st chapter of the fourth gospel throughout, as if it were unquestionably a genuine part of the work; though that position has been ably disputed on critical grounds by Lücke and others. It is easy to see the weakness of Stuart's reasoning when he asserts that John is familiar with the neuter *ἀπλῶν*; whereas it occurs but once in the gospel, and that too in the 21st chapter. And it is surely a proof of haste to adduce the spurious 1 John v. 7 as an instance of the application of Logos to Christ. In short, he makes several rash assertions which his examples sometimes fail to support; as under the head of the omniscience of Christ, where some irrelevant places are given from the gospel and Apocalypse. But after every reasonable deduction enough remains to prove that the correspondences between the Apocalypse and fourth gospel are not accidental. They either betray one author; or show that the writer of one was acquainted with the other. These cognate phenomena have not been allowed their full force by Lücke, Ewald, De Wette, and Dürstendieck. On which side the originality lies appears from the internal relation of the two books to one another, more than from their external form and expression. The Revelation betrays a tendency of mind akin to what is known as Jewish Christianity in its first stage; whereas a higher degree of religious progression belongs to the gospel. The development of the religious conception commonly begins with the sensuous and concrete, which it seeks to spiritualise, and to transform into the abstract. Now it needs no argument to prove, that the expressions and ideas common to the two works have a more spiritual and abstract bearing in the gospel. The evangelist purposely attaches himself to the forms of the Apocalyptic even after their original signification had been laid aside. Perhaps he wished his work to pass for that of the apostle,

The strongest apparent coincidence is in the Christology. Here three particulars bear considerable resemblance to the fourth gospel—viz., Christ's designation as *the beginning of the creation of God*; the attribution to him of the name and predicates of Jehovah; and the appellation *the Word of God*. The first of these denotes the pre-existence of Christ. As it has parallels in the Pauline epistles, we deem it hazardous, with Zeller, to regard the phrase as a mere honorary title, rather than a doctrinal predicate to be taken literally. Though the expression be obscure, it seems to us most natural to understand it in the sense of *the first-created being*, the highest creature. But the fourth gospel makes the Logos or Word, representing Messiah, to have *created all things*. Again, Jesus or the Messiah is expressly termed the Alpha and Omega, which is merely a periphrasis for *Jehovah*; and the new name of Messiah, which none knows but himself, is the unutterable name, the *Shem Hamphorash*. Yet the name does not lead to the conclusion that *the nature* of Jehovah belongs to the Messiah. It is an old Rabbinic tradition (Eisenmenger, *Entdecktes Judenthum*, Theil i. p. 449) that the name Jehovah belongs to three things—the Messiah, the righteous, and Jerusalem; which is proved by Jer. xxiii. 6; Is. xliii. 7; Ezek. xlviii. 35. That the Apocalypticist alludes to this tradition is highly probable, because the faithful are represented as having the name of God and that of the new Jerusalem, and the new name of Messiah, written upon their foreheads—the name being none other than Jehovah. Besides, the angel *Metatron*, in Jewish doctrine, is also called Jehovah (Gfrörer, *Das Jahrhundert des Heils*, vol. i. pp. 318, 319), showing that it is given to creatures.

The Messiah is called the  $\delta \lambda \gamma \omega \varsigma \tau \omicron \upsilon \theta \epsilon \omicron \upsilon$  (xix. 13), but in the gospel he is called  $\delta \lambda \gamma \omega \varsigma$  absolutely. A different theological standpoint is evinced in the two. The former savours of Palestinian, the latter of Alexandrian metaphysics. The one is the well-known  $\text{מִיָּמְרָה דִּי יְהֵוָה}$  of the Targums; the other reminds us of Philo.

It should also be noticed, that while the heavenly name of Messiah is called a *new name* (Rev. iii. 12), the gospel contains the words of Jesus to the Father, 'Thou lovedst me before the foundation of the world' (xvii. 24).

Similarity of expression has in this case misled some critics to assume greater agreement between the descriptions of Christ's person in the Apocalypse and gospel than really exists. The heavenly nature and pre-existence of Messiah was a late Jewish doctrine, which was gradually taken into the circle of Christian ideas, and developed there. But in the gospel it has reached a higher stage of unfolding than in the Apocalypse.

The most striking mutual term is  $\epsilon \kappa \kappa \epsilon \nu \tau \epsilon \omega$ , the new representative of the Hebrew  $\text{קָרַךְ}$  in Zech.

xii. 10, applied to the piercing of the Saviour in both works, and different from the Septuagint word. It is precarious, perhaps, to found identity of authorship on the use of a mere word; yet its connection is a peculiar one. And though we might conjecture, with Ewald, that the Septuagint had the verb  $\epsilon \kappa \kappa \epsilon \nu \tau \epsilon \omega$  at first in its text; the assumption is too hazardous. Nor does it relieve the difficulty felt by those who argue against identity of authorship, to say that Aquila, Symmachus,

and Theodotion translate the Hebrew verb by this very Apocalyptic word; or that the evangelist refers to the fact of Christ's side being pierced with a spear; whereas the Apocalypticist alludes to the slaying of him generally, the extreme manifestation of hostile belief.

On the other hand, the characteristic mode in which the writer of the Apocalypse views beings, scenes, and objects, betrays a different person from John the apostle. His intuitional nature is of another cast, and has a different expression. The view of the one is *sensuous*; that of the other *spiritual* and *mystic*. In the Apocalypticist, fancy is creative and lively; in the evangelist, calmness prevails. The objective predominates in the one; speculative depth, gracious trust, a loving freedom of spirit, in the other. The one is introspective, looking at spiritual things and relations with a finely tender psychological organisation which attracts the reader; the other is of rougher mould, viewing things in concrete, plastic forms. Quiet contemplation has full scope in the evangelist; mildness and love find utterance in affectionate discourse. But the spirit of the Apocalypticist is stern and vengeful, with cutting reproofs, calls to repentance, commands and threatenings. Here, indeed, the promises are rich; but they bear a pregnant form suited to the majesty of the book. According to the writer of the fourth gospel, happiness arises essentially from faith in the Saviour on earth; and therefore the reader receives the impression that blessedness is a present possession; whereas, according to the Apocalypticist, the righteous pray for vengeance and are restored to life in the first resurrection, that they may reign with Christ a thousand years. In short, the gospel presents an idealising, universalist tendency, which breaks away from the Judaic basis, and sets forth the Redeemer's person, his grace and truth, over against that of Moses, proclaiming him as the light and life of the world. In the Apocalypse, Christ is the external conqueror of his enemies, whose *power* rather than *grace* is exhibited. His coming to *reign outwardly* fills the mind of the seer, instead of his *spiritual sway* in the heart.

Again, a sharp, definite, decided tone appears in sentences short and unconnected, without internal pliancy. But the evangelist's method of writing has a circumstantiality foreign to the Apocalypticist. It is difficult to make this argument palpable to the reader, because it rests in part on subjective tact and taste. Its reality can be *felt* more easily than *described*. Based upon a careful survey of all the literature that passes under the name of John, it forces itself on the mind of him that surrenders himself to the natural effect produced. When he perceives the difference of the spiritual element in which the evangelist and Apocalypticist move, their characteristic modes of spiritual apprehension, and the views they take of religious phenomena, creating different casts of style and diction, he will infer that the one cannot be identified with the other. Power and majesty, poetic energy and fancy, are scarcely consistent with philosophical idealising, which an emotional tenderness permeates and occasionally conceals. The fervour of the evangelist is not fiery—it is subdued by love. A charm lies in the writings of the one; a solemn grandeur in those of the other. The one presents refinement and philosophical cultivation; the other, mysterious sublimity and

sensuous symbolism. We need only institute a comparison between certain phenomena in the Apocalypse and fourth gospel to see how unlike they are. Thus the long series of plagues which precede the coming of the Lord is introduced by demoniacal beings, such as scorpion-like locusts, or lion-headed horses, with fire, smoke, and brimstone issuing out of their mouths, and strange riders, in an objective and artificial imagery unlike the spiritual idiosyncrasy of the evangelist.

Agreeably to these observations, it should be noticed that the doctrinal type of the book before us is not exactly the same as that presented in the fourth gospel and first epistle. Thus in *eschatology* it has a first and second resurrection—a thing unknown in the writings of the N. T.; for, though the evangelist speaks of a twofold resurrection (v. 21-30), the second only, which occurs at the Lord's return, is literal; the other being a spiritual resurrection from sin (v. 24-27; 1 Epist. iii. 14). In like manner, the idea of antichrist differs in the Apocalypse and first Epistle of John. The antichrist of the former is a notable instrument of Satan; but the antichrist of the latter is a concentration of many antichrists—one who destroys Christianity from within by corrupting its fundamental faith. The antichrist of the Apocalyptist is outside Christianity, hating both Jews and Christians. False prophets are termed antichrist in the first epistle.

The doctrine of *redemption*, so far as allusions to it in the book enable us to judge, is more Jewish than in the gospel. It is represented by the strong figure of *washing in blood*, which is of Jewish origin; but certain terms, such as ἀρνίον, ἀγοράζειν, δωρεάν, κλητοί, resemble Paul's manner. Christianity at first was strongly impregnated with the O. T. ideas of sacrifice and atonement, which were more sensuous than spiritual; and some time was required for leavening it with the pure essence of the gospel. The love of God in sending his Son into the world to be the life and light of men, quickening within them that higher principle which sin debases, broke through the grosser conceptions of propitiation which the Jewish Christians inherited from their fathers, only by degrees.

Though the Apocalyptist wrote in Greek, he followed Hebrew sources, especially the later prophets, Daniel, Ezekiel, Zechariah, perhaps Enoch. So thoroughly Judaic is he, that he is not without examples of what was afterwards developed in a bad form in Judaism under the name of Kabbala; as in xiii. 18, where the mysterious number of the beast sounds as *Gematria*. The sacred number seven, which enters into the plan of the book, as well as that of three, savours of Kabbalism. So does the description of the heavenly Jerusalem in the twenty-first and twenty-second chapters.

The views of angels, demons, and spirits are also Jewish, unlike those of the fourth gospel. These seven spirits are said to be before the throne of the Almighty (i. 4), meaning the seven highest spirits; an idea taken from the Zoroastrian religion into the Jewish, as we see from Zech. iv. 2-7; but modified in the Hebrew conception, so that in our book the seven spirits are representatives of the one spirit of God. So intimately are these seven associated with the Supreme, that grace and peace are invoked from them equally with him. An angel interpreter attends to John. Seven angels sound trumpets; and the same number pour out

vessels filled with the divine wrath. An angel comes down from heaven. An angel stands on the sea. An angel has a book in his hand. An angel takes up a great stone. An angel of the waters is spoken of, etc. Lücke correctly remarks, that the fourth gospel employs angels only on moral and spiritual errands; while the Apocalypse makes them preside over the phenomena of nature. It is inappropriate to quote, as Stuart does, the analogous case of the angel at the pool of Bethesda in proof of the gospel representing angelic control over the material elements; because the passage is spurious. In like manner, Hengstenberg adduces the place, without the least hint of its later interpolation. We cannot agree with Stuart's assertion, that there is no case in the Apocalypse which is not justified by analogy in the Hebrew Scriptures; for where does the O. T. present an example of an angel taking up a great millstone and casting it into the sea? Thus angelology plays an important part in the book, showing its likeness to the apocalyptic Daniel and Enoch. We admit that the envelope of visions in which the author clothes his Messianic hopes required some such spiritual machinery as that of angels; but they are introduced so frequently, and the representations of them are so peculiar, as to show another idiosyncrasy than the evangelist's. The view of demons is also singular. Out of the mouths of the three confederate beasts three unclean spirits issue; and these are termed the spirits of demons, seducing the kings of the earth by bringing them to join the antichristian leader in his attack upon Rome. In like manner, Satan is conspicuous in the Apocalypse. He is even chained and loosed again. He is the great dragon, the arch-enemy of the faithful. He is at the head of other spirits; is cast out of heaven with them to the earth; and is said to have accused the brethren before God continually. Some of these ideas resemble Pauline ones; but they are unlike anything in the fourth gospel or first epistle.

The language of the book is very different from that of the fourth gospel. It departs materially from the usual Greek of the N. T., presenting anomalies, incorrectnesses, peculiar constructions, awkward disposition of words, which cannot be paralleled. These originate in Hebraism. The Greek is so moulded by Hebrew as to follow its constructions. With respect to *cases*, the unusual license is taken of discontinuing the genitive case for a nominative, as in iii. 12; xiv. 12; or the accusative for a nominative, as in xx. 2. In vii. 9 the nominative is discontinued for the accusative.

Greek usage is often violated in gender and number, as in vi. 9, 10; ix. 13, 14. Neuters plural take plural verbs (xi. 18; xv. 4, etc.); ἀγνός is both masculine and feminine in xiv. 19, so is ἥρις. In xii. 5 ὁὖς ἀρσεν is merely an imitation of בְּנֵי זָכָר.

In regard to verbs, the Apocalyptist uses the future like the Hebrew imperfect in a frequentative sense, as at iv. 9-11. The participle stands for a finite tense in i. 16; while the present passes into the future in i. 7; or into the past, xii. 2-4. The future and past tenses are strangely mixed in xx. 7-10.

In the syntax of nouns, the plural regularly stands for the dual, as in xii. 14.

The genitive case is almost always put after a noun to explain it, in the manner of an adjective;

and a number of genitives are linked together, as at xvi. 19.

Two nouns coupled together by a conjunction have each its own suffix, as in Hebrew (vi. 11; ix. 21).

The repetition of a preposition with each connected genitive often occurs (xvi. 13).

The genitive absolute seems wanting, unless there be an example of it in ix. 9, which is doubtful.

Ἐν is almost always prefixed to the dative of the instrument, as in vi. 8.

The usage of the writer in prepositions and conjunctions is quite Hebraised. Thus we have the nominative after ὡς where another case should have stood (iv. 7). This is from ב prefixed.

The verb διδάσκειν is followed by a dative case (ii. 14) following the Hebrew; ἐδικαίειν has ἐκ with a genitive (vi. 10), equivalent to נָקַץ followed by the prefix ב; and ἀκολουθεῖν has μετὰ with the genitive (vi. 8), like הָלַךְ אַחֲרַי. Greek and Hebrew constructions are remarkably intermingled in xvii. 4.

These remarks will make it appear that the language differs from that of the evangelist. Grammatically irregular and syntactically harsh, it is so thoroughly Hebraistic as to neglect the usual Greek rules. 'The solecisms that appear in the Apocalypse,' says Winer, 'give the diction the impress of great harshness, but they are capable of explanation, partly from anacoluthon and the mingling of two constructions, partly in another manner. Such explanation should always have been adopted instead of ascribing the irregularities to the ignorance of the author, who, in other constructions of a more difficult nature in this very book, shows that he was exceedingly well acquainted with the rules of grammar. For most of these anomalies, also, examples may be found in the Greek writers, with this difference alone, that they do not follow one another so frequently as in the Apocalypse' (*Grammatik, fünfte Auflage*, pp. 273, 274). This language is too apologetic, and can hardly be justified. Still more apologetic and one-sided are the details which the same scholar gives elsewhere (*Exegetische Studien*, i. p. 154, *et seq.*), in attempting to justify and parallel what cannot be done to the extent he supposes.

It is unquestionable that the Greek of the Apocalypticist is worse than that of any N. T. writer—the kind of diction which might be expected from an 'unlearned and ignorant man,' as John is called in the Acts (iv. 12). But in the use of Hebraisms he is at home. His Rabbinic mode of expression, though artificial, is good. His Palestinian education qualified him for Rabbinical forms; as well as his study of the O. T. prophecies. This applies to the synoptists and Paul; but not to the same extent. The apostle was undoubtedly a 'learned man' in relation to the sacred literature of his own nation, his knowledge of the O. T., and probably of the Septuagint: the epithets ἀγράμματος and ἰδιώτης, so far as they are correct, we restrict to his Greek culture and facility of writing in the new language, which Hebrew and Aramaean had almost supplanted.

After all the endeavours to find analogies to the linguistic peculiarities and departures from good Greek usage in the book before us, either in the

Greek Testament itself or in classical Greek writers, it presents anomalies of such a nature and in such number as to separate the author widely from the evangelist, and from any N. T. author. Such Hebrew-Greek stands apart and unique.

The apologies which the peculiarities in question have cost some critics are seen in Professor Stuart, who has often misapprehended the true state of the question, or wrapped it in a multitude of irrelevant words. Yet he is often foiled, and has to confess the uniqueness of an expression in the book, as in xxi. 21, where ἀνὰ εἰς ἑκάστος cannot be paralleled; and in ii. 13, where he would drop ὅς out of the text. 'Is not the Apocalypse,' asks the same critic, 'the production of an excited state of mind, and of the most vivid feeling? Is it not prophetic poetry?' Granted; yet the answer is insufficient to explain the phenomena. The same reasoning applied to the O. T. prophets, which the critic would surely allow, justifies the expectation of frequent and peculiar Hebrew constructions in them. Do they not write the same kind of Hebrew as the sacred historians and poets? Does any of them violate Hebrew construction extensively because he was in an excited state of mind? He does not. We must not deprive the Apocalypticist of conscious calmness when he wrote. Indeed the very fact of his writing in Greek and yet following Hebrew so much—the fact of his knowing both the Septuagint and its Hebrew original—mitigates against the peculiarities he exhibits.

The phenomena now stated should be attentively considered in their bearing on authorship. Some, perhaps, will still think that they are compatible with the hypothesis of the same writer. But when we find an absence of the evangelist's characteristic expressions, or of such at least as suit Apocalyptic ideas; or when we see the Apocalypticist having favourite words and phrases foreign to the evangelist, and not inseparably united with the Apocalyptic circle of expressions, the argument is strengthened against identity of authorship. In like manner, the new form given to the evangelist's terms, and the new sense they are used in, show diversity. Thus the Apocalypticist uses τὸ ἄρτιον, which never occurs in the gospel, where ὁ ἄμνος τοῦ θεοῦ appears. Ἄρτιον, indeed, is found in gospel xxi. 15; but that chapter does not belong to the same writer. The verb νικᾶν is common to the gospel and the Revelation; but in the former a definite object accompanies it, such as *the world, the evil one*, while the latter uses it absolutely. The gospel has ψεύστης, the Apocalypse ψεύδης. The latter writes Ἱερουσαλήμ, the former Ἱεροσόλυμα. Ἰδοὺ of the Apocalypse is ἴδε in the gospel.

These differences—doctrinal, theological, linguistic—are variously explained by apologists, especially by Donker-Curtius, Kolthoff, Dannemann, and Stuart, who either try to find the same or similar words in the gospel and first epistle which are in the Apocalypse, overlooking the characteristic ones in each.

Three causes are commonly assigned for all the diversities—viz., difference of subject, of age in the apostle, and difference of mental state. Of these the first should be allowed to have its weight. The Apocalypse is in the main a prophetic book. It portrays the future in poetical colours. Yet the epistles to the seven churches are of the same character with the First Epistle of John, and should be a fair object of comparison. And their diversity

is more prominent than their likeness. A different tone and style appear. The compositions in question are *characteristically* different.

We place little reliance on the argument of age, though Olshausen and Guericke think it weighty. Written, as they believe, twenty years before the fourth gospel, the Revelation shows marks of inexperience in writing, of an ardent temperament, and of youthful fire. It is like the first essay of one expressing his ideas in a language to which he was unaccustomed. But the author must have been about sixty years of age when he wrote; a time when inexperience and youthful fire are past. A comparison of the earlier and later epistles of St. Paul shows the insufficiency of time to account for the characteristic differences between the evangelist and Apocalypticist. Nothing but the hypothesis of two persons can explain them; and Kolt-hoff's (*Apocalypsis Joanni apostolo vindicata*, etc., p. 110) reference to the earlier and later epistles of St. Paul as an analogy is beside the mark.

Others find the chief cause of diversity in the author's phrase *ἐγενήθη ἐν πνεύματι*, *I was in the spirit* (i. 10). Hengstenberg supposes that he was in an *ecstatic* state; or at least in a passive condition of mind; the recipient of things communicated. The visions and their colouring were *given*, says Ebrard; whereas in the fourth gospel and epistles John's own reflectiveness appears. His mind was active in the latter, but passive in the former. We object to this assumption, because it deprives the author of his own consciousness, and is contrary to the analogy of prophecy. The O. T. seers were never without consciousness, even in their highest moments of inspiration. Their own individuality appears throughout. Each has his characteristic peculiarities of conception and language. So must the author of the Apocalypse have. Ezekiel and Zechariah had visions; yet their own reflectiveness is manifest. We must not convert our writer into a machine or unconscious agent in the hand of the Spirit. If, indeed, the Apocalypticist had written down the visions at the very time he received them, the idea that he was overpowered by the substance of the communications, and had little or no regard to readers, might appear more plausible; but the fact of their not being written in Patmos shows that their present form proceeds from later and calm conception. How then could he fall back into the Aramæan colouring which was natural to him if his mind had been divested of it long since? Would he not have retained his proper manner?

In a question like that before us it is fortunate to have the decided weight of external evidence in favour of the apostolic authorship of the Revelation, along with the preponderance of the internal. The entire cast of the work, all its distinguishing features of conception, delineation, style, diction, manner, harmonise with the historical tradition of authorship. And it is clear that the evangelist is not identical with the Apocalypticist, because their minds are of a different complexion and grasp. The whole method of their description varies. The writer of the present book departs from the usual syntax. Whatever deductions be made on the ground that the work is prophetic poetry, not prose, that the author was a younger man when he wrote the Apocalypse, that the character of his inspiration was higher, that his object was different, that he should not be restricted to the same circle of ideas and language, enough remains to show another. There

are two idiosyncrasies; characteristic differences which occasional points of coincidence do not efface. Apologists have lessened the diversities; but their ingenuity has not succeeded in removing or fairly accounting for them. Our conclusion is, that as John the apostle wrote the Apocalypse, he did not write the fourth gospel. Had John the presbyter been a disciple of the apostle some might have attributed the authorship of the Apocalypse to him with greater probability, because John the presbyter might have thought it justifiable to introduce his instructor as the speaker, as he wrote in his manner. But the one John was not an immediate disciple of the other. According to Papias, John the presbyter was a disciple of the Lord. Hence most of the critics who deny the apostolicity of the book content themselves with the indefinite conjecture that it proceeded from a disciple of the apostle. But Credner and Ewald attribute the work to John the presbyter. No probability belongs to the hypothesis of Hitzig (*Ueber Johannes Marcus und seine Schriften*, 1843), that the writer of the Revelation is John Mark, from whom the second gospel proceeded. His arguments are mainly based on analogies of language and construction, which weightier phenomena overpower.

II. *Time and place of writing.*—There is some difficulty in ascertaining these. The prevailing opinion has been, that the book was written A. D. 95 or 96, at Patmos, under Domitian; or, after his death, in Nerva's reign. This accords with the tradition that John was banished to Patmos towards the close of Domitian's reign, where he had the visions described in the book. The fact of his being sent to Patmos is mentioned by Irenæus, Clement of Alexandria, Tertullian, Origen, Eusebius, and Jerome. Irenæus calls the emperor Domitian; but Clement and Origen merely style him *the tyrant* or *king* of the Romans. Epiphanius makes him Claudius; the Syriac version of the Apocalypse Nero; with which Theophylact and the younger Hippolytus (of Thebes) agree. The author of the *Synopsis de vita et morte prophetarum, apostolorum et discipulorum Domini*, said to be Dorotheus, bishop of Tyre, names Trajan. The oldest form of the tradition is that in Irenæus—viz., that the apostle saw and wrote the vision towards the end of the reign of Domitian, in Patmos, to which he had been banished. Later writers made a distinction between the time of the banishment and that of the composition, which latter was referred to Ephesus, after the emperor's death. The tradition is neither consistent nor weighty. It will scarcely stand the test of criticism. But we cannot take the view of those who think that it originated in the words of i. 9. Probably the basis is historical. The apostle was compelled to withdraw to Patmos for a time. At first sight it might appear doubtful whether he was really banished thither; but the expressions, 'for the word of God,' 'for the testimony of Jesus Christ,' compared with their use in vi. 9; xii. 11; xx. 4, can only imply banishment or persecution, and will not bear a milder sense. In the absence of external evidence, internal considerations come to our aid. The book itself shows that Jerusalem had not been destroyed, for if it had the catastrophe could scarcely have been unnoticed. An event pregnant with momentous consequences to the cause of truth and the fates of the early Christians, would have been surely mentioned. There are distinct allusions to

the *impending* catastrophe. We see from ch. xi. 1-14, that the holy city, with the temple, was not destroyed; for it is stated there, that only a part of the city should perish, while the temple is supposed to be still standing. Had both been destroyed, the fact would have been treated at some length. This is confirmed by xvii. 10, 'And there are seven kings; five are fallen, and one is, and the other is not yet come,' *i. e.*, when the writer lived five emperors had already fallen, the sixth was reigning, and the other had not yet come. The series begins with Augustus, so that Galba is the sixth, 'the king that is.' Augustus, Tiberias, Caius, Claudius, Nero, are the five fallen ones: the seventh coming one who must continue a short space means the returning Nero, as appears from xiii. 3, 14. Other critics begin the series with Julius Cæsar, and fix upon Nero as the sixth, under whom John wrote. Galba is then the seventh, and he reigned but seven months, according to the prophecy. But this reckoning is faulty, since Julius Cæsar was not an Augustus; nor was it till the time of Augustus and his successors that the Romans ruled over Jerusalem. Others begin with Augustus, but make the sixth Vespasian—Otho, Galba, and Vitellius being passed over. It is arbitrary to omit these names. The most probable view is, that the book was composed under Galba, after Nero's death, which agrees best with 'the beast that was and is not and yet is' (xvii. 8). The *οὐκ ἔστι* shows that he who is spoken of is no longer living; and it is little better than special pleading in Stuart to refer it to the future, on the ground that the prophets employed the present for the future in predicting. The author is not predicting here, but is simply explaining who the beast is.

The place in which the apostle wrote was Asia Minor, probably Ephesus itself, to which he had returned from Patmos. The visions were received in the barren island, and afterwards committed to writing at Ephesus, as is probable from the past tense of the verb in i. 9 (*ἑγενετο*). This is favoured, among other circumstances, by the epistles being addressed to the seven churches.

On the basis of Irenæus's testimony, it has been very generally believed that the book did not appear till Domitian's reign. The principal arguments adduced against an earlier date, such as the time of Galba or Nero, are the following:—

Nero's persecution did not extend to the provinces; the Nicolaitanes did not form a sect as early as 68 or 69, whereas they are spoken of as such; and the condition of the seven churches shows that they had been planted a considerable time.

If it were necessary to speak of the extent of the Neronian persecution, we should refer to Tertullian, who mentions *the laus* (commentarios) of Nero and Domitian against the Christians; an expression, says Milman, too distinct to pass for rhetoric even in that passionate writer. And Orosius expressly testifies to its extension beyond Rome.\* While the spirit of hostility was active in the metropolis, we may fairly infer that the Christians in the provinces did not escape. Whatever affected the centre with terror, would affect the more distant parts of the empire. If perse-

cution raged in Rome, it must soon have found its way to Asia Minor, as well as the various places where Christianity had been planted; for the emperor's example was infectious. That a martyr called Antipas had suffered death at Pergamos even in Nero's reign need not excite surprise. But it is not necessary to assume that he was slain under that emperor. Individual Christians may have suffered in the provinces even before his day. Heathen persecutions in Asia Minor awakened in the minds of Christians the hope of Christ's speedy reappearance. The writer beheld the coming struggle. Heathen magistrates, as well as Jews, were ever ready to put forth their enmity, even when the edicts of emperors forbade injury to the persons of Christians, and their hostility increased.

As to the Nicolaitanes, Irenæus speaks of such a sect in his time, deriving their name from the deacon Nicolas (Acts vi.), and referring the allusion in the Apocalypse to it. The sect of the Nicolaitanes, mentioned by Clement of Alexandria, is probably not the same with that here. And there is no proof in the book itself that the Nicolaitanes formed a sect so early. Their doctrine was not speculative but practical—a kind of antinomianism which encouraged sinfulness of life. The writer finds a certain resemblance between them and the morality of Balaam, which led to heathenism. The Balaamites and Nicolaitanes were not two *heretical sects*, as some have supposed; but the lax morality of the latter resembled that of old Balaam. They were a class of men within the Ephesian church, not a *sect*. It does not seem probable that these Nicolaitanes were the adherents of Pauline free grace, as the Tübingen critics usually suppose; or that John wrote with a polemic object against Paul's doctrine. The name is symbolical, formed with reference to the word Balaam. Still farther, a close examination of the language addressed to each of the churches will show its appropriateness even in A.D. 68 or 69. About A.D. 61 the church at Ephesus is commended by Paul for the faith and love of its members; which is consistent with the language of Apocalypse (ii. 2, 3); and both are compatible with the charge that they had left their first love. In the lapse of a very few years, amid trying circumstances, the ardour of new converts is liable to cool. The patience for which they are commended refers, as the context shows, to the temptations they suffered from corrupting teachers, and the difficulties attendant on the faithful exercise of discipline in the church. The case of the church at Smyrna was similar.

III. *The class of writings to which the Apocalypse belongs.*—Paræus seems to have been the first who thought it a prophetic drama. A like opinion was afterwards held by Hartwig, who terms it a symbolical dramatic poem. This view the genius of Eichhorn elaborated with much ability. Hence the hypothesis of its being a regular dramatic poem is commonly associated with his name. He makes the following divisions: the title, i. 1-3; the prologue, i. 4-iv. 22; the drama in three acts, preceded by a prelude, iv. 1-xxii. 5. The prelude consists of iv. 1-viii. 5. The first act (viii. 6-xxii. 17) sets forth in three scenes the destruction of Jerusalem, the over-coming of Judaism, and the church's weak condition after that catastrophe. The second act (xii. 18-xx. 10) represents the downfall of heathenism. The third act (xx. 11-xxii. 5) describes the

\* Romæ christianos supplicii et mortibus affecit, ac per omnes provincias pari persecutione cruciari imperavit.—*Adversus Paganos*, lib. vii. 7.

heavenly Jerusalem descending from heaven. The epilogue (xxii. 6-11) contains a threefold address—that of the angel, of Christ, and of John (*Commentarius in Apocalypsin Joannis*, vol. i. p. 19, *et seq.*) This theory needs no confutation at the present day. However ingenious, it is baseless. When Stuart calls the poem an *epopee*, the name is as objectionable as that of drama.

IV. *The object for which the apostle wrote* was to set forth the immediate coming of the Lord, in order to support his fellow-Christians under calamities already endured and still impending, to foster hope, and discourage apostasy. The world had shown its opposition to the truth, and would exhibit still greater hostility. Hence believers in Christ are encouraged to look for his speedy reappearance, and to hold fast their profession. By steadfast adherence to the gospel, the redeemed should receive the blessed reward which their Master has to bestow. The circumstances seemed sufficiently alarming. The misery of war, the terrors of frequent executions, the perplexities of political affairs, anxious hopes and fears of the future, had produced great excitement among the Christians; such of them especially as had not attained to the spiritual views of Paul, in whose sight Judaism had become a thing of the past. The majority looked for a great revolution, which, beginning with the purification of Jerusalem and the downfall of Rome, should issue in the return of Christ, the resurrection of the dead, the judgment of the world, and the establishment of the Messianic kingdom. Their hopes were raised to the highest pitch. Christ indeed had come once; but that advent fell short of their ideal desires. The humbleness of his person and claims disappointed many. They sighed for another and more glorious manifestation, as they had been taught to believe. The heathen seemed to have concentrated their strength against the followers of the new religion. Calamities already endured appeared the prelude to greater. The atmosphere was lowering. Well might the disciples of Jesus in Asia Minor tremble. Some had fallen away, needing repentance and return to their first love. The weak had yielded to temptation. Hence it was necessary to reprove as well as console; to censure as well as to encourage. The central idea of the book is the Lord's second coming, forming both its prophetic and hortatory character. Christ will soon appear to destroy his enemies and reward his followers in that new kingdom which he is to establish. The time is at hand, and therefore there is no reason for despair. The period of endurance is short. Nothing was better fitted to make them steadfast in the faith. The great event that formed the consummation of their hopes, the expected redemption to which their weary souls turned for solace, was nigh. The suffering may have sorrowfully thought that they should not be able to stand the shock of their fierce enemies; but the writer's views point to the triumph of truth and righteousness. Exalted honours, glorious rewards, awaited the Christian soldier who endured to the end. The patient believer should receive a crown of victory, the Redeemer's approval, everlasting happiness in Messiah's peaceful kingdom on earth. With him he should reign continually. Thus the book arose out of specific circumstances, and was meant to serve a definite object. When the lot of the apostle was cast in troublous times, what better theme

could he have to strengthen and comfort his fellow-disciples than the speedy reappearance of their Lord?

But what shall be said of the writer's belief in the speedy advent of his Lord a second time? Was he mistaken about the nearness of the event in his day? Events have shown that he was. 'I believe,' says an able lecturer on the book, 'that the time of which St. John wrote was at hand when he wrote. I as little suppose him to have been mistaken about its nearness, as I suppose him to have been a wilful deceiver.' If this be correct, Christ's coming is taken in an unnatural and allegorical sense, for it is explained away into the events connected with Jerusalem's destruction by the Romans, and the subsequent triumph of Christianity; whereas the writer of the Apocalypse merely connected the advent with that catastrophe. He did not suppose, any more than St. Paul, that the one was identical with the other; or that the coming was aught else than literal and physical, for the purpose of destroying his enemies, and setting up a new kingdom in renovated Jerusalem. Far be it from us to entertain the idea that the sacred writer was a wilful deceiver. But it is not inconsistent with his apostleship to believe that both he and the rest of the early disciples supposed the time of their Lord's return to be near at hand. St. Paul's language in the First Epistle to the Corinthians shows that he himself expected to be then alive. Not till a considerable time after the apostles did the adherents of Christianity generally begin to interpret the coming of the Lord spiritually—a fact which had an unfavourable influence on their judgment of the Apocalypse. Millenarians there still were who threw the predicted advent into the future; but the spiritual view prevailed over the carnal. Primitive Christianity was corrected and developed by the consciousness of the church in which the divine Spirit ever dwells. This spiritual development appears already in the fourth gospel, whose scope and genius are adverse to a speedy second advent, like that of the Revelation.

If such be the principal aim of the seer, we ought not to look for secular history in the book. The kingdoms and nations of the world are not described in it. The genius of Christ's kingdom differs from that of earthly ones. It advances independently of, and frequently in opposition to them. The Apocalypse does not contain a syllabus of the world's history, or even of the Roman empire. Neither does it present a history of the church. It relates to a great event which the author thought should soon happen. His horizon was limited and dim. His glances at the immediate past are brief. He does not dwell upon the present, but alludes mainly to the near future, in which a mighty phenomenon filled the sphere of his vision—the coming of the Lord Jesus. Catastrophes and judgments usher in the mysterious drama—the inauguration of the Redeemer's triumph.

These remarks are fully sustained by the prologue and epilogue. 'Blessed is he that readeth, and they that hear the words of this prophecy, for the time is at hand.' 'The revelation of Jesus Christ which God gave unto him, to shew unto his servants things which must shortly come to pass.' 'He which testifieth these things saith, Surely I come quickly. Amen. Even so, come, Lord Jesus.'

V. In relation to its general structure, the work

is disposed in a symmetrical but artificial plan, a knowledge of which is the safest guide towards a right apprehension of the vision-drapery. *Seven* is the leading number throughout. There are seven spirits before the Father's throne, seven epistles to seven churches, seven stars, seven candlesticks, seven seals, seven trumpets, seven vials, seven heads on the beast, seven thunders, seven eyes, seven horns, seven angels. Subdivisions of this principal number are three and four. The phases of the future are three: seals, trumpets, and vials. The first four scenes in each of these are closely connected, being separated from the following by a concluding figure. The seventh trumpet brings the description of three enemies—the dragon, the beast with seven heads and ten horns, and the other beast. The number seven is also subdivided into  $3\frac{1}{2}$ , or a time, times, and half a time (xii. 14). Thus some numbers play an important part in the arrangement, and determine the general method. The interpreter must carefully distinguish between such as are normal and those that are subordinate. Stuart has made too much of this principle of *numerosity*, as he terms it, without discriminating the numbers properly. Instead of making *three* the most conspicuous in the author's plan, he should have made it *seven*. *Three* and *four* are less prominent, being parts of seven. As to *ten* and *twelve* they do not belong to the general disposition. Züllig is right in assigning the cardinal number; and his accuser (Stuart) is wrong.

VI. We have now to speak of the *contents*.

The Apocalyptic picture consists of a series of visions very like those of Daniel. The descriptions, colours, symbols, figures, are taken from the O. T. prophets, especially Zechariah, the author of Daniel's book, and Ezekiel. The second Esdras, and perhaps the book of Enoch, supplied various ideas. John lived and breathed in the O. T. prophecies of a Messianic future. His originality lies in the combination of scattered ideas, and in the artificial construction of the book where there is still a patent unity. He revises the existing Apocalyptic elements, expands the great Hebrew theocratic conception, adapting it to the progress of events; and forms all his materials, borrowed or otherwise, into a majestic whole, vitalised with the fiery breath of his genius.

The future is represented as written in a book with seven seals which Christ alone could open; and the seer is permitted to have a view of its contents. As the seals are successively broken, calamities befall the righteous, putting their fidelity to the test. After the sixth, the believing people are sealed themselves with the name of God, for security against subsequent danger. At the opening of the seventh seal, seven angels with trumpets appear, announcing one after another various punishments on the evil world. On the sounding of the sixth trumpet, the people of God, or the elect, are concealed in the sanctuary at Jerusalem, and Israel is purified. The seventh trumpet is followed by a description of the hellish powers that oppose Messiah, with the announcement of their destruction. This is succeeded by the final catastrophe, or the outpouring of the vials of divine wrath, and the decisive battle. Rome falls by the returning antichristian emperor, who in his turn falls before Messiah; the devil is chained for a thousand years, at the end of which he is let loose

and besieges the holy city, but is cast into a lake of fire and brimstone. Then come the resurrection, the general judgment, and eternal blessedness in the new Jerusalem.

Thus the seals, trumpets, and vials, are successive phases in the development of the great drama. Though in some respects parallel, they increase in power as they near the final catastrophe. We need scarcely say, that the Messianic hopes of the seer were not fulfilled as his fancy and faith projected them. Yet we cannot affirm that he uttered them as mere poetry, without all belief in their objective fulfilment. The Jews in Jerusalem were not separated and purified, as John anticipated. All were destroyed, including the holy sanctuary and the city itself. Antichrist did not return from the east in the person of Nero to devour and lay waste. Paganism indeed fell, and Christianity triumphed; but not so soon as represented; nor in that way. The first and second resurrections, with their associated events, did not happen. Nor did Christ come personally, destroying all opposing powers and persons in order to set up his everlasting kingdom. Yet there is spiritual truth in some of these descriptions. Christ came again by his spirit, and is ever present with his people. His religion conquered heathenism. Imperial Rome fell. But the reign of blessedness has yet to begin. The non-fulfilment of the seer's Messianic hopes arose in part from the fact that they were essentially Jewish-Christian. Had they been of the purely evangelical type they would have presented a different aspect. Without objective sensuousness or close imitation of Daniel's visions, to which they are the sequel, they would have grasped the living power of the gospel as Christ preached it when he was on earth, accompanied with the Spirit's operation on the hearts and lives of men; and above all, the love of God would have animated his pen—that great motive-power which is to regenerate mankind. But this implies an ulterior development of Christian truth totally divested of the husk of Judaism.

The book may be divided into three parts—viz., the introduction, consisting of chapters i.-iii.; the body, made up of a series of visions, iv.-xxii. 5; and the epilogue, xxii. 6-21.

1. (i.-iii.) This portion contains the inscription (i. 1-3) and the dedication (i. 4-8), with the direct address and letters to the seven churches of Asia (i. 9-iii.)

2. The body of the work is naturally divided into two parts, iv.-ix. and x.-xxii. 5.

3. The epilogue may be subdivided into four pieces—viz., the conclusion of the visions, xxii. 6-9; the close of the prophecy, xxii. 10-17; the seer's final remarks, xxii. 18-20; and the epistolary termination, xxii. 21.

As the early Christians believed that Christ would come speedily, and associated with that great event the destruction of his enemies, the prophet paints the overthrow of heathenism, which he identifies with the Roman empire. And that empire again is symbolised by its head, Nero, who had recently fallen by his own hand. The story that Nero was not really dead, but had retired to the Euphrates, whence he returned with the Parthians, is here drawn by a Christian imagination. He is antichrist. The interpretation is at least as old as Commodian (A. D. 270). The Roman power is personified and embodied in Nero, who should reappear in the character of antichrist.

The great persecutor of the Christians at that particular crisis was readily identified with antichrist, because he elevated himself against Christ; and had struck terror into the pious by his cruelties. According to this view, the Apocalypse exhibits the triumph of Christianity over paganism; which is equivalent to its *universal* victory. There is a gradual preparation for the catastrophe which ushers in the triumph. Dramatic scenes precede the consummation; so that the reader is led on step by step to the final issue.

Chapters iv.-vi. refer to the book having seven seals, which none but the Lamb could open. These seals denote the incipient act of the judgment. After the seventh seal, the sounding of seven trumpets takes place, heralding the approach of the judgment (vii.-ix.)

The tenth chapter is a formal introduction to the following division or the second part, xi.-xxii. The sounding of the seventh angel-trumpet is naturally expected, with which the judgment actually begins; yet there is another delay instead. The end can only take place on earth. Hence the scene shifts from heaven to earth. A mighty angel descends from heaven terrifying all with the thunder of his voice (x. 1, etc.) The eleventh chapter forms an episode. Before the seventh trumpet, Jerusalem is warned, and exhorted to repent in time. Moses and Elias, significant of the law and the prophets, testify in blood as the witnesses of the Lamb.

The next vision describes the enemy of the church, or the beginning of the executing of the judgment (xii. xiii.), which is succeeded by the vision of the seven vials, that is, the wrathful judgment itself (xiv.-xvi.), issuing in the fall of Babylon the metropolis, or the final catastrophe on heathenism (xvii.-xix.) The last vision relates of the new Jerusalem, or the consummation of the judgment (xx.-xxii.)

It is worthy of remark that the first four seals are separated from the last three. Time is gained by the episode of the vision of the souls of Christian martyrs whose cry for vengeance on their heathen persecutors is not answered immediately. After the sixth seal is opened, it would appear that they have not long to wait; since the heathen rulers and magistrates flee from impending retribution. Even now, however, the dominion is not given to the saints. The scene shifts, and a new vision is interposed. The people of God are sealed. At the opening of the seventh seal the end is still deferred. There is a short period of breathless expectation. The import of the last seal is unfolded by means of the seven trumpets and seven vials, each bringing the final catastrophe nearer and nearer. This repeated postponement of the end serves to keep expectation alive, and shows the deep feeling of the prophet.

A brief notice of some leading features will throw light upon the scope and meaning of the book.

First, The nature of the connection between the 11th and 12th chapters is difficult to discover. The 10th chapter forms a transition to the second part of the work, and the 11th intervenes. Hence the little book mentioned in x. 1 is the same as the book in v. 1. It is open in x. 1, because the seals had been loosed before. It is a *little* book, because its contents are concentrated, as it were, in a focus. What had hitherto been *idea*

and *vision* to the prophet, now becomes historical and actual. The scene shifts from heaven to earth. Hence the seer says in xii. 18 (xiii. 1), 'I stood upon the sand of the sea' (ἐστράθη, not ἐστράθη); whereas he had been taken up to heaven at the commencement of the first part (iv. 1). The preparations for the impending event take place in heaven; but when it is on the eve of being carried into effect, earth must be the theatre.

Secondly, The beast with seven heads and ten horns rising up out of the sea symbolises the Roman power. The seven heads are identical with the ten kings or emperors; and the ten horns are the ten proconsuls, the imperial viceregents in the thirty provinces. The head, slain as it were, yet having its deadly wound healed, represents Nero. The dragon which gave power to the beast is Satan (xiii. 1, etc.) The same beast is depicted in xvii. 3 as scarlet-coloured, full of names of blasphemy. The woman on the beast is the great city Babylon or Rome, the metropolis of spiritual harlotry. The second beast, or the false prophet, which helps the first beast, is a personification of false heathen prophecy, including magic, auguries, omens, etc., supporting idolatrous paganism concentrated in the Roman power.

Thirdly, The number of the beast is said to be the number of a man 666 (xiii. 18). This is made up of the numeral letters קסר נון, *Cæsar Nero* (ק=100, ס=60, ר=200; נ=50, ר=200, ו=6, ן=50, making 666). The shorter form of נר, viz. נר, would make 616, which is a very ancient reading for 666, as we learn from Irenæus. Objection has been made to this explanation that the author writes in Greek not Hebrew; but his style of thought is Hebrew.

Fourthly, After the fourth angel sounded his trumpet, a threefold woe is announced in viii. 13. In ix. 12, it is said that the first woe, corresponding to the fifth trumpet-sound, is past, and that two more are to come. In xi. 14, the second woe is past, and 'behold the third woe cometh quickly.' Yet the third woe is not mentioned afterwards. When or where did it come? or did it take place at all? Hengstenberg affirms that the third woe and seventh trumpet-sound are in xi. 15-19, and explains the point arbitrarily. With Baur we discover the third woe in xvi. 15, 'Behold, I come as a thief.' Thus, the Lord's sudden coming is identical with the third woe.

Fifthly, Some have thought that the 11th chapter describes a catastrophe befalling Jerusalem similar to that which afterwards happens to Rome. In this view the fall of Judaism and the fall of heathenism are leading phenomena in the book. Accordingly Eichhorn, Heinrichs, and others suppose the general theme to be Christianity triumphing over Judaism and paganism. But this is incorrect. What befalls Jerusalem is not a catastrophe or total destruction, but a partial judgment or purifying process; and the scene in which this is described is only a subordinate one in the drama of preparatory phenomena. Jerusalem is not destroyed but preserved. The theocratic seed is spared. Believing Judaism is still an object of the divine favour. The author, himself a Jew, and having patriotic feelings which Christianity did not quench, supposes that the city and outer court of the temple would be trodden down by the heathen for three years and a half—a number taken from the book of Daniel—but that the *sanctum* of the

temple would be spared, and the worshippers in it, during that period. James the Just was there, and other Jewish Christians, praying for the salvation of the nation. This is very different from the fate predicted for Rome, the persecuting and implacable enemy of the Christians. Total destruction awaits the new Babylon. Jerusalem would only suffer in part, and for a season. The holy city would be spared and the faithful inhabitants protected by Jehovah; while the unbelieving Jews would be destroyed. A comparatively small portion (the tenth) of the city falls, and but 7000 of the inhabitants; the majority being saved by penitence. If the event did not correspond to the hopes of the prophet, we ought not to be surprised. Inspiration did not enable the Jewish seer to predict definite events in the future; though his sympathies were right and true. The 11th chapter should not be resolved into mere symbol, as it is by Eichhorn and Stuart.

Sixthly, *The millennium*, or thousand years' reign of the saints, has given rise to much discussion. While a few regard it as past, most consider it still future. Among the N. T. writers the millennium is peculiar to the Apocalypse, though it was not new; for many rabbins held it as Gfrörer has shown (*Das Jahrhundert des Heils*, ii. p. 198, *et seq.*, 210). The common view of the early Christians was, that the righteous and wicked would rise, with a short time intervening, and be judged by the coming Messiah. But John has two resurrections separated by the space of a thousand years. Two resurrections was already a Jewish opinion, and is probably contained in the book of Daniel (xii. 2, etc.); but their separation by a thousand years is new. The chaining and loosing of Satan during the millennium and at the end of it respectively, together with the attack of the heathen powers on the followers of the Lamb, are also singular. Such ideas do not agree well with the Saviour's discourse in the 24th chapter of Matthew; nor are they in perfect harmony with the Pauline passages in 1 Cor. xv. 23-28; 1 Thes. iv. 15-17; 2 Thes. i. 5-10; ii. 3-12. John's description is ideal. The seer gives expression to hopes and aspirations. He paints a subjective state of things for which no objective correspondence in the future should be sought; else a poetical picture will be converted into literal prediction. That it is merely ideal is seen from certain incongruities, such as the risen saints having their camp beside the earthly Jerusalem, and being attacked by heathen nations; as well as from the existence of heathen enemies, after it had been said (xix. 21) that all the inhabitants of the earth were slain.

Seventhly, We need not say much about the period described in the 21st and 22d chapters as that of the *new heavens* and the *new earth*. Most take it to be what we are accustomed to call *heaven*, or the heavenly state; while some, as Hammond, Hug, and Bush, think that it alludes to an earthly flourishing state of the church. The ideas and imagery are taken from Is. liv. 11, 12; lx. 3-11; lxv. 17-20; lxvi. 22. The future renovation of the earth was a prevailing notion of the Jews after the captivity in Babylon. Here the prophet drew from the Deutero-Isaiah in part, and partly from his own imagination. His ideal hopes are, that heaven and earth should become one in the future kingdom of Messiah. Earth becomes heaven, and heaven descends to earth. The holy church of

Christ's faithful ones, in her triumphant state, is the fulfilment of all that was associated with ancient Jerusalem in the Hebrew heart. She is depicted as God's dwelling-place, the holy city, new Jerusalem, the chaste spouse of Christ, the Lamb's wife. This is the highest aim of all Apocalyptic prophecy; the everlasting completion of the mystery of God. The description embodies the writer's prophetic ideas respecting the consummation of the Christian church; or, in other words, the everlasting happiness of the righteous; and is largely ideal. To attempt to find particulars corresponding to the figures employed, would be to convert poetry into prose—the subjective into the objective. The conceptions of the seer should be left in their indefiniteness, else their beauty vanishes. No mystical meaning lies in the details. Elements expressive of magnificence and splendour combine to aid the rhetorical beauty of the composition. A new Jerusalem symbolises a new state of things; and all the ideas of earthly greatness and excellence entertained by the Jews were centred in their beloved city.

VII. The question of authorship has been usually thought to affect that of *canonicity and value*. Yet the book may not have proceeded from an apostle, and be equal in value to his acknowledged production. Luke was only an evangelist; yet his writings are justly in the N. T. canon. It is not of essential moment that the Revelation should be written by John the son of Zebedee. The value does not depend so much on the canonicity as on the contents. Degrees of excellence attach to the canonical writings. We are far from denying that *authorship* is of consequence; but it is not of the highest. The evangelist who wrote the fourth gospel and John the apostle would necessarily write differently, because their mental development was unequal. Inspired by the divine Spirit, their ideas, and the modes of expressing them, might still differ. Apostles themselves were not equally gifted. The Apocalypse is not of the same authority as if it had been written by Paul. The Judaic texture it bears, the story respecting Nero coming back from the east with a Parthian army after he had taken away his own life, and the part which that emperor occupies in the Apocalyptic prophecy generally, do not consist with Pauline sentiments. The inquirer feels that the more he examines, the stronger is his belief that the book neither breathes the same spirit as that of the fourth gospel, nor strictly accords with the church's destination. The proper evangelical element, which we see in Matt. xxiv. 14, Rom. xi. 25, is in the background; and the general tone of the work clashes with Mark xiii. 32, Matt. xiii. 31-33. Thus the inspiration of the writer was not so high as that of St. Paul. The book occupies a less philosophical standpoint than the fourth gospel or Paul's epistles. Yet it has exerted, and will continue to exert, a great spiritual influence upon mankind. The effects of a certain moral expression in its symbolical descriptions are decided. Much value belongs to its prophetic utterances in moving and strengthening the soul; in bearing it upward to the throne of God amid suffering, sorrow, and persecution; in attracting its sympathies towards the faithful followers of the Lamb; and in exciting aspirations which can only be realised in the new Jerusalem gorgeously painted at the close. The general tenor of the work is elevating. Alluring

promises console the righteous: awful warnings deter them from unfaithfulness, to their vocation: the vengeance of the Almighty appals the wicked. The grandeur of the book impresses the spirit most forcibly, urging it onward in the difficult path of duty with the hope of a glorious crown, a golden harp, celestial fruits, refreshing waters of the river of life—the hope of living and reigning with the Lamb in perpetual blessedness. Not till we begin to examine the various contents do we perceive the lower place it occupies in the development of Christianity.

VIII. The *schemes of interpretation*—*preterist, continuous, and future*—which the different commentators have adopted, must be rejected, with the exception of the first. Expositors of the continuous and futurist class fall into the fatal error of converting Apocalyptic poetry into historical prose; and of making all symbols significant. Nor are preterists usually free from blame. In applying their principle of interpretation, they are sure to err if they endeavour to show that all was *properly fulfilled* in the immediate future; or that the seer was everywhere guided infallibly in his prognostications and hopes. The apostle's standpoint should be correctly estimated. His idiosyncrasy must be apprehended. The mode in which the old prophets depicted the future should be known—not as if they were able to predict definite events succeeding one another in the arrangements of Providence, but as they dimly saw the things to which their enraptured spirits were carried forward, and painted them in ideal colours. Their own sentiments, hopes, desires, and fears are elements in the pictures they drew—pictures whose general outline alone should be considered *real* to them, though it may be so to us in a very different sense.

IX. To enumerate all the *mistakes committed* by interpreters of the Apocalypse would be impossible. We can only glance at a few prominent ones.

First, The historic basis should not be abandoned, else imagination has ample range for wild extravagance. The writer did not forego time and place—elements that cannot safely be neglected by the interpreter. Thus he states that the things must *shortly* come to pass, and that the time is *at hand*. So likewise at the close it is said, that the things must *shortly* be done. The Saviour affirms, Behold, I come *quickly*. These expressions are significant as to the period of the visions. The advent of Christ is announced to take place within a short time. One city is the theatre of sublime and terrible occurrences—Babylon built on seven hills; Rome the representative of heathenism or anti-christian idolatry. In this catastrophe the judgment culminates, and the new Jerusalem succeeds. Historic personages of John's time appear in the book. Seven Roman emperors are alluded to, and one in particular. Unless the expositor adhere to the historic present and immediate future of the seer, he will lose himself in endless conjecture. Jewish ideas of Messiah's advent should be known not less than Jewish-Christian ones. The prophet stood in the historical circumstances of his own time, and described the second advent in a series of dramatic visions which are ideal poetry. In this particular Eichhorn has erred to some extent.

Secondly, It is a fundamental mistake in explaining the Apocalypse to look for a detailed history

of the church, or of the leading events in the world's history that affect the Christian religion. Some find an epitome of the church's history even in the epistles to the seven churches. Others find it in the remainder of the book; others in both together. Hence particular events are assigned to particular periods, persons are specified, peoples characterised, and definite names assigned. In this fashion are sketched the vicissitudes through which the Christian religion has passed in the world. The allegorising process by which the present scheme of interpretation is supported cannot be repudiated too strongly. The ablest advocates of it are Vitringa, Mede, Faber, Hengstenberg, Ebrard, Auberlen, and Hofmann. It is inconsistent with the scope of the Apocalypse as well as the analogy of prophecy, and leads to arbitrary conjectures.

Thirdly, We should not look for a circumstance, event, person, or nation, corresponding to the images of the seer. 'All the particular traits in this large work,' says Hug, 'are by no means significant. Many are introduced only to enliven the representation, or are taken from the prophets and sacred books for the purpose of ornament: and no one who has any judgment in such matters will deny that the work is extraordinarily rich and gorgeous for a production of western origin.' This plain principle has been systematically violated by nearly all English commentators, including Elliott in particular. Thus, in explaining the language employed to describe the effect of the fifth angel-trumpet (ix. 1, etc.), the star fallen from heaven is pronounced Mohammed, by birth a star on the horizon of the political firmament, but a neglected orphan, because his family had lost the keys of the Caaba. The secret cave of Hera, near Mecca, was the pit of the abyss, whence the pestilential fumes and darkness issued. *The key of the abyss* was given him in allusive contrast to *the key of God* in the Koran. The locusts, to which the Saracens are compared, are peculiarly Arabic. The very name of the one suggests the other, both being similar in pronunciation and radicals, אֶרְבֵּה (arbeh) and עֶרְבִי (arbi)! Akin to this absurd process is

the sense attached to the three frog-like spirits issuing out of the mouth of the dragon, the beast, and the false prophet (xvi. 13); the first being democratic infidel lawlessness and rebellion, the second popery, and the third Oxford Tractarianism. If the absurdity of this method needs farther exposure, the reader needs only to look at the hypothesis respecting the two witnesses in the eleventh chapter, which Ebrard, reviving an old view, refers to *the law and the gospel*; and another has assumed to be the Son and the Spirit of God; whereas they are Elias and Moses, as the whole description shows. In like manner, the fourth vial being referred to the wars of the French Revolution—the words, 'power was given him to scorch men with fire' (xvi. 8), alludes to Napoleon, who employed artillery to an extent beyond all former example in military annals, and inflicted fiery suffering both on his own nation and others. The men thus scorched 'blasphemed the name of God, who had power over these plagues, and repented not to give him glory' (xvi. 9), which means that the suffering nations during that fearful period (1789-1809) did not renounce the papal apostasy for a purer faith. The author of the

New Testament in Greek and English (Mace), published 1729, makes the tail of the great red dragon to be Simon Magus. Another expositor tells us that the woman in the 12th chapter 'represents the covenant of redemption; and the child to be brought forth, the righteousness provided by the covenant; that is, the destined means of counteracting the power of the legal accuser or avenger—the means of delivering the sinner from a yoke even worse than that of Egyptian bondage.'

Fourthly, The principle of synchronisms has been largely adopted by interpreters since the days of Mede and Vitranga; an explanation and defence of it being found in the *Clavis Apocalyptica* of the former. A scheme so ingenious has been followed by the majority of English expositors, especially by Faber. The same events, it is said, are represented by a succession of symbols, the symbols being varied, while the things they signify are the same. Instead of the book being continuously progressive, it is progressive and retrogressive throughout. The principle in question is connected with that interpretation which finds an epitome of history in the book, and stands or falls with it. The series of visions is progressive; but as the events which the seer depicts are nearly the same, the progression is not historical, but prophetic-ideal. It is rhetorical and poetical; not a description of successive events.

Fifthly, We cannot now enter into the designations of time occurring in the Apocalypse. Those who take a day for a year have never proved the truth of their opinion. In prophecy a day means a day as elsewhere, unless the number be indefinite. This has been proved by Maitland, Stuart, and Davidson. Most numbers in the Revelation should not be taken arithmetically, but indefinitely. They are employed as part of the poetic costume, and are borrowed from the O. T.

Sixthly, In the 13th century began that peculiar exegesis which refers the book in part to heretics and sectaries. The Romish Church set the example. Innocent III., in rousing up the crusade, said that the Saracens were the true antichrist, Mohammed the false prophet, and 666 years the duration of his power. As the Church of Rome grew more corrupt, its opponents applied to it the descriptions of the book. The pope was identified with antichrist; and Rome papal with the great whore of Babylon. Since the Reformation, Protestants have usually found in the Revelation the papacy and its destruction. We need not say that the allusion is baseless. Protestant antipapal exegesis has as much foundation as Rome's antihetic one. Thus Signor Pastorini explains the fifth trumpet (ix. 1-11) of the rise and progress of the Reformation. The star falling from heaven is Luther, who, renouncing his faith and vows, may be said to have fallen. When he opened the door of hell there issued forth a thick smoke, or a strong spirit of seduction which had been hatched in hell. A Protestant parallel to this is Elliott's application of the beast in xiii. and xvii. to the succession of popes.

X. The best book on the literature of the Apocalypse is that of Lücke (*Versuch einer vollständigen Einleitung in die Offenbarung des Johannes, oder allgemeine Untersuchungen ueber die apokalyptische Litteratur ueberhaupt, und die Apokalypse des Johannes insbesondere. Zweyte Auflage*, Bonn 1852). To this may be added Düsterdieck's

*Kritisch exegetisches Handbuch ueber die Offenbarung Johannis*, 1859, with the introductions of Bleek and De Wette.

The best commentaries are those of Züllig (1834, 1840), De Wette (1848), Ewald (1828 and 1862), Düsterdieck (1859), Bleek's *Lectures* (1862), and Volkmar (1862). Some good remarks are contained in Reuss's *Histoire de la Théologie chrétienne au siècle apostolique*, i. 429, et seqq., 2d ed. The most esteemed English works have been Lowman's *Commentary*, Mede's *Clavis* with the commentary attached to it, and Woodhouse's *Commentary*. Of more recent books, Stuart's *Commentary*, that of Hooper, and Desprez's *Apocalypse Fulfilled*, have their respective merits. The most pretentious is that of Elliott, 4 vols. 8vo, 5th edition, 1862, whose scheme is fundamentally erroneous. We regret to say that the observations prefixed to the Apocalypse, in the editions of the Greek Testament published by Alford and Wordsworth, contribute nothing to the understanding of the book.—S. D.

#### REVELATIONS, SPURIOUS [APOCRYPHA].

The Apocalyptic character, which is occupied in describing the future splendour of the Messianic kingdom and its historical relations, presents itself for the first time in the book of Daniel, which is thus characteristically distinguished from the former prophetic books. In the only prophetic book of the N. T., the Apocalypse of St. John, this idea is fully developed, and the several apocryphal revelations are mere imitations, more or less happy, of these two canonical books, which furnished ideas to a numerous class of writers in the first ages of the Christian church. The principal spurious revelations extant have been published by Fabricius in his *Cod. Pseudep. V. T.*, and *Cod. Apoc. N. T.*; and their character has been still more critically examined in recent times by Archbishop Laurence (who has added to their number), by Nitzsche, Bleek, and others; and especially by Dr. Lücke, in his *Einleitung in die Offenbarung Joh. und die gesammte apokalyptische Litteratur*. To this interesting work we are in a great measure indebted for much of the information contained in the present article.

I. We shall first treat of the apocryphal revelations no longer extant, which are the following, viz.—

1. The Apocalypse of Elias. 2. The Apocalypse of Zephaniah. 3. The Apocalypse of Zechariah. 4. The Apocalypse of Adam. 5. The Apocalypse of Abraham. 6. The Apocalypse of Moses. 7. The Prophecies of Hystaspes. 8. The Apocalypse of Peter. 9. The Apocalypse of Paul. 10. The Apocalypse of Cerinthus. 11. The Apocalypse of Thomas. 12. The Apocalypse of the proto-martyr Stephen.

The first three are referred to by St. Jerome (*Ep. ad Pamphilum*), and cited as lost apocryphal books in an ancient MS. of the Scriptures in the Coislinian Collection (ed. Montfaucon, p. 194). The *Apocalypse of Adam*, and that of *Abraham*, are cited by Epiphanius (*Hæres.* xxxi. 8) as Gnostic productions. The *Apocalypse of Moses*, mentioned by Syncellus (*Chronog.*) and Cedrenus (*Comp. Hist.*), fragments of which have been published by Fabricius (*ut supra*), is conjectured by Grotius to have been a forgery of one of the ancient Christians.

The *Prophecies of Hystaspes* were in use among the Christians in the 2d century. This was apparently a pagan production, but is cited by Justin Martyr, in his *Apology*, as agreeing with the Sibylline oracles in predicting the destruction of the world by fire. Clemens Alexandrinus (*Strom.* vi.) and Lactantius (*Instit.* vii. 15) also cite passages from these prophecies, which bear a decidedly Christian character.

The *Apocalypse of Peter* is mentioned by Eusebius (*Hist. Eccles.*, iii. 3. 25), and was cited by Clement of Alexandria, in his *Adumbrations*, now lost (*Euseb. l. c.*, vi. 14). Some fragments of it have, however, been preserved by Clement, in his *Selections from the lost Prophecies of Theodotus the Gnostic*, and are published in Grabe's *Spicilegium* (vol. i. p. 74, *seq.*). From these we can barely collect that this Apocalypse contained some melancholy prognostications, which seem to be directed against the Jews, and to refer to the destruction of their city and nation. This work is cited as extant in the ancient fragment of the canon published by Muratori, with this proviso, 'Apocalypsis Johannis et Petri tantum recipimus; quam quidam ex nostris legi in ecclesia nolunt.' Eusebius designates it at one time as 'spurious,' and at another as 'heretical.' From a circumstance mentioned by Sozomen (*Hist. Eccles.*, vii. 19)—viz., that it was read in some churches in Palestine on all Fridays in the year down to the 5th century—Lücke infers that it was a Jewish-Christian production (of the 2d century), and of the same family with the *Preaching of Peter*. It is uncertain whether this work is the same that is read by the Copts among what they call the apocryphal books of Peter. There was also a work under the name of the *Apocalypse of Peter by his Disciple Clement*, an account of which was transmitted to Pope Honorius by Jacob, bishop of Acre in the 13th century, written in the Saracenic language; but this has been conjectured to be a later work, originating in the time of the Crusades.

In the ancient Latin stichometry in Cotelierius (*Apostolic Fathers*), the Apocalypse of Peter is said to contain 2070 stichs, and that of John 1200. It is cited as an apocryphal book in the *Indiculus Scripturarum* after the *Questions* of Anastasius of Nicæa, together with the Apocalypse of Ezar and that of Paul. There is in the Bodleian Library a MS. of an Arabic *Apocalypse of Peter*, of which Nicoll has furnished an extract in his catalogue, and which may possibly be a translation of the Greek Apocalypse.

The *Apocalypse of St. Paul* is mentioned by Augustine (*Tract.* 98 in *Ev. Joan.*), who asserts that it abounds in fables, and was an invention to which occasion was furnished by 2 Cor. xii. 2-4. This appears from Epiphanius (*Hæres.* xxxviii. 2) to have been an anti-Jewish Gnostic production, and to be identical with the *ἀναβατικὸν* of Paul, used only by the anti-Jewish sect of Gnostics called Cainites. It is said by Sozomen (*Hist. Eccles.*, vii. 19) to have been held in great esteem. It was also known to Theophylact and Ecumenius (on 2 Cor. xii. 4), and to Nicephorus in the 9th century (*Can.* 3, 4). Whether this is the same work which Du Pin (*Proleg.* and *Canon*) says is still extant among the Copts is rendered more than doubtful by Fabricius (*Cod. Apoc.*, ii. p. 954) and Grabe (*Spicileg.*, i. p. 85). The *Revelation of St. Paul*, contained in

an Oxford MS., is shown by Grube (*l. c.*) to be a much later work. Theodosius of Alexandria (*Ἐρωτήματα περὶ προσωδίων*) says that the Apocalypse of St. Paul is not a work of the apostle, but of Paul of Samosata, from whom the Paulicians derived their name. The *Revelation of Paul* is one of the spurious works condemned by Pope Gelasius, together with the Revelations of St. Thomas and St. Stephen.

The *Apocalypse of Cerinthus* is mentioned by Eusebius (*Hist. Eccles.*, iii. 28), and by Theodoret (*Fab. Hæret.*, ii. 3). Eusebius describes it as a revelation of an earthly and sensual kingdom of Christ, according to the heresy of the Chiliasts.

Of the *Revelations of St. Thomas and St. Stephen* we know nothing beyond their condemnation by Pope Gelasius, except that Sixtus of Sienna observes, that according to Serapion they were held in great repute by the Manichees; but in the works of Serapion which we now possess there is no allusion to this. There is, however, an unpublished MS. of Serapion in the Hamburg Library, which is supposed to contain a more complete copy of his work.

II. We now proceed to treat of the extant spurious Revelations.

THE ASCENSION AND THE VISION OF ISAIAH (*Ἀναβατικὸν καὶ Ὁρασις Ἰσαΐου*), although for a long time lost to the world, was a work well known to the ancients, as is indicated by the allusions of Justin Martyr, Origen, Tertullian, and Epiphanius. The first of these writers (*Dial. c. Tryph.*, ed. Par., p. 349) refers to the account therein contained of the death of Isaiah, who 'was sawn asunder with a wooden saw,' a fact, he adds, 'which was removed by the Jews from the sacred text.' Tertullian also (*De Patientiâ*) among other examples from *Scripture*, refers to the same event; and in the next (the 3d) century Origen (*Epist. ad African.*), after stating that the Jews were accustomed to remove many things from the knowledge of the people, which they nevertheless preserved in *apocryphal* or secret writings, adduces as an example the death of Isaiah, 'who was *sawn asunder*, as stated in a certain apocryphal writing, which the Jews perhaps corrupted in order to throw discredit on the whole.' In his *Comm. in Matt.* he refers to the same events, observing, that if this apocryphal work is not of sufficient authority to establish the account of the prophet's martyrdom, it should be believed upon the testimony borne to that work by the author of the Epistle to the Hebrews (Heb. xi. 37); in the same manner as the account of the death of Zechariah should be credited upon the testimony borne by our Saviour to a writing not found in the common and published books (*κοινὰ καὶ δεδημευμένοις βιβλίοις*), but probably in an apocryphal work. Origen cites a passage from the apocryphal account of the *martyrdom of Isaiah*, in one of his *Homilies* (ed. De la Rue, vol. iii. p. 108). The *Apostolic Constitutions* also refer to the apocryphal books of Moses, Enoch, Adam, and *Isaiah*, as writings of some antiquity.

The first writer, however, who mentions the *Ascension of Isaiah* by name is Epiphanius, in the 4th century, who observes (*Hæres.* xl.) that the apocryphal *Ascension of Isaiah* was adduced by the Archonites in support of their opinions respecting the seven heavens and their *archons* or ruling angels, as well as by the Egyptian Hieracas and

his followers in confirmation of their heretical opinions respecting the Holy Spirit, at the same time citing the passage from the Ἀναβατικόν to which they refer (*Ascens. of Isaiah*, ix. 27, 32-36; xi. 32, 33). Jerome also (*in Esai.* lxiv. 4) expressly names the work, asserting it to be an apocryphal production, originating in a passage in the N. T. (1 Cor. ii. 9). St. Ambrose (*Opp.*, i. p. 1124) cites a passage contained in it, but only as a traditionary report, 'plerique ferunt' (*Ascens. Is.*, v. 4-8); and the author of the *Imperfect Work on Matt.*, a work of the 5th century erroneously attributed to St. Chrysostom (Chrysost., *Opp.*, hom. l.), evidently cites a passage from the same work (*Ascens.*, i. 1, etc.). After this period all trace of the book is lost until the 11th century, when Euthymius Zigabenus informs us that the Messalian heretics made use of that 'abominable pseudepigraphal work, the *Vision of Isaiah*.' It was also used (most probably in a Latin version) by the *Cathari* in the West (P. Moneta, *Adv. Catharos*, ed. Rich., p. 218). The *Vision of Isaiah* is also named in a catalogue of canonical and apocryphal books in a Paris MS. (No. 1789), after the *Quæst. et Resp.* of Anastasius (Cotelerius, *P. P. Apost.*, i. pp. 197, 349). Sixtus of Sienna (*Bibl. Sancti*, 1566) states that the *Vision of Isaiah*, as distinct from the *Anabasis* (as he calls it), had been printed at Venice. Referring to this last publication, the late Archbishop Laurence observes that he had hoped to find in some bibliographical work a further notice of it, but that he had searched in vain; concluding at the same time that it must have been a publication extracted from the *Ascension of Isaiah*, or a Latin translation of the *Vision*, as the title of it given by Sixtus was, 'Visio admirabilis Esaie prophetæ in raptu mantis, quæ divinæ Trinitatis arcana, et lapsi generis humani redemptionem continet.' Dr. Laurence observes also that the mode of Isaiah's death is further in accordance with a Jewish tradition recorded in the Talmud (*Tract Jebammoth*, iv.); and he supposes that Mohammed may have founded his own journey through seven different heavens on this same apocryphal work. He shows at the same time, by an extract from the *Raboth*, that the same idea of the precise number of seven heavens accorded with the Jewish creed.

There appeared now to be little hopes of recovering the lost *Ascension of Isaiah*, when Dr. Laurence (then Regius Professor of Hebrew in the University of Oxford) had the good fortune to purchase from a bookseller in Drury Lane an Ethiopic MS. containing the identical book, together with the canonical book of Isaiah and the fourth (called in the Ethiopic the *first*) book of Esdras. It is entitled the *Ascension of the Prophet Isaiah*, the first five chapters containing the martyrdom, and the six last (for it is divided in the MS. into chapters and verses) the *Ascension* or *Vision* of Isaiah. At the end of the canonical book are the words, 'Here ends the Prophet Isaiah;' after which follows 'The Ascension,' etc., concluding with the words, 'Here ends Isaiah the Prophet, with his Ascension.' Then follows a postscript, from which it appears that it was transcribed for a priest named Aaron, at the cost of a piece of fine cloth, twelve measures long and four broad. The *Ascension of Isaiah* was published by Dr. Laurence at Oxford in 1819, with a new Latin and an English version. This

discovery was first applied to the illustration of Scripture by Dr. Gesenius (*Comm. on Isaiah*). Sometime afterwards the indefatigable Dr. Angelo Mai (*Nova Collect. Script. Vet. e Vat. Codd.*, Rom. 1828) published two Latin fragments as an appendix to his *Sermon. Arian. Fragment. Antiquiss.*, which he conjectured to be portions of some ancient apocryphal writings. Niebuhr, however, perceived them to be fragments of the Ascension and Vision of Isaiah; and Dr. Nitzsche (*Nachweisung zweyer Bruchstücke*, etc., in the *Theolog. Stud. und Kritik*, 1830) was enabled to compare them with the two corresponding portions (ii. 14-iii. 12; vii. 1-19) of the Ethiopic version. Finally, in consequence of the more complete notice of the Venetian edition of the Latin version given by Panzer (*Annal. Typog.*, viii. p. 473), Dr. Gieseler had a strict search made for it, which was eventually crowned with success, a copy being discovered in the Library at Munich. This work, the date of whose impression was 1522, contained also the *Gospel of Nicodemus*, and the *Letter of Lentulus to the Roman Senate*. The Latin version contains the *Vision* only, corresponding to the last seven chapters of the Ethiopic version.

The subject of the first part is the martyrdom of Isaiah, who is here said to have been sawn asunder in consequence of the visions which he related to Hezekiah, in the twenty-sixth year of the reign of that monarch, and which are recorded in the first four chapters. These relate principally to the coming of 'Jesus Christ the Lord' from the seventh heaven; his being changed into the form of a man; the preaching of his twelve apostles; his final rejection and suspension on a tree, in company with the workers of iniquity, on the day before the sabbath; the spread of the Christian doctrine; the last judgment; and his return to the seventh heaven. Before this, however, the arch-fiend Berial is to descend on earth, in the form of an impious monarch, the murderer of his mother, where, after his image is worshipped in every city for three years, seven months, and twenty-seven days, he and his powers are to be dragged into Gehenna.

The second portion of the work gives a prolix account of the prophet's ascent through seven heavens, each more resplendent and more glorious than the other. It contains distinct prophetic allusions to the miraculous birth of Christ of the Virgin Mary at Bethlehem; his crucifixion, resurrection, and ascension; and the worship of 'the Father, his beloved Christ, and the Holy Spirit.' The mode of the prophet's own death is also announced to him. The whole work, observes its learned translator, is 'singularly characterised by simplicity of narration, by occasional sublimity of description, and by richness as well as vigour of imagination.' Dr. Laurence conceives that the writer had no design of imposing upon the world a spurious production of his own as that of the prophet, but rather of composing a work, avowedly fictitious, but accommodated to the character, and consistent with the prophecies, of him to whom it is ascribed.

As to the age of this work, Dr. Laurence supposes, from the obvious reference to Nero, and the period of three years, seven months, and twenty-seven days, and again of three hundred and thirty-two days, after which Berial was to be dragged to

Gehenna, that the work was written after the death of Nero (which took place on the 9th June A.D. 68), but before the close of the year 69. Lücke, however, looks upon these numbers as purely arbitrary and apocalyptic, and maintains that the dogmatical character of the work, the allusion to the corruptions of the church, the absence of all reference to the destruction of Jerusalem, and the Chiliastic view, all point to a later period. All that can be considered as certain respecting its date is, that the first portion was extant before the time of Origen, and the whole before Epiphanius. It has been doubted whether the work does not consist of two independent productions, which were afterwards united into one, as in the Ethiopic version; but this is a question impossible to decide in the absence of the original. The Latin fragments discovered by Mai correspond literally with the Ethiopic, while they not only differ from the Venetian edition in single phrases, but the latter contains passages so striking as to induce the supposition that it is derived from a later recension of the original text.

The author was evidently a Jewish Christian, as appears from the use made of the Talmudical legend already referred to, as well as by his representing the false accuser of Isaiah as a Samaritan. The work also abounds in Gnostic, Valentinian, and Ophitic notions, such as the account of the seven heavens, and the presiding angels of the first five, the gradual transmutation of Christ until his envelopment in the human form, and finally the docetic conception of his history on earth. All this has induced Lücke (*ut supra*) to consider the whole to be a Gnostic production of the 2d or 3d century, of which, however, the martyrdom was first written. Dr. Laurence finds so strong a resemblance between the account of the seven heavens here, and in the Testament of Levi (*Twelve Patriarchs*), that he suspects the latter to 'betray a little plagiarism.' If this learned divine were right in his conjecture respecting the early age of this production, it would doubtless afford an additional testimony (if such were wanting) to the antiquity of the belief in the miraculous conception and the proper deity of Jesus, who is here called the Beloved, the Lord, the Lord God, and the Lord Christ. In respect, however, to another passage, in which the Son and Holy Spirit are represented as worshipping God, the learned prelate truly observes that this takes place only in the character of angels, which they had assumed.

Dr. Lücke observes that the drapery only of the apocalyptic element of this work is Jewish, the internal character being altogether Christian. But in both form and substance there is an evident imitation, if not of the Apocalypse of St. John, at least of the book of Daniel and of the Sibylline oracles. The use of the canonical Apocalypse Lücke (*l. c.*, sec. 16) considers to be undeniable in viii. 45 (comp. Rev. xxii. 8, 9; vii. 21-23; Rev. xix. 10).

Of the ancient Greek poems called the SIBYLLINE ORACLES (written in hexameter verse), there was formerly a considerable number in use, of which but few have descended to our times. Servius, in the 5th century, mentions a hundred books (*sermōnes, λόγοι*); and Suidas, who lived most probably in the 11th, speaks of twenty-four books of the Chaldean sibyls alone. But

eight only were known to the moderns, until the recent discoveries of Angelo Mai, who has recovered and published an eleventh, twelfth, thirteenth, and fourteenth book from palimpsests in the Ambrosian and Vatican libraries (*Script. Vet. Nov. Collect.*, vol. iii. p. 3). The first eight books have been shown to be the compositions of various writers from the commencement of the 2d century B.C. to A.D. 500. Of these, the earliest in point of date is supposed to be the *third book*, containing a series of connected predictions written by an Alexandrian Jew in the time of the Maccabees, but containing heathen poems of a still earlier period. The subject is continued by another Alexandrian Jew, who lived about forty years before the Christian era. Notwithstanding the later Christian interpolations by which this document has been disfigured, it forms a valuable collection of Sibylline oracles respecting the Messiah, anterior to the Christian era. It concludes with another addition, written partly in the 3d century and partly at a still later period. But before this period, the *fourth* and *fifth* books come in, the former of which was written by a Christian about A.D. 80; the latter consists of several predictions from various authors, principally Egyptians, one of whom was an Alexandrian Jew, who wrote in the middle of the 2d century; another portion is by a Jew in Asia Minor, about A.D. 20; and certain parts by another Jewish author, about A.D. 70. But the whole book in its present form proceeds most probably from the Jewish Christians residing at Memphis in the commencement of Adrian's reign, who collected the greater portion of the oracles of the first part, and united them to the third and fourth books. At least the whole three books were formed into one collection in the middle of the 2d century, and ascribed to one and the same sibyl. But at the close of the next century these books were completely separated, and were, together with the subsequent books then written (sixth, seventh, and eighth), each attributed to a distinct prophetic. Of these, the earliest in point of date is the *eighth book*, part of which was composed about A.D. 170-180, and the entire finished at the end of the 3d century, when it was united with the others, as we learn from Lactantius. The *seventh book*, separate from its later interpolations, was composed by a Judaizing Christian in the 3d century. The *sixth book* appears to have been written at the close of this century by a Christian, for he speaks of Christ as the second Adam. That part called the *Acrostics* was constructed in the 4th century from earlier Sibylline verses. Some portions of the *eighth book* were probably written at this period, and introduced at a still later among the Sibylline oracles. The latest of all are the *first* and *second books*, written by one and the same author, who lived in the West in the middle of the 5th century.

Of this motley group the chief portions only are of an apocalyptic character, others being purely epic, or in the form of hymns. The sibyl, as the oracle of God, predicts the destruction of paganism in its wars on both Judaism and Christianity. To this is annexed the apocalyptic consolation and encouragement to the sufferer and oppressed among God's people. The poetic interest, which is a characteristic of apocalyptic composition, both Jewish and Christian, is not lost sight of.

There have been three distinct periods traced in

respect to the Sibylline Revelations. The first is the Jewish, commencing at the Maccabæan period. This, observes Lücke, 'belongs to the cycle of Daniel's Apocalypse.' The second period is the Jewish Christian, having a special relation to the antichristian character of the persecuting Nero, with an admixture of Chiliastic elements. The third period is free from Chiliasm, and belongs to the Christian character of the 3d century, embracing a species of universal history in the Sibylline form, concluding with the end of all things at the final judgment.

It is impossible to deny the resemblance between the Apocalypse of John and the Sibylline poems of the second period. 'Besides the Chiliastic elements, and the reference to the return of Nero, it is common to both that the destruction of Rome forms the grand crisis of their predictions, and that letters and cyphers are symbolically employed. But, on the other hand, what a difference! The Sibylline oracles are characterised by a dry, monotonous series of mere predictions, threatenings, and promises; while the Apocalypse of John presents us with an all but dramatic development of the kingdom of God in a living picture. The most important portion for comparison with the Apocalypse is the contemporary first oracle of the fourth book. The later pieces of this kind may have stood in conscious relation with the Apocalypse, but this is incapable of proof' (Lücke, *ut supra*).

The books discovered by Angelo Mai are much of the same character with the former, but have less of the religious element. The eleventh book contains a statement of Jewish, Greek, Macedonian, and Egyptian history, from the Deluge to Julius Cæsar. There are some single passages which resemble the third book, but the author was a different person, and was probably a Jew, who lived a short time before the Christian era.

The *twelfth* book resembles the fifth in its commencement, and contains the same series of Roman emperors from Augustus, under whose reign the appearance of Christ is prominently brought forward. This series, which in the third book ended with Hadrian, here proceeds as far as Alexander Severus, passing over Sulpicius Severus. Its Christian origin is beyond question, and it may have been written after the death of Severus, A.D. 222.

The *thirteenth* book narrates, in the Sibylline form, the wars of the Romans in the East to the middle of the 3d century, probably commencing where the former had ended. It is observable that the author alludes to the mathematical fame of Bostra.

The most prominent feature of the *fourteenth* book is the destruction and rebuilding of the city of Rome, which is provisioned for a whole year in expectation of a long period of adversity; the last prince of the Latin race appears and departs, after whom comes a royal race of long duration. The whole narration points to the period of the migration and downfall of the Western Empire. The author doubtless was a Christian of the 5th century.

The book called the TESTAMENTS OF THE TWELVE PATRIARCHS is an ancient apocryphal work (founded most probably on Gen. xlix. 1, *seq.*), in which the twelve sons of Jacob are represented as delivering their dying predictions and

precepts to their posterity. If we are to credit the authority of a manuscript in the Bodleian library, this work was originally written in Hebrew, and translated into Greek by St. Chrysostom. But Dr. Grabe, who first adduced this testimony, considers it very doubtful. The author of the Latin version (from the Greek) was Robert Grosseteste, bishop of Lincoln in the 13th century, with the assistance of a Greek named Nicholas, abbot of St. Albans. The bishop's attention was first directed to it by Archdeacon John de Basingstoke, who had seen the work during his studies at Athens. This version, which was first printed from very incorrect copies in 1483, and afterwards in 1532 and 1549, was reprinted in the *Orthodoxographia* of Gryneus, and in the *Bibliotheca Patrum*. A few specimens of the original were printed at various times by Cotelierus (*Not. in Script. Apostol.*), Gale (*Annot. in Jambl.*), and Wharton (*Auctarium*); but it was reserved for the learned Dr. Grabe to give the entire work in the original Greek, in 1699, from a Cambridge manuscript on vellum (the identical MS. used by Robert of Lincoln for his translation), a copy of which was made for him by the learned Dr. John Mill, who collated it with a manuscript on paper in the Bodleian, written A.D. 1268, and annexed to it various readings from other manuscripts. Dr. Grabe was the person who first divided the work into chapters or paragraphs, with numbers prefixed. He added some valuable notes, which, with the originals, were republished by Fabricius in his *Cod. Pseudep. V. T.*

This work contains many beautiful passages, and, while its form is that of a pretended prophecy, bears indirect testimony to the facts and books of the N. T.; the nativity, crucifixion, resurrection, ascension, and unblemished character of Jesus—ascribing to him such titles as evidently show that his divinity was fully recognised. The author testifies also to the canonical authority of the Acts of the Apostles and St. Paul's Epistles, and seems especially to allude to the four Gospels. The age of this apocryphal work is, therefore, of considerable importance in sacred criticism.

Mr. William Whiston, who has given an English translation of this work in his *Authentic Records*, considers it to be a genuine production, and one of the *concealed* (as he interprets the word apocryphal) books of the O. T., maintaining that if this and the book of Enoch were not written after the destruction of Jerusalem (which he holds to be a wild notion), they are of necessity genuine and divine. Cave (*Hist. Liter.*) was at first disposed to place the work in the year A.D. 192, but he subsequently regarded it as more probably written near the commencement of the 2d century. That the work was extant in the time of Origen appears from his observation: 'We find the like sentiment in another little book, called the *Testament of the Twelve Patriarchs*, although it is not in the canon,' viz., that by sinners are to be understood the angels of Satan (*Homil. in Jos. comp. with Testament. Reuben.*, sec. 3). Jerome also observes that there had been forged revelations of all the patriarchs and prophets. Tertullian has also been supposed to refer to it. It is cited by Procopius of Gaza, about A.D. 520; and in the *Stichometry* of Nicephorus (about A.D. 800) it is said to contain in the Greek 5100, and in the Latin 4800, stichs or

verses [VERSE]. Dr. Dodwell, from its Hellenistic character, ascribes it to the 1st century. The recent investigations of Dr. Nitzsche (*De Testamentis duodecim Patriarcharum*, Wittenb. 1810), however, seem to leave no doubt of its having been the work of a Jewish Christian, about the beginning of the 2d century. The design of the writer was evidently to convert the twelve tribes to the Christian faith. For this object are introduced the apocalyptic elements. The time of Christ's appearance is predicted. The Messiah is represented as both priest and king, and with this view characterised as equally sprung from the tribes of Judah and Levi. He is to appear, after many calamities, as the common Saviour of Jews and Gentiles. It also contains revelations purely Christian, as the everlasting reign of Christ, the general resurrection, and the last judgment. The Apocalypse of John is referred to, if not expressly cited; and the apocalyptic portions have evidently this for their groundwork, together with the book of Daniel, and that of Enoch, which is expressly cited as a work of authority (Levi, 2; Naphthali, 5), and is consequently an earlier production. There was an altered and interpolated English translation of this book, published (as a genuine work of the twelve patriarchs) in Bristol by Richard Day, in 1813.

#### THE FOURTH BOOK OF EZRA. [ESDRAS.]

The ancient romantic fiction, entitled the SHEPHERD OF HERMAS, is not without its apocalyptic elements. These, however, are confined to book i. 3, 4; but they are destitute of signification or originality [HERMAS].

THE BOOK OF ENOCH is one of the most curious of the spurious revelations, resembling in its outward form both the book of Daniel and the Apocalypse; but it is uncertain whether this latter work or the book of Enoch was first written [ENOCH].

There was an APOCRYPHAL REVELATION OF ST. JOHN extant in the time of Theodosius the Grammarian, the only one of the ancients who mentions it, and who calls it a pseudepigraphal book. It was not known what had become of it, until the identical work was recently published from a Vatican as well as a Vienna manuscript, by Birch, in his *Auctarium*, under the title of 'The Apocalypse of the Holy Apostle and Evangelist John the Divine.' From the silence of the ancients respecting this work, it could scarcely have been written before the 3d or 4th century. Lücke has pointed out other internal marks of a later age, as, for instance, the mention of *incense*, which he observes first came into use in the Christian Church after the 4th century (although here the author of the spurious book may have taken his idea from Rev. v. 8; viii. 3); also of *images* and *rich crosses*, which were not in use before the 4th and 5th centuries.' The name *patriarch*, applied here to a dignitary in the church, belongs to the same age. The time in which Theodosius himself lived is not certainly known, but he cannot be placed earlier than the 5th century, which Lücke conceives to be the most probable age of the work itself. Regarding the object and occasion of the work (which is a rather servile imitation of the genuine Apocalypse), in consequence of the absence of dates and of internal characteristics,

there are no certain indications. Birch's text, as well as his manuscripts, abound in errors; but Thilo has collated two Paris manuscripts for his intended edition (see his *Acta Thomæ, Proleg.*, p. lxxxiii.) Assemann (*Biblioth. Orient.*, tom. iii. pt. i. p. 282) states that there is an Arabic version among the Vatican MSS.—W. W.

REZEPH (רֶזֶף; Sept. *Ῥαφίς*; *Ῥαφέθ*), a city which occurs among those subdued by the Assyrians (2 Kings xix. 12; Is. xxxvii. 12). It is supposed to be the same that Ptolemy mentions under the name of *Ῥήσαφα*, as a city of Palmyrene (*Geog.* v. 15. 24); and this again is possibly the same with the Rasapha which Abulfeda places at nearly a day's journey west of the Euphrates.

REZIN (רֶצִין; Sept. *Ῥασσών*; *Ραζών*). 1. The last king of Damascene-Syria, slain by Tiglath-pileser (2 Kings xv. 37; xvi. 5-10; Is. vii. 1; viii. 4-7) [DAMASCUS]. 2. One of the families of the Nethinim [NETHINIM].

REZON (רֶזֶן, *prince*; Sept. *Ῥεζόν*; Alex. *Ῥαζών*), an officer of Hadadezer, king of Zobah, who established the independence of Damascus, and made it the seat of the kingdom of Damascene-Syria, so often mentioned in the history of the Hebrew kingdoms (1 Kings xi. 23, 24) [DAMASCUS].

RHEGIUM (*Ῥήγιον*), a city on the coast of Italy, near its south-western extremity, opposite Messina in Sicily (Acts xxviii. 13). It is now called Reggio, and is the capital of Calabria.

RHENFERD, JAKOB, was born at Mulheim on the Rhine, 15th August 1654. He was successively rector of the Latin School and professor of Oriental languages in the university of Francker, where he died 7th November 1712. Besides editing a *Synagoga* of dissertations by different writers, *De Stylo Novi Testamenti*, 4to, 1701, he published several learned dissertations. These have been collected and issued in one vol. 4to, with a preface by D. Mill, and an *Oratio Funebris* by Professor Andala, under the title *Jac. Rhenferdi Opera Philologica, dissertationibus exquisitissimi Argumenti Constantia*, Traj. Rhen. 1722. Besides discussing such Biblical subjects as the style of the Apocalypse, the meaning of the phrase *ὁ αἰὼν ὁ μέλλων* in the N. T., the meaning of several passages in the N. T., the author treats largely on points of Jewish literature and archæology, and takes up the subject of the Palmyrene and Phœnician dialects, and other points of interest to Oriental scholars.—W. L. A.

RHESA (*Ῥησά*), the father of Joanna in the genealogy of our Lord (Luke iii. 27) [JOANNA].

RHODA (*Ῥόδη*, i. e., *Rose*), a servant-maid mentioned in Acts xii. 13.

RHODES (*Ῥόδος*), an island in the Mediterranean, near the coast of Asia Minor, celebrated from the remotest antiquity as the seat of commerce, navigation, literature, and the arts, famous during the middle ages as the residence of the knights of St. John, but now reduced to a state of abject poverty by the devastations of war and the tyranny and rapacity of its Turkish rulers. It is of a triangular form, about forty-four leagues in circumference, twenty leagues long from north to south, and about six broad. In the centre is a

lofty mountain named Artemira, which commands a view of the whole island; of the elevated coast of Carmania on the north; the Archipelago, studded with numerous islands, on the north-west; Mount Ida, veiled in clouds, on the south-west; and the wide expanse of waters that wash the shores of Africa on the south and south-east. It was famed in ancient times, and is still celebrated, for its delightful climate and the fertility of its soil. The gardens are filled with delicious fruit, every gale is scented with the most powerful fragrance wafted from the groves of orange and citron trees, and the numberless aromatic herbs exhale such a profusion of the richest odours, that the whole atmosphere seems impregnated with spicy perfume. It is well watered by the river Candura, and numerous smaller streams and rivulets that spring from the shady sides of Mount Artemira. It contains two cities—Rhodes, the capital, inhabited chiefly by Turks, and a small number of Jews; and the ancient Lindus, now reduced to a hamlet, peopled by Greeks, who are almost all engaged in commerce. Besides these, there are five villages occupied by Turks and a small number of Jews; and five towns and forty-one villages inhabited by Greeks. The whole population was estimated by Savery at 36,500; but Turner, a later traveller, estimates them only at 20,000, of whom 14,000 were Greeks and 6000 Turks, with a small mixture of Jews residing chiefly in the capital.

St. Paul appears to have visited Rhodes while on his journey to Jerusalem, A.D. 58 (Acts xxi. 1). It was then under the power of the Romans, under whom, however, it enjoyed a considerable measure of independence.

The Sept. translators place the Rhodians among the children of Javan (Gen. x. 4), and in this they are followed by Eusebius, Jerome, and Isidore; but Bochart maintains that the Rhodians are too modern to have been planted there by any immediate son of Javan, and considers that Moses rather intended the Gauls on the Mediterranean towards the mouth of the Rhone, near Marseilles, where there was a district called Rhodanusia, and a city of the same name. They also render Ezek. xxvii. 15, 'children of the Rhodians,' instead of, as in the Hebrew, 'children of Dedan.' Calmet considers it probable that here they read 'children of Redan or Rodan,' but that in Gen. x. 4 they read 'Dedan,' as in the Hebrew. (Ross, *Reisen auf d. Griech. Inseln*, iii. 70-113; Coronelli, *Isolandi Rodi Geografica*; Clarke's *Travels*; Turner's *Journal*; Schubert's *Reise ins Morgenl.*)—G. M. B.

RHODON (ῥόδον), signifying 'rose,' occurs only in the apocryphal books of Ecclesiasticus and the Book of Wisdom (Ecclus. xxiv. 14; xxxix. 13; i. 8; Wisdom xi. 8).

The rose, though so seldom referred to in the writings of the Jews, is indigenous in some parts of Palestine (see Monro, as quoted by Kitto in the *Physical History of Palestine*; Rosenmüller, *Bib. Bot.*, p. 144, E. T.) Burckhardt was struck with the number of rose-trees which he found among the ruins of Bozra beyond the Jordan. That the rose was cultivated in Damascus is well known; indeed, one species is named *Rosa Damascena* from being supposed to be indigenous there (Kitto, *l.c.*, p. cclxxiv.)

It is possible, however, that the common rose may not be the plant meant in the above passages

of Ecclesiasticus, and that the name *rhodon* may have been used in a general sense, so as to include some rose-like plants. We have an instance of this, indeed, in the oleander, of which *rhododendron*, or *rose-tree*, was one of the ancient names, and *rhododaphne* another. The former name is now applied to a very different genus of plants, but *laurier-rose*, the French translation of *rhododaphne*, is still the common name in France of the plant which used to be called *rose-bay* in this country, but which is now commonly called *oleander*. Its long and narrow leaves are like some kinds of willows, and in their hue and leathery consistence have some resemblance to the bay-tree, while in its rich inflorescence it may most aptly be compared to the rose. The oleander is well known to be

449. Oleander.

common in the south of Europe, by the sides of rivers and torrents; also in Asia Minor, Syria, Egypt, and the north of India; and nothing can be conceived more beautiful than the rivulets at the foot of the mountains, with their banks lined with thickets of oleanders, crowned with large bunches of roseate coloured flowers. Most travellers in Palestine have been struck with the beauty of this plant. Such a plant could hardly escape reference, and therefore we are inclined to think that it is alluded to in the book of Ecclesiasticus by the name ῥόδον. If this should not be considered sufficiently near to *rhododaphne* and *rhododendron*, we may state, that in Arabic writers on *Materia Medica* *rodyon* is given as the Syrian name of the oleander.—J. F. R.

RIBLAH (רִבְלָה), 'fertility,' from the Arabic

root ربل; Bḡlā; Ραβλαμ; Ρεβλαδά; Δεβλαδά; Alex. sometimes Δεβλαά, and Δεβλαδά; *Rebla*; *Reblatha*, a very ancient city of Canaan. In describing the boundaries of the land which the Lord promised to bestow on the Israelites, Riblah is mentioned as one of the land-marks on the east: 'And ye shall point out your east border from Hazar-enan to Shepham: and the coast shall go down from Shepham to Riblah, on the east side of Ain; and the border shall descend and shall reach

unto the side of the sea of Chinnereth eastward' (Num. xxxiv. 10, 11). There is just one other incidental notice in Scripture tending to fix the site of Riblah; it is said to be 'in the land of Hamath' (2 Kings xxiii. 33; xxv. 21; Jer. lii. 9). The land of Hamath lay on the north of the ancient kingdom of Damascus. [HAMATH.] It embraced the plain on both sides of the Orontes, extending from the city of Hamath southward to the fountain of the Orontes. Somewhere on this plain Riblah must have stood; and the scope of the passage shows that it must have been near the southern border of Hamath. It is farther described as lying 'on the

east side of Ain' (מִקְדָּם לַעֵין; ἀπὸ ἀνατολῶν ἐπὶ πηγῆς; *Rebla contra fontem Daphne*). *Ain* seems to be a proper name, but is doubtless descriptive; and it therefore signifies either a noted 'fountain,' or a town beside a fountain and taking its name from it.

Guided by these indications there can be little difficulty in identifying Riblah. On the right bank of the Orontes, about twelve miles east by north of its great fountain, which still bears the name *el-Ain*, is the little village of *Riblah*, surrounded by some low mounds containing ruins of former buildings. Its name is identical with that in the Bible; its site is where the sacred writers represent it to be—in the southern part of the land of Hamath, and 'on the east side of Ain.' It may therefore be concluded that this is the old border city of Canaan.

An attempt has recently been made to distinguish Riblah the border city from Riblah in the land of Hamath (Smith's *Dict. of Bible*, iii. 1041). The reasons given, however, will scarcely be considered sufficient by any one who will examine carefully the topography of the northern and eastern borders of the promised land. [PALESTINE; HAMATH.] There is nothing whatever in Num. xxxiv. 11 to indicate that Riblah was near the sea of Chinnereth. The renderings of the ancient versions and the Targums only serve to confuse the passage. In the Septuagint the division of the Hebrew words

is even mistaken. Thus מִשְׁפַּח הַרְבֵּלָה is rendered ἀπὸ Σεφμαρ Βηλᾶ, joining the two first letters of the second word to the first word. The Vulgate, too, without any authority, inserts the word *Daphnim*; and Jerome affirms that Riblah is identical with Antioch (*Onomast.*, s. v. *Reblatha*). In his commentary on Ezekiel he is still more explicit. He says, 'From the end, therefore, of the northern side, that is from the temple (*atrio*) Enan, the border extends, according to the book of Numbers, to Sepham, which the Hebrews call Apamia, and from Apamia to Rebla, which is now called Antioch of Syria. And that it may be known that Rebla means that city which is now the noblest in Coele-Syria, the words *contra fontem* are added, which it is manifest signify *Daphne*' (*Opera*, vol. v. p. 478, ed. Migne). This singular view appears to be taken from the Targums (Bochart, *Opera*, i. 431). Some suppose that the *Daphne* here mentioned was the place near the lake of Merom of which Josephus speaks (*Bell. Jud.* iv. 1. 1); and that therefore *Ain* may mean one of the fountains of the Jordan. It will be seen, however, that the name *Daphne* is inserted without any authority. It is a pure hypothesis of some Jewish rabbin; and as the name Riblah still exists in the southern

part of the 'land of Hamath,' and on the east side of the great 'fountain' of the Orontes, there can be no legitimate ground for doubt that it is the Riblah of the O. T.

Riblah lay on the line of route between Palestine and Assyria. It was a favourite camping-ground for the armies both of Assyria and Egypt when marching along this route. Here Pharaoh-necho, after defeating the Jews on the fatal field of Esdraelon, put the youthful Jehoahaz in chains, and made Eliakim king (2 Kings xxiii. 29-35). Here Nebuchadnezzar encamped while his general invaded Judah and captured Jerusalem. Hither the unfortunate Zedekiah was brought captive, and after being compelled to witness the murder of his sons, his eyes were put out, and he was bound in fetters of brass (2 Kings xxv. 6, 7; Jer. xxxix. 5-7). Riblah is now a poor village. Its glory has long since passed away. But its suitability for the headquarters of a great army is still apparent. It is encompassed by a vast plain of unrivalled richness; a large river flows past it; its air is pure and bracing; and there is ready access from it by easy and open roads to every district of the country, whether maritime or inland. It is a strategic position of the first importance. The military monarch of Babylon, who established his headquarters here, was evidently thoroughly acquainted with the geography of Syria and Palestine, and perfectly capable of applying his knowledge to the advancement of his ambitious designs (*Handbook*, pp. 577, 578; Robinson, *B. R.*, iii. 542, seq.; Porter's *Damascus*, ii. 335, seq.)—J. L. P.

RIDDLE (רִידָה), literally, 'something intricate or complicated;' ἀνύγμια. Gesenius derives the

Hebrew word from the Arabic حَال 'to bend off, or tie in knots,' and the immediate etymology usually assigned to the Greek word is αἰνίσσασθαι, 'to hint obscurely.' The Hebrew word (Judg. xiv. 12-19) properly means 'a riddle or enigma;' Sept. πρόβλημα; Vulg. *problema* and *propositio*; where Samson proposes to the thirty young Philistines who attended his nuptials an enigma, derived from the circumstance of his having lately found a swarm of bees and honey in the skeleton of the lion which he had killed some months before when he had come to espouse his wife [BEE]. This riddle or enigma, though unfair in regard to those who accepted the pledge to unravel it, because they were ignorant of the particular fact by the knowledge of which alone it could be explained by them, nevertheless answers to the approved definition of an enigma, as consisting of an artful and abstruse proposition, put in obscure, ambiguous, and even contrary terms, in order to exercise the ingenuity of others in finding out its meaning.

The pleasure of the propounder is derived from perplexing his hearers; and theirs from overcoming the difficulty, which is usually renewed by their proposing another enigma.

This kind of amusement seems to have been resorted to, especially at entertainments, in all ages, among different nations; and has even been treated as an art, and reduced to rules. The chief writers on this curious subject are Nic. Reusner (*Enigmatograph.*) and F. Menestrier.

The principal rules laid down for the construction of an enigma are the following: that it must be obscure, and the more obscure the better, pro-

vided that the description of the thing, however covered and abstract, and in whatever remote or uncommon terms, be really correct; and it is essential that the thing thus described be well known. Sometimes, and especially in a witty enigma, the amusement consists in describing a thing by a set of truisms, which tell their own meaning, but which confound the hearer, through his expectation of some deep and difficult meaning. The *greater enigma* is to be rendered more intricate and knotty by a multitude of words; the *lesser* may consist of only one or two remote words or allusions.

The speech of Lamech to his wives Adah and Zillah (Gen. iv. 23, 24) is, possibly, an enigmatic mode of communicating some painful intelligence. It is recorded (1 Kings x. 1) that the queen of Sheba came to prove Solomon (רְמֹנִים; Sept. *ἐν ἀνιγμάσι*; Vulg. *in anigmatibus*). Josephus relates that Hiram, king of Tyre, tried the skill of Solomon in the same way; and quotes Dios to attest that Solomon sent riddles to Hiram, and that the Tyrian king forfeited much money to Solomon from his inability to answer them, but redeemed it upon a man of Tyre named Abdemon being found able to solve them (*Antiq.* viii. 5. 3). The description of the Messiah under the name of the Branch, נֶצֶחַ, when considered in regard to the occasion and context, may be considered as a specimen of the lesser enigma (see Lowth upon the passage). 'The number of the beast' (Rev. xiii. 18) may be also considered as an enigma. The other instances in which the Hebrew word is used all exhibit more or less of the enigmatic character. They are as follows, with the Sept. and Vulg. readings:—Num. xii. 8, where it means 'an oracle or vision,' *δὲ ἀνιγμάτων, non per anigmata et figuras* (Moses) *dominum videt*; Ps. xlix. 5, 'a song,' *πρόβλημα, propositio*; lxxviii. 2, 'dark sayings,' *πρόβλήματα, propositiones*; Prov. i. 6, 'intricate proverbs,' *ἀνιγμاتا, anigmata*; Ezek. xvii. 2, 'a parable,' *διήγημα, Aq.; ἀνigma, anigma*; Dan. viii. 23, 'artifices,' *προβλήματα, propositiones, anigmata*; Hab. ii. 6, 'a song,' *πρόβλημα, loquela anigmatum*. In the Apocrypha we find (Ecclus. xlvii. 15) *παράβολαῖς ἀνιγμάτων, anigmata*; in the N. T. (1 Cor. xiii. 12) *ἐν ἀνιγματι, in anigmati*, which Bretschneider points out as a quotation of Num. xii. 8, and where *ἀνιγματι* is opposed to *τὸ εἶδος*, 'the clear reality.' The word enigma, taken in the extensive meaning of its root, *aĩnos*, certainly applies to an immense portion of the sacred writings—viz., as a narrative or tale having an application to present circumstances; *Odys.* xiv. 508, a fable bearing moral instruction; *Hes. Oper.* 202, which nearly approaches to the nature of a parable [PARABLE]; a pointed sentence, saying, or proverb (Theocritus, xiv. 43) [PROVERBS; PROPHECY]. According to Lennep, the word *ἀνιγμα*, taken substantively, means 'anything obscure.' As specimens of the enigmatical style in the O. T., Winer points out Prov. xxx. 12-19; Is. xxi. 12. In the N. T. we may adduce our Lord's discourse with Nicodemus (John iii. 3), and with the Jews (vi. 51, etc.), where the enigmatical style is adopted for the purpose of engaging attention, in an unrivalled manner (Winer, *Bibl. R. W. B.*; Stuck, *Antiq. Conviv.*, iii. 17).—J. F. D.

RIMMON (רִמּוֹן) is mentioned in numerous places in the O. T., and is universally acknow-

ledged to denote the pomegranate-tree and fruit, being described in the works of the Arabs by the name *rooman*. The pomegranate is a native of Asia; and we may trace it from Syria, through Persia, even to the mountains of Northern India. It is common in Northern Africa, and was early cultivated in Egypt: hence the Israelites in the desert complain (Num. xx. 5), 'It is no place of seed, or of figs, or of vines, or of *pomegranates*.' Being common in Syria and Persia, it must have early attracted the attention of Eastern nations. In the present day it is highly valued, and travellers describe the pomegranate as being delicious throughout Persia. The bright and dark-green foliage of the pomegranate, and its flowers conspicuous for the crimson colour both of the calyx and petals, must have made it an object of desire in gardens; while its large reddish-coloured fruit, filled with numerous seeds, each surrounded with juicy pleasant-tasted pulp, would make it still more valuable as a fruit in warm countries (Cant. viii. 2; vi. 7; xi. 12). Being valued as a fruit, and admired as a flower, it was to be expected that it should be cultivated in gardens and orchards; and to this several passages refer, as Cant. iv. 13. In other places it is enumerated with the more valued and cultivated trees of the country, such as the vine, the fig-tree, the palm-tree, and the olive, as in Joel i. 12; Hag. ii. 19. The pomegranate is not likely to have been a native of Egypt; it must, however, have been cultivated there at a very early period, as the Israelites, when in the desert, lamented the loss of its fruit. That it was produced in Palestine during the same early ages is evident, from the spies bringing some back when sent into Canaan to see what kind of a land it was; for we are told that they 'came unto the brook of Eshcol, and cut down from thence a branch with one cluster of grapes, etc., and they brought of the pomegranates, and of the figs' (Num. xiii. 23.)

The pomegranate was well known to the Greeks, being the *βοά* of Theophrastus and of Dioscorides (i. 151). It was employed as a medicine by Hippocrates, and is mentioned by Homer under the name *σίδη*, supposed to be of Phœnician origin. Its English name is derived from the pomum granatum ('grained apple') of the Romans. Various parts of the plant were employed medicinally—as, for instance, the root, or rather its bark; the flowers, which are called *κύνθος* by Dioscorides, and the double flowers *βαλανίστιον*; also the rind of the pericarp, called *malicorium* by the Romans and *σίδιον* by Dioscorides. Some of the properties which these plants possess make them useful both as drugs and as medicines. We have hence a combination of useful and ornamental properties, which would make the pomegranate an object sure to command attention; and these, in addition to the showy nature of the flowers, and the roundish form of the fruit, crowned by the protuberant remains of the calyx, would induce its selection as an ornament to be imitated in carved work. Hence we find frequent mention of it as an ornament on the robes of the priests (Exod. xxviii. 33; xxxix. 24); and also in the temple (1 Kings vii. 18, 20, 42; 2 Kings xxv. 17; 2 Chron. iii. 16; iv. 13). It might, therefore, well be adduced by Moses among the desirable objects of the land of promise (Deut. viii. 8): 'a land of wheat, and barley, and vines, and fig-trees, and pomegranates; a land of oil-olive and honey.'—J. F. R.

RIMMON, an idol worshipped by the Syrians (2 Kings v. 18). As this name is found nowhere but in the Bible, and there only in the present text, nothing positive can be affirmed concerning the power it symbolised. If it be referred to the pomegranate, we may suppose that the fruit had become the symbol of some mysterious powers in nature. But many commentators entitled to respect—as I.e. Clerc, Selden, Vitringa, and Rosenmüller—would rather seek the signification of the word in רָמַם, *ramam*, 'the exalted'; in which case we may take it to have been a name of eminence applied to the sun, or rather to some idol under which the sun was represented.—J. K.

RIMMON, the name of several ancient places in Palestine. The word רִמּוֹן signifies a pomegranate; and probably the places were so called because of the abundance of the fruit in their localities.

1. (רִמּוֹן; Ῥεμμὼν; Ῥεμμών; Alex. Ῥεμμών; Ῥεμμῶν; *Remmon*), a city on the extreme southern border of the territory originally assigned to the tribe of Judah; it is grouped with Ziklag and Ain (Josh. xv. 21, 32). The region in which it was situated was subsequently given to Simeon (Josh. xix. 7, where the name is *Remmon* in the A. V., though the Hebrew is רִמּוֹן. The translators have perhaps followed the Vulgate). Rimmon would appear to have stood towards the western extremity of Simeon, and thus south of the plain of Philistia; for Joshua in enumerating 'the uttermost cities of the tribe of the children of Judah,' begins at the coast of Edom on the east, and Rimmon is the last of twenty-nine, and therefore must have been near the western extremity. The only other notice of it in the Bible is in the prophecies of Zechariah: 'All the land shall be turned as a plain, from Geba to Rimmon, south of Jerusalem' (xiv. 10). The land referred to is the kingdom of Judah; Geba lay on the northern and Rimmon on the southern border. It is worthy of note that in Neh. xi. 29 *En-rimmon* is found among the towns which were occupied by the tribe of Judah after the return from Babylon. It is grouped with Ziklag and Beersheba, and must consequently have been situated near the southern border of the tribe. The name is compounded of the words *Ain* and *Rimmon*, which, it will be observed, occur together without the copulative in Josh. xix. 7 and 1 Chron. iv. 32. It would appear that Ain and Rimmon were distinct places, but situated close together. And this view, as will be seen, is confirmed by modern research.

Though both Eusebius and Jerome mention Rimmon, their notices are so confused, and even contradictory, that they evidently knew nothing of it. They appear to have confounded three towns of the same name. In one place Jerome calls it a town 'of Simeon or Judah; and yet he locates it 'fifteen miles north of Jerusalem.' In the very next notice he writes, 'Remmon, in tribu Simeonis, vel Zabulon' (*Onomast.*, s. v. *Remmon*). Under the name *Eremmon* (Ἐρεμβών, *Onomast.*, s. v.) both Eusebius and Jerome appear to give a more accurate account of the site of this city. They state that it is a 'very large village' (*vicus praegrandis*), sixteen miles south of Eleutheropolis. This was no doubt pretty nearly its true position (see Reland, *Pal.*, p. 973).

About thirteen miles south of Eleutheropolis (now Beit Jibrin) is a ruined village called *Un-er-Rummanim* ('Mother of Pomegranates'), which in all probability marks the site, as it bears the name, of Rimmon of Simeon. A short distance (about a mile) south of it are two tells, both of which are covered with ruins; and between them, in the valley, is 'a copious fountain, filling a large ancient reservoir, which for miles around is the chief watering-place of the Bedawin of this region' (Van de Velde, *Memoir*, p. 344). As fountains are extremely rare in this southern district, it seems probable that this one may have given the name of Ain to the ancient town on the adjoining tell; and the proximity of Ain and Rimmon led to their being always grouped together.

2. (רִמּוֹן; Ῥεμμών; *Remmono*). A city of Zebulun, assigned to the Levites of the family of Merari (1 Chron. vi. 77). Some suppose that it is identical with *Dimnah* in the list given by Joshua (xxi. 35), and that the latter is a corruption. There can be no doubt, however, that it is the same Rimmon which is called *Remmon-Methoar* in Josh. xix. 13 (see REMMON-METHOAR).

3. THE ROCK RIMMON (רִמּוֹן הַרְבֵּי; and ר"ר, without the article; Ῥεμμών τοῦ πέτραν, also without the article; *ad petram, cujus vocabulum est Remmon*; also, in *petra Remmon*), a high rock (such is the meaning of the term רִמּוֹן) to which the remnant of the tribe of Benjamin fled for refuge after the defeat and slaughter of their brethren at Gibeah. It is described as lying on the way toward the wilderness, evidently the wild region on the east overlooking the plain of Jericho (Judg. xx. 45). Of the whole tribe only six hundred men were left alive. They took up a strong position on the top of the rock Rimmon, and held it for four months (ver. 47), until the righteous indignation of their brethren was appeased, and such terms of peace proposed as saved the tribe from utter annihilation (xxi. 13).

This is doubtless the Rimmon which Eusebius and Jerome mention, locating it fifteen miles north of Jerusalem (*Onomast.*, s. v. *Remmon*).

About ten miles north of Jerusalem, and nearly four east of Bethel, is a very conspicuous white limestone tell, rising like a cone above the neighbouring hill-tops, and overlooking the whole wilderness down to the Jordan valley. Upon it stands a large modern village called *Rummon*. This is unquestionably the 'Rock Rimmon' on which the Benjamites took refuge. It is admirably adapted for the purpose. A deep and wild ravine cuts off the approach from the south, and others skirt its western and northern sides, rendering it a natural fortress of great strength. The sides of the tell are steep, bare, and rocky, and could be defended by a few resolute men against a host. The top is rounded, affording ample space for the refugees, while along the sides are some large caverns (Robinson, *B. R.*, iii. 290; Van de Velde, *Memoir*, p. 344; *Handbook*, p. 217).—J. L. P.

RIMMON-PAREZ (רִמּוֹן פָּרֶז; Ῥεμμὼν Παρές; *Remmon-phares*), one of the stations of the Israelites in the wilderness—the second according to the enumeration in Num. xxx. 19, after Hazeroth. It is not again mentioned, and nothing is known of its site. The word *Perez* signifies 'a breach,' and

perhaps may have been suggested by some peculiarity in the physical features of the region.—J. L. P.

RIPHATH (רִיפַת; Sept. *Ῥιφθ*; in 1 Chron. i. 6 the Keri רִיפַת), a northern people descended from Gomer (Gen. x. 3). See NATIONS, DISPERSION OF.

RITHMAH (רִתְמָה; equivalent to the Arabic رِثْمَة, 'broom'; *Paṣamā; Rethma*), a desert station, mentioned only in Num. xxxiii. 18, 19. It appears to have been the first camping-ground of the Israelites after Hazeroth, and the name may have been derived from the abundance of the shrub *retam*, which grows largely in the desert. The place has not been identified.—J. L. P.

RIVER. No less than seven distinct Hebrew words are rendered in the A. V. by the common term 'river.' These words are not synonymous. Most of them have definite significations, and were used by the sacred writers to set forth certain physical peculiarities. When these are overlooked, the full force and meaning of the Scriptures cannot be understood; and important points of physical geography and topography fail to be apprehended. It is intended in this article briefly to define the meaning of the several Hebrew terms translated *river*, and to explain, as far as possible, the reasons of their use in particular instances.

In this country 'a river' always means a river—that is, a body of water flowing through a defined channel. Several of the words rendered 'river' in the English Bible have not that meaning, and consequently the word *river* conveys to us a wrong impression. Again, we distinguish carefully between rivers, streams, winter-torrents, and valleys; so also do the sacred writers; but in the English Bible the distinction is too often overlooked by a mistranslation of the Hebrew words.

From the very frequent use of the term 'river' in the A. V. ordinary readers are apt to form a wrong idea of Palestine. They suppose it to be a country, like Britain, abounding in noble rivers and perennial streams. Such is far from being the case. The Hebrew scholar knows that the word, in a vast majority of instances, means 'valley,' 'ravine,' or 'winter torrent.' It is unfortunate, too, that the Hebrew words are not translated with any regard to uniformity. Sometimes the same word is rendered in four or five different ways. The following are the Hebrew words translated 'river' in the A. V.—

1. אֲבָל (Aḇbal), used only in three passages of Daniel (viii. 2, 3, 6). 'I was by the *river* of Ulai.' It comes from the root יָבַל, which, like the Arabic يَبِل, signifies 'to flow copiously.' 'River' is therefore a proper translation of the word. Its derivative, מַבּוּל, is the Hebrew term for *deluge*.

2. אָפֶק (Aphēk). This word is derived from אָפַק, 'to hold' or 'restrain.' It thus comes to signify 'a channel,' from the fact of its 'holding,' or 'restraining' within its banks a river. It is said in 2 Sam. xxii. 16, 'The *channels* of the sea appeared, the foundations of the world were discovered' [cf. Ps. xviii. 15]. The Psalmist gives it

very appropriately to the glens of the Negeb (south), which are dry during a great part of the year; 'Turn again our captivity, O Lord, as the *channels* in the Negeb.' The beauty of this passage is marred by the present translation, 'streams in the south' (Ps. cxxvi. 4). The word is rightly translated 'channels' in Is. viii. 7. It ought to be rendered in the same way in Ezek. xxxii. 6; 'And the *channels* (rivers) shall be full of thee.' But the most striking example of a wrong rendering is in Joel iii. 18; 'And all the *rivers* of Judah shall flow with waters.' It ought to be 'channels' instead of 'rivers.' In all the places, in fact, in which the word occurs, 'channels' is the proper meaning.

3. יְאֹר (Ye'ôr) is an Egyptian word, which is applied originally, and almost exclusively, to the river Nile. It was introduced into the Hebrew language by Moses, and is used more frequently in the Pentateuch than in all the rest of the Bible. As employed by him it has the definiteness of a proper name. Thus, 'Pharaoh stood by the *river*' (Gen. xli. 1; cf. ver. 2, 3, 17, etc.); 'Every son that is born ye shall cast into the *river*' (Exod. i. 22). The Nile was emphatically the *river* of Egypt. Subsequent writers, when speaking of the river of Egypt, generally borrow the same word (Is. vii. 18; xix. 6; Jer. xlv. 7; Ezek. xxix. 3; Amos viii. 8, etc.) In a few places it is employed to denote a large and mighty river, not like the rivulets or winter-torrents of Palestine. Thus in Is. xxiii. 10: 'Pass through the land as a *river*, O daughter of Tarshish' (cf. xxxiii. 21). The usual rendering of this word in the A. V. is 'river'; but it is translated 'streams' in Is. xxxiii. 21; 'flood' in Jer. xlv. 7, 8; Amos viii. 8, etc.; and 'brooks' in Is. xix. 6, 7, 8, where reference is manifestly made to the 'canals' which convey the water of the Nile to different parts of Egypt.

4. יִבְלַל (Yibāl) is found only in Jer. xvii. 8; 'He shall be as a tree . . . that spreadeth out her roots by the *river*.' The word is radically identical with אֲבָל (No. 1), and its meaning is the same.

5. נָהָר (Nahar). This word is from the root נָהַר, which signifies 'to flow'; and it may be regarded as the proper Hebrew equivalent for our word 'river.' The cognate Arabic نَهْر has the same meaning. It is always applied to a perennial stream. It is often followed by the genitives of countries, as 'the *river* of Egypt' (Gen. xv. 18), that is, the Nile; 'the *river* of Gozan' (2 Kings xvii. 6); 'the *rivers* of Ethiopia' (Is. xlviii. 1); 'the *rivers* of Damascus' (2 Kings v. 12).

With the article, הַנָּהָר, the word is applied emphatically to the *Euphrates*; thus in Gen. xxxi. 21, 'He rose up, and passed over the *river*;' and Exod. xxiii. 31, 'I will set thy bounds . . . from the desert unto the *river*.' The Euphrates is also called 'the great *river*' (Gen. xv. 18; Deut. i. 7, etc.) In one passage this word, without the article, evidently signifies the Nile (Is. xix. 5); though in poetry, when thus used, the Euphrates is meant (Is. vii. 20; Ps. lxxii. 8; Zech. ix. 10). In a few passages the word is translated 'flood' (Josh. xxiv. 2; Job xiv. 11; Ps. lxxvi. 6); but the ordinary rendering is 'river.'

6. נַחַל (*Nakhal*) is derived from the root נָחַל, which signifies 'to receive' or 'to possess.' Its usual meaning is 'a valley,' probably from the fact of its receiving the surface-water after rains, and affording a bed for a stream. Sometimes it is applied to a valley or glen, apart altogether from the idea of a stream. Thus in Gen. xvi. 17, Abraham 'pitched his tent in *the valley* of Gerar.' As many of the valleys of Palestine were the beds of winter streams, the word was sometimes applied to the stream itself, as in Lev. xi. 9, 10; and is rendered in the A. V. '*river*' or '*brook*' (Gen. xxxii. 23). Sometimes, however, the rendering is incorrect, and conveys a very wrong impression. In Num. xiii. 23, 'the *brook* Eshcol' should manifestly be 'the *valley* of Eshcol;' and in Deut. iii. 16 the same word is rendered in two ways 'unto *the river* Arnon half *the valley*.' *Valley* is the correct translation in both cases (cf. Josh. xii. 2). Again, in Josh. xiii. 6 the sacred writer is represented as speaking of 'a city that is in the midst of *the river*;' it means of course *valley* (cf. 2 Sam. xxiv. 5). Frequent mention is made of the '*brook* Kidron' (2 Kings xxiii. 6, 12; 2 Chron. xv. 16; xxix. 16; xxx. 14); but *valley* is the true meaning. In Ps. lxxviii. 20 is the following: 'He smote the rock, that the waters gushed out, and the *streams* overflowed.' It ought to be '*the valleys* overflowed.' This word is also translated 'flood' in 2 Sam. xxii. 5; Job xxviii. 4, etc.

The frequent use of the word *Nakhal* in Scripture, and the clear distinction drawn between it and *Nahar* by the sacred writers, are indicative of the physical character of Palestine—'a land of hills and *valleys*;' a land in which nearly all the valleys are dry in summer, and the beds of torrents during the winter rains. The Arabic word *wady* is the modern equivalent of the Hebrew *nakhal*. It means a valley, glen, or ravine of any kind, whether the bed of a perennial stream, or of a winter torrent, or permanently dry. Like its Hebrew equivalent it is also sometimes applied to the river or stream which flows in the valley; but not so commonly as *nakhal*. In reading the Hebrew Scriptures the context alone enables us to decide the meaning attached by the writer in each passage to the word *nakhal*. In a few instances it appears to be used in two senses in the very same sentence (cf. 1 Kings xvii. 3-7, etc.)

7. פֶּלֶג (*Peleg*). The root of this word appears to be the same as that of φλέω, φλώω, flow, fluo, plus, and the English *flow*; its meaning is 'to gush' or 'flow over.' *Peleg* is equivalent to the

Arabic فَلَاح, 'a stream,' and is always given to

something *flowing*. Thus in Job xxix. 6, 'The rock poured me out *ivers* of oil;' and Lam. iii. 48, 'Mine eye runneth down with *ivers* of water.' In the Bible it is used ten times, and is translated *ivers*, except in Ps. xli. 4, where it is rendered *streams*.—J. L. P.

RIVER OF EGYPT. This term occurs eight times in the O. T. In one of these the word translated *river* is נָהָר, while in all the others it is

נַחַל. The preceding remarks on these two terms, and the clear distinction drawn between them by the sacred writers, will show that in the above pas-

sages they can scarcely be regarded as identical in meaning, and that in all probability *Nahar Mitzraim* is to be regarded as distinct from *Nakhal Mitzraim*. To determine this point, it will be necessary to examine critically the several passages in which the words occur, and the light that may be thrown upon them by parallels. Geographically, the question is of importance, as determining the southern border of 'the land of promise,' and of 'the land of possession.'

1. *Nahar Mitzraim* (נָהָר מִצְרַיִם, 'The river of Egypt'). The land which the Lord gave in covenant promise to Abraham is thus described in Gen. xv. 18: 'Unto thy seed have I given this land, from the *river of Egypt* unto the great river, the river Euphrates.' The Septuagint renders 'river of Egypt,' ἀπὸ τοῦ ποταμοῦ Αἰγύπτου; and the Vulgate, a *fluvio Aegypti*. The word נָהָר, as has been stated, like ποταμός and *fluvius*, means '*river*.' But the Nile is the only river of Egypt, and hence it is natural to conclude that the Nile is here meant. So it is understood by most commentators (Kalisch, Delitzsch, etc., *ad loc.*) It is true the extent of territory thus defined was never actually occupied by the seed of Abraham; nor was it possessed except perhaps during the reigns of David and Solomon [PALESTINE].

2. *Nakhal Mitzraim* (נַחַל מִצְרַיִם) occurs seven times in the Bible. In six of these the A. V. translates 'river,' and in one 'stream' (Is. xxvii. 12). The Septuagint has χειμάρρος in Num. xxiv. 6; Josh. xv. 47; 2 Kings xxiv. 7; and 2 Chron. vii. 8; φάραγξ in Josh. xv. 4; ποταμός in 1 Kings viii. 65; and ῥινωκορούρων in Is. xxvii. 12. The Vulgate has *riens* in 1 Kings viii. 65 and 2 Kings xxiv. 7, but *torrents* in the others. The proper meaning of *nakhal* is 'valley,' though it is sometimes, as has been stated (see above), applied to the winter-streams of Palestine. It could not with any propriety be applied to a large permanent river like the Nile. What, therefore, do the sacred writers mean by *Nakhal Mitzraim*?

In describing to Moses the land of Canaan, which the Israelites were about to enter and possess, the Lord stated that the southern boundary should extend from Kadesh-Barnea to 'the *river of Egypt*,' or more correctly 'the *wady* (valley) of Egypt' (Num. xxxiv. 5). And, after the conquest, the southern border of Judah extended to the same points (Josh. xv. 4, 47). The country over which the Israelites had spread in the time of Solomon was 'from the entering in of Hamath unto the *river of Egypt*' (1 Kings viii. 65; 2 Chron. vii. 8). In all these passages it will be observed that the country described is much smaller than that given in covenant-promise to Abraham, extending only on the north as far as the entrance of Hamath. This has already been explained in the article PALESTINE.

Two other passages in which the term is employed are more difficult. In 2 Kings xxiv. 'the river of Egypt' is mentioned as the proper boundary of that country; and it is said of the king of Babylon, that he had taken 'from the *river of Egypt* to the river Euphrates all that pertained to the king of Egypt.' The expression nearly resembles that in Gen. xv. 18, where the river Nile is meant (see above). A similar form is used by Isaiah (xxvii. 12); and there the Septuagint has rendered *Nakhal-Mitzraim* by *Rhinocorura*, which was the name of

a town now called el-Arish. If this be correct, then *Nakhal-Mitzraim* must be identified with Wady el-Arish, a valley and small winter stream which falls into the Mediterranean near this town. This is the view adopted by most of the old commentators (see in Gesenius, *Thes.*, p. 872; Reland, *Pal.*, p. 969, and authorities there cited). Jerome states that Rhinocorura was situated on the borders of Palestine and Egypt, and that the 'river (*torrens*) of Egypt' was near it (*Comment. ad Jes.* xix., and xxvii.; *ad Amos* vi.) Ancient geographers and historians describe Egypt as extending to this city (Eusebius, *Onomast.*, s.v.; Diod. Sic., i. 60; Strabo, xvi. p. 780; Reland, p. 286). This torrent, or valley, derived its notoriety from being the boundary of two great countries; and hence in Ezek. xlvii. 19 and xlviii. 28 it is called emphatically 'the valley' (A. V., 'the river').

There is nothing, therefore, in any of the passages of Scripture in which this term occurs, nor in the geographical notices in other passages, nor is there anything in the old geographers or historians tending to identify *Nakhal Mitzraim* with the Nile. This appears more clearly when the proper distinction is drawn between the country given in covenant promise to Abraham, and that actually allotted to the Israelites (PALESTINE; Bochart, *Opera*, i. 62).

It may be inferred that the first term, *Nahar Mitzraim*, ought to be translated 'the river of Egypt;' and that it was the designation of the Nile in Abraham's time, before the Egyptian word *yedôr* became known. The other term, *Nakhal Mitzraim*, might be rendered 'torrent, or wady, of Egypt.' It was applied to Wady el-Arish, which acquired its importance and notoriety from the fact of its marking the boundary between Palestine and Egypt.—J. L. P.

RIZPAH (רִצְפָּה, *a coal*; Sept. Ῥεσφά), a concubine of Saul, memorable for the touching example of maternal affection which she afforded, in watching the dead bodies of her sons, and driving the birds away from them, when they had been gibbeted by the Gibeonites (2 Sam. iii. 7; xxi. 8, 10, 11).

ROADS. In the East, where travelling is performed mostly on some beast of burden, certain tracks were at a very early period customarily pursued; and that the rather as from remote ages commerce and travelling went on by means of caravans, under a certain discipline, and affording mutual protection in their passage from city to city, and from land to land. Now wherever such a band of men and animals had once passed they would form a track which, especially in countries where it is easy for the traveller to miss his way, subsequent caravans or individuals would naturally follow; and the rather inasmuch as the original route was not taken arbitrarily, but because it led to the first cities in each particular district of country. And thus at a very early period were there marked out on the surface of the globe lines of intercommunication, running from land to land, and in some sort binding distant nations together. These, in the earliest times, lay in the direction of east and west, that being the line on which the trade and the civilisation of the earth first ran.

The purposes of war seem, however, to have furnished the first inducement to the formation of

made or artificial roads. War, we know, afforded to the Romans the motive under which they formed their roads; and doubtless they found them not only to facilitate conquest, but also to insure the holding of the lands they had subdued; and the remains of their roads which we have under our own eyes in this island show us with what skill they laid out a country, and formed lines of communication. To the Romans, chiefly, was Palestine indebted for such roads.

There seem, indeed, to have been roads of some kind in Palestine at an earlier period. Language is employed which supposes the existence of artificial roads. In Is. xl. 3 are these words, 'Prepare ye the way of the Lord, make straight in the desert a highway for our God. Every valley shall be exalted, and every mountain and hill shall be made low; and the crooked shall be made straight and the rough places plain.' There cannot be a more graphic description of the operations and results connected with the formation of a long and important road. That this is the language of prophetic inspiration affords no objection, but rather confirms our view; for poetry, as being an appeal to widely-spread feelings, grounds itself in such a case as this on fact; nor could such imagery as we find here have been employed, had artificial roads been unknown in Palestine. Nor is the imagery unusual (comp. Is. xi. 16; xix. 23; xxxiii. 8; xxxv. 8; xlix. 11; lxii. 10). In 1 Sam. vi. 12 we read, 'The kine went along the highway, lowing as they went, and turned not aside to the right hand or to the left.' In Numbers also (xx. 17), 'We will go by the king's highway,' etc. (xxi. 22; Deut. ii. 27; Lev. xxvi. 22). Whether or not these were roads in the modern acceptation of the term, we know from the law regarding a free, open, and good passage to the cities of refuge (see that article, and Deut. xix. 3, compared with *Mishna*. tit. *Maccoth*), that the minds of the Israelites were early familiarised with the idea: 'Thou shalt prepare thee a way,' etc., 'that every slayer may flee thither.' And, much as we hesitate to differ from so high an authority, we cannot agree with Winer (*Real-wört.* in 'Strasse'), that this last-cited passage stands alone; for other passages have been given which, when taken in conjunction with it, seem to prove that to some extent artificial roads were known to the Hebrews in the commencement of their commonwealth. Indeed, it is highly probable that the Hebrews had become acquainted with roads during their sojourn in Egypt, where, in the Delta especially, the nature of the country would require roads and highways to be thrown up and maintained. Josephus (*Antiq.* viii. 7. 4) expressly says, 'Solomon did not neglect the care of the ways, but he laid a causeway of black stone (basalt) along the roads that led to Jerusalem, both to render them easy for travellers and to manifest the grandeur of his riches.' Winer, indeed, remarks that Josephus's roads find no support in the Bible. But although these particular roads may not be mentioned, it does not hence follow that they did not exist; but mention is made, as we have seen, of ways and highways in the Scriptural authorities. To the Romans, however, Palestine was greatly indebted for its roads. On this subject Reland (*Palestina*) has supplied useful information. In the East generally, and in Palestine in particular, the Romans formed roads, and set up milestones, in imitation of what

they had done in Italy. These stones bore the names *σημεία*, *στήλοι*, and *κίονες*. From the fact of their existing in Palestine, Eusebius, in his *Onomasticon*, frequently uses the terms *ἐν ἑκτῷ σημείῳ*, and similar phrases. In Reland's time fragments of these milestones still remained.

For the merely internal Palestinian roads, Reland may be consulted. He gives a list of them (iii. 2), which will supply the reader with the requisite information, especially if studied under the corrections supplied by recent travellers.

Our remarks will be confined to roads which connected Palestine with other countries, since a notice of the internal roads as well, if at all complete, would require too much space.

The Phœnicians, as a mercantile people, maintained a connection not only with the West, by sea, but also, overland, with the East. They had two great commercial highways. One came out of Arabia Felix, through Petra. The other struck from the northern extremity of the Persian Gulf, through Palestine, to Tyre.

The first road in Palestine which we mention ran from Ptolemais, on the coast of the Mediterranean, to Damascus. This road remains to the present day. Beginning at Ptolemais (Acco), it ran south-east to Nazareth, and continuing south and east, passed the plain of Esdraelon on the north; after which, turning north and east, it came to Tiberias, where, running along the sea of Galilee, it reached Capernaum, and having passed the Jordan somewhat above the last place, it went over a spur of the Anti-Libanus (Jebel-Heish), and keeping straight forward east by north, came to Damascus. This road was used for the purposes both of trade and war. In the history of the Crusades it bears the name of Via Maris. It connected Europe with the interior of Asia. Troops coming from Asia over the Euphrates passed along this way into the heart of Palestine. Under the Romans it was a productive source of income. It was on this road, not far from Capernaum, that Jesus saw Matthew sitting 'at the receipt of custom,' and gave him his call to the apostleship.

Another road passed along the Mediterranean coast southward into Egypt. Beginning at Ptolemais, it ran first to Cæsarea, thence to Diospolis, and so on, through Ascalon and Gaza, down into Egypt. This was also an important line of communication, passing as it did through cities of great importance, running along the coast and extending to Egypt. A glance at the map will show how important it was for trade by land and by sea, as well as for the passage of troops. A branch of this road connected the sea with the metropolis leading from the same Cæsarea through Diospolis to Jerusalem. Down this branch Paul was sent on his way to Felix (Acts xxiii. 23-33). The band went through Antipatris, and thence on to Cæsarea.

A third line of road connected Galilee with Judæa, running through the intervening Samaria (Luke xvii. 11; John iv. 4; Joseph. *Antiq.* xx. 6. 1; *Vita*, sec. 52). The journey took three days. Passing along the plain of Esdraelon the traveller entered Samaria at Ginea (Jenin), and was thence conducted to Samaria (Sebaste), thence to Shechem (Nablous), whence a good day's travel brought him to Jerusalem. This last part of the journey has been described by Maundrell (*Journey*, p. 85, *seq.*)

In the time of the Romans there was also a road from Jerusalem to the lake Gennesareth, through Shechem and Scythopolis. The same road sent a branch off at Scythopolis, in a westerly direction through Esdraelon to Cæsarea; and another branch across the Jordan to Gadara, on to Damascus, along which line of country there still lies a road, southward of the sea of Galilee, to the same celebrated city.

There were three chief roads running from Jerusalem. One passed in a north-easterly direction over the Mount of Olives, by Bethany, through openings in hills and winding ways on to Jericho, near which the Jordan was passed when travellers took their way to the north, if they wished to pass through Peræa: which was the road the Galilean Jews, in coming to and returning from the festivals in the capital, were accustomed to take, thus avoiding the unfriendly territory of Samaria; or travellers turned their faces towards the south, if they intended to go towards the Dead Sea. This road was followed by the Israelites when they directed their steps towards Canaan. Through Peræa the Syrian and Assyrian armies made their hostile advances on Israel (2 Kings viii. 28; ix. 14; x. 32, *seq.*; 1 Chron. v. 26).

A second road led from Jerusalem southward to Hebron, whence travellers went through the wilderness of Judæa to Aila, as the remains of a Roman road still show; or they might take a westerly direction on to Gaza, a way which is still pursued, and is of two days' duration. The ordinary way from Jerusalem to Gaza appears, in the Roman period, to have lain through Eleutheropolis and Ascalon. From Gaza through Rhinocorura and Pelusium was the nearest road down into Egypt from Jerusalem (*Antiq.* xiv. 14. 2). Along this road many thousand prisoners, made by Vespasian in his capture of Jerusalem, were sent to Alexandria in order to be shipped for Rome. Of these two roads from Jerusalem to Gaza, one went westward by Ramlah and Ascalon; the other southward by Hebron. This last road Raumer (*Palästina*, p. 191; see also his *Beiträge*, published after Robinson's work on Palestine, namely in 1843, correcting or confirming the views given in his *Palästina*, 1838) is of opinion was that which was taken by Philip (Acts viii. 26, *seq.*), partly because tradition states that the eunuch was baptized in the vicinity of Hebron, and this road from Jerusalem to Hebron runs through the 'desert' Thekoa (Thecua), in the *Onomasticon*. And here he finds the reason of the angel's command to go 'towards the south;' for Hebron lay south of Jerusalem; whereas but for this direction Philip might have gone westward by Ramlah. Robinson, admitting that there is a road from Jerusalem to Hebron, maintains (ii. 640; i. 320) that Philip went by a third road, which led down Wady Musurr to Betogabra (Eleutheropolis), and thinks that he has found at *Tell el-Hasy* the spot where the eunuch received baptism. But, says Raumer (*Beiträge*, p. 41), this road ran in a south-westerly direction, and Philip was commanded to go towards the south, for which purpose he must have gone by Hebron. Raumer then proceeds to confirm his original position. Jerome, in his *Life of Paula*, testifies that a road from Jerusalem to Gaza went through Hebron. Paula travelled from Jerusalem to Bethlehem, which lay south of the city: 'When she reached Bethlehem she quickened the pace of

her horse, and took the old road which leads to Gaza.' This road conducted to Bethsur (a little north of Hebron), 'where,' says Jerome, 'while he read the Scriptures, the eunuch found the gospel fountain.' 'This,' adds Raumer, 'is the same Bethsur of which Jerome, in his *Onomasticon*, says, 'As you go from Elia to Hebron, at the twentieth milestone, you meet Bethsoron, near which, at the foot of a mountain, is a fountain bubbling out of the soil. The Acts of the Apostles state that the chamberlain of Queen Candace was baptized in it by Philip.' From Bethsur Paula proceeded to Hebron. The *Itinerarium Hierosolymitanum* (of the year 333) mentions Bethsur as the place where the baptism was performed.'

Raumer concludes by remarking—'Robinson rightly rejects tradition when it contradicts the Sacred Scriptures, but he must also reject those pretended scientific theories which contradict Holy Writ. Such hypotheses may easily become the groundwork of scientific legends. To fix the baptismal-place of the chamberlain at Tel el-Hasy contradicts the Scripture; but Bethsur, which has from the earliest ages been so accounted, agrees with the passage in the Acts of the Apostles.'

There only remains for us to mention what Winer reckons the third of the three great roads which ran from Jerusalem; this third road went to the Mediterranean at Joppa (Jaffa), a way which from the time of the Crusades has been taken by pilgrims proceeding to the Holy City from Egypt and from Europe.

#### ROAST. [FOOD.]

ROBINSON, EDWARD, D.D., was born at Southington, Connecticut, in 1794. He studied at Hamilton College, New York, and at Andover, Massachusetts; at the latter of which he became assistant professor of Biblical literature in 1821. In 1826 he visited Europe, and spent some time at Paris, Halle, and Berlin, in the prosecution of the study of the Oriental languages and theology. On his return, in 1830, to America, he resumed his duties at Andover, and some time after became professor of Biblical literature at New York. In 1838 he commenced his travels in the East, the account of which appeared in his *Biblical Researches in Palestine, Mount Sinai, and Arabia Petraea*, 3 vols. 8vo, Lond. 1841, a work which supplies the most valuable contribution that modern learning and enterprise have made to our knowledge of Biblical geography and topography. A second exploration of the Holy Land was made by him in 1851, the result of which he published under the title of *Later Biblical Researches in Palestine*, Lond. 1856. The design of both these journeys was to collect materials for a systematic work on the physical and historical geography of the Holy Land. On this the author was engaged at the time of his death. It has since been published so far as completed, Lond. 1865. Besides these works, Dr. Robinson published a translation of Buttmann's *Larger Greek Grammar*, 1833; and of Gesenius's *Heb. and Chald. Lexicon*, 1836; a work which, in the 5th edit. (1854), was largely improved from various sources, especially the

*Thesaurus* of Gesenius. He issued also *A Harmony of the Four Gospels in Greek*, 1834; and wrote numerous articles in the *Bibliotheca Sacra*, of which he was the founder. He died in 1864.—W. L. A.

ROE. [ANTELOPE; species TSEBI.]

ROLL. [WRITING.]

ROLLOCK, ROBERT, first principal of the University of Edinburgh, was born 1555, and died at the age of forty-three. In 1583, when that university was founded, he was invited to take the chief management of it, and in 1585 the magistrates of the city—the founders and patrons of the university—testified their sense of the value of his labours by constituting him principal. He seems to have taught philosophy at first, but ultimately his chief work was the tuition of the students in theology. In addition to his labours as principal and professor in the university, and in spite of his natural disposition for a retired and studious life, he exerted himself in various ways for the public interests of religion in Scotland, and was chosen in consequence, on one occasion, moderator of the General Assembly. Observing the crowds that gathered early, in one of the churches, on the mornings of the Lord's day, he began a course of lectures to them at 7 A.M. His subject was the Epistle to the Ephesians, and when he had finished the course, he published, in 1590, a *Commentary on the Epistle*. About the same time he published a logical analysis of the *Epistle to the Romans*. The learned Beza held these works in the highest esteem: 'I have never read,' he says, 'in this kind of interpretation, anything exceeding them in elegance and sound judgment united with brevity.' Besides sermons and treatises, other works by this author appeared both before and after his death: a *Commentary on Daniel*, 1591; *Commentaries on the 1st and 2d Epistles to the Thessalonians, with an Analysis of the Epistle to Philemon*, 1598; upon the following fifteen Psalms, iii., vi., xvi., xxiii., xxxii., xxxix., xlii., xlix., li., lxii., lxxv., lxxvii., cxvi., cxxx., and cxxxvii., in 1599; upon the *Gospel of John*, 1599; upon the *Epistle to the Colossians*, 1600; upon the *Epistles to the Corinthians*, 1600; *Analysis Logica of the Epistle to the Galatians*, 1602; and *Analysis Logica of the Epistle to the Hebrews*, 1605. It may be added that all these works are in Latin, and that they were frequently reprinted. Some of them were printed or reprinted at Geneva and in other continental cities. The precise object of most of the author's productions is the simple and lucid illustration of the course of thought and reasoning pursued by the sacred writers, with a brief but clear and comprehensive explanation of the verses and clauses separately, and the more important words. Dr. M'Crie (*Life of Melville*, ii. 308) commends them as 'perspicuous, succinct, and judicious.' They are not disfigured by any logical formalism. For the purpose they were intended to serve—analytical exposition—they are of considerable value.—W. H. G.

ROMAN EMPIRE. This article having more particularly to treat of Roman history during its connection with that of Palestine, more fullness will be found in the account especially devoted to that country, than in the present remarks upon the earlier and later history of the Roman Empire.

The first mention of Rome in the Bible is in

1 Maccab. i. 10, where it is stated that there arose 'a wicked root, Antiochus, surnamed Epiphanes, son of Antiochus the king, who had been an hostage at Rome.' About the year B.C. 161, when Judas Maccabæus heard of the defeat of Philip, Perseus, and Antiochus, and of the great fame of the Romans, he sent an embassy to them to solicit an alliance, and to obtain protection against the Syrian government (1 Maccab. viii. 1, *seq.*; cf. 2 Maccab. xi. 34; Joseph. *Antiq.* xii. 10. 6; Justin xxxvi. 3). The ambassadors were graciously received, and Demetrius ordered to desist from harassing the Jews; but before the answer arrived Judas was slain, having valiantly engaged the whole army of Bacchides sent by Demetrius into Judæa (1 Maccab. ix. 1-18; Joseph. *Antiq.* xii. 11. 1). In B.C. 143, Jonathan renewed the alliance with the Romans (1 Maccab. xii. 1-4, 16; Joseph. *Antiq.* xiii. 5. 8), the embassy being admitted before the senate (*το βουλευτήριον*), and on his death, the same year, his brother Simon, who succeeded him, sent also to Rome to again seek a renewal of friendship. The Romans readily acceded to his request, and the valiant deeds of Simon and his predecessors were engraved on tables of brass. Shortly afterwards, Simon sent Numenius to Rome with a great shield of gold, of a thousand pounds weight, to confirm the league with them. The senate at once consented to its re-establishment, and recognised him as high-priest and prince of Judæa. The tables of brass on which the league was written were set up in the temple (1 Maccab. xiv. 17, *seq.*; cf. Joseph. *Antiq.* xiii. 7. 3). Lucius, the consul of the Romans, wrote to several kings and nations requesting them to assist the Jews (1 Maccab. xv. 16-23 [LUCIUS]). Hyrcanus, the successor of Maccabæus, again sent in B.C. 129 an embassy to Rome, which was favourably received, confirming the alliance already concluded (Joseph. *Antiq.* xiii. 9. 2). In the year B.C. 66, Pompey arrived in the East to take command of the Roman armies, and sent his general Scaurus to Syria. While at Damascus, the latter received an offer of 400 talents from Aristobulus and Hyrcanus, who were both fighting for the kingdom, each one wishing to be aided. Scaurus accepted the offer of Aristobulus, and ordered Aretas, who was assisting Hyrcanus, to withdraw his forces, or he would be declared an enemy to the Romans (Joseph. *Antiq.* xiv. 2. 3). The following year Pompey came into Syria, and deprived Antiochus XIII. (Asiaticus) of his kingdom, reducing it to a Roman province. Ambassadors were sent to Pompey from the rival princes, and in B.C. 64, when Pompey returned again to Damascus from Asia Minor, their respective causes were heard by him. Notwithstanding the prejudices of the people in favour of Aristobulus, Pompey, perceiving the weakness of character and imbecility of Hyrcanus, seemed to incline towards the latter, knowing that it was better to have a weak man under the Roman control. He, however, left the matter undecided, and Aristobulus, seeing that his case was lost, withdrew to make preparations for defence (Joseph. *Antiq.* xiv. 2. 3). Pompey then occupied himself in reducing the forces of Aretas, and afterwards marched against Aristobulus, who fled to Jerusalem. Aristobulus, on his approach, met him, and offered him a large sum of money, and Pompey sent Gabinius to receive it; but on his arrival at Jerusalem he found the gates closed.

Aristobulus was then thrown into prison, and Pompey marched to Jerusalem. Hyrcanus opened the gates to him, whilst the party of Aristobulus, including the priests, shut themselves up in the temple, and withstood a siege of three months. Pompey, observing that the Jews did not work on the seventh day, gained material advantage, and at last took the place by assault, killing, according to Josephus, as many as 12,000 persons, even desecrating the temple by entering the Holy of Holies (cf. Tac. *Hist.* v. 9), though he did not touch any of the treasures. Hyrcanus was then appointed high-priest and governor of the country, but was forbidden to wear a diadem (cf. Joseph. *Antiq.* xx. 10). Tribute was also exacted of him, and Pompey took Aristobulus and his two sons, Alexander and Antigonus, prisoners to Rome, from whence they subsequently escaped (Joseph. *Antiq.* xiv. 3. 2; 4. 2, 3, 4; *Bell. Jud.* i. 7. 6; Strabo, xvi. p. 763).

The restoration of Hyrcanus was, however, merely nominal, as the Idumæan Antipater, an active friend of the Romans, was placed over him as governor of Judæa. 'Now began the struggle which was destined to continue with little intermission for nearly two hundred years. It was nourished by feelings of the deadliest animosity on both sides; it was signalled by the most frightful examples of barbarity, in which each of the contending parties strove to outdo the other; but it was directed by a controlling Providence to a beneficial consummation, in the destruction of the Jewish nationality, and the dispersion throughout the world of the Christian communities.\*'

In the year 57 B.C., Alexander, the eldest son of Aristobulus, escaped from Pompey, and took up arms in Judæa. Hyrcanus upon this applied for assistance to Gabinius, the Roman proconsul of Syria, who thereupon sent Mark Antony with a large force into Judæa. Antony, being joined by Antipater with the forces of Hyrcanus, defeated Alexander, and compelled him to fly to Alexandria. Gabinius soon after arrived, and through the mediation of the mother of Alexander, made peace with him and allowed him to depart. After these matters were settled, Gabinius went to Jerusalem, and there committed the care of the temple to Hyrcanus, thus changing the government from a monarchy to an aristocracy. At the same time he instituted five councils (*συνέδρια*) instead of the two sanhedrims which had existed in every city, and he distributed these five among five cities. These were Jerusalem, Gadara, Amathus, Jericho, and Sephoris, in Galilee (Joseph. *Antiq.* xiv. 5. 4).

In B.C. 54 Gabinius was superseded in the government of Syria by Crassus, who plundered the temple of about 10,000 talents, notwithstanding that a beam of gold of immense value had been given him, on condition that he would touch nothing else in the temple (Joseph. *Antiq.* xiv. 7. 1). All this time Antipater was gaining influence with the Romans, and after the death of Pompey, in B.C. 48, he was very useful to Julius Cæsar in his war against Egypt. In return for this, he made Antipater procurator of Judæa, gave him the privilege of a citizen of Rome, and freedom from taxes everywhere. Hyrcanus also was confirmed in the priesthood and

\* See Merivale's *Romans under the Empire*, vol. iii. chap. xxix., where the events of the period are admirably summed up.

ethnarchy, the claims of Antigonos, the only surviving son of Aristobulus, being put on one side, and thus the aristocratical constitution of Gabinus was abolished (Joseph. *Antiq.* xiv.) The ascendancy and prosperity of Antipater were now ensured. At this period he had four sons. Two of them, Phasaël and Herod, were holding important posts, the former being governor of Jerusalem and the latter governor of Galilee. An account of the many intrigues and tragedies of the next forty years will be found under the HERODIAN FAMILY.

The Jewish people, being at last worn out with the disputes and cruelties of the Herods, sent a mission to Rome, begging that Judæa might be made a Roman province. In the year A.D. 6, Archelaus was banished, and Judæa put under the government of Rome. The first procurator appointed was Coponius, who accompanied Cyrenius (the Greek form of the Roman name *Quirinus*) into Syria. The latter had been sent to take an account of their substance, and to make a census or ἀπογράφη [CHRONOLOGY; CYRENIUS] of the inhabitants of Judæa (Luke ii. 1; Joseph. *Antiq.* xvii. 13. 5; xviii. 1. 1; *Bell. Jud.* ii. 8. 1). In A.D. 10 Coponius was succeeded by Marcus Ambivivus, who remained at the head of the government till A.D. 13, and was then replaced by Annus Rufus. The next year Augustus died. On the accession of Tiberius, Valerius Gratus was made procurator, a post he filled for eleven years, and was succeeded (A.D. 25) by Pontius Pilate (Joseph. *Antiq.* xviii. 2. 2), who entered Jerusalem with the military ensigns, on which were the effigies of the emperor. The Jewish law forbids the making of images, and a great tumult arose, and shortly Tiberius ordered him to withdraw them (Joseph. *Antiq.* xviii. 3. 1; *Bell. Jud.* ii. 9. 3). Pilate tyrannically governed the Jews till A.D. 35, and at last, owing to continual complaints, was ordered by Vitellius, the president of Syria, to proceed to Rome to give an account of his administration. Tiberius died before he arrived, and he put an end to his life at the commencement of the reign of Caius (Caligula) (Joseph. *Antiq.* xviii. 3. 1-3; 4. 1; *Bell. Jud.* ii. 9. 2; Euseb. *H. E.* ii. 7). It was during his administration that our Lord was condemned and crucified (Matt. xxvii.; Mark xv.; Luke iii. 1; xxiii.; John xviii. xix.) On Pilate's departure, Marullus was appointed over Judæa by Vitellius (Joseph. *Antiq.* xviii. 4. 2). The new emperor Caius, however, superseded him, and appointed Marcellus procurator of Judæa (Joseph. *Antiq.* xviii. 6. 10). In A.D. 40 Vitellius was recalled, and Petronius sent as president of Syria, with orders from Caius to set up his statue in the temple. This insult caused the whole nation to rise. The intercession of Agrippa, and ultimately the death of the tyrant, prevented this order from ever being executed (Joseph. *Antiq.* xviii.; *Bell. Jud.* ii. 10; Philo, *Leg. ad Caium*, 26). In the Acts it is recorded that the churches had rest through all Judæa, Galilee, and Samaria (ix. 31), doubtless owing to the impious attempt of Caligula (Joseph. *Antiq.* xviii. 8. 2-9). Under Claudius, who succeeded to the throne in A.D. 41, the Jews had some peace. Agrippa I. was king of the whole country from that period to A.D. 44, when he died, leaving one son. Claudius wished to allow the young Agrippa to rule his father's kingdom, but evidently by persuasion sent a Roman procurator to govern the province (Tac. *Hist.* v. 9). Cuspius Fadus was

the first appointed (Joseph. *Antiq.* xix. 9. 2; xx. 5. 1). It was under his administration that a movement of the whole Jewish people broke forth, in consequence of the sacred vestments being placed under his charge. Longinus, the governor of Syria, interfered, an embassy was sent to Rome, and the matter ended in the Jews being permitted to retain these vestments under their care. Judæa was cleared of robbers by the care and providence of Fadus (Joseph. *Antiq.* xx. 1. 1-2). He was succeeded by Tiberius Alexander, a renegade Jew, and nephew of Philo (Joseph. *Antiq.* xx. 5. 2; *Bell. Jud.* ii. 11. 6). In A.D. 47 Tiberius was recalled, and Ventidius Cumanus appointed in his stead. During his government a fearful tumult ensued, which would have spread far and wide had not Quadratus the governor of Syria interfered. The matter ended in the banishment of Cumanus and the appointment of Felix, the brother of Pallas, the favourite of Claudius, as procurator (Joseph. *Antiq.* xx. 6; 7. 1; *Bell. Jud.* ii. 12; cf. Tac. *Ann.* xii. 54). Felix was procurator from A.D. 52 to A.D. 60. Of his government Tacitus speaks: 'Per omnem sævitiam ac libidinem jus regium servili ingenio exercuit' (*Hist.* v. 9), and his corruptness is shown by his expecting to receive money from St. Paul (Acts. xxiv. 26). He had induced Drusilla, the daughter of Agrippa I., to live with him. She was with him when Paul preached 'of righteousness, temperance, and judgment to come' (Acts xxiv. 25). Felix, however, did some good services while he was in power; for the country being infested with robbers and impostors, he cleared several parts of it. He also drove out the Egyptian impostor (cf. Acts xxi. 38). These are doubtless the *very worthy deeds* alluded to by Tertullus (Acts xxiv. 2). Bearing ill-will against Jonathan the high-priest, Felix had him barbarously murdered. By treachery, also, he put to death Eleazar, the captain of a company of robbers (Joseph. *Antiq.* xx. 8. 5). At last his misgovernment caused his recall, and Porcius Festus succeeded. His government seems to have been milder (Joseph. *Antiq.* xxi. 8. 9; *Bell. Jud.* ii. 14. 1). He heard Paul with king Agrippa at Cæsarea (Acts xxv. xxvi.). Festus died after two years. He was succeeded by Albinus, a bad and cruel man, who, on hearing that Gessius Florus was coming to succeed him, brought out all the prisoners who seemed most worthy of death, and put them to death, and at the same time released many of them, but only on receiving a bribe (Joseph. *Antiq.* xx. 9. 5; *Bell. Jud.* ii. 14. 1). He was recalled in A.D. 65, and Gessius Florus appointed in his stead. He was the last and the worst of the Roman procurators (Joseph. *Antiq.* xx. 9. 1; 11. 1; *Bell. Jud.* ii. 14. 1). Josephus does not hesitate to accuse him of the most flagrant and horrid crimes (*Antiq.* xx. 11. 1; *Bell. Jud.* i. c.), and even Tacitus says that the Jewish patience could endure the yoke no longer (duravit patientia Judæis usque ad Gessium Florum—*Hist.* v. 10). In A.D. 66 Cestius Gallus, the prefect of Syria, found it necessary to march a powerful army into Palestine. He was, however, defeated with great loss, and immediately sent word to Nero, laying the whole blame on Florus—Florus likewise laying the blame on him. He soon afterwards died, as some have supposed, from chagrin or disappointment (Joseph. *Bell. Jud.* ii. 19; Suet. *Vesp.* 4; Tac. *Hist.* v. 10). The follow-

ing year Nero sent Vespasian into Judæa (Joseph. *Bell. Jud.* iii. 1. 2). Accounts of the war and siege of Jerusalem will be found in another article [JERUSALEM]. In 68 Nero died. Galba, Otho, and Vitellius followed in quick succession; and Vespasian himself was elected emperor by the legions in Judæa. In A.D. 70 Titus was sent by his father to conduct the war, and after a four months' siege Jerusalem was taken. Josephus states that 1,100,000 were killed during the siege (*Bell. Jud.* vi. 9. 3), that several were allowed to depart, and an immense number sold to the army and carried captive. These numbers are of course exaggerated [JERUSALEM] (cf. Luke xxi. 24).

Under Trajan the Jews again broke out into open revolt, and the disturbances continued under Hadrian. At last, A.D. 131, one Barcochebas, *the Son of a Star*, was placed at the head of the Jews. Several times the Roman arms were defeated; but Julius Severus, by reducing their fortresses one by one, finally defeated him in A.D. 135. Dion Cassius says that 580,000 Jewish people were slain in these battles (lxix. 14). This statement is as extravagant as that of Josephus (*vide supra*).

In A.D. 136 the emperor Hadrian founded a new city, under the name of *Ælia Capitolina*, to which he gave the privileges of a colony. None but Christians and pagans were allowed to enter (Dion Cass., lxix. 12; cf. Gibbon).

The N. T. history falls within the reigns of Augustus, Tiberius, Caligula, Claudius, and Nero. Only Augustus (Luke ii. 1), Tiberius (Luke iii. 1), and Claudius (Acts xi. 28; xviii. 2), are mentioned, but Nero is alluded to in the Acts from ch. xxv. to the end, and in Phil. iv. 22. The Roman emperor in the N. T. is usually called *Cæsar* (Acts xxv. 10, 11, 12, 21), though sometimes Augustus (Σεβαστός Acts xxv. 21, 25), and once Lord (ὁ κύριος, Acts xxv. 26). We thus find many characteristics of the Roman rule constantly before us in the N. T. The publicans (Luke iii. 12; xix. 2); the tribute money (Matt. xxii. 19); soldiers and centurions recruited in Italy (Acts x. 1); Cæsar the only king (John xix. 15); the tetrarchs, Herod, Philip, and Lysanias; the appeal against the governor (Acts xxv. 11); Roman money, etc.

In order to illustrate the connection of Rome with Palestine it will be as well to give an account, necessarily brief, of the principal relations of the Empire with the N. T. history and the Jews.

At the time of Augustus the finest countries of Europe, Asia, and Egypt, with all the northern part of Africa, were comprehended in the Roman Empire. The boundaries in Europe were the Rhine and Danube, in Asia the Euphrates and the deserts of Syria, and in Africa the tract of land known at present under the name of Sahara. Subsequent additions were made by Claudius of Britain, and by Trajan of Dacia. [For a list of the provinces, see Gibbon, vol. i. pp. 201-2, ed. Smith, note.]

The population at the time of Augustus has been calculated at eighty-five millions, including both sexes, all ages, and every class of inhabitants (Merivale, *Hist. of the Rom.*, vol. iv. p. 450); and Gibbon (*Decline and Fall*, ch. ii.) reckons the population at the time of Claudius at about one hundred and twenty millions.

The entire armies of the Roman Empire are reckoned at 340,000 men, exclusive of the battalions

maintained in Rome itself, not counting the numerous battalions of auxiliaries levied throughout the Empire (Tac. *Ann.* iv. 5; Merivale, *Hist.* vol. iii. p. 534). Augustus may also be regarded as the founder of a naval power (Merivale, *l. c.*), which has been considered to have numbered 21,000 men (De Champagny, *des Césars*, ii. 429).

450. Roman Emperor and Empress.

Though it was the endeavour of Augustus to make the government introduced by him appear as possessing the forms of the ancient Republic, he had established in fact an absolute monarchy. The prince united in his own person all the attributes of supreme power. It is true that the senate possessed extensive prerogatives. To secure the maintenance of peace in countries which had been subdued by force it became necessary to maintain standing armies in them, and in the year B.C. 27 Augustus arranged that the provinces should be divided between the senate and himself. The governors of those provinces which were assigned to the senate were called proconsuls (*ἀντιπρότοι*, deputies, A. V. Acts xiii. 7; xviii. 12; xix. 38), whatever their previous office may have been (Dion Cass., liii. 13). The imperial provinces, on the other hand, were governed by a Legatus (*πρεσβυτης*) or proprætor (*ἀντιστράτηγος*), even if the officer appointed had been consul. The minor districts of the imperial provinces were governed by a procurator (*ἐπιτροπος*, Dion. Cass., liii. 15, steward A. V., Matt. xx. 8). Augustus brought all the procurators under his control (Dion Cass., liii. 32). Under the Republic they had managed the affairs of private citizens, but under the Empire they discharged the duties performed by the Questors in the senatorial provinces. They controlled the revenue and collected the taxes, and their power extended from these matters to justice and administration (Tac. *Hist.* i. 11). The procurators of Judæa seem to have been under the control of the proconsul of Syria, as Quadratus condemned the indiscretion of the procurator Cumanus (Joseph. *Antiq.* xx. 6. 3; Tac. *Ann.* xii. 54). They are called 'governors' (*ἡγεμόνες*) in the N. T. The

verb (*ἡγεμονεύω*) is employed in Luke ii. 2 to show the nature of the government of Quirinus over Syria. Asia and Achaia were assigned to the senate, and in each case the title of the governor in the Acts is proconsul (*ἀνθύπατος*, xviii. 12; xix. 38). Dion Cass. (liii. 12) informs us that Cyprus was retained by the emperor, but Sergius Paulus is called in the Acts (xiii. 7) 'proconsul.' This is quite correct, as Dion adds that Augustus restored Cyprus to the senate in exchange for another district of the empire. Coins and inscriptions of Cyprus also bear the title 'Proconsul' (cf. Conybeare and Howson, *Life of St. Paul*, vol. i. p. 173, *seq.*; Akerman, *Num. Ill. of N. T.*, p. 41). The procurator sometimes had the power of life and death, as in the case of Pontius Pilate (Tac. *Ann.* xv. 44).

451. Roman Orator and Youth.

The procurator of Judæa resided principally at Cæsarea, and the military forces were generally stationed there (Joseph. *Antiq.* xviii. 3. 1). During the Passover the troops were stationed at Jerusalem, in order to prevent any insurrection from the multitude of visitors at that festival (Acts xxi. 31; xxii. 24; xxiii. 23; Joseph. *Antiq.* xx. 5. 3). The troops consisted of infantry and cavalry (Acts xxiii. 23), and were commanded by tribunes (*χιλιάρχοι*, Acts xxiii. 17) and centurions (*κεντυριῶνες*, Mark xv. 39, 44, 45; *ἐκατοντάρχοι*, Matt. viii. 5; xxvii. 54; Acts x. 1, 22). The former were at the head of the cohorts (*σπεῖραι*), and the latter at the head of the centuria, of which two made a manipule [ARMY]. It was the duty of the soldiers to execute the sentence of death and to keep guard over the prisoners (Matt. xxvii. 27, *seq.*; John xix. 23, *seq.*; cf. Acts xxii. 25), and the garments of those who were executed became their perquisite (John xix. 23). They also guarded the prisoners (Acts xxiii. 23; xxvii. 31). In Acts x. 1 mention is made of the Italian band at Cæsarea. This was probably a cohort serving in Syria composed of natives of Italy, and called *Ἰταλική* to distinguish it from those which consisted of troops raised in Syria (Joseph. *Antiq.* xiv. 15. 10; *Bell. Jud.* i. 17. 1), as we know from Gruter (*Inscr.* ccccxiv. 1) that Italian cohorts were serving in Syria. The *Σπερὴν Σεβαστῆ* (Acts xxvii. 1) could not well be a *cohortus Augusta*, as Winer thinks (*Realw.*, s.v. *Römer*), for no legions were in Syria or Judæa bearing that title, nor could

it be the band levied from Samaria (*ἡλὴ ἱππέων καλουμένη Σεβαστηνῶν*, Joseph. *Antiq.* xix. 9. 2; xx. 6. 1; *Bell. Jud.* ii. 12. 5). Wieseler suggests that it was the *Augustani* mentioned by Tacitus (*Ann.* xiv. 15) and Suetonius (*Nero*, 20, 25). The first levying of this band by Augustus is recorded by Dion Cassius (xlv. 12).

Some of the cities within the provinces were free cities, like Thessalonica, at which there was an assembly of the people (*δῆμος*, Acts xvii. 5) and supreme magistrates called politarchs (Acts xvii. 8). So also were Antioch in Syria, Tarsus, and Athens. Others were colonies, like Philippi, Troas, or Antioch in Pisidia, whose affairs were regulated by *στρατηγοὶ* (A. V. magistrates, Acts xvi. 22). Their proper title was *duumviri*, but they preferred calling themselves by the Roman title prætor (C. and H., i. 345). They were usually attended by lictors (*ραβδουχοὶ*, A. V. sergeants, Acts xvi. 35).

Under this arrangement the welfare of the provinces was greater than it had been under the republic, but the condition of those provinces over which Augustus had special control was often preferable to that of the others, instances being recorded of some of the senatorial provinces requesting to be transferred to the rule of the emperor (Tac. *Ann.* i. 76).

Seeing how great the privileges of a Roman citizen were, the eagerness with which it was sought, and the earnestness with which it was pleaded in case of any unjust treatment, is not to be wondered at. The freedom of Rome was often obtained by purchase for great sums (Acts xxii. 28), though at the time of Claudius it is said that it became so cheap it might be bought for a little broken glass (*Dion Cass.*, lx. 17). A citizen under the republic could in criminal cases, if he were so minded, appeal from the magistrates to the people, for without the acquiescence of the whole Roman people no man could be put to death (Cic., *Tusc. Quæst.*, 4. 1; *In Verr.*, 54, 57). At the commencement of the imperial period it was, however, necessary that the appeal should be made to the emperor, who had assumed the privilege of final adjudication. It was thus that St. Paul, when being tried before Festus, 'appealed unto Cæsar' (Acts xxv. 11; xxvi. 32), fulfilling our Lord's words that he should 'bear witness also at Rome' (Acts xxiii. 11; xxvii. 23; xxviii. 14, 16, 17; 2 Tim. i. 17; iv. 17). St. Paul remained a prisoner about two years, but his trial resulted in his acquittal. About four years after he was arrested at Nicopolis, and sent to Rome for trial. This was at the time of the great fire at Rome under Nero, and the charge of conspiring to set fire to Rome formed one part of the accusation brought against him. He was executed at Rome in the summer of A.D. 68 (cf. C. and H., vol. ii. *passim*) [ST. PAUL]. The scourging of a Roman citizen was contrary to the law, and St. Paul, by the assertion of his Roman citizenship, prevented Claudius Lysias from ordering him to be scourged (Acts xxii. 26-29; xxiii. 27). At an earlier period Paul and Silas had been scourged (Acts xvi. 37), and two Roman laws thereby violated (*Lex Valeria*, B.C. 508; *Lex Porcia*, B.C. 300). They were also illegally treated, being 'uncondemned' (Cic. *Verr.* i. 9; Tac. *Hist.* i. 6) [CITIZENSHIP].

The treatment that the Jews received at the hands of the Romans was at times very moderate. Under Julius Cæsar they were not forbidden to

live according to their customs even in Rome itself (Joseph. *Antiq.* xiv. 10. 8), and Augustus ordered that they should have full freedom of worship, hold their assemblies, and make gifts to their temple; they were even admitted with the citizens to a share in the largesses of corn (Philo, *ad Cai.* p. 1015; cf. Hor. *Sat.* i. 9. 69); and when it fell upon the Sabbath day, Augustus allowed it to be put off to the next day. They were also exempted from military service on account of their religious prejudices (Joseph. *Antiq.* xiv. 10. 11-19; xvi. 6; cf. xix. 5. 3). Suetonius (*Cæs.* 84) records that the Jews were in great grief at the death of Augustus. Tiberius and Claudius banished them from Rome, the latter on account of tumults caused by a certain Chrestus (Tac. *Ann.* ii. 85; Suet. *Tib.* 36; cf. Joseph. *Antiq.* xviii. 3. 5; Suet. *Claud.* 25; Acts xviii. 2) [CLAUDIUS]; but the expulsion by Claudius is contradicted by Dion Cassius (lx. 6), and a few years after the Jews were again at Rome in great numbers (Acts xxviii. 17, *seq.*) The administration of religious ceremonies was committed to the high-priest and Sanhedrim; civil and criminal jurisprudence was retained by them, and they were permitted to pass the sentence of condemnation, but its execution depended upon the procurator (Joseph. *Antiq.* xx. 9. 1; Mark xiv. 53-55, 62-65; John xviii. 31). 'It is not lawful for us to put any man to death' (John, *l. c.*) [See Alford's note on this passage, and Biscoe on the *Acts*, pp. 134-167.] The stoning of Stephen probably took place during a tumult, and not with the sanction of the procurator (Acts vii. 28). Even beyond the borders of Palestine the Jews exercised among themselves the civil jurisdiction according to their laws. Josephus (*Antiq.* xiv. 10. 17) gives a Roman decree to the city of Sardis sanctioning this privilege.

Notwithstanding their privileges the Jews were heavily taxed [TAXES; TRIBUTE]. These consisted of the poll-tax (*κῆνος, φόρος*, Matt. xxii. 17; Luke xx. 22) and the custom-tax (*τέλη*, Matt. xvii. 25). Various passages in the N. T. show how odious the collectors of the tributes (*portitores*, A. V. publicans) were to the Jews (Matt. v. 46; Mark. ii. 15, 16; Luke iii. 12), inasmuch that the Pharisees would hold no communication with them (Matt. ix. 10, 11; xxi. 31, 32).

The Romans carefully abstained from forcing their own language upon the inhabitants of the countries they conquered, though the strictness with which every official act, even to the farthest limits of the empire, was carried out in the Roman language, was never relaxed, but the edicts were generally translated into Greek (Joseph. *Antiq.* xiv. 10. 2). The better educated Romans undoubtedly spoke Greek. The inscription on the cross was written in Hebrew, Roman, and Greek (Luke xxiii. 38; John xix. 20); the Hebrew for the common people, the Latin the official language, and the Greek that usually spoken (Alford, *in loc.*) All the official inscriptions put up by the Romans were called *tituli* (cf. Suet. *in Calig.* 34; *in Dom.* 10); and St. John (*l. c.*) uses the same expression (*ἐγράφη τίτλον*).

The freedom of religious worship enjoyed by the nations subject to Rome was remarkably great, though foreign religions were not allowed to be introduced among the Romans (Liv. xxxix. 16); and it is recorded by Dion Cassius (lii. 36) that Mæcenæ advised Augustus not to permit such innovations,

as they would only tend to destroy the monarchy. This rule was strictly maintained by all his successors. Judaism was an exception, though, as we have seen, the Jews were sometimes expelled from Rome.

Notwithstanding the attempts of Augustus to stop all tendencies to corruption, by punishing immorality, it was chiefly immorality that undermined the empire. With a high civilisation, a flourishing commerce, and general outward refinement, was associated a terrible depravity of morals. Yet the prosperous state of the empire was confessed by the provinces as well as the Romans. 'They acknowledged that the true principles of social life, laws, agriculture, and science, which had been first invented by the wisdom of Athens, were now firmly established by the power of Rome, under whose auspicious influence the fiercest barbarians were united by an equal government and common language' (Gibbon, ch. ii.) The cruelties and exactions of the provincial magistrates were suppressed by Augustus and Tiberius (Tac. *Ann.* iv. 6). Roads were constructed and commerce increased, but all of no avail. Society would not be reformed, and St. Paul draws a striking picture of the corruption of the age (Rom. i. 14-23). 'Charity and general philanthropy were so little regarded as duties that it requires a very extensive acquaintance with the literature of the time to find any allusion to them. There were no public hospitals, no institutions for the relief of the infirm and poor; no societies for the removal of abuses or the improvement of the condition of mankind from motives of charity. Nothing was done to promote the instruction of the lower classes, nothing to mitigate the miseries of domestic slavery, and far less to stop altogether the perpetual atrocities of the kidnapper and the slave-market' (Arnold, *Encyc. Metropol. Hist.*, vol. ii. p. 380). But the spirit of Christianity was floating in the atmosphere, and 'the wisdom of providence was preparing a knowledge which struck root as deeply as the literature of the Augustan age had been scattered superficially' (Arnold, *l. c.*)

The Roman Empire terminated with the anarchy which followed the murder of Justinian II., the last sovereign of the family of Heraclius; and Leo III. or the Isaurian, must be ranked as the first Byzantine monarch (Finlay, *Greece under the Romans*, p. 433).

For the prophetic notices of Rome as the fourth empire, in Daniel xi. 30, 40; vii. 23, etc., see article DANIEL; and for the mention of Rome in the Apocalypse, see article ROME.—F. W. M.

ROMANS, THE EPISTLE TO THE. This epistle claims our interest more than the other didactic epistles of the apostle Paul, because it is more systematic, and because it explains especially that truth which became subsequently the principle of the Reformation—viz., righteousness through faith. Melancthon was so fond of this epistle that he made it the subject of constant lectures, and twice copied it out with his own hand, just as Demosthenes copied Thucydides (comp. Strobel's *Litterär-geschichte der loci Theologici des Melancthon*, p. 13): in these lectures he explained the leading dogmatical and ethical ideas—i.e., the *loci Theologici* which at a later period gave rise to the dogmatical work bearing this title.

I. Time and Place of writing the Epistle.—At

the period when the apostle wrote the Epistle to the Romans, he had passed through a life full of experience. About four years after the composition of this letter Paul calls himself *Πρεσβύτερος*, 'the aged' (Philemon, ver. 9). Paul was at this time between fifty and sixty years old. After having spent two years and a half at Ephesus, he planned a journey to Macedonia, Achaia, Jerusalem, and Rome (Acts xix. 21). Having spent about three months in travelling, he arrived at Corinth, where he remained three months (Acts xx. 2); and during this second abode at Corinth he wrote the Epistle to the Romans (comp. 1 Cor. xvi. 1-3, and 2 Cor. ix. with Rom. xv. 25). Paul dispatched this letter by a Corinthian woman, who was just then travelling to Rome (xvi. 1), and sent greetings from an inhabitant of Corinth (xvi. 23; comp. 1 Cor. i. 14). [The date generally assigned to this epistle is towards the close of A.D. 57, or the beginning of A.D. 58.]

II. *To whom addressed.*—The congregation of Christians at Rome was formed at a very early period, but its founder is unknown. [The opinion that St. Peter was the founder of the church will not stand the test of historical inquiry, and is rejected by all except bigoted adherents of the Romish Church [PETER]. It was probably, however, one of the earliest of the Gentile churches.] Paul himself mentions two distinguished teachers at Rome who were converted earlier than himself. According to Rom. i. 8, the Roman congregation had then attained considerable celebrity, as their faith was spoken of throughout the whole world. From chap. xvi. we learn that there were a considerable number of Christian teachers at Rome, from which we infer that the congregation had existed there for some time; and it is most likely that the Jews at Rome were first converted to Christianity. Under Augustus there were so many Jews at Rome, that this emperor appointed for them quarters beyond the Tiber. These Jews consisted mostly of freedmen, whom Pompey had carried to Rome as slaves. Some of the early Christians at Rome followed mercantile pursuits. [The gospel was probably carried to Rome by some of the Jewish Christians who had gone up to Jerusalem and been converted on the day of Pentecost. As such would vividly recollect and speak much of St. Peter's discourse on that day, and as the founding of the church at Rome by them was the result of their conversion by the preaching of Peter, the tradition of his having been the founder of the church (Euseb., *H. E.*, ii. 14; 25; *Chron.*, p. 372; Hieron., *De Scriptt. Eccles.*, i.; etc.) may have thus arisen.]

At the time when this epistle was written, there were also Gentile Christians in the Roman church; and from passages like xi. 13; xv. 16; i. 7 and 13, we learn that the Gentile Christians were then more numerous than the converted Jews. It is well known that in those times many heathens embraced Judaism (Tacitus, *Annal.*, xv. 44; Juvenal, *Sat.*, xiv. 96). These converts to Judaism were mostly women. Such proselytes formed at that period the point of coalescence for the conversion of the Gentiles. Among the converts from Judaism to Christianity, there existed in the days of Paul two parties. The congregated apostles had decreed, according to Acts xv., that the converts from paganism were not bound to keep the ritual laws of Moses. There were, however, many converts from Judaism who were disinclined to re-

nounce the authority of the Mosaic law, and appealed erroneously to the authority of James (Gal. ii. 9; comp. Acts xxi. 25): they claimed also the authority of Peter in their favour. Such converts from Judaism, mentioned in the other epistles, who continued to observe the ritual laws of Moses, were not prevalent in Rome; however, Dr. Baur of Tübingen supposes that this Ebionitic tendency prevailed at that time in all Christian congregations, Rome not excepted. He thinks that the converts from Judaism were then more numerous than the Gentile Christians, and that all were compelled to submit to the Judaising opinions of the majority (comp. Baur's *Abhandlung über Zweck und Veranlassung des Römerbriefs*, in der *Tübinger Zeitschrift*, 1836). However, we infer from the passages above quoted that the Gentile Christians were much more numerous at Rome than the converts from Judaism. Neander has also shown that the Judaising tendency did not prevail in the Roman church (comp. Neander's *Pflanzung der Christlichen Kirche*, 3d ed., p. 388). This opinion is confirmed by the circumstance that, according to ch. xvi., Paul had many friends at Rome. Dr. Baur removes this objection only by declaring ch. xvi. to be spurious. He appeals to ch. xiv. in order to prove that there were Ebionitic Christians at Rome. It appears, however, that the persons mentioned in ch. xiv. were by no means strictly Judaizing zealots, wishing to overrule the Gentile Christians, but, on the contrary, some scrupulous converts from Judaism, upon whom the Gentile Christians looked down contemptuously. There were, indeed, some disagreements between the converts from Judaism and the Gentile Christians in Rome. This is evident from ch. xv. 6-9, and xi. 17, 18. These debates, however, were not of so obstinate a kind as among the Galatians; otherwise the apostle could scarcely have praised the congregation at Rome as he does in ch. i. 8 and 12, and xv. 14. From ch. xvi. 17-20, we infer that the Judaizers had endeavoured to find admittance, but with little success.

III. *Occasion and Purpose.*—The opinions on this head differ according to the various suppositions of those who think that the object of the letter was supplied by the occasion, or the supposition that the apostle selected his subject only after an opportunity for writing was offered. In earlier times the latter opinion prevailed, as, for instance, in the writings of Thomas Aquinas, Luther, Melancthon, Calvin. In more recent times the other opinion has generally been advocated—as, for instance, by Hug, Eichhorn, and Flatt. Many writers suppose that the debates mentioned in ch. xiv. and xv. called forth this epistle. Hug, therefore, is of opinion that the theme of the whole epistle is the following:—*Jews and Gentiles have equal claim to the kingdom of God.* According to Eichhorn, the Roman Jews, being exasperated against the disciples of Paul, endeavoured to demonstrate that Judaism was sufficient for the salvation of mankind; consequently Eichhorn supposes that the polemics of St. Paul were not directed against Judaizing converts to Christianity, as in the Epistle to the Galatians, but rather against Judaism itself. This opinion is also maintained by De Wette (*Einleitung ins Neue Testament*, 4th ed., sec. 138). According to Credner (*Einleitung*, sec. 141) the intention of the apostle was to render the Roman congregation favourably disposed before his arrival in the chief metropolis; and he therefore en-

deavoured to show that the evil reports spread concerning himself by zealously Judaizing Christians were erroneous. This opinion is nearly related to that of Dr. Baur, who supposes that the real object of this letter is mentioned only in ch. ix. to xi. According to Dr. Baur, the Judaizing zealots were displeased that by the instrumentality of Paul such numbers of Gentiles entered the kingdom of God, that the Jews ceased to appear as the Messianic people. Dr. Baur supposes that these Judaizers are more especially refuted in ch. ix. to xi., after it has been shown in the first eight chapters that it was in general incorrect to consider one people better than another, and that all had equal claims to be justified by faith. Against the opinion that the apostle, in writing the Epistle to the Romans, had this particular polemical aim, it has been justly observed by Rückert (in the 2d ed. of his *Commentar*), Olshausen, and De Wette, that the apostle himself states that his epistle had a general scope. Paul says in the introduction that he had long entertained the wish of visiting the metropolis, in order to confirm the faith of the church, and to be himself comforted by that faith (ch. i. 12). He adds (i. 16), that he was prevented from preaching in the chief city by external obstacles only. He says that he had written to the Roman Christians in fulfilment of his vocation as apostle to the Gentiles. The journey of Phoebe to Rome seems to have been the external occasion of the epistle: Paul made use of this opportunity by sending the sum and substance of the Christian doctrine in writing, having been prevented from preaching in Rome. Paul had many friends in Rome who communicated with him; consequently he was the more induced to address the Romans, although he manifested some hesitation in doing so (xv. 15). These circumstances exercised some influence as well on the form as upon the contents of the letter; so that, for instance, its contents differ considerably from the Epistle to the Ephesians, although this also has a general scope. The especial bearings of the Epistle to the Romans are particularly manifest in ch. xiii. to xvi.; Paul shows to both Jews and Gentiles the glory of Christianity as being *absolute religion*, and he especially endeavours to confirm the faith of the converts from Judaism (iv.); Paul refers to the circumstance that in Rome the number of Gentile Christians was much greater than that of the converted Jews, and he explains how this was consistent with the counsel of God. He endeavours to re-establish peace between the contending parties; consequently he had to produce many arguments which might be converted into polemics (*Polemik*) against the Jews; but it does by no means follow that such polemics were the chief aim of the apostle.

IV. *Contents of the Epistle.*—It belongs to the characteristic type of St. Paul's teaching to exhibit the gospel in its historical relation to the human race. In the Epistle to the Romans, also, we find that peculiar character of St. Paul's teaching which induced Schelling to call St. Paul's doctrine a philosophy of the history of man. The real purpose of the human race is in a sublime manner stated by St. Paul in his speech in Acts xvii. 26, 27; and he shows at the same time how God had, by various historical means, promoted the attainment of his purpose. St. Paul exhibits the O. T. dispensation under the form of an institution for the education of the whole human race, which

should enable men to terminate their spiritual minority, and become truly of age (Gal. iii. 24, and iv. 1-4). In the Epistle to the Romans, also, the apostle commences by describing the two great divisions of the human race—viz., those who underwent the preparatory spiritual education of the Jews, and those who did not undergo such a preparatory education. We find a similar division indicated by Christ himself (John x. 16), where he speaks of one flock separated by hurdles. The chief aim of all nations, according to St. Paul, should be the *δικαιοσύνη ἐνώπιον τοῦ θεοῦ*, *righteousness before the face of God*, or absolute realisation of the moral law. According to St. Paul, the heathen also have their νόμος, law, as well religious as moral internal revelation (Rom. i. 19, 32; ii. 15). The heathen have, however, not fulfilled that law which they knew, and are in this respect like the Jews, who also disregarded their own law (ii.) Both Jews and Gentiles are transgressors, or by the law separated from the grace and sonship of God (Rom. ii. 12; iii. 20); consequently, if blessedness could only be obtained by fulfilling the demands of God, no man could be blessed. God, however, has gratuitously given righteousness and blessedness to all who believe in Christ (iii. 21-31); the O. T. also recognises the value of religious faith (iv.); thus we freely attain to peace and sonship of God presently, and have before us still greater things—viz., the future development of the kingdom of God (v. 1-11). The human race has gained in Christ much more than it lost in Adam (v. 12, 21). This doctrine by no means encourages sin (vi.); on the contrary, men who are conscious of divine grace fulfil the law much more energetically than they were able to do before having attained to this knowledge, because the law alone is even apt to sharpen the appetite for sin, and leads finally to despair (vii.); but now we fulfil the law by means of that new spirit which is given unto us, and the full development of our salvation is still before us (viii. 1-27). The sufferings of the present time cannot prevent this development, and must rather work for good to them whom God from eternity has viewed as faithful believers; and nothing can separate such believers from the eternal love of God (viii. 28-39). It causes pain to behold the Israelites themselves shut out from salvation; but they themselves are the cause of this seclusion, because they wanted to attain salvation by their own resources and exertions, by their descent from Abraham, and by their fulfilment of the law: thus, however, the Jews have not obtained that salvation which God has freely offered under the sole condition of faith in Christ (ix.); the Jews have not entered upon the way of faith, therefore the Gentiles were preferred, which was predicted by the prophets. However, the Jewish race, as such, has not been rejected; some of them obtain salvation by a selection made, not according to their works, but according to the grace of God. If some of the Jews are left to their own obduracy, even their temporary fall serves the plans of God—viz., the vocation of the Gentiles. After the mass of the Gentiles shall have entered in, the people of Israel also, in their collective capacity, shall be received into the church (xi.)

V. *Authenticity and Integrity of the Epistle.*—The authenticity of this epistle has never been questioned. The Epistle to the Romans is quoted as early as the 1st and 2d century

by Clemens Romanus (*Ad Cor.*, i. 35) and Polycarp (*Ad Phil.*, 6). [It is also cited by Theophilus of Antioch (*Ad Autol.*, i. 20; iii. 14 [ed. J. C. Wolf, Hamb. 1724]), by Irenaeus (*Adv. Haer.*, iii. 16. 3), by Clement of Alexandria (*Paedag.*, i. p. 117; *Strom.*, iii. p. 457), by Tertullian (*Adv. Prax.*, 13), etc. It is alluded to in the Epistle to Diognetus (c. 9), by Justin Martyr (*Dial.*, c. 23), by Athenagoras (p. 13), and by others. It stands in the Muratori Canon; it had a place in that of Marcion; and it is found in the Syriac and Itala versions. With this copious external evidence the internal fully accords: in manner of thought, style, language, and allusion, it is wholly Pauline.] Its integrity has lately been attacked by Dr. Baur, who pretends that ch. xv. and xvi. are spurious, but only, as we have observed above, because these chapters do not harmonise with his supposition that the Christian church at Rome consisted of rigid Judaizers. Schmidt and Reiche consider the doxology at the conclusion of ch. xvi. not to be genuine. In this doxology the anacoluthical and unconnected style causes some surprise, and the whole has been deemed to be out of its place (ver. 26 and 27). We however, observe, in reply to Schmidt and Reiche, that such defects of style may be easily explained from the circumstance that the apostle hastened to the conclusion, but would be quite inexplicable in additions of a copyist who had time for calm consideration. The same words occur in different passages of the epistle, and it must be granted that such a fluctuation sometimes indicates an interpolation. In the Codex i., in most of the Codices Minusculi, as well as in Chrysostom, the words occur at the conclusion of ch.

xiv. In the Codices B, C, D, E, and in the Syrian translation, this doxology occurs at the conclusion of ch. xvi. In codex A it occurs in both places; whilst in Codex D\*\*, the words are wanting entirely, and they seem not to fit into either of the two places. If the doxology be put at the conclusion of ch. xiv., Paul seems to promise to those Christians weak in faith, of whom he had spoken, a confirmation of their belief. But it seems unfit (unpassend) in this connection to call the Gospel an eternal mystery, and the doxology seems here to interrupt the connection between chs. xiv. and xv.; and at the conclusion of ch. xvi. it seems to be superfluous, since the blessing had been pronounced already in ver. 24. We, however, say that this latter circumstance need not have prevented the apostle from allowing his animated feelings to burst forth in a doxology, especially at the conclusion of an epistle which treated amply on the mystery of redemption. We find an analogous instance in Eph. iii. 20, 21, where a doxology occurs after the mystery of salvation had been mentioned: we are therefore of opinion that the doxology is rightly placed at the conclusion of ch. xvi., and that it was in some codices erroneously transposed to the conclusion of ch. xiv., because the copyist considered the blessing in xvi. 24 to be the real conclusion of the epistle. In confirmation of this remark we observe that the same codices in which the doxology occurs in ch. xvi. either omit the blessing altogether, or place it after the doxology.

VI. *Interpreters of the Epistle.*—Chrysostom is the most important among the fathers who attempted to interpret this epistle; he enters deeply,

and with psychological acumen, into the thoughts of the apostle, and expounds them with sublime animation. Among the reformers Calvin is distinguished by logical penetration and doctrinal depth; Beza by his grammatical and critical knowledge. [The Commentaries of Melancthon, Strasb. 1540; of Bucer, Bas. 1562; and of Brent, Francf. 1564, may also be mentioned among those of the Reformers; also that of C. Ferme, Edin. 1651, translated into English by W. Skae, and edited with the *Commentarius* of And. Melville by W. L. Alexander, D.D., Edin. 1849. Of more recent works the number is great. The following are of most importance:—Willet, *Hexapla*, 1611; Locke, *Paraphrase and Notes*, Lond. 1733; Turretin, *Praelect.*, Lausan. 1741; Taylor, *Paraphrase and Notes*, Lond. 1745; Baumgarten, *Auslegung*, Halle 1749; Carpov, *Strictura*, Helmst. 1758; Schmidt, *Annot.*, Lips. 1777; Morus, *Praelect.*, Lips. 1794; Böhme, *Comment. Perpet.*, Lips. 1806; Tholuck, *Auslegung*, Berl. 1824, 5th ed. 1856, translated into English by Menzies, 2 vols., Edinb. Bib. Cabinet 1833-36; Flatt, *Vorlesungen*, Tüb. 1825; Rückert, *Commentar*, Leipz. 1831; Stuart, *Commentary*, Andover, U. S., 1832, Lond. 1833; Reiche, *Erklärung*, 2 vols., Gött. 1833-34; Glöckler, *Erklärung*, Leipz. 1834; Köllner, *Commentar*, Darmst. 1834; Olshausen, *Bibl. Commentar*, Königsb. 1835, translated in Clark's For. Theol. Library; Hodge, *Commentary*, 1835, new edition 1864, reprinted at Edinburgh 1864; Fritzsche, *Comment. Perpet.*, 3 vols., Berol. 1836-43; De Wette, *Kurze Erklär.*, Leipz. 1835, 3d ed. 1841; Umbreit, *Auslegung* ('auf dem Grunde des A. T.'), Gotha 1856; Haldane, *Exposition*, 3 vols., Edin. 1842, 3d ed.; Jowett, *Exposition*, 2d ed., 1839; Brown, *Analytical Exposition*, Edin. 1857; Turner, New York, 1859; Philippi *Commentar*, 3 vols., Francof. 1852; Van Hengel, *Interpretatio*, Silv. Duc., 1854.]—A. T.

ROME, the famous capital of the Western world, and the present residence of the Pope, stands on the river Tiber, about fifteen miles from its mouth, in the plain of what is now called the Campagna (*Felix illa Campania*—Pliny, *Hist. Nat.* iii. 6), in lat. 41° 54' N., long. 12° 28' E. The country around the city is not a plain, but a sort of undulating table-land, crossed by hills, while it sinks towards the south-west to the marshes of Maremma, which coast the Mediterranean. In ancient geography the country in the midst of which Rome lay was termed Latium, which, in the earliest times, comprised within a space of about four geographical square miles the country lying between the Tiber and the Numicius, extending from the Alban Hills to the sea, having for its chief city Laurentum. Here, on the Palatine Hill, was the city of Rome founded by Romulus and Remus, grandsons of Numitor, and sons of Rhea Sylvia, to whom, as the originators of the city, mythology ascribed a divine parentage. The origin of the term Rome is in dispute. Some derive it from the Greek *Ῥώμη*, 'strength', considering that this name was given to the place as being a fortress. Cicero (*De Repub.* ii. 7) says the name was taken from that of its founder Romulus. At first the city had three gates, according to a sacred usage. Founded on the Palatine Hill, it was extended, by degrees, so as to take in other six hills, at the foot of which ran deep valleys that, in early times, were in

part overflowed with water, while the hill-sides were covered with trees. In the course of the many years during which Rome was acquiring to herself the empire of the world, the city underwent great, numerous, and important changes. Under its first kings it must have presented a very different aspect from what it did after it had been beautified by Tarquin. The destruction of the city by the Gauls (U.C. 365) caused a thorough alteration in it; nor could the troubled times which ensued have been favourable to its being well restored. It was not till riches and artistic skill came into the city on the conquest of Philip of Macedon, and Antiochus of Syria (U.C. 565), that there arose in Rome large handsome stone houses. The capture of Corinth conduced much to the adorning of the city; many fine specimens of art being transferred from thence to the abode of the conquerors. And so, as the power of Rome extended over the world,

and her chief citizens went into the colonies to enrich themselves, did the masterpieces of Grecian art flow towards the capital, together with some of the taste and skill to which they owed their birth. Augustus, however, it was, who did most for embellishing the capital of the world, though there may be some sacrifice of truth in the pointed saying, that he found Rome built of brick, and left it marble. Subsequent emperors followed his example, till the place became the greatest repository of architectural, pictorial, and sculptural skill, that the world has ever seen; a result to which even Nero's incendiarism indirectly conduced, as affording an occasion for the city's being rebuilt under the higher scientific influences of the times. The site occupied by modern Rome is not precisely the same as that which was at any period covered by the ancient city: the change of locality being towards the north-west, the city has partially

452. Rome.

retired from the celebrated hills. About two-thirds of the area within the walls (traced by Aurelian) are now desolate, consisting of ruins, gardens, and fields, with some churches, convents, and other scattered habitations. Originally the city was a square mile in circumference. In the time of Pliny the walls were nearly twenty miles in circuit; now they are from fourteen to fifteen miles round. Its original gates, three in number, had increased in the time of the elder Pliny to thirty-seven. Modern Rome has sixteen gates, some of which are, however, built up. Thirty-one great roads centred in Rome, which, issuing from the Forum, traversed Italy, ran through the provinces, and were terminated only by the boundary of the empire. As a starting-point a gilt pillar (Milliarium Aureum) was set up by Augustus in the middle of the Forum. This curious monument, from which distances were reckoned, was dis-

covered in 1823. Eight principal bridges led over the Tiber; of these three are still relics. The four districts into which Rome was divided in early times, Augustus increased to fourteen. Large open spaces were set apart in the city, called Campi, for assemblies of the people and martial exercises, as well as for games. Of nineteen which are mentioned, the Campus Martius was the principal. It was near the Tiber, whence it was called Tiberius. The epithet Martius was derived from the plain being consecrated to Mars, the god of war. In the later ages it was surrounded by several magnificent structures, and porticoes were erected, under which, in bad weather, the citizens could go through their usual exercises. It was also adorned with statues and arches. The name of Fora was given to places where the people assembled for the transaction of business. The Fora were of two kinds—*fora venalia*, 'markets;' *fora civilia*, 'law

courts,' etc. Until the time of Julius Caesar there was but one of the latter kind, termed by way of distinction Forum Romanum, or simply Forum. It lay between the Capitoline and Palatine Hills; it was eight hundred feet wide, and adorned on all sides with porticoes, shops, and other edifices, on the erection of which large sums had been expended, and the appearance of which was very imposing, especially as it was much enhanced by numerous statues. In the centre of the Forum was the plain called the Curtian Lake, where Curtius is said to have cast himself into a chasm or gulf, which closed on him, and so he saved his country. On one side were the elevated seats or suggestus, a sort of pulpits from which magistrates and orators addressed the people—usually called Rostra, because adorned with the beaks of ships which had been taken in a sea-fight from the inhabitants of Antium. Near by was the part of the Forum called the Comitium, where were held the assemblies of the people called Comitia Curiata. The celebrated temple, bearing the name of Capitol (of which there remain only a few vestiges), stood on the Capitoline Hill, the highest of the seven: it was square in form, each side extending about two hundred feet, and the ascent to it was by a flight of one hundred steps. It was one of the oldest, largest, and grandest edifices in the city. Founded by Tarquinius Priscus, it was several times enlarged and embellished. Its gates were of brass, and it was adorned with costly gildings; whence it is termed 'golden' and 'glittering,' *auræa, fulgens*. It enclosed three structures—the temple of Jupiter Capitolinus in the centre, the temple of Minerva on the right, and the temple of Juno on the left. The Capitol also comprehended some minor temples or chapels, and the Casa Romuli, or cottage of Romulus, covered with straw. Near the ascent to the Capitol was the asylum [CITIES OF REFUGE]. We also mention the Basilicæ, since some of them were afterwards turned to the purposes of Christian worship. They were originally buildings of great splendour, being appropriated to meetings of the senate and to judicial purposes. Here counsellors received their clients, and bankers transacted their business. The earliest churches, bearing the name of Basilicæ, were erected under Constantine. He gave his own palace on the Cælian Hill as a site for a Christian temple. Next in antiquity was the church of St. Peter, on the Vatican Hill, built A.D. 324, on the site and with the ruins of temples consecrated to Apollo and Mars. It stood about twelve centuries, at the end of which it was superseded by the modern church bearing the same name. The Circi were buildings oblong in shape, used for public games, races, and beast-fights. The Theatra were edifices designed for dramatic exhibitions; the Amphitheatra (double theatres, buildings in an oval form) served for gladiatorial shows and the fighting of wild animals. That which was erected by the Emperor Titus, and of which there still exists a splendid ruin, was called the Coliseum, from a colossal statue of Nero that stood near it. With an excess of luxury, perfumed liquids were conveyed in secret tubes round these immense structures, and diffused over the spectators, sometimes from the statues which adorned the interior. In the arena which formed the centre of the amphitheatres, the early Christians often endured martyrdom by being exposed to ravenous beasts.

The connection of the Romans with Palestine caused Jews to settle at Rome in considerable numbers. On one occasion, in the reign of Tiberius, when the Jews were banished from the city by the emperor, for the misconduct of some members of their body, not fewer than four thousand enlisted in the Roman army, which was then stationed in Sardinia (Sueton., *Tib.* 36; Joseph. *Antiq.* xviii. 3. 5). These appear to have been emancipated descendants of those Jews whom Pompey had taken prisoners in Judæa, and brought captive to Rome (Philo, *De Leg. ad Cai.*, p. 1014). From Philo also it appears that the Jews in Rome were allowed the free use of their national worship, and generally the observance of their ancestral customs. Then, as now, the Jews lived in a part of the city appropriated to themselves (Joseph. *Antiq.* xiv. 10. 8), where, with a zeal for which the nation had been some time distinguished, they applied themselves with success to proselytising (Dion Cass., xxxvii. 17). They appear, however, to have been a restless colony; for when, after their expulsion under Tiberius, numbers had returned to Rome, they were again expelled from the city by Claudius (Suet. *Claud.* 25). The Roman biographer does not give the date of this event, but Orosius (vii. 6) mentions the ninth year of that emperor's reign (A.D. 50). The precise occasion of this expulsion history does not afford us the means of determining. The words of Suetonius are, 'Judæos, impulsore Chresto, assidue tumultuantes, Roma expulsi'— 'He expelled from Rome the Jews continually raising disturbances under the impulse of Chrestos.' The cause here assigned for their expulsion is, that they raised disturbances, an allegation which, at first view, does not seem to point to a religious, still less to a Christian influence. And yet we must remember that the words bear the colouring of the mind of a heathen historian, who might easily be led to regard activity for the diffusion of Christian truth, and the debates to which that activity necessarily led, as a noxious disturbance of the peace of society. The Epicurean view of life could scarcely avoid describing religious agitations by terms ordinarily appropriated to martial pursuits. It must equally be borne in mind that the diffusion of the gospel in Rome—then the very centre and citadel of idolatry—was no holiday task, but would call forth on the part of the disciples all the fiery energy of the Jewish character, and on the part of the pagans all the vehemence of passion which ensues from pride, arrogance, and hatred. Had the ordinary name of our Lord been employed by Suetonius, we should, for ourselves, have found little difficulty in understanding the words as intended to be applied to Jewish Christians. But the biographer uses the word Chrestus. The *us* is a mere Latin termination; but what are we to make of the root of the word, Chrest for Christ? Yet the change is in only one vowel, and Chrest might easily be used for Christ by a pagan writer. A slight difference in the pronunciation of the word as vocalised by a Roman and a Jew would easily cause the error. And we know that the Romans often did make the mispronunciation, calling Christ Chrest (Tertull., *Apol.*, c. 3; Lactant., *Inst.*, iv. 7; Just. Mart., *Apol.*, c. 2). The point is important, and we therefore give a few details, the rather that Lardner has, under Claudius (vol. i. 259), left the question undetermined. Now in Tacitus (*Annal.*, xv. 44), Jesus is unquestionably called Chrest (quos

per flagitia invisos vulgus Christianos appellabat. Auctor nominis ejus Chrestus) in a passage where his followers are termed Christians. Lucian, too, in his *Philopatris*, so designates our Lord, playing on the word *Χρηστός*, which, in Greek, signifies 'good:' these are his words—*εὐτύχοι γε Χρηστός καὶ ἐν ἔθνεσι, κ.τ.λ.*, 'since a Chrest (a good man) is found among the Gentiles also.' And Tertullian (*ut supra*) treats the difference as a case of ignorant

453. Mamertine Prison

mispronunciation: 'Christianus perperam Chrestianus pronunciatur a vobis, nam nominis certa est notitia penes vos.' The mistake may have been the more readily introduced from the fact that, while Christ was a foreign word, Chrest was customary: lips therefore that had been used to Chrest would rather continue the sound than change the vocalisation. The term Chrest occurs in inscriptions (Heumann, *Sylloge Diss.*, i. 536), and epigrams in which the name appears may be found in Martial (vii. 55; ix. 28). In the same author (xi. 91) a diminutive from the word—namely, Chrestillus—may be found. The word assumed also a feminine form, Chresta, as found in an ancient inscription—

'Hoc, virtus, fatigue decus et amabile nomen,  
Dote pudicitie, celebrata laboribus actis  
Vitæ, Chresta jacet condita nunc tumulo.'

We subjoin a few lines from Martial (vii. 55):

'Nulli munera, Chreste, si remittis,  
Nec nobis dederis, remiserisque,  
Credam te satis esse liberalem.'

There can therefore be little risk in asserting that Suetonius intended to indicate Jesus Christ by Chrestus; and we have already seen that the terms which he employs to describe the cause of the expulsion, though peculiar, are not irreconcilable with a reference on the part of the writer to Christians. The terms which Suetonius employs are accounted for, though they may not be altogether justified, by those passages in the Acts of the Apostles, in which the collision between the Jews who had become Christians and those who adhered to the national faith is found to have occasioned serious disturbances (Kuinoel, Acts xviii. 2; Rorsal, *De Christo per errorem in Chrest. Comm.*, Groning. 1717). This interpretation is confirmed by the fact that a Christian church, consisting of Jews, proselytes, and pagan Romans, had at an early period been formed in Rome, as is evident from the Epistle of Paul to the Romans; which Christian community must have been in existence a long time when Paul wrote (about A.D. 59) that epistle (see Rom. i. 8-13); and Meyer (*Commentar der Brief an die Römer Einleit.*, sec. 2) is of opinion that the foundations of the church in Rome may have been

laid even during the lifetime of our Lord. It is also worthy of notice that Luke, in the book of Acts (xviii. 2), when speaking of the decree of Claudius as a banishment of all the Jews from Rome, adverts to the fact as a reason why two Christians, Aquila and Priscilla, whom we know (Rom. xvi. 3) to have been members of the Roman church, had lately come from Italy: these the apostle found on his arrival at Corinth in the year A.D. 51. Both Suetonius and Luke, in mentioning the expulsion of the Jews, seem to have used the official term employed in the decree; the Jews were known to the Roman magistrate; and Christians, as being at first Jewish converts, would be confounded under the general name of Jews; but that the Christians as well as the Jews strictly so called were banished by Claudius appears certain from the book of Acts; and, independently of this evidence, seems very probable, from the other authorities of which mention has been made.

The question, Who founded the church at Rome? is one of some interest as between Catholic and Protestant. The former assigns the honour to Peter, and on this grounds an argument in favour of the claims of the papacy. There is, however, no sufficient reason for believing that Peter was ever even so much as within the walls of Rome. But we have no intention of entering here on that disputed point, and content ourselves with referring the reader to the most recent work on the subject which has come to our knowledge, in which he will find the argument well and learnedly handled (D. J. Ellendorf, *1st Petrus in Rom und Bischof der Römischen Kirche gewesen?* Darmstadt 1843).

Rome, as being their tyrannical mistress, was an object of special hatred to the Jews, who therefore denominated her by the name of Babylon—the state in whose dominions they had endured a long and heavy servitude (Schöttgen, *Hor. Heb.*, i. p. 1125; Eisenmenger, *Entdeckte Judenth.*, i. 18co). Accordingly, Rome, under the name of Babylon, is set forth in the Apocalypse (xiv. 8; xvi. 19; xvii. 5; xviii. 2) as the centre and representative of heathenism; while Jerusalem appears as the symbol of Judaism. In ch. xvii. 9 allusion is clearly made to the Septicollis, the seven-hilled city—'seven mountains on which the woman sitteth.' The description of this woman, in whom the profligacy of Rome is vividly personified, may be seen in ch. xvii. of the Revelation. In ch. xiii. Rome is pictured as a huge unnatural beast, whose name or number 'is the number of a man, and his number is *χξςτ*,' not improbably *Λατίνος*, Latin, Roman. This beast has been most variously interpreted. The several theories serve scarcely more than to display the ingenuity or the bigotry of their originators, and to destroy each other. Münster (*De occulto Urbis Romæ nomine*, Hafn. 1811) thinks there is a reference to the secret name of Rome, the disclosure of which, it was thought, would be destructive to the state (Plin., *Hist. Nat.*, iii. 9; Macrob., *Sat.*, iii. 5; Plutarch, *Quæst. Rom.*, c. 61; Serv., *ad Æn.*, ii. 293). Pliny's words occur in the midst of a long and picturesque account of Italy. Coming in the course of it to speak of Rome, he says, 'the uttering of whose other name is accounted impious, and when it had been spoken by Valerius Soranus, who immediately suffered the penalty, it was blotted out with a faith no less excellent than beneficial.' He then proceeds to speak of the rites observed on the 1st of January

in connection with this belief, in honour of Diva Angerona, whose image appeared with her mouth bound and sealed up. This mystic name tradition reports to have been Valencia.

The most recent view of the name of the beast, from the pen of a Christian writer, we find in *Hyponoia, or Thoughts on a Spiritual Understanding of the Apocalypse*, London 1844. 'The number in question (666) is expressed in Greek by three letters of the alphabet; χ, six hundred; ξ, sixty; στ, six. Let us suppose these letters to be the initials of certain names, as it was common with the ancients in their inscriptions upon coins, medals, monuments, etc., to indicate names of distinguished characters by initial letters, and sometimes by an additional letter, where the initial might be considered insufficient, as C. Caius, Cn. Cneus. The Greek letter χ (ch) is the initial of Χριστός (Christ); the letter ξ is the initial of ξύλον (wood or tree)—sometimes figuratively put in the N. T. for the cross; and in the Revelation applied to the tree of life, the spiritual cross. The last letter σ is equivalent to σ and τ, but whether an s or an st, it is the initial of the word Satan, Satan, or the adversary. Taking the two first names in the genitive, and the last in the nominative, we have the following appellation, name, or title: Χριστοῦ ξύλου σατανᾶς, 'the adversary of the cross of Christ,' a character corresponding with that of certain enemies of the truth, described by Paul (Phil. iii. 19).' The spiritual hyponoia, or underthought, embodied in this the author thus states: 'Any doctrine tending to represent the intervention of a divine propitiation as unnecessary, or militating with a belief and trust in the vicarious sacrifice of Jesus, as the only hope of salvation, must be an adversary of the cross of Christ; of this character we consider every principle of self-righteousness,' etc. (See Ansaldo, *De Romana Tutelar. Deor evocatione*, Brix. 1743; Plin., *Hist. Nat.*, iii. 9; Cellar., *Rolit.*, i. p. 632, seq.; Mannert., *Geog.*, ix. 1. 581, seq.; Sachse, *Versuch ein Hist. Topogr. Beschreib. von Rom*, Hannov. 1812; Hilscher, *De Christo cuius mention. fecit Suet.*, Lips.; also Ernesti and Wolf, *ad Sueton.*; Eichhorn, *Comm. in Apocal.*, p. 104, seq.)

ROOF. [HOUSE.]

ROOM. [HOUSE.]

ROOS, MAGNUS FRIEDRICH, successively pastor at Stuttgart and Göppingen, superintendent at Lustnau, and prelate at Anhausen, was born 6th September 1727, and died 19th March 1803. He was a voluminous writer, but only two of his works are now of importance. The one is *Fundamenta Psychologie Sacrae*, Tübing. 1769; the other, *Auslegung der Weissagungen Daniels*, Tübing. 1770. Both these works are held in high repute in Germany (see Delitzsch, *Syst. der Bibl. Psychologie*, p. 7; Auberlen, *Der Proph. Daniel*, p. 20, Bas. 1854); the latter has been translated into English by the late Dr. E. Henderson, Edin. 1811.—W. L. A.

ROSE. [CHABBAZZELETH; RHODON.]

ROSENMÜLLER, ERNST FRIEDRICH, KARL, was born 10th December 1768, at Hessburg, near Hildburghausen. After studying at Erlangen and Giessen, he entered the university of Leipzig, where the rest of his life was spent. In 1792 he became a docent there; in 1796, professor-extraordinary of Arabic; and in 1813, ordinary professor

of Oriental languages—an office which he held till his death on the 17th September 1835. His time was divided between the duties of his professorship and the pursuit of Biblical studies. Of his numerous publications, all of which are of high value, the following are the most important:—*Institutiones ad fundam. linguæ Arabicæ*, Lips. 1818; *Analecta Arabica*, 3 vols., Lips. 1824-27; *Scholia in Vetus Test.*, 16 vols., Lips. 1788-1817; *Eadem in compendium redacta*, 5 vols., Lips. 1823-31; *Handbuch für die literatur der Bibl. Kritik u. Exegese*, 4 vols., Gött. 1797-1800; *Handbuch der Bibl. Alterthumskunde*, 4 vols., Leipz. 1823-31; *Das alte u. neue Morgenlande oder erläuterungen der II. S. aus der natürlichen beschaffenheit der Sagen, Sitten u. Gebräuchen des Morgentl.*, 6 vols., Leipz. 1816-20.—W. L. A.

ROSENMÜLLER, JOHANN GEORG, father of the preceding, was born at Ummerstädt 18th December 1736. He was successively pastor at Hildburghausen, Hessburg, and Königsberg in Franconia; and professor of theology at Erlangen, at Geissen, and at Leipzig, at which last place he also held the office of pastor of the church of St. Thomas and superintendent. He died there 14th March 1815. He exerted considerable influence both on religious opinion and on education in Germany during his long and active life, but is now remembered only as the author of *Scholia in Nov. Test.*, 5 vols., Norimb. 1777, of which the 6th edition, partly edited by his son after his death, appeared 1815-31 [COMMENTARY].—W. L. A.

ROSH (רוֹשׁ and רוֹשֵׁ) occurs in several places of the O. T. The word is thought originally to signify 'poison,' and is therefore supposed to indicate a poisonous plant. But this has not yet been ascertained. It is sometimes translated *gall*, sometimes *bitter* or *bitterness*, but is generally considered to signify some plant. This we may infer from its being frequently mentioned along with *laanah* or 'wormwood' (comp. Deut. xxix. 18; Jer. ix. 15; xxiii. 15; Lament. iii. 19; Amos vi. 12). That it was a berry-bearing plant has been inferred from Deut. xxxii. 32, 'For their vine is of the vine of Sodom, and their grapes are grapes of gall (*rosh*), their clusters are bitter.' In Jer. viii. 14, 'water of gall' (*rosh*) is mentioned; which may be either the expressed juice of the fruit or of the plant, or a bitter infusion made from it; 'aquæ Rosch dicuntur, quia sunt succus herbæ, quam Rosch appellant.' That it was a plant is very evident from Hosea x. 4, where it is said 'their judgment springeth up as *hemlock* (*rosh*) in the furrows of the field.' Here we observe that *rosh* is translated *hemlock* in the A. V., as it is also in Amos vi. 12.

Though *rosh* is generally acknowledged to indicate some plant, yet a variety of opinions have been entertained respecting its identification: some, as the A. V. in Hosea x. 4, and Amos vi. 12, consider *cicuta* or *hemlock* to be the plant intended. Tremellius adopts this as the meaning of *rosh* in all the passages, and is followed by Celsius (*Hierobot.* ii. 49). The *cicuta* of the Romans, the *κάνειον* of the Greeks, is generally acknowledged to have been what we now call *hemlock*, the *conium maculatum* of botanists. There can be no doubt of its poisonous nature, 'Cicuta venenum est publica Atheniensium poena invisâ' (Pliny, *Hist. Nat.*, xxv. 13). There is, however, little or no proof adduced that *rosh* is

*hemlock*. Celsius quotes the description of Linnaeus in support of its growing in the furrows of fields, 'Frequens per Europam in ruderalis, juxta pagos, urbes, in sepibus, aggeribus, agris.' But it does not appear to be so common in Syria. Celsius, however, adduces Ben Melech, the most learned of Rabbins, as being of opinion that *rosh* was *contium* or *hemlock*: 'Aque Rosch, virus; barbore toxicum. Herba est, cujus succum bibendum porrigunt illi, quem interimere volunt.'

But there does not appear any necessity for our considering *rosh* to have been more poisonous than *laanah* or *wormwood*, with which it is associated so frequently as to appear like a proverbial expression. Some have erroneously translated it *wormwood*, from which it is sufficiently distinguished in the above passages. The Sept. translators render it *agrostis*, intending some species of grass. Hence some have concluded that it must be *lolium tenuilentum*, or *darnel*, the zizanium of the ancients, which is remarkable among grasses for its poisonous and intoxicating properties. It is, however, rather sweetish in taste, and its seeds being intermixed with corn are sometimes made into bread. It is well known to grow in corn-fields, and would therefore suit the passage of Hosea; but it has not a berry-like fruit, nor would it yield any juice: the infusion in water, however, might be so understood, though it would not be very bitter or disagreeable in taste. Some have in consequence thought that some of the *solanæ* or *luride* of Linnaeus might be intended by the word *rosh*. These are remarkable for their narcotic properties, though not particularly bitter; some of them have berried fruits, as the *belladonna*, which, however, is not indigenous in Palestine; but *solanum nigrum*, common nightshade, a small herbaceous plant, is common in fields and road-sides from Europe to India, and is narcotic like the others. The *henbane* is another plant of this family, which is possessed of powerful narcotic properties, and has been used in medicine from early times, both by the Greeks and Asiatics. But no proof appears in favour of any of this tribe, and their sensible properties are not so remarkably disagreeable as to have led to their being employed in what appears to be a proverbial expression. Hiller, in his *Hierophyton* (ii. 54), adduces the *centaury* as a bitter plant, which corresponds with much of what is required. Two kinds of *centaury*, the larger and smaller, and both conspicuous for their bitterness, were known to the ancients. The latter, the *Erythraea centaury*, is one of the family of gentians, and still continues to be employed as a medicine on account of its bitter and tonic properties (Plin. xxv. c. 6). From the extreme bitterness of taste, from growing in fields, and being a native of warm countries, some plant like *centaury*, and of the tribe of gentians, might answer all the passages in which *rosh* is mentioned, with the exception of that (Deut. xxxii. 32) where it is supposed to have a berried fruit. Dr. Harris, quoting Blaney on Jer. viii. 14, says, 'In Ps. lxix. 21, which is justly considered as a prophecy of our Saviour's sufferings, it is said, 'they gave me *רֹאשׁ* to eat,' which the Sept. have rendered *χολή*, gall. And accordingly it is recorded in the history (Matt. xxvii. 34), 'They gave him vinegar to drink, mingled with gall,' *ὄξος μετὰ χολῆς*. But in the parallel passage (Mark xv. 23) it is said to be 'wine mingled with myrrh,' a very

bitter ingredient. From whence I am induced to think that *χολή*, and perhaps *רֹאשׁ*, may be used as a general name for whatever is exceedingly bitter; and, consequently, when the sense requires, it may be put specially for any bitter herb or plant, the infusion of which may be called *רֹאשׁ*, 'Aque Rosch.'—J. F. R.

ROSSI or RUBEIS, AZZARIAH (= BONAJUTO) DE, was born, 1513, in Mantua, of the celebrated family called in Hebrew *הארומים* = *De Rossi*, who, like the families *התפוחים* = *De Pomis*, *העננים*, and *הנערים*, traced their origin to those Jews who were led into captivity after the destruction of Jerusalem by Titus and Vespasian. Naturally endowed with extraordinary powers of mind, keenness of perception, refinement of taste, and with an insatiable desire for the acquisition of knowledge, De Rossi, or *Azariah Min Ha-Adomim*, as the Jews call him, devoted himself from his very youth with unwearied assiduity and zeal to the study of Hebrew literature, and of medicine as his profession. His exclusive application to the acquisition of Talmudic lore was, however, providentially interrupted. The infamous edict of Pope Julius III. (1553) for the destruction of the Talmud and the Rabbinic writings, in consequence of which numerous volumes of Hebrew works were committed to the flames in Rome, Bologna, Venice, Ancona, Padua, etc.—in Cremona alone 10,000 volumes of the Talmud, and 1000 copies of a commentary on the Pentateuch being destroyed—De Rossi was led to study archaeology, history, and the writings of ancient Greece and Rome, and the Fathers, as this wholesale extermination made Hebrew books scarce. These acquisitions were of great use to him afterwards, when he devoted himself more especially to the archaeology of the Hebrews, and to the criticism of the Hebrew language and sacred text. Having prosecuted his studies in Mantua, Ferrara, Ancona, Sabionetta, Bologna, etc., he went back to Ferrara with the accumulated learning of more than half a century, the results of which he now communicated to the world in his celebrated work entitled *מאור עינים*, *The Light of the Eyes*, which appeared in Mantua 1574-75. This remarkable work, which is an encyclopedia of Biblical literature, consists of three parts, subdivided into chapters as follows—Part I., entitled, *קול אלהים*, *The Voice of the Lord*, which was occasioned by the terrible earthquake at Ferrara, Nov. 18 and 19, 1570, and which De Rossi witnessed, contains a dissertation on the theory of earthquakes according to the Bible and the Talmudic writings, giving also at the same time the opinions of Plutarch, Seneca, Pliny, and other ancients, as well as of moderns, on this subject. Nearly the whole of this part has been translated into Latin by Hottinger in his dissertation on earthquakes. Part II., entitled *הדרת זקנים*, *The Glory of Old Men*, gives an account of the origin of the Septuagint and is a Hebrew translation of Aristæus' History of this Greek Version. This part was published separately, Vilna 1818. Part III. is entitled *מאורי בינה*, *Words of Understanding*; it consists of four sections (*מאורים*), subdivided into sixty chapters (*פרקים*), as follows:—The first section (*מאור א*), embracing cap. i.-xiii., treats on the use of the Fathers and heathen writings, Philo, the Jewish sects, especially the Essenes, the Septuagint and the Aramaic versions, the history of the Jews in Alexandria

and Cyrene, the Bar Kochba revolts, the ten tribes, the Talmudic story about Alexander the Great's entry into Jerusalem, and on the Talmudic theory of nature. The second section (**מאמר ב'**), embracing cap. xiv.-xxviii., contains treatises on the explanation of Scripture by ancient sages, on the Midrash and Hagadic exegesis, on sundry striking differences between Christian and Jewish writers, the old Persian list of kings, on the different eras of the Jewish chronology, Josephus, on the ancient chronicle entitled *Seder Olam*, on the series of high-priests during the second temple, etc. etc. The third section (**מאמר ג'**), embracing cap. xxix.-xliv., contains treatises on the Biblical chronology and the Jewish calendar, on old Persian kings, extracts from and criticisms on Philo, Josephus, etc. etc. Whilst the fourth section (**מאמר ד'**), embracing cap. xlv.-lx., contains treatises on the difference between Onkelos and Aquila, on the sacerdotal vestments, on the prayers used by the Jews, on the literature and chronology of the Samaritans, on the antiquity of Hebrew language, on the history of the Hebrew text, on the use of the Aramaic among the Jews, on the antiquity of the letters and the vowel points, on Hebrew poetry. The following chapters of this part have been translated into Latin by Bartolocci: cap. ix. and xxii., in his *Bibliotheca Magna Rabbinica*, i. 680, ii. 800; by Bochart, cap. xvi. and xxi. in his *Hierozoicon*; Buxtorf, cap. ix., xlii., lix., in his *Tractatus de Antiquitate Punctorum*, Basel 1648; cap. l. and lx. in his translation of *Kusari*, Basel 1660; cap. lvi. and lviii. in his *Dissertationes*, etc., Basel 1662; by Meyer, cap. viii., xiv., and xix. in his version of the **סדר עולם**, Amst. 1699; by Morin, cap. iii., v., vii., ix., xix., xx., xlviii., in his *Exercitationes Biblicæ*, Paris 1638, 1699; and by Vorst, cap. xxiii., xxv., xxxiii., xxxv., in his version of the **צמות דוד**, Leyden 1644. There are English translations of cap. xvi. by Raphael, *Hebrew Review*, vol. ii., London 1837; and of cap. lx. by Bishop Lowth in the preliminary dissertation to his translation of Isaiah, p. xxviii., etc., ed. London 1835. This brief analysis of its contents will show, to some extent, the great importance of this work to the student of the Bible, and to the critic of the O. T. text. De Rossi has brought together in the *Meor Enajim* a mass of ancient Jewish information bearing on the sacred text and on Biblical literature which can hardly be found elsewhere. One chapter of this remarkable cyclopaedia of Biblical literature sufficed to suggest the idea of Hebrew poetry to the erudite Bishop Lowth [Lowth]. De Rossi has criticised his material in so liberal a manner that many of the Jews proscribed the work, whilst others wrote in refutation of some of his liberal criticisms. Prominent amongst these were R. Moses Provençale of Mantua, and R. Isaac Finzi of Pisari. De Rossi subjoined to some copies of the *Meor Enajim* itself a reply to the former, and wrote a separate work, entitled **ספר מצור לנכס**, *The Refining-pot for Silver*, after Prov. xvii. 3. This work, which is an essential supplement to the *Meor Enajim*, has only recently been published by Filipowski, Edinburgh 1854. Dr. Ginsburg possesses De Rossi's own copy of the *Meor Enajim* with the author's autograph emendations and extensive additions, which are of great importance to Biblical literature, and which will shortly be published. De Rossi died Nov. 1577, in the neighbourhood of Mantua.

Comp. Zunz, *Biography of De Rossi* in the *Hebrew Annual*, entitled *Kerem Chemed*, vol. v. p. 131, etc., Prague 1841; Rappaport's *Additions to this Biography*, *ibid.* 159, etc.; *Supplement to the Biography of De Rossi*, by Zunz, in the same annual, vol. vii. p. 119, etc., Prague 1843; the biography by the same author prefixed to De Rossi's **מצור לנכס**; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 747; Fürst, *Bibliotheca Judaica*, iii. 171-174.—C. D. G.

ROSSI, JOHN BERNARD DE, an eminent Orientalist, and one of the most distinguished Hebraists, was born at Castel-Nuovo in Piedmont, October 25, 1742. Having manifested a great passion for learning from his very youth, and being desirous to become an ecclesiastic, he resorted to the University of Turin (1763), where his extraordinary progress in Hebrew secured for him a doctor's degree in 1766, whilst his indefatigable industry in the acquisition of the cognate as well as modern languages, was rewarded by a place in the Royal Library at Turin in 1769. His fame as an Orientalist was now established, and when the Duke of Parma founded the university at his capital, he invited the Abbé de Rossi to occupy the chair of Oriental Languages, which office he held for forty years. It was during the long years of his professional career that he amassed his extraordinary collection of Hebrew MSS., established the famous printing-office, and issued those numerous works on Biblical and Hebrew literature which have immortalised his name. His works on Biblical criticism and Hebrew literature are as follows—(1.) *De præcipuis caussis et momentis neglectæ a nonnullis hebr. litt. discipline*, Turin 1769, Tübingen 1782; (2.) *Della lingua propria, di Cristo e degli ebrei nazionali del tempo dei Maccabei*, Parma 1772; (3.) *Della vana aspettazione degli ebrei del loro Messia*, Parma 1773; (4.) *De Hebraicæ Typographiæ origine ac primitiis commentatio*, Parma 1776, Erlangen 1778; (5.) *Annali ebreo-tipografici di Sabbioneta*, Parma 1780; (6.) *De Typographia hebr.—Ferrar. Comment. historicus*, Parma 1780; (7.) *Apparatus hebræo-biblicus sive MSS. editique codices sacri textus*, Parma 1782; (8.) *De ignotis nonnullis antiquissimis hebr. textus Editionibus ac critico earum usu. Accedit de editionibus hebræo-biblicis appendix historico-critica ad nuperimam Bibliothecam Sacram Le-Longio-Maschianam*, Erlangen 1783; (9.) *Specimen variarum lectionum sacri textus et Chaldaica Estheris additamenta cum latinâ versione ac notis*, Rome 1782; (10.) *Varie Lectiones veteris testamenti*, 4 vols. 4to, Parma 1784-1788.—De Rossi undertook this work, so important to the criticism of the O. T. text, on account of the omissions and imperfections he perceived in the similar production of Kennicott. With the numerous MSS. at Rome and the various cities of Italy, and his own matchless library, and with his great industry and learning, he was enabled to embody in these volumes not only Kennicott's collection verified, but the results of the collation of 731 MSS. and additional MSS., 300 editions, the ancient versions, as well as of the Rabbinic and Massoretic writings. Prefixed to these volumes are elaborate prolegomena, in which he gives an account of the work, as well as of the MSS. and printed editions he used, and lays down ninety-three critical canons; (11.) *Schol. crit. in V. T. libr. S. supplementa ad varias sacri textus lectt.*, Parma

1798—in this supplement to the preceding work De Rossi gives extracts from new sources; (12.) *Annales hebræo-typograph.*, sec. xv.-xvi., Parma 1795; (13.) *Bibliotheca Judaica antichristiana*, Parma 1800; (14.) *Dizionario storico degli autori ebraici e delle loro opere*, 2 vols., Parma 1802. This biographical and bibliographical dictionary, which is extremely useful to Biblical literature, has been translated into German by Dr. Hamberger, Leipzig 1839. A most elaborate review of this work, with important additions to it, was published by Geiger in his *Wissenschaftliche Zeitschrift*, vol. iv., Stuttgart 1839, p. 419-448; (15.) *Codices hebraici in Bibliotheca F. B. de Rossi descripti et cum notis historicis illustrati*, 3 vols., Parma 1803; (16.) *Lexicon hebraicum selectum quo ex antiquo et inedito R. Parchonis Lexico novas ac diversas variorum ac difficiliorum vocum significaciones sistit*, Parma 1805; (17.) *Annali ebraico-tipografici di Cremona*, Parma 1808; (18.) *Compendio di critica sacra*, Ibid. 1811; (19.) *Libri stampati di Lett. sacre ebraica ed orientale della sua Bibliot.*, Ibid. 1812; (20.) *Introduzione della Sacra Scrittura*, Ibid. 1817; and (21.) *Sinopsi della ermeneutica sacra*, Ibid. 1819; also translations into Italian of the Psalms (Parma 1808), and of Lamentations (Ibid. 1813). After refusing tempting offers for his library from the German emperor, the king of Spain, Pope Pius VI., and the duke of Wurtemberg, he parted with it to the archduchess Maria-Louise for 100,000 francs in 1816. He retired from his laborious office in 1821, when he was decorated with the order of a knight of St. Constantine, and died at Parma 1831, in the eighty-ninth year of his age. Comp. Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2151-2153; Fürst, *Bibliotheca Judaica*, iii. 174, 175; Davidson, *Biblical Criticism*, p. 155, etc., Edinburgh 1854; *Biographie Universelle*, new ed., vol. xxxvi. p. 521, etc.—C. D. G.

454. *Genista monosperma*.

ROTHEM (רֹתֵם), a shrub under which a person might repose (1 Kings xix. 4, 5), the roots of

which might be used for food, though only by the most destitute (Job xxx. 4), and which was used for fuel (Ps. cxv. 4). The older interpreters identify it with the *juniper*, and so the word is rendered in the A. V. But it is now generally admitted that it is the *genista* or *broom* (*genista spartium* or *ratam* of Forskål) which is referred to in these passages. The Arabic name for this is *Ratam*, which is evidently identical with the Hebrew *Rothem*. The roots, though edible, 'are very bitter, and are regarded by the Arabs as yielding the best charcoal. This illustrates Job xxx. 4, and Ps. cxv. 4; comp. Burekhardt, p. 483' (Robinson, *Bib. Res.*, i. 299; see also Kitto, *Palestine*; Thomson, *Land and Book*, ii. p. 436, ff.)—W. L. A.

RUBY. [PENINIM; KAD-KOD.]

RUFUS (ΡΟΥΦΟΣ). A person of this name was one of the sons of Simon the Cyrenian, who was compelled to bear the cross of Christ (Mark xv. 21): he is supposed to be the same with the Rufus to whom Paul, in writing to the Romans, sends his greeting in the remarkable words, 'Salute Rufus chosen in the Lord, and his mother and mine' (Rom. xvi. 13). The name is Roman; but the man was probably of Hebrew origin. He is said to have been one of the seventy disciples, and eventually to have had charge of the church at Thebes.—J. K.

RUMAH (רֹמָה, 'elevation'; Ρομά; Alex. Ρομά; *Ruma*). It is said in 2 Kings xxiii. 36, of the mother of king Jehoiakim, that 'she was the daughter of Pedaiah of Rumah.' The name is not again mentioned, and there is no guide to its geographical position. Keil says, 'perhaps רֹמָה is the same with אֲרֻמָּה (Judg. ix. 41) in the neighbourhood of Shechem' (*Comment.*, ad loc.) Jerome appears to have held the same opinion, but he locates the town near Diospolis, on the plain of Sharon (*Onomast.*, s. v. *Ruma*).—J. L. P.

RUSH. [AGMON.]

RUTH (רוּת; Sept. Ρούθ), a Moabitish woman, brought, under peculiar circumstances, into intimate relation with the stock of Israel, and whose history is given in one of the books of the sacred canon which bears her name. The narrative that brings her into the range of inspired story is constructed with idyllic simplicity and pathos, and forms a pleasant relief to the sombre and repulsive shades of the picture which the reader has just been contemplating in the latter annals of the Judges. It is the domestic history of a family compelled, by the urgency of a famine, to abandon the land of Canaan, and seek an asylum in the territories of Moab.\* Elimelech, the head

\* The period to which this famine is to be referred is a greatly disputed point among commentators. The opinion of Usher, which assigns it to the age of Gideon, and which is a mean between the dates fixed upon by others, carries with it the greatest probability. The oppression of the Midianites, mentioned in Judg. vi. 3-6, which was productive of a famine, and from which Gideon was instrumental in delivering his people, wasted the land and destroyed its increase, 'till thou come unto Gaza;' and this embraced the region in which Judah and Bethlehem were situated. The territory of Judah was also adjacent to Moab, and

of the emigrating household, dies in the land of his sojourn, where his two surviving sons 'took them wives of the women of Moab; the name of the one was Orpah, and the name of the other Ruth.' On the death of the sons, the widowed parent resolving to return to her country and kindred, the filial affection of the daughters-in-law is put to a severe test, and Ruth determines at all hazards to accompany Naomi. She accordingly arrives at Bethlehem with her mother, where, in the extremity of want, she goes to glean after the reapers in the harvest-field of Boaz, a wealthy kinsman of her deceased father-in-law Elimelech. Attracted by her appearance, and informed of her exemplary conduct towards her mother-in-law, Boaz bade her return from day to day, and directed his servants to give her a courteous welcome. An omen so propitious could not but be regarded as a special encouragement to both, and Naomi therefore counselled Ruth to seek an opportunity for intimating to Boaz the claim she had upon him as the nearest kinsman of her deceased husband. A stratagem, which in other circumstances would have been of very doubtful propriety, was adopted for compassing this object; and though Boaz entertained the proposal favourably, yet he replied that there was another person more nearly related to the family than himself, whose title must first be disposed of. Without delay he applied himself to ascertain whether the kinsman in question was inclined to assert his right—a right which extended to a purchase of the ransom (at the Jubilee) of Elimelech's estate. Finding him indisposed to the measure, he obtained from him a release, ratified according to the legal forms of the time, and then proceeded himself to redeem the patrimony of Elimelech, and espoused the widow of his son, in order 'to raise up the name of the dead upon his inheritance.' From this union sprang David, the illustrious king of Israel, whose line the writer traces up, in conclusion, through Boaz, to Pharez son of Judah.—G. B.

RUTH, BOOK OF, is inserted in the canon, according to the English arrangement, between the book of Judges and the books of Samuel, as a sequel to the former and an introduction to the latter. Among the ancient Jews it was added to the book of Judges, because the transactions which it relates happened in the time of the judges of Israel (Ruth i. 1). Several of the ancient Fathers, moreover, make but one book of Judges and Ruth. But the modern Jews commonly place in their Bibles, after the Pentateuch, the five Megilloth—1. The Song of Solomon; 2. Ruth; 3. The Lamentations of Jeremiah; 4. Ecclesiastes; 5. Esther. Sometimes Ruth is placed the first of these, sometimes the second, and sometimes the fifth.

The true *date* and *authorship* of the book are alike unknown. The Talmud (*Baba Bathra*, f. 14. 2) ascribes it to Samuel; and to this most have assented. It is, however, unsupported by

a removal thither was easy and natural. The scourge of Midian endured, moreover, for seven years; and at the expiration of ten years after the deliverance by Gideon was fully consummated, Naomi re-emigrated to her native land. All the circumstances combined favour, mainly, the hypothesis of Usher.

VOL. III.

\*

any evidence beyond that of late traditions. That it was written at a time considerably remote from the events it records, would appear from the passage in ch. iv. 7, which explains a custom referred to as having been 'the manner in former time in Israel concerning redeeming and concerning changing' (comp. Deut. xxv. 9). That it was written, also, at least as late as the establishment of David's house upon the throne, appears from the concluding verse—'And Obed begat Jesse, and Jesse begat David.' The expression, moreover (ch. i. 1), 'when the judges ruled,' marking the period of the occurrence of the events, indicates, no doubt, that in the writer's days kings had already begun to reign. Add to this what critics have considered as certain Chaldaisms with which the language is interspersed, denoting its composition at a period considerably later than that of the events themselves. Thus Eichhorn finds a Chaldaism or Syriasm in the use of נ for ה in מורה, though the same form occurs elsewhere. He adverts also to the existence of a superfluous יod in יסמתי and ירדתי (iii. 3), and שכנתי (ver. 4). As, however, the language is in other respects, in the main, pure, these few Chaldaisms may have arisen from a slight error of the copyists, and therefore can scarcely be alleged as having any special bearing on the era of the document. The same remark is to be made of certain idiomatic phrases and forms of expression which occur elsewhere only in the books of Samuel and of Kings, as—'The Lord do so to me, and more also' (Ruth i. 17; comp. 1 Sam. iii. 17; xiv. 44; xx. 13; 2 Sam. iii. 9, 35; xix. 13; 1 Kings ii. 23; xix. 2; xx. 10; 2 Kings vi. 31); 'I have discovered to your ear,' for 'I have told you' (Ruth iv. 4; comp. 1 Sam. xx. 2; 2 Sam. vii. 27). Ewald (*Gesch.*, i. 207) and Bertheau (*Exeget. Hdb.*, Lief. vi.) would place the writing of the work in the time of or after the captivity; but for so late a date there is no ground.

The *canonical authority* of Ruth has never been questioned, a sufficient confirmation of it being found in the fact that Ruth the Moabitess comes into the genealogy of the Saviour, as distinctly given by the Evangelist (Matt. i. 6). The principal difficulty in regard to the book arises, however, from this very genealogy, in which it is stated that Boaz, who was the husband of Ruth, and the great-grandfather of David, was the son of Salmon by Rachab. Now, if by Rachab we suppose to be meant, as is usually understood, Rahab the harlot who protected the spies, it is not easy to conceive that only three persons—Boaz, Obed, and Jesse—should have intervened between her and David, a period of near 400 years. But the solution of Usher is not improbable, that the ancestors of David, as persons of pre-eminent piety, were favoured with extraordinary longevity. Or it may be that the sacred writers have mentioned in the genealogy only such names as were distinguished and known among the Jews.

The leading scope of the book has been variously understood by different commentators. Umbreit (*Ueber Geist und Zweck des Buches Ruths*, in *Theol. Stud. und Krit.* for 1834, p. 308) thinks it was written with the specific moral design of showing how even a stranger, and that of the hated Moabitish stock, might be sufficiently noble to become the mother of the great king David, because she placed her reliance on the God of Israel.

2 Z

Bertholdt regards the history as a pure fiction, designed to recommend the duty of a man to marry his kinswoman; while Eichhorn conceives that it was composed mainly in honour of the house of David, though it does not conceal the poverty of the family. The more probable design we think to be to pre-intimate, by the recorded adoption of a Gentile woman into the family from which Christ was to derive his origin, the final reception of the Gentile nations into the true church, as fellow-heirs of the salvation of the Gospel. The moral lessons which it incidentally teaches are of the most interesting and touching character: that private families are as much the objects of divine regard as the houses of princes; that the present life is a life of calamitous changes; that a devout trust in an overruling Providence will never fail of its reward; and that no condition, however adverse or afflicted, is absolutely hopeless, are truths that were never more strikingly illustrated than in the brief and simple narrative before us.—G. B.

### S.

SAADIA GAON (=RECTOR), *b. Joseph Ha-Pithomi* (הפיתומי), Ha-Mizri (המצרי), called in Arabic *Said Ibn Jaakub al-Fajjumi*. This famous founder of a new exegetical and scientific school among the Rabbins, as well as of a system of moral philosophy, in the middle ages, was born A.D. 892, at Fajum, in Upper Egypt. Very little is known of the events of his youthful life beyond the fact that he distinguished himself as a philosopher, Talmudist, theologian, orator, grammarian, and commentator, when scarcely more than twenty. When little more than twenty-two (914) he published his first production, written in Arabic, and entitled כְּתָאב

אֱלֹהִים עַל עֵץ, *A Refutation of Anan*, the founder of Karaism or Sadduceeism revived. This work has not as yet been found, but from Solomon b. Jerucham's (a celebrated Karaites) rejoinder to it, we learn that the import of it was to refute Anan's doctrines, and to show the necessity of the traditional explanation of the Scriptures as contained in the Rabbinic writings. He urged in support of tradition that the simple words of the Bible are insufficient for the understanding and the performance of the law, since many of the enactments in the Pentateuch are only stated in outline, and require explanation; as in the case of the general prohibition to work on the Sabbath, where the nature of the labour is not defined; that prayer is not at all ordered in the Mosaic law, whilst the necessity of it is referred to an oral communication; that the advent of Messiah and the resurrection of the dead are based upon traditional exegesis; and that the history of the Jews is derived entirely from tradition (comp. Solomon b. Jerucham against Saadia, Alphabet iii. MS.) The rapid strides of Karaism, and the fact that the Karaites were now almost the sole possessors of the field of Biblical exegesis and grammatical research, whilst the orthodox Jews were satisfied with taking the Talmud as their rule of faith and practice, determined Saadia to undertake an Arabic translation of the Scriptures, accompanied by short annotations. His Biblical works are—(1), תַּפְסִיר אֱלֹהִים, *A Translation of the Pentateuch*, with annotations,

which he completed A.D. 915-920. That this translation was accompanied by a commentary is evident from the fact that Ibn Ezra in the introduction to his *Comment. on the Pentateuch* refers to it, and censures its digressions, and that Saadia himself mentions it in his work *On Faith and Doctrine* (אֲמוּנוֹת וּדְרוֹשׁוֹת). The commentary, however, has not as yet come to light, and it is only the Arabic version which has been published, first with the reputed Chaldee paraphrase of Onkelos, the Jewish Persian version of Jacob Tusi, the Hebrew text, and Rashi's Commentary, Constantinople 1546; then in the Paris and London Polyglotts, with a Latin version. To the treatises on Saadia's translation of the Pentateuch mentioned in the article ARABIC VERSIONS in this Cyclopaedia, we must add the thorough critique on it by the learned Leopold Dukes in *Beiträge zur Geschichte der ältesten Auslegung des A. T.*, von Ewald und Dukes, Stuttgart 1844, vol. ii. p. 44, etc. (2), תַּפְסִיר יִשְׁעִיָּה, *A Translation of Isaiah*, finished shortly after the preceding work. This translation was published by H. E. G. Paulus from a MS. in the Bodleian Library (Cod. Pococke, No. 32) of the year 1244, entitled *R. Saadie Phijumensis Versio Isaiae Arabica*, etc., Jena 1790-91. Dissertations and criticisms on this version, as well as many corrections, appeared in Eichhorn's *Allg. Bibliothek der bibl. Literatur*, vol. iii. p. 9, ff., p. 455, ff.; Michaelis' *Neue orient. Bibliothek*, vol. viii. p. 75, ff.; Gesenius, *Der Prophet Isaia*, vol. i. part i. p. 88, ff.; Leipzig 1821. Rappaport, who possesses a MS. of this version, has published some corrections of Paulus' edition in his *Biography of Saadia*, which appeared in the Hebrew *Essays and Reviews*, entitled *Bikure Ha-Filim*, vol. ix. p. 32, etc., Vienna 1828. Munk, who thoroughly re-examined the Bodleian MS., has published some emendations of Paulus' text, and has also corrected sundry errors of Gesenius and Rosenmüller, comp. Cahen's Bible, vol. ix. p. 101, etc., Paris 1838. [CAHEN.] (3), תַּפְסִיר זְבוּר דָּוִד, *A Translation of the Psalms of David*, with annotations. Two MSS. of this commentary, the one written with Hebrew letters, and the other with Rabbinic characters, are in the Bodleian Library (Cod. Pococke, No. 281 [Uri 39], and Cod. Hunt. 416 [Uri 49]), and one is in Munich. Schnurrer published in 1790 from the first-named Bodleian MS. Ps. xvi., xl., and cx., in Eichhorn's *Allgemeine Bibliothek der bibl. Literatur*, vol. iii. p. 425-438. Ps. lxxviii., with the annotations, was published by Professor Haneberg from the Munich MS. in his treatise entitled *Ueber die in einer Münchener Hs. aufbehaltene arabische Psalmbüchersetzung des R. Saadia Gaon; mit einer Probe*, Munich 1841. Whilst Ewald published from a collation of all the three MSS. the entire translation of Ps. i.-v., and excerpts of the commentary on the whole Psalter, with excellent critical remarks of his own, in the *Beiträge zur Geschichte der ältesten Auslegung des A. T.*, vol. i. p. 1-74. (4), תַּפְסִיר אִיּוֹב, *A translation of Job*, with annotations, entitled כְּתָאב אֱלֹהִים, *The Book of Justification*, or *Theodicaea*. Excerpts of this version, and annotations from the only MS. extant (Bodleian Library, Cod. Hunt. 511), have been published by Ewald, with a German translation by the learned editor in the same *Beiträge*, etc., p. 75-115. (5), פְּרוֹשׁ עַל שִׁיר הַשִּׁירִים, *A Commentary on the Song of Songs*. This com-

mentary, which is a free translation into Hebrew of Saadia's Arabic work, was first published, together with Ibn Caspi's and Jacob Provencali's expositions of the same book, by Isaac Akhrish, Constantinople, circa 1579; then separately by Solomon b. David Moses, under the title פֶּרֶשׁ סַעֲדִיָּה, Prague 1608. Excerpts of the extremely rare Constantinople edition, with an English translation, have been published by Ginsburg, *Historical and Critical Commentary on the Song of Songs*, Longman 1857, p. 36, etc. Saadia also made translations of and wrote commentaries on the other four Megilloth—viz., Ruth, Lamentations, Ecclesiastes, and Esther—as well as the Minor Prophets and the Book of Daniel, which are only known by quotations from them in the works of Ibn Ezra, Kimchi, Salomon b. Jerucham, and other Jewish expositors and lexicographers. Moreover, he was the first non-Karaite Jew who wrote grammatical and lexical works on the language of the Hebrew Scriptures. All these works, however, have become a prey to time, and are only known from quotations in other treatises on the same subjects, with the exception of his work on the seventy

תַּפְסִיר אֶלְסַבְעִין לַפְטָה, entitled ἀπαξ λεγόμενα, which has been published by Dukes in the above-named *Beiträge*, etc., vol. ii. p. 110-115, and again with important corrections in Geiger's *Wissenschaftliche Zeitschrift*, vol. v. p. 317-324, Leipzig 1844. The commentary on Daniel, printed in the Rabbinic Bibles under the name Saadia Gaon [RABBINIC BIBLES], is not his, as has been proved to demonstration by Rappaport in his biography of Saadia, *Bikure Ha-Ḥitum*, vol. ix. p. 34, etc., Vienna 1828.

All these works Saadia wrote between A.D. 915 and 928—i. e., before he was thirty-six years of age. So great was the reputation which these literary works secured for him, that David b. Sakkai, the prince of the captivity (נְשִׂיא), sent for him to come to Sora in Babylon [EDUCATION], where he was appointed Gaon of the academy (928), a dignity which had never before been conferred upon any but the sages of Babylon, who were selected from the learned teachers of their own academies. After occupying this high office a little more than two years (928-30), he was deposed through the jealousy of others and his own unflinching integrity. He however retained his office in the presence of an anti-Gaon for nearly three years more (930-933), when he had to relinquish his dignity altogether. He then retired to Bagdad, where he resided as a private individual for four years (933-937), and composed sacred poems, compiled a prayer-book, and wrote against the celebrated Massorite Aaron b. Asher [BEN ASHER], as well as those two philosophical works—viz., the commentary on the *Book Jezira*, and the treatise entitled *Faith and Doctrine* (אֱמוּנָה וְדַעַת)—which were the foundation of the first system of ethical philosophy among the Jews. He was re-installed in his office as Gaon of Sora in 937, laboured in the academy for five years, raising it to the highest state of prosperity, and died in 942, in the fiftieth year of his age. In his translations and expositions of the Bible, Saadia tells us, in the introduction to the Pentateuch (*London Polyglott*, vol. vi., beginning), he had a threefold object in view—i. He was desirous to render the Holy Scriptures accessible to the people at large; ii. To demolish Karaism, which was

then undermining the Talmudic interpretation, thus in fact to preserve the traditional against the Karaite exegesis; and iii. To oppose the fanaticism and perverseness of the mystics who took the anthropomorphisms of the Bible literally, and formed to themselves the grossest representations of the Deity, ascribing to him a body, sensuous organs, passions, etc. It was this anxiety to effect a harmony between the teachings of the Bible, the Talmud, and philosophy, which made him paraphrase loosely and interpret unnaturally every passage which, in its obvious sense, did not square with the traditional exegesis, or with his philosophical notions. Thus, *ex. gr.*, as he did not admit the existence of an evil principle, or Satan, in opposition to the Deity, he maintained that Satan, who is spoken of in the Book of Job as the tempter, was not a demoniac power, but a human adversary; 'for,' says he, 'if we believe that an angel is capable of envy and jealousy, we shall also have to concede that he has other passions and sensuous desires, which is contrary to the idea of angels' (comp. *The Fragment of Saadia's Commentary on Job* in Munk's *Notice sur Saadia*, p. 8). The Arabic style of his translation is pure and elegant. He often shows his mastery of the two languages by selecting such expressions in his version as correspond in their sound to the original Hebrew. Unlike his Jewish brethren who wrote Arabic, he employed Arabic letters. (Comp. Ibn Ezra, *Commentary on Gen.* ii. 11.)

*Literature.*—Rappaport, *Biography of R. Saadia Gaon*, in the *Hebrew Essays and Reviews*, entitled *Bikure Ha-Ḥitum*, vol. ix. p. 20-37, Vienna 1828; Geiger, *Recensionen Rappaport's Biographien* in *Wissenschaftliche Zeitschrift*, vol. i. p. 182, etc., Frankfurt-on-the-Maine 1835, *ibid.* vol. v. p. 261, etc., Leipzig 1844; Munk, *Notice sur Rabbi Saadia Gaon et sa version Arabe* in Cahen's *Bible*, vol. ix. p. 73, etc., Paris 1838; Ewald and Dukes, *Beiträge zur Geschichte der ältesten Auslegung des Alten Testaments*, vol. i. p. 1-115; vol. ii. p. 5-115, Stuttgart 1844; Fürst, *Bibliotheca Judaica*, i. 266-271; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana* 2156-2224; Graetz, *Geschichte der Juden*, vol. v. pp. 302, ff.; 529, ff.—C. D. G.

SAALSCHÜTZ, JOSEPH LEVIN, was born in Königsburg, March 15, 1801. Being the rabbi of the place, his father gave him a thoroughly good Hebrew education, sent him to the gymnasium, and afterwards to the university, where he especially distinguished himself in the department of Hebrew archæology, and published in 1824, when only twenty-three years of age, an elaborate treatise on the *Urim and Thummim*, for which he obtained the degree of *Doctor of Philosophy*. Twelve months later he published *Von der Form der Hebr. Poesie nebst einer Abhandlung über die Musik der Hebräer*, Königsberg 1825. The first treatise on poetry he republished, with two additional treatises, entitled *Form and Spirit of the Biblical Hebrew Poetry*, *ibid.* 1853. He then went to Berlin, where he was engaged in the Jewish public school (1825-29), and prosecuted his archæological researches. In 1829 the Jews in Vienna invited him to become teacher of religion, which office he held for five years, when he received an invitation from the community of his native place to become their pastor (1835). Here he more than ever spent all the

time which he could snatch from his professional duties to the investigation of Biblical archaeology, and published the following treatises in this department, which are so indispensable to the student of the Bible:—1. *Forschungen im Gebiete der hebräisch-ägyptischen Archäologie*, 3 vols., Königsberg 1838-49; 2. *Das Mosaische Recht*, 2 vols., 1846-48, 2d ed., Berlin 1863; 3. *Archäologie der Hebräer*, 2 vols., *ibid.* 1856; 4. *Die Ehe nach biblischer Vorstellung*, *ibid.* 1858. So great was his reputation as a scholar, that he was the first Jew who was appointed as *Privatdocent* in philosophy at the University of Königsberg, in 1849, and afterwards became honorary professor. Saalschütz died August 23, 1863.—C. D. G.

**SABAOTH, LORD GOD OF.** An appellation of God indicative of his majesty, authority, and power (Rom. iv. 29; James v. 4). Sabaoth stands for the Hebrew צְבָאוֹת, *Tsebaoth*, the plural of צֶבֶא, *an army, a host*; and with the exception of the two passages cited, it is translated in the A. V. 'hosts.' The title 'Jehovah God of Hosts,' or simply 'Jehovah of Hosts,' occurs frequently in the prophetic books of the O. T. It is not found in the Pentateuch, in Joshua, in Judges, in Ezekiel, in Job, or in the writings of Solomon. That it has reference to the dominion of Jehovah over the angels and over the powers of heaven is an opinion which has all but universal assent in its favour, and is not likely to be superseded by the notion, which some have advanced, that it is of Jehovah as the leader of the armies of Israel that this title is used.—W. L. A.

**SABBATH; LORD'S DAY.** We have decided to place these two subjects in juxtaposition, and to treat them in the same article, not because we believe the Sabbath and the Lord's Day identical, or that there are not very important differences between them, but on account of the many analogies which, in spite of those differences, subsist between them, as regards their general character and purpose; and more especially because both have been so often considered together in the voluminous controversies to which they have given rise, that it is almost impossible to treat the one without frequent reference to the other.

**I. SABBATH, שַׁבָּת**, a day of rest. Its derivation is, by general concurrence, from שָׁבַת, signifying to 'rest,' to 'cease from action.' This is so natural, and so obviously connected with Gen. ii. 2, 3, that it does not seem worth while to say anything more respecting its etymology.

The Pentateuch, after giving the narrative of the creation, declares (Gen. ii. 2, 3) that the Sabbath was designed to commemorate the completion of the work. It must in candour, we think, be admitted that it does not necessarily follow, from that reference, that the institution of the day, as a day that was to be dedicated to 'rest, social enjoyment, and worship,' dates from that time. The reference may have been *proleptical*. It is possible, assuredly, that the writer may here refer to it, because he is treating of the events in relation to which (though at a later date) the Sabbath was actually instituted. But it can hardly be doubted by any intelligent and candid reader that the words most naturally suggest at least this much:—that the author's design was to intimate that, from the earliest age of the world, the day had

had a notable mark set upon it; that it was 'set apart,' to be to some extent 'hallowed' in the traditions of men, and encircled with associations of reverence, by the sanction of God. That this was the accepted tradition of the writer himself, and of the people for whom he wrote, certainly seems the more natural interpretation of the words.

Nor is it very easy to account for certain facts, either of sacred or profane history, without supposing as much as this.\* Whether the seventh day was regarded as consecrated to religious worship or not, it is difficult to account for the very general adoption, among so many nations of the ancient world, of the hebdomadal reckoning, without supposing some primitive traditions which sanctioned the ideas of a peculiar reverence due to this day. Some have endeavoured, we are aware, to show that the septimadal division of time may have resulted from associations connected with 'seven' as a sacred number, or as the highest 'prime number' under the decimal system of notation! But these are surely most fanciful and perfectly gratuitous reasons. There is no proof that any investigations of the properties of 'prime numbers' troubled the heads of men at that early period of the world's history, nor if they had, do they show why any peculiar notions of the sacredness of such and such a number should have grown out of them. It is surely much more natural to suppose that a tradition, originating in some presumed fact, gave rise to this peculiar partition of time, than to suppose it the result of abstract reasoning on the properties of numbers, or an unaccountable propensity to attach moral significance to some of these, apart from some such tradition. Neither does any such theory account for the adoption of the custom in question among widely different—many of them comparatively barbarous—nations, and far distant from one another in place. When presumed facts have once been generally admitted, and have led on to customs, then (especially if traditions have grown dim), it is very natural for the human mind to account for or illustrate such customs by referring them to abstract speculations of philosophy, or the analogies (often faint enough) of imagination. But even this supposes the culture and development, to a considerable extent, of the philosophic faculties, and leisure to indulge in such speculative luxury. It is certainly difficult to imagine the bulk of the early nations, especially if they were (as so often supposed) in a condition of primitive rudeness, either prone to speculate on the properties of 'prime numbers,' or learnedly idle enough to found upon them physical or moral mysteries. It is much as if it were contended that the idea of the trinity arose from a general reverence for the properties of the 'trinal' number; or that of the divine unity from profound speculations on the powers of the 'unit;' or the tradition which

\* Though our eyes are not sharp enough to see, in the brief history of the patriarchal ages, what some commentators have professed to discover, traces of such an observance of the seventh day as was enjoined upon the Jews (Dr. Wardlaw's reply to Paley on this point—founded on the succinctness of the narrative—though ingenious, seems altogether unsatisfactory), yet there are several incidents mentioned, especially in the history of Noah, which argue the familiar and recognised division of time by weeks.

traces the origin of all mankind to one pair, from the notions of 'duality.' In fact, to attempt to account for the very general custom of a septimand measure of time by any such fanciful hypothesis seems nothing better than an example of *ὁστρερον πρότερον*; especially when we reflect that the division in question has been found among the rudest as well as the most cultivated of the nations of antiquity.

It is a little more plausible (but still only plausible) to attribute this very general concurrence of the nations in the weekly division of time, to observation of the lunar phases, and so to represent it as nothing more than an instance of a *natural* division of time. This is still, in our judgment, to anticipate the course of human development. It is to suppose the accurate observation of the lunar phenomena, and reasoning upon them, much more early and general than we have any reason to believe they were; and what is more, it is to make the nations (singularly enough) generally concur in taking precisely the same subdivision of the entire cycle of lunar changes, when they might with just as much likelihood have taken another, as in fact some nations seem to have done.\*

That the distinction is not (as is sometimes contended) so *obvious* and *convenient* that it could not well be missed, is sufficiently apparent from the very exceptions, which are *also* much insisted on when the object is to show that it was not *universal*! If this division of time was not only not used, but not even known (which however requires proof), by the acute Greeks and the practical Romans, it does not seem very conclusive to argue from its *obviousness*.

Such a general concurrence, if the effect of observation, would be the more marvellous, that it would imply approximate unanimity in error, where several errors were equally possible. A week is not an exact aliquot part of the month any more than nine days or ten. It would be in fact a *general* concurrence in a similar, but rather refined, error, while other errors were just as likely to be adopted. If one of these divisions were the absolute truth, and also obvious, and *that* had been generally adopted, we should have had more plausible ground for acquiescing in this solution.

The general adoption, therefore, of the septimand period seems more probably due to the diffusion of some primitive tradition, such as is conveyed in the narrative of Genesis. So obvious is the probability of this conclusion, that it may be surmised that the reason for rejecting it, and resorting to such farfetched explanations, originated in strong prejudices against the cosmogony of the first chapter of Genesis, the rejection of which necessitates, of course, the rejection of this particular fragment of the history; else the supposition of a widely-spread immemorial tradition—consecrating,

to some extent, the seventh day—would certainly seem the most natural way of accounting for the very general concurrence in this arbitrary division of time by weekly periods.

The theory of M. Proudhon on this point (see his *De la Célébration du Dimanche*, to which we shall return by and by) is peculiar. Puzzled to account for the hebdomadal division of time, which he believes originally based on that particular ratio of 'labour' to 'rest' which is better adapted to the average human constitution and the collective necessities of human life than any other, yet unable to attribute the primitive decision on the subject to the deductions of any science known to us, he supposes it 'without doubt' the result of a certain 'spontaneous genius, a sort of *magnetic vision* which discovered primitive arts, developed language, invented writing, created systems of religion and philosophy;—a marvellous faculty, the operations of which elude analysis, and which reflection, a rival and progressive faculty, gradually enfeebled without ever so far prevailing as wholly to obliterate it!' (p. viii.) It is certainly curious to find philosophers arguing at once that human nature was cradled in the rudest *savageism* and gradually groped its way from uttermost degradation to the lowest elements of civilisation, and yet gratuitously investing man in that primitive state with the power of vaulting to the most wonderful achievements of science and deciding the most difficult social problems; inventing the arts of speech and writing, and determining the precise ratio in which the social system requires our life to be divided between 'labour and rest;' and all in virtue of a transcendental instinct, which there is not the slightest reason to suppose human nature ever possessed, and least of all in such a condition as they suppose its aboriginal state! Is it more easy to believe all this than to admit that there is truth in the history of Genesis; that man did not absolutely begin on all fours; or that he derived some glimmer of light—the rudiments at least of the arts necessary to make life tolerable—from divine revelation? Certainly, if he possessed the transcendental instinct ascribed to him by M. Proudhon, it is hard to see how it differs from direct inspiration. It seems, however, that there is one thing which staggers M. Proudhon still more than even the notion that the hebdomadal division of time, and the purpose to which it was applied, should have been imparted by revelation; and that is, that Moses should have stumbled on this institution by *chance* or *guess*. He therefore conjectures that though 'L'origine de la semaine est inconnue,' yet it is possible that Moses, rich in all the knowledge of the Egyptians, might have had resources in a science to which Paris has not attained,—'*à une science des sciences, à une harmonique transcendante, s'il m'est permis de lui donner un nom. . . . La certitude de cette science est démontrée par le fait même dont nous nous occupons.*' He indulges in some mystical attempts to illustrate this 'science of sciences' by reference to certain numerical analogies, which do not seem to satisfy himself, and can still less satisfy anybody else; but anyhow his rejection of all chance-work shows the abundant faith of a sceptic; for he declares that sooner than believe that *chance* alone so favoured Moses, he would believe that some special revelation had been made to him (p. 67), or accept the 'fable that a sow wrote the Iliad with its snout.'

We have conceded that it is not *necessary* to infer

\* 'Primum *σάστημα* ex diebus dicitur Septimana, *res omnibus quidem Orientis populis ab ultima usque antiquitate usitata*, nobis autem Europæis vix tandem post Christianismum recepta'—*De Emend. Temp.*, p. 9. That is to say, the distinction was well known to the Hebrews, Egyptians, Hindoos, Chinese; in a word, in those regions where we search for the native seats and cradle of the human race. Meantime the exceptions, as said above, prove that the distinction was not so *obvious* and *natural* as it is often the fashion to represent it.

more from the reference to the Sabbatic institution in Gen. ii., than that the author, compiling the book after the institution of the Sabbath was known and established, took the opportunity *en passant* of parenthetically noting the occasion; still it is not unnatural to suppose a peculiar emphasis attached to the word 'hallowed;' that from the earliest times of primitive tradition the notion of a certain sacredness was attached to the seventh day; and if so, it is at least highly probable that it was also generally marked by some religious observances, even though not formally enforced, or made universally obligatory upon mankind. It is impossible to deny that the words, 'And God blessed the seventh day, and hallowed' (*separated*) 'it, because that in it he had rested from all his work which God created and made,' would naturally lead the great majority of readers to such a conclusion, even though they do not necessitate it; and, if fairly explicable, in another way, it cannot be denied that this has been the prevailing opinion.

The grand occasion in reference to which this day was instituted, and the events of which it was to be commemorative, are, we conceive, sufficiently clear from the intimations in the Pentateuch. It is not at all necessary, in order to make such intimations intelligible, to decide on the absolute accuracy of any special interpretation of the first chapter of Genesis, or of the events narrated in it. The interpretation of that portion of Scripture is at present beset with insuperable difficulties; nor until both geology and exegesis have done more for their respective sciences, can we be sure that we have thoroughly mastered it [CREATION]. But whether the 'six days' be supposed literally days of twenty-four hours each, or periods of vast but indefinite duration, each more or less sharply defining the progress in the gradual development of the *Cosmos*, and its stages of transition towards the condition in which it has been since man first made his appearance; whether it be interpreted literally, as an unvarnished narration of facts, revealing new arrangements of the terrestrial globe, and the creation of new species of animals (changes immediately preceding, and having a designed relation to, the advent of man); or whether it be regarded as a grand symbolical vision—a picture, as it were, in *chiaro-oscuro*—presenting only a general resemblance to the real facts, and not a literally accurate delineation, it is plain that in the estimate of the writer of the Pentateuch, and in the judgment of primitive tradition, there was a sublime *succession of acts* in this great drama of creation. And indeed upon *any* hypothesis, even that of the most gradual development, there must have been some such stages; for they are written on the books of stone which geology pores over, as well as in the book of Genesis. The writer also supposes that the creative energy, having interposed in these successive acts, ceased when the present system of causes and effects was developed, and the ordinary course of the world established upon the basis of its present laws; whereupon the Creator, in the final survey of his work, pronounced it all 'very good,' and 'rested on the seventh day.' All admit, of course, that this language is wholly anthropopathic; which gives some reason to conjecture that the narrative of the 'six days' may be also only a symbolical representation, in condescending adaptation to the capacities of man; presenting only a shadowy and approximate, not a clear and

exact, delineation of the facts. But, at all events, the language just quoted respecting God himself must be merely tropical, and is universally felt to be so; for as the Book itself plainly says, 'He fainteth not, neither is weary.' Nor if our Lord spoke truth when he said, 'My Father worketh hitherto,' is it true that God *ceases* working in the only sense in which he works at all; that is, by the constant activity of an omnipotent Will. Since 'he speaks, and it is done; commands, and it stands fast,' his omnipotence cannot be supposed at all *more* active when he wills anything to *be*, than when he wills it to continue in being; when he creates, than when he conserves. This language is, however, in keeping with the ordinary style in which not only the divine condescension actually speaks to man, but in which, for the most part, it *must* speak, in order to be intelligible at all. Every form of expression employed to denote the nature or the attributes of God, or his mode of operation, must be in language derived from the analogies of our nature, and is necessarily anthropopathic. The *real* analogies, however, in the present case, though metaphorically expressed, are obvious enough. The several acts of creative energy, and their cessation at the completion of the series of the related wonders (represented as God's 'working' and 'resting') correspond to man's alternate 'working and resting' according to the law of his nature, and teach him that he should periodically 'cease from his labours, even as God did from his.'—This, in the judgment of the writer of the Pentateuch, was the principal *occasion* of the institution of the day, whether *actually* instituted then or at a later period.

Whatever, then, be the true interpretation of the first chapter of Genesis, the injunction to observe the Sabbath (whether old as the world and given to all mankind, or long after and to the Jews exclusively) was principally commemorative of the completion of the divine work in creation. That it was really founded on the divine authority must of course be made out by the general evidences of the veracity of the sacred writer, and can be denied by no one who admits the sufficiency of those evidences. While it is plain that the *principal* reason for the institution of the Sabbath is a commemoration of the completed work of creation, an additional reason is added in Deut. v.; namely, to commemorate the deliverance from Egypt. This is sometimes represented as a *contradictory* reason; but this cannot be justly said. There is no inconsistency in the case; it is simply a double commemoration, instead of a single one, that is enjoined.\*

\* The enforcement of the command to keep the day of rest, and the duty of a lenient and merciful treatment of menials and dependants ('that thy man servant and maid servant may rest as well as thou,' etc.), are certainly most naturally and beautifully connected (Deut. v. 15) with the injunction to 'remember thou wast a servant in the land of Egypt.' The words of Grotius on this subject, founded on the traditions of some of the Rabbis, are worth quoting. Commenting on Exod. xx. 8, he says—'Verissima enim sententia est Rabbini Judæ Barbesalhelis et Rabbini Ephraimi in Keli Jacar, *aliud* hic, *aliud* sequentibus verbis præcipi. Sanctus ille cultus causam habet mundum conditum: otium quod mox præcipitur, Ægyptiacam

Such being the worthy *occasion* on which the day was instituted, to commemorate the consummated work of creation, and 'celebrate the throne and equipage of God's almightiness,' so it is not difficult to show the profound *wisdom* and *benevolence* of the institution itself; and the last not less than the first. Some may demur to this as affirmed of the *Jewish* Sabbath; but, as we shall presently show, without reason.

1. As to the *wisdom*, in a *physical* point of view, of some such institution, nobody doubts. All the facts of physiology, all individual experience, the customs of all nations in the appointment of certain days as 'festal'—in which the ordinary avocations of life should be for awhile intermitted—show the necessity and expediency of it. If there be one thing clear, it is that man requires such periodic intermission if he would keep either his physical, intellectual, or moral nature in health, or prevent his soul from becoming the mere drudge of his body. That he is not capable of continuous activity, we all know familiarly enough; the absolute need of sleep every few hours—a third of man's whole life being spent in that simulated death—is the most striking proof of it; but this is not enough. Not only is man incapable of continued exertion, whether of body or mind, without sleep; but in spite of that periodic anodyne, he will, if he has nothing more, generally fall into a morbid condition, more especially if his occupations (even though they may not be very arduous) are marked by little variety, pursued in a crowded city or amidst monotonous scenes, or make large demands on the nervous energy. Man needs not only the periodic rest of sleep at short intervals, but longer rest at longer intervals; and, what is as important to health as sleep itself, he needs *change* of mood. His life will no more bear one unvarying routine and succession of the same thoughts and employments without paying the penalty of ill health, than his stomach will bear one kind of food without resenting it. Nothing is more common, in medical practice, than to find patients complaining of 'being out of health' (as the saying is), and getting daily worse, though their employments are neither unhealthy, nor very heavy, nor very irksome; but which have been too long pursued without variation. The mere wear and tear of the ordinary routine, the continuity of the same thoughts, especially if attended with anxiety, has put the whole system out of tune, and gradually induced diseased action of the brain, stomach, and nerves. The shrewd physician often perceives that the sure and speedy remedies in such a case are rest, change, and a complete suspension and abandonment of the ordinary mode of life; and that wrench alone from all the ordinary holdings of life, will, in innumerable cases, magically restore health, and prove the only medicine necessary. If the patient can be got away from the deadly *malaria* of constant and uniform occupations, his physician knows he will do well; and the result in a thousand cases justifies his prognostics. There are few of

*servitutum. Illud ad genus humanum pertinet, hoc ad Hebræos solos.*' Admitting that it is hardly possible to contend for so sharp a distinction, nothing can be more natural or pathetic than the re-inforcement on the Jews of the enjoined Sabbatic rest by the recollection of their sufferings during their Egyptian bondage.

those who have attained middle life who have not for themselves experienced this beneficial effect of change. Away from home, which they left with a brain filled with vapours, and a heart oppressed with all the fancies of the *malade imaginaire*, the cloud has been lifted from the mind as it were by magic; in the presence of new scenes, sunshine in spite of themselves has stolen into the soul, and all the vital functions have returned to their normal play under its influence. Now, the institution of the Sabbath gave the Jew a beneficial periodic break of this kind; an enforced abstinence from all the ordinary occupations and trains of thought, the continuous prosecution of which is so apt to produce enfeebled health, and at length, it may be, madness or death.—And whether it were a common tradition or experience that was the teacher, other nations learned the necessity of something analogous to it, as far as regards *this* end at least. If they had no Sabbath, they yet instituted certain festal days on which the sons of toil were released from their drudgery, and recruited their wasted vigour, both of body and of mind, by needed repose; days on which the wheels of the soul might be dragged out of the deep ruts of customary thought and feeling on to the green sward of 'pleasant fancies' and quiet contemplation.

Among different nations these days have been variously employed; sometimes consecrated to religion, and sometimes spent as holidays in the ordinary sense; generally, in various degrees, devoted to both purposes. But they have all had the same beneficial tendency we are now insisting on—to break the fatal continuity of daily toil, and to prevent the ill effects of it.\*

Nor is the *moral* significance of such an institution less conspicuous. That there should be seasons in which the mind, as well as the body, may repair its energies and 'retrim its lamp,' reason shows to be desirable, and experience necessary. If the soul is to be at all cared for; if leisure is to be secured for higher interests than those of the body; for the culture of the intellect and the discipline of the heart; for due meditation on those

\* Among the many beautiful tributes which eloquence and poetry have paid to the momentous *physical* benefits of the Sabbath, there is none more so than that which Lord Macaulay has paid in one of his speeches on the factory question. 'The natural difference,' says he, 'between Campania and Spitzbergen is trifling when compared with the difference between a country inhabited by men full of bodily and mental vigour, and a country inhabited by men sunk in bodily and mental decrepitude. Therefore it is that we are not poorer but richer, because we have, through many ages, rested from our labour one day in seven. That day is not lost. While industry is suspended—while the plough lies in the furrow—while the exchange is silent—while no smoke ascends from the factory—a process is going on, quite as important to the wealth of nations as any process which is performed on more busy days. Man, the machine of machines—the machine compared with which all the contrivances of the Watts and Arkwrights are worthless—is repairing and winding up, so that he returns to his labours on the Monday with clearer intellect, with livelier spirits, with renewed corporeal vigour.'—Speech on the *Ten Hours' Bill*.

relations in which man stands to his Creator and to a future world ; in a word, for the attainment of those objects for which, as the ultimate end, the body itself subsists, and the whole machinery of life is put in motion, what more desirable than the institution of such a day ? in which, with a mind free from distracting thoughts, and a body rejoicing in welcome release from its daily chains, man may, in accordance with the designed commemorative character of the day, contemplate the glorious works of the Infinite Creator, and his own soul as the most wondrous of them all ; ponder his momentous relations to him, and hold elevating converse with him. Without such leisure (in part at least so employed), all experience shows that man, engaged in unintermitting toil and absorbing cares on behalf of his material interests, soon loses almost all trace of his higher nature ; and not least (paradoxical though it may seem) when his life is spent chiefly amidst the works of nature itself. The hebetating effect of the severe bodily toil of those who have to 'work the stubborn glebe' is proverbial. Wearied with the day's labour, they are too often at its close fit for little but the sleep that is to recruit them for the next day's task, and they wake only to resume it. If it were not for the break of the Sabbath, their whole life would be little else than an alternation of exhausting work and unconscious slumber ; and themselves little better than those machines whose wheels move in a monotonous round during the day and are stopped during the night.

It is not very difficult to see what would be the effect on the whole animal creation (man and brute alike) if it were not for that *ratchet* in the wheel of life which is provided by some such institution as the Sabbath. In all probability, that part of the creation which, like man, is doomed to daily toil, would, in spite of the periodic relief of sleep—supposing no other break—soon degenerate in spirit and strength, and bequeath to each successive generation a diminished vitality. It is not very easy perhaps to detect, or even to conceive, all those subtle and very gradual steps by which mere want of variety (that salt of life), the mere sameness of continuous occupation, will at length break down health, both of body and mind ; still less can we comprehend the mysterious law by which physical debility or depravation is propagated to successive generations. But though the operation of these causes is too complicated and insidious for us to analyse it, and the process too gradual for us to trace out the law, the absolute necessity of variety of scene and employment, of periodic repose, of periodic suspension of thought, is matter of obvious fact and daily experience.

While the *subject-matter* of this Hebrew law—if it be indeed the *duty* of man to comply with the laws of his physical nature, to maintain his faculties in full vigour, to care for the culture of his intellect, his heart, and his social affections, not to let his lower nature usurp dominion over his higher—was *moral*, it is conceded that the separation, for this purpose, of *one day in seven*, as well as the special mode of observance, is *positive*. The aspects of the law just insisted on—its immense social and moral significance—well justified its being placed in the Decalogue. But even the positive part of the institution (supposing it to be of divine command) was not unworthy (as has been sometimes rashly said) of the care of the Supreme. For, in point

of fact, as *some* fixed time was necessary if the law was to be *generally* obeyed at all, so in the present case there seemed abundant reason, supposing God to give any general law on the subject, why he should also fix the time for the observance. It has been sometimes affirmed that this might be determined in every nation by public compact, founded on the experience and conscious wants of the community. But suppose, for argument's sake, this were conceded ; still, on the supposition now argued upon, that the law itself was of divine origin, it was not unworthy of the Supreme Wisdom thus to fix the limits in point of time. For the absolute *best* in such a case is not a problem of easy solution ; or rather it is impossible (otherwise than by guess-work, or by a very imperfect and tentative experience) to such ignorant creatures as ourselves. A very little reflection will show that there must be an *absolute best* in relation to the entire conditions of this social problem, though it may, and indeed must, transcend the wisdom of man to find it. To take the day in one of its aspects only—that of general rest from toil, of suspension of all the ordinary occupations of life : though we know from experience, and it is confessed by the practice of the world in general, that such periodic intermission is necessary, it is a very different thing to know how often it should recur, so as best to answer all the purposes contemplated, and without doing either more or less. And yet it is obvious that, in relation to the actual average capacities of man for labour—the average powers of the human constitution—there must be some ratio of labour to rest which will best comport with the material as well as all the other interests of the community ; best conciliate the welfare of the individual with all the conditions of social prosperity ;—in a word, secure the highest *maximum* of good of all kinds with the *minimum* of counterbalancing evil. This point is too difficult for us to assign ; and yet there certainly must be such a point. If every alternate day were one of suspension of all public business, all would say it was far too much, and feel that such an arrangement would well justify the sarcasms with which Voltaire upbraided the rustics of Ferney, whose ever-recurring saints' days were a continual excuse for laziness. On the other hand, such a day once a month would be generally acknowledged to be too rare. But between too much and too little there must be the *juste milieu*, the *ne nimis*, if we could but find it. Yet its determination depends on an exact calculation of the effect of innumerable laws, and the interaction of numberless varying elements ; and he only who constituted us and the world can make the computation. Though *not moral*, therefore, this part of the law was by no means *arbitrary*, and could only be fixed with absolute accuracy by him who gave it. We have seen in what terms M. Proudhon, in the *brochure* already referred to, speaks both of the difficulty of the problem and of the 'transcendental science' implied in solving it. A few sentences from this remarkable pamphlet may not displease the reader :—

'La certitude de cette science est démontrée par le fait même dont nous nous occupons. Diminuez la semaine d'un seul jour, le travail est insuffisant comparativement au repos ; augmentez-la de la même quantité, il devient excessif. Établissez tous les trois jours une demi-journée de relâche, vous multipliez par le fractionnement la

perte de temps, et en scindant l'unité naturelle du jour vous brisez l'équilibre numérique des choses. Accordez, au contraire, quarante-huit heures de repos après douze jours consécutifs de peine, vous tuez l'homme par l'inertie après l'avoir épuisé par la fatigue. J'omets, pour abrégé, la foule de considérations du même genre que pourrait suggérer l'intervirissement des relations de famille et de cité, et qui ferait ressortir bien d'autres inconvénients. Comment donc Moïse rencontra-t-il si juste? il n'inventa pas la semaine, mais il fut, je crois, le premier et le seul qui s'en servit pour un si grand usage. Aurait-il adopté cette proportion, s'il n'en eût calculé d'avance toute la portée? Eh si ce ne fut pas en lui l'effet d'une théorie, comment expliquer une intuition si prodigieuse? Du reste, quant à supposer que le hasard seul l'eût ainsi favorisé, je croirais plutôt à une révélation spéciale qui lui en aurait été faite, ou à la fable de la truie écrivant l'Iliade avec son groin.—pp. 67, 68.

As the considerations already touched sufficiently show the wisdom of this institution, so they equally prove its *beneficence*. For it was adapted to the physical and moral nature of man, and aimed at his moral and physical well-being. This being the case, it is hard to conceive how and by what perversion it is, that the Jewish Sabbath has been so persistently imagined to be a day of joyless austerity and irksome restraint; not a feast, but a fast; not a festival to be thankfully observed, but 'a day on which a man was to afflict his soul;' not an invitation to freedom from toil and a farewell to care, but a part of that yoke of which the apostle Peter says, 'neither we nor our fathers were able to bear it.' Certainly there is nothing in the documents which prescribe it, and indicate its mode of observance (of the penalties for *disobedience* we shall speak immediately), which can justify any such notions. Its main feature is to inculcate, not any hard task, but abstinence from all tasks. Its main requirement is—and surely it should be welcome to toil-worn man—that he should take his rest and ease; that he should give to himself and all his poor drudges of the inferior creation a holiday; that he should let 'the plough lie idle in the furrow,' and the vine be untormented by the pruning-knife; that the hind should be free from his master, and the master free from his cares:—'In it thou shalt not do any *work*'—any servile or ordinary *work*—'thou, nor thy son, nor thy daughter, nor thy man-servant, nor thy maid-servant, nor thine ox, nor thine ass, nor any of thy cattle, nor thy stranger that is within thy gates; that thy man-servant and thy maid-servant may rest as well as thou.'

What is meant by 'work' is sufficiently evident from the Hebrew terms employed. They are such as we should employ to signify that sort of occupation whether of body or of mind, the condition of which is *toil* and the object *gain*. They are

מלאכה, by which is denoted pretty nearly what we should call *business*, עֲבָדָה, which, as its derivation implies, signifies *servile* and *menial* work. To extend the meaning of 'work' so as to comprehend every kind of 'action' was the error of those who invented the 'traditions' which our Saviour rebukes, and which, fairly carried out, would be inconsistent with any observance of the Sabbath at all, unless men were to sleep through it! The

references in Isaiah, Jeremiah, and Ezekiel, are in general confirmatory of the definitions here given. Men are not 'to think their own thoughts, nor find their own pleasure,' on that day; phraseology which, literally interpreted, would turn man into stone, but susceptible of a very natural interpretation if it be meant that they are not to pursue the every-day schemes and projects on which they usually expend their 'thought' and in which they usually find their 'pleasure.' The prohibition 'to carry burdens on the Sabbath-day' (Jer. xvii. 21, 22, 27) points to the same thing; the cessation of the ordinary traffic, of the purchase of merchandise, and the portage of goods, of all that is implied in buying, selling, and getting gain.

But the ordinary forms of social enjoyment were certainly not forbidden. It was customary to give *feasts* on that day; and our Saviour is expressly said to have been a guest at one. It is true, indeed, that 'cooking' was forbidden on the sacred day; but the hospitality seems to have been freely (though doubtless in the best days of Judaism modestly) exercised. The 'collation' was to be 'cold;' but this in a Syrian climate would be seldom a hardship. For similar reasons, the Jews were forbidden to kindle a fire; but this prohibition seems to have had reference to *culinary* purposes: at all events the Rabbis have themselves always had doubts whether it was designed to forbid a fire when kindled to maintain vital warmth in severe weather—which sometimes, though rarely, would be felt in Palestine. Indeed, only a casuist of the Pharisaic order would ever be tempted thus to sacrifice the spirit to the letter: for with a shivering body and benumbed limbs, it would not be possible to make the Sabbath 'a delight,' or a season of 'rest,' or anything but a day of torment. So that, on our Saviour's just principle of interpretation, that the 'Sabbath was made for man,' we may infer the less rigid is also the more just exposition of this command. Similar observations apply to the general injunction that every one should 'abide in his place' (Exod. xvi. 29). This it is impossible to interpret literally; indeed, it is so obviously connected with the prohibition to go out to 'gather manna' on the Sabbath, that it has been reasonably conjectured to have been only a temporary injunction.\*

What were the religious observances of the ancient Jews on this day is not very clear. That there were some, from immemorial periods, is plain; probably consisting chiefly in the public reading and expounding of the Law—leading on at length to the more definite services of the

\* The assigning of the limits of the allowed 'Sabbath day's journey,' the exact measure of which has been much disputed by critics, was, though probably suggested by this precept, an innovation on the law. The Pentateuch says nothing about it. It was one of the 'traditions of the elders,' and worthy of the rest. It was an attempt to mete out, with precision, what was best left to the sense of propriety in every individual worshipper; who, if he really revered the day, would have a better measure in his conscience than he could have in a foot-rule. If he took the last, he would be continually tormenting himself with subtle questions, as to the very inches to which he might go, and all sorts of disputes as to the *terminus a quo* and the *terminus ad quod*. [See next article.]

Synagogue-worship. As far as the Temple-service was concerned, the morning and evening sacrifice were both doubled, the stale shewbread was removed from the table, and the new substituted for it.

In a word, so far as the original and only authentic documents go, we can discern nothing which should have imparted so gloomy a tinge to the interpretation of the Jewish Sabbath as has often been given by Christian writers, both by those who have adduced Jewish precedents for a more stringent law of the Christian day of rest than they find in the N. T., and by those who, having a very superfluous horror of Sabbatic asceticism in these lax modern times, and foolishly supposing such asceticism the result of a too fond imitation of the primeval Sabbatic practice, have deprecated a return to Judaism.

In fact, the character of the Jewish Sabbath has been strangely misrepresented. Instead of being the harsh law it has been so often libellously painted, instead of being an institution which specially illustrated the rigour of the elder dispensation, and implied bondage to a hard yoke, it was, if we are to judge (and we have no other light) from the tenor of the sacred documents which describe and enjoin it, designed to be a day of joy and rejoicing.\*

The only thing that can be plausibly alleged against the beneficent character of the original Jewish Sabbath is the *penalty* attached to the violation of it; that was undoubtedly severe, and such as would not be justifiable in a human government. But, then, that is a distinct consideration from that of the character of the institution itself. Whether it was unduly severe, will depend on whether the Jews were really living under a veritable theocracy, miraculously authenticated to them; and whether the law enjoined was one which had peculiarly their *welfare* in view, and which therefore there were few temptations to violate. If these things be granted, as they will be by every one who believes the O. T., then, though it is easy to represent the violation of the law as a trivial thing, it is really impossible to imagine a more audacious defiance of the supreme legislator, or a more wanton and excuseless disregard of his laws. Nor is the severity of the penalty—where the authority that imposes the law is thus plain and the law itself one of beneficence—without abundant analogies in the constitution and laws of nature; for *we* too are living under a 'theocracy,' and God deals in the same summary way with us now, in those cases where his authority is plainly declared, and his laws simply invite us to be happy. He deals with us more indulgently where the law is not so obvious, or where there are strong temptations to human weakness to transgress it. But in the case of the more indispensable laws essential to our physical welfare, the more beneficial they are, the

more easy to be obeyed, the more designed and adapted to promote our wellbeing, the less excusable and the more wanton the breach of them, the more they prove the goodness of the great legislator who has imposed them, so much more severe is the punishment exacted. It is a law of our physical nature that we must eat when hungry and drink when thirsty, and rest when weary; and if a man chooses to disobey that physical law, he is subjected to a punishment to which 'stoning' is a trifle.

Now the law of the Sabbath, supposing it to have been given by the supreme legislator of the Jews, under the circumstances the history records, was at once an expression of his goodness, and designed to promote their happiness; had everything about it which, like those laws of nature to which we have just adverted, rendered disobedience without excuse, and justified severity for its violation. It was enjoined for the purpose of promoting, in the most comprehensive form, the welfare of man; it was easy of obedience; it summoned him merely to lay down his burden and forego his toil, and should have been most welcome for that very reason. It proclaimed a weekly suspension of that 'curse' of labour which was pronounced as a part of the penalty of the Fall, and told him that for one day in seven he had nothing to do with that ungrateful glebe which 'brought forth thorns and thistles,' and which he was to cultivate 'with the sweat of his brow.' The severity of the penalty of disobedience, therefore, by no means proves that the law was not of a most beneficent character, any more than those *natural* penalties to which allusion has just been made, would prove the like of the physical laws to which we are subjected. The institution itself may be viewed quite apart from the penalty. At all events, since it is acknowledged on all hands that it was only of temporary application, and peculiar to a miraculously-authenticated dispensation, which implied the most daring impiety and the most wanton rebellion in those who incurred it, it does not disprove the beneficence of the institution, and has no relation to any controversy in which we can be engaged respecting it.

But as to the enjoined modes of observing the day, there is, as we have said, positively nothing that can justify the charge that the Jewish Sabbath was of a rigorous or austere character. No action that was demanded by necessity, duty, or beneficence, was forbidden. This is plainly to be seen by our Lord's most reasonable interpretation of the law, when he justifies the disciples for 'plucking the ears of corn,' for which they had been blamed by the censorious hypocrisy of the Pharisees; when he justified his own works of healing, and showed by an *a fortiori* argument that his enemies must give judgment against themselves, inasmuch as they would not hesitate to 'lead ox or ass to water,' or to 'pull him out of a pit on the Sabbath day,' and triumphantly closed the appeal by saying, 'How much is a man better than a sheep!' The great principle also which he laid down, when he affirmed that 'The Sabbath was made for man, and not man for the Sabbath,' shows us distinctly what was the design and purpose of the original institution; and that if man had in fact been subordinated to the Sabbath, it was only in virtue of those perverse glosses by which, in this, as in so many other cases, the Pharisees had justified the censure of Christ, 'that they had made the law of

\* The caricatures too often given of it in later times are the result either of looking too exclusively at the Pharasaic glosses instead of the original laws, or of perverse attempts on the part of the civil legislature (when the degenerate church had perverted the character of the Lord's day), to force or to find analogies for their arbitrary and stringent enactments in the ordinances of the Jewish law. On this subject we shall say a few words further on.

God of none effect by their traditions.' It were strange indeed if, having corrupted all the rest of the law by 'bondage to the letter' and by their casuistical refinements, this institution, which was from its very nature so readily liable to such corruption, had remained untouched. There is, in truth, in all ages, and amongst all nations, a tendency to subordinate the spiritual to the formal, to 'tithe the mint, anise, and cummin,' and to forget 'the weightier matters of the law;' to reduce to time and weight, measure and number, and outward precision, acts which derive their sole value from the motives which determine them, and the spirit in which they are performed; and, at last, when this process has proceeded far enough, even to *commute* the moral for the literal, and to let the formal act usurp the place of the spiritual observance. The Pharisees, certainly, carried their extravagant despotism of the 'letter' over the 'spirit' to as great a length in their glosses on the law of the Sabbath, as in relation to any law whatever; and that casuistry which Pascal so inimitably ridicules in his *Provincial Letters* can alone match the refinements of these spiritual sophists.

It would not at first sight seem very possible for Jewish superstition to degrade the noble institution of the Sabbath more completely than in the instances which the N. T. records, and our Saviour rebukes. But this would be a mistake. As Heylin says, 'The modern Jews still dote upon their Sabbath, and that more sottishly, and with more superstition far, than ever their fathers did.' When he wrote, this was certainly true, if we may depend on the numerous instances he has given (*History of the Sabbath*, Part i. ch. viii.) These instances are avowedly taken from Buxtorf (*Synagoga Judaica*). Heylin cites particularly cap. x. xi., though it is in cap. xv. xvi. that Buxtorf more particularly treats of the Sabbath. Many of the examples which Heylin cites are rather of superstitions connected with the synagogue-worship in general than with the Sabbath usages; still, as the synagogue-services were chiefly Sabbath observances, and as the whole of the superstitions in question were bound up with one another, it was not unnatural to refer to them, though he should have noted the fact that many of the examples only indirectly illustrated the Jewish superstitions respecting the Sabbath. What refined absurdities, equally pitiable and ridiculous, and what fantastical subtleties of casuistry, were gravely entertained by some of the doting Rabbis, may be seen from the following citations:—'A horse may have a bridle or a halter to *lead*, but not a saddle to *load* him; and he that leadeth him must not let it hang so loose that it may seem he rather carrieth the bridle than leads the horse.' 'The lame may use a staff, but the blind may not.' 'They may not carry a flap or fan to drive away the flies. If a flea bite, they may remove it, but not kill it, but a louse they may; yet Rabbi Eliezer thinks one may as lawfully kill a camel.' 'They must not fling more corn to their poultry than will serve that day, lest it may grow by lying still, and they be said to sow their corn upon the Sabbath.' 'If a Jew go forth on the Friday, and on the night falls short of home more than is lawful to be travelled on the Sabbath day, there must he set him down, and there keep his Sabbath, though in a wood, or in a field, or on the highway-side, without all fear of wind and weather, of thieves or robbers, without all care of

meat or drink;'\* . . . 'with many other infinite absurdities,' adds Heylin, 'of the like poor nature, wherewith the Rabbins have been pleased to afflict their brethren, and make good sport to all the world. . . . Nay, to despite our Saviour, as Buxtorfius tells us, they have determined *since*, that it was unlawful to lift the ox or ass out of the ditch, which in the strictest time of the Pharisaical rigours was accounted lawful.' If would seem, if the story he goes on to tell, out of Crantzius, of the Jew of Magdeburgh (or of another, in our own annals, of Tewkesbury) be true, that it was possible for a Jew to go still further, and not allow even *himself* to be pulled out of a worse place than 'a ditch,' on the Sabbath-day; whereupon it is said the bishop ordered this strange recusant to remain there over the 'Christian Sabbath' too. The latter story, which is told in the rhyming Latin, Heylin translates with more freedom (in all senses) than literality:—

'Tende manus, Solomon, ut te de stercore tollam.'  
'Sabbata nostra colo; de stercore surgere nolo.'  
'Sabbata *nostra* quidem, Solomon, celebrabis  
ibidem.'

But for all these infinite follies of the doting Rabbis (which have often given unfounded notions of the genuine Jewish Sabbath to our modern Protestant Christians), the Bible is no more responsible than is the Sermon on the Mount for the casuistry of the Jesuits. We are rejoiced to see, since this present article was written for the press, indications that the Jews themselves are entering a vigorous and most just protest as well against the fond conceits of their own Rabbis as against the extravagant calumnies of their Protestant adversaries, whose perpetually iterated representations of the 'moroseness and bondage of the Jewish Sabbath' have no foundation in the O. T. In a spirit'd article in the 'Jewish Chronicle,' the Christians, who are perpetually exclaiming, 'Not Judaism but Christianity,' are fairly challenged to show, not from Rabbinical glosses, but from the sacred books, that their charges against the Mosaic Sabbath are founded in truth.

If we would judge of the original law fairly, all these glosses must be swept away, and we must confine ourselves to the writings of the O. T., especially as they are expounded, and their spirit illustrated, by 'him who spake as never man spake.' Restricting ourselves to these sources of information, we repeat that, while the original design of the day was in the highest degree beneficent—nothing more nor less than an invitation to man to be happy; to employ that rest which itself ought to be most welcome in the tranquil enjoyment of God's gifts and in thankful remembrance and worship of the Giver—it gave no discouragement to social enjoyment, forbade no act which necessity or benevolence required, and allowed of the exercise of the rites of hospitality, and consequently of the 'giving feasts,' though no doubt without pomp or parade. The festal character of the day leads us to suppose that this social feature belonged to the Jewish Sabbath in the most ancient times. We know that it did only too conspicuously in later;

\* See this illustrated by an amusing story related by Buxtorf (*Synag. Judaica*, cap. xv.), and well worthy of a place in the most extravagant of the monkish legends.

and that among the early Christians one of the commonplaces of reproach against the Jews, urged with rather too sanctimonious an air by some of the Fathers, was that they indulged too much in 'gulosity' on that day. The Christians, it seems, were fond of contrasting the full diet and formal observance of the Jewish Sabbath with the spare diet and the spiritual observance of the Christian's Sunday. (See passages from Augustine and other Fathers in Hessey's *Bampton Lectures*, Lect. ii. iii.)

II. We now proceed to the subject of the 'Christian Sabbath,' as it has been called, or as we prefer calling it, the 'Lord's day' (ἡ κυριακή ἡμέρα); to determine what are the relations in which it stands to the Jewish Sabbath; whether it be the same institution,—*mutatis mutandis*, and allowing for the different circumstances of the two dispensations,—as some maintain; or, as others (we think more justly) contend, a merely *analogous* institution, arising out of a general similarity of object, but originating in different circumstances, standing on a distinct basis, and appealing, like everything else in Christianity, and in contradistinction to Judaism, to the spontaneous obedience of the heart, rather than to the sanctions of any precise statute. Those who maintain the identity of the Jewish Sabbath and of the 'Lord's day' maintain that it is only an immaterial part of the institution that has been changed, leaving the purposes and the obligations of the ancient law what they were. One of these arguments is, that the 'Sabbath' was anterior to the Jewish law, and therefore of universal obligation on man.

In what sense the idea of a primitive Sabbath may be admitted, and in what rejected, we have endeavoured to explain in a former part of this article. That the precise law given to the Jews was enjoined on all mankind (however probable it be that a certain tradition of sacredness was from the earliest time attached to the seventh day, and that hence the division of time by weeks became so customary), it would certainly be difficult to prove, either from profane or sacred history. That the first mention of the Sabbath in the second chapter of Genesis does not necessarily prove this, has already been shown. Neither does the language of our Lord, that 'the Sabbath was made for man, and not man for the Sabbath,' prove it. For though it has been ingeniously argued that it does, and by none more ingeniously than Dr. Wardlaw, in his *Discourses on the Sabbath*, yet it being an expression equally natural on either hypothesis, it cannot be conclusive for one of them. Our Lord is evidently inculcating the great principle, illustrated by a special instance, that all ritual and positive ordinances of religion must be for the sake of the worshipper, and not the worshipper for the sake of them. Had he therefore been speaking of any such institution as on *all* hands was acknowledged to belong exclusively to the Jews, and in which the Christian had no part, it would have been equally natural and appropriate for him to use just the language he did. For example, had it been the passover or circumcision that was in question, it would have been equally natural to remind his auditors that these were made for man (for the Jews, indeed, in this case, but still as they were *men*), and not man for the passover or circumcision. We therefore cannot but concede that these positive arguments are by no means sufficient to prove that the 'Lord's day' is merely the uni-

versal 'Sabbath' that was coeval with the creation, now transferred to another day and baptized by a Christian name.—But this is not the most serious objection to such a view. The main objection is the *absence* of what we might surely require—some clear evidence to this effect from the N. T. When it is asked on what authority *there* such a conclusion is arrived at, we find not one syllable adducible for it. All is matter of doubtful inference as to the identity of the two institutions. It was natural, indeed, considering the purposes of the Jewish Sabbath—purposes physically and morally of universal importance—to expect that Christianity should have something *analogous* to it. This may be granted; and, as we think, any candid reader of the N. T. may discover no slight indications of such an analogous institution in the 'Lord's day.' But when it is argued that the two are identical, except that the day is changed; that the strict observance of the whole of one day in every week is made as plainly imperative on the Christian as that of the seventh day was on the Jew; of all this we cannot find that the N. T. gives any satisfactory evidence. Let us briefly consider how many things make against the hypothesis.—It is said the day is simply changed. If it be so, might we not expect that some indications would be given in the N. T. that such a transfer had been made? especially considering the undoubtedly divine authority on which the seventh day had been appointed, and the great transactions of which it was to be commemorative? Surely it was not so slight a change as to be unworthy of some express mention. And as the Lord's day is commemorative of equally glorious events, one would imagine it still more natural that the substitution of the one for the other would be at least referred to.—Again, it is acknowledged on all hands that the sanctions and penalties of the original law are altogether abolished.—Further, since the Jewish polity and ritual in general are avowedly abrogated in the gospel, the *prima facie* impression (apart from express exceptions to the contrary) is not unnatural, that what is *not* excepted is abolished. Now, there is not the slightest hint that the Jewish Sabbath, as a peculiar institution, was not among the things abolished. If it be said that the Decalogue was not abolished, and that this law was among them, the answer is that *exceptio probat regulam*; all the other articles of the Decalogue are expressly made binding in the code of Christian morals, with a more emphatic meaning and a more comprehensive application. On the other hand, the Sabbath is *not* so referred to; while there are several express declarations which look the other way in the Pauline epistles, especially the passages in which he speaks so strongly in deprecation of foolish reverence, under the Jewish notions of their sanctity, of 'days, and seasons, months and years.' In particular passages (Col. ii. 16; Gal. iv. 10; Rom. xiv. 2-6), when reproving the lingering looks of superstitious fondness cast on the older dispensation by the Judaizing Christians, he would seem to argue the abolition of all the ancient commemorations, and in the first of these passages the very word 'Sabbaths' is employed. Looking at these passages, it seems impossible, at any rate, to deny that he who doubts whether the Christian Sunday was designed to *take the place* of the Jewish Sabbath has exceedingly strong grounds for his opinion. It

is surely very uncandid not to admit it. To say that the apostle really means that these Judaisers should not observe their Sabbaths as *Jewish*, but as *Christian*; that while 'Sabbaths' in general were abolished, the Sabbath was still retained, though to be celebrated on another day, and by another name, and for different purposes; that they should not regard with such punctilious and scrupulous observance the seventh day, but that they might and ought the first (though he says not a syllable of all this)—requires, in the first place, proof, of which the N. T. furnishes none; and in the second, would make the reasoning of the apostle nugatory, since his *argument* is to show that *no* such days demand the *sort* of observance which the Jewish law required.

But if it be said that since the institution of the Sabbath was of such immense moment, and of such essential value both to the physical and moral well-being of man, and since its *subject-matter* is chiefly moral, it would be strange if Christianity had nothing *analogous* to it; and that therefore we might naturally look for traces of some similar institution in the N. T.—in *that* we fully agree. And, in our judgment, such traces may be found in the Lord's day; though we do not see any evidence that it is merely the Jewish Sabbath with the day and name changed, nor that it is designed to bear the same precise character, nor to occupy the same place. On the contrary, it is pretty plain that, though its object and purpose be analogous, it is discriminated from the Jewish Sabbath by many marked characteristics, which, in the absence of distinct declarations that these are to be considered merely accidental to the institution, make it a different institution. As already said, the day is different, and yet no mention of a transfer; the occasion is different, and no hint of the substitution of one set of commemorated events for another; the penalties and sanctions of the law appear no longer, and are replaced by no others; the *observance* of the day is not prescribed by express statute at all, but the obligation is left to be gathered, by way of inference, from oblique references, and the early practices of the apostles; it is not made compulsory as the Jewish Sabbath so expressly was; instead of appealing to a rigid demand of law, it presents itself as a privilege of grateful love and spontaneous reverence. It is enforced not so much by the precept of those who legislated for the early church, as by their known *example*, which could not but recommend their practice to those who held them in perpetual veneration.

So much for the light in which the Lord's day appears to be represented in the N. T. If it be thought that thereby its authority is weakened, we answer, Far from it to those (and the N. T. addresses only such) who are willing to render the obedience of the heart, and to make loyal love take the place of what is 'set down in the bond'; the obligation is only the more perfect from the spiritual nature of the institution. Considered in this light, we have no hesitation in saying that the reasoning which represents the Lord's day as *binding* on the Christian, though not precisely after a Jewish fashion, is, in spite of being founded only on primitive practice and inferential reasoning, quite irrefutable. Let us look at that reasoning.

And, first, it is evident that the Christians during the lifetime of the apostles did hold *stated* assemblies for religious worship and instruction—assem-

blies which it was considered a duty to attend, and culpable to neglect. This appears plainly from Heb. x. 25, where they are exhorted 'not to forsake the assembling of themselves together, as the manner of some is.' This of course implies *fixed* times for such public acts. Now, secondly, we do in fact find repeated references to such assemblies taking place on the *first* day of the week; and most of the memorable events in the history of the N. T. church are expressly connected with that day. An induction from all the passages in which the *first* day of the week is mentioned cannot fail to convey, to any candid mind, an indelible impression that the founders of Christianity designed to put a signal honour upon it. As matter of fact, it was the day on which Christians met, under the sanction, and in accordance with the example and practice, of the apostles, for instruction and devotion, for the celebration of the Lord's Supper, and the appropriation, to purposes of charity and benevolence, of their substance, 'according as God had prospered them.' It is undeniable that stated periodic assembling of Christians for these purposes—and we have seen from the passage in Heb. x. that there *were* such assemblies—took place on this day, and, so far as we are told, on no other.

Our Lord having risen on the first day of the week (*τῇ μᾶ σαββάτῳ*), and having manifested himself on several different occasions on that day—for example, to Mary Magdalene, to the other women, to Peter alone, to the two disciples on the way to Emmaus in the evening, and afterwards to the assembled apostles in the upper room—did not appear again till after eight days (*μεθ' ἡμέρας ὀκτώ*), that is, according to the usual reckoning, on the *first* day of the following week. The day of Pentecost in that year fell, as it seems, on the first day of the week; and it was signalled by the impartation of those miraculous gifts which equipped the apostles for their grand commission. In Acts xx. 7, when Christianity had already made considerable progress, we meet with the incidental notice that the first day of the week, already so signalled, had become the regular day when the disciples met for mutual edification and the celebration of the Lord's Supper. We are there told that when St. Paul came to Troas 'he abode there seven days, and upon the *first* day of the week, when the disciples came together to break bread, Paul preached unto them.' In 1 Cor. xvi. 1, 2, when he gives the Christians in that church instructions concerning 'the collection for the saints,' he associates the public performance of that duty with the *first* day of the week, and intimates that his instructions were not addressed to them in special, but that he had issued them also to the churches in general: 'As I have given orders to the churches in Galatia, even so do ye. . . . On the first day of the week, let every one lay by in store, as God hath prospered him.' In the book of Revelation, John says, 'I was in the Spirit on the Lord's day' (*ἐν τῇ κυριακῇ ἡμέρᾳ*); and though there has been some dispute among commentators as to whether the phrase refers to the *first* day of the week, there can hardly be any rational doubt, considering that the very phrase is that by which the day consecrated to the commemoration of Christ's resurrection has become designated.

If the evidence stopped even here, Christians would have it to say, that as it was a plain duty, enjoined in Scripture, 'not to forsake the assem-

bling of themselves together,' but to meet for the above public offices of religion, so they had both the *precept* and the *example* of the apostles themselves, and of the Christian churches of the N. T., for such *stated* and *public* 'assembling' on that day and on no other. Nor is it possible to conceive, since such public assemblies must be held on some day, that any day could more commend itself to them and to us than that which commemorates the cardinal event in the history of Christianity,—the resurrection of our Lord.

When we consider, further, how these conclusions are confirmed by the whole stream of ecclesiastical tradition, usage, and practice; that the earliest Christian literature bears evidence to the distinction put on this day above every other; that the observance of the day for the above-mentioned purposes was continued throughout all the churches; that express statements and casual allusions alike bear witness to these same facts;—it is scarcely possible to avoid the conclusion that the Founders of Christianity, however scanty their allusions to the subject in their writings, foreknew that their example would, and designed that it should, give the law to future generations.

We have not space, nor is it at all necessary, to give the succession of testimonies along the early centuries to this effect. The reader, if he wishes the detailed evidence (the facts are sufficiently notorious) may refer to Hessey's *Bampton Lectures*, Lect. ii. Two notices, however, of great importance, immediately linking the N. T. history with that of the succeeding ages, may be mentioned. Pliny, in his letter to Trajan, A.D. 107, speaks of the Christians as assembling on a *stated* day 'to sing hymns to Christ as God,' and to bind themselves by an oath (*Sacramentum*) to discharge certain characteristic prescribed duties in the moral code of their founder; and as assembling again 'to take a meal.' This is an obvious, though, as is natural in a heathen, somewhat confused account of the ordinary worship of the Christians; yet, as we have seen in the N. T. records that they never met for such stated purposes but on one day, it is hardly possible to doubt that this is 'the day' to which Pliny refers. In confirmation of this view, Justin Martyr, writing about thirty years after (A.D. 140) expressly tells us *what* the day of public assembly was: 'On the day called Sunday (*τῇ τοῦ ἡλίου λεγόμενη ἡμέρᾳ*) there is an assembly of all who live either in the cities or in the country districts;' and in his account of what transpired there, he gives us a tolerably exact transcript of the chief characteristics of Christian worship at the present day. He tells us that the 'memoirs (*ἀπομνημόνευματα*) of the apostles and the writings of the prophets were read, that prayer was offered, that the president of the assembly delivered a discourse, that the Lord's Supper was celebrated, and alms collected.' He tells us also 'that the first day was observed, because it was the day on which God created the light, and on which Jesus Christ our Saviour rose from the dead.'

But admitting the manifest obligation of Christians to observe the day, what, it may be asked, is the *mode*? We can only answer that, in the absence of all minute directions (which is so marked a characteristic of the N. T. in all matters of ritual), this must be, to a large extent, determined by the conscience of the individual Christian. If he be one indeed,

duly impressed with the glorious events which the day is designed to commemorate; really inclined to ponder the divine themes which it is intended to impress on his memory and his heart; if they be in his eyes the things which 'belong to his peace;' if he believes that the day is chiefly designed to neutralise the inordinate effect of the 'things seen and temporal,' and to enable him to recover his just sense of the 'things unseen and eternal;' if he values for this purpose a day which invites to mental calm, and affords a breakwater against those stormy cares which beat on him when he is on the open sea of the world; if he recognises, as regards the body, the mercy of the law which forbids him to be a slave of toil, and intermits its pressure for a little time; if, in a word, the day be welcome to him as calculated to answer *all* the beneficent purposes of such a day—whether Jewish or Christian, the ancient Sabbath or the modern Sunday—he will not account it a 'weariness,' feel its hours long and irksome, or be at a loss how to employ it profitably and innocently, though he be forbidden 'to buy and sell, and get gain,' or do 'any manner' of needless 'servile work.' Then will come true all that Jeremy Taylor and other writers have so beautifully said as to the increased, not diminished, obligations which will be felt by every true believer, precisely *because* he feels the observance of the day to be enforced by love rather than command, by example rather than precept, in imitation of primitive practice rather than by any legal bond. But if a man feel nothing of all this, we know not that the N. T. says anything to *enforce* the day on his observance. In conformity with its whole genius and character, Christianity appeals to 'a willing mind,' and what it cannot get from that, by persuasive argument and appeals to men's best affections, it disdains to secure by ritual punctilio and precise legal stipulation.

As regards the duty of the *public* religious observance of the day by every Christian who acknowledges the authority of the N. T., there can be little doubt. It has been seen that public worship, the 'not forsaking of the assembling of ourselves together,' is mentioned as an express duty; and that duty can be discharged only by a general compact to observe the same day of meeting. The apostles and primitive Christians chiefly met for such purpose on the 'Lord's day,' as is evident from sacred and ecclesiastical history; and Christians still observe the same day for the same purpose. Public worship, then, according to the conscientious convictions entertained by Christians, will be one marked feature in the mode of observing the day. As to the number and frequency of the public services which each can profitably attend, or what proportion of time he shall give to private religious duties; and, when not engaged in directly religious duties, what latitude of social relaxation he shall permit himself,—all this, like so much else that relates to the mode of observing the day, must be left to the individual conscience of the Christian; for certain it is that the N. T. says nothing on the subject, nor, it is manifest, can any one rule be laid down for all.

That the primitive Christians continued through the post-apostolic age of the church to celebrate the day by public assemblies for religious worship is plain from the evidence, already cited, of Justin Martyr and others. Nor is it uninteresting to ob-

serve that the services consisted substantially of the same parts as at present : namely, the reading and exposition of the Scriptures, psalmody, and prayer ; and, as already said, these same elements of public worship are found alluded to in the early letter (*cir.* 107) of Pliny to Trajan.

As regards the degree of strictness with which the Christian shall observe the day in private, it is equally impossible to lay down any rule in the absence of any precise instructions in the N. T. The *principles* already enunciated must determine the matter. If the Christian regards the day as both a 'holiday' and a 'holy day,' and its celebration determinable by its whole design, it is certain that he will not permit himself in any kind of worldly occupation which can be avoided, because that would simply poison it under the *former* of these notions ; nor in any such recreation, however innocent on other days, or in itself, which would be inconsistent with the desire that others should have the rest which he himself wishes to enjoy, or which would (as many recreations will) jar with the spirit and the duties of the day, untune the mind, and dissipate whatever of salutary impression has been produced. But even within these limits the judgment of what may be done or not will vary considerably in different minds. Yet, since Christians (if they be such indeed) will not be oblivious on this day of that charity which is so strongly inculcated on *every* day, each will be content to allow his brother a reasonable liberty, and be happy if he 'does not condemn himself in the thing that he alloweth.' Certainly the notion of some, that the whole day should be given up to unbroken religious thought, emotion, and contemplation, is a mere absurdity, and refutes itself by its impracticability. It is an effort of which the human mind is wholly incapable, and, if made, can only issue in outward formality of gesture and manner in which the heart takes no part. Such a constrained posture of the mind would be as incompatible with the 'rest' of the Lord's day as that constrained posture of the body which some of the Rabbis tell us the Jew, in certain circumstances, must preserve during the whole day lest he profane the Sabbath, would be with *its* rest. In fact, either would make any day inexpressibly irksome. Variety of mental mood, changes in the train of thought, are essential to the salutary action of the mind, whether our employments be religious or secular ; and it would be as impossible, under ordinary conditions of mind, to spend the whole day even in the most interesting religious exercises, without pause or change, as in uninterrupted and energetic action of any other kind. And practically, we never do find the most scrupulous advocates of Sabbath rigour attempt any such vain conformity to their own ideal of Sabbath sanctity. Follow them to their homes and to the social meal, and they converse as freely (for aught we have ever been able to see) on topics which naturally suggest themselves at table, as anybody else with laxer notions. Nor need undue laxity be feared by any who have a due regard for the day. The unconscious influence of the habits of sincere respect for the institution will keep all such topics within bounds, both as regards their nature and the degree of attention given to them ; and this unconscious reverence is a far better safeguard against laxity than any strained and artificial *tabooing* of specified topics can be. For the latter would infallibly produce a self-

conscious constraint inconsistent with spontaneous and genuine emotion, and utterly prevent that natural play of the faculties without which all social intercourse becomes irksome and unprofitable.

For this reason, if there were no other, the Christian will render all his occupations, even those of a religious character, as varied as possible ; in his reading, for example, he will vary works of a more directly religious or devotional character with religious biography and history, and the poetry and fiction of devout imagination. If spent by the Christian as it ought to be, in harmony with the joyous events it commemorates, or the primitive traditions of the church, the day will certainly not be one of ascetic gloom or irksome constraint.

In the preceding remarks we have confined ourselves to the question as to what the 'Lord's day' is, and what sort of celebration it may be supposed to involve on the part of him who acknowledges the divine authority of the N. T., judging from the evidence that can be adduced from the N. T. itself, or from primitive practice as interpreting it. If it be asked, What in this matter is required from those who are *not* in any sense Christians ? it must be replied, 'Nothing at all.' If it be further asked, Has not then the legislature the right to enjoin and enforce the observance of the day on all classes of the community ? we answer, If it be an observance in any sense *religious*, it has no more right than to compel anybody to go to church or chapel, or to say his prayers, or read his Bible ; and as all such rights are now distinctly renounced by the legislature, so, in fact, is the right of enforcing the religious observances of the day. But, on the other hand, if it be asked whether it is not competent to the legislature to compel all classes of the community to abstain from their ordinary occupations, and to suspend all public business which is not necessary on that day—that is, to proclaim certain days of rest and relaxation—we answer, It is ; but not on religious grounds ; not therefore to enforce the celebration of the day because it is the 'Lord's day.' If it can do that, it might as consistently attempt (as it used to do) a great deal more. Assuredly it cannot plead any, the slightest authority, from the statute-book of the N. T. for enforcing the observance of the 'Lord's day' on the public generally. It is competent, no doubt, on the part of our own or of any legislature, to take every seventh or every tenth day for the purpose of 'rest,' and on the general grounds of necessity and expediency (which prove some such days to be *essential* to a nation's welfare), to determine that on these days the ordinary toils of life and the turmoil of business in our streets, markets, and public offices shall cease. It may take any days already fixed by custom for this purpose, or change those already fixed, and adopt others. If it be wise, indeed, it will do as our legislature actually does—take those days which public custom or religious reverence has already fixed upon for these very purposes, though not for these *exclusively* ; for otherwise the 'holidays' would become too frequent. Among ourselves, for example, the legislature, unless bereft of common sense, would never forget, in fixing such days, to take into consideration that the great bulk of the people are Christians, and *will* observe the Lord's day as a day of 'rest' (though not for that end alone), whether the legislature sanctions this or any

other. And since two days of rest in seven would be too frequent, it would be obviously expedient that the legislature should adopt this day in preference to another, simply because, in point of fact, it is already set apart to attain the same object, though those who observe it contemplate other objects besides. Similarly, if the great bulk of a community were Jews, not therefore living under a foreign government, it would be as obviously wise to fix on the seventh day. But while conceding to any legislature the right to fix periodic suspension of all ordinary business and 'servile' work, in obedience to one of its first and most vital duties,—that of providing the periodic recreation which all history and experience show to be necessary to the health and wellbeing of the community,—we deny that it has the right to enact any law on the subject which shall go beyond this end; nor probably will governments in general ever be able to do *all* that they legitimately might, even within these restricted limits, unchallenged or uncensured.

Whether we look at the civil or religious welfare of the nation, we are most anxious that the above view should prevail. Until it does, Christianity will never cease to be libelled and calumniated as intruding beyond its sphere, and as infringing on religious liberty. Any, the most moderate interference with individual freedom, the most moderate attempts to enforce the law of the public 'rest,' will be apt to be charged as an invasion of civil rights, and an act of persecution.\* The consequence is, that a clear, most legitimate, and beneficial exercise of the civil right of the legislature (disguised by its being pressed on purely religious grounds) is questioned or denied, which otherwise would be readily conceded.

\* See this matter taken up in a little *brochure*, published during the last general discussion of the subject of Sunday observance, entitled 'Three letters on the Sunday question,' by N. M. P., in which the author imagines an atheist, in a legislature of atheists, claiming for it, and as I think justly, the liberty of doing that which is rarely attempted by *our* legislature without bringing down a stream of indignant eloquence about religious persecution and religious liberty; in utter oblivion that a just legitimate authority of the legislature is thereby denied, simply because the question is unwisely implicated with religious considerations. See particularly pp. 8-12.

The celebrated edict of Constantine, so much censured by some, and as much applauded by others, appears to us pretty nearly an example of what the civil lawgiver can rightfully attempt in any such matter; and it would have been well if he had stopped there, and never given his successors precedents for proceeding further. It was issued A.D. 321, some years, therefore, before he became sole master of the Empire, or took the Church under the avowed protection of the state, and about eight years after the edict of Milan, which proclaimed the welcome doctrine of Toleration. Some think the edict an indication that he was already secretly a Christian, that it was to protect *Christian* worship that he issued it, and that Sunday, 'Dies Solis,' was already a familiar synonym for the 'Lord's day'; others (as Gibbon), that 'Dies Solis,' Apollo's day, indicates that Constantine was still a heathen, and was chiefly intent on paying honour to his patron deity. However this may be, its object is to sus-

If Christianity were to cease from among us, if we were all to become atheists, it would not be less necessary than now, as M. Proudhon and many other men with as little religious conviction as he maintain, that nations should have their periodic intervals, and those not unfrequent, of public rest. So far as such intervals are essential to the physical and social welfare of the community, it certainly falls within the proper province of the civil power to appoint them. But then the nature of the observance which the magistrate has a right to demand will necessarily depend on the objects for which alone he is empowered to appoint them; that is, observance will involve only the intermission of the ordinary avocations of life. The reason which justifies the magistrate in demanding this much, in telling a man that he shall not drive his ordinary trade or business on such day, is obvious; it is because, by the general consent, some such days are essential to the common weal, and he, as the organ of the community, is entrusted with the duty of securing that what is every man's right should be (which it otherwise could not) enjoyed by each member of the community. It is only thus that the dependent and labouring classes can be sure of that leisure which the law awards them; that the fair dealer, paying respect to the claims of government, can be protected against one who, for the sake of gain, would employ in labour the hours which those who obey the law give to repose. So far the magistrate has clear right on his side. But he has no right (so the whole nation declares both by its theory and practice) to say how any one who does not violate the rights of others shall employ the leisure secured to him on such days; in fasting or feasting; in company or alone; in wor-

pend the ordinary avocations and business of life, with the exception of works of presumed necessity or humanity, in pursuance of the several benefits of a periodic 'public rest;' leaving each man, Christian or heathen, to spend the day as he pleased, provided he did not, in enjoying his own day of rest, invade the privilege of his neighbours. In the estimation of many people, indeed, the edict gave a too ample immunity to the agriculturist,—albeit the reference to the fact that the seasons will not *always* allow of delay in farming operations would suggest the idea that it was not a general license to the farmers to work, independently of that consideration. The words of this memorable document are as follows:—'IMPERATOR CONSTANTINUS AUG. HELPIDIO.—Omnes judices urbanæque plebes et cunctarum artium officia venerabili Die Solis quiescant. Ruri tamen positi agrorum culturæ liberè licenterque inserviant, quoniam frequenter venit ut non aptius alio die frumenta sulcis aut vineæ scrobibus mandentur, ne occasione momenti pereant commoditas coelesti provisione concessa.' *Dat. Non. Mart. Crispo II. et Constantino II. Coss.*

'Let all the magistrates and all the city populations rest, and the functions of all who are engaged in the arts cease on the venerable day of the Sun. Nevertheless, those dwelling in the country may freely and lawfully attend to the claims of agriculture,—since it often happens that another day will not be so fit for sowing grain or planting vines,—that the blessings granted us by heaven's bounty may not be lost by neglecting the proper moment of securing them.'

ship or amusement. In exacting the one sort of observance the law is but protecting the interests and legally-recognised rights of all classes in the community; in attempting the other, it would be violating the rights of conscience. In enforcing the former, it is only exacting from each member of the community respect for the property of his neighbour—for the time thus given for relaxation is each man's property; in exacting the latter, it would be dictating the way in which each shall use his own.\*

But as there has unquestionably grown up among many Christian churches and communities a notion of the obligation to spend the day in a more gloomy and ascetic fashion than either the O. T. sanctions in relation to the Sabbath or the N. in relation to the Lord's day, it is worth while to enquire how this occurred. It is principally due, we apprehend, to causes which ought to make those who inveigh against 'Puritan scruples and fanaticism,' as the chief causes, at least a little more moderate. For though there have been periods, no doubt, when religious men have been chargeable with excessive and absurd scrupulosity in relation to this matter, certainly the primary cause of their error—that which made it possible for them to wish to impose their scruples as a rule on the community—originated in the vexatious legislation which the state, when once made the patron of the church, thought it had a right to indulge in. It was not simply as religious men, but as men who had the notion that the state could rightfully intrude into this province, that they clamoured for minute and stringent legislation on the subject; and in so doing they only acted in accordance with the practice and traditions of centuries. The religious communities to which they belonged were *conditioned* by ancient precedents, and therefore held exaggerated views of what falls within the civil province to enact and enforce. It is only necessary to read the decisions of the several ecclesiastical councils after the time of Constantine, to see how the influence of the civil power tended to render the law more minute and stringent; it made the observance of the day more precise and universal in its obligation, defined what scripture had left indefinite, and limited what it left free. And as it was the natural tendency of the civil power to do this, as also to demand summary, complete, and universal obedience, so it enacted a number of penalties for disobedience of which scripture knows nothing, and which were entirely owing to the enlargement of church authority conferred and enforced in virtue of its state alliance. And lastly,

as the church, enlarging its claims with this alliance, sought precedents for its new pretensions in the O. T. (where the theocratical and civil elements were *really* combined), it pressed to the utmost the analogies between the Jewish Sabbath and the Lord's day, in defence of its successive innovations. In its eagerness to find such precedents, it not only perverted the Lord's day, but, as we have seen, misinterpreted the Jewish Sabbath also, and saw in that a character of gloom and austerity which never originally belonged to it. Hence, in the first instance, the exaggerated and distorted notions of the day, the rigorous observance enjoined, and the multitude of minute and vexatious laws which civil legislatures, or ecclesiastical councils acting with and backed by them, have from time to time framed; hence also, chiefly, not only morose and excessively rigid views of the kind of observance which the day demands, but traditional errors as to the power of the state to make such observance binding on the community at large.

The reader may see this in part illustrated in Dr. Hessey's *Bampton Lectures*, where, though much more might be said to show how vexatious, minute, and tyrannical were the laws and regulations made by ecclesiastical authority, when it had the civil power at its beck, enough is said to show that the Puritans, brought up in the same notions of the powers of church and state, found the task of pressing the supposed analogies from the Jewish Sabbath pretty well done to their hands.\* Speaking even of the 4th century, our author truly says: 'Insensibly, in part from dependence upon secular aid, and imitation of secular legislation (which must be universal in its terms and stringent in the enforcement of its commands) . . . rest, though emphatically a *Christian* rest, is beginning to be insisted on, attendance at divine worship, heretofore a *service of love*, is enforced by ecclesiastical penalties' (p. 113). A little further he says, as truly: 'In the centuries ranging from the 6th to the 15th, we find civil rulers, and councils, and ecclesiastical writers, by degrees altering their tone' (p. 116), and he proceeds to give illustrations of this in a brief historic survey. It is not wonderful that, partaking in the same erroneous notions of what 'church and state' conjointly might rightfully attempt, and having such a long array of precedents to back them, the Puritans should have fallen into similar errors; and as to the direction of those errors, it is fair to recollect (what Dr. Hessey candidly admits) the utterly 'unsatisfactory state of the observance of Sunday throughout the reign of Elizabeth (A.D. 1558-1603):' nor must we forget that the methods by which it was sought to counterwork the Puritans were errors of precisely the same kind, only in an opposite direction, and still more

\* And here it may be observed by the way, that even if it be true that the N. T. does not so precisely bind upon those who receive it the observance of one day out of seven, as the O. T. bound the Jewish people, it would be well for all who profess Christianity to consider whether (though they be left to a freer law) they are likely to find any better general solution of the problem as to the wisest limits of alternate toil and rest; they would do well to reflect that it has been (if they admit the divine origin of the law among the Jews) once settled by a wisdom greater than ours, and without any special reference (so far as appears) to the wants or capacities of that particular nation; more probably with reference to the constitution of man and the ends of human society in general.

\* Among other things, Dr. Hessey says: 'A synod held at Friuli, A.D. 791, under Pepin king of France, makes a singular canon in reference to the Lord's day, *Etiam a propriis conjugibus*, etc., which savours very strongly of Judaism,' p. 117. If Dr. Hessey refers to Judaism as it is found in the O. T., certainly no parallel regulation respecting the *Sabbath* exists there. If by Judaism he means *traditional* Judaism, he ought surely to have said that it 'savoured' of what was directly *contrary* to 'Judaism;' at least, if we may believe the representations of Buxtorf (*Synag. Jud.* pp. 321-23).

*Shana*, ii. 15; *Babylon Talmud Erubin*, 56 b, 57 a; Zuckermann in Frankel's *Monatschrift für Geschichte und Wissenschaft des Judenthums*, vol. xii. p. 467, ff. Breslau 1863).—C. D. G.

**SABBATICAL YEAR** (שנת השמיטה, *Shanat ha-Shmita*, or simply שמיטה; ἑβδοματικός, or σαββατικός ἐνιαυτός), the septennial rest for the land from all tillage and cultivation enjoined in the Mosaic law (Exod. xxiii. 10, 11; Lev. xxv. 2-7; Deut. xv. 1-11; xxxi. 10-13).

1. *Names and their signification*.—In the Mosaic legislation this festival is called by four names, each of which expresses some feature connected with the observance thereof. Thus it is called—*i.* שבתון, *Rest of entire Rest, or Sabbath of Sabbatism* (Lev. xxv. 4), because the land is to have a complete rest from all tillage and cultivation; *ii.* שנת שבתון, *the Year of Sabbatism or Rest* (*ibid.* xxv. 5), because the rest is to extend through the year; *iii.* שמיטה, or more fully שנת השמיטה, *Release, Remission, or the Year of Release* (Deut. xv. 1, 2, 9), because on it all debts were remitted; and *iv.* שנת השבע, *the Seventh Year* (Deut. xv. 9), because it is to be celebrated every seventh year, for which reason it is called in the Hebrew canons קר' עֶשְׂרִים, *שביעית, the Seventh (i.e. שנה, Year)*, as is also the name of the Tractate in the *Mishna* treating on the Sabbatical year.

2. *The laws connected with this Festival*.—Like the year of Jubilee, the laws respecting the Sabbatical year embrace three main enactments—(1), Rest for the soil; (2), Care for the poor and for animals; and (3), Remission of debts.

The first enactment, which is comprised in Exod. xxiii. 10, 11; Lev. xxv. 2-5, enjoins that the soil, the vineyards, and the olive-yards, are to have perfect rest, there is to be no tillage or cultivation of any sort. What constitutes tillage and cultivation, and how much of labour was regarded as transgressing the law, may be seen from the following definitions of the Hebrew canons:—'The planting even of trees which bear no fruit is not allowed on the Sabbatical year; nor may one cut off withered or dried up boughs of trees, nor break off the withered leaves and branches, nor cover the tops with dust, nor smoke under them to kill the insects, nor besmear the plants with any kind of soil to protect them from being eaten by the birds when they are tender, nor besmear the unripe fruit, etc. etc. And whoso does one of these things in the Sabbatical year is to receive the stripes of a transgressor' (Maimonides, *Iad Ha-Chezaka Hilchoth Shenita Ve-Jobel*, i. 5). Anything planted wittingly or unwittingly had to be plucked up by its roots (*Mishna, Teruma*, ii. 3).

The second enactment, which is contained in Exod. xxiii. 11; Lev. xxv. 5-7, enjoins that the spontaneous growth (ספירה) of the fields or of trees is to be for the free use of the poor, hirelings, strangers, servants, and cattle (Exod. xxiii. 11; Lev. xxv. 5-7). This law is thus defined by the Jewish canons:—'He who locks up his vineyard, or hedges in his field, or gathers all the fruit into his house in the Sabbatical year, breaks this positive commandment. Everything is to be left common, and every man has a right to everything in every place, as it is written, 'that the poor of thy people may eat' (Exod. xxiii. 11). One may only bring into his house a little at a time, according to the manner of taking things that are in

common' (Maimonides, *ibid.* iv. 24). 'The fruit of the seventh year, however, may only be eaten by man as long as the same kind is found in the field; for it is written, 'and for the cattle and for the beast that are in thy land shall all the increase thereof be meat' (Lev. xxv. 7). Therefore as long as the animals eat the same kind in the field thou mayest eat of what there is of it in the house, and if the animal has consumed it all in the field thou art bound to remove this kind from the house into the field' (Maimonides, *ibid.* vii. 1). The people, who are enjoined to live upon the harvest of the preceding year, and the spontaneous growth of the Sabbatical year, are promised an especially fruitful harvest to precede the fallow year as a reward for obeying the injunction (Lev. xxv. 20-22). That the fields yielded a crop in the Sabbatical year, and even in the second fallow year—*i.e.*, in the year of Jubilee—has been shown in the article JUBILEE, THE YEAR OF.

The third enactment, which is contained in Deut. xv. 1-3, enjoins the remission of debts in the Sabbatical year. This law is defined by the ancient Hebrew canons as follows:—The Sabbatical year cancels every debt, whether lent on a bill or not. It does not cancel accounts for goods; daily wages for labour which may be performed in the Sabbatical year, unless they have been converted into a loan; or the legal fines imposed upon one who committed a rape, or was guilty of seduction (Exod. xxii. 15, 16), or slander, or any judicial penalties; nor does it set aside a debt contracted

on a pledge, or on a פרוכבול=πρόσ βουλή (λήν)—*i.e.* declaration made before the court of justice at the time of lending not to remit the debt in the Sabbatical year. The formula of this legal declaration was as follows—'I, A B, deliver to you, the judges of the district C, the declaration that I may call in at any time I like all debts due to me,' and it was signed either by the judges or witnesses. If this *Proshul* was ante-dated it was legal, but it was invalid if post-dated. If one borrowed money from five different persons a *Proshul* was necessary from each individual; but if, on the contrary, one lent money to five different persons one *Proshul* was sufficient for all. This *Proshul* was first introduced by Hillel the Great (born about 75 B.C.) [HILLEL I.], because he found that the warning contained in Deut. xv. 9 was disregarded: the rich would not lend to the poor for fear of the Sabbatical year, which seriously impeded commercial and social intercourse (*Mishna, Shebi'ith*, x. 1-5; *Gittin*, iv. 3). This shows beyond the shadow of a doubt that the release of the seventh year did not simply last through the seventh year, as some will have it, but was final. The doctors before and in the time of Christ virtually did away with this law of remitting debts by regarding it as a meritorious act on the part of the debtor not to avail himself of the Mosaic enactment, and pay his debts irrespective of the Sabbatical year. But not glancingly to counteract the law, these doctors enacted that the creditor should say, 'In accordance with the Sabbatical year, I remit thee the debt;' whereunto the debtor had to reply, 'I nevertheless wish to pay it,' and the creditor then accepted the payment (*Mishna, Shebi'ith*, x. 8). As the Mosaic law excludes the foreigner from the privilege of claiming the remission of his debts in the Sabbatical year (Deut. xv. 3), the ancient Jewish canons enacted that even

if any Israelite borrows money from a proselyte whose children were converted to Judaism with him, he need not legally repay the debt to his children in case the proselyte dies; because the proselyte, in consequence of his conversion, is regarded as having severed all his family ties, and this dissolution of the ties of nature sets aside mutual inheritance, even if the children professed Judaism with the father. Still the sages regarded it as a meritorious act if the debts were paid to the children (*Mishna, Shebiith*, x. 9).

3. *Time, observance, and limit of the Sabbatical year.*—The Sabbatical year, like the year of Jubilee, began on the first day of the civil new year = the first of the month *Tishri* (Maimonides, *Iad Ha-Chetzaka, Hilchoth Shemita Ve-Yobel*, iv. 9); [NEW YEAR, FEAST OF]. But though this was the time fixed for the celebration of the Sabbatical year during the period of the second temple, yet the tillage and cultivation of certain fields and gardens had already to be left off in the sixth year. Thus it was ordained that fields upon which trees were planted were not to be cultivated after the feast of Pentecost of the sixth year (*Mishna, Shebiith*, i. 1-8), whilst the cultivation of corn-fields was to cease from the feast of Passover (*ibid.* ii. 1). Since the destruction of the temple, however, the Sabbatical year, or more properly cessation from tillage and cultivation of all kinds, does not begin till the feast of New Year. According to the Mosaic legislation, the laws of the Sabbatical year were to come into operation when the children of Israel had possession of the promised land, and the Talmud, Maimonides, etc., tell us that the first Sabbatical year was celebrated in the twenty-first year after they entered Canaan; as the conquest of it recorded in Josh. xiv. 10 occupied seven years, and the division thereof between the different tribes mentioned in Josh. xviii. etc., occupied seven years more, whereupon they had to cultivate it six years, and on the seventh year = the twenty-first after entering therein, the first Sabbatical year was celebrated (*Babylon Talmud Erachin*, 12 b; Maimonides, *Iad Ha-Chetzaka, Hilchoth Shemita Ve-Yobel*, x. 2). On the feast of Tabernacles of the Sabbatical year, certain portions of the Law were read in the temple before the whole congregation (Deut. xxxi. 10-13). As the Pentateuchal enactment assigns the prælection of the Law to the priests and college of presbyters (Deut. *ibid.*)—viz. the spiritual and civil heads of the congregation (hence the singular תקרא, 'thou shalt read this law before all Israel')—the Hebrew canons ordained that the high-priest, and after the return from Babylon the king, should perform this duty. The manner in which it was read by the monarch is thus described in the *Mishna*: 'At the close of the first day of the feast of Tabernacles in the eighth year—i.e. at the termination of the seventh fallow year, a wooden platform was erected in the outer court, whereon he sat, as it is written, 'at the end of the seventh year on the festival' (Deut. xxxi. 10). Whereupon the superintendent of the synagogue took the Book of the Law and gave it to the head of the synagogue; the head of the synagogue then gave it to the head of the priests, the head of the priests again gave it to the high-priest, and the high-priest finally handed it to the king; the king stood up to receive it but read it sitting. He, read—i. Deut. i. 1-vi. 3 (אלה הדברים עד שמע); ii. Deut. vi. 4-8 (שמע); iii. Deut. xi. 13-22 (והיה)

עשר) ; iv. Deut. xiv. 22-xv. 23 (א'ם שמוע תעשר); v. Deut. xxvi. 12-19 (כי תכלה לעשר); vi. Deut. xvii. 14-20 (פרשת המלך); and vii. Deut.

xxvii. xxviii. (כרבות וקללות עד שגמור כל הפרשה). The king then concluded with the same benediction which the high-priest pronounced, only that he substituted the blessing of the festivals for the absolution of sins' (*Mishna, Sota*, vii. 8). This benediction forms to the present day a part of the blessing pronounced by the *Maphtir*, or the one who is called to the reading of the lesson from the Prophets after the reading of the lesson from the Law, and is given in an English translation in the article HAPHTARA of this Cyclopædia, beginning with the words 'For the Law, for the divine service, etc.' The Sabbatical year, however, was only binding upon the inhabitants of Palestine (*Kiddushin*, i. 9; *Orlah*, iii. 9), the limits of which were determined on the east by the desert of Arabia, on the west by the sea, on the north by Amana, whilst on the south the boundary was doubtful (comp. Geiger, *Lehr und Lesbuch zur Sprache der Mishna*, vol. ii. p. 75, etc., Breslau 1845). As to the obedience to this law, ancient Jewish tradition tells us that it was never kept before the exile, and that it is for this reason that the Jews were seventy years in the Babylonish captivity, to give to the land the seventy years of which it was deprived during the seventy Sabbatical years, or the 430 years between the entrance into Canaan and the captivity, as it is written (2 Chron. xxxvi. 20, 21) 'until the land had enjoyed her Sabbaths [i.e. Sabbatical years], for as long as she lay desolate she kept Sabbath to fulfil threescore and ten years [i.e. Sabbatical years]' (comp. *Shabbath*, 13 a; *Seder Olam*, cap. xxvi; *Rashi* on 2 Chron. xxxvi. 20). After the captivity, however, when all the neglected laws were more rigidly observed, the Sabbatical year was duly kept, as is evident from the declaration in 1 Maccab. vi. 49, that 'they came out of the city, because they had no victuals there to endure the siege, it being a year of rest for the land,' from the fact that both Alexander the Great and Caius Cæsar exempted the Jews from tribute on the seventh year, because it was unlawful for them to sow seed or reap the harvest (Joseph. *Antiq.* xiv. 10. 6), and from the sneers of Tacitus about the origin of this festival (*Hist.* v. 2, 4), as well as from the undoubted records and the post-exile minute regulations about the Sabbatical year contained in the ancient Jewish writings.

SABÆNS. [SHEBA.]

SABTAH and SABTA (סבתה and סבתא; Σαββά; *Sabatha*), a son of Cush and founder of one of the nations of antiquity. The name is only mentioned in those two remarkable passages of Scripture which contain an account of the primeval colonisation of the world by the descendants of Noah (Gen. x. 7; 1 Chron. i. 9). Geographers, both ancient and modern, differ widely as to the position of the country to which Sabtah gave his

name. Some locate it in Ethiopia, on the river Astaboras (now *Takasse*), which flows through the province of Meroe (Joseph. *Antiq.* i. 6. 2; Kalisch on *Gen.* x.). Others say there is a trace of the ancient name and settlement in the city of *Sab-batha*, mentioned by Pliny and others as a noted place in south-eastern Arabia (Pliny, *H. N.* vi. 32; Winer, *R. W.* s. v. *Sabtha*). Others transfer it to the western shores of the Persian Gulf, where there stood a town called *Saphtha* (Bochart, *Opera*, i. 223). Other theories are mentioned in Winer and Bochart (*l. c.*)

It seems most probable that the great settlement of the tribe was in Africa; but some families may have wandered, as was customary in most of the ancient tribes, and left their traces along the shores of Arabia (see farther, Michaelis, *Spicil.* p. 191; Cellarius, *Geogr.* ii. 704; Gesenius, *Thes.* p. 936).—J. L. P.

#### SABTECHA and SABTECHAH (סַבְתָּחָה ;

Σαβαθακά ; Σεβεθαχά ; *Sabatata* ; *Sabathacha*) is mentioned in *Gen.* x. 7, and 1 *Chron.* i. 9, as the fifth, and apparently youngest son of Cush. The Bible gives no farther information either regarding the history of his descendants, or the country they occupied. Gesenius suggests that the territory must be sought for in the country of the Cushites, or Ethiopia (*Thes.* p. 936). And in confirmation of this view the name *Sabatok* has been discovered on Egyptian monuments (*Id.* p. 940; Kalisch on *Gen.* x. 7; Rosellini, *Monument.* ii. 198). Bochart would identify Sabtecha with *Samydace*, a city of Carmania on the northern shore of the Persian Gulf (*Opera*, i. 217; *Plol.* vi. 8); but both etymology and history are opposed to this theory.—J. L. P.

SACCUTO, or SAKKUTO (זכורת), also called *Sacut* (זכות), ABRAHAM B. SAMUEL, a celebrated astronomer, mathematician, historian, and lexicographer, was born in Salamanca about A.D. 1450. His distinguished talents secured for him the professorial chair of astronomy at Saragossa; and when he, together with 300,000 of his Jewish brethren, had to quit Spain, in consequence of the infamous edict for the expulsion of the Jews, issued by Ferdinand and Isabella, March 30, 1492, Saccuto repaired to Portugal, where King Emmanuel appointed him chronographer and astronomer-royal. His literary labours were, however, soon interrupted, for in 1496 the Jews were also expelled from Portugal, and Saccuto had to quit the country of his adoption and to seek an asylum in Tunis. It was here that he completed, in 1504—(1.) The famous chronicle entitled סֵפֶר יְהוֹסֵפִין, *the Book of Genealogies*, which comprises a chronological history of the Jews from the creation to A.M. 5260=A.D. 1500. In this elaborate work Saccuto gives an account of—*i.* The oral law as transmitted from Moses through the elders, prophets, sages, etc.; *ii.* The acts and monuments of the kings of Israel, as well as of the surrounding nations, in a chronological order; *iii.* The Babylonian colleges at Sora and Pumbedita; *iv.* The events which occurred during the period of the second temple; *v.* The different sects of that period—viz. the Pharisees, Sadducees, Essenes, and Nazarites; *vi.* The Nesiim (נְסִיִּים), Gaonim (גְּאוֹנִים), or the princes of the captivity, and the rectors of the colleges after the close of the Talmud; and *vii.* The

post-Gaonim period, down to the end of the 15th century. Saccuto composed this work in imitation of a very ancient and important chronicle, *Fuchasin*, mentioned in the Talmud (*Pesachim*, 62 b), now lost. It is an encyclopedia of Jewish literature, and is indispensable to the student of Hebrew antiquities. It was first published at Constantinople 1566, then with sundry additions and glosses, Cracow 1581; Amsterdam 1717; Königsberg 1857; and from a MS. in the Bodleian library, with many corrections, additions, etc., by Filipowski, London 1857. It is to this excellent edition that the references in this cyclopædia are made. Saccuto also wrote (2.) A Rabbinic Aramaic Lexicon to the Chaldee paraphrases, the

Midrashim, and Talmud, entitled חֻסְפֵּת לְסֵפֶר הָעֵרֶךְ, which consists of—*i.* Additional references to passages containing the words given by R. Nathan's *Aruch* [NATHAN]; *ii.* New forms of the words explained by R. Nathan; *iii.* References to the works wherein they occur; and *iv.* Of an independent supplement containing about eighty new articles. This work has not as yet been published, but Geiger gives an elaborate account of it, and specimens from it, in the *Zeitschrift der deutschen morgenländischen Gesellschaft*, vol. xii. p. 144, ff., Leipzig 1858. He also wrote sundry theological and astronomical works, which are enumerated by Steinschneider, *Catalogus Hebr. Libr. in Bibliotheca Bodleiana*, p. 706, etc.; Fürst, *Bibliotheca Judaica*, iii. 200, etc.—C. D. G.

SACHS, MICHAEL, was born in Great Glogau, September 3, 1808. Owing to his distinguished talents, both as a Biblical scholar and as a preacher, he was invited to become the pastor of the New Temple at Prague in 1836, which office he occupied till 1844, when he was appointed rabbinat assessor to the Jewish community at Berlin, and in 1859 became chief rabbi of Pesth, where he remained till his death, January 31, 1864. The following are his valuable contributions to Biblical literature and archæology:—1. A German translation of the *Psalms*, with annotations, Berlin 1835. 2. *Deuteronomy, Joshua, Judges, Samuel, Isaiah, Joel, Amos, Habakkuk, Zephaniah, Haggai, Malachi, the Psalms, the Song of Songs, and Lamentations, as well as part of Jeremiah*, translated from the original Hebrew into German, embodied in the *Twenty-four Books of Holy Scripture according to the Massoretic Text*, edited by Zunz, Berlin 1838. 3. *Die religiöse Poesie der Juden in Spanien*, Berlin 1845. Excerpts of this work, which is replete with antiquarian lore, have been translated into English in the *Hebrew Review*, edited by Breslau, London 1860; and 4. *Beiträge zur Sprach und Alterthumsforschung*, 2 vols. Berlin 1852-54. These contributions are a storehouse of Jewish learning.—C. D. G.

#### SACKBUT. [MUSICAL INSTRUMENTS.]

SACKCLOTH (שַׂק ; σάκκος). The sackcloth mentioned in Scripture was, as it is still in the East, a coarse black cloth, commonly made of hair (*Rev.* vi. 12) and was used for sacks (*Gen.* xlii. 25; *Lev.* xi. 32; *Josh.* ix. 4), and for mourning garments. In the latter case the garment, made to hang on the body like a sack, was worn instead of the ordinary outer garment, or next the skin, bound with a girdle of the same material upon the loins, or

spread under the mourner on the ground (Gen. xxxvii. 34; 1 Kings xxi. 27; Is. iii. 23; lviii. 5; Joel i. 8; Jonah iii. 5) [MOURNING]. Such garments were also worn by prophets, and by ascetics generally (Is. xx. 2; Zech. iii. 4; comp. 2 Kings i. 8; Matt. iii. 4) [PROPHECY].

#### SACRIFICES. [OFFERING.]

SACY, LOUIS IS. LE MAISTRE DE, was born at Paris 29th March 1613. Having studied under the direction of the Abbe de St. Cyran, he became attached to the Port Royalists, and on assuming priest's orders was chosen director of the recluses at Port-Royal-des-Champs. He shared largely in the troubles of the Jansenists; from 1661 to 1668 he was a prisoner in the Bastille; he had often to change his residence, but ultimately settled in 1676 at Pomponne, where he died 4th Jan. 1684. Notwithstanding the unsettled state in which he was compelled to live, he found time for numerous and extensive literary works. His most important is *La Bible en Latin et en Francois, avec des explanations du sens literal et du sens spirituel tirées des saints Pères*, 32 vols. 8vo, Par. 1672 and following years. [FRENCH VERSIONS.] The translation of the N. T. was made three times, the author being anxious to combine fidelity with clearness and grace. Of this version, especially the N. T., Dr. Pye Smith praises 'the extraordinary excellence both as to fidelity of sentiment and felicity of expression' (*Four Discourses*, p. 286, 2d ed.)—W. L. A.

SADDUCEES (צְדֻקִים; N. T. and Josephus, Σαδδουκαῖοι, *Sadducei*, more properly *Zadokim* or *Zadokites*), one of the three sects or orders of Judaism in the time of Christ, the other two being the *Essenes* and the *Pharisees*.

1. *Name of the Sect and its signification.*—According to the current tradition of the Jews, the appellation צְדֻקִים, of which Σαδδουκαῖοι = *Sadducei* is the Greek form, is derived from *Zadok*, the name of the founder of this sect, who was a disciple of Antigonus of Soho, B. C. 200-170 [EDUCATION]. This is not only declared in the *Aboth di Rabbi Nathan* (cap. v.), but by Saadia Gaon, 892-942 A. D. [SAADIA GAON], by R. Nathan (circa 1030-1106 A. D.), in his lexicon called *Aruch*, s. v. בְּתוֹסִין; Maimonides (1135-1204 A. D.), in his commentary on *Aboth* (i. 3), but by the greatest Jewish authorities since the 9th century of the Christian era. Dr. Geiger who, in his *Urschrift und Übersetzungen der Bibel* (p. 105), shows in a most elaborate manner that there are not sufficient historical data for deriving the name Sadducee from *Zadok*, a disciple of Antigonus of Soho, derives it nevertheless from this proper name, which he assigns to another person of an earlier date, as will be seen in the sequel. Epiphanius, however, seems to derive it from a double source—viz. from a proper name *Zadok*, and from the Hebrew noun צֶדֶק, *righteousness*. He says that they call themselves Sadducees because this name is derived from *righteousness*, as ZEDEK denotes *righteousness* (Ἐπονομάζουσιν ἑαυτοὺς Σαδδουκαίους δὴθεν ἀπὸ δικαιοσύνης τῆς ἐπικλήσεως ὀνομασμένης· σεδὲκ γὰρ ἐρμηνεύεται δικαιοσύνη); and that there was also anciently a priest named *Zadok*, but they did not continue in the doctrines of their (ἐπιστάτης) chief (*Adversus Hæreses*, i. 14). Dr. Löw rejects altogether the derivation of Sadducee from the proper name *Zadok*, for the following reasons:—i.

Because there is no precedent in the whole ancient Jewish history for the followers of a sect to be called by the name of the chief of the sect, and that it is as contrary to the genius of the Hebrew if צְדֻקִי is taken as the proper name צְדֻק, with י appended, to translate it a *follower of Zadok*, as it would be to render ירבעמי *a follower of Jeroboam*. ii. The older Talmudic literature knows nothing of *Zadok* and *Boethus*, the supposed originators of the Sadducees; and iii. The Sadducees, as is evident from ancient sources, called themselves צְדֻקִים, the *righteous* (Epiphanius, *Adversus Hæreses*, i. 1. 4). Hence, Dr. Löw concludes that, in harmony with his Hebrew name צְדִיק, the Sadducee called himself in Greek εὐδύς, the *straightforward, open, honest, righteous*, and that the opponents of this sect changed both the honourable Hebrew appellation צְדֻקִים into צְדוּקִים (hence the singular צְדוּקִי = *Sadducee*), and the Greek name εὐδύς, which is written in Hebrew אֲבִתוּם (according to the analogy of אֲבִינִיּוֹם = εὐγενής) into בְּתוּם, from which originated בְּתוּסִים, *Boethusians*. He moreover maintains that it is for this reason that the Talmud makes no distinction between the Sadducees and the Boethusians (*Ben Chananja*, i. 346, ff.) This definition of the appellation Sadducee is entirely speculative, and its soundness must be determined by an examination of the rise, progress, and doctrines of the Sadducees. Besides the first objection against the derivation of צְדוּקִי from the proper name צְדֻק is set aside by the fact that the first Karaites called themselves עֲנַנִיִּים, *followers of Anan*, *Ananites*; so that עֲנַנִי, an *Ananite*, is an exact parallel to צְדוּקִי, a *Zadokite*. Still more speculative, and altogether unique, is the opinion of Köster, that '*Sadducee* is simply a different form of *Stoic*' (*Studien und Kritiken*, 1837, p. 164). According to some readings the Sadducees also called themselves קְרָאִים, *Scripturalists*, *Bible followers*, *Karaites* (*Megilla*, 24 b; *Jerusalem Megilla*, iv. 9), because they adhered to the written law. This is in perfect accordance with the ancient custom of calling a Biblical student by the honourable Hebrew appellation קָרָא (formed according to the analogy of קָרָן); or by the Aramaic form קְרָי (defective of קְרָיָא), or קְרִי, formed according to the analogy of קְרִי. Thus Chanina, Abba Chalifa, Eliezer b. Simon, and Levi b. Sisi, were designated by this title (*Taanith*, 27 b; *Baba Bathra*, 123; *Midrash Rabba on Levit.* cap. xxx.; *Jalkut on the Song of Songs*, section 533); and the Talmud tells us that those were deemed worthy of this name (דְּקָרִי אֲוִרִיתָא נְבִיאָא וְכַתוּבִי בְּרִיקָא) *who understood how to read accurately the Law, the Prophets, and the Hagiographa* (comp. *Kiddushin*, 42; Fürst, *Karäerthum*, 129).

2. *The tenets and practices of the Sadducees.*—To apprehend duly the doctrines and practices of this sect, it must be borne in mind that the Sadducees were the aristocratic and conservative priestly party, who clung to their ancient prerogatives and resisted every innovation which the ever-shifting circumstances of the commonwealth demanded; whilst their opponents, the Pharisees, were the liberals, the representatives of the people—their principle being so to develope and modify the Mosaic law as to adapt it to the requirements of the time, and to make the people at large realise that they were '*a people of priests, a holy nation*'

[PHARISEES]. Thus, standing immovably upon the ancient basis, the Sadducees, whose differences were at first chiefly political, afterwards extended these differences to doctrinal, legal, and ritual questions.

#### A. POLITICAL OPINIONS.

The primary *political* difference between the two sects was, that the Sadducees maintained that a man's destiny is in his own hands, and that human ingenuity and statecraft are therefore to be resorted to in political matters; whilst the Pharisees clung to the conviction that the political relations with foreign nations, like the theocracy at home, are under the immediate control of the Holy One of Israel (Joseph. *Antiq.* xiii. 5. 9; xviii. i. 4, with *De Bell. Jud.* ii. 8, 14; *Berachoth*, 33 b; *Nidah*, 16, 72). That the Sadducees, who were the real aristocracy (Joseph. *Antiq.* xviii. i. 4) and the successful warriors in the Maccabean struggles (*Antiq.* xiii. 16. 2; *De Bell. Jud.* i. 5. 3), should have espoused such political views, was the natural result of their political success. Moreover, the doctrine that what a man possesses is what he deserves was peculiarly gratifying to the successful and aristocratic caste. Besides, in this respect, as in all other matters, the Sadducees showed their conservatism in abiding by the Pentateuchal views that a man is rewarded in this world according to his deeds, and that prosperity and adversity are a test of piety and wickedness (Deut. xxviii. 1-68 with Ps. xxxvii. 25).

#### B. DOCTRINAL VIEWS.

i. Foremost among the *doctrines* of the Sadducees is the tenet that the Hebrew Scriptures, with the authoritative explanations and glosses which developed themselves in the course of time, are the sole rule of faith and practice, thus denying that there existed any orally transmitted law to supplement the written law, to which their opponents the Pharisees laid claim; or, as Josephus states it, 'the Pharisees have given to the people many statutes from the traditions of the fathers which are not written in the law of Moses; and it is for this reason that the Sadducees reject them, saying that it is only the written observances which are binding, but those which are transmitted by the fathers are not to be observed' (*Antiq.* xiii. 10. 6). For the better understanding of this important question, it must be remarked that the Pharisees and the orthodox Jews to the present day have an oral law in addition to the written law. This oral law consists of sundry religious, ceremonial, and social practices which obtained in the course of time, and which were called forth either through the obscurity, conciseness, and apparent contradiction of some of the written enactments, or through the inapplicability of some of the Mosaic statutes to the ever-changing circumstances of the commonwealth. Some of the enactments contained in this oral code are undoubtedly as old as the original laws which they supplement and explain, so as to adapt them to exceptional cases not specified in the Mosaic law; others again were introduced by the spiritual heads of the nation after the return from the Babylonish captivity, because the altered state of the nation absolutely required these regulations, although there was no basis in the Mosaic law for them; whilst others originated in party feeling, to shield the pious against even approaching the limits of transgression. Now the *Sopherim* = scribes and the lawyers, after the Babylonish captivity, who found

this accumulated traditional code, tried to classify and arrange it. Those practices which could be deduced from or introduced into the text of Holy Writ by analogy, combination, or otherwise, were regarded as the legitimate and authoritative traditional exposition of the law [MIDRASH]; whilst those practices which obtained in the course of time, which were venerated and esteemed by the people both for their antiquity and utility, but for which neither author nor apparent reason could be found in the written law, were denominated *A*

*halakha leMoseh min Sinai* (הלכה למושה מסיני), because from their antiquity and importance it was thought that they must have come down orally from the lawgiver himself. It is this oral law which the Sadducees rejected, and in their conservatism adhered to the ancient Hebrew Scriptures, as well as to those time-honoured explanations and practices (הלכות) which were not at variance with the text of the Bible. It must distinctly be borne in mind that by their rejecting traditions is not meant that the Sadducees rejected *all* the traditional comments upon the law and the ancestral practices not found in the Bible. Even the Talmud itself only charges them with rejecting some things (*Sanhedrin*, 33 b; *Horajoth*, 4 a), and there is but little doubt that those practices which they rejected were originated by the Pharisees, the liberal party whose innovations the conservative Sadducees disliked, and regarded as an encroachment upon their priestly and aristocratic rights. Indeed, it will be seen in the course of this article, from the enumeration of their distinctive tenets, that the theological views of the two sects were not so much at variance as might have been supposed, and that the Sadducees in many cases actually adhered to ancient traditions, whilst the Pharisees abandoned these traditions and introduced new statutes in order to raise the people, whose true representatives they were, to a nation of kings and priests. That the Sadducees also rejected the Prophets and Hagiographa, and only believed in the Pentateuch, as is asserted by Epiphanius (*Adversus Hæreses*, xiv.), Origen (*Cels.* i. 49), Jerome (*Comment. on Matth.* xxii. 31-33), and followed by some modern writers, is utterly at variance with the Jewish records of this sect, and has evidently arisen from a confusion of the Sadducees with the Samaritans. When it is borne in mind that even those fathers who understood Hebrew and knew most about the Jews committed the greatest blunders when they described the most common practices of this nation, as has been shown in the article PHYLACTERIES and elsewhere in this Cyclopædia, we shall not be surprised at their having confused these two sects.

ii. Next in importance in point of doctrine is their eschatology. The Sadducees denied the resurrection of the dead to receive their reward and punishment. Josephus, who specifies the second cardinal difference between the Pharisees and the Sadducees, describes their respective doctrines of a future reward and punishment in such a manner as to infer that the former believing in a future judgment also believed in the immortality of the soul; whilst the latter, by denying a future judgment, also denied the survival of the soul after the death of the body (Ψυχῆς τε τὴν διαμονὴν καὶ τὰς καθ' ἑαυτῶν τιμωρίας καὶ τιμὰς ἀναιρούσαι, *De Bell. Jud.* ii. 8. 14). In another place, again, where this

historian mentions the distinctive eschatological views of the Sadducees, he plainly says, *Their doctrine is that souls perish with the bodies* (Σαδδουκαῖοι δὲ τὰς ψυχὰς ὁ λόγος συναφανίζει τοῖς σώμασι, *Antiq.* xviii. 1. 4). But in the Talmud and in the N. T. we are told that they simply denied the resurrection (comp. *Sanhedrin* 90 b with Luke xx. 27, Mark xii. 18; see also Matt. xxii. 23), which by no means involves the immortality of the soul; and it cannot be supposed that if the Sadducees had actually denied the immortality of the soul, so vital a point would be passed over in silence by the Talmudic doctors, when unimportant differences are minutely specified. There can therefore be no doubt that Josephus in his vanity to depict to the Greeks the Jewish sects in such colours as to make them correspond to the different philosophical schools among the Greeks, did injustice to the Sadducees by assigning to them the doctrines of the Stoics. The misrepresentation of the Sadducees will appear all the more evident when it is borne in mind how defectively Josephus describes the Pharisaic eschatology in the very same section. He there represents the Pharisees, who were his own party, as believing that the resurrection is to be confined to the righteous, whilst the wicked are to be detained in everlasting punishment in Hades under the earth (*Antiq.* xviii. 1. 3); whereas it is well known that this opinion was only entertained by some of the later doctors, that the Pharisees generally believed in the resurrection of both the righteous and the wicked (*Dan.* xii. 2); and that it was the common doctrine as late as the second book of Maccab. (comp. xii. 40-45). The reason which the Sadducees assigned for not believing in the resurrection of the dead to receive their reward and punishment, is that it is not taught in the law of Moses (אומרים אין תחיית המתים מן התורה *Sanhedrin*, 90 b), which simply promises temporal rewards and punishments for obedience and disobedience (*Exod.* xx. 12; xxiii. 25, 26; *Deut.* vii. 12-15; xxviii. 1-68). That the Sadducees were right in their assertion may be seen from the very quotation made by our Saviour (*Matt.* xxii. 31, 32; *Mark* xii. 26, 27; *Luke* xx. 37) of *Exod.* iii. 6, 15, which it is only natural to suppose is the most cogent text in the law, and which, nevertheless, does no more than suggest an inference on this doctrine. The Sadducees, however, did not admit the inference, and they simply regarded this mode of proving the resurrection from the law as Pharisaic, as they were in the habit of hearing similar inferences deduced by the Pharisees from other passages. Thus the Talmud relates: 'The Sadducees asked Rabban Gamaliel, Whence do you know that the Holy One, blessed be he, will raise the dead? To which he replied, From the Law, the Prophets, and the Hagiographa; from the Law, because it is written, 'And the Lord said to Moses, Behold thou shalt lie down with thy fathers (וָאָמַר), and this people shall rise again' (*Deut.* xxxi. 16); from the Prophets, because it is written, 'Thy dead men shall live,' etc. (*Is.* xxvi. 19); and from the Hagiographa, because it is written, 'And the roof of thy mouth,' etc. (*Song of Songs* vii. 9). The Sadducees, however, would not accept these passages till he quoted the passage, 'The land which the Lord swore unto your fathers to give it to them' (*Deut.* xi. 21). He promised it to them (לָהֶם)—i.e. to the living and not to the dead; but as they were now dead, hence it is evi-

dent that there will be a resurrection if the promise is to be fulfilled' (*Sanhedrin*, 90 b). We are also told in the N. T. that the Sadducees say that there is 'neither angel nor spirit' (*Acts* xxiii. 8); but this can by no means imply that they altogether denied the existence of angelic and spiritual beings, since the Sadducees were firm believers in the divinity of the Mosaic law, where the appearance of angels is again and again recorded (*Gen.* xvi. 7; xix. 1; xxii. 11; xxviii. 12; *Exod.* xxiii. 20; *Num.* xxii. 23, *al.*), and as neither Josephus nor the Talmudic writings charge them with this unbelief. What they denied is the incarnation and manifestation of demonic powers and angelic beings in later days, as believed and described in the Jewish writings and in the N. T.

#### C. LEGAL MATTERS.

z. The Sadducees restricted the Levirate law to cases of betrothal (אֲרוֹסָה) but denied its obligation when the marriage was consummated (נִשְׁאוּהָ). Thus, for instance, though they regarded a betrothed woman (אֲרוֹסָה) as a wife, and treated her as a married woman in accordance with the Mosaic legislation [MARRIAGE], yet, when her betrothed husband died without cohabiting with her, his surviving brother could perform the duty of *Levir* without committing incest, as she was still a virgin. In this respect, too, the Sadducees, as the erudite Geiger has shown, followed the ancient Levirate law, which is based upon *Gen.* xxxviii. 7-10, and which—inferring from the similarity of expression used in verses 7 and 10 that Er too had acted wickedly and not properly consummated the marriage with Tamar—enacted that the *Levir* is only then to perform the duty towards his deceased brother when the marriage has not been consummated (*Ḥebamoth*, 34 b; *Be'ershith Rabba*, cap. lxxxv.; Geiger, *Jüdische Zeitschrift*, i. 30, etc., Breslau 1862). It is to be remarked that the Samaritans of old restricted the Levirate law (*Deut.* xxv. 5, etc.) in the same manner, and that the Talmud which records it tells us that in support of this restriction the Samaritans appealed to the expression הַחֻוּבָה, which they translated *outer*, and regarded as the adjective of אִשֶּׁת הַזֶּמֶת, construing it with the preceding לֹא תַחֲיֶה, whilst they took לֹא־יֵשׁ זָר as explicative of the preceding by way of repetition, translating the whole passage 'the wife of the deceased who is outside (i.e. the consummation of the marriage) is not to be for another man' (*Jerusalem Ḥebamoth*, i. 6; Kirchheim, *Karne Shomron*, p. 36). The Karaites, who may be regarded as modern Sadducees, explain the Levirate law in the same manner. This restriction of the Levirate law on the part of the Sadducees imparts additional force to the incident recorded in the gospels (*Matt.* xxii. 23, etc.; *Mark* xii. 18, etc.; *Luke* xx. 27, etc.) Here we are told that the Sadducees, not believing in a resurrection, put the following question to our Saviour:—The first of seven brothers married a wife and died childless, whereupon the second brother performed the duty of *Levir*, and he too died without issue; then the third, fourth, fifth, sixth, and seventh brother successively performed the duty of *Levir*, so that she alternately became the wife of seven husbands—now whose wife is she to be at the resurrection? With the restricted application of the Levirate law before us, it will be seen that though this ironical question was chiefly directed against the doctrine of the resurrec-

tion, yet it at the same time also attacks the orthodox Pharisaic view of the Levirate law which was undoubtedly shared by our Saviour. What the Sadducees thereby say is, as Geiger rightly remarks, that according to their application of the Levirate law, which restricts it to the betrothed woman (ארוסה), apart from the extremely rare occurrence of death between the betrothal and connubial intercourse (נישואה), especially several times under similar circumstances, the relation of the woman to her last husband who consummated the marriage is far more intimate than to any of the other husbands to whom she was simply betrothed. Supposing, therefore, for argument's sake that there will be a resurrection, and that the woman will rise with all the seven brothers, no difficulty will be experienced according to the restricted application of this law, inasmuch as she will be the wife of the last husband who alone consummated the marriage. According to the Pharisaic practice, however, the Levirs have to marry the widow after the marriage has been consummated, so that she is the real wife of all the seven brothers; hence the ironical question put to our Saviour, 'According to the Pharisaic doctrine of the Levirate law, in which you believe, the difficulty will be to decide whose wife she is to be?'

ii. The ceremony of taking off the shoe (חליצה), in case the surviving brother refuses to perform the duty of *Levir* towards the widow of his deceased brother, is explained most rigidly by the Sadducees insisting upon the letter of the law, that the rejected widow is to spit into the man's face (בפניו, Deut. xxv. 9), whilst the Pharisees, adapting the law to the requirements of the time, regarded the spitting *before his face* as satisfying the demands of the injunction [MARRIAGE], and hence explained the passage accordingly (*Megillath Taanith*, cap. iv.)

iii. The same conservatism and rigour the Sadducees manifested in the right of retaliation, insisting upon the literal carrying out of the law, 'eye for eye, tooth for tooth, hand for hand, foot for foot,' etc. (Exod. xxi. 23, etc.), whilst the Pharisees, with a due regard for the interests of the people, maintained that pecuniary compensation is sufficient (*Baba Kama*, 53 b; 34 a, b; *Megillath Taanith*, cap. iv. 2).

iv. For the same reason the Sadducees also insisted upon the literal explanation of the law in Deut. xix. 21, maintaining that false witnesses are only then to be executed when the sentence of the falsely accused had actually been carried out, in which case alone the words 'life for life' receive their literal fulfilment; whereas the Pharisees concluded from Deut. xix. 19, that if they are found out, even before the sentence has been carried out, they are to be executed, for it is there said, 'ye shall do unto him as he intended to do unto his brother.' Hence the intention is to be visited with capital punishment (*Mishna Maccoth*, i. 6; *Tosiphta Sanhedrin*, cap. vi.)

v. The law of inheritance formed another distinctive feature of the Sadducees. According to the Mosaic law the son alone is the rightful heir, and in case there is no son the daughter inherits the father's property (Num. xxvii. 1-11). Now the Sadducees maintained that in case the son, who is the heir presumptive, has sisters, and he dies, leaving a daughter, the property is not to go entirely to his female issue, but that the deceased's sisters are to have an equal share with his issue, urging that the deceased son's daughter is only the second de-

gree, whilst his sisters are the first degree. The Pharisees, on the contrary, maintained that the deceased brother's daughter is the rightful and sole heir, inasmuch as she is the descendant of the male heir, whose simple existence disinherited his sisters (*Mishna, Baba Bathra*, viii. 1; *Babylonian Baba Bathra*, 115 b; 116; *Megillath Taanith*, v. 2).

vi. From the law that the owner of cattle is responsible for damages done by his animals (Exod. xxi. 28, 29), the Sadducees maintained that a master is responsible for damages done by his slave, submitting that he is far more answerable for him than his cattle, inasmuch as he is to watch over his moral conduct. The Pharisees, on the other hand, denied this, submitting that the slave is a rational, and hence a responsible creature, and that if the master be held answerable for his conduct, the dissatisfied slave might out of spite commit ravages in order to make his master pay (*Mishna, Jada'im*, iv. 7).

#### D. RITUAL QUESTIONS.

i. As the first important distinction in this department, is to be mentioned the great stress which the Sadducees laid on the ritual purity of the person of the officiating priest. He had to keep aloof from the very appearance of uncleanness. Hence they required that the burning of the red heifer, from the ashes of which the water of absolution was prepared, should not be performed by any priest who had been defiled, although he had immersed, because he does not become undefiled before sunset (מעורבי שמש). The Pharisees, on the other hand, disregarding the person, and regarding the thing, opposed this great ado about the aristocratic priest; 'they prepared a baptistry on the Mount of Olives, where the burning of the red heifer took place, and designedly defiled the priest who was to burn it, so that the Sadducees should not be able to say that the heifer is not to be prepared by such who had not become pure by the sun setting' (*Mishna Para*, iii. 7).

ii. The Sadducees, again, did not believe that the sacred vessels in the temple are to be subjected to the strict laws of Levitical purity, which the Pharisees stoutly maintained. So strict were their views on this subject, that the Pharisees had all the sacred vessels immersed at the conclusion of every festival, because some unclean priest might have touched them. Hence, when the Pharisees on one occasion immersed even the golden candlestick after a festivity, the Sadducees tauntingly exclaimed, 'Behold the Pharisees will at last also purify the sun!' (*Jerusalem Chagiga*, 79 d). That the Pharisees should thus have guarded the sanctity of the vessels against the possible touch of a defiled priest must have been all the more annoying to the priestly Sadducees, since in other things which did not affect this aristocratic fraternity, but conduced to the comfort of the people at large, the Pharisees were less rigorous with regard to the laws of Levitical purity than the Sadducees, as may be seen from the following instance:—

iii. The Sadducees interpreted the injunction in Lev. xi. 39, 40, most rigidly, maintaining that it is not only the carcase of an animal which died a natural death that defiles by touching it, but also its sundry parts, such as the skin, bones, sinews, etc. etc.; whilst the Pharisees restricted this defilement by contact simply to the flesh, except the parts of a dead human body, and of a few reptiles, in which the skin and the flesh are to a certain extent identical.

iv. As a necessary and vital consequence of the foregoing view, the Sadducees maintained that the skin and the other parts of an animal not legally slaughtered—i.e. both of all those animals which the law permits to be eaten when legally slaughtered, but which have died a natural death, and of those which the law does not permit to be eaten—are not allowed to be made into different articles of use, and that leather, parchment, or any other of the numerous articles made from the skin, bones, veins, etc., is defiling. This rigid view obliged the Sadducees to explain Lev. vii. 24 in an unnatural manner, by taking the expression נבלה to denote an animal approaching the condition of becoming a carcase—i.e. being so weak that it must soon expire—and to urge that an animal in such a condition may be slaughtered before it breathes its last. In such a case, though its flesh is a defiling carcase and must not be eaten, the fat, skin, bones, etc., may be used for divers purposes (*Jerusalem Megilla*, i. 9; *Babylon Sabbath*, 108 a). The Pharisees, on the other hand, as the representatives of the people, whose interests they had at heart, allowed the sundry parts of such animals to be used as materials for different utensils. They even allowed the sacred Scriptures, the phylacteries, and the mezuzah [MEZUZA], to be written on parchment prepared from the skin of an animal which either died a natural death or was torn by wild beasts, but not on parchment prepared from the skin of an unclean animal (*ibid.* and *Tract Sepher Tora* beginning, *Sopherim* beginning). Bearing in mind this difference of opinion, we shall understand the import of the two discussions recorded in the Mishna between the Sadducees and the Pharisees based thereupon—‘The Sadducees,’ we are told, said, ‘We complain of you Pharisees because you say the sacred Scriptures when touched defile the hands, but the books of Homer do not defile the hands.’ Jochanan b. Zakkai said, ‘And have we nothing else to object to the Pharisees but this? Do they not also assert that the bones of an ass are clean, but the bones of Jochanan the high-priest are unclean?’ (*Judajim*, iv. 6). Now, according to the Sadducees, contact with sacred things so far from defiling actually sanctified; whilst the Pharisees, in order to guard the sacred things against contact, ordained that contact with such holy things defiles. On the other hand, the Sadducees regarded the touching of foreign books as defiling, because they are written upon parchment made from skins of unclean animals, or of clean animals not legally slaughtered, which with them were like carcases, and which, as we have seen, the Pharisees did not admit. Hence the charge of the Sadducees that the Pharisees assign a superiority to profane books over the sacred Scriptures, which Jochanan b. Zakkai rebuts by ironically enhancing this charge, and saying that this is not the only accusation against the Pharisees, inasmuch as he shows thereby a similar consequence arising from Pharisaic views. The bones of a dead man, he submits, are unclean, according to the express declaration of the Bible, even if they happen to be the bones of such a man as John Hyrcanus, the patron of the Sadducees, whereas the bones of an animal, even if it be unclean, and such a contemptible one as an ass, are clean, thus showing that the defiling power of an object does not always betoken a degradation in its nature, but, on the contrary, because it is of an elevating nature there-

fore it defiles more easily. The other discussion, also arising from this difference of opinion, is recorded in the Talmud, where the law of the Pharisaic sages is recorded that the sacred Scriptures, the phylacteries, and the mezuzah, may be written upon parchment prepared from the skin of an animal which died a natural death, but not from an unclean beast. Whereupon a Boethusian [= SADDUCEE] asked R. Joshua Ha-Garsi, ‘Where can you show that the phylacteries are not to be written on the skin of an unclean animal?’ [R. Joshua], ‘Because it is written [Exod. xiii. 9, where the phylacteries are enjoined] that the law of the Lord be in thy mouth, that is to say, prepared from animals allowed to be put into the mouth.’ [The Sadducee], ‘But according to this they ought not to be written on the skin of an animal which died or was torn [because these too must not be put into the mouth, or be eaten]?’ To which he replied, ‘I will tell thee a parable to show the distinction between the two. Two men are guilty of death: one is killed by the king himself, and the other by the executioner. Whose lot is preferable?’ Reply, ‘That one’s whom the king executed.’ [So is the carcase of a clean animal killed by the hand of the King of Kings to be preferred to the unclean animal which is already stamped with defilement whilst alive.] ‘But according to this’ [said the Sadducee], ‘the carcase ought also to be eaten.’ To which he replied ‘The Law says ye shall not eat of any thing that died [Deut. xiv. 21], and sayest thou that it should be eaten?’ To this he replied ‘Bravo!’ (קאלוס = *kalós*, *Sabbath* 108 a).

v. The Sadducees, who stood upon their priestly dignity and ancient prerogatives, rejected the artificial mode of *amalgamating the distances* (עירובין) introduced by the Pharisees to enable the members of their order to walk beyond the Sabbath day’s journey without infringing on the sanctity of the day, so as to join the social meal which was instituted in imitation of the priestly social repast [PHARISEES; SABBATH DAY’S JOURNEY].

vi. As priests, the Sadducees were not subject to the stringent Sabbatical laws, and could therefore enjoy their meals comfortably, inasmuch as they regarded the work requisite for their preparation as part of their sacerdotal duties, which set aside the Sabbatic regulations; whereas upon the people they imposed the most rigorous observance. Thus, in accordance with Exod. xxv. 3, they insisted that lights must not be kindled on Sabbath eve, and that the supper should be eaten in the dark (*Sabbath*, 55 b; Rashi on *Tosephta* in *Sabbath*, *ibid.*; Maimonides, *Iad Ha-Chezek*, *Hilchoth Sabbath*, vi. 1; *Tanchuma*, cap. lviii.); they prohibited the eating of any food which was either kept warm since the preparation day (ערב) (שבת), or was warmed on the Sabbath (*Responsens of the Gaonim*, called *Shaare Teshuva*, No. xxxiv.), and forbade connubial intercourse, because of the exertion connected therewith, and of its not being holy work, according to Exod. xix. 10, 15 (comp. *Baba Kama*, 82 a).

vii. The Sadducees, who, as the priestly party, regarded the temple treasury as their own, demanded that the daily morning and evening sacrifices should be procured from the private and voluntary gifts of each individual, basing their opinion upon the expression of the law (Num. xxviii. 4); whilst the Pharisees, on the other hand, also basing their opinion upon the letter of the law

(*ibid.* xxviii. 2), and wishing to protect the interests of the people, maintained that the sacrifices were national, and that they ought to be procured with the money of the temple treasury. Accordingly the Pharisees ordered a special temple tax, which was collected every spring, and deposited in three distinct boxes in the temple treasury, on which was indicated that the money therein contained was destined for the sacrifices for all Israel. The required money was taken out of the boxes three times a year—on the three great festivals, *i.e.* on the feast of Passover, Pentecost, and Tabernacles. From the first box it was taken with the announcement that it was 'in the name of the whole land of Israel'; from the second with the express declaration, 'in the name of its surrounding cities'; and from the third 'in the name of Babylon, in the name of Media, and in the name of the distant countries generally'; so that all the Israelites, including even those who did not contribute to this tax, were represented in this daily sacrifice (*Shekalim*, iii. 1-3; Maimonides, *Shekalim*). So hotly was this point contested between them that it lasted eight days (*Nissan* 1-8, year not mentioned), and that the Pharisees, to mark their victory over the Sadducees, appointed these eight days half festivals, during which no mourning should take place (*Menachoth*, 65 a).

viii. Regarding the sacrifices as their own, or as belonging to their priestly party, the Sadducees maintained that the priests might eat of the meat-offerings which were connected with the free-will animal sacrifices (Num. xv. 2, etc.); whilst the Pharisees maintained that they must be burned on the altar, and carried their opinion into a law, for which reason they again instituted a half festival in commemoration of their victory.

ix. Taking the expression מוֹחֶרֶת הַשַּׁבֵּת (Lev. xxiii. 11, 15, 16) literally, the Sadducees maintained that the Omer ought to be offered on the first day following the weekly Sabbath, so that the feast of Pentecost is always to be on the first day of the week (*Mishna*, *Menachoth*, x. 3; *Gemara* on the *Mishna*, 65 a; *Megillath Tuanih*, cap. i. 1) [PENTECOST].

x. The Sadducees rejected the old custom of pouring water on the altar every day at the morning sacrifice during the Feast of Tabernacles (ניסוך המים); and so opposed were they to this ceremony, that it became the cause of separation between the Sadducean king Alexander Jannai and the Pharisees (*Succa*, 48 b, with Joseph. *Antiq.* xiii. 13, 5; Graetz, *Geschichte der Juden*, vol. iii. p. 473, 2d ed.).

xi. They also objected to the procession of the people round the altar holding willow branches in their hands, on the Feast of Tabernacles (סוכה, 43 b [TABERNACLES, FEAST OF]).

xii. They maintained that the incense which the high-priest was to carry into the Holy of Holies on the Great Day of Atonement ought to be kindled outside, and thus to be carried into the sanctuary; because they deemed it improper to do work in the presence of the Lord, and because it was, more in accordance with the words כִּי בַעֲנַן אֵרָאָה עַל הַכֹּהֵן (Lev. xvi. 2), which they interpreted to mean 'only in the cloud (*i.e.* rising off the burning incense), will I be seen on the cover,' the cloud thus arising from the burning incense was to conceal the manifested Deity, whereas, if the high-priest were to

enter before this cloud begins to ascend, he would see God and die. The Pharisees considered this as violating the express command of the text, which plainly requires that the frankincense should be put on the burning coals in the Holy of Holies. So particular were they about it, that they exacted an oath from the high-priest, before the Day of Atonement, to perform everything in strict accordance with their enactments (*Siphra*, *Pericope Aharai*, cap. iii.; *Jerusalem Talmud*, i. 5; *Babylon Talmud*, 19 b, 53 a).

xiii. Though admitting that Exod. xiii. 6 enjoins phylacteries, the Sadducees rejected the Pharisaic regulations about the making and weaving of them (*Sanhedrin*, 88 b; Maimonides, *Iad Ha-Chesaka*, *Hilchoth Tephillin*, iv. 3 [PHYLACTERIES]).

xiv. Based upon the law that a lying-in woman is not to touch holy things nor to go into the temple during the thirty-three days following the first seven days after the birth of a boy, and during the sixty-six days following the first fourteen days after the birth of a girl (Lev. xii. 2-8); the Sadducees maintained that this law excludes the woman from the enjoyment of her conjugal rights all these days; whilst the Pharisees, who always endeavoured to relieve the people as much as possible from the burden of the law, did not transfer the holiness of the things and of the temple to the persons, thus granting to the wife and to the husband the enjoyment of their rights. Hence, whilst they held every other appearance of blood in the woman as defiling, they regarded it in this instance as the effects of the birth, and as pure blood (דְּמֵי טוֹהָרָה). It is for this reason that the ה in טוֹהָרָה (Lev. xii. 4, 5) has not the *Mappik*, thus denoting pure blood, as the present Massoretic text is the Pharisaic text, and that the rendering of it in the A. V. by 'the blood of her purifying,' though agreeing with the Sadducean text, which is undoubtedly the original one, is at variance with the *textus receptus* (comp. Geiger, *He-Chaluz*, v. 29; vi. 28, ff.; *Jüdische Zeitschrift*, i. 51, ii. 27, etc.).

It must not, however, be concluded that these are the only distinctive features of the Sadducees, although not many more are mentioned by their opponents the Pharisees.

3. *Origin and development of the Sadducees.*—The oldest record pretending to describe the origin of this sect (אבות דרבי נתן) is the commentary of Rabbi Nathan on the tractate of the *Mishna*, entitled *Aboth* (אבות)=the moral Sayings of the Ancient Fathers. In this commentary on the saying of Antigonus of Soho, B.C. 200-170 [EDUCATION], 'Be not like servants who serve their master for the sake of receiving wages, but be like servants who serve their master without expecting to receive wages, and let the fear of the Lord be upon you' (*Mishna*, *Aboth*, i. 3), Rabbi Nathan\* remarks

\* This Rabbi Nathan or Nathan Ha-Babli, as he is called in the Talmud, because he was a native of Meshan in Babylon (*Baba Bathra*, 73 a), was one of the most distinguished Mishnaic doctors. In consequence of his high birth, as his father was the Prince of the Captivity in Babylon, and his marvellous knowledge of the law, both divine and human, which he acquired as student in the country of his adoption, he was created vicar of the patriarch Simon II. b. Gamaliel II., A.D. 140-163, or president of the tribunal (בית דין) [EDUCATION]). He is frequently quoted in the Talmud

as follows: 'Antigonus of Soho had two disciples who propounded his maxim; they taught it to their disciples, and their disciples again taught it to their disciples. Whereupon they began to examine it after them, and said, What did our fathers purport to teach by this maxim? Is the labourer to work all day and not receive his wages in the evening? Surely, if our fathers had known that there is another world, and believed in a resurrection of the dead, they would not have spoken thus. They then separated themselves from the law, and two sects arose from them, the Zadokites [= Sadducees] and the Boethusians. The Zadokites are called after Zadok, and the Boethusians after Boethus. They used vessels of silver and vessels of gold all their days, not because they were proud, but because the Sadducees said that the Pharisees had a tradition that they are to afflict themselves in this world, and yet they have nothing in the world to

as a profound scholar of the law (*Horajoth*, 13 b; *Baba Kama*, 23 a; *Baba Mezia*, 117 b), and has materially contributed to the compilation of the *Mishna*, as he himself compiled a *Mishna*, which is quoted by the name of *Mishnath de Rabbi Nathan* (משנת דרבי נתן), and which Rabbi Jehudah the holy used for the redaction of the present *Mishna*. Besides this *Corpus Juris*, which the present recension of the *Mishna* caused to be lost, the two following works are ascribed to Rabbi Nathan:—i. The above-mentioned commentary on the sayings of the ancient fathers (אבות דרבי נתן), which is incorporated in the editions of the Talmud after Tractate *Shevuoth*; it has also been published separately, with two excellent commentaries, Wilna 1833, translated into Latin, with notes, by Francis Taylor, London 1654, but in its present form contains later interpolations; and ii. A work of mathematical import, entitled, *Forty-nine Rules* (ארבעים ותשע מורות), which Geiger thinks was written by a later author of the same name (comp. Zunz, *Die gottesdienstlichen Vorträge der Juden*, p. 108, ff., Berlin 1832; Fürst, *Kultur- und Literaturgeschichte der Juden in Asien*, p. 16, ff., Leipzig 1849; Geiger, *Wissenschaftliche Zeitschrift*, vol. vi. p. 17, ff., Leipzig 1847; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2032-4; Fürst, *Bibliotheca Judaica*, vol. iii. p. 19, etc.) The statement of the Hon. Edward T. B. Twissleton, the writer of the article 'Sadducees' in Smith's *Dictionary of the Bible*, that 'the age in which this Rabbi Nathan lived is uncertain (Bartolucci, *Bibliotheca Magna Rabbinica*, vol. iii. p. 770), and that the earliest mention of him is in a well-known Rabbinical dictionary called the *Aruch*, which was completed about the year 1105 A.D.,' will appear extraordinary in the face of the description given in the Talmud of this famous Rabbi. It is the commentary on *Aboth* which is not mentioned in the Talmud; but even this work is cited by Nissim b. Jacob, who flourished 1030, as the production of Rabbi Nathan (comp. Schorr, in Geiger's *Wissenschaftliche Zeitschrift*, vol. v. p. 440, Leipzig 1844), so that nearly a century before R. Nathan's *Aruch* appeared, the *Aboth* of Rabbi Nathan was known and quoted. Besides the story about the heretical leaders Zadok and Boethus, the disciples of Antigonus of Soho, recorded in the *Aboth* of Rabbi Nathan, as we have seen, is quoted as history by Saadia Gaon nearly two centuries before the *Aruch*.

come' (*Aboth de Rabbi Nathan*, cap. v.) That Zadok and Boethus were contemporaries of Antigonus of Soho, that they opposed the doctrines of the sages, and that the sages ordained laws to obviate the cavils of their opponents, is also declared by Saadia Gaon, 892-942 A.D. [SAADIA GAON]. Thus Isaac Israeli tells us: 'Saadia says, the contemporaries and the tribunal of Antigonus of Soho ordained it as a law, that the beginning of the month is to be determined by the appearance of the new moon [HILLEL II.], to do away with the cavils of Zadok and Boethus, who disputed against the sages about the fixing of the new moon' (*Yesod Olam*, iv. 6, p. 9 ed. Berlin 1848). Similar in import to Rabbi Nathan's statement on *Aboth* i. 3 is the remark of Maimonides (1135-1204, A.D.) on the same passage: 'Antigonus, says this great authority, 'had two disciples, one named Zadok and the other Boethus, who when they heard this sage propound this maxim, left him, saying one to the other, the Rabbi distinctly declares that there is neither a future state of reward and punishment nor any hope for man, because they misunderstood his maxim. Whereupon they strengthened each other's hands, separated themselves from the congregation, and left the observance of the law; when one sect followed the one, and another sect followed the other, whom the sages respectively called the Zadokites and the Boethusians' (*Comment. on Aboth*, i. 3). It must be added, that the greatest Jewish authorities since the 9th century of the Christian era have regarded Zadok and Boethus as the heretical leaders who originated two sects. Modern critics, however, reject this current account of the origin of the Sadducees from Zadok and Boethus, the disciples of Antigonus of Soho, as unhistorical; because—i. It is not mentioned either in Josephus, the *Mishna*, or the Talmud; ii. The original account of R. Nathan neither says that Zadok and Boethus themselves misunderstood Antigonus' maxim, nor that they were the chiefs of these sects, but that their disciples misinterpreted the import of the maxim, and separated themselves from the congregation; and iii. It is illogical to suppose that the disciples of Zadok, who according to R. Nathan's account did not misunderstand Antigonus, but simply continued to propound his master maxim, would call themselves or be called Zadokites=Sadducees, and not Antigonites, seeing that the maxim belongs to Antigonus and not to Zadok. The second and third reasons, however, are of little value, since the present text of Rabbi Nathan's *Aboth* is obscure, and since Saadia Gaon, the *Aruch*, Maimonides, and all the ancient Jewish authorities who lived centuries ago, and who had better means of procuring correct codices, understood the passage to mean, and also derived it from independent sources, that Zadok and Boethus themselves misunderstood their master Antigonus, and that they were the originators of the sects. It is the first reason which, coupled with the fact that the oldest records are perfectly silent about Zadok and Boethus\* as dis-

\* When Ewald declares that, 'die Rabbinen reden viel von ihm [i.e. Boethus], (comp. *Geschichte des Volkes Israel*, iv. 314, note), we can only say that we are at a loss to know where to find this information, since, with the exception of the passage in the *Aboth* of Rabbi Nathan, the ancient Jewish records say nothing about this Boethus.

ciples of Antigonus, goes far to show that the passage in the *Abol of Rabbi Nathan*, like many other pieces in the same work, is by a later hand, and that its author, who most probably flourished towards the end of the 7th century, though possessing the right information that the Zadokites and Boethusians were the followers of Zadok and Boethus, misstated the fact by making these two chiefs, who lived at different times, contemporaries, and by describing them as disciples of Antigonus. This mistake is all the more natural since the real and essential differences between the Sadducees and the Pharisees actually began to develop themselves in the time of Antigonus, and it is not at all improbable, that though the Sadducees, as we shall presently see, derived their early sentiments and distinctive name from a much older leader named Zadok, a distinguished descendant of that leader, bearing the same name, may have lived in the time of Antigonus, and may have contributed greatly to the final separation of the Sadducees from the Pharisees.

We have seen from their tenets and practices that the Sadducees were the ancient priestly aristocracy, and that they persisted in maintaining their conservative notions, as well as in retaining their pristine prerogatives, against the voice of the people. It is therefore natural, in tracing their origin, to look for a leader among the priests themselves, as their strong conservative sentiments would, as a matter of course, make them centre around a representative and a name of their own caste celebrated in the records of the sacred Scriptures. Such a chief, answering all the conditions required, we find, as Geiger has elaborately shown it, in the eminent priest Zadok, the tenth in descent from the high-priest Aaron, who declared for the succession of Solomon to the throne when Abiathar took the part of Adonijah (1 Kings i. 32-45), and whose line of descendants, or 'house' as it is termed in the Bible, henceforth retained a pre-eminence in the future history of the Jewish people. Thus when Hezekiah put a question to the priests and Levites generally, the answer was given by Azariah, 'the chief priest of the house of Zadok' (2 Chron. xxxi. 10); and Ezekiel, in his prophetic vision of the future temple, pre-eminently distinguishes 'the sons of Zadok,' and 'the priests and the Levites of the seed of Zadok,' as the faithful guardians of the Lord's sanctuary when the children of Israel went astray (Ezek. xl. 46; xliii. 19; xlv. 15; xlviii. 11). When the Jews returned from the Babylonish captivity, this sacerdotal aristocracy, and especially the 'priests of the seed of Zadok,' the 'sons of Zadok,' or which comes to the same thing 'the Zadokites' = Sadducees, naturally continued to form the centre of the newly-formed state, and to be the time-honoured guardians both of God's sacred heritage and their holy religion. The high-priests were also the chief functionaries of state. Their maxim, however, that statecraft and ingenuity are to be employed in political transactions with foreign nations, as well as the conduct of the chiefs among this sacerdotal aristocracy based upon this maxim, threatened to destroy both the nationality and the religion of the Jews. Hellenism—which gradually found its way into Judea after its occupation by Alexander the Great—Grecian sports, and political alliances with the heathen, were advocated by the

highest of the land, and openly espoused by multitudes (1 Maccab. i. 11-15). The very high-priest, who hitherto was the centre of religion, did all he could to denationalise the people of his charge (2 Maccab. iv. 1-19). The people, who saw their sanctuary ravished by the Syrians whilst their aristocracy were engaged in their ruinous statecraft, became embittered against both the foreigners abroad and the rulers at home. We cannot do better than continue the description of the Sadducees in the powerful words of Geiger: 'It was then that a pliable priestly family made itself the hand and the mouthpiece of this discontent; it conquered and crushed the foreign sway, overthrew the governing families at home, and assumed the pre-eminence. But the aristocracy soon surrounded the new sun of the Maccabees, and the Zadokites, who themselves had hitherto been the sun, now became its satellites, as Sadducees. The party struggle increased with continued success to the Pharisees. The internal struggles, however, made the interference of the Romans easy, and paved the way of the keenly ambitious Herod to the throne. He was neither a priest nor a born Israelite; but, like all upstarts, he was anxious to ally himself with the ancient aristocracy. His connection with Mariamne supported a Maccabæan family in the court itself, which, in opposition thereto, had popular sympathies, because it had its root among the people, in consequence of its celebrated past. Hence the eternal court intrigues, and the consequent brutalities. It was for this reason that Herod sought for another alliance with the sacerdotal aristocracy, which should both legitimatise him and be his faithful followers, and which he, on his part, would raise, by being connected with the sovereign. For this purpose he selected the family of Boethus, a sacerdotal family to whom the functions of the high-priesthood did not belong. He married the daughter of Simon Boethus, whom he made high-priest. Thus was a new high aristocracy created, which, being of ancient aristocratic blood, was blended with the high aristocracy, but which nevertheless owed its elevation to the sovereign, and was allied to his house. These were the Boethusians. Their double character, being both upstarts, and yet claiming to be ancient aristocracy, enhanced their arrogance' (*Jüdische Zeitschrift*, ii. 34, ff.) They are the Herodians, and for this reason are alternately called Herodians and Sadducees in the N. T. (Matt. xvi. 6 with Mark viii. 15). Thus we are told that the Pharisees took counsel with the Herodians—i.e. with the Boethusian branch of the Sadducees—how they might destroy Jesus (Mark iii. 6), as these Herodians, from their alliance with the reigning dynasty, had the temporal power for their aid. Again, in Mark xi. 27, xii. 13, it is stated that the chief priests, the scribes, and the elders, sent unto Jesus certain of the Pharisees and of the Herodians to catch him in his words, and after they had conjointly put to him the question about the tribute-money (14-17), each of the representatives of the two sects—i.e. of the Sadducees and the Pharisees—tried to entrap him with questions in harmony with their sectarian tenets. Accordingly, the Sadducean portion of the deputation, which are called in ver. 13 Herodians, and in ver. 19 Sadducees, came forward first and asked him the question about the seven brothers, which bore upon the Sadducean doctrine of the resurrection

and the Levirate law (19-27). When they were silenced, one of the scribes—*i.e.* of the Pharisaic portion of the deputation who was pleased with the manner in which Jesus put down the cavils of the Herodians—came forward and tried to entangle our Saviour with a question from a Pharisaic point of view (28-37). The reason why our Saviour, who so frequently rebuked the extravagances of some of the Pharisees, did not expose the doctrines of the Sadducees is, that at his advent their tenets had been thoroughly refuted by their opponents the Pharisees, and that although, through their alliance with the court, they wielded the temporal arm (Acts v. 17), they exercised no religious influence whatever upon the mass of the Jewish people, with whom the Pharisees were all in all (Joseph. *Antiq.* xiii. 10. 5). But even their political influence soon ceased, for with the destruction of the Jewish state by the Romans the Sadducees lost their temporal significance; and though their doctrines continued to be held by a small fraction of the dispersed Jews, yet they were deemed of so little influence that Jehudah the Holy (163-193), in his redaction of the Mishna, only rarely and sparingly takes notice of the different opinions upon the various Jewish enactments held by the Sadducees and the Boethusians. It is for this reason that the Sadducees are also mentioned so little in the Talmud and the Midrashim, and that their origin was forgotten in the 7th century, when the above-quoted passage relating to their rise was introduced into the *Aboth* of Rabbi Nathan.

4. *Modern Sadducees or the Karaites.*—Without religious influence upon the mass of the Jewish people, and without any political power to protect their spiritual weakness, the handful of Sadducees continued to struggle on from the destruction of the second temple to the rise of Islamism, when a new era of resuscitation began for their tenets. The youthful Islam, which allied itself to science, breathed a reviving spirit upon Judaism, of which dying Sadduceism had more than a double share. In addition to the fact that an oppressed sect naturally seizes any new tendency whereby it can be resuscitated, Sadduceism—being free from the trammels of the traditional ordinances, as well as from the mass of artificial explanations, having had no share in the hazardous decisions passed by the Pharisees in the gloomy centuries which intervened between the rise of Christianity and Mohammedanism, and possessing only the Hebrew Scriptures as their religious code and classical literature—could more easily be penetrated by science than Pharisaism with its prodigious accumulation of authoritative works. And the learned and renowned Anan b. David, who rejected the traditions of the fathers, or in other words who was a Sadducee, duly availed himself of these auspicious circumstances about A.D. 760.

i. *Rise of Karaism.*—Though the exact time when Anan b. David, the renowned founder of Karaism, was born, cannot now be ascertained, yet we know that in A.D. 761 or 762 he was old enough to become the prince of the captivity or patriarch, to which he was the legitimate successor, as his uncle Solom, who held this dignity, died childless; and that the brothers R. Jehudai the Blind, who was at that time Gaon of Sora, and R. Dudai, Gaon of Pumbedita, prevented him from obtaining the patriarchate, because he, like many other representatives of the ancient Sadducees, re-

jected the traditions of the fathers, and elected his brother in his stead. As Anan was not singular in his theological views, those who sympathised with him, and could not see the truth of Pharisaic or Rabbinical Judaism, when they saw that he suffered for conscience sake, gathered round him as the legitimate prince and as the powerful champion of their principles. Having been compelled by the Rabbinical party, who had great influence with the caliph Abugafar el-Almanzor, to quit Babylon, he repaired to Jerusalem, where he was followed by his children and his influential friends, some of whom were members of the Gaonim college, and where he founded a synagogue, which continued till the first invasion of the Holy City by the Crusaders. The Pharisaic Jews formally excommunicated Anan and his party, whilst Anan, on the other hand, prohibited his followers from intermarrying with the Rabbinites, taking any meals with them, visiting their synagogues, or having any intercourse with them. Thus originated the separation between the Karaites, or the successors of the Sadducees, and the Rabbinical or Pharisaic Jews.

ii. *Tenets and practices of the Karaites.*—The doctrines of the Karaites are, with few exceptions, the same as those of the Sadducees.

a. Like his predecessors the Sadducees, Anan propounded the principle of worldly policy with the surrounding nations. Hence he regarded the founders of both Christianity and Mohammedanism as divinely commissioned. Christ, he said, was a true prophet for the Gentiles, and a wise teacher of the Jews; he proclaimed the revealed law to the heathen, and endeavoured to remove from the Scriptures the obscuring mass of human ordinances and vain traditions which the scribes and the Pharisees palmed thereupon, but which the Jews in their blindness did not understand. Mohammed, again, had a divine mission to the Arabs to destroy their idols, and teach them the existence of one true God and to worship him only. The Koran, therefore, is the inspired book for the Islamites, but does not set aside the Jewish law for the Jews (De Sacy, *Chrestomathie Arabe*, i. 326; Wolf, *Bibliotheca Hebraea*, iv. 1086). These doctrines Anan propounded in a small work entitled *Fadhalkah*—*i.e.* *Summary of Doctrines*—which is now lost (comp. Munk, in Jost's *Annalen*, 1846, p. 76).

b. The rejection of the oral law and the Pharisaic enactments which constituted the vital difference between the Sadducees and the Pharisees, was thoroughly espoused by Anan, and is the cardinal doctrine of the Karaites to the present day. His distinguishing tenet was, '*Search the Scriptures thoroughly*' (חפישו באוריייתא שפיר), thus making literal teaching of the Bible the only infallible source and test of religious truth and observance. It is from this important principle that these modern Sadducees derive their honourable appellation, *Karaites* or *Karaim* (קראים) = *Scripturalists*, or *Bene Mikra* (בני מיקרא), *Baale Mikra* (בעלי מיקרא) = *Followers of the Bible*, in contradistinction to the *Bene Mishna* (בני משנה), *Baale Ha-Kabbala* (בעלי הקבלה), the followers of the oral law, which, as we have seen, was also the name of the Sadducees in olden times.\* In their rejecting tradition,

\* The first Karaites also called themselves *Ananites* (ענניים), or *followers of Anan*, out of re-

however, the Karaites, like their predecessors the Sadducees, do not discard every ancestral observance. Anan, their founder, simply refused to regard the expositions and decisions of the Pharisees or Rabbins as final, and as precluding private and individual examination of the simple meaning of Holy Writ according to the laws of grammar and exegesis. He only claimed for himself and his followers the liberty which the older Mishna-doctors exercised prior to these traditional enactments, of ascertaining logically what is the mind of the spirit. Hence the remark of Japheth, the Karaite Biblical expositor [JAPHETH]: 'The mode of interpretation pursued by the Mishna-doctors is that adopted by Anan, Benjamin Nahavendi, and other opponents of the Rabbinites, who wrote works on the laws (ספרי מצות), wherein every one of them propounded his views and supported them by arguments demonstrating the correctness of his opinions, which peradventure may be right or wrong' (Pinsker, *Likute Kadmoniot*, 20, 21). Hence, too, Anan adopted R. Ishmael's thirteen exegetical rules [ISHMAEL B. ELISA] in his exposition of the Bible. These principles he embodied in his commentary on the Pentateuch, which, though quoted by many early Karaite writers, and even as late as Ibn Ezra, who cites the *Introduction* to his *Comment*, on *Pentateuch*, has not as yet come to light.

c. The Sadducean restriction of the Levirate law to cases of betrothal (ארוסה) continued to be the law of the early Karaites. Thus Benjamin b. Moses Nahavendi (flour. 800-810 A.D.) distinctly declares that 'if the woman is actually the wife of the man, and he dies without issue, she is for ever interdicted to the Levir; still some member of the family is to act as *Go'el* (גואל), and marry her in order to preserve the name of the deceased in his possession' (comp. Ibn Ezra on *Deut.* xxv. 5; Geiger, in *He-Chaluz*, vi. 26, ff.; *Jüdische Zeitschrift*, i. 34, ff.).

d. The Karaites also espoused the literal carrying out of the *right of retaliation*, which was held by the Sadducees. The controversy between the celebrated Karaite Ibn Sitta and Saadia Gaon upon this point is given by Ibn Ezra in his *Comment*, on *Exod.* xxi. 23, 24.

e. The Karaite also held to the Sadducean law of inheritance (Fürst, *Karäerthum*, i. 54).

f. The rigid interpretation of the injunction in *Lev.* xi. 39, 40, maintained by the Sadducees, which extends the defilement of a carcase to the skin and all its parts, is also defended by the Karaites. Thus Elias, in his *Adereth* (cap. i. fol. 70 d), distinctly says, 'The skin defiles, since it is a part of the carcase, but the followers of tradition [*i.e.* the Rabbinic or Pharisaic Jews] maintain that it does not defile because they do not call it the carcase' (Geiger, in the *Zeitschrift der deutschen morgenländischen Gesellschaft*, vol. xvi. p. 725; Pinsker, *Likute Kadmoniot*, p. 83, ff.).

g. Like the Sadducees of old, the Karaites reject the artificial mode of *amalgamating the distances* (עירוב תנחומין), introduced by the Pharisees to remove from the people the rigorous and inconvenient Sabbatical laws. Thus they interpret

*Exod.* xvi. 29, that a man is not to move about on the Sabbath more than 2000 yards within the city and its precincts, and that only when the city is inhabited by Jews; and in case the majority of the inhabitants are not Israelites, he is not to quit the house at all except to go to the synagogue (*Adereth Elijah*, 29 c; Geiger, *Jüdische Zeitschrift*, ii. 27; Fürst, *Karäerthum*, i. 51).

h. The Karaites also defend all the other rigorous enactments of the Sadducees respecting the observance of the Sabbath. Thus they will allow no lights to be kindled for the Sabbath eve, but sit in darkness; nor any food to be eaten, the cooking or warming of which, though begun on the preparation-day, continues on the Sabbath, rigidly interpreting the injunction in *Exod.* xxxv. 3 (*Adereth Elijah*, 31 b; Ibn Ezra, *Comment. on Exod.* xxxv. 3); nor connubial intercourse, partly because it is contrary to the principle of rest, and partly because it is deemed contrary to the holiness of the day (*Adereth Elijah*, 28 b; Ibn Ezra, *Comment. on Exod.* xxxiv. 21); nor will they permit a child to be circumcised if the eighth day happens to be the Sabbath (*Adereth Elijah*, 26 a; Levi b. Japheth in Pinker's *Likute Kadmoniot*, Appendix, p. 90).

i. Like the Sadducees of old, the Karaites maintain that the paschal animal was to be slain on the last quarter of the fourteenth of *Nisan*, taking the phrase בין הערבים (between the two evenings) (*Exod.* xii. 6; *Lev.* xxiii. 5), to denote the space between the setting of the sun and the moment when the stars become visible [PASSOVER]; and that the omer is to be offered on the first day following the weekly Sabbath, so that the feast of Pentecost is always to be on the first day of the week, taking the expression מנחת השבת (Lev. xxiii. 11, 15, 16) literally (*Adereth Elijah*, 40 c-43 b [PENTECOST]).

k. Like the Sadducees, the Karaites reject the Pharisaic regulations about the phylacteries; nay, in this they go beyond their progenitors in doctrine, for they discard the phylacteries altogether, and interpret *Exod.* xiii. 6 metaphorically.

l. Like the Sadducees, the Karaites interpret rigidly the injunction about lying-in women (*Lev.* xii. 2-3), extending their impurity and keeping aloof from their husbands to the whole period of thirty-three days, in addition to the first seven days after the birth of a boy, and of sixty-six days in addition to the first fourteen days after the birth of a girl.

From this comparison, it will be seen that, with the exception of the doctrine of the resurrection and future rewards and punishments, the tenets of the Karaites, collected and systematised by Anan in 760 A.D., and elaborated by his distinguished followers, Benjamin Nahavendi and others, are the tenets of the ancient Sadducees. Indeed, their identity was acknowledged from the beginning. Thus Saadia Gaon, who wrote against Anan, distinctly declares, in his description of the first organisation of the Karaites, 'that about this time Anan and all the godless and unbelieving who were still left of the *horde of Zadok and Boethus*

(באותו הזמן נתקנא ענן הוא וכל איש רע ובלעל הנותרים מתרבות צדוק וביתום ונתכונן במחלוקת בסתר) were fired with jealousy, and secretly concocted a schism' (Pinsker, *Likute Kadmoniot*, Appendix, p. 103). Whilst Jacob b. Joseph

verence for their founder. This name, however, was afterwards entirely superseded by the appellation now in vogue.

Kirkisani, who records the opinions of older writers, speaks of the two sects as identical. 'Know therefore,' says he (דע כי זהו ההלוק הוזה בבית שני ויד הרבנים מנצחת והם הידועים בפרושים ויד הקראים נתחלשה והם (הידועים צדוקים), 'that there was a division during the second temple, and that the Rabbinites, who are known by the name Pharisees, prevailed, whilst the Karaites, who are known by the name Sadducees, succumbed' (Pinsker, *ibid.* p. 84).

iii. *Influence of the Karaites on Biblical Literature and Exegesis in past days, and the present Condition of this Sect.*—As the Karaites did not regard the folios containing the traditions of the Rabbins as authoritative expositions of the contents of the Bible, the study of the Hebrew Scriptures in their literal and grammatical sense became their chief object. The impulse which this fact gave to the prosecution of sound exegesis and philology can hardly be overrated. The Rabbinic Jews, seeing that their opponents the Karaites had made great progress in Biblical knowledge, and could wield the Scriptures as a most dangerous weapon against the traditions of the fathers, were driven in self-defence also to apply themselves to the study of the written word of God. Both parties were thereby greatly benefited. The Karaites, however, for a time remained masters of the field. It is beyond the scope and limits of this article to detail the changes and modifications which have been introduced into the tenets and practices of Karaism since its first organisation by Anan. Suffice it to say that this sect still exists and numbers about 5000 or 6000 followers. About 1500 of them reside at Djufut Kalè, about 800 at Eupatoria, 200 at Odessa, about 30 in Theodotia. Some of them are to be found in Wilna and other parts of Lithuania, and in Taganrog and Cherson. Out of Russia they are to be found in Galicia, where they have synagogues under the protection of the Austrian government; in Constantinople, where there are about 150 of them; in Kahira, in Jerusalem, and in Syria. Everywhere their morality is unexceptionable, their honesty and general probity in the transaction of business with their Jewish, Christian, and Mohammedan neighbours, are proverbial. No vice nor crime is known among them. The records of the police in Russia show that no Karaite has been punished for an offence against the laws for four hundred years. Both the Russian and Austrian governments, as a reward for their high integrity and quiet industry, have conferred privileges and immunities upon the Karaites which are denied to the Rabbinical Jews, and sometimes even to their Christian fellow-subjects.

5. *Literature.*—Owing to the complete triumph and general prevalence of Pharisaism, the literature of the Sadducees recording their principles, rise, progress, etc., is exceedingly meagre; and our chief information upon this sect is derived from the sources of their opponents—*i.e.* the Mishna, the Talmud, and the Midrashim—which are both scanty and greatly distorted by party feeling. To supplement this deficiency we have the scattered notices of the Samaritans, which materially aid us in many points, since the Samaritans, like the Sadducees, adhered in matters of law to the pre-Pharisaic or Sadducean application thereof. Of still greater help is the more ample information we possess about the Karaites or the modern

Sadducees. Of modern writers who have treated upon the Sadducees are to be mentioned Ewald, *Geschichte des Volkes Israel*, vol. iv. p. 313-328, Göttingen 1852; Herzfeld, *Geschichte des Volkes Israel*, vol. iii. pp. 359, 365, 382-388, Nordhausen 1857; Graetz, *Geschichte der Juden*, pp. 76-79, 454-463, 2d ed., Leipzig 1863; Jost, *Geschichte des Judenthums und seiner Secten*, vol. i. p. 216, etc., Leipzig 1857. No one, however, has done so much to elucidate the true character of the Sadducees, their position with regard to the Pharisees, their connection with the ancient Samaritans and the modern Karaites, as the learned Geiger, in his *Urschrift und Uebersetzungen der Bibel*, p. 100, etc., Breslau 1857. The results which this indefatigable scholar first communicated in the *Urschrift* he followed up by further researches into divers points connected with the Sadducees: the additional information thus obtained he communicated in the *Jüdische Zeitschrift*, vol. i. p. 19, etc., Breslau 1862; vol. ii. p. 11, etc., Breslau 1863; in the *Zeitschrift der deutschen morgenländischen Gesellschaft*, vol. xvi. p. 714, etc., Leipzig 1862; and in the Hebrew Essays and Reviews entitled *He-Chalutz*, vol. v. p. 29, etc.; vol. vi. p. 13, etc., Breslau 1861. The great storehouse of Karaite literature is the Hebrew work published by Pinsker, entitled *Likute Kadmoniot*, Vienna 1860. This volume, which consists of two parts and a double pagination (*viz.*, the text or Part One, extending from p. 1 to 234, and the appendix, or Part Two, embracing p. 1 to 228), has created a new era in the history of the Karaites or modern Sadduceism. To this must be added Fürst's excellent *Geschichte des Karäerthums*, vol. i. Leipzig 1862, vol. ii. Leipzig 1865. Fürst, whose history of this interesting sect is based upon Pinsker's elaborate work, also gives in the first volume a sketch of the doctrines and practices of the Sadducees, and like Geiger shows the intimate connection subsisting between the Sadducees and the Karaites.—C. D. G.

SAFFRON. [KARCOM.]

SAIL. [SHIP.]

SAIT. [ZAIT.]

SALAH (שָׁלַח, *a shoot*; Sept. and N. T. Σαλᾶ), a son, or grandson, of Arphaxad (Gen. x. 24; xi. 13; Luke iii. 35).

SALAMIS (Σαλαμῖς), one of the chief cities of Cyprus on the south-east coast of the island, visited by Paul and Barnabas on their first missionary tour (Acts xiii. 5). It was afterwards called Constantia, and in still later times Famagusta [CYPRUS].

SALATHIEL (Σαλαθιήλ, answering to the Heb. שְׁלֹמִיָּהּ, *asked of God*), the father of Zerubbabel (Matt. i. 12; Luke iii. 27; comp. Ezra iii. 2; Neh. xii. 1; Hag. i. 12, 14; ii. 2). In the genealogy of our Lord given by Matthew he appears as the son of Jeconiah; in that given by Luke he is the son of Neri. With Matthew accords 1 Chron. iii. 17. It thus appears that in some sense Salathiel was reckoned the son both of Jeconiah and of Neri. There are two ways of accounting for this: either he was really the son of Jeconiah, and was counted for a son to Neri from having married his daughter; or he was really the son of Neri, and was counted the son of Jeconiah from having succeeded to him on the failure of the

line of descent from Solomon through him. The former is the more probable hypothesis; the statement of both the Chronicler and St. Matthew leading to the conclusion that Jeconiah was the real father of Salathiel, and there being no evidence of any failure of the line of descent in Jeconiah's family through his having no sons, seeing he had not fewer than seven besides Salathiel. It has indeed been said that the 'supposition that the son and heir of David and Solomon would be called the son of Neri, an obscure individual, because he had married Neri's daughter, is too absurd to need refutation' (Smith's *Dict. of the Bible*, art. 'Neri'). But this is said without reason. For—1. Though Neri may be an 'obscure individual' to us, it by no means follows that he was so to his contemporaries; 2. He is not more obscure than Salathiel; we know as much of the one as of the other; 3. He was as much a descendant of David as was Jeconiah, so that his daughter would be a fitting match for Jeconiah's son; 4. Supposing Salathiel the son of Jeconiah married Neri's daughter, he could not help being his legal son, and, if Neri had no other son, he would of course be reckoned in the genealogies as the son of Neri, however obscure the latter might have been. From all which it appears that the 'absurdity' exists only in the fancy of the critic, and does not attach to the supposition he criticises.—W. L. A.

SALCAH and SALCHAH (סַלְכָה; Ἑλχά; Σεκχαί; Alex. Σελχά; Ἀσελχά; *Salceha*), an ancient city of Bashan, situated on its eastern border. The territory which the Israelites took from the giant Og is described as embracing 'all Bashan unto Salchah' (Deut. iii. 10; Josh. xiii. 11). This city appears to have been one of the old capitals of Og's kingdom (Josh. xii. 5). A statement in 1 Chron. v. 11 appears to show that Salchah was upon the eastern confines of both Manasseh and Gad. In later Jewish history the name is never mentioned, and the probability is that the city soon fell into the hands of the original inhabitants.

There can be no doubt that Salcah is identical with the modern *Sulkhad* (صلخد). The town occupies a strong and commanding position on a conical hill at the southern extremity of the range of Jebel Hauran. On the summit stands the castle, a circular building of great size and strength, surrounded by a deep moat. The external walls are still tolerably perfect, and were evidently founded not later than the Roman age, though the upper portions are Saracenic. The sides of the cone immediately beneath the walls are steep and smooth, and are covered with light cinders and blocks of lava. The city occupies the lower slopes on the south, extending to the plain. A large number of the houses are still perfect, with their stone roofs and stone doors, though they have been long deserted. On the walls of the castle, and among the ruins, the writer saw Greek inscriptions bearing dates equivalent to A.D. 246 and 370; while an Arabic record on the walls of a large mosque showed that it was built in the year A.D. 1224; and a minaret near it about four centuries later. The latter appeared to be the newest building in the place.

The country round Salcah is now without inhabitants; but traces of former industry and wealth, and of a dense population, are visible. The roads,

the fields, the terraces, the vineyards, and the fig orchards are there, but man is gone. The view from the summit of the castle of Salcah is one of the most remarkable for desolation in all Palestine (Porter, *Damascus*, ii. 171-187; Abulfed. *Tub. Syr.* p. 106).—J. L. P.

SALEAM (סַלְעָם), a species of locust, winged and esculent (Lev. xi. 22). The LXX. render by ἀττάκη, A. V. 'bald locust.' A Chaldee root is given by Bochart, סלעם, *to consume*; but some prefer tracing the word to סלע, *a rock*, with much less probability. So little is known of this insect that it is impossible to identify it with any recorded species. Tychsen thinks that the *Gryllus eversor* of Asso is meant; but it is not certain what this is.—W. L. A.

SALEM (סָלֵם, *peace*; Sept. Σαλήμ), the original name of Jerusalem (Gen. xiv. 18; Heb. vii. 1, 2), and which continued to be used poetically in later times (Ps. lxxvi. 2) [JERUSALEM].

SALIM (Σαλειμ; and Alex. Σαλλείμ). In John iii. 23, the only passage of Scripture in which this name occurs, it is said, 'and John also was baptizing in Ænon, near to Salim, because there was much water there.' Salim was manifestly a well-known place; but its situation is not described, and sacred geographers are unable to fix it with any degree of certainty. The sacred narrative affords some little guidance. Christ was in Judæa (ver. 22), and the whole scope of the passage certainly conveys the impression that John was near him, and consequently Salim was either in Judæa or close to its borders.

This fact appears to render the statement of Eusebius and Jerome impossible. They locate Salim in the plain of the Jordan, eight miles south of Scythopolis (*Onomast.* s.v. *Ænon*); and there, at the base of a little tell, are some ancient ruins beside a copious fountain. A wely, or tomb, near the ruins is called *Sheikh Salim* (Van de Velde, *Travels*, ii. 346; Robinson, *B. R.* iii. 333). There can be little doubt, notwithstanding the opinion of Robinson, that this is the Salim mentioned by Eusebius; yet, as it is nearly forty miles from the borders of Judæa, it cannot be that in which John was baptizing.

There is a village called *Salim* in the plain of Mukhna, east of Nābulus, which is probably the Shalem of Gen. xxxiii. 18 (*Handbook*, p. 340; *B. R.* ii. 279); but it is too far north to suit the gospel narrative; and besides it cannot be said of it 'there is much water there.'

The theory of Dr. Barclay, though lightly regarded by so high an authority as Mr. Grove (Smith's *Dict. of Bible*, s.v.), is much more in accordance with the gospel narrative than either of the foregoing. He identifies Salim with Wady *Selim*, a wild ravine which runs down from Anathoth into Wady Farah; and Ænon with a large fountain discovered by him in that ravine, which he describes in somewhat extravagant terms (*City of the Great King*, pp. 558, seq.). This place is in Judæa, about six miles north-east of Jerusalem; and may be the place where John was baptizing. According to Dr. Barclay's description it can truly be said of this valley, 'there are many waters' (ὕδατα πολλά).—J. L. P.

## SALLONIM. [SILLON.]

SALMON (שָׁלֹמֹן, *clothed*; Sept. and N. T. Σαλώμων), the father of Boaz (Ruth iv. 21; Matt. i. 4, 5; Luke iii. 32), elsewhere called Salmah, שִׁלְמָה (Ruth iv. 20), and שְׁלֹמֹה (1 Chron. ii. 11).

SALMON or ZALMON, prop. TSALMON (צִלְמוֹן), a woody hill near Shechem (Judg. ix. 48). Whether it is this that is referred to in Ps. lxxviii. 15 [A. V. 14] is disputed. Some interpreters take צִלְמוֹן here in its etymological meaning of darkness = צֶלֶם; thus Luther renders the clause 'so wird es helle wo es dunkel ist,' *thus it be bright where it is dark*, and understands it with a Messianic reference. Ewald adopts much the same rendering. The majority, however, retain the name as a proper name, but exhibit great variety in their explanation of the passage. Hengstenberg thinks that the phrase 'it snows on Tsalmon' is equivalent to 'there is brightness where there was darkness,' the hill originally dark with wood is now white with snow. De Dieu supposes a comparison: Tsalmon is white with the bones of the slaughtered kings as if with snow. Some suppose that there is here a mere note of time: it was winter, the snow was on Tsalmon (Herder); and this Hupfeld adopts, with the explanation that the statement is made derisively with reference to those who tarried at home deterred by the winter's snow. He considers the passage (13-15) as a fragment of an ancient song celebrating some of the early conquests of Israel in Canaan, and deriding those who, from indolence or fear, shrank from the enterprise. He translates thus:—

The kings of the armies flee, flee,  
And the housewife shares the spoil!  
Will ye lie among the shippens?  
Pigeon-feathers decked with silver  
And their wings with yellow gold!  
As the Almighty scattered kings therein  
It was snowing on Tsalmon.—W. L. A.

SALMONE (Σαλώμων), a promontory forming the eastern extremity of the island of Crete (Acts xxvii. 7). See Smith, *Voy. and Shipwr. of St. Paul*, ii. 393, 2d ed.

SALOME (Σαλώμη). 1. A woman of Galilee, who accompanied Jesus in some of his journeys, and ministered unto him; and was one of those who witnessed his crucifixion and resurrection (Mark xv. 40; xvi. 1). It is gathered, by comparing these texts with Matt. xxvii. 56, that she was the wife of Zebedee, and mother of the apostles James and John. 2. The name (though not given in Scripture) of that daughter of Herodias whose dancing before her uncle and father-in-law, Herod Antipas, was instrumental in procuring the decapitation of John the Baptist [HERODIAN FAMILY; JOHN THE BAPTIST].

SALT (מֶלַח) was procured by the Hebrews from two sources—first, from rock-salt, obtained from hills of salt which lie about the southern extremity of the Dead Sea; and, secondly, from the waters of that sea, which, overflowing the banks yearly, and being exhaled by the sun and the heat, left behind a deposit of salt both abundant and

good. In the same manner the Arabs of the present day procure their supply of salt from the deposits of the Dead Sea, and carry on a considerable trade in that article throughout Syria.

The uses to which salt was anciently applied were not dissimilar to those for which it serves at present—a fact which arises from the circumstance that these uses depend on its essential qualities, and on the constitution and wants of the human frame. It is now known as a physiological fact, that salt is indispensable to our health and vigour. For this reason, doubtless, the use of it was providentially made agreeable to the palate. Independently of its services to man as an ingredient in his food, salt is employed—1. As a manure, since, when used in proper proportions, it enriches the soil; and 2. As an antiseptic, as it preserves flesh-meat from corruption. From these qualities severally result the applications of salt, both natural and figurative, of which mention is made in Scripture.

From Job vi. 6 it is clear that salt was used as a condiment with food. Salt was also mixed with fodder for cattle (Is. xxx. 24), where the marginal reading is preferable, '*savoury* provender.' As offerings, viewed on their earthly side, were a presentation to God of what man found good and pleasant for food, so all meat-offerings were required to be seasoned with salt (Lev. ii. 13; Spencer, *De Legibus Rit.* i. 5. 1). Salt, therefore, became of great importance to Hebrew worshippers; it was sold accordingly in the temple market, and a large quantity was kept in the temple itself, in a chamber appropriated to the purpose (Maii *Diss. de Usu Salis Symbol. in rebus Sacris*, Giessen 1692; Wokenius, *De Salitura oblationum Deo factar.* 1747; Joseph. *Antiq.* xii. 3. 3; *Middoth*, v. 3; Othon. *Lex. Rab.* p. 668). Jewish tradition agrees with Ezek. xliii. 24 in intimating that animal offerings were sprinkled with salt (Joseph. *Antiq.* iii. 9. 1; Philo, ii. 255; Hottinger, *Jur. Heb. Legg.* p. 168); as was certainly the case with the Greeks and Romans (Plin. *Hist. Nat.* xxxi. 44; Ovid, *Fast.* i. 337; Spencer, *De Leg. Rit.* iii. 2. 2; Lukemacher, *Antiq. Græc. Sacr.* p. 350; Hottinger, *De Usu Salis in Cultu Sacro*, Marburg 1708; Schickeclanz, *De Salis usu in Sacrific.* Servest. 1758). The incense, 'perfume,' was also to have salt as an ingredient (Exod. xxx. 35; marginal reading 'salted'), where it appears to have been symbolical, as well of the divine goodness as of man's gratitude, on the principle that of every bounty vouchsafed of God, it became man to make an acknowledgment in kind.

As salt thus entered into man's food, so to eat salt with any one was to partake of his fare, to share his hospitality; and hence, by implication, to enjoy his favour, or to be in his confidence. Hence, also, salt became an emblem of fidelity and of intimate friendship. At the present hour the Arabs regard as their friend him who has eaten salt with them—that is, has partaken of their hospitality (Niebuhr, *Beschr.* p. 48; Rosenmüller, *Morgenl.* ii. 150); in the same way as, in Greece, those regarded each other as friends even to distant generations, between whom the rites of hospitality had been once exchanged. The domestic sanctity which thus attached itself to salt was much enhanced in influence by its religious applications, so that it became symbolical of the most sacred and binding of obligations. Accordingly 'a cove-

nant of salt,' בְּרִית מֶלַח, was accounted a very solemn bond (Num. xviii. 19; 2 Chron. xiii. 5; Lev. ii. 13)—a signification to which force would be given by the preservative quality of salt (Bahrđt, *De Fœdere Salis*; Zerbech, *De Fœdere Salis*).

But salt, if used too abundantly, is destructive of vegetation, and causes a desert. Hence arose another class of figurative applications. Destroyed cities were sown with salt, to intimate that they were devoted to perpetual desolation (Judg. ix. 45); salt became a symbol of barrenness (Deut. xxix. 23; Zeph. ii. 9; Virg. *Georg.* ii. 238); and 'a salt land' (Jer. xvii. 6) signifies a sterile and unproductive district (Job xxxix. 6; Altmann, *Meletem. Philolog. Exeg.* i. 47). By exposure to the influence of the sun and of the atmosphere, salt loses its savoury qualities (Plin. *Hist. Nat.* xxxi. 34; xxxi. 39; Maundrell, *R.* 162); whence the striking and forcible language of our Lord in Matt. v. 13.

We have reserved to the end reference to a singular usage among the Israelites, namely, washing new-born infants in salt water; which was regarded as so essential that those could have hardly any other than an ill fate who were deprived of the rite (Ezek. xvi. 4). The practice obviously arose from a regard to the preserving, the domestic, the moral, and the religious uses to which salt was applied, and of which it became the emblem (Richter, *De Usu Salis apud Priscos Profano et Sacro*, Zettau 1766).—J. R. B.

SALT, CITY OF (עִיר־הַמֶּלַח; ἡ πόλις τῶν ἀλάων; *civitas salis*), one of the six cities enumerated by Joshua in the wilderness of Judah (Josh. xv. 62), but not elsewhere mentioned in Scripture. It is grouped with Engedi, and appears to have been situated to the south of it. It seems most probable that it took its name from salt-works or mines. At the south-western extremity of the Dead Sea stands a remarkable range of hills of pure salt [SEA], and near them 'the City of Salt' was perhaps situated. There are ancient ruins at the mouth of Wady Zuweirah, at the northern end of the range; and others at Um Baghek, five miles farther north. One or other of these places may mark the site of 'the City of Salt' (Robinson, *B.* R. ii. 109; Van de Velde, *Memoir*, 345; Tristram, *Land of Israel*, pp. 318, *seq.*)—J. L. P.

SALT, VALLEY OF (נִיַּת מֶלַח). This name is employed five times in the Bible, but in these the sacred writers mention only two events which occurred in the place. In 2 Sam. viii. 13, and 1 Chron. xviii. 12, an account is given of the slaughter of eighteen thousand Edomites by the army of king David in 'the valley of Salt.' The former passage reads אֲרָם, *Aram*, or 'Syrians,' in the Masoretic text; but, from the testimony of some MSS. (De Rossi, *Var. Lect.* ii. p. 174), ancient versions, and the parallel passage in 1 Chron. xviii. 12, it is evident the word ought to be אֲדָם, *Edom*. There is nothing to indicate the exact position of the valley. It may be inferred, however, from the whole scope of the passage, that it was on or near the border of Edom, which appears to have been defined by the Arabah on the west, and Wady el-Ahsy on the north [DUMÆA].

The second incident which occurred in 'the valley of Salt' was also a conflict with the Edomites. Amaziah, king of Judah, 'slew of Edom, in

the valley of Salt, ten thousand, and took Selah by war' (2 Kings xiv. 7; 2 Chron. xxv. 11). The Edomites probably opposed him on the frontier, and were defeated; the remnant then retired to their strongholds, which were captured and destroyed.

The salt-hills and numerous salt-springs at the south-western extremity of the Dead Sea, within a few miles of the frontier of Edom, and in the route along which armies would naturally march between Edom and Judah, suggest the idea that 'the valley of Salt' must have been somewhere in that region. It would seem probable, from the word which in the A. V. is translated 'valley,' and which usually signifies a 'glen' or 'ravine' (נִיַּת), that the sacred writers do not refer to the Arabah, or great plain south of the Dead Sea, but rather to one or other of the passes leading from it, either up into Judah on the one side, or Edom on the other. Wady Zuweirah, a well-known pass at the northern end of the salt range of Usdum, might be the one meant, though the scope of the narrative would rather seem to locate it nearer Edom. Robinson and others (*B. R.* ii. 109; Van de Velde, *Memoir*, p. 346) suppose the 'valley of Salt' to be the Arabah itself (see also Keil on 2 Kings xiv. 7).—J. L. P.

SALUTATION. The frequent allusion in Scripture to the customary salutations of the Jews invests the subject with a higher degree of interest than it might otherwise claim; and it is therefore fortunate that there are few scriptural topics which can be better understood by the help of the illustrations derivable from the existing usages of the East.

Most of the expressions used in salutation, and also those which were used in parting, implied that the person who employed them interceded for the other. Hence the word בָּרַךְ, *barak*, which originally signified 'to bless,' meant also 'to salute,' or 'to welcome,' and 'to bid adieu' (Gen. xlvii. 8-11; 2 Kings iv. 29; x. 13; 1 Chron. xviii. 10).

The forms of salutation that prevailed among the Hebrews, so far as can be collected from Scripture, are the following:—

1. 'Blessed be thou of the Lord,' or equivalent phrases.

2. *The Lord be with thee.*

3. 'Peace be unto thee,' or 'upon thee,' or 'with thee.' In countries often ravaged, and among people often ruined by war, 'peace' implied every blessing of life; and this phrase had therefore the force of 'Prosperous be thou.' This was the commonest of all salutations (Judg. xix. 20; Ruth ii. 4; 1 Sam. xxv. 6; 2 Sam. xx. 9; Ps. cxxix. 8).

4. 'Live, my lord' (חַיֵּה אֲדֹנָי), was a common salutation among the Phœnicians, and was also in use among the Hebrews, but was by them only addressed to their kings in the extended form of 'Let the king live for ever!' (1 Kings i. 31); which was also employed in the Babylonian and Persian courts (Dan. ii. 4; iii. 9; v. 10; vi. 6, 21; Neh. ii. 3). This, which in fact is no more than a wish for a prolonged and prosperous life, has a parallel in the customs of most nations, and does not differ from the 'Vivat' of the Latin, the 'Vive le Roi!' of the French, or our own '— for ever!'

5. *Xaïpe, χαίπετε, joy to thee! joy to you!* rendered by *Hail!* an equivalent of the Latin *Ave! Salve!* (Matt. xxvii. 29; xxviii. 9; Mark xv. 18; Luke i. 28; John xix. 3).

The usages involved in these oral salutations seem not only similar to, but identical with, those still existing among the Arabians. These, indeed, as now observed, go upon the authority of religious precepts. But it is known that such enactments of the Koran and its commentaries merely embody such of the previously and immemorially existing usages as the legislature wished to be retained. Their most common greeting, as among the Jews, is, 'Peace be on you!' to which the reply is, 'On you be peace!' to which is commonly added, 'and the mercy of God, and his blessings!' This salutation is never addressed by a Moslem to one whom he knows to be of another religion; and if he find that he has by mistake thus saluted a person not of the same faith, he generally revokes his salutation: so also he sometimes does if a Moslem refuses to return his salutation, usually saying, 'Peace be on us, and on (all) the right worshippers of God!' This seems to us a striking illustration of Luke x. 5, 6; 2 John xi. Various set compliments usually follow this salam, which, when people intend to be polite, are very much extended, and occupy considerable time. Hence they are evaded in crowded streets, and by persons in haste, as was the case, for the same reason, doubtless, among the Jews (2 Kings iv. 29; Luke x. 4). Specimens of this conventional intercourse are given by Lane (*Mod. Egyptians*, i. 253), who says, that to give the whole would occupy a dozen of his pages. There are set answers, or a choice of two or three answers, to every question; and it is accounted rude to give any other answer than that which custom prescribes. They are such as those by which the Israelites probably prolonged their intercourse. If one is asked, 'How is your health?' he replies, 'Praise be to God!' and it is only from the tone of his voice that the inquirer can tell whether he is well or ill. When one greets another with the common inquiry, 'Is it well with thee?' (see 2 Kings iv. 26), the answer is, 'God bless thee!' or 'God preserve thee!' An acquaintance, on meeting another whom he has not seen for several days, or for a longer period, generally says, after the salam, 'Thou hast made us desolate by thy absence from us;' and is usually answered, 'May God not make us desolate by thy absence!'

The gestures and inflections used in salutation varied with the dignity and station of the person saluted, as is the case with the Orientals at this day. It is usual for the person who gives or returns the salutation to place at the same time his right hand upon his breast, or to touch his lips, and then his forehead or turban, with the same hand. This latter mode, which is the most respectful, is often performed to a person of superior rank, not only at first, with the salam, but also frequently during a conversation. In some cases the body is gently inclined, while the right hand is laid upon the left breast. A person of the lower orders, in addressing a superior, does not always give the salam, but shows his respect to high rank by bending down his hand to the ground, and then putting it to his lips and forehead. It is a common custom for a man to kiss the hand of his superior instead of his own (generally on the back only,

but sometimes on both back and front), and then to put it to his forehead in order to pay more particular respect. Servants thus evince their respect

456.

towards their masters. When residing in the East, our own servants always did this on such little occasions as arose beyond the usage of their ordinary service; as on receiving a present, or on returning fresh from the public baths. The son also thus kisses the hand of his father, and the wife

457.

that of her husband. Very often, however, the superior does not allow this, but only touches the hand extended to take his; whereupon the other puts the hand that has been touched to his own lips and forehead. The custom of kissing the beard is still preserved, and follows the first and preliminary gesture; it usually takes place on meeting after an absence of some duration, and not as an everyday compliment. In this case, the person who gives the kiss lays the right hand under the beard, and raises it slightly to his lips, or rather supports it while it receives his kiss. This custom strikingly illustrates 2 Sam. xx. 9. In Arabia Petræa, and some other parts, it is more usual for persons to lay the right sides of their cheeks together.

Among the Persians, persons in saluting under the same circumstances often kiss each other on the lips; but if one of the individuals is of high rank the kiss is given on the cheek instead of the lips. This seems to illustrate 2 Sam. xx. 9; Gen.

xxix. 11, 13; xxxiii. 4; xlviii. 10-12; Exod. iv. 27; xviii. 7.

458.

Another mode of salutation is usual among friends on meeting after a journey. Joining their right hands together, each of them compliments the other upon his safety, and expresses his wishes for his welfare, by repeating, alternately, many times the words *salamat* (meaning, 'I congratulate you on your safety') and *leiyibeen* ('I hope you are well'). In commencing this ceremony, which is often continued for nearly a minute before they proceed to make any particular inquiries, they join their hands in the same manner as is usually practised by us; and at each alternation of the two expressions, change the position of the hands. These circumstances further illustrate such passages as 2 Kings iv. 19; Luke x. 4. Other particulars, more or less connected with this subject, may be seen in ATTITUDES; KISS; see also EPISTLES for epistolary salutations.—J. K.

**SAMARIA** (שַׁמְרִיָּה, *watch-height*; Σαμάρεια), a city, situated near the middle of Palestine, built by Omri, king of Israel, on a mountain or hill of the same name, about B.C. 925. It was the metropolis of the kingdom of Israel, or of the ten tribes. The hill was purchased from the owner, Shemer, from whom the city took its name (1 Kings xvi. 23, 24). The site of the capital was therefore a chosen one; and all travellers agree that it would be difficult to find in the whole land a situation of equal strength, fertility, and beauty combined. 'In all these particulars,' says Dr. Robinson, 'it has greatly the advantage over Jerusalem' (*Bibl. Researches*, iii. 146). Samaria continued to be the capital of Israel for two centuries, till the carrying away of the ten tribes by Shalmaneser, about B.C. 720 (2 Kings xvii. 3, 5). During all this time it was the seat of idolatry, and is often as such denounced by the prophets, sometimes in connection with Jerusalem. It was the seat of a temple of Baal, built by Ahab, and destroyed by Jehu (1 Kings xvi. 32, 33; 2 Kings x. 18-28). It was the scene of many of the acts of the prophets Elijah and Elisha, connected with the various famines of the land, the unexpected plenty of Samaria, and the several deliverances of the city from the Syrians. After the exile of the ten tribes, Samaria appears to have continued, for a time at least, the chief city of the foreigners brought to occupy their place, although Shechem soon became the capital of the Samaritans as a religious sect. John Hyrcanus took the city after a year's siege, and razed it to

the ground (Joseph. *Antiq.* xiii. 10. 3; *De Bell. Jud.* i. 2. 7). Yet it must soon have revived, as it is not long after mentioned as an inhabited place in the possession of the Jews. Pompey restored it to its former possessors; and it was afterwards rebuilt by Gabinius (Joseph. *Antiq.* xiii. 5. 4; xiv. 4. 4; xiv. 5. 3). Augustus bestowed Samaria on Herod; who eventually rebuilt the city with great magnificence, and gave it the name of Sebaste (which is the Greek translation of the Latin name or epithet Augustus), in honour of that emperor (*Antiq.* xv. 7. 3; *De Bell. Jud.* xv. 7. 7; xv. 8. 5). Here Herod planted a colony of 6000 persons, composed partly of veteran soldiers, and partly of people from the environs; enlarged the circumference of the city; and surrounded it with a strong wall twenty stades in circuit. In the midst of the city—that is to say, upon the summit of the hill—he left a sacred place of a stade and a half, splendidly decorated, and here he erected a temple to Augustus, celebrated for its magnitude and beauty. The whole city was greatly ornamented, and became a strong fortress (Joseph. *Antiq.* xv. 8. 5; *De Bell. Jud.* i. 21. 2; Strabo, xvi. 2. 13).

Such was the Samaria of the time of the N. T., where the gospel was preached by Philip, and a church was gathered by the apostles (Acts viii. 5, 9, *seq.*) Nothing is known of Sebaste in the following centuries, except from the coins, of which there are several, extending from Nero to Geta (Eckhel, iii. 440; Mionnet, *Méd. Antiq.* v. 513). Septimius Severus appears to have established there a Roman colony in the beginning of the 3d century (Cellarius, *Not. Orb.* ii. 432). Eusebius scarcely mentions the city as extant; but it is often named by Jerome and other writers of the same and a later age (adduced in Reland's *Palästina*, pp. 979-981). Samaria was early an episcopal see. Its bishop, Marius, or Marinus, was present at the council of Nice in A.D. 325; and Pelagius, the last of six others whose names are preserved, attended the council of Jerusalem in A.D. 536. The city, along with Nabulus, fell into the power of the Moslems during the siege of Jerusalem; and we hear but little more of it till the time of the Crusades. At what time the city of Herod became desolate no existing accounts state; but all the notices of the 4th century and later lead to the inference that its destruction had already taken place.

The Crusaders established a Latin bishopric at Sebaste; and the title was continued in the Romish Church till the 14th century (Le Quien, *Oriens Christ.* iii. 1290). Saladin marched through it in A.D. 1184, after his repulse from Kerak (Abulfed. *Annal.* A.H. 580). Benjamin of Tudela describes it as having been 'formerly a very strong city, and situated on the mount, in a fine country, richly watered, and surrounded by gardens, vineyards, orchards, and olive-groves. He adds that no Jews were living there' (*Itiner.* ed. Asher, p. 66). Phocas and Brocardus speak only of the church and tomb of John the Baptist, and of the Greek church and monastery on the summit of the hill. Notices of the place occur in the travellers of the 14th, 16th, and 17th centuries; nor are they all so meagre as Dr. Robinson conceives. That of Morison, for instance, is full and exact (*Voyage du Mont Sinai*, pp. 230-233). Scarcely any traces of the earlier or later Samaria could then be perceived, the materials having been used by the in-

habitants for the construction of their own mean dwellings. The then residents were an extremely poor and miserable set of people. In the 18th century the place appears to have been left unexplored; but in the present century it has often been visited and described.

The Hill of Samaria is an oblong mountain of considerable elevation, and very regular in form, situated in the midst of a broad deep valley, the continuation of that of Nabulus (Shechem), which here expands into a breadth of five or six miles. Beyond this valley, which completely isolates the hill, the mountains rise again on every side, forming a complete wall around the city. They are terraced to the tops, sown in grain, and planted with olives and figs, in the midst of which a number of handsome villages appear to great advantage, their white stone cottages contrasting strikingly with the

459. Samaria : Church of St. John.

verdure of the trees. 'The Hill of Samaria' itself is cultivated from its base, the terraced sides and summits being covered with corn and with olive-trees. About midway up the ascent the hill is surrounded by a narrow terrace of level land, like a belt; below which the roots of the hill spread off more gradually into the valleys. Higher up, too, are the marks of slight terraces, once occupied, perhaps, by the streets of the ancient city. The ascent of the hill is very steep, and the narrow foot-path winds among the mountains through substantial cottages of the modern Sebestieh (the Arabic form of Sebaste), which appear to have been constructed to a great extent of ancient materials, very superior in size and quality to anything which could at this day be wrought into an Arab habitation. The first object which attracts the notice of the traveller, and at the same time the most conspicuous ruin of the place, is the church dedicated to John the Baptist, erected on the spot which an old tradition fixed as the place of his burial, if not of his martyrdom. It is said to have been built by the Empress Helena; but the architecture limits its antiquity to the period of the Crusades, although a portion of the eastern end seems to have been of earlier date. There is a blending of Greek and

Saracenic styles, which is particularly observable in the interior, where there are several pointed arches. Others are round. The columns follow no regular order, while the capitals and ornaments present a motley combination, not to be found in any church erected in or near the age of Constantine. The length of the edifice is 153 feet long inside, besides a porch of 10 feet, and the breadth is 75 feet. The eastern end is rounded in the common Greek style; and resting, as it does, upon a precipitous elevation of nearly 100 feet immediately above the valley, it is a noble and striking monument. Within the enclosure is a common Turkish tomb; and beneath it, at a depth reached by 21 stone steps, is a sepulchre, three or four paces square, where, according to the tradition, John the Baptist was interred after he had been slain by Herod. This tradition existed in the days of Jerome; but there is no earlier trace of it: and if Josephus is correct in stating that John was beheaded in the castle of Machærus, on the east of the Dead Sea (*Antiq.* xviii. 5. 2), his burial in Samaria is very improbable.

On approaching the summit of the hill, the traveller comes suddenly upon an area, once surrounded by limestone columns, of which fifteen are still standing and two prostrate. These columns form two rows, thirty-two paces apart, while less than two paces intervene between the columns. They measure seven feet nine inches in circumference; but there is no trace of the order of their architecture, nor are there any foundations to indicate the nature of the edifice to which they belonged. Some refer them to Herod's temple to Augustus, others to a Greek church which seems to have once occupied the summit of the hill. The descent of the hill on the W.S.W. side brings the traveller to a very remarkable colonnade, which is easily traceable by a great number of columns, erect or prostrate, along the side of the hill for at least one-third of a mile, where it terminates at a heap of ruins, near the eastern extremity of the ancient site. The columns are sixteen feet high, two feet in diameter at the base, and one foot eight inches at the top. The capitals have disappeared; but the shafts retain their polish, and, when not broken, are in good preservation. Eighty-two of these columns are still erect, and the number of those fallen and broken must be much greater. Most of them are of the limestone common to the region; but some are of white marble, and some of granite. The mass of ruins in which this colonnade terminates toward the west is composed of blocks of hewn stone, covering no great area on the slope of the hill, many feet lower than the summit. Neither the situation nor extent of this pile favours the notion of its having been a palace; nor is it easy to conjecture the design of the edifice. The colonnade, the remains of which now stand solitary and mournful in the midst of ploughed fields, may, however, with little hesitation, be referred to the time of Herod the Great, and must be regarded as belonging to some one of the splendid structures with which he adorned the city. In the deep ravine which bounds the city on the north there is another colonnade, not visited by Dr. Robinson, but fully described by Dr. Olin (*Travels*, ii. 371-373). The area in which these columns stand is completely shut in by hills, with the exception of an opening on the north-east; and so peculiarly sequestered is the situation, that it is only visible

SEASTE  
(ANCIENT CAPITAL OF SAMARIA.)

A & P. Clark, Edinburgh.

from a few points of the heights of the ancient site, by which it is overshadowed. The columns, of which a large number are entire and several in fragments, are erect, and arranged in a quadrangle, 196 paces in length, and 64 in breadth. They are three paces asunder, which would give 170 columns as the whole number when the colonnade was complete. The columns resemble in size and material those of the colonnade last noticed, and appear to belong to the same age. These also probably formed part of Herod's city, though it is difficult to determine the use to which the colonnade was appropriated. Dr. Olin is possibly right in his conjecture, that this was one of the places of public assembly and amusement which Herod introduced into his dominions (Robinson, *Researches*, iii. 136-149; Olin, *Travels*, ii. 366-374; Buckingham, *Travels in Palestine*, pp. 512-517; Richardson, *Travels*, ii. 409-413; Schubert, *Morgenland*, iii. 156-162; Raumer, *Palästina*, p. 158; Maundrell, *Journey*, pp. 78, 79).—J. K.

**SAMARIA, KINGDOM AND PROVINCE OF.** The political history of the kingdom of which Samaria was the capital has been given under the word **ISRAEL**. It is intended in this article briefly to explain the geographical meaning attached to the term Samaria by some of the sacred writers, as well in the O. T. as in the N. T.

'The cities of Samaria' are mentioned in such a way in 1 Kings xiii. 32 as shows that the kingdom of Israel, including the whole country over which Jeroboam ruled, was meant. It then embraced the territories of all the tribes except Benjamin, Judah, Simeon, and that portion of Dan which had originally been allotted to Judah. Consequently Samaria, as a geographical term, was at that time applied to the whole of Palestine east of the Jordan, and to all west of that river and north of the parallel of Bethel. In this sense it is used by Hosea—'Thy calf, O Samaria, hath cast thee off;' alluding to the images which Jeroboam had set up at Dan and Bethel, on the northern and southern extremities of his kingdom. In like manner, Amos speaks of 'the mountains of Samaria' (iii. 9; cf. iv. 1).

The name was borrowed from the capital city; and the country embraced under it became more and more limited in extent, as section after section was lopped off Jeroboam's old kingdom. The territory 'beyond Jordan' was invaded first by Pul, and thirty years later by Tiglath-pileser, kings of Assyria, and the Israelites taken captive. The country beyond Jordan was thus taken from under the jurisdiction of Samaria, and was no more called by its name (1 Chron. v. 26; cf. 2 Kings xv. 19, 29). It received the distinctive appellation *Peræa*. Tiglath-pileser also invaded northern Palestine, captured the province of Galilee, and removed its old inhabitants to Assyria (2 Kings xv. 29). This section was then cut off from the kingdom of Israel, and no longer bore the name Samaria. This name was thus confined, after the conquests of Tiglath-pileser, to the central portion of Palestine lying between Judah and Galilee (B.C. 738).

On the capture of the city of Samaria, and the final overthrow of the kingdom of Israel by Shalmaneser (B.C. 721), the Jews were removed, and strangers were brought from Assyria 'and placed in the cities of Samaria' (2 Kings xvii. 24; cf. Ezra iv. 10). These colonists took the name of

their new country, and were thenceforth called **SAMARITANS**. Instead of a kingdom, Samaria now became a province. Its extent cannot be exactly ascertained. The political geography of Palestine was undergoing changes every year, in consequence of incessant wars and conquests; and it was not until the period of Roman dominion that the boundaries of provinces began to be accurately defined.

To distinguish the province from the city, the former is called in the apocryphal writings and in Josephus *Σαμαρείτις*, and also *Σαμαρίς* and *Χώρα Σαμαρείων*. Josephus describes the province as follows:—'The district of Samaria lies between Judæa and Galilee. Commencing at a village called Ginea, situated in the Great Plain, it terminates at the territory of the Acrabatenes. In its natural characteristics it differs in no respect from Judæa, hills and plains being interspersed through both—the soil, moreover, being arable and extremely fertile, richly wooded and amply supplied with fruits both wild and cultivated' (*Bell. Jud.* iii. 3, 4). Ginea is identical with the modern Jenin, on the southern side of the plain of Esdraelon. It is evident, therefore, that the northern border of Samaria ran along the foot of the mountain-range, beginning at the promontory of Carmel on the west, and terminating at the Jordan, near the site of Succoth. Its southern border would probably correspond pretty nearly to a line drawn from Joppa eastward through Bethel to the Jordan (see Reland, *Pal.* p. 192). The geographical position of the province is several times incidentally mentioned in the N. T. Thus in Luke xvii. 11 it is stated that our Lord, in proceeding to Jerusalem from Northern Palestine, 'passed through the midst of Samaria;' and again, when he left Judæa and went to Galilee, St. John says, 'He must needs go through Samaria' (iv. 4). And so, when Paul and Barnabas were sent on a special mission from Antioch to Jerusalem, 'they passed through Phenice and Samaria' (Acts xv. 3). They followed the road along the sea-coast, doubtless calling at the great cities of Sidon, Tyre, and Cæsarea.

After the time of Roman rule in Syria, the name of Samaria as a province appears to have passed away. It is used by Pliny and Ptolemy, and is mentioned by Jerome. It is not found, however, in the *Notitie Ecclesiastica*, nor in any later work; and it is now wholly unknown to the natives of the country. The name of the ancient city has even given place to the Arabo-Greek *Sebustieh*.

See for fuller information on physical geography, history, and topography, the article **PALESTINE**.—J. L. P.

**SAMARITANS.** The word Samaritan occurs but once in the O. T.—viz. 2 Kings xvii. 29. In the N. T. it is applied, strictly speaking, to the people or sect who had established an independent worship of their own in a temple or synagogue at Nablûs. In the books of Kings it has a wider signification. The origin of the people so designated is somewhat obscure, on account of the scanty details of them supplied by the O. T. Two points have been discussed in relation to them—viz. Were all the inhabitants carried away from the cities and villages of Samaria in 721 B.C., by Shalmaneser king of Assyria? and, Who colonised the depopulated district? In 2 Kings xvii. 5, 6, we read: 'Then the king of Assyria came up

throughout all the land and went up to Samaria and besieged it three years. In the ninth year of Hosea, the king of Assyria took Samaria and carried Israel away into Assyria and placed them in Halah and in Habor, by the river of Gozan, and in the cities of the Medes.' By *Israel* is here meant the remnant of the ten tribes which acknowledged the authority of Hosea; for Pul and Tilgath-pileser had depopulated the territory before. Hengstenberg, and those who follow him, argue that the Israelites were removed to the last man by Esarhaddon, because it is said in 2 Kings xvii. 24 that other peoples were placed in the land *instead of the children of Israel*; because the petition of the heathen colonists implies (2 Kings xvii. 26) that there was no one in the land who could give them the rudest notion of the way and manner of worshipping the God of the land; because the prophetic expressions relating to the destruction of the ten tribes represent the members as completely carried away (Jer. iii. 30, 31; Zech. x.); and because they did not assert their Israelitish origin, in Ezra iv. 3. The same critic calls special attention to Sirach l. 25, 26, contending that the passage corroborates his view, since the inhabitants of the mountains of Samaria (the Israelites) are there represented as perfectly distinct from the people who dwell in Sichem (the Samaritans). The climax, he tells us, is conceivable only on the supposition of the entirely heathen origin of the Samaritans. He refers also to Sirach xlviii. 15, 'according to which the Israelites had been completely carried away;' to 2 Maccab. vi. 2; and to Josephus's testimony (*Antiq.* x. 9. 7). The name *Cuthites*, prevalent in Josephus's time and commonly used in the Talmud, is said to confirm the same conclusion. The notices of the Samaritans in the N. T. are adduced and commented upon with a like object by Hengstenberg. Whatever plausibility belongs to this argument, and it cannot be denied that it has some such character, we believe it to be weak and unsound. From 2 Kings xvii. 24 it cannot be inferred that the Israelites were removed to the last man, because we learn from 2 Chron. xxxiv. 9 that a remnant of Israel existed in the cities of Manasseh, Ephraim, and Simeon, of whom the Levites collected money for the repair of the temple, in Josiah's reign. The same king sent to search the houses in the cities of Manasseh, and Ephraim, and Simeon, even as far as Naphtali, and to destroy the high places and idolatrous altars in the land (2 Chron. xxxiv. 6, 7); showing that there was still a remnant of the Israelites in the land after the times of Esarhaddon, that had not been carried away. Besides, according to 2 Chron. xxx., Hezekiah sent an invitation to the escaped who remained from the hand of the king of Assyria in the country of Ephraim and Manasseh, even to Zebulun, to take part in the passover at Jerusalem. It is probable that this event belongs to the time after the final destruction of the kingdom of Israel; at all events, Hengstenberg admits that it was subsequent to the devastation by Shalmaneser. All that the words in 2 Kings xvii. 24 prove is, that the colonists who had been transplanted thither took the place of the deported Israelites as owners of the soil. The Israelites were no longer the chief inhabitants. The petition of the heathen colonists does not show that the last remnant had been removed by the Assyrians. From the removal of all the *priests*, it does not follow that all

the *inhabitants* had been carried away; and the petition of the inhabitants merely speaks of sending a *priest* of whom it was thought that he alone could offer worship acceptable to a local deity. The people wanted priests to teach them the right worship of the God of the land; nor is aught said of giving the inhabitants the rudest idea of the manner of worshipping such a deity. According to the analogy of similar deportations, such as that of Judah by Nebuchadnezzar, we must suppose that *the principal* inhabitants of Israel—those fit for war, the priests, and others—were carried away; leaving the poor, weak, and aged, in the country districts, who had little or nothing to do with war. The prophetic expressions in Jeremiah and Zechariah speak only of the Israelites as a whole, of their rejection and banishment. The fact that the Samaritans in Ezra iv. 1, etc., do not mention their Israelitish origin is easily explained, because heathen blood had overpowered the Israelitish element. Had the latter retained its distinctive existence they would probably have referred to their origin; but as it had become almost extinct, the wiser policy was to make no allusion to descent. The very fact, however, of their application for admission to the national worship of the Jews, and all their subsequent history in connection with this people, imply an Israelitish element in their origin. Had they been of pure heathen descent, what propriety was there in the application? What had they to do with Jewish worship, on the supposition that they were mere heathens?

It is unnecessary to follow the line of Hengstenberg's argument farther, through Sirach, Macabees, and the N. T. Kalkar has entirely destroyed whatever weight might be supposed to attach to it. We shall therefore content ourselves with referring to him (*Theologische Mittheilungen* by Pelt, Mau, and Dörner, for 1840; *Drittes Heft*. p. 24, et seq.). The people in their origin were a mixed race. Doubtless the heathen element prevailed, because the colonists were greatly superior in numbers. When they came they found none but the dregs of the populace, whom the victors had left. All power was in the hands of the colonists. It is useless to refer to authorities in favour of the purely Assyrian origin of the people. Hengstenberg quotes Mill, Schultz, R. Simon, Reland, and Elmacin. To this list others add Suicer, Hammond, Drusius, Maldonatus, Hävernicks, and Robinson. In ancient times, Josephus, Origen, Eusebius, Epiphanius, Chrysostom, and Theodoret, are quoted on the same side. But weightier names are on the other. Three alone, De Sacy, Gesenius, and Winer, are sufficient to outweigh a host. How is it that the Samaritans always claimed descent from Ephraim and Manasseh? Have they been continuous liars in making this pretension? So Hengstenberg would persuade us. If so, their history proves an unaccountable imposture. Was there ever before a heathen people so desirous to unite with the worshippers of the true Jehovah, as to become implacable enemies to their recusants? Can a refusal of their participation in the national worship at Jerusalem have led, in the main, to such opposition and lying pretensions?

We come now to the second point—viz., Who colonised the depopulated district? It is plain that Shalmaneser was the Assyrian king who completed the destruction of Israel as a kingdom. Did he also colonise it? The narrative in 2 Kings xvii.

24 would lead one to suppose that Shalmaneser is the king of Assyria intended, because he is spoken of in the preceding context as the deporting king. So Josephus understood the matter. But when we compare Ezra iv. 2, we see that Esarhaddon brought the colonists into the land. It is possible that Shalmaneser may have brought one part of the colonists into the land and Esarhaddon another. So some solve the apparent contradiction. But the assumption is far-fetched. There is no trace in the O. T. of a double transplanting of colonists. Neither does the context necessarily lead to the conclusion that Shalmaneser effected their introduction. We suppose, therefore, that Esarhaddon is meant by the king of Assyria in 2 Kings xvii. 24; and thus the narrative harmonises with the account which the Samaritans themselves give in Ezra iv. We can only agree with Hengstenberg so far as to hold that Esarhaddon colonised Samaria. That after his time there were none but heathens in the land cannot be maintained. He invaded Samaria a second time, and completed the depopulation which his grandfather had begun.

The new inhabitants of Samaria carried along with them their idolatrous worship. In the early period of their settlement they were attacked by lions, which they regarded as a judgment inflicted by the deity of the land, whom they did not worship. Accordingly they applied to the Assyrian king Esarhaddon for an Israelitish priest to teach them the proper worship of the local god. The request was granted. One of the transported priests was despatched to them, who came and dwelt at Bethel, and instructed them in the worship of Jehovah. He was not a Levitical priest, but an Israelitish priest of the calves; because there had been no Levitical ones in the kingdom when the inhabitants were carried away; and because Bethel, where he settled, was the chief seat of the calf-worship. On the return of the Jews from their Babylonish captivity, the Samaritans wished to join them in rebuilding the temple at Jerusalem, saying, 'Let us build with you: for we seek your God as ye do; and we do sacrifice unto him since the days of Esarhaddon, king of Assur, which brought us up hither' (Ezra iv. 2). But the proffered assistance was declined. Thenceforward they threw all obstacles in the way of the returned exiles. Nor were their efforts to frustrate the operations of the Jews entirely unsuccessful. Two Persian kings were induced to hinder the Jews in their rebuilding; and their opposition was not finally overcome till the reign of Darius Hystaspes.

The enmity which began at the time when the co-operation of the Samaritans in rebuilding the temple was refused, continued to increase till it reached such a height as to become proverbial in after times. In the reign of Darius Nothus, one Manasseh, of priestly descent, was expelled from Jerusalem by Nehemiah for an illegal marriage, and took refuge with the Samaritans. Whether the temple on Mount Gerizim was actually built in the days of Manasseh is doubtful. Probably he laboured to unite the people in a common worship. The temple does not seem to have been erected till the time of Alexander the Great, who gave permission to build it. If so, it did not exist till about 100 years after Manasseh. It is difficult to make a consistent and clear account of the matter out of Josephus, who has evidently fallen into error, since he is inconsistent with Neh. xiii. 28,

etc. The establishment of a separate worship and temple made the breach existing between the Jews and Samaritans irreparable. From this time malcontent Jews resorted to Samaria; and the very name of either people became odious to the other. About the year 129 B.C., John Hyrcanus, high-priest of the Jews, destroyed the city and temple of the Samaritans. Under Vespasian the city of Sichem received the new name of Neapolis, which still remains in the Arabic form Nablus. At the time of Pilate a tumult was excited among the Samaritans by an adventurer, who persuaded the common people to follow him to the summit of Gerizim, where he pretended that Moses had buried the golden vessels. But Pilate dispersed the multitude with troops, and put the heads of the sedition to death. In consequence of the Samaritans complaining of his conduct to Vitellius, Pilate was deposed and sent to Rome. Josephus relates that while Vespasian was endeavouring to subjugate the neighbouring districts, the Samaritans collected in large numbers and took up their position on Mount Gerizim. The Roman general attacked and slew 11,600. Under Septimius Severus they joined the Jews against him; and therefore Neapolis was deprived of its rights. In the 3d and 4th centuries, notwithstanding their former calamities, they seem to have greatly increased and extended, not only in the east but the west. In the 5th century a tumult was excited at Neapolis, during which the Samaritans ran into the Christian church which was thronged with worshippers, killing, maiming, and mutilating many. The bishop Terebinthus having repaired to Constantinople, and complained to the emperor, the latter punished the guilty by driving them from Mount Gerizim and giving it to the Christians, where a church was erected in honour of the Virgin. Under Anastasius an insurrection headed by a woman broke out, and was soon suppressed. Under Justinian there was a more formidable and extensive outbreak. It is related that all the Samaritans in Palestine rose up against the Christians, and committed many atrocities, killing, plundering, burning, and torturing. In Neapolis they crowned their leader Julian king. But the imperial troops were sent against them; and great numbers, with Julian himself, were slain. In the time of the Crusaders Neapolis suffered, along with other places in Palestine. In 1184 it was plundered by Saladin. After the battle of Hattin, in 1187, it was devastated; and the sacred places in the neighbourhood were polluted by Saladin's troops. Having been several times in the hands of the Christians, it was taken by Abu 'Aly in 1244; since which it has remained in the power of the Mohammedans. No Christian historian of the Crusades mentions the Samaritans; but they are noticed by Benjamin of Tudela in the 12th century, who calls them Cuthites or Cutheans. In the 17th century Della Valle gives an account of them; subsequently Maundrell and Morison. After an interest in the people had been awakened by the reception of copies of their Pentateuch, their answers to the letters which Joseph Scaliger had sent to their communities in Nablus and Cairo came into the hands of John Morin, who made a Latin translation of them. The originals, and a better version, were published by De Sacy in Eichhorn's *Repertorium*, Band xiii. In 1671 a letter was sent by the Samaritans at Nablus to Robert Huntington, which was answered by Thomas Marshall of

Oxford. The correspondence thus begun continued till 1688. De Sacy published it entire in *Correspondance des Samaritains*, contained in *Notices et extraits des MSS. de la Bibliothèque du Roi*, vol. xii. The correspondence between Ludolf and the Samaritans was published by Cellarius and Bruns; and is also in Eichhorn's *Repertorium*, Band xiii. In 1807 a letter from the Samaritans to Gregoire the French bishop came into De Sacy's hands, who answered it. This was followed by four others, which were all published by the eminent French orientalist. In recent times many travellers have visited and given an account of the Samaritan remnant, such as Pliny Fisk, Robinson, and Wilson. One of the late notices is that of M. E. Rogers, in *Domestic Life in Palestine*, 1863, 2d ed. ch. x. Another and fuller account is given in Mills's *Three months' residence in Nablus, and an account of the modern Samaritans*, 12mo, 1864; see also Barges' *Les Samaritains de Naplouse*, 1855, Svo, Paris. Their festivals and customs are described by Petermann, who spent two months in that locality (article 'Samaria' in Herzog's *Encyclopaedie*, vol. xiii.) Mr. Grove has given an account of the ceremonial of their atonement in *Vacation Tourists for 1861*; and Stanley, of their passover, in *Lectures on the Jewish Church*, appendix iii. The people are very poor now, and their number small, less than 200. To all appearance their total extinction is not far distant.—S. D.

**SAMARITAN PENTATEUCH.** This recension of the first five books of the O. T. was mentioned or alluded to by early writers, by Cyril of Alexandria, Eusebius, Jerome, Diodorus, Procopius of Gaza, and others. Having been afterwards unnoticed, its existence began to be doubted, till Pietro della Valle, in 1616, obtained a complete copy from the Samaritans in Damascus. De Sancy, who was then French ambassador at Constantinople, sent it to the library of the Oratoire in Paris, in 1623. It was first described by J. Morin in his preface to the Septuagint, and then printed in the Paris Polyglott. From this Polyglott Walton inserted it, with several improvements, in his London one. Meantime Ussher had procured six additional copies from the East, five of which were sent to various libraries in England, and the sixth to Le Dieu. In the time of Kennicott, the number had increased to sixteen, which were collated for his Hebrew Bible. Another is in the library of Gotha, and another in the library of the count of Paris.

These MSS. are written partly on parchment, etc., partly on paper made of linen or cotton. Their sizes are folio, quarto, octavo, and duodecimo. They have no vowels, accents, or diacritic points. The words are divided, not merely by a space but by an intervening point. A period is distinguished by one point above another (:); though one is also used, and three are put at other times (..). Two points placed lengthwise (..) indicate a continuation of the narrative without delay, after a brief respiration; corresponding to a colon. These signs, however, are arbitrary and variable; nor are they identical in all MSS. Sections or paragraphs are marked by = : or - : or = { or - { or - : or - :; the most frequent being = :, and next to it - :. But occasionally a number of these are put together. The scribes often put a small line over a letter to mark an unusual signification, or some doubt, or the absence of

a letter. Sometimes a double line is placed above a word the meaning of which is unknown. Besides these marks, others occur to express interrogation, exclamation, irony, indignation, entreaty, and other emotions; but they are not found constantly in the same MS., and are either varied or omitted in different ones. The Masoretic division into sedarim and parshioth is not found, but another one into shorter sections which the Samaritans call *katzin*. Of these there are 964 in the whole law; whereas the Jews have 154 sedarim, and 54 parshioth. At the end of each book is appended the number of its sections. The Samaritans also count the words like the Jews; and mark the middle of the law accordingly at Lev. vii. 15. The *matres lectionis* are more numerous than in the Hebrew Pentateuch; and a frequent characteristic mistake is the interchange of gutturals.

The age of these MSS. is as difficult of ascertainment as that of Hebrew ones, because the dates in them cannot always be relied upon; and in their absence internal criteria are uncertain. The oldest known to Kennicott was supposed to belong to the 8th century (No. 334). If an ancient roll could be procured, more value would attach to its text; but none has yet come into the hands of Christians. The following is a list of the MSS. known to scholars:—

1. The oldest MS. of which we have any knowledge is the sacred roll of the Samaritans, which is shown to believers on certain festivals in their synagogue at Nablûs. It consists of twenty-one skins of unequal size, most containing six, but some only five columns. The columns are 13 inches deep and  $7\frac{1}{4}$  inches wide. Each contains from 70 to 72 lines, and the entire roll has 110 columns. Owing to various causes, it is now in a bad state of preservation, so that only about half the contents are legible. A *târfch* or notice in the roll itself states that it was made by Abischa, son of Phinehas, son of Eleazar, son of Aaron, on mount Gerizim, in the 13th year after the Israelites had got possession of the land of Canaan. Dr. Rosen is inclined to believe that the roll in question was prepared for the temple which was built upon Gerizim. This, however, may be doubted; though its high antiquity is unquestionable. It seems to have been a primitive and authoritative codex, from which others were copied. A kind of fac-simile of it is given by Rosen, who was indebted to Kraus for the various particulars regarding it which he has communicated to the public (see the *Zeitschrift der deutschen morgenländischen Gesellschaft*, Band xviii. 3 Heft, p. 582, *et seq.*) Mr. Mills also saw it, and noted a few particulars respecting it, which do not all agree with those given by Kraus.

2. Levisohn procured a very old copy from Nablûs, which was probably written not long after the commencement of the Christian era. The 20th chapter of Exodus is given from it in fac-simile by this scholar. The codex seems to be very old, since it wants the numbering of the ten commandments, which the Samaritans reduce to nine. The story connected with it is, that it is the identical Thorah which Zerubbabel threw into the fire before the Babylonian king, when he disputed with Sanballat.

3. Another codex was seen by Levisohn and Kraus at Nablûs, which probably reaches up to the 7th century of the Christian era, and of which a

fac-simile is given by Rosen. This codex also wants the numbering of the commandments. The MS. itself, which is in 8vo, has a tårch or gloss, stating that it belongs to the 35th year of the Hegira.

4. A fac-simile from another codex, in folio, which is also at Nablús, is given by Rosen.

5. At Oxford, Bodl., fol., 3127 (Ussher). This is perfect, except the first twenty and the last nine verses.

6. At Oxford, Bodl., 4to, 3128 (Ussher). This MS. has a parallel Arabic version in Samaritan letters. It is very imperfect, all Leviticus being lost, with the greater part of Numbers and Deuteronomy.

7. At Oxford, Bodl., 4to, 3129 (Ussher). This is also imperfect, especially in Deuteronomy and Numbers.

8. At Oxford, Bodl., 4to, 624 (Ussher, Laud). This is defective from Deut. xvii. 2 to xvii. 15, and from xxv. 17 to xxvi. 16.

9. At Oxford, Bodl., 12mo, 15 (Marsh). This MS. wants the first thirty verses; and is much obliterated in the first seventeen and last four chapters.

10. At Oxford, Bodl., 24mo, 5328 (Pococke). A perfect MS., except that parts of the leaves are lost in the 16th, 23d, 30th, and 31st chapters of Deuteronomy.

11. At London, British Museum, Claud. B. 8vo (Ussher). This MS. is complete, and of great value.

12. At Paris, Imperial Library (Peiresc), No. 1. This codex contains both the Hebrew and Samaritan texts, with an Arabic version in the Samaritan character. It is defective in various places.

13. At Paris, Imperial Library (Peiresc), No. 2. This MS. is defective in many parts.

14. At Paris, Oratory, No. 1 (De Sancy). This is the MS. of Pietro della Valle, which was printed by Morin. It is complete, and ancient.

15. At Paris, Oratory, No. 2 (Dom. Nolin). A perfect MS., but made up from sheets of different copies. Genesis is the most ancient.

16. At Paris, in the Library of St. Genevieve, written on paper, and of small value.

17. At Rome, Vatican, No. 106 (Peir. and Barber.) This MS. contains the Hebrew and Samaritan texts, with an Arabic version in the Samaritan character. It is very defective in two or three places. The first part, to Deut. xi. 28, was written earlier than the rest.

18. At Rome, Vatican (Cardinal Cobellertius). Dated, like the preceding, in the 7th century, but not so old.

19. At Milan, in the Ambrosian Library. It is much faded in Genesis, and defective in many places, but of special value, and belongs to the 12th century.

20. At Leyden, fol., 1 (Golius's MSS.) A complete MS. of the 14th century.

21. At Gotha, in the Ducal Library. Very imperfect.

22. At London, in the Count of Paris's Library, 4to. Said to be complete, with a parallel Samaritan version.

The texts of these MSS., as far as we know them by inspection, or by collations more or less careful, differ considerably from one another. They are by no means so uniform as those of Hebrew codices. It is matter of regret that they

have not been *properly* collated. Little has been done towards their examination since Kennicott's time.

With respect to the authority and value of the Samaritan Pentateuch, the opinions of scholars are nearly unanimous at the present day. Morin was the first to maintain the great superiority of the Samaritan over the Hebrew recension. His *Exercitationes* opened up a controversy, which was carried on with much zeal and little calmness on both sides. In 1815, Gesenius published his celebrated *Dissertation*, in which he showed that little value belongs to the text, that no critical reliance can be placed upon its readings, and that therefore they cannot be employed as a source of emendation. This masterly essay went far to ruin the credit of the Samaritan in the critical world.\* According to Gesenius, the peculiarities of the text may be divided into the following classes:—

I. This class comprises such readings as have been adapted by Samaritan scribes to a grammatical standard usually inaccurate.

In *orthography*, the quiescent letters, or *matres lectionis*, are inserted, as י for ך (Gen. i. 14, 16).

In the case of *pronouns*, their unusual forms are constantly corrected, as הנחבו for נחבו, הרמה for מה, etc.

As to *verbs*, the shorter or apocopated future is changed into the long one; thus for ותניד is put

ותניד.

In regard to *nouns*, the paragogic י and ו appended to the noun in regimen are omitted, as שובני for שובני.

Genders are also corrected, nouns common being made masculine or feminine as the scribe thought fit. For example, לחם is made masculine (Gen. xlix. 20).

With respect to the *syntax of verbs*, the infinitive absolute is altered into a finite verb, as in Gen. viii. 3. Where the verb is singular with a plural noun, it is almost always changed into the plural, as in Gen. iv. 10.

II. The second class consists of interpretations or glosses received into the text. These are numerous, many of them being also in the LXX.

An example occurs in Gen. xx. 3, where for על העל the Samaritan has על אורח האשה.

III. The third class consists of readings substituted to remove real or imaginary difficulties from the text. Thus, instead of מביני רגליו, *from between his feet*, the Samaritan reading is מבין רגליו, *from among his banners* (Gen. xlix. 10).

\* In a recent work by Mr. Mills entitled *Three months' residence at Nablus and an account of the modern Samaritans*, we find these words applied to the essay in question—'A more unfounded and reckless performance has seldom issued from the press.' One example only is given to justify the strong language used; in which, however, the critic of Gesenius makes that scholar say what he does not, totally misapprehending or misreading his real statement. We submit that a writer who asserts that the Jews divided the law into fifty-four *sedroth* and each *sederah* (sic) into seven *parshioth*, is incompetent to judge of the relative value of the Hebrew and Samaritan copies of the Pentateuch.

IV. The fourth class consists of those readings where the Samaritan is corrected or supplied from parallel passages. Proper names, which are variously written in Hebrew, are all conformed to one orthography, as יְתֵרוֹ, Moses's father-in-law. In Gen. xi. 8, *and the tower*, is added to the Hebrew text, taken from the fourth verse.

V. The fifth class consists of larger interpolations taken from parallels, in which, whatever was said or done by Moses as recorded in a preceding passage is repeated; and whatever is said to have been commanded by God is repeated in as many words where it is recorded to have been carried into effect. In this way Exodus is much enlarged by interpolations from itself, or from Deuteronomy. Gesenius thinks that these insertions were made between the date of the Septuagint and Origen, because the Alexandrian father mentions a passage of the kind.

VI. The sixth class consists of corrections made in order to remove what was offensive in sentiment to the Samaritans, or what conveyed an improbable meaning in their view. Thus in the antediluvian times, none begets his first son after he is 150 years of age. Hence, from Jared, Methuselah, and Lamech, 100 years are subtracted at the time they are said to have their first son. In the post-diluvian times, none is allowed to beget a son till after he is 50 years old. Accordingly, some years are subtracted from several patriarchs and added to others. Under this head falls the passage Exod. xii. 40, 'Now the sojourning of the children of Israel who dwelt in Egypt was 430 years.' The Samaritan has, 'The sojourning of the children of Israel and their fathers who dwelt in the land of Canaan and in the land of Egypt was 430 years.' The same reading is in the Septuagint (cod. Alex.) In Gen. ii. 2, הַשָּׁמַיִם is altered into הַשָּׁמַיִם the sixth.

VII. Passages which have been conformed to the theology, hermeneutics, and worship of the Samaritans. Thus, to avoid the appearance of polytheism, the four passages where Elohim is construed with a plural are altered so as to present the singular (Gen. xx. 13; xxxi. 53; xxxv. 7; Exod. xxii. 9). Again, whatever savours of anthropomorphism, or is unsuitable to the divine majesty, is either removed or softened. Wherever the Almighty himself is brought immediately into view as speaking to and dealing with men, the *angel of God* is substituted. Reverence for the patriarchs and Moses led to the alteration of Gen. xlix. 7 and Deut. xxxiii. 12; for example, for *cursed is their anger*, the Samaritan reads, *excellent is their anger*; and instead of *the beloved of the Lord shall dwell*, it has, *the hand, the hand of the Lord makes him to dwell*, which yields no sense. In like manner, *voices honestiores* are sometimes put when there is fancied immodesty, as in Deut. xxv. 11 כַּמְבִּשָּׁיו is changed into בִּבְשָׁרוֹ.

Here Gesenius puts the notable passage Deut. xxvii. 4, where the Samaritans changed *Ebal* into *Gerizim* to favour their own temple. Some have attempted to show that the Jews changed Gerizim into Ebal, but unsuccessfully.

Another classification of the Samaritan characteristic readings is given by Kirchheim. He makes thirteen classes, as follows:—

1. תוספות והשנויים למעלה הר גריזים, additions and alterations in favour of Mount Gerizim.

2. תוספות למלאות, additions to fill up.

3. הבאור, explications or glosses.

4. חלוק הפעלים והבנינים, change of verbs and conjugations.

5. חלוק השמות, change of nouns.

6. השואה, assimilation, or bringing irregular forms into the same uniform type.

7. תמורת האותיות, permutation of letters.

8. בנינים, pronouns.

9. המין, gender.

10. אותיות הנוספות, letters added.

11. אותיות היחס, addition of qualifying letters, as articles, conjunctions, prepositions.

12. הקבץ והפרוד, junction and separation.

13. ימות עולם, chronological alterations (*Carmi Shomeron*, p. 32, seq.)

This classification is by no means so good as that of Gesenius, being inferior to the latter in clearness and comprehension.

Frankel has treated of the subject more by way of supplement to Gesenius than from an independent point of view. His additions to the classes of the latter are small and unimportant, besides being pervaded by erroneous conceptions of the age when the Samaritan Pentateuch originated. He alludes—1. To the use of the imperative for the third person, as יִקְרַב for יָקֵר (Exod. xii. 48); and to ignorance of the use of the infinitive absolute, as זָכַר for זָכְרָה (Exod. xiii. 3), אָמַר for אָמַר (Num. vi. 23), etc. 2. The characteristics of the Galilean-Palestinian dialect, such as the interchange of the *Ahevi* letters, and of ב for פ, of ז for צ, etc. But this peculiarity is simply owing to carelessness of transcription in the copyists, who wrote as they pronounced, and softened the hard gutturals which were difficult to their organs. 3. The Aramean colouring and ortho-

graphy, as קָטַל and קָטַל. This is likewise owing to transcription, and can hardly be called a characteristic of the Samaritan.

Are there then, it may be asked, no readings in the Samaritan recension preferable to those in the Hebrew?

Gesenius specifies four examples of this sort—viz. Gen. iv. 8, where the Samaritan adds, 'Let us go into the field'; Gen. xxii. 13, אַחֵר, *a* instead of אַחֵר, *behind*; Gen. xlix. 14, where נֶרֶם, *a bone*, is קֶרֶם, *bony*; and Gen. xiv. 14, וַיִּדַּק, instead of וַיִּרְקַח, i.e. *he numbered*, for *he led forth*. Even these have been thought emendations, and rejected by the majority of critics, though we prefer one of them to the Hebrew. But though Gesenius was not very happy in selecting Samaritan readings preferable to the Hebrew, it should not be denied that the one is everywhere superior to the other. There are good and valuable readings in the Samaritan which have a fair claim to be considered original, and therefore preferable to those of the Masoretic recension. The evidence of the Septuagint and other versions, in addition to that of Hebrew MSS., should not be despised when it corroborates the Samaritan. Kennicott went too far in his high estimate of the Samaritan. So did Geddes, Bauer, Jahn, and Bertholdt. But we need not proceed to the other extreme, and depreciate every characteristic reading; as some have done after Gesenius. It is sufficient to say that

the Samaritan cannot be put in comparison with the Hebrew recension, because its deviations from the latter have generally the appearance of design. The difference between the two chiefly consists in additions to the Samaritan text. And we know that insertions show design, much more than omissions. The Hebrew text is not immaculate: none can uphold its absolute integrity. If it needs emendation, why should not the Samaritan recension be taken as one source of evidence? It is not, indeed, a valuable instrument of emendation; but it is not destitute of all worth; and should be classed with the other materials on which a pure text depends. Critical conjecture must sometimes be resorted to in restoring the original text, as the best scholars admit; why then throw aside the Samaritan as more useless even than conjecture? It may sometimes suggest the right reading, if it does not give it.

As to the *age* and *origin* of the Samaritan Pentateuch, opinions have been much divided. We shall enumerate the principal ones.

1. Ussher thought that the document was the production of an impostor named Dositheus, who lived in the apostolic period, and pretended to be the Messiah. As he falsified the Pentateuch in many places, Ussher conjectured that he may have made it out of a Jewish copy and the Septuagint. But it is incorrect to assert, with Photius, that he falsified the Pentateuch. Messianic passages are not perverted in the Samaritan. And the Samaritans gave little heed to Dositheus's pretensions. How unlikely then that they would have received a compilation from his hands.

2. Le Clerc, Poncet, and others supposed that this copy of the law was made by the Israelitish priest whom the Assyrian king Esarhaddon sent to the new colony to instruct them in the worship of Jehovah. This hypothesis is unsupported by historical testimony. It was not necessary for the priest to make a new document, but to instruct the people out of the existing Pentateuch. Why should he have undertaken the superfluous task of writing a new law-book, when the old was sufficient?

3. Frankel conjectures that the document was made from the Masoretic text by additions and corruptions which took place gradually, as also from the Septuagint, subsequently to the 6th century. Against this is the testimony of Jerome (*Prefat. in Libr. Reg.\* et ad Galat.* iii. 10), which Frankel tries to evade, but most bunglingly. The Talmud itself recognises the existence of the recension; and Frankel quotes two Mishnic authors who refer to it, R. Simon ben Eleasar and R. Eleasar ben Simon. It is needless to add the testimony of Eusebius of Caesarea and other fathers. Frankel's alleged evidences of Galileanism are nugatory; and his remarks upon the document show an inability to get beyond isolated expressions and phenomena into the genius of the work itself. He has a prejudice against the people unfavourable to the investigation of truth (see *Ueber den Einfluss der Palästinischen Exegese auf die alexandrinische Hermeneutik*, p. 237, et seqg.)

4. Tychsen conjectured that the Samaritans transcribed the work from a Hebrew copy into their own character, in the 10th, 11th, or 12th century. This is clearly refuted by the testi-

monies of Origen and Jerome, who affirm that the Samaritans had the Pentateuch in peculiar characters before their times.

5. Many think that copies of the Pentateuch must have been in Israel from the time of Rehoboam as well as in Judah, and that they were preserved by the former as well as the latter. Thus the Samaritans inherited the document from the ten tribes. This opinion was first advanced by John Morin; and is that of Walton, Houbigant, Cappellus, Kennicott, Michaelis, Eichhorn, Bauer, Jahn, Steudel, Mazade, Stuart, and others.

The truth or falsehood of the view is essentially connected with the question of the authorship of the Pentateuch. If Moses wrote the five books which bear his name, it may be plausibly argued that the Samaritan recension was derived from the ten tribes; but if the Pentateuch did not originate in its present form till the time of Manasseh or Josiah, the view in question is obviously incorrect. It appears to us that the Pentateuch, as we now have it, did not originate earlier than the reign of Manasseh; and therefore the hypothesis before us must be rejected. It has no valid argument in its favour, all the considerations once urged for it having been proved weak or untenable, such as the national hatred of the two peoples, the fact that the Samaritans admitted no other books than the Pentateuch, and the old Hebrew character in which the Samaritan is written.

6. The origin of this recension must be looked for at the time when the people separated themselves for ever from the Jews, becoming an independent sect. About 409 B.C. one Manasseh, of priestly descent, having been expelled from Jerusalem by Nehemiah, betook himself to the Samaritans. It is possible that he may have carried with him the first copy of the Pentateuch which the people had; though it is more probable that they had some before. These they may have got in the time of Josiah, whose ecclesiastical reform extended farther than Judah, since we are told that under him the Levites collected money for the repair of the temple from Manasseh, Ephraim, and all the remnant of Israel (2 Chron. xxxiv. 9). Single copies of the law may have found their way there among the mixed people that dwelt in Samaria and the neighbouring parts even then. Yet none of them could have formed the normal codex; nor could there have been such a document till their temple was built and a separate worship established. An ecclesiastical code would be required then for the first time. The copy of the Pentateuch they received must have come from the Egyptian Jews directly or indirectly, since the Samaritan agrees in so many of its readings with the Septuagint against the Masoretic text. Why they did not receive the book of Joshua, as well as the Pentateuch, can only be conjectured. Those who suppose that it formed a constituent part of the Pentateuch at first, affirm that it was not separated from the preceding five books till after Ezra's time, which agrees with the date we have chosen for the Samaritan Pentateuch. Such as believe that Joshua was *not* at first connected with the other five books may say that the Samaritans did not wish for more Jewish writings than were necessary to regulate their worship. We believe that the text which constitutes the proper Samaritan, the authentic copy they assumed for the guide of their religious services, was obtained some time

\* Samaritani Pentateuchum Mosis totidem literis scriptitant, figuris tantum et apicibus discrepantes.

after the Babylonian captivity, when the temple on Gerizim was finished. The priests who went to them from Jerusalem contributed to the result in question, so that they adopted the Pentateuch as their code in the same extent, and substantially in the same form, as the Jews at Jerusalem. It is improbable that the Samaritans themselves first brought the Pentateuch with them into Egypt, as Hävernick asserts. Their recension must have been made about the end of the 4th century before Christ. It originated, unquestionably, before the Septuagint was made—i.e. before the reign of Ptolemy Lagi, or Ptolemy Philadelphus his son. The 3d century before Christ is too late a date for it. It is not indeed unlikely that after the appearance of the Greek version the Samaritans received emendations or alterations, bringing it into greater conformity to the Greek; but most of the characteristic readings belonged to it at first. It received its present form substantially prior to the LXX. Since then, there is scarcely a doubt that it has been corrupted by careless transcription, and smoothed down in many cases by the desire of regularity or ease in pronunciation. The orthography has suffered most; for there is reason to believe that the pronunciation of the Samaritans was more imperfect than that of the Jews. At the present day they read the text very differently from the latter. The view of the age belonging to the Samaritan Pentateuch now given is that of Ant. van Dale, R. Simon, Prideaux, Fulda, Hasse, Gesenius, De Wette, Hupfeld, Hengstenberg, Keil, Bleek, and others. The fact that Hengstenberg, though believing that the Pentateuch existed before the ten tribes separated from the other two, holds the post-exile origin of the Samaritan Pentateuch, shows the untenableness of a prior date.

The remarks now made on the antiquity of the Samaritan recension convey our opinion on the cause of the agreement between numerous readings of the LXX. and it. The similarity exists in above a thousand places, some of them important. It is true that the Septuagint also agrees with the Masoretic text in many passages against the Samaritan; but these discrepancies are not so striking as the coincidences of the Septuagint and Samaritan against the Hebrew. If the original Samaritan codex was an Egyptian-Jewish one, the similarity is sufficiently explained. Amid successive emendations, or corruptions as some would call them, of the Samaritan and the Greek, in addition to the mistakes made by copyists, all that can be looked for now is an agreement in the principal characteristic readings. And that is actually found. Hence we reject the numerous hypotheses which have been framed to account for the agreement in question, such as that the LXX. translated from the Samaritan, that the two documents were mutually interpolated, that the Samaritan has been merely altered from the Septuagint, etc. etc.

It is highly desirable that a critical edition of the Samaritan should be printed in the Samaritan character, from a good collation of all known MSS. Since it was inserted in Walton's Polyglott, it has not been published in its own character. Blayney's edition (Oxford 1790) is in the square or Hebrew character. Kennicott gave his various readings from the Samaritan, in his Hebrew Bible in the same letters. Levisohn published at Jerusalem, 1860, the 20th chapter of Exodus in fac-

simile from a very old MS. at Nâblus, already noticed, with some parts of the Masoretic text, a Russian version, and an Introduction; but the specimen is badly executed.

Besides the Introductions of Eichhorn, Bertholdt, Jahn, De Wette, Hävernick, Keil, and Bleek, the reader is referred to Gesenius, *De Pent. Samarit. origine, indole et auctoritate*, Halle 1815, 4to; Morini (J.), *Exercitationes in utrumque Samarit. Pentateuchum*, Paris 1631, 4to; Ussher's *Syntagma de LXX. interpretibus, epistola ad L. Cappellum*, London 1655, 4to; Poncet's *Nouveaux éclaircissements sur l'origine et le Pentateuque des Samaritains*, Paris 1760, 8vo; Le Clerc's *Sentimens de quelques theologiens de Hollande sur l'histoire critique du R. *Samaritan Version of the Pentateuch.*—This is a translation of the Samaritan Pentateuch which follows the text literally, except that in rendering the names of God, in dispensing with anthropopathisms and using euphemisms, it adopts the method of the Targums, especially that of Onkelos with which it often agrees. This agreement, though striking, is not uniform. Hottinger and Eichhorn account for it by supposing that the translator made use of the Targum—an improbable hypothesis, because of the enmity then subsisting between the Jews and Samaritans. To say that it has been subsequently interpolated from Onkelos will hardly account for the peculiar character of

the version. In difficult places it departs from the Targum. How then is the likeness to be explained? According to Winer, followed by Hävernick and Juynboll, it was owing to the influence of the hermeneutical tradition of the Jews on the theology of the Samaritans. Yet it is difficult to resist the impression that *some* MSS. have been interpolated from Onkelos; because the agreement in various places is identical. The language in which it is written is that sort of Chaldee which comes near the Hebrew, mixed with several Arabisms. As a whole the version cannot be called a good one; since the translator seems to have been guided by no proper rules of exegesis. Hence he falls into many mistakes. *Elohim* or *Jehovah* is commonly avoided, and *angel* put instead, to suit the supposed dignity of the divine being. The names of peoples, countries, cities, mountains, and rivers are changed from the old into more modern names; less so, however, than by Onkelos and Saadiah. Thus Ararat, in Gen. viii. 4, is *Sarnedib*; the land of Shinar (Gen. x. 10) is *ארעה צופה*, *land of the tower* (Babylonia); Potipharah (Gen. xli. 20) is Cohenan; Gad, *a troop will depopulate*, as it is in the Samaritan, is here rendered *a despiser will despise*. In Gen. x. 31 for 'these are the sons of Shem,' this version has *הרה חליקת ילדי שם*, these are the portions of the sons of Shem. Mistakes are numerous and glaring: thus for the *two of them* (שניהם, Gen. iii. 4), the version has *רדפי עליהן*, *pursuing them*, apparently because the translator read *שנאהם*. In Exod. xx. 26, *thou shalt not go up by steps*, is rendered *לא תרק בשקריה*, *thou shalt not ascend with prevarications*. In Num. xii. 14, *אביה*, *her father*, seems to have been taken from *בוא*, for it is rendered in *bringing her*. In Gen. xlix. 11, *עירה*, *his colt*, is mistaken for *city*, and is therefore translated *קרתה*. In Gen. xxiv. 63, for *Isaac went out to take a walk* (לשוח), the Samaritan has *Isaac went out to pray* (למעלה), taking *שוח* as equivalent to *שוח*; but in this it agrees with Onkelos, the Arabic, and Persian. In Blanchini's *Evangeliarium Quadruplex*, vol. ii. part 2, after DCIV there is a fac-simile of several verses from Num. v. 30 to vi. 9, taken from the Barberini *Triglott* at Rome, which give a good idea of the version and its close relation to Onkelos. Author and date are both unknown. Later accounts of the Samaritans themselves assign it to the high-priest Nathanael, who died about twenty years before Christ; but this is a vague tradition. More probably it was made in the 1st century of the Christian era, as Gesenius believes. It is absurd to date it after Mohammed, as Frankel does. The version was first printed in the Paris Polyglott from a codex which Della Valle got from the East in 1616. It passed thence into the London Polyglott more accurately, but with many imperfections. The Latin version in both works is of little use. Only portions of it have been since printed; the first eighteen chapters of Genesis at Halle 1705; selections by Cellarius in his *Hore Samaritana*, Frankfurt and Jena 1705, 4to, 2d edition, pp. 1-58; and by Uhlemann in his *Samaritan Chrestomathy*, Lipsiæ 1837 (see Walton's *Prolegomena*, ed. Dathe; Castell's *Observations on the sixth volume of the London Polyglott*; Eichhorn's *Einleitung ins A. T.*, vol. ii.; Gesenius, *De Pentateuchi Samarit. origine*, etc. etc.; Winer, *De Ver-*

*sionis Pentat. Samar. indole*, Lipsiæ 1817, 8vo; De Wette's *Einleitung in das A. T.*; Hävernick's *Einleit.* i. 1; Juynboll's *Commentarii in historiam gentis Samaritana*, Leyden 1846, 4to; Davidson's *Treatise on Biblical Criticism*, vol. i.; Lee's *Prolegomena in Biblia Polyglotta Londinensia minora, Prolegomenon* ii. sec. 1, 3).

Τὸ Σαμαριτικόν.—In the fathers of the 3d and 4th centuries, as well as in MSS. containing the LXX. with fragments of Aquila, Symmachus, and Theodotion, we find scholia, or pieces of a Greek translation of the Pentateuch so designated. These fragments have been collected by Morin, Hottinger, and Montfaucon, and are in Walton's *prolegomena*. Castell, Vossius, and Herbst, think that they are merely translated extracts from the Samaritan version; while Gesenius, Winer, and Juynboll suppose them to be remains of a continuous Greek version of the Samaritan Pentateuch. On the other hand, Hengstenberg and Hävernick regard them as belonging to a recension of the Samaritan which corrected and explained certain passages of the LXX. The most probable of these opinions seems to be that which looks upon the notes or scholia as the Samaritan corrections of certain places in the LXX. Their fewness renders the solution of the question impossible; and precludes their utility in criticism or interpretation.

An Arabic version of the Samaritan Pentateuch was made by Abu Said for the use of his brethren in Egypt about 1070 A.D. The basis of it was the translation of Saadiah Haggan, which it follows closely where the Samaritan agrees with the Hebrew Pentateuch; but where the Samaritan departs from the Hebrew it follows the former. The Samaritan version was used by the translator, and the Samaritan original too. Anthropomorphisms and the like are avoided, and euphemisms adopted. Thus for the name of God there is *messenger or angel of God* (Gen. v. 24; Exod. iv. 29; Num. xxii. 9, 10, etc.) In Deut. xxv. 11, for the Hebrew

במבשר he gives *بمشره* *in his flesh*. Great rever-

ence is shown for Moses and the tribe of Levi; but envy of the tribe of Judah (Gen. xlix. 10). It is written in the common language of the Arabs, and abounds in Samaritanisms. The version before us is being edited by Kuenen at Leyden. Genesis was published in 1851; Exodus and Leviticus in 1854. In Syria it would appear that the Samaritans still used Saadiah's even after Abu Said's had been made, for which reason Abul Baracat (about 1208) wrote Scholia upon the latter in order to recommend it to the people. This must not be considered a new version, but a Syriac recension of the Arabic-Samaritan. The two recensions—the Syriac of Abul Baracat and the Egyptian of Abu Said—are mixed together in the MSS., and cannot now be properly separated. For further particulars we must refer to Juynboll and Eichhorn, the former in his *Orientalia*, vol. ii. p. 115, *et seq.*; the latter in the second volume of his *Einleitung to the O. T.* Van Vloten described a MS. of Abu Said's in the University of Leyden, in 1803; and Juynboll notices the MSS. at Paris, especially Nos. 2 and 4, in the *Orientalia*, vol. ii. p. 115, *et seq.*

Other literature of the Samaritans embraces the *Samaritan Chronicle*, or book of Joshua, written in Arabic. In the main this work contains the history of Joshua, with which other materials are

incorporated. The additional history comes down to the age of the Christian emperors, A.D. 355. It contains very little that is real history, and terminates abruptly. What is related of Joshua agrees in part with the Hebrew narrative and differs from the old original materially, being dressed out with strange, fantastic, and fabulous particulars. The chronicle was written in the 13th century, in Egypt; perhaps by a priest who made it up from various sources; four Arabic and one Samaritan, according to Juynboll. There are fifty chapters. The MS. of this chronicle, which was sent from Egypt to Scaliger in 1584, was edited by Juynboll in 1848, with a Latin version and copious commentary. According to the editor the former part of the codex was written in 1362-63, and the latter in 1513. Another MS. is in the British Museum, dated A.H. 908, or A.D. 1502.

The chronicle of *Abulfath* is a compilation from the preceding, as well as from various sources, Jewish or Rabbinical. It is full of fables, and contains little useful matter. The history in it extends from Adam to Mohammed, and was composed in the 14th century—i.e. in 1355 or 756 A.H.—at Nablus. Five MSS. of it are known; one at Paris, another at Oxford procured by Huntington, and three in Berlin; but one of the last three consists of nothing but a few fragments. Schnurrer gave a long extract from the Oxford copy, with a German translation, in Paulus's *Neues Repertorium für biblische und morgenländische Literatur*, 1790, Theil i. p. 120, et seqq.; and in Paulus's *Memorabilia*, 1791, 2 Stück; so too De Sacy in his *Arabic Chrestomathy*, and *Notices et extraits des manuscrits de la Bibliothèque du Roi*, tom. xii. Some portions are also printed in Heidenheim's *Journal* by R. Payne Smith, accompanied by an English version which is inaccurate. The whole has been published by Vilmar, *Abulfathi annales Samaritani*, Gothæ 1865, after a collation of the various MSS., and with learned prolegomena. The erudite editor intends to give a Latin translation and commentary in another volume.

The remaining literature of the Samaritans is unimportant. They have two collections of hymns, Durrân and Defter. The collector of the Durrân, in which the Defter is also contained, is said to have been Amrân-ez-zemân, who lived before Christ. The hymns are written almost entirely in the Samaritan dialect, and in rhyme. There are also alphabetical poems. Others are in strophes, Arabic and Samaritan alternating. Gesenius published a selection in his 'Carmina Samaritana,' 1824. The number of their prayers is large. The oldest are said to be the prayers of angels, which they sang after the tabernacle was finished, and after the death of Aaron. The prayers are for Sabbath days, festivals, etc. M. Heidenheim has given various notices of MSS. in the British Museum, containing prayers, hymns, and other liturgical literature of the Samaritans (*Deutsche Vierteljahrsschrift*, Hefte 2-5); but he has made many mistakes in explaining the fragments, as Geiger shows (see *Zeitschrift der deutschen morgenländischen Gesellschaft*, Band xviii. p. 590, etc.).

In addition to the above, they have a short chronicle, partly prophetic and partly historical, written, as they allege, by Moses in their own dialect, and reaching from Adam to the end of the world. The high-priest possesses an old codex of it consisting of about 16 leaves. There is an

Arabic commentary upon it in the British Museum, No. 1140 add. They possess, too, another work of the same kind in Arabic, purporting to be written by Jacob Besini. The greatest part of their literature is in Arabic; because most of their earlier Hebrew and Samaritan books were destroyed by the emperor Commodus. But they have still fragments relating to the reading of the law, grammatical pieces, commentaries on the Pentateuch, controversial writings against the Jews, and a book on the birth of Moses, etc. etc. (see Petermann's article 'Samaria' in Herzog's *Encyclopædie*, vol. xiii.; and Mills's *Nablus*, chapter xi.)—S. D.

SAMGAR-NEBO (סַמְגַר נְבוֹ), the name of one of the princes of Babylon (Jer. xxxix. 3). It is doubtful, however, whether the *Nebo* should not be joined with the following word, as it is contrary to analogy for this to stand at the end of a name. As in ver. 13 the chief of the eunuchs is called Nebu-shazban, it is supposed that Nebu-Sarsechim is only another name of the same person, and that Samgar is a name of office. It may be from Pers.

جام, a cup, and کُشَر, the participle of derivation, and may mean the cup-bearer=רִבְשָׁקָה.—W. L. A.

SAMMIM (סַמִּיִּם; Sept. ἀρωμα), rendered in-*cense* Exod. xxx. 7, and *spices* ver. 34, may be supposed to denote aromatic drugs in general. It is derived from the unused root סָמַם, Arab. شَم, *samma*, to smell. [SPICES].—†

SAMOS (Σάμος), an island in the Ægean Sea, near the coast of Lydia, in Asia Minor, and separated only by a narrow strait from the promontory which terminates in Cape Trogyllium. This strait, in the narrowest part, is not quite a mile in width (Plin. *Hist. Nat.* v. 34; Strabo, xiv. p. 634; comp. Leake's map of Asia Minor). The island is sometimes stated to have been famous for its wines; but, in fact, the wine of Samos was in ill repute. Strabo says expressly that the island was οὐκ εἰσως: it now, however, ranks high among Levantine wines, and is largely exported, as are also grapes and raisins. The apostle Paul touched at the island in his voyage from Greece to Syria (Acts xx. 15). Having been at Chios, he on the following day reached Samos. Whether he landed or not is uncertain; the historian simply mentions that they tarried at Trogyllium, which was a place of anchorage in the narrow strait between Samos and the extremity of Mount Mycale. At the time of St. Paul's visit, Samos was a free city in the province of Asia. Samos contained, some years ago, about 60,000 people, inhabiting eighteen large villages, and about twenty small ones. For further information, see the travels of Pococke, Clarke, Dallaway, and Turner.

SAMOTHRACE (Σαμοθράκη), an island in the north-east part of the Ægean Sea, above the Hellespont, with a lofty mountain, and a city of the same name. It was anciently called Dardana, Leucania, and also Samos; and to distinguish it from the other Samos, the name of Thrace was added from its vicinity to that country. Hence Σάμος Θράκης, and by contraction Σαμοθράκη, Samothrace. The island was celebrated for the mysteries of the Cabeiri, and was a sacred asylum (Diod. Sic. iii. 35; v. 47; Ptolem. *Geog.* v. 11; Plin. *Hist.*

*Nat.* iv. 23). Paul touched at this island on his first voyage to Europe (*Acts* xvi. 11). Sailing from Troas to Neapolis with a fair wind (*εὐδρόμη-σαυερ*), they accomplished the passage in two days, anchoring for the night at Samothrace. As a fair wind would be from the S.E., the northern side of the island, where was the town of Samothrace, would afford the most suitable place for anchorage. The island is now called Samandracchi. It is but thinly peopled, and contains only a single village. The mountain is described in the *Missionary Herald* for 1836, p. 246; comp. Richter, *Wallfahrt*, p. 438, *seq.*

SAMSON (שִׁמְשׁוֹן, *Shimshon*; Sept. Σαμψών), the name of the celebrated champion, deliverer, and judge of Israel, equally remarkable for his supernatural bodily prowess, his moral infirmities, and his tragical end. He was the son of Manoah, of the tribe of Dan, and born A.M. 2848, of a mother whose name is nowhere given in the Scriptures. The circumstances under which his birth was announced by a heavenly messenger gave distinct presage of an extraordinary character, whose endowments were to be of a nature suited to the providential exigencies in which he was raised up. The burden of the oracle to his mother, who had been long barren, was, that the child with which she was pregnant was to be a son, who should be a Nazarite from his birth, upon whose head no razor was to come, and who was to prove a signal deliverer to his people. She was directed accordingly to conform her own regimen to the tenor of the Nazarite law, and strictly abstain from wine and all intoxicating liquor, and from every species of impure food [NAZARITE]. According to the 'prophecy going before upon him,' Samson was born in the following year, and his destination to great achievements began to evince itself at a very early age by the illapses of superhuman strength which came from time to time upon him. Those specimens of extraordinary prowess, of which the slaying of the lion at Timnath without weapons was one, were doubtless the result of that special influence of the Most High which is referred to in *Judg.* xiii. 25:—'And the spirit of the Lord began to move him at times in the camp of Dan, between Zorah and Eshtaol.' The import of the original word (לָפַעַם) for *moved* is peculiar. As לָפַעַם, the radical form, signifies *an anvil*, the metaphor is probably drawn from the *repeated* and somewhat *violent strokes* of a workman with his hammer. It implies, therefore, a peculiar *urgency*, an *impelling influence*, which he could not well resist in himself, nor others in him. But we do not know that this attribute, in its utmost degree, constantly dwelt in him.

As the position of the tribe of Dan, bordering upon the territory of the Philistines, exposed them especially to the predatory incursions of this people, it was plainly the design of heaven to raise up a deliverer in that region where he was most needed. The Philistines, therefore, became very naturally the objects of that retributive course of proceedings in which Samson was to be the principal actor, and upon which he could only enter by seeking some occasion of exciting hostilities that would bring the two peoples into direct collision. Such an occasion was afforded by his meeting with one of the daughters of the Philis-

tines at Timnath, whom he besought his parents to procure for him in marriage, assigning as a reason that she 'pleased him well'—Heb. יְשֵׁרָה בְּעֵינֵי הוּאָה, *She is right in mine eyes*, where the original for *right* is not an adjective, having the sense of *beautiful, engaging, attractive*, but a verb, conveying, indeed, the idea of *right*, but of *right relative to an end, purpose, or object*; in other words, of *fitness or adaptation* (see Gousset's *Lexicon*, s. v. יְשֵׁרָה; and comp. 2 Sam. xvii. 4; 1 Kings ix. 12; 2 Chron. xii. 30; Num. xxviii. 27). This affords, we believe, the true clue to Samson's meaning, when he says, 'She is right in mine eyes';—*i.e.* adapted to the end which I have in view; she may be used, she is available, for a purpose entirely ulterior to the immediate connection which I propose. That he entertained a genuine affection for the woman, notwithstanding the *policy* by which he was prompted, we may doubtless admit; but that he intended, at the same time, to make this alliance subservient to the great purpose of delivering his country from oppression, and that in this he was acting under the secret control of Providence, would seem to be clear from the words immediately following, when, in reference to the objection of his parents to such a union, it is said, that they 'knew not that it was of the Lord that he sought an occasion against the Philistines.' It is here worthy of note, that the Hebrew, instead of 'against the Philistines,' has 'of or from the Philistines,' clearly implying that the occasion sought should be one that originated on the side of the Philistines. This occasion he sought under the immediate prompting of the Most High, who saw fit, in this indirect manner, to bring about the accomplishment of his designs of retribution on his enemies. His leading purpose in this seems to have been to *baffle the power of the whole Philistine nation by the prowess of a single individual*. The champion of Israel, therefore, was not appointed so much to be the leader of an army, like the other judges, as to be an army in himself. In order, then, that the contest might be carried on in this way, it was necessary that the entire opposition of the Philistines should be concentrated, as far as possible, against the person of Samson. This would array the contending parties in precisely such an attitude as to illustrate most signally the power of God in the overthrow of his enemies. But how could this result be brought about except by means of some private quarrel between Samson and the enemy with whom he was to contend? And who shall say that the scheme now projected was not the very best that could have been devised for accomplishing the end which God had in view? To what extent Samson himself foresaw the issue of this transaction, or how far he had a plan distinctly laid corresponding with the results that ensued, it is difficult to say. The probability, we think, is, that he had rather a general strong impression, wrought by the Spirit of God, than a definite conception of the train of events that were to transpire. It was, however, a conviction as to the issue sufficiently powerful to warrant both him and his parents in going forward with the measure. They were, in some way, assured that they were engaged in a proceeding which God would overrule to the furtherance of his designs of mercy to his people, and of judgment to their oppressors.

From this point commences that career of achievements and prodigies on the part of this Is-

raelitish Hercules which rendered him the terror of his enemies and the wonder of all ages. At his wedding-feast, the attendance of a large company of paranymps, or friends of the bridegroom, convened ostensibly for the purpose of honouring his nuptials, but in reality to keep an insidious watch upon his movements, furnished the occasion of a common Oriental device for enlivening entertainments of this nature. He propounded a riddle, the solution of which referred to his obtaining a quantity of honey from the carcase of a slain lion, and the clandestine manner in which his guests got possession of the clue to the enigma cost thirty Philistines their lives. The next instance of his vindictive cunning was prompted by the ill-treatment which he had received at the hands of his father-in-law, who, upon a frivolous pretext, had given away his daughter in marriage to another man, and was executed by securing a multitude of

foxes (שועלים), and, by tying firebrands to their tails, setting fire to the cornfields of his enemies. [SHUAL.] The indignation of the Philistines, on discovering the author of the outrage, vented itself upon the family of his father-in-law, who had been the remote occasion of it, in the burning of their house, in which both father and daughter perished. This was a fresh provocation, for which Samson threatened to be revenged; and thereupon falling upon them without ceremony he smote them, as it is said, 'hip and thigh with a great slaughter.' The original, strictly rendered, runs, 'he smote them leg upon thigh'—apparently a proverbial expression, and implying, according to Gesenius, that he cut them to pieces, so that their limbs, their legs and thighs, were scattered and heaped promiscuously together; equivalent to saying that he smote and destroyed them *wholly, entirely*. Mr. Taylor, in his edition of Calmet, recognises in these words an allusion to some kind of *wrestling combat*, in which perhaps the slaughter on this occasion may have commenced.

Having subsequently taken up his residence in the rock Etam, he was thence dislodged by consenting to a pusillanimous arrangement on the part of his own countrymen, by which he agreed to surrender himself in bonds provided *they* would not themselves fall upon him and kill him. He probably gave in to this measure from a strong inward assurance that the issue of it would be to afford him a new occasion of taking vengeance upon his foes. Being brought in this apparently helpless condition to a place called from the event, *Lehi, a jaw*, his preternatural potency suddenly put itself forth, and snapping the cords asunder, and snatching up the jaw-bone of an ass, he dealt so effectually about him, that a thousand men were slain on the spot. That this was altogether the work, not of man, but of God, was soon demonstrated. Wearied with his exertions, the illustrious Danite became faint from thirst, and as there was no water in the place, he prayed that a fountain might be opened. His prayer was heard; God caused a stream to gush from a hollow rock hard by, and Samson in gratitude gave it the name of *En-hakker*, a word that signifies 'the well of him that prayed,' and which continued to be the designation of the fountain ever after. The rendering in our version—'God clave a hollow place in the jaw'—is unhappy, as the original is לחי, *Lehi*, the very term which in the final clause is rendered 'in Lehi.' The place received

its name from the circumstance of his having then so effectually wielded the *jaw-bone* (לחי, *Lehi*).

The Philistines were from this time held in such contempt by their victor, that he went openly into the city of Gaza, where he seems to have suffered himself weakly to be drawn into the company of a woman of loose character, the yielding to whose enticements exposed him to the most imminent peril. His presence being soon noised abroad, an attempt was made during the night forcibly to detain him, by closing the gates of the city and making them fast; but Samson, apprised of it, rose at midnight, and breaking away bolts, bars, and hinges, departed, carrying the gates upon his shoulders, to the top of a neighbouring hill that *looks toward*

*Hebron* (על פני חברון; Sept. ἐπὶ προσώπου τοῦ Χεβρών, *facing Hebron*). The common rendering 'before Hebron' is less appropriate, as the distance between the two cities is at least twenty miles. The hill lay doubtless somewhere between the cities, and in full view of both. After this his enemies strove to entrap him by guile rather than by violence; and they were too successful in the end. Falling in love with a woman of Sorek, named Delilah, he became so infatuated by his passion, that nothing but his bodily strength could equal his mental weakness. The princes of the Philistines, aware of Samson's infirmity, determined by means of it to get possession, if possible, of his person. For this purpose they propose a tempting bribe to Delilah, and she enters at once into the treacherous compact. She employs all her art and blandishments to worm from him the secret of his prodigious strength. Having for some time amused her with fictions, he at last, in a moment of weakness, disclosed to her the fact that it lay in his hair, which if it were shaved would leave him a mere common man. Not that his strength really lay in his hair, for this in fact had no natural influence upon it one way or the other. His strength arose from his *relation* to God as a Nazarite, and the preservation of his hair unshorn was the *mark or sign* of his Nazariteship, and a *pledge* on the part of God of the continuance of his miraculous physical powers. If he lost this sign, the badge of his consecration, he broke his vow, and consequently forfeited the thing signified. God abandoned him, and he was thenceforward no more, in this respect, than an ordinary man. His treacherous paramour seized the first opportunity of putting his declaration to the test. She shaved his head while he lay sleeping in her lap, and at a concerted signal he was instantly arrested by his enemies lying in wait. Bereft of his grand endowment, and forsaken of God, the champion of Israel could now well adopt the words of Solomon—'I find more bitter than death the woman whose heart is snares and nets, and her hands are bands; whoso pleaseth God shall escape from her; but the sinner shall be taken by her.' Having so long presumptuously played with his ruin, Heaven leaves him to himself, as a punishment for his former guilty indulgence. He is made to reap as he had sown, and is consigned to the hands of his relentless foes. If his punishment was indeed severe, though he amply revenged it, as well as redeemed in a measure his own honour, by the manner in which he met his death. The Philistines having deprived him of sight, at first immured him in a prison, and made him grind at the mill like a slave. As this was an

employment which in the East usually devolves on women, to assign it to such a man as Samson was virtually to reduce him to the lowest state of degradation and shame. To grind corn *for others* was, even for a woman, a proverbial term expressive of the most menial and oppressed condition. How much more for the hero of Israel, who seems to have been made grinder-general for the prison-house!

In process of time, while remaining in this confinement, his hair recovered its growth, and with it such a profound repentance seems to have wrought in his heart as virtually re-invested him with the character and the powers he had so culpably lost. Of this fact his enemies were not aware. Still exulting in their possession of the great scourge of their nation, they kept him, like a wild beast, for mockery and insult. On one of these occasions, when an immense multitude, including the princes and nobility of the Philistines, were convened in a large amphitheatre, to celebrate a feast in honour of their god Dagon, who had delivered their adversary into their hands, Samson was ordered to be brought out to be made a laughing-stock to his enemies, a butt for their scoffs, insults, mockeries, and merriment. Secretly determined to use his recovered strength to tremendous effect, he persuaded the boy who guided his steps to conduct him to a spot where he could reach the two pillars upon which the roof of the building rested. Here, after pausing for a short time, while he prefers a brief prayer to Heaven, he grasps the massy pillars, and bowing with resistless force, the whole building rocks and totters, and the roof, encumbered with the weight of the spectators, rushes down, and the whole assembly, including Samson himself, are crushed to pieces in the ruin!

Thus terminated the career of one of the most remarkable personages of all history, whether sacred or profane. The enrolment of his name by an apostolic pen (Heb. xi. 32) in the list of the ancient worthies, 'who had by faith obtained an excellent repute,' warrants us undoubtedly in a favourable estimate of his character on the whole, while at the same time the fidelity of the inspired narrative has perpetuated the record of infirmities which must for ever mar the lustre of his noble deeds. It is not improbable that the lapses with which he was chargeable arose, in a measure, from the very peculiarities of that physical temperament to which his prodigies of strength were owing; but while this consideration may palliate, it cannot excuse the moral delinquencies into which he was betrayed, and of which a just Providence exacted so tremendous a penalty in the circumstances of his degradation and death.

Upon the parallel between the achievements of Samson and those of the Grecian Hercules, and the derivation of the one from the other, we cannot here enter. The Commentary of Adam Clarke presents us with the results of M. De Lavour, an ingenious French writer on this subject, from which it will be seen that the coincidences are extremely striking, and such as would perhaps afford to most minds an additional proof of how much the ancient mythologies were a distorted reflection of the Scripture narrative.—G. B.

SAMUEL (שמואל; Sept. Σαμουήλ), the last of those extraordinary regents that presided over the Hebrew commonwealth under the title of

Judges. The circumstances of his birth were ominous of his future career. His father, Elkanah of Ramathaim-Zophim, of Mount Ephraim, 'had two wives, the name of the one was Hannah, and the name of the other Peninnah; and Peninnah had children, but Hannah had no children.' The usual effect of polygamy was felt in Elkanah's household. The sterility of Hannah brought upon her the taunts and ridicule of her conjugal rival, who 'provoked her sore, to make her fret, because the Lord had shut up her womb' (i Sam. i. 6). The jealousy of Peninnah was excited also by the superior affection which was shown to Hannah by her husband—'To Hannah he gave a worthy portion; for he loved Hannah' (i. 5). More especially at the period of the sacred festivals did the childless solitude of Hannah create within her the most poignant regrets, when she saw her husband give portions to all the sons and daughters of Peninnah, who, in maternal pride, took advantage of these seasons to subject the favourite wife to a natural feminine retaliation. Hannah's life was embittered—'she wept and did not eat' (i. 7). On one of these occasions, during the annual solemnity at Shiloh, whither Elkanah's family had travelled, 'to worship and to sacrifice,' so keen was the vexation of Hannah, that she left the domestic entertainment, went to the tabernacle, and 'wept sore,' while in the extremity of her anguish she implored Jehovah to give her a man-child, accompanying her supplication with a peculiar pledge to dedicate this gift, should it be conferred, to the service of Jehovah; vowing to present the child in entire unreserved consecration to the Lord all the days of his life, and at the same time to bind him to the special obligations and austerities of a Nazarite. In her agony of earnestness her lips moved, but articulated no words, so that Eli, the high-priest, who had observed her frantic appearance from his seat by a post of the temple, 'thought she had been drunken,' and sharply rebuked her. Her touching explanation removed his suspicion, and he gave her his solemn benediction. Her spirit was lightened, and she 'went her way.' The birth of a son soon fulfilled her hopes, and this child of prayer was named, in memory of the prodigy, SAMUEL, HEARD OF GOD. In consequence of his mother's vow, the boy was from his early years set apart to the service of Jehovah, under the immediate tutelage of Eli. Hannah brought him to the house of the Lord in Shiloh, and introducing herself to the pontiff, recalled to his memory the peculiar circumstances in which he had first seen her. So 'Samuel ministered before the Lord, being a child, girded with a linen ephod' (ii. 18).

The degeneracy of the people at this time was extreme. The tribes seem to have administered their affairs as independent republics, the national confederacy was weak and disunited, and the spirit of public patriotic enterprise had been worn out by constant turmoil and invasion. The theocratic influence was also scarcely felt, its peculiar ministers being withdrawn, and its ordinary manifestations, except in the routine of the Levitical ritual, having ceased; 'the word of the Lord was precious in those days, there was no open vision' (iii. 1). The young devotee, 'the child Samuel,' was selected by Jehovah to renew the deliverance of his oracles. As he was laid down in his chamber adjoining the sacred tent, the Lord, by means adapted to his juvenile capacity, made known to him his first and

fearful communication—the doom of Eli's apostate house. Other revelations speedily followed; the frequency of God's messages to the young prophet established his fame; and the exact fulfilment of them secured his reputation. The oracle of Shiloh became vocal again through the youthful hierophant (iii. 19-21). The fearful fate pronounced on the head and the family of the pontificate was soon executed. Eli had indulgently tolerated, or leniently palliated, the rapacity and profligacy of his sons. Through their extortions and impiety, 'men abhorred the offering of the Lord,' and Jehovah's wrath was kindled against the sacerdotal transgressors. They became the victims of their own folly; for when the Philistines invaded the land a panic seized the Hebrew host, and they clamoured for the ark to be brought out to the camp and into the field of battle. Hophni and Phinehas, Eli's sons, indulging this vain superstition, accompanied the ark as its legal guardians, and fell in the terrible slaughter which ensued. Their father, whose sin seems to have been his passive and quiescent temper, sat on a sacerdotal throne by the wayside, to gather the earliest news of the battle, for his 'heart trembled for the ark of God;' and as a fugitive from the scene of conflict reported to him the sad disaster, dwelling with natural climax on its melancholy particulars—Israel routed and fleeing, Hophni and Phinehas both slain, yea, and the ark of God taken—this last and overpowering intelligence so shocked him, that he fainted and fell from his seat, and in his fall, from the imbecile corpulence of age, 'broke his neck and died' (iv. 18). When the feeble administration of Eli, who had judged Israel forty years, was concluded by his death, Samuel was too young to succeed to the regency, and the actions of this earlier portion of his life are left unrecorded. The ark, which had been captured by the Philistines, soon vindicated its majesty, and after being detained among them seven months, it was sent back to Israel. It did not, however, reach Shiloh, in consequence of the fearful judgment of Bethshemesh (vi. 19), but rested in Kirjath-jearim for no fewer than twenty years (vii. 2). It is not till the expiration of this period that Samuel appears again in the history. Perhaps during the twenty years succeeding Eli's death, his authority was gradually gathering strength, while the office of supreme magistrate may have been vacant, each tribe being governed by its own hereditary phylarch. This long season of national humiliation was to some extent improved. 'All the house of Israel lamented after the Lord,' and Samuel, seizing upon the crisis, issued a public manifesto, exposing the sin of idolatry, urging on the people religious amendment, and promising political deliverance on their reformation. The people obeyed, the oracular mandate was effectual, and the principles of the theocracy again triumphed (vii. 4). The tribes were summoned by the prophet to assemble in Mizpeh, and at this assembly of the Hebrew comitia Samuel seems to have been elected regent; at all events, his official pre-eminence was formally recognised (vii. 6). Some of the judges were raised to political power, as the reward of their military courage and talents, but Samuel seems to have been raised to the lofty station of judge, from his prophetic fame, his sagacious dispensation of justice, and his success as a patriotic restorer of the true worship. His government, founded not on feats

of chivalry or actions of dazzling enterprise, which great emergencies only call forth, but resting on more solid qualities essential to the growth and development of a nation's resources in times of peace, laid the foundation of that prosperity which gradually elevated Israel to the position it occupied in the days of David and his successors.

This mustering of the Hebrews at Mizpeh on the inauguration of Samuel alarmed the Philistines, and their 'lords went up against Israel.' Samuel assumed the functions of the theocratic viceroy, offered a burnt-offering, and implored the immediate protection of Jehovah. He was answered with propitious thunder. A fearful storm burst upon the Philistines, who were signally defeated, and did not recruit their strength again during the administration of the prophet-judge. The grateful victor erected a stone of remembrance, and named it Ebenezer. From an incidental allusion (vii. 14) we learn, too, that about this time the Amorites, the inveterate foes of Israel, were also at peace with them—another triumph of his government. The presidency of Samuel appears to have been eminently successful. From the very brief sketch given us of his public life we infer that the administration of justice occupied no little share of his time and attention. He went from year to year in circuit to Bethel, Gilgal, and Mizpeh, places not very far distant from each other, but chosen, perhaps, as Winer suggests, because they were the old scenes of worship (*Real-Wört.* sub voce).

The dwelling of the prophet was at Ramah, his native city, 'for there was his house.' There religious worship was established after the patriarchal model, and Samuel, like Abraham, built an altar to the Lord. Such procedure was contrary to the letter of the Mosaic statute. But the prophets had power to dispense with ordinary usage, for they were God's accredited representatives, and wielded a divine prerogative (Knobel, *Der Prophetismus*. d. Heb. i. 39; Koester, *Der Proph. a. A. & N. T.* etc. p. 52). Besides, in this case one reason of Samuel's conduct may be found in the state of the religious economy. The ark yet remained at Kirjath-jearim, where it had been left in terror, and where it lay till David fetched it to Zion. There seems to have been no place of public resort for the tribes, the present station of the ark not having been chosen for its convenience as a scene of religious assembly. The shrine at Shiloh, too, which had been hallowed ever since the settlement in Canaan, had been desolate from the date of the death of Eli and his sons—so desolate as to become in future years a prophetic symbol of divine judgment (Jer. vii. 12-14; xxvi. 6). In such a period of religious anarchy and confusion, Samuel, a theocratic guardian, might, without any violation of the spirit of the law, superintend the public worship of Jehovah in the vicinity of his habitation.

In Samuel's old age two of his sons were appointed by him deputy-judges in Beersheba. These young men possessed not their father's integrity of spirit, but 'turned aside after lucre, took bribes, and perverted judgment' (1 Sam. viii. 3). The advanced years of the venerable ruler himself and his approaching dissolution, the certainty that none of his family could fill his office with advantage to the country, the horror of a period of anarchy which his death might occasion, the necessity of having some one to put an end to tribal jealousies and concentrate the energies of the nation, espe-

cially as there appeared to be symptoms of renewed warlike preparations on the part of the Ammonites (xii. 12)—these considerations seem to have led the elders of Israel to adopt the bold step of assembling at Ramah and soliciting Samuel ‘to make a king to judge them.’ The proposed change from a republican to a regal form of government displeased Samuel for various reasons. Besides its being a departure from the first political institute, and so far an infringement on the rights of the divine head of the theocracy, it was regarded by the regent as a virtual charge against himself, one of those examples of popular fickleness and ingratitude which the history of every realm exhibits in profusion. Jehovah comforts Samuel by saying, ‘They have not rejected thee, but they have rejected me.’ Being warned of God to accede to their request for a king, and yet to remonstrate with the people, and set before the nation the perils and tyranny of a monarchical government (viii. 10), Samuel proceeded to the election of a sovereign. Saul, son of Kish, ‘a choice young man and a goodly,’ whom he had met unexpectedly, was pointed out to him by Jehovah as the king of Israel, and by the prophet was anointed and saluted as monarch. Samuel again convened the nation at Mizpeh, again with honest zeal condemned their project, but caused the sacred lot to be taken. The lot fell on Saul. The prophet now formally introduced him to the people, who shouted in joyous acclamation, ‘God save the king.’

Not content with oral explanations, this last of the republican chiefs not only told the people the manner of the kingdom, ‘but wrote it in a book and laid it up before the Lord.’ What is here asserted of Samuel may mean, that he extracted from the Pentateuch the recorded provision of Moses for a future monarchy, and added to it such warnings, counsels, and safeguards as his inspired sagacity might suggest. Saul’s first battle being so successful, and the preparations for it displaying no ordinary energy and promptitude of character, his popularity was suddenly advanced, and his throne secured. Taking advantage of the general sensation in favour of Saul, Samuel cited the people to meet again in Gilgal, to renew the kingdom, to ratify the new constitution, and solemnly instal the sovereign (xi. 14). Here the upright judge made a powerful appeal to the assembly in vindication of his government. ‘Witness against me before the Lord, and before his anointed; whose ox have I taken? or whose ass have I taken? or whom have I defrauded? whom have I oppressed? or of whose hand have I received any bribe to blind mine eyes therewith? and I will restore it you.’ The whole multitude responded in unanimous approval of his honesty and intrepidity (xii. 3, 4). Then he, still jealous of God’s prerogative and the civil rights of his people, briefly narrated their history, showed them how they never wanted chieftains to defend them when they served God, and declared that it was distrust of God’s raising up a new leader in a dreaded emergency that excited the outcry for a king. In proof of this charge—a charge which convicted them of great wickedness in the sight of God—he appealed to Jehovah, who answered in a fearful hurricane of thunder and rain at an unusual period—‘wheat-harvest.’ The terrified tribes confessed their guilt, and besought Samuel to intercede for them in his disinterested patriotism. And thus

Samuel yielded to the current of events, though he struggled against it. His heart clung to the old order established by Moses, yet he wisely and calmly inaugurated and guided the new era.

It is said (vii. 15) that Samuel judged Israel all the days of his life. The assertion may mean that even after Saul’s coronation, Samuel’s power, though he had formally abdicated, was yet actually felt and exercised in the direction of state affairs. No enterprise could be undertaken without his concurrence. His was an authority higher than the king’s. We find Saul, having mustered his forces, about to march against the Philistines, yet delaying to set out till Samuel consecrated the undertaking. He came not at the time appointed, as Saul thought, and the impatient monarch proceeded to offer sacrifice—a distinct violation of the national law, and a clear act of rebellion against prophetic authority. The prophet arrived as the religious service was concluded, and rebuking Saul for his presumption, distinctly hinted at the short continuance of his kingdom. Again we find Samuel charging Saul with the extirpation of the Amalekites. The royal warrior at once proceeded on the expedition, but obeyed not fully the divine mandate. His apologies, somewhat craftily framed, for his inconsistencies, availed him not with Samuel, who, in the style of the later prophets, boldly proclaimed the worthlessness of mere ceremonial scrupulosity. By the indignant seer Saul was virtually dethroned. He had forfeited his crown by disobedience to God. Yet ‘Samuel mourned for him.’ His heart seems to have been set on the bold athletic soldier. But now the Lord directed him to make provision for the future government of the country (xvi. 1). To prevent strife and confusion, it was necessary, in the circumstances, that the second king should be appointed before the first sovereign’s demise. Samuel went to Bethlehem and set apart the youngest of the sons of Jesse, ‘and came to see Saul no more till the day of his death.’ Yet Saul and he met once again at Naioth, in Ramah (xix. 24), when the king was pursuing David. As on a former occasion, the spirit of God came upon him when he approached the company of the prophets with Samuel presiding over them, and ‘he prophesied and lay down naked all that day and all that night.’ A religious excitement seized him; the contagious influence of the music and rhapsody fell upon his nervous, susceptible temperament, and overpowered him. At length Samuel died, and ‘all Israel lamented for him, and buried him in his house at Ramah’ (xxv. 1). The troubles of Saul increased, and there was none to give him counsel and solace. Jehovah answered him not in the ordinary mode of oracular communication, ‘by dreams, Urim, or prophets.’ His chafed and melancholy spirit could find no rest, and he resorted to the sad expedient of consulting ‘a woman that had a familiar spirit’ (xxviii. 3-7). The sovereign in disguise entered her dwelling, and he of whom the proverb was repeated, ‘Is Saul also among the prophets?’ was found in consultation with a sorceress. This is not the place to enter into a discussion of this subject [SAUL]. We follow the inspired narrative, and merely say that Saul strangely wished to see Samuel, recalled from the dead, and Samuel himself (שמואל הַחַי) made his appearance suddenly, and to the great terror of the necromancer; heard the mournful complaint

of Saul, and pronounced his speedy death on an ignoble field of defeat and massacre (Thenius, *in loc.*; Keil, *do.*; Delitzsch, *Bib. Psychologie*, p. 428, 2d ed.; Deyling, *Observat.* ii. p. 253).

We have reserved a few topics for discussion, that we might not interrupt the brief narrative. It is almost superfluous to say that the derivation of the prophet's name to which we have referred is preferable to others which have been proposed—

such as שֵׁם אֱל, *name of God*; שְׁמוֹ אֱל, *asked*

*of God*; or שְׁמוֹ אֱל, *Deus posuit*. Josephus renders it by the Greek name Θεαίητος, *Theaetetus*.

The opinion was in former times very current that Samuel was a priest; nay, some imagine that he succeeded Eli in the pontificate. Many of the fathers inclined to this notion, but Jerome affirms (*Advers. Jovin.*): *Samuel Propheta fuit, Judex fuit, Levita fuit, non Pontifex, ne Sacerdos quidem* (Ortlob, *Samuel Judex et Propheta non Pont. aut Sacerd. Sacrificans*; *Thesaurus Novus Theol. Philol. Hasei et Ikenii*, i. 587; Selden, *De Success. ad Pontif.* lib. i. c. 14). That Samuel was a Levite is apparent from 1 Chron. vi. 22-28, but there is no evidence of his being a priest. The sacerdotal acts ascribed to him were performed by him as an extraordinary legate of Jehovah. The objection, that if he had been a Levite his mother's dedication of him would have been superfluous, is met by the assertion, that if he had not been a Levite such a dedication of him would not have been accepted. But the maternal dedication was to a life-long service, the ordinary Levites only serving during their middle years. Samuel's birth-place was Ramathaim-Zophim; the dual form of the first term, according to some signifying one of the two Ramahs, to wit, that of the Zophites (Lightfoot, vol. ii. 162, ed. 1832); and the second term (צופים), according to others meaning speculators—*i.e.* prophets—and denoting that at this place was a school of the prophets—an hypothesis supported by the Chaldee paraphrast, who renders it 'Elkanah, a man of Ramatha, a disciple of the

prophets' (מתלמידי נביא). Others find in the dual form of רמתים a reference to the shape of the city, which was built on the sides of two hills; and in the word Zophim see an allusion to some watch-towers, or places of observation, which the high situation of the city might favour (Clerici *Opera*, ii. 175). Others again affirm that the word צופים is added because Ramah or Ramatha was inhabited by a clan of Levites of the family of צוּף (Calmet, *sub voce*). This term (אפרתי), if the genealogy in Chronicles remain undisturbed, must signify not an Ephraimite by birth, but by abode, 'domiciliū ratione non sanguinis' (Selden, *l. c.*; Keil *in loc.*) So we find that the Kohathites, to whom Samuel belonged, had their lot in Mount Ephraim (Josh. xxi. 5-20), where הַר אפרים signifies, not the hill of Ephraim, but the hill-country of Ephraim (Gesenius, *Thesaur.* *sub voce*). The family of Zoph, living in the hill-country of Ephraim, might be termed Ephrathite, while their ancestor's name distinguished their special locality, as Ramathaim-Zophim. Thus, too, the Levite was of Bethlehem-Judah (Judges xvii. 7); and Mahlon and Chilion are called Ephrathites of Bethlehem-Judah (Ruth i. 2). The geography of the place has been disputed, and eight cities contend for the honour [RAMAH]. Eusebius and Jerome

confound it with the Arimathea of the N. T. (*Onomast. art. Armathea Sophim*). The Seventy render it Ἀρμαθαίμ Σοφίμ, Cod. A, or Cod. B. Ἀρμαθαίμ Σοφά. For an account of the place now and for long called Neby Samwël, see Robinson's *Palestine*, ii. 239, 2d ed.; and for an interesting discussion as to the site of Ramath-Zophim, the latter name being yet retained in the Arabic term Sôbah, the curious reader may consult the same work (ii. 8-11, 2d ed. See also Stanley's *Sinai and Palestine*, 220, 221).

Specific data are not afforded us for determining the length of either Samuel's life or his administration. Josephus mentions that he was twelve years of age when his first oracle was communicated to him. As the calculation of the duration of Samuel's life and government depends upon the system of chronology adopted, the reader may turn to the article JUDGES, and to the comparative chronological table which is there given.

Samuel's character was one of uncommon dignity and patriotism. His chief concern was his country's weal. Grotius compares him to Aristides, and Saul to Alcibiades (*Opera Theol.* tom. i. p. 119). To preserve the worship of the one Jehovah, the God of Israel, to guard the liberties and rights of the people, to secure them from hostile invasion and internal disunion, was the grand work of his life. His patriotism was not a Roman love of conquest or empire. The subjugation of other peoples was only sought when they disturbed the peace of his country. He was loath indeed to change the form of government, yet he did it with consummate policy. First of all he resorted to the divine mode of appeal to the Omniscent ruler—a solemn sortilege—and brought Saul so chosen before the tribes, and pointed him out to them as peerless in form and aspect. Then, waiting till Saul should distinguish himself by some victorious enterprise, and receiving him fresh from the slaughter of the Ammonites, he again confirmed him in his kingdom, while the national enthusiasm, kindled by his triumph, made him the popular idol. Samuel thus, for the sake of future peace, took means to show that Saul was both chosen of God and yet virtually elected by the people. This procedure, so cautious and so generous, proves how little foundation there is for the remarks which have been made against Samuel by some writers, such as Schiller (*Neue Thalia*, iv. 94), Vatke (*Bibl. Theol.* p. 360), and the Wolfenbüttel Fragmentist, p. 200, ed. Schmidt).

The power of Samuel with God, as an intercessor for the people, is often referred to, and is compared to that of Moses (Jer. xv. 1; Ps. xcix. 6). He was the first of a series of prophets that continued in an unbroken line till the close of the O. T. Canon (Acts iii. 24; Augustin, *De Civ. Dei*, l. xvii.) Early established as a prophet, he was known as 'the seer' (1 Sam. ix. 18). Though the term seer became obsolete, the objective term 'vision' was still preserved as the title of prophetic oracles. From Samuel's position he was highly venerated (1 Sam. ix. 13; xvi. 4). It is in the days of Samuel that mention is first made of the schools of the prophets at Naioth. It is natural to suppose that he was to some extent their originator. In the prospect of a regal form of government he seems to have made the prophetic office a formal institute in the Jewish nation. [SCHOOLS.] We are informed (1 Chron. ix. 22) that the alloca-

tion of the Levites for the temple-service was made by David and Samuel the seer—*i.e.* that David followed some plan or suggestion of the deceased prophet, which he may have learned when among the sons of the prophets at Naioth (1 Sam. xix. 18). Reference is made (1 Chron. xxvi. 28) to some donations which Samuel gave for the public religious service. Lastly (xxix. 29), the acts of David the king are said to be written in the book of Samuel the seer; at least the דברי דוד were written על

לדברי שמואל, whatever the phrase may mean (Davidson's *Introd.* i. p. 513). It may imply authorship, or it may signify that the history of David was written in the history of Samuel. Heman, grandson of Samuel, is noted as a singer (1 Chron. vi. 33). The high respect in which Samuel was held by the Jewish nation in after ages may be learned from the eulogy pronounced upon him by the son of Sirach (Eccles. xlv. 13-26). His fame was not confined to Israel. The remains of Samuel, according to Jerome (*Advers. Vigil.*), were under the emperor Arcadius brought from Judea, with great pomp, to Constantinople (D'Herbelot, *Bibl. Orient.* pp. 735, 1021; Hottinger, *Histor. Oriental.* i. 3).—J. E.

**SAMUEL, BOOKS OF.** The two books of Samuel were anciently reckoned as but one among the Jews (ספר שמואל). That they form only one treatise is apparent from their structure. The present division into two books, common in our Hebrew Bibles since the editions of Bomberg, was derived from the Septuagint and Vulgate, in both which versions they are termed the First and Second Books of Kings. Thus Origen (apud Euseb. *Hist. Eccles.* vi. 25), in his famous catalogue of the Hebrew Scriptures, names the books of Samuel—*βασιλείων πρώτη δευτέρα, παρ' αὐτοῖς ἐν Σαμουήλ, ὁ δευκλῆτος*; and Jerome thus describes them (*Prolog. Galatius*): 'Tertius sequitur Samuel, quem nos regum primum et secundum dicimus.' None of these titles, ancient or modern, is very felicitous. To call them Books of Samuel is, if we follow the analogy of the phrases, Books of Moses, Book of Isaiah, to assert the prophet to be their author, though a great portion of the events recorded in them happened after his death. The title Books of Kings, or Kingdoms, is by no means an accurate indication of their contents, as they refer only to two monarchs, and the narrative does not even include the death of David. And if they be named after Samuel, as he was a principal agent in the events recorded in them, then the title is only appropriate to a few of the introductory chapters. Jewish opinion is divided on the reason of the Hebrew name. It is affirmed in Baba Bathra (fol. 15, cap. i.) that Samuel wrote the book so called, and also Judges and Ruth; and Abarbanel argues that these compositions are named after Samuel because the events narrated in them may be referred to him, either as a person or as a chief instrument, for Saul and David, being both anointed by the prophet, became 'opus veluti manuum' (*Pref. in lib. Sam.* fol. 74, col. i). The source of the appellation *βασιλείων* (Regum), is to be found in the historic resemblance of the books of Samuel to those which come after them, and to which they serve as an introduction. On the other hand, it was desirable to have short names for the books of Scripture; and as Samuel

was a prophet of such celebrity, and had such influence in changing the form of government under which the son of Kish and the son of Jesse became sovereigns, it was natural to name after him the biographical tracts in which the life and times of these royal chieftains are briefly sketched: especially as they at the same time contain striking descriptions of the marvel of his own birth, the oracles of his youth, and the impressive actions of his long career. The selection of this Jewish name might also be strengthened by the national belief of the authorship of a large portion of the work, founded on a common interpretation of 1 Chron. xxix. 29.

**Contents.**—The contents of the books of Samuel belong to an interesting period of Jewish history. The preceding book of Judges refers to the affairs of the republic as they were administered after the conquest, when the nation was all but a congeries of independent cantons, sometimes partially united for a season under an extraordinary dictator. As, however, the form of government was changed, and remained monarchical till the overthrow of the kingdom, it was of national importance to note the time, method, and means of the alteration. This change happening under the regency of the wisest and best of their sages, his life became a topic of interest. The first book of Samuel gives an account of his birth and early call to the duties of a seer, under Eli's pontificate; describes the low and degraded condition of the people, oppressed by foreign enemies; proceeds to narrate the inauguration of Samuel as judge; his prosperous regency; the degeneracy of his sons; the clamour for a change in the civil constitution; the installation of Saul; his rash and reckless character; and his neglect of, or opposition to, the theocratic elements of the government. Then the historian goes on to relate God's choice of David as king; his endurance of long and harassing persecution from the reigning sovereign; the defeat and death of Saul on the field of Gilboa; the gradual elevation of the man 'according to God's own heart' to national dominion; his earnest efforts to obey and follow out the principles of the theocracy; his formal establishment of religious worship at Jerusalem, now the capital of the nation; and his series of victories over all the enemies of Judaea that were wont to molest its frontiers. The analyst records also David's aberrations from the path of duty; the unnatural rebellion of his son Absalom and its suppression; his carrying into effect a military census of his dominions, and the Divine punishment which this act incurred; and concludes with a few characteristic sketches of his military staff. The second book of Samuel, while it relates the last words of David, yet stops short of his death. As David was the real founder of the monarchy and reorganiser of the religious worship; the great hero, legislator, and poet of his country; as his dynasty maintained itself on the throne of Judah till the Babylonian captivity—it is not a matter of wonder that the description of his life and government occupies so large a portion of early Jewish history. The books of Samuel thus consist of three interlaced biographies—those of Samuel, Saul, and David.

**Age and Authorship.**—The attempt to ascertain the authorship of this early history is attended with difficulty. Ancient opinion is in favour of the theory that the first twenty-four chapters were

written by Samuel, and the rest by Nathan and Gad. Abarbanel, however, and Grotius, suppose Jeremiah to be the author (Grot. *Præf. in 1. Sam.*) Stähelin (*Einleit.* sec. 25, etc.) conjectures that a large portion of Samuel was written by the author of the Pentateuch, and of the books of Joshua and Judges. But continuity of history in the same form does not prove identity of authorship, nor are the similar phrases found in these books sufficient in number or characteristic idiom to support the theory. Nay, Samuel is free from the so-called Chaldaisms of Judges and the archaisms of the Pentateuch. The peculiar theory of Jahn, on the other hand, is that the four books of Samuel and Kings were written by the same person, and at a date so recent as the 30th year of the Babylonish captivity. His arguments, however, as well as those of Eichhorn (*Einleit.* sec. 468), and Herbst (*Einleit.* ii. 1-139), who hold a similar view, are more ingenious than solid (*Introduction*, sec. 46). The fact of all the four treatises being named 'Books of Kings' is insisted on as a proof that they were originally undivided and formed a single work—a mere hypothesis, since the similarity of their contents might easily give rise to this general title, while the more ancient appellation for the first two was *The Books of Samuel*. Great stress is laid on the uniformity of method in all the books. But this uniformity by no means amounts to any proof of identity of authorship. It is nothing more than the same Hebrew historical style. The more minute and distinctive features, so far from being similar, are very different. Nay, the books of Samuel and Kings may be contrasted in many of those peculiarities which mark a different writer:—

1. In Kings there occur not a few references to the laws of Moses, in Samuel not one of these is to be found.

2. The books of Kings repeatedly cite authorities, to which appeal is made, and the reader is directed to the 'Acts of Solomon,' 'the book of the Chronicles of Kings of Israel,' or 'Judah.' But in the books of Samuel there is no formal allusion to any such sources of information.

3. The nature of the history in the two works is very different. The *plan* of the books of Samuel is not that of the books of Kings. The books of Samuel are more of a biographical character, and are more limited and personal in their view.

4. There are in the books of Kings many later forms of language. For a collection of some of these the reader is referred to De Wette (*Einleit. in das A. T.* sec. 185, note e). Scarcely any of those more recent or Chaldaic forms occur in Samuel. Besides, some peculiarities of form are noted by De Wette (sec. 180), but they are not so numerous or distinctive as to give a general character to the treatise (Hirzel, *De Chaldaismi Bibl. origine*, 1830). Many modes of expression, common in Kings, are absent from Samuel [KINGS, BOOKS OF]. Keil, *Einleit.* sec. 53.

5. The concluding chapters of the second book of Samuel are in the form of an appendix to the work—a proof of its completeness. The connection between Samuel and Kings is thus interrupted. It appears, then, that Samuel claims a distinct authorship from the books of Kings. Stähelin, indeed, supposes that the present division between the two treatises has not been correctly made, and that the two commencing chapters of 1 Kings really belong to 2 Samuel. This he argues on

philological grounds, because the terms והברתי

והפלתיו (1 Kings i. 38), מלך נפש (i. 12), and פדה נפש (i. 29), are found nowhere in Kings but in the first two chapters, while they occur once and again in Samuel. There is certainly something peculiar in this affinity, though it may be accounted for on the principle that the author of the pieces or sketches which form the basis of the initial portions of 1 Kings not only composed those which form the conclusion of Samuel, but also supervised or published the whole work which is now called by the prophet's name.

Thus the books of Samuel have an authorship of their own—an authorship belonging to a very early period. While their tone and style are very different from the later records of Chronicles, they are also dissimilar to the books of Kings. They bear the impress of a hoary age in their language, allusions, and mode of composition. The insertion of odes and snatches of poetry, to enliven and verify the narrative, is common to them with the Pentateuch. They abound in minute sketches and vivid touches. As if the chapters had been extracted from a diary, some portions are more fully detailed and warmly coloured than others, according as the original observer was himself impressed. Many of the incidents, in their artless and striking delineation, would form a fine study for a painter.

Besides, it is certainly a striking circumstance that the books of Samuel do not record David's death, though they give his last words—his last inspired effusion (Hävernick, *Einleit.* sec. 167). We should reckon it natural for an author, if he had lived long after David's time and were writing his life, to finish his history with an account of the sovereign's death. Had the books of Samuel and Kings sprung from the same source, then the abrupt conclusion of one portion of the work, containing David's life down to his last days, and yet omitting all notice of his death, might be ascribed to some unknown capricious motive of the author. But we have seen that the two treatises exhibit many traces of a different authorship. If the writer of Samuel gives a full detail of David's life, actions, and government, and yet fails to record his decease; a natural inference is, that the document must have been composed prior to the monarch's death, or at least about that period. If we should find a memoir of George the Third, entering fully into his private and family history, as well as describing his cabinets, councillors, and parliaments; the revolutions, and wars, and state of feeling under his government; and ending with an account of the appointment of a regent, and a reference to the king's lunacy, our conclusion would be that the history was composed before the year 1820. A history of David, down to the verge of his dissolution, yet not including that event, has the semblance of being written before that monarch 'slept with his fathers.' But it may be replied, as by Stähelin, that the division of Kings and Samuel is unfortunate, and that Samuel contained the first and second chapters of 1 Kings. We are inclined to think that the books, or rather the materials out of which they have been formed, were contemporaneous with the events recorded. The composition of a portion of 1 Samuel, Stähelin places in the time of Samuel, and his arguments are not without some force. Nor should we be inclined to place the date later than the reign of

Rehoboam, or very soon after it, as is the view of Thenius and De Wette.

Against this opinion as to the early age of the books of Samuel various objections have been brought. The phrase 'unto this day' is often employed in them to denote the continued existence of customs, monuments, and names, whose origin has been described by the annalist (1 Sam. v. 5; vi. 18; xxx. 25). This phrase, however, does not always indicate that a long interval of time elapsed between the incident and such a record of its duration. It was a common idiom. Joshua (xxii. 3) uses it of the short time that Reuben, Gad, and the half-tribe of Manasseh had fought in concert with the other tribes in the subjugation of Canaan. So again (xxiii. 9) he employs it to specify the time that intervened between the entrance into Canaan and his resignation of the command on account of his approaching decease. Matthew, in his Gospel (xxvii. 8, and xxviii. 15), uses it of the period between the death of Christ and the composition of his book. Reference is made in Samuel to the currency of a certain proverb (1 Sam. x. 12), and to the disuse of the term *seer* (1 Sam. ix. 9), but in a manner which by no means implies an authorship long posterior to the time of the actual circumstances. The proverb, 'Is Saul also among the prophets?' was one which for many reasons would obtain rapid and universal circulation: and if no other hypothesis be considered satisfactory, we may suppose that the remark about the term 'seer' becoming obsolete may be the parenthetical insertion of a later hand. Or it may be that in Samuel's days the term נביא came to be technically used in his school of the prophets.

The statement made in 1 Sam. xxvii. 6—'Ziklag pertaineth unto the kings of Judah unto this day,' is a form of language, which, according to De Wette (sec. 180), could not have been employed before the separation of the nation into the kingdoms of Judah and Israel. Hävernick remarks, however (sec. 169), that Ziklag belonged first to Judah, and then to Simeon, ere it fell into the hands of the Philistines; and that it became the property of David, and of David's successors as sovereigns of the territory of Judah. Judah is not used in opposition to the ten tribes; and Ziklag became a royal possession in consequence of its being a gift to David, and to such as might have regal power over Judah. The names Israel and Judah were used in the way of contrast even in David's time, as De Wette himself admits (1 Sam. xviii. 16; 2 Sam. xxiv. 1; v. 5; xix. 41-43; xx. 2). The explanation, however, is in all points not satisfactory. The phrase, if it be not a copyist's annotation, seems to imply the previous separation of the two kingdoms.

It is said in 1 Chron. xxix. 29, 'Now the acts of David the king, first and last, behold they are written in the book of Samuel the seer, and in the book of Nathan the prophet, and in the book of Gad the seer.' The old opinion as to the authorship of Samuel, to which we have already alluded, was founded on this quotation. The prophets were wont to write a history of their own times. That Samuel did so in reference to the great events of his life is evident from the statement that he 'wrote the manner of the kingdom in a book, and laid it up before the Lord' (1 Sam. x. 25). Bleek (*Eintl.* p. 178) thinks that the phrase, דברי שמואל, may refer to our present Samuel; but it is not so

comprehensive as this collection seems to have been, as it does not, like the treatise to which the author of Chronicles refers, include 'the acts of David, first and last.' The annals which these three seers compiled were those of their own times in succession; so that there existed a history of contemporary events—prophetic materials for the books of Samuel. For we do not hold, with Gramberg and other critics, that the 'words of Samuel, Nathan, and Gad' mean the present books of Samuel, as written successively by those prophetic authors. Hävernick (sec. 161) supposes that there was another source of information to which the author of Samuel might resort—namely, the annals of David's reign—a conjecture not altogether unlikely, as may be seen by his reference to 2 Sam. viii. 17, compared with 1 Chron. xxvii. 24. The accounts of David's heroes and their mighty feats, with the estimate of their respective bravery, may be a contribution by Seraiah, the scribe. Out of such materials—ample and authoritative, some of them written and some of them oral—the books of Samuel appear to be made up (Bunsen, *Bibelwerk*, 2d Abth. p. 496; Karo, *De fontibus librorum quæ feruntur Samuelis*, 1862).

Another evident source from which materials have been brought is a collection of poetic compositions—some Hebrew anthology. We have, first, the song of Hannah, the mother of Samuel, which is not unlike the hymn of the Virgin recorded by Luke. That song is by no means an anachronism, as has been asserted by Hensler (*Erläuter. d. I. B. Sam.* 12), by Thenius, who supposes it written by David after his victory over Goliath, and Ewald, who regards it as a triumphal ode celebrating a successful battle over some Gentile foes. Its mention of *King* and *Messiah* is thought to betray its recent and spurious birth. The song is one of ardent gratitude to Jehovah. It portrays his sovereign dispensations; asserts the character of his government to be that he 'resisteth the proud, and giveth grace to the humble'; and concludes with a prophetic aspiration, in pious keeping with the spirit of the theocracy, and with the great promise which it so zealously cherished (Hengstenberg, *Die Authentie des Pentat.* ii. 115). It is Messianic in spirit, and its figures are not more warlike than many other Messianic odes. Perhaps the references to King and Messiah embody the longing of the age, as it was ever portraying to itself its grand ideal—safety, peace, and life by the Anointed One so soon to have a type of himself in the two kings of Israel, on whose heads the son of Hannah was to pour the holy oil. 2 Sam. i. 18 also contains an extract from the book of Jasher—viz. a composition of the sweet singer of Israel, named 'the Song of the Bow.' Besides, there is the chorus of a poem which was sung on David's return from the slaughter of the Philistine giant (1 Sam. xviii. 7). There are also three hymns of David (2 Sam. vii. 18-29), in which the king offers up his grateful devotions to Jehovah (2 Sam. xxii.); a triumphal ode, found with some alterations in the 18th Psalm and 2 Sam. xxiii. 1-7, which preserves the last words of the 'anointed of the God of Jacob.' To these may be added the remains of a short elegy on the death of Abner (2 Sam. iii. 33, 34). Whether all these effusions, as well as the lament over David and Jonathan, were taken from Jasher, we know not. It may be that they were drawn from this common source, this national collection of the

Hebrew muse. At least some critics, who compare the long hymn found in 2 Sam. xxii., and which forms the 18th psalm, and note the variations of the text, are inclined to think that the one has not been copied from the other, but that both have been taken from a very old common source: a conjecture quite as natural as the ordinary hypothesis—namely, that David either published a second edition of his poem, or that the *varia lectiones* are the errors of transcribers. At all events the compiler of the books of Samuel has evidently used as one of his sources some collection of poetry. Such collections contain the earliest history of a nation, and they abounded among the susceptible people of the East.

But in opposition to our hypothesis it has been argued that in these books there are traces of several documents, which have been clumsily and inconsiderately put together, not only by a late but a blundering compiler. The elaborate theory of Eichhorn (*Einleit.* iii. p. 476), is similar to that which he has developed in his remarks on Chronicles—viz. that the basis of the second book of Samuel was a short life of David, which was augmented by interpolated additions. The first book of Samuel is referred by him to old written sources, but in most parts to tradition, both in the life of Samuel and Saul. Bertholdt (*Einleit.* p. 894) modifies this opinion by affirming that in the first book of Samuel there are three independent documents, chaps. i.-vii.; viii.-xvi.; xvii.-xxx.; containing respectively Samuel's history, Saul's life, and David's early biography; while in reference to the second book of Samuel, he generally admits the conjecture of Eichhorn. Gramberg (*Die Chronik*, vol. ii. p. 80) is in favour of two narratives, named by him A and B, but his theory wants even plausibility. Nor is the view of Thénius more satisfactory, though it be simpler. Such theories have little else to recommend them but the ingenious industry which framed them. It is said, however, that there are evident vestiges of two different sources being used and intermingled in Samuel; that the narrative is not continuous; especially, that it is made up of duplicate and contradictory statements. Such vestiges are alleged to be the following: In 1 Sam. x. 1, Samuel is said to have anointed Saul, whereas in x. 20-25 the prophet is described as having chosen him by lot. The reason of this twofold act we have already given in our remarks on Samuel in the preceding article. The former was God's secret election, the latter his public theocratic designation. Again, it is affirmed that two different accounts are given of the cause why the people demanded a king; the one (1 Sam. viii. 5) being the profligacy of Samuel's sons, and the other (xii. 12, 13) a menaced invasion of the Ammonites. Both accounts perfectly harmonise. The nation feared the inroads of the children of Ammon, and they felt that Samuel's sons could not command the respect and obedience of the various tribes. It was necessary to tell the old judge that his sons could not succeed him; for he might have pointed to them as future advisers and governors in the dreaded juncture.

The accounts of Saul's death are also said to differ from each other (1 Sam. xxxi. 2-6, and 2 Sam. i. 2-12). We admit the difference, the first account being the correct one, and the second being merely the invention of the cunning Amalekite, who framed the lie to gain the favour of Saul's

great rival David. It is recorded that twice did David spare Saul's life (1 Sam. xxiv. and xxvi.) The fact of the repetition of a similar deed of generosity can never surely give the narrative a legendary character. The miracle which multiplied the loaves and the fishes was twice wrought by Jesus. The same remark may be made as to the supposed double origin of the proverb, 'Is Saul also among the prophets?' In 1 Sam. x. 11 its real source is given, and in xix. 24 another reason and occasion are assigned for its national currency. Especially has great stress been laid on what are supposed to be different records of David's introduction to Saul, contained in 1 Sam. xvi. 18-22, and in the following chapter. That there is difficulty here cannot be denied; but to transpose the passages, on the supposition that David's encounter with Goliath was prior to his introduction to Saul as musician, will not remove the difficulty. For if Saul became so jealous of David's popularity as he is represented, no one of his domestics would have dared to recommend David to him as one possessed of high endowments, and able to charm away his melancholy. The Vatican MS. of the Sept. omits no less than twenty-five verses in these chapters. Yet the omission does not effect a reconciliation. Some critics—such as Houbigant, Michaelis, Dathe, and Kennicott—regard the entire passage as an interpolation. In the chapters as they stand David is first introduced to Saul as a minstrel, then as becoming a favourite of the sovereign, and being appointed one of his aides-de-camp. Now the fact of this previous introduction is alluded to in the very passage which creates the difficulty; for after, in minute Oriental fashion (Ewald, *Komposition der Genes.* p. 148), David and his genealogy are again brought before the reader, it is said, 'and David went and returned from Saul to feed his father's sheep at Bethlehem.' The only meaning this verse can have is, that David's attendance at court was not constant, especially as Saul's evil spirit may have left him. The writer who describes the combat with Goliath thus distinctly notices that David had already been introduced to Saul; nay, farther, specific allusion is again made to David's standing at court: 'And it came to pass on the morrow, that the evil spirit from God came upon Saul, and he prophesied in the midst of the house; and David played with his hand, as at other times' (1 Sam. xviii. 10). The phrase, 'as at other times,' must refer to the notices of the former chapter. Yet, after the battle, Saul is represented as being ignorant of the youth, and as inquiring after him; while Abner the general declares that he does not know the youthful hero. Can we imagine any ordinary compiler so to stultify himself as this author is supposed to have done, by intimating that David had been with Saul, and yet that Saul did not know him? It is therefore very probable that David had left Saul for some time before his engagement with Goliath; that the king's fits of gloomy insanity prevented him from obtaining correct impressions of David's form and person—the period of David's life, when the youth passes into the man, being one which is accompanied with marked change of appearance. The inquiry of Saul is also more about the young champion's parentage than about himself. Abner's vehement profession of ignorance is somewhat suspicious: 'As thy soul liveth, O king, I cannot tell;'—a response too solemn for a question so simple. We cannot pursue the investigation

farther. We would not in such a passage deny all difficulty, like Hävernicks (sec. 166), nor do we suppose that the difficulty is completely removed by any of these previous hints, yet no inconsistency can have been apparent to the compiler. The one of the accounts, however, may have been inserted in the course of transmission, and it does not seem to have been in the Codex from which the Alexandrian versionists translated. Appeal has also been made to David's two visits to Achish, king of Gath; but they happened in circumstances very dissimilar, and cannot by any means be regarded as a duplicate chronicle of the same event.

Lastly, in 1 Sam. xv. 35 it is said that 'Samuel came no more to see Saul again till the day of his death,' and the statement is supposed to contradict xix. 24, where Saul met with Samuel, and 'lay naked all day and all night before him.' The language is, 'Samuel added not to see or to visit Saul;' that is, no longer paid him any visit of friendship or ceremony, no longer sought him out to afford him counsel or aid. This declaration cannot surely be opposed to the following portion of the record, which states that Saul accidentally met Samuel; for he pursued David to Ramah, where the prophet dwelt, and so came in contact with his former benefactor. May we not therefore conclude that the compiler has not in these cases joined two narratives of opposite natures very loosely together, or overlapped them in various places; but has framed out of authoritative documents a consecutive history, not dwelling on all events with equal interest, but passing slightly over some, and formally detailing others with national relish and delight? There is, whatever their various sources—written or oral—a substantial unity in these books: Besides there are phrases peculiar to them, such as יהוה צבאות in 1 Sam. i. 3, 11, etc., and נחלת יהוה (2 Sam. xx. 19, etc.), which do not occur in the earlier books, and which seem to indicate a characteristic unity of style.

*Scope.*—The design of these books is not very different from that of the other historical treatises of the O. T. The books of Kings are a history of the nation as a theocracy; those of Chronicles have special reference to the form and ministry of the religious worship, as bearing upon its re-establishment after the return from Babylon. Samuel is more biographical, yet the theocratic element of the government is not overlooked. It is distinctly brought to view in the early chapters concerning Eli and his house, and the fortunes of the ark; in the passages which describe the change of the constitution; in the blessing which rested on the house of Obed-Edom; in the curse which fell on the Bethshemites, and Uzzah and Saul, for intrusive interference with holy things. The book shows clearly that God was a jealous God; that obedience to him secured felicity; that the nation sinned in seeking another king; that Saul's special iniquity was his impious oblivion of his station as Jehovah's vicerent, for he contemned the prophets and slew the priesthood; and that David owed his prosperity to his careful culture of the central principle of the Hebrew government.

*Relation to Kings and Chronicles.*—Samuel is distinctly referred to in Kings, and also quoted (comp. 1 Sam. ii. 33 with 1 Kings ii. 26; 2 Sam. v. 5 with 1 Kings ii. 11; 2 Sam. vii. 12 with 1 Kings ii. 4, and 1 Chron. xvii. 24, 25). The his-

tory in Kings presupposes that contained in Samuel. The opinion of Bertholdt, that the author of Chronicles did not use our books of Samuel, appears contrary to evident fact, as may be seen by a comparison of the two histories. Even Keil (*Apologetischer Versuch über die Chronik*, p. 206) supposes that the chronicler Ezra did not use the memoirs in Samuel and Kings; but Mövers, Eichhorn, Gramberg, and De Wette prove that the present books of Samuel were, among others, the sources which the chronicler drew from in the formation of a large portion of his history.

*Credibility.*—The authenticity of the history found in the books of Samuel rests on sufficient grounds. Portions of them are quoted in the N. T. (2 Sam. vii. 14, in Heb. i. 5; 1 Sam. xiii. 14, in Acts xiii. 22). References to them occur in other sections of Scripture, especially in the Psalms, to which they often afford historic illustration. It has been argued against them that they contain contradictory statements. The old objections of Hobbes, Spinoza, Simon, and Le Clerc, are well disposed of by Carpozovius (*Introductio*, p. 215; see Davidson's *Sacred Hermeneutics*, p. 541). Some of the objections of Vatke, in his *Bibl. Theol.*—cujus mentio est refutatio—are summarily disposed of by Hengstenberg (*Die Authentie des Pentat.* vol. ii. p. 115). Discrepancies in numbers, and sometimes in proper names, are the most common; and it is well known that textual errors in numeration are both most frequently and most easily committed. [DAVID; CHRONICLES; KINGS; SAUL.]

SAMUEL B. MEIER. [RASIBAM.]

SANBALLAT (סַנְבַּלַּט; Sept. Σαναβαλλάτ),

a native of Horonaim, beyond the Jordan (Neh. ii. 10), and probably also a Moabitish chief, whom (probably from old national hatred) we find united in council with the Samaritans, and active in attempting to deter the returned exiles from fortifying Jerusalem (Neh. iv. 1, *seq.*; vi. 1, *seq.*). Subsequently, during the absence of Nehemiah in Persia, a son of Joiada, the high-priest, was married to his daughter (Neh. xiii. 28). Whether Sanballat held any public office as governor over the Moabites, or over the Samaritans, the record does not state. Such a character is usually ascribed to him on the supposed authority of a passage of Josephus, who speaks of a Sanballat, a Cuthean by birth, who was sent by the last Darius as governor of Samaria (*Antiq.* xi. 7. 2). The time assigned to this Sanballat is 120 years later than that of the Sanballat of Nehemiah, and we can only identify the one with the other by supposing that Josephus was mistaken both in the age and nation of the individual whom

he mentions. Some admit this conclusion, as Josephus goes on to state how this person gave his daughter in marriage to a son of the high-priest, which high-priest, however, he tells us was Jaddua, in accordance with the date he has given. The son of the high-priest thus married to the daughter of Sanballat was named Manasseh, and is further stated by Josephus to have become the high-priest of the schismatic temple which his father-in-law established for the Samaritans in Mount Gerizim [SAMARITANS]. Upon the whole, as the account in Josephus is so circumstantial, it seems probable that, notwithstanding the similarity of name and other circumstances, his Sanballat is not to be understood as the same that obstructed the labours of Nehemiah. It is just possible that the Jewish historian, who does not mention this contemporary of Nehemiah purposely, on account of some similar circumstance transferred the history and name of Nehemiah's Sanballat to fill up the account of a later personage, of whose name and origin he may have been ignorant. But there is much obscurity and confusion in that part of his work in which he has lost the guidance of the canonical history, and has not acquired that of the books of Maccabees.—J. K.

SANDAL (ⲥⲏⲩ; Sept. and N. T. ὑπόδημα, *σανδάλιον*), a covering for the feet, usually denoted by the word translated 'shoe' in the A. V. It was usually a sole of hide, leather, or wood, bound on to the foot by thongs; but it may sometimes denote such shoes and buskins as eventually came into use. Thus the word ὑπόδημα, which literally means 'what is bound under,' i.e. the foot, and certainly in the first instance denoted a sandal, came to be also applied to the Roman *calceus*, or shoe covering the whole foot. Josephus (*De Bell. Jud.* vi. 1. 8) so uses it of the *caliga*, the thick nailed shoe of the Roman soldiers. This word occurs in the N. T. (Matt. iii. 11; x. 10; Mark i. 7; Luke iii. 16; x. 4; John i. 27; Acts vii. 33; xiii. 25), and is also frequently used by the Sept. as a translation of the Hebrew term; but it appears in most places to denote a sandal. Hence the word rendered 'shoe-latchet' (Gen. xiv. 23, and in most of the texts just cited) means properly a sandal thong.

Ladies of rank appear to have paid great attention to the beauty of their sandals (Cant. vii. 1); though, if the bride in that book was an Egyptian princess, as some suppose, the exclamation, 'How beautiful are thy feet with sandals, O prince's daughter!' may imply admiration of a luxury properly Egyptian, as the ladies of that country were noted for their sumptuous sandals (Wilkinson, *Anc. Egypt.* iii. 364). But this taste was probably general; for, at the present day, the dress slippers of ladies of rank are among the richest articles of their attire, being elaborately embroidered with flowers and other figures wrought in silk, silver, and gold.

It does not seem probable that the sandals of the Hebrews differed much from those used in Egypt, excepting, perhaps, that from the greater roughness of their country, they were usually of more substantial make and materials. The Egyptian sandals varied slightly in form: those worn by the upper classes, and by women, were usually pointed and turned up at the end, like our skates, and many of the Eastern slippers at the

present day. They were made of a sort of woven or interlaced work of palm-leaves and papyrus-stalks, or other similar materials, and sometimes of leather; and were frequently lined with cloth, on which the figure of a captive was painted; that humiliating position being considered suited to the enemies of their country, whom they hated

460. Ancient Egyptian Sandals.

and despised. It is not likely that the Jews adopted this practice; but the idea which it expressed, of treading their enemies under their feet, was familiar to them (Josh. x. 24). Those of the middle classes who were in the habit of wearing sandals often preferred walking barefooted. Shoes, or low boots, are sometimes found at Thebes; but these are believed by Sir J. G. Wilkinson to have been of late date, and to have belonged to Greeks, since no persons are represented in the paintings as wearing them, except foreigners. They were of leather, generally of a green colour, laced in front by thongs, which passed through small loops on either side, and were principally used, as in Greece and Etruria, by women (Wilkinson, iii. 364-367).

461. Greek and Roman Sandals.

In transferring a possession or domain, it was customary to deliver a sandal (Ruth iv. 7), as in our middle ages a glove. Hence the action of throwing down a shoe upon a region or territory, was a symbol of occupancy. So Ps. lx. 10: 'Upon the land of Edom do I cast my sandal;' i.e. I possess, occupy it, claim it as my own. In Ruth, as above, the delivering of a sandal signified that the next of kin transferred to another a sacred obligation; and he was hence called 'sandal-loosed.' A sandal thong (Gen. xiv. 23),

or even sandals themselves (Amos ii. 6; viii. 6), are put for anything worthless or of little value; which is perfectly intelligible to those who have witnessed the extemporaneous manner in which a man will shape two pieces of hide, and fasten them with thongs to the soles of his feet—thus fabricating in a few minutes a pair of sandals which would be dear at a penny.

It was undoubtedly the custom to take off the sandals on holy ground, in the act of worship, and in the presence of a superior. Hence the command to take the sandals from the feet under such circumstances (Exod. iii. 5; Josh. v. 15). This is still the well-known custom of the East—an Oriental taking off his shoe in cases in which a European would remove his hat. The shoes of the modern Orientals are, however, made to slip off easily, which was not the case with sandals, that required to be unbound with some trouble. This operation was usually performed by servants; and hence the act of unloosing the sandals of another became a familiar symbol of servitude (Mark i. 7; Luke iii. 16; John i. 27; Acts xiii. 25). So also when a man's sandals had been removed, they were usually left in charge of a servant. In some of the Egyptian paintings, servants are represented with their master's sandals on their arm: it thus became another conventional mark of a servile condition, to bear the sandals of another (Matt. iii. 11).—J. K.

**SANHEDRIM** or **SANHEDRIN** (סנהדרין), more properly *Synhedrium* or *Synedrium* (=συνέδριον), as it is called in the N. T. (Matt. v. 22; xxvi. 59; Mark xiv. 55; xv. 1; Luke xxii. 66; John xi. 47; Acts iv. 15; v. 21, 27, 34; vi. 12, 15; xxii. 30; xxiii. 1, 6, 15, 20, 28; xxiv. 20), and by Josephus (*Vita*, xii. 4; *Antiq.* xiv. 9. 3) apocopated סנהדרין, plural סנהדריות, the supreme council of the Jewish nation in and before the time of Christ. As there were two kinds of Synedria—viz. the supreme or metropolitan Sanhedrim, called סנהדרין גדולה, *the Great Sanhedrim* (*Mishna Horajoth*, i. 5); and provincial councils called סנהדרין קטנה, *the Small Sanhedrim* (*Mishna, ibid.*)—differing in constitution and jurisdiction from each other, we shall describe their respective organisation and functions separately.

#### I. THE GREAT SANHEDRIM OR THE SUPREME COUNCIL.

1. *Number of Members and their Classification.*—The Great Sanhedrim, or *the supreme court of justice* (בית דין הגדול) as it is called (*Mishna Horajoth*, i. 5; *Sanhedrin*, xi. 4), or *בית דין*, *the court of justice, the judgment-hall*, because it was the highest ecclesiastical and civil tribunal, consisted of seventy-one members (*Mishna Sanhedrin*, i. 5, 6; ii. 4; *Shetnoth*, ii. 2). These members represented three classes of the nation—viz. i. *The priests*, who were represented by their chiefs, called in the Bible *the chief priests* (ראשי הכהנים = πάντες οἱ ἀρχιερεῖς), of whom there were most probably four and twenty (1 Chron. xxiv. 4, 6; with Matt. xxvii. 1; John vii. 32; xi. 47; xii. 10); ii. *The elders*, זקנים = πρεσβύτεροι (Matt. xvi. 21; xxi. 23; xxvi. 3, 47, 57, 59; xxvii. 1, 3, 12, 20, 41; xxviii. 12; Mark viii. 31; xi. 27; xiv. 43, 53; Luke ix. 22; xx. 1; xxii. 52; John viii. 9; Acts iv. 5, 23; vi.

12; xxiii. 14; xxv. 15); also called *the elders of the people* (ἀρχοντες τοῦ λαοῦ, Acts iv. 8 with ver. 5), because they were the heads of the families and tribes of the people, for which reason πρεσβύτεροι and ἀρχοντες are also synecdochically used for βουλή and συνέδριον (Luke xxiii. 13; xxiv. 20; Acts iii. 17, etc.) These elders, who most probably were also twenty-four in number (Rev. iv. 4), were the representatives of the laity, or the people generally; and iii. *The scribes or lawyers* (סופרים=γραμματεῖς [SCRIBES]), who, as the interpreters of the law in ecclesiastical and civil matters, represented that particular portion of the community which consisted of the literary laity, and most probably were twenty-two in number. As the chief priests, elders, and scribes, constituted the supreme court, these three classes are frequently employed in the N. T. as a periphrasis for the word Sanhedrim (Matt. xxvi. 3, 57, 59; xxvii. 41; Mark viii. 31; xi. 27; xiv. 43, 53; xv. 1; Luke ix. 22; xx. 1; xxii. 66; Acts v. 21; vi. 12; xxii. 30; xxv. 15); whilst St. John, who does not at all mention the Sadducees, uses the term Pharisees to denote *the Sanhedrim* (i. 24; iv. 1; viii. 3; xi. 46, etc.)

2. *Qualification and Recognition of Members.*—The qualifications for membership were both very minute and very numerous. The applicant had to be morally and physically blameless. He had to be middle-aged, tall, good-looking, wealthy, learned both in the divine law and diverse branches of profane science—such as medicine, mathematics, astronomy, magic, idolatry, etc.—in order that he might be able to judge in these matters. He was required to know several languages, so that the Sanhedrim might not be dependent upon an interpreter in case any foreigner or foreign question came before them (*Menachoth*, 65 a; *Sanhedrin*, 17 a; Maimonides, *Iad Ha-chezaka, Hilchoth Sanhedrin*, ii. 1-8). Very old persons, proselytes, eunuchs, and Nethinim, were ineligible because of their idiosyncracies, nor could such candidates be elected as had no children, because they could not sympathise with domestic affairs (*Mishna Horajoth*, i. 4; *Sanhedrin*, 36 b), nor those who could not prove that they were the legitimate offspring of a priest, Levite, or Israelite, who played dice, lent money on usury, flew pigeons to entice others, or dealt in produce of the Sabbatical year (*Mishna Sanhedrin*, iii. 3). In addition to all these qualifications, a candidate for the Great Sanhedrim was required, first of all, to have been a judge in his native town, to have been transferred from there to the Small Sanhedrim, which sat at the temple mount, or at its entrance (or פתח הר הבית, thence again to have been advanced to the second Small Sanhedrim, which sat at the entrance of the temple hall (פתח העזרה or היל), before he could be received as member of the seventy-one (*Sanhedrin*, 32 a, 88 b; Maimonides, *Iad Ha-chezaka, Hilchoth Sanhedrin*, ii. 8).

The ordination took place when the candidate was first appointed judge in his native place. In olden days every ordained teacher could ordain his disciples; afterwards, however, the sages conferred this honour upon Hillel I., B.C. 30; it was then decreed that no one should be ordained without the permission of the president of the Sanhedrim (נשיא), that the president and the vice-president should not ordain in the absence of each other, but that both should be present, and that any other member may ordain with the permission of the

president and the assistance of two non-ordained persons, as no ordination was valid if it was effected by less than three persons (*Mishna Sanhedrin*, i. 3). The ordination was effected, not by the laying on of hands on the head of the elder, but by their calling him rabbi, and saying to him, 'Behold thou art ordained, and hast authority to judge even cases which involve pecuniary fines' (כַּנְדָּר).

היא הסמיכה לדורות. לא שסמכו ידיו על ראש חזקן אלא שקורין לו רבי ואומרים לו הרי את סמוך ויש לך רשות לרון אפילו דיני קנסות, Maimonides, *ibid.* iv. 1-4).

The Sanhedrim was presided over by a president called *Nasi* (נָשִׂיא) = prince, patriarch, and a vice-president styled רִבִּי בֵּית דִּין אֲבִי, the father of the house of judgment. The power of electing these high officials was vested in the corporate assembly of members, who conferred these honours upon those of their number who were most distinguished for wisdom and piety. The king was the only one disqualified for the presidential throne, because according to the Jewish law it is forbidden to differ from him, or to contradict his statement; but the high-priest might be elected patriarch provided he had the necessary qualifications (*Sanhedrin*, 18 b; Maimonides, *Jad Ha-Chazaka, Hilchoth Sanhedrin*, ii. 3). After the death of Hillel I., however, the presidency became hereditary in his family for thirteen generations. [EDUCATION; HILLEL I.] The functions of the *Nasi* or the Patriarch were more especially external. Being second to the king, the *Nasi* represented the civil and religious interests of the Jewish nation before the Roman government abroad, and before the different Jewish congregations at home; whilst in the Sanhedrim itself he was simply the reciting and first teacher. The vice-president, on the other hand, had his sphere of labour more especially within the Sanhedrim. It was his office to lead and control their discussions on disputed points. Hence his appellation, 'Father of the House of Judgment.' Next to the vice-president, or the third in rank in the Sanhedrim, was the חֹכֵם, sage, referee, whose office it was to hear and examine the pending subject in all its bearings, and then to bring it before the court for discussion. This dignity we first meet with under the presidency of Gamaliel II., the teacher of the apostle Paul [GAMALIEL], and his son Simon II. (*Horajoth*, 13; *Tosephta Sanhedrin*, cap. vii.; Frankel, *Monatschrift*, i. 348). Besides these high functionaries there were sundry servants not members of the seventy-one, such as two judges' scribes (סוֹפְרֵי הַדִּינִין), or notaries, one of whom registered the reasons for acquittal, and the other the reasons for condemnation (*Mishna Sanhedrin*, iv. 3); and other menial officials, denominated שְׂטָרִים שְׂטָרִים בית דין, = ὑπηρέτης, πράκτωρ (Matt. v. 25; xxvi. 58; Mark xiv. 54, 65; Luke xii. 58; John vii. 32, 45; xviii. 3, 12, 18, 22; xix. 6; Acts v. 22, 26; xxiii. 2, etc.).

3. Place, time, and order in which the sessions were held.—There seems not to have been any prescribed place for holding the sessions in the early part of the Sanhedrim's existence. In all probability they were held in some place adjoining the temple, as the neighbourhood of the sanctuary was deemed specially appropriate for the solemn assemblies which had to decide upon the most momentous questions affecting life and death, time

and eternity. It was Simon b. Shetach (B.C. 110-65) who built the Hall of Squares (לְשַׁבֵּת הַמִּנְיֹת), where both the Sanhedrim and the priests permanently held their meetings. This basilica, the floor of which was made of hewn square stones—whence its name (*Joma*, 25 a)—was situate in the centre of the south side of the temple court, the northern part extending to the court of the priests (קֹדֶשׁ), and the southern part to the court of the Israelites (חול); it was thus lying between these two courts, and had doors into both of them (*Mishna Sanhedrin*, xi. 2; *Pea*, iii. 6; *Middoth*, v. 3, 4; Herzfeld, *Geschichte des Volkes Israel*, i. 394, ff.; Jost, *Geschichte des Judenthums*, i. 145, 275). This hall henceforth became the prescribed court for the sessions of the Sanhedrim. The assembling of the Sanhedrim in the high-priest's house was illegal. Equally illegal was the assumption of the presidency by this sacerdotal functionary over this supreme court recorded in the N. T. (Matt. xxvi. 3; Acts v. 21, 27; xxiii. 2), as Gamaliel I. was then the legitimate president (*Pesachim*, 88 b; [EDUCATION]). When it is remembered that this sacred office was at that time venial, and that the high-priest was the creature of the Romans, this priestly arrogance will not be matter of surprise. Forty years before the destruction of the temple [*i.e.* while the Saviour was teaching in Palestine] the sessions of the Sanhedrim were removed from the Hall of Squares to the Halls of Purchase'

מִשְׁנָה עַד שְׁלֹא חָרַב הַבֵּית גָּלְתָה לֵה סְנַהֲדְרִין וַיִּשְׁבְּהוּ (מִשְׁנָה עַד שְׁלֹא חָרַב הַבֵּית גָּלְתָה לֵה סְנַהֲדְרִין וַיִּשְׁבְּהוּ), *Sabbath*, 15 a; *Aboda Sara*, 8 b), on the east side of the temple mount.

The Sanhedrim sat every day from the termination of the daily morning sacrifice till the daily evening sacrifice, with the exception of the Sabbath and festivals, when they retired to the synagogue on the temple mount and delivered lectures (*Sanhedrin*, 88 b; Maimonides, *Jad Ha-Chazaka, Hilchoth Sanhedrin*, iii. 1). The order in which they sat was as follows:—The president (נָשִׂיא) sat in an elevated seat; on his right hand sat the vice-president (רִבִּי בֵּית דִּין אֲבִי), and at his left the *Chacham* (חֹכֵם), or Referee; whilst the members, seated on low cushions, with their knees bent and crossed in the Oriental fashion, were arranged according to their age and learning in a semicircle—so that they could see each other, and all of them be seen by the president and vice-president. The two notaries stood before them, one to the right and the other to the left. Before them sat three rows of disciples

(תַּלְמִידֵי חֻכְמִים), in places appropriate to their respective attainments. From the first of these rows the ranks of the judges were always filled up, when those of the second row took their seat in the first, those of the third took the seats of the second, whilst members of the congregation generally were selected to fill the lowest places vacated in the third row (*Mishna Sanhedrin*, iii. 3, 4; Maimonides, *ibid.* i. 3). Under ordinary circumstances all the seventy-one members were not required to be present in their seats, so that most of them could attend to their business, since twenty-three members formed a quorum. Less than this number during any part of the session was illegal. Hence before one could go out he was obliged to look round in order to ascertain that there was the legal quorum without him (*Sanhedrin*, 88 b; *Tosiphta Shekalim*, at the end; Maimonides, *Hilchoth Sanhedrin*, iii. 2).

4. *Jurisdiction of the Sanhedrim.*—Being both legislative and administrative, the functions of the Sanhedrim in the theocracy extended to the institution of ordinances and the definition of disputed points in ecclesiastical matters, as well as to the adjudication of ecclesiastical and secular questions, including even political matters. The tribunal had in the first place to interpret the divine law, and to determine the extension or limitation of its sundry enactments, inasmuch as the members of the Sanhedrim were not only the most skilled in the written word of God, but were the bearers of the oral law which was transmitted to them by their predecessors, and which they again in succession handed down to the other members of this body. Thus the Sanhedrim had—i. To watch over the purity and legality of the priests who ministered in holy things. For this purpose they appointed trustworthy persons to keep family registers (כפר יוחסין, *genealogies*) of the priests in Egypt, Babylon, and in all places where the Jews resided, stating the names, and giving all the particulars both of the head of the family and all his male descendants, and to supply every priest with such a document attested by the Sanhedrim, inasmuch as those priests who could not prove that they were not the issue of proscribed marriages were disqualified for ministering in holy things, and were ordered to divest themselves of their sacerdotal robes and put on mourning (*Mishna Sanhedrin*, i. 5; *Middoth* v. 4; *Bechoroth*, 45 a; *Tosephta Chagiga*, cap. ii.; *Joseph. Cont. Apion.* i. 7). ii. To try cases of unchastity on the part of priests' daughters, and married women who were accused by their husbands of infidelity, which were questions of life and death (*Mishna Sota*, i. 4; *Sanhedrin*, 52 a). iii. To watch over the religious life of the nation, and to try any tribe which was accused of having departed from the living God to serve idols (*Sanhedrin*, i. 5). iv. To bring to trial false prophets or any heretic who promulgated doctrines contrary to the tenets of the Scribes or the Sanhedrim (דברי סופרים): 'Such an one is not to be executed by the tribunal of his native place, nor by the tribunal at Jabne, but by the supreme court of Jerusalem; he is to be kept till the forthcoming festival, and to be executed on the festival

(וממיתין אותו ברגל), as it is written (Deut. xvii. 13). 'and the people shall hear and fear, and do no more presumptuously' (*Mishna Sanhedrin*, xi. 3, 4; comp. also Matt. xxvi. 65; xxvii. 63; John xix. 7; Acts iv. 2; v. 28; vi. 13). In accordance with this is the remark of our Saviour: 'It cannot be that a prophet perish out of Jerusalem' (Luke xiii. 33, with *Joseph. Antig.* xiv. 9. 3). v. To see that neither the king nor the high-priest should act contrary to the law of God. Thus the Talmud tells us that Alexander Jannæus was summoned before the Sanhedrim to witness the trial of his servant who had committed murder (B. C. 80), under the presidency of Simon b. Shetach (*Sanhedrin*, 19 a), and we know that Herod had to appear before this tribunal to answer for his conduct (*Joseph. Antig.* xiv. 9. 4). vi. To determine whether a war with any nation contemplated by the king is to be waged, and to give the sovereign permission to do so (*Sanhedrin*, i. 5; ii. 4). vii. To decide whether the boundaries of the holy city or the precincts of the temple are to be enlarged, inasmuch as it was only by the decision of the Sanhedrim that these additions

could be included in the consecrated ground (*ibid.* i. 5; *Shebuoth*, 14 a). viii. To appoint the provincial Sanhedrim, or courts of justice (*Sanhedrin*, i. 5; *Gemara, ibid.* 63 b; *Tosephta Sanhedrin*, cap. vii.; *ibid. Chagiga*, cap. ii.; *Jerusalem Sanhedrin*, i. 1, p. 19 b). ix. To regulate the calendar and harmonise the solar with the lunar year by appointing intercalary days (*Sanhedrin*, 10 b). This jurisdiction of the Sanhedrim was recognised by all the Jews both in Palestine and in foreign lands (Acts ix. 2; xxvi. 10; with *Mishna Manoth*, vi. 10; *Tosephta Sanhedrin*, cap. vii.; *Chagiga*, cap. ii.) Thereby this supreme court secured unity of faith and uniformity of practice.

5. *Mode of conducting trials, punishments, etc.*—The humane and benevolent feelings of the Pharisees towards the people whom they represented [PHARISEES] were especially seen in their administration of the law. They always acted upon the principle that the accused was innocent till he could be proved guilty. Hence they always manifested an anxiety in their mode of conducting the trial to clear the arraigned rather than secure his condemnation, especially in matters of life and death. Their axiom was that 'the Sanhedrim is to save, not to destroy life' (*Sanhedrin*, 42 b). Hence no man could be tried and condemned in his absence (John vii. 51); and when the accused was brought before the tribunal, the president of the Sanhedrim at the very outset of the trial solemnly admonished the witnesses, pointing out to them the preciousness of human life, and earnestly beseeching them carefully and calmly to reflect whether they had not overlooked some circumstances which might favour the innocence of the accused (*Sanhedrin*, 37 a). Even the attendants were allowed to take part in the discussion, if a mild sentence could thereby be procured; whilst those members of the Sanhedrim who during the debate once expressed themselves in favour of acquitting the accused, could not any more give their votes for his condemnation at the end of the trial. The taking of the votes always began from the junior member and gradually went on to the senior, in order that the lowest members might not be influenced by the opinion of the highest (*ibid.* 32 a). In capital offences, it required a majority of at least two to condemn the accused, and when the trial was before a quorum of twenty-three, or before the *Small Sanhedrim*, which consisted of this number, thirteen members had to declare for the guilt (*Mishna Sanhedrin*, iv. 1; *Gemara, ibid.* 2 a, 40 a). In trials of capital offences, the verdict of acquittal could be given on the same day, but that of guilty had to be reserved for the following day; for which reason such trials could not commence on the day preceding the Sabbath or a festival. No criminal trial could be carried through in the night (*Mishna Sanhedrin*, iv. 1; *Gemara, ibid.* 32). The judges who condemned a criminal to death had to fast all day (*Sanhedrin*, 63 a). The condemned was not executed the same day on which the sentence was passed; but the votes *pro* and *con.* having been taken by the two notaries, the members of the Sanhedrim assembled together on the following day to examine the discussion, and to see whether there was any contradiction on the part of the judges (*Mishna Sanhedrin*, iv. 1; *Gemara, ibid.* 39 a). If on the way to execution the criminal remembered that he had something fresh to adduce in his favour, he was

led back to the tribunal, and the validity of his statement was examined. If he himself could say nothing more, a herald preceded him as he was led to the place of execution, and exclaimed, 'A, son of B, has been found guilty of death, because he committed such and such a crime according to the testimony of B and C; if any one knows anything to clear him, let him come forward and declare it' (*Mishna Sanhedrin*, vi. 1). Clemency and humanity, however, were manifested towards him even when his criminality was beyond the shadow of a doubt, and when the law had to take its final course. Before his execution, a stupefying beverage was administered to the condemned by pious women to deprive him of consciousness, and lessen the pain (*Sanhedrin*, 43 a, with Matt. xxvii. 48; Mark xv. 23, 36; Luke xxiii. 36; John xix. 29, 30). The property of the executed was not confiscated, but passed over to his heirs (*Sanhedrin*, 48 b). The only exception to this leniency was one who gave himself out as the Messiah, or who led the people astray from the doctrines of their fathers (כּוֹסֵית וּמְרִידָה = πλάνους; Matt. xxvii. 63; Luke xiii. 33; Acts iv. 2; v. 28). Such an one had to endure all the rigours of the law without any mitigation (*Sanhedrin*, 36 b; 67 a). He could even be tried and condemned the same day or in the night (*Tosephta Sanhedrin*, x.; Matt. xxvii. 1, 2).

As to the different punishments which the Sanhedrim had the power to inflict, though they were commensurate with the gravity of the offences which fell within their jurisdiction to try, and embraced both corporeal (Acts v. 40; *Mishna Maimonides*, iii. 1-5) and capital punishments, yet even this supreme court was restricted to four modes of taking life—viz. by stoning, burning, beheading,

and strangling (סְקִילָה שְׂרִיפָה הֶרֶג וְחָנָק). These four modes of execution were the only legal ones among the Jews from time immemorial (*Mishna Sanhedrin*, vii. 1), and could be inflicted either by the Great Sanhedrim or by the Small Sanhedrim. According to the Gospel of St. John, however, the Jews declare (ἡμεῖς οὐκ ἐξουσίαν ἔχομεν θάνατον δοῦναι), 'It is not lawful for us to put any man to death' (xviii. 31); which agrees with the remark in the Jerusalem Talmud (הֵנִי קָדֵם לְאַרְבָּאִים שָׁנָה עַד שְׁלֵא חֲרַב) תְּנִי קָדֵם לְאַרְבָּאִים שָׁנָה עַד שְׁלֵא חֲרַב) that 'forty years before the destruction of the temple the power of inflicting capital punishment was taken away from Israel' (*Sanhedrin*, i. beginning; vii. 2, p. 24).

But this simply means that without the confirmation of the sentence on the part of the Roman procurator, the Jews had not the power to carry the sentence of the Sanhedrim into execution. This is not only confirmed by Josephus, who tells us that the Pharisees complained to the procurator Albinus about the assumption to execute capital punishment on the part of the Sadducean high-priest (*Antiq.* xx. 9. 1), but by the appeal of St. Paul to the chief captain (Acts xxii. 25-30), and especially by the whole manner in which the trial of Jesus was conducted. The stoning of Stephen (Acts vii. 54, etc.) was the illegal act of an enraged multitude.

## II. THE SMALL SANHEDRIM.

i. *Members, Constitution, etc.*—This judicial court consisted of twenty-three members, who were appointed by the Great Sanhedrim (*Mishna Sanhedrin*, i. 5, 6), and a president (כּוֹפֵלָא, *excellency*)

as their head (*Mishna Sanhedrin*, i. 6; *Horajoth*, 4 b). They had the power not only to judge civil cases, but also such capital offences as did not come within the jurisdiction of the supreme court (*Mishna, ibid.* i. 4; iv. 1). Such provincial courts were appointed in every town or village which had not less than 120 representative men (מַעֲמִידִין)—i.e. 23 judges, three ranks of disciples of 23 persons each (=69), 10 constant attendants in the

synagogue (עֵשְׂרָה בַּטְלָנִין שֶׁל בֵּית הַכְּנֶסֶת), 2 judges' notaries, the one to write down the arguments for and the other the arguments against the accused's innocence; 2 court-servants to administer the forty stripes save one, and to wait upon the judges; 2 judges, 2 witnesses, 2 counter-witnesses, 2 witnesses to gainsay the counter-witnesses, 2 almoners, and 1 additional to distribute the alms, 1 physician, 1 scribe (לְבַלֵּי), and 1 schoolmaster for children, in all 120 (*Sanhedrin*, 17 b; Maimonides, *Iad Ha-Chesaka*, *Hilchoth Sanhedrin*, i. 10).

ii. *Place, Time, and Order in which the Sessions were held.*—In the provinces these courts of justice were at first held in the market-place, but afterwards in a room adjoining the synagogue (*Jerusalem Sanhedrin*, i. 1; *Baba Mezia*, li. 8), for the same reason which made the Great Sanhedrim hold their sittings in the Hall of Squares, in the inner court of the Temple. They sat every Monday and Thursday, being market-days (*Baba Rema*, 82 a; *Kathuboth*, 3 a), from the termination of morning prayer till the sixth hour (Maimonides, *Hilchoth Sanhedrin*, iii. 1). The order in which they were ranged was the same as that of the Great Sanhedrim. There were two of these lesser courts of justice in Jerusalem itself; one sat at the entrance to the Temple Mount (פֶּתַח הַר הַבַּיִת, הַר בֵּית) and the other at the entrance to the Temple Hall (פֶּתַח הַעֲזָרָה), *Mishna Sanhedrin*, ix. 2), which on special occasions met together with the Great Sanhedrim (*Sanhedrin*, 88 b). There was no appeal to the Great Sanhedrim against the decision of this lesser Sanhedrim. Only when the opinion of the judges was divided did they themselves consult with the supreme court. The stripes to which offenders were sentenced were given in the synagogue by the officer already mentioned (Mark xiii. 9 with Matt. x. 17, xxiii. 34), and it is evidently to such a local Sanhedrim that reference is made in Matt. v. 22, x. 17; Mark xiii. 9.

Besides these two courts there was also one consisting of three judges. Within the jurisdiction of this court came suits for debts, robbery, bodily injuries, compensation for damages; thefts which involved a twofold, fourfold, or fivefold value to the proprietor (Exod. xxii. 1-9); rapes, seduction, slander, and all minor offences (*Mishna Sanhedrin*, i. 1-3; iii. 1). There were in Jerusalem alone 390 such Sanhedrim.

## III. ORIGIN, DEVELOPMENT, AND EXTINCTION OF THE SANHEDRIM.

According to the most ancient Jewish tradition, the Sanhedrim was instituted by Moses, when he appointed, according to the command of God, seventy elders, who, together with him as their president, were to act as magistrates and judges (Num. xi. 16-24), thus constituting the first Sanhedrim with its seventy-one members (*Mishna Sanhedrin*, i. 6; *Gemara, ibid.* 2). Hence the so-called Jerusalem Targum paraphrases Exod.

xv. 27, 'And they came to Elim, and there were there twelve fountains of water, answering to the twelve tribes of Israel, and seventy palm-trees, answering to the seventy elders of the Sanhedrim of Israel,' whilst the other Chaldee versions express the judicial courts and colleges of the remotest antiquity by the name Sanhedrim (comp. Targum, Is. xxviii. 6; Ruth iii. 11; iv. 1; Ps. cxl. 10; Eccles. xii. 12). Hence, too, the offices of president and vice-president are traced to Moses (*Jerusalem Sota*, ix. 10); in the time of the kings, we are assured, Saul was president of the Sanhedrim in his reign, and his son Jonathan was vice-president (*Moed Katon*, 26 a); and these two functions continued during the time of the later prophets (*Pea*, 2 b; *Nasir*, 56 b; *Tosephta Jadajim*, cap. 11). The Chaldee paraphrase on the Song of Songs tells us that the Sanhedrim existed even in the Babylonish captivity, and that it was reorganised by Ezra immediately after the return from the exile (comp. Song of Songs vi. 1). But though this view has also been entertained by some of the most learned Christian scholars (ex. gr. Selden, Leusden, Grotius, Reland), and though allusion is made in Jeremiah (xxvi. 8, 16) to the several distinct classes which we afterwards find constituting the Sanhedrim, whilst Ezekiel (viii. 11, etc.) actually mentions the existence of seventy elders in his time; yet there seems to be little doubt that this supreme court as it existed during the second temple developed itself in the Greek rule over Palestine. This is corroborated by the following reasons:—*i.* The historical books of the Bible are perfectly silent about the existence of such a tribunal. *ii.* The prophets, who again and again manifest such zeal for justice and righteous judgment, never mention this court of justice, but always refer the administration of the law to the ruling monarch and the magnates of the land, thus showing that this central administration belongs to the period of the second temple. *iii.* The name *συνέδριον, συνεδρεύειν*, by which it has come down to us, points to the fact that this synod originated during the Macedonian supremacy in Palestine. It is true that Josephus does not mention the Sanhedrim before the conquest of Judaea by Pompeius (B.C. 63); but the very fact that it had such power in the time of Hyrcanus II. as to summon Herod to answer for his unjust conduct (Joseph. *Antiq.* xiv. 9. 4), shows that it must then have been a very old institution to have acquired such development and authority. Hence Frankel rightly remarks: 'Upon more minute examination, we find that the chronicler gives a pretty plain sketch of the Great Sanhedrim, as he mentions the existence in Jerusalem of a supreme court consisting of priests, Levites, and heads of families, with the high-priest as president (2 Chron. xix. 8, 11). . . . Now the chronicler, as Zunz has shown (*Gottesdienstlichen Vorträge*, p. 32), lived about the beginning of the 2d century of the Seleucidæan era, so that at that time the Sanhedrim did already exist, and its beginning is to be placed at the period in which Asia was convulsed by Alexander and his successors of the Ptolemean and Seleucidæan dynasties. Palestine, too, felt deeply the consequences of these recent convulsions, and to preserve its internal religious independence it required a thoroughly organised body to watch over both its doctrines and rights. This body manifested itself in the Sanhedrim, at the head of which was the

high-priest, as is seen from Ecclesiasticus iv. 4, 5, and 2 Chronicles xix. 8, 11. The Sanhedrim seems to have been dissolved in the time of the Maccabean revolt in consequence of the unworthy high-priests (comp. 2 Maccab.); but it was reconstructed after the overthrow of the Syrian yoke. As the people, however, were unwilling to leave the whole power in the hands of the Maccabees, who were already princes and high-priests, they henceforth placed at the head of the Sanhedrim a president (*נשיא*) and a vice-president' (*אב בית דין*), *Der gerichtliche Beweis*, p. 68, note). This is moreover corroborated by the traditional chain of presidents and vice-presidents, which are uninterruptedly traced from Jose b. Jozer (B.C. 170), as well as by the statement that with Simon the Just terminated the Great Synagogue (*Abot*, i. 2), from which the Sanhedrim developed itself. The transition from the Great Synagogue to the Great Sanhedrim is perfectly natural. 'The Macedonian conqueror,' as Frankel justly states (*Programm*, p. 6, 1834), 'with all his clemency towards Palestine, which resisted him so long and so obstinately, effected changes in the internal government of the people, and dissolved the Great Synagogue, which to a certain extent conferred independence and a republican constitution upon the land. The people, however, valued highly their old institutions, and would not relinquish them. Hence most probably in the confusions which broke out after Alexander's death, when the attention of the fighting chiefs could not be directed towards Palestine, the Supreme Court was formed anew, assuming the name Synhedrion, which was a common appellation among the Greeks for a senate.' It was this development of the Great Sanhedrim from the Great Synagogue which accounts for the similarity of the two names (*סנהדרין*)

(*גדולה, כנסת הגדולה*). After the destruction of Jerusalem, when the holy city was no longer adapted to be the centre of religious administration, R. Jochanan b. Zakkai transferred the seat of the Sanhedrim to Jabne or Jamina (A.D. 68-80); it was thence transferred to Usha (*Kethuboth*, 49; *Sabbath*, 15; *Kosh Ha-Shana*, 15 b), under the presidency of Gamaliel II. b. Simon II. (A.D. 80-116), conveyed back to Jabne and again to Usha; to Shafran under the presidency of Simon III. b. Gamaliel II. (A.D. 140-163), to Beth-Shearim and Sapphoris under the presidency of Jehudah I. the Holy, b. Simon III. (A.D. 163-193, comp. *Kethuboth*, 103 b; *Nida*, 27 a), and finally to Tiberias under the presidency of Gamaliel III. b. Jehudah I. (A.D. 193-220), where it became more of a consistory, but still retaining under the presidency of Jehudah II. b. Simon III. (A.D. 220-270) the power of excommunication in case any Israelite refused to abide by its decisions; whilst under the presidency of Gamaliel IV. b. Jehudah II. (A.D. 270-300), it dropped the appellation Sanhedrim, and the authoritative decisions were issued under the name *בית המדרש*. Gamaliel VI. (A.D. 400-425) was the last president. With the death of this patriarch, who was executed by Theodosius II. for erecting new synagogues contrary to the imperial inhibition, the title of *Nasi* (*נשיא*), the last remains of the ancient Sanhedrim, became wholly extinct in the year 425 [EDUCATION]. It was with reference to this Supreme Court that Christ chose seventy disciples (Luke x. 1), answering to the seventy senators

composing the Sanhedrim, just as he chose twelve apostles with reference to the twelve tribes of Israel (Matt. xix. 28; Luke xxii. 30), to indicate thereby to the Jews that the authority of their supreme religious court was now taken away and was vested in the seventy of his own choice, and over which he himself was the president and supreme Lord.

*Literature.*—*Mishna Sanhedrin* and the *Gemara* on this Tractate; excerpts of the *Gemara* Tractate *Sanhedrin* have been translated into Latin with elaborate notes by John Coch, Amsterdam 1629; Maimonides, *Iad Ha-Chezaka, Hilchoth Sanhedrin*; Selden, *De Synedriis et Praefecturis Juridicis veterum Ebraeorum*, London 1650; Lunz, *Die Gottesdienstlichen Vorträge der Juden*, p. 37, ff., Berlin 1832; *Israelitische Annalen*, vol. i. pp. 108, 131, ff., Frankfurt-on-the-Maine 1839; Frankel, *Der gerichtliche Beweis nach mosaisch-talmudischem Rechte*, p. 68, ff., Berlin 1846; Rapaport, *Erech Millin*, p. 2, Prague 1852; Frankel, *Monatschrift für Geschichte und Wissenschaft des Judenthums*, vol. i. p. 344, ff.; Levy in Frankel's *Monatschrift*, vol. iv. pp. 266 ff., 301 ff., Leipzig 1855; Herzfeld, *Geschichte des Volkes Israel*, vol. ii. p. 380, ff., Nordhausen 1855; Krochmal in the Hebrew Essays and Reviews entitled *He-Chalutz*, vol. iii. p. 118 ff., Lemberg 1856; Jost, *Geschichte des Judenthums und seiner Secten*, vol. i. pp. 123 ff., 270 ff., Leipzig 1857; Graetz, *Geschichte der Juden*, p. 88 ff., 2d ed., Leipzig 1863; comp. also this *Cyclopaedia*, article EDUCATION, where all the presidents and vice-presidents of the Sanhedrim are given in chronological order; and SYNAGOGUE, THE GREAT, where the development of the Sanhedrim from this institution is traced.—C. D. G.

SANSANNAH (סַנְסַנָּה), a town mentioned as belonging to the Simeonites (Josh. xv. 31). In ch. xix. 5 and 1 Chron. iv. 31, for it and Madmannah, with which it is here classed, we have Hazar-susah (*Horse-village*), and Beth-Marcaboth (*House of Chariots*). These are probably descriptive titles of the places whose names are given in Josh. xv. 31. Neither has been identified. The Onomasticon makes Madmannah a hamlet called *Μηραοῖς*, near Gaza; but it identifies Madmannah with Madmena (Is. x. 31), which is a mistake (s. v. *Medemena*).—W. L. A.

SAPHIR, properly SHAPHIR (שָׁפִיר), a town mentioned Micah i. 11, and said in the Onomasticon (s. v. *Saphir*) to be in the mountain-region between Eleutheropolis and Ascalon. In this district a village still exists, called *es-Sawāfir*, which Robinson supposes to be the ancient Shaphir (*Bib. Res.* ii. 34, note). This, it is true, is not in the mountain-region, but on the plain; but there is some reason to suspect the accuracy of the Onomasticon description in this respect, for it is impossible that a place lying between Eleutheropolis (*Beit-Fibrin*, on the western slope of the mountains) and Ascalon could be itself in the mountain-region.—W. L. A.

SAPPHIRA (Σαφειρα), the wife of Ananias, and his accomplice in the sin for which he died (Acts v. 1-10). Unaware of the judgment which had befallen her husband, she entered the place about three hours after, probably to look for him;

and being there interrogated by Peter, repeated and persisted in the 'lie unto the Holy Ghost' which had destroyed her husband; on which the grieved apostle made known to her his doom, and pronounced her own. On hearing his words she fell dead at his feet. The cool obstinacy of Sapphira in answering as she did the questions which were probably designed to awaken her conscience, deepens the shade of the foul crime common to her and her husband; and has suggested to many the probability that the plot was of her devising, and that, like another Eve, she drew her husband into it. But this is mere conjecture [ANANIAS].—J. K.

SAPPHIRE (סַפִּיר; Sept. and N. T. *σάπφειρος*), a precious stone, mentioned in Exod. xxiv. 10; xxviii. 18; Job xxviii. 16; Ezek. xxviii. 13; Rev. xxi. 19. That which we call sapphire is next in hardness and value to the diamond, and is mostly of a blue colour of various shades. But the stone which Pliny describes under the name of sapphire (*Hist. Nat.* xxxvii. 39), in agreement with Theophrastus (*De Lapid.* 23), is manifestly the lapis lazuli. It is opaque, inclines often to the deep blue colour of the violet, and has sometimes pebble-spots of a golden yellow hue. This stone, however, is not sufficiently valuable for Job xxviii. 16; and Pliny says that it is 'inutilis sculpturae,' which does not apply to the *sapphir* of Exod. xxviii. 18, which was engraved. It seems therefore likely that, notwithstanding the classical appropriation of the name to the lapis lazuli, the true sapphire, or rather that which we call such, is the stone mentioned in Scripture. It is often found in collections of ancient gems.—J. K.

SARABIM (סָרָבִים) occurs once (Ezek. ii. 6), where it is rendered in the A. V. by 'briers.' In this our translators have followed some of the Rabbins; but all the ancient versions concur in regarding the word as derived from the verb סָרַב, *to be refractory or rebellious*. This is the rendering of the Targum. The Sept. rendering is *παροιστησονται*, *they shall be in a frenzy*; and the Syr. renders *who are obstinate*. The rendering 'briers' is thought by some to be favoured by the word being conjoined with סָלוֹנִים, *sallonim*, which they take to be the plural of סָלוֹן, *sillon*, *a thorn*; but this is probably a mistake. [SILLON].—W. L. A.

SARAH (שָׂרָה, *a princess, a noble lady*, being the fem. of שָׂרַר *sar*, 'a prince,' 'a nobleman'; Sept. Σάρρα), the wife of Abraham, and mother of Isaac. She was at first called שָׂרַי *Sarai*, the etymology and signification of which are obscure. Ewald (*Gram.* sec. 324) explains it to mean *contentious, quarrelsome* (from the root שָׁרָה), which is perhaps the most natural sense; and the mere change of the name to one more honourable may imply that there was something unpleasant in the one previously borne (Gen. xvii. 5, *seq.*) As Sarah never appears but in connection with some circumstance in which her husband was principally concerned, all the facts of her history have already been given in the article ABRAHAM, and her conduct to Hagar is considered in the article which bears her name. These facts being familiar to the

reader, a few supplementary remarks on particular points are alone required in this place.

There are two opinions with respect to the parentage of Sarah. Many interpreters suppose that she was the daughter of Haran, the elder son of Abraham's father Terah (probably by a former wife), and the same person with the Iscah who is named as one of the daughters of Haran (Gen. xi. 29). In this case she was niece of Abraham, although only ten years younger than her husband, and the sister of Milcah and of Lot. The reasons for this conclusion are of much weight. It is certain that Nahor, the surviving brother of Abraham, married Milcah, the other daughter of Haran, and the manner in which Abraham's marriage with Sarah is mentioned would alone suggest that he took the remaining daughter. 'Abram and Nahor took them wives: the name of Abram's wife was Sarai; and the name of Nahor's wife Milcah, the daughter of Haran, the father of Milcah and the father of Iscah' (Gen. xi. 29). Here most of the Jewish writers say that Iscah is Sarai; and without supposing this to be the case, it is difficult to understand for what reason it should be so pointedly noted that Haran, who was the father of Milcah, was also the father of Iscah. Besides, if Sarah is not Iscah, no account is given by Moses of her descent; and it can hardly be supposed that he would omit it, as it must have been agreeable to a people so careful of genealogy to know whence they were descended, both by the father's and mother's side. Again, when Terah leaves Ur of the Chaldees, it is said that 'Terah took Abram his son, and Lot his son's son, and Sarai his daughter-in-law, his son Abram's wife; and they went forth,' etc. (Gen. xi. 31); on which Aben Ezra observes that if Sarai had been (as some suppose) the daughter of Terah and sister of Abram, the text would doubtless have run: 'Terah took Abram his son, and Sarai his daughter, the wife of Abram.' The double relationship to Lot which such an alliance would produce may also help to the better understanding of some points in the connection between Lot and Abraham. Against this view we have to produce the assertion of Abraham himself, that Sarai was his half-sister, 'the daughter of my father, but not the daughter of my mother' (Gen. xx. 12): but this is held by many to mean no more than that Haran her father was his half-brother; for the colloquial usage of the Hebrews in this matter makes it easy to understand that he might call a niece a sister, and a granddaughter a daughter. In general discourse 'daughter' comprised any and every female descendant, and 'sister' any and every consanguineous relationship.

That Sarah had great beauty appears from the precautions which Abraham took to guard himself and her from the dangers it was likely to occasion. And that his was not too partial an estimate of her attractions is evinced by the transactions in Egypt and at Gerar (Gen. xii. 15; xxi. 2). In the former case the commendations which the princes of Pharaoh bestowed upon the charms of the lovely stranger have been supposed by some to have been owing to the contrast which her fresh Mesopotamian complexion offered to the dusky hue of their own beauties. But so far as climate is concerned, the nearer Syria could offer complexions as fair as hers; and, moreover, a people trained by their habits to admire 'dusky' beauties, were not likely to be inordinately attracted by a fresh complexion.

It is asked whether Sarah was aware of the intended sacrifice of Isaac, the son of her long-deferred hopes. The chronology is uncertain, and does not decide whether this transaction occurred before or after her death. She was probably alive; and if so, we may understand, from the precautions employed by Abraham, that she was not acquainted with the purpose of the journey to the land of Moriah, and indeed that it was the object of these precautions to keep from her knowledge a matter which must so deeply wound her heart. He could have the less difficulty in this, if his faith was such as to enable him to believe that he should bring back in safety the son he was commanded to sacrifice (Heb. xi. 19). As, however, the account of her death immediately follows that of this sacrifice, some of the Jewish writers imagine that the intelligence killed her, and that Abraham found her dead on his return (*Targ. Jonath.*, and Jarchi on Gen. xxiii. 2; *Pirke Eliezer*, c. 52). But there seems no authority for such an inference.

Sarah is so rarely introduced directly to our notice, that it is difficult to estimate her character justly, for want of adequate materials. She is seen only when her presence is indispensable; and then she appears with more of submission and of simplicity than of dignity, and manifests an unwise but not unusual promptitude in following her first thoughts, and in proceeding upon the impulse of her first emotions. Upon the whole, Sarah scarcely meets the idea the imagination would like to form of the life-companion of so eminent a person as Abraham. Nevertheless, we cannot fail to observe that she was a most attached and devoted wife. Her husband was the central object of all her thoughts; and he was not forgotten even in her first transports of joy at becoming a mother (Gen. xxi. 7). This is her highest eulogium.

Isaiah is the only prophet who names Sarah (li. 2). St. Paul alludes to her hope of becoming a mother (Rom. iv. 19); and afterwards cites the promise which she received (Rom. ix. 9); and Peter eulogises her submission to her husband (1 Pet. iii. 6).—J. K.

**SARAPH** (שָׂרָף). When the Israelites were in the wilderness they were visited, as a punishment for their murmuring, by fiery serpents (הַנְּחָשִׁים הַשָּׂרָפִים, Num. xxi. 6). This *saraph*, the supposed winged serpent, we take to be a *Haye*, one of the more eastern species or varieties, which have the faculty of actually distending the hood, as if they had wings at the side of the head, and are the same as, or nearly allied to, the well-known spectacle-snake of India. The serpent may exhibit this particular state of irritation when it stands half erect with its hood distended, or it may be that variety which is possessed of this faculty to the greatest extent. *Nega Reflectrix*, the *Pof* or *Spooch* adder of the Cape colonists, is reported by Dr. Smith to be scarcely distinct from the Egyptian *Naga Haye*. With regard to the faculty of flying, the lengthened form, the muscular apparatus, the absence of air-cells, and the whole osteological structure, are all incompatible with flight or the presence of wings. Flying serpents are only found represented in the symbolical pictures of Egypt, where they occur with birds' wings. Those of history, and of barbarous nations excessively habituated to figurative forms of speech, are various, some being so called because of their rapid motion,

others on account of a kind of spring they are said to make at their victims, and a third class because they climb trees, and are reported to swing themselves from thence upon their victims, or to other trees. Now, many species of serpents are climbers; many hang by the tail from slender branches of low trees in highly-heated glens, snapping at insects as they wheel around them; but all are delicately jointed; and if any should swing further than merely to change their hold, and should miss catching a branch, they would most certainly be dislocated, and, if not killed, very seriously injured.

Of the so-called flying, or rather darting serpents, Niebuhr found, near Basra, a venomous species called *Heie Sursurie*, and *Heie Thiare*, that is, 'flying serpent,' because it was said to fling itself from one tree to another. Admiral Anson heard, at the island of Quibo, of snakes flying without wings: we may notice the *Acontias* and *Prester*, that fell like arrows from the tops of trees, and the green *Ætula* of Ceylon, said to spring from trees at the eyes of cattle—an accusation repeated of more than one species in tropical America. Next we have the *Uler Tampang Hari*, seen in a forest near the river Pedang Bessie, somewhere, we believe, in the Australasian islands, under circumstances that most certainly require confirmation; since this fiery serpent, so called from the burning pain and fatal effect of its bite, swung itself from one tree to another 240 feet dis-

tant, with a declination to the horizon of only about fifteen degrees!

We find *Leffah* and *Bætan*, both conjectured to be the *Saraph*, without being able to point out the species in natural history, where, nevertheless, it seems most likely that varieties, or perhaps different species of the common viper may be meant, as is likewise assumed of *Acontias* and *Prester*, since that family, in hot and dry climates, is far more virulently noxious than in Europe. The *Leffah*, though little more than a foot long, regarded by Shaw at least as the most formidable serpent of Northern Africa, is one of this genus, and may be the (Ἐφεῖ) *Ephēh*, Arabic *Epha*, and Persian *Mar-iefy*; but as there is some difference in dimensions and markings, as well as a still greater extent of region assigned to these, more than one species of viper is most likely included in the above names. But that the *Ephēh* is a name of most ancient date is plain from its being employed in Job xx. 16 and Is. xxx. 6; while under the form of ἐχιδνα—that is 'viper'—it occurs in the N. T., Matt. iii. 7; xii. 34; xxiii. 33; Luke iii. 7; and Acts xxviii. 3. The last of these texts confirms the common superstitious belief of antiquity, which regarded the bite of one of these serpents as a punishment directly inflicted by heaven.

—C. H. S.

SARDINE, or SARDIUS. [ODEM.]

462. Sardis.

SARDIS (Σάρδεις), the capital of the ancient kingdom of Lydia, situated at the foot of Mount Tmolus, in a fine plain watered by the river Pactolus (Herod. vii. 31; Xenophon, *Cyrop.* vii. 2-11; Pliny, *Hist. Nat.*; Strabo, xiii. p. 625). It is in N. lat. 38° 30'; E. long. 27° 57'. Sardis was a great and ancient city, and from its wealth and importance was the object of much cupidity and of many sieges. When taken by Cyrus, under Cræsus, its last king, who has become proverbial

for his riches, Sardis was one of the most splendid and opulent cities of the East. After their victory over Antiochus it passed to the Romans, under whom it rapidly declined in rank and importance. In the time of Tiberius it was destroyed by an earthquake (Strabo, xii. p. 579), but was rebuilt by order of the emperor (Tacit. *Annal.* ii. 47). The inhabitants of Sardis bore an ill repute among the ancients for their voluptuous habits of life. Hence, perhaps, the point of the phrase in the

Apocalyptic message to the city—'Thou hast a few names, *even in Sardis*, which have not defiled their garments' (Rev. iii. 4). The place that Sardis holds in this message, as one of the 'Seven Churches of Asia,' is the source of the peculiar interest with which the Christian reader regards it. From what is said, it appears that it had already declined much in real religion, although it still maintained the name and external aspect of a Christian church, 'having a name to live, while it was dead' (Rev. iii. 1).

Successive earthquakes, and the ravages of the Saracens and Turks, have reduced this once flourishing city to a heap of ruins, presenting many remains of its former splendour. The habitations of the living are confined to a few miserable cottages, forming a village called Sart. This, with the ruins, is still found on the true site of Sardis, at the foot of Mount Tmolus, or Bouz-dag, as the Turks call it. The ruins are chiefly those of the theatre, stadium, and of some churches. There are also two remarkable pillars, supposed to have belonged to the temple of Cybele; and, if so, they are among the oldest monuments now existing in the world, the temple having been built only 300 years after that of Solomon. The acropolis seems well to define the site of the city. It is a marked object, being a tall distorted rock of soft sandstone, rent as if by an earthquake. A countless number of sepulchral hillocks, beyond the Hermus, heighten the desolateness of a spot which the multitudes lying there once made busy by their living presence and pursuits. See Smith, Hartley, Macfarlane, and Arundell, severally, *On the Seven Churches of Asia*; Arundell, *Discoveries in Asia Minor*; Storch, *Dissert. de Sept. Urb. Asiæ in Apocal.*; Richter, *Wallfahrten*; Schubert, *Morgenland*, etc.—J. K.

#### SARDONYX. [YAHALOM.]

SAREPTA (Σάρεπτα, Luke iv. 26; Hebrew, *Zarephath*, צֶרֶפֶת), a Phœnician town between Tyre and Sidon, mentioned in 1 Kings xvii. 9, 10; Obad. xx. It is the place where Elijah went to dwell, and where he performed the miracle of multiplying the barrel of meal and cruse of oil, and where he raised the widow's son to life. It still subsists as a large village, under the name of Sarafend. The Crusaders made Sarepta a Latin bishopric in the archiepiscopate of Sidon, and erected near the port a small chapel over the reputed site of Elijah's miracle (Will. Tyr. xix. 14; Jacob de Vitriacus, ch. 44). It is clear that the Sarepta of the Crusaders stood on the sea-shore; and, therefore, the present village bearing the same name, which stands upon the adjacent hills, must have been of more recent origin. (See Nau, *Nov. Voyage*, p. 544; Pococke, ii. 85; Robinson, *Bib. Researches*, iii. 413, 414; Raumer, *Palästina*, p. 140).—J. K.

SARGON, king of Assyria. [ASSYRIA; MEROCH-BALADAN.]

#### SARON. [SHARON.]

SAS (סָס, from סָדַס, *to leap*; Sept. Σῆς), a species of moth (Is. li. 8). [ASH.]

SATAN. The doctrine of Satan and of Satanic agency is to be made out from revelation, and from reflection in agreement with revelation.

*Scripture Names or Titles of Satan.*—Besides Satan, he is called the Devil, the Dragon, the Evil One, the Angel of the Bottomless Pit, the Prince of this World, the Prince of the Power of the Air, the God of this World, Apollyon, Abaddon, Belial, Beelzebub. Satan and Devil are the names by which he is oftener distinguished than by any other; the former being applied to him about forty times, and the latter about fifty times.

Satan is the Hebrew word שָׁטָן transferred to the English. It is derived from the verb שָׁטַן, which means 'to lie in wait,' 'to oppose,' 'to be an adversary.' Hence the noun denotes an adversary or opposer. The word in its *generic* sense occurs in 1 Kings xi. 14: 'The Lord raised up an adversary (שָׁטָן) against Solomon,' *i.e.* Hadad the Edomite. In the 23d verse the word occurs again, applied to Rezon. It is used in the same sense in 1 Sam. xxix. 4, where David is termed an adversary; and in Num. xxii. 22, where the angel 'stood in the way for an adversary (שָׁטָן) to Balaam,' *i.e.* to oppose him when he went with the princes of Moab. See also Ps. cix. 6.

In Zech. iii. 1, 2, the word occurs in its *specific* sense as a proper name: 'And he showed me Joshua the high-priest standing before the angel of the Lord, and Satan (הַשָּׂטָן) standing at his right hand to resist' (לְשָׂטָן, 'to satanize him'). 'And the Lord said unto Satan (הַשָּׂטָן), The Lord rebuke thee, O Satan.' Here it is manifest, both from the context and the use of the article, that some particular adversary is denoted.

In the 1st and 2d chapters of Job, the same use of the word with the article occurs several times. The events in which Satan is represented as the agent confirm this view. He was a *distinguished* adversary and tempter. See also 1 Chron. xxi. 1. When we pass from the O. T. to the N. T., this doctrine of an invisible evil agent becomes more clear. With the advent of Christ and the opening of the Christian dispensation, the great opposer of that kingdom, the particular adversary and antagonist of the Saviour, would naturally become more active and more known. The antagonism of Satan and his kingdom to Christ and his kingdom runs through the whole of the N. T., as will appear from the following passages and their contexts: Matt. iv. 10; xii. 26; Mark iv. 15; Luke x. 18; xxii. 3, 31; Acts xxvi. 18; Rom. xvi. 20; 2 Cor. xi. 14; Rev. ii. 13; xii. 9. Peter is once called Satan, because his spirit and conduct, at a certain time, were so much in opposition to the spirit and intent of Christ, and so much in the same line of direction with the workings of Satan. This is the only application of the word in the N. T. to any but the prince of the apostate angels.

Devil (Διάβολος) is the more frequent term of designation given to Satan in the N. T. Both Satan and Devil are in several instances applied to the same being (Rev. xii. 9), 'That old serpent, the Devil and Satan.' Christ, in the temptation (Matt. iv.), in his repulse of the tempter, calls him Satan; while the evangelists distinguish him by the term 'Devil.' Devil is the translation of διάβολος, from the verb διαβάλλω, 'to thrust through,' 'to carry over,' and, tropically, 'to inform against,' 'to accuse.' He is also called the accuser of the brethren (Rev. xii. 10). The Hebrew term Satan is more generic than the Greek διάβολος. The former expresses his character as an opposer of all

good; the latter denotes more particularly the relation which he bears to the saints, as their traducer and accuser. *Διάβολος* is the uniform translation which the Septuagint gives of the Hebrew שָׂטָן, when used with the article. Farmer says that the term Satan is not appropriated to one particular person or spirit, but signifies an adversary or opponent in general. This is to no purpose, since it is also *applied* to the Devil as an adversary in particular. There are four instances in the N. T. in which the word *διάβολος* is applied to human beings. In three out of the four it is in the plural number, expressive of quality, and not personality (1 Tim. iii. 11; 2 Tim. iii. 3; Tit. ii. 3). In the fourth instance (John vi. 70), Jesus says to his disciples, 'Have not I chosen you twelve, and one of you is a devil?' (*διάβολος*). This is the only instance in the N. T. of its application to a human being in the singular number; and here Dr. Campbell thinks it should not be translated 'devil.' The translation is, however, of no consequence, since it is with the use of the original word that this article is concerned. The obvious reasons for this application of *διάβολος* to Judas, as an exception to the general rule, go to confirm the rule. The rule is that, in the N. T. usage, the word in the singular number denotes *individuality*, and is applied to Satan as a *proper name*. By the exception, it is applied to Judas, from his resemblance to the Devil, as an accuser and betrayer of Christ, and from his contributing to aid him in his designs against Christ. With these exceptions, the *usus loquendi* of the N. T. shows *ὁ Διάβολος* to be a proper name, applied to an extraordinary being, whose influence upon the human race is great and mischievous (Matt. iv. 1-11; Luke viii. 12; John viii. 44; Acts xiii. 10; Eph. vi. 11; 1 Pet. v. 8; 1 John iii. 8; Rev. xii. 9). The term devil, which is in the N. T. the uniform translation of *διάβολος*, is also frequently the translation of *δαίμων* and *δαίμωνιον*. Between these words and *διάβολος* the English translators have made no distinction. The former are almost always used in connection with demoniacal possessions, and are applied to the possessing spirits, but never to the prince of those spirits. On the other hand, *διάβολος* is never applied to the demons, but only to their prince; thus showing that the one is used definitely as a proper name, while the others are used indefinitely as generic terms. The sacred writers made a distinction, which in the English version is lost. In this our translators followed the German version: *teufel*, like the term devil, being applied to both *διάβολος* and *δαίμων*.

*Personality of Satan.*—We determine the personality of Satan by the same criteria that we use in determining whether Caesar and Napoleon were real personal beings, or the personifications of abstract ideas—viz. by the tenor of history concerning them, and the ascription of personal attributes to them. All the forms of personal agency are made use of by the sacred writers in setting forth the character and conduct of Satan. They describe him as having power and dominion, messengers and followers. He tempts and resists; he is held accountable, charged with guilt; is to be judged, and to receive final punishment. On the supposition that it was the object of the sacred writers to teach the proper personality of Satan, they could have found no more express terms than those which they have actually used. And on

the supposition that they did not intend to teach such a doctrine, their use of language incapable of communicating any other idea is wholly inexplicable. To suppose that all this semblance of a real, veritable, conscious moral agent, is only a trope, a prosopopeia, is to make the inspired penmen guilty of employing a figure in such a way that, by no ascertained laws of language, it could be known that it was a figure—in such a way that it could not be taken to be a figure, without violence to all the rhetorical rules by which they on other occasions are known to have been guided. A personification, protracted through such a book as the Bible, even should we suppose it to have been written by *one* person—never dropped in the most simple and didactic portions—never explained when the most grave and important truths are to be inculcated, and when men the most ignorant and prone to superstition are to be the readers—a personification extending from Genesis to Revelation,—this is altogether anomalous and inadmissible. But to suppose that the several writers of the different books of the Bible, diverse in their style and intellectual habits, writing under widely differing circumstances, through a period of nearly two thousand years, should each, from Moses to John, fall into the use of the same personification, and follow it too in a way so obscure and enigmatical that not one in a hundred of their readers would escape the error which they did not mean to teach, or apprehend the truth which they wished to set forth,—to suppose this is to require men to believe that the inspired writers, who ought to have done the least violence to the common laws of language, have really done the most. Such uniformity of inexplicable singularity, on the part of such men as the authors of the several books of the Bible, could be accounted for only on the hypothesis that they were subject to an *evil* as well as a good inspiration. On the other hand, such uniformity of appellations and imagery, and such identity of characteristics, protracted through such a series of writings, go to confirm the received doctrine of a real personality.

But there are other difficulties than these general ones, by which the theory of personification is encumbered. This theory supposes the Devil to be the *principle of evil*. Let it be applied in the interpretation of two or three passages of Scripture. 'Then was Jesus led up of the Spirit into the wilderness, to be tempted of the devil' (Matt. iv. 1-11). Was Jesus tempted by a real, personal being? or was it by the principle of evil? If by the latter, in whom or what did this principle reside? Was it in Jesus? Then it could not be true that in him was no sin. The very principle of sin was in him, which would have made him the tempter of himself. This is bad hermeneutics, producing worse theology. Let it also be remembered that this *principle of evil*, in order to be moral evil, must *inhere* in some conscious moral being. Sin is evil, only as it implies the state or action of some personal and accountable agent. Who was this agent of evil in the temptation? Was it to a mere abstraction that the Saviour said, 'Thou shalt not tempt the Lord thy God?' 'Get thee behind me, Satan?' Or was it to a real person, having desires and purposes and volitions,—*evil*, because these desires and purposes and volitions were evil? There is but one intelligible answer to such questions. And that answer shows

how perfectly untenable is the position that the Devil, or Satan, is only the personification of evil. Again: 'He was a murderer from the beginning, and, abode not in the truth: he is a liar and the father of it' (John viii. 44). With what propriety could these specific acts of guilt be charged upon an abstraction? An abstraction a murderer! a liar! The principle of evil *abode* not in the truth! Seriously to affirm such things of the mere abstraction of evil is a solemn fiction; while, to assert them of a fallen angel, who beguiled Eve by falsehood, and brought death upon all the race of man, is an intelligible and affecting truth. What necessity for inspired men to write that the Devil sinned from the beginning, if he be only the principle of evil? What consistency, on this hypothesis, in their saying that he transforms himself into an angel of light, if he has no volition, no purpose, no craft, no ends or agency? If there are such things as personal attributes, it must be conceded that the sacred writers do ascribe them to Satan. On any other supposition the writers of the N. T. could more easily be convicted of insanity than believed to be inspired. The principle of interpretation by which the personality of Satan is discarded leads to the denial of the personality of the Deity.

*Natural History.*—The class of beings to which Satan originally belonged, and which constituted a celestial hierarchy, is very numerous: 'Ten thousand times ten thousand stood before him' (Dan. vii. 10). They were created and dependent (John i. 3). Analogy leads to the conclusion that there are different grades among the angels as among other races of beings. The Scriptures warrant the same. Michael is described as one of the chief princes (Dan. x. 13); as chief captain of the host of Jehovah (Josh. v. 14). Similar distinctions exist among the fallen angels (Col. ii. 15; Eph. vi. 12). It is also reasonable to suppose that they were created susceptible of improvement in all respects, except moral purity, as they certainly were capable of apostasy. As to the time when they were brought into being the Bible is silent; and where it is silent, we should be silent, or speak with modesty. Some suppose that they were called into existence after the creation of the world; among whom is Dr. John Dick. Others have supposed that they were created just anterior to the creation of man, and for purposes of a merciful ministration to him. It is more probable, however, that as they were the highest in rank among the creatures of God, so they were the first in the order of time; and that they may have continued for ages in obedience to their Maker before the creation of man, or the fall of the apostate angels.

The Scriptures are explicit as to the apostasy of some, of whom Satan was the chief and leader. 'And the angels which kept not their first estate or principality, but left their own habitation,' etc. (Jude, ver. 6). 'For if God spared not the angels that sinned,' etc. (2 Pet. ii. 4). Those who followed Satan in his apostasy are described as belonging to him. The company is called the Devil and his angels (*τῷ Διαβόλῳ καὶ τοῖς ἀγγέλοις αὐτοῦ*, Matt. xxv. 41). The relation marked here denotes the instrumentality which the Devil may have exerted in inducing those called his angels to rebel against Jehovah and join themselves to his interests. How Satan and his followers, being created so high in excellence and

holiness, became sinful and fell, is a question upon which theologians have differed, but which they have not settled. The difficulty has seemed so great to Schleiermacher and others, that they have denied the fact of such an apostasy. They have untied the knot by cutting it. Still the difficulty remains. The denial of mystery is not the removal of it. Even philosophy teaches us to believe sometimes where we cannot understand. It is here that the grave question of the introduction of evil first meets us. If we admit the fact of apostasy among the angels, as by a fair interpretation of Scripture we are constrained to do, the admission of such a fact in the case of human beings will follow more easily, they being the lower order of creatures, in whom defection would be less surprising. As to what constituted the first sin of Satan and his followers, there has been a diversity of opinions. Some have supposed that it was the beguiling of our first parents. Others have believed that the first sin of the angels is mentioned in Gen. vi. 2. The sacred writers intimate very plainly that the first transgression was pride, and that from this sprang open rebellion. Of a bishop, the apostle says (1 Tim. iii. 6), 'He must not be a novice, lest, being puffed up with *pride*, he fall into the condemnation of the devil.' From which it appears that pride was the sin of Satan, and that for this he was condemned. This, however, marks the *quality* of the sin, and not the act.

In his physical nature, Satan is among those that are termed spiritual beings; not as excluding necessarily all idea of matter, but as opposed rather to the *animal* nature. It is the *πνευματικός*, in opposition to the *ψυχικός*. The good angels are all ministering *spirits*, *πνεύματα* (Heb. i. 14). Satan is one of the angels that kept not their first principality. The fall produced no change in his physical or metaphysical nature. Paul, in warning the Ephesians against the wiles of the Devil (*τὰς μεθοδὰς τοῦ διαβόλου*), tells them (Eph. vi. 12) that they contended not against flesh and blood—mere human enemies—but against principalities and powers, against the rulers of the darkness of this world, against spiritual wickedness in high places; *πρὸς τὰ πνευματικὰ τῆς πονηρίας ἐν τοῖς ἐπουρανίοις*, in which the contrast is between human and superhuman foes, the *τὰ πνευματικὰ* being for *τὰς φύσεις πνευματικὰς*, or *τὰ πνεύματα* spiritual natures, or *spirits*, in opposition to flesh and blood (Rosenmüller, *in loc.*) Satan is not pure spirit in the sense that God is spirit, nor necessarily to the exclusion of body; but that body, if he has any, is ethereal, pneumatic, invisible. He is unlike God, because finite and dependent; and, in his ethereal physical nature, and the rapidity with which he moves unseen from place to place, he is unlike to man. He is immortal, but not eternal; neither omniscient nor omnipresent, but raised high above the human race in knowledge and power. The Persian mythology, in its early stage, and subsequently the Gnostics and Manicheans, ranked the evil principle as coeval and co-ordinate, or nearly so, with God, or the good principle. The doctrine of the Jewish church always made him a dependent creature, subject to the control of the Almighty. By the modifications which Zoroaster subsequently introduced, the Persian angelology came more nearly to resemble that of the Jews. Some have ascribed to Satan the power of working miracles, contending that there are

two series of antagonistical miracles running through the Bible. To the miracles of Moses were opposed those of the Egyptian magicians; and to those of Christ and his apostles the signs and wonders of false prophets and Antichrists—the Divine and the Satanic. Olshausen maintains this view, as do some of the older commentators (*Biblischen Commentar*, vol. i. p. 242). The evidence in support of such a belief has not been sufficient to procure for it general acceptance (see Rosenmüller and Calvin on Matt. xxiv. 24; 2 Thess. ii. 9; Hengstenberg's *Egypt and the Books of Moses*, ch. iii.; also Rosenmüller and Bush on Exod., ch. vii.) With a substantial presence in only one place at one time, yet, as the head of a spiritual kingdom, he is virtually present wherever his angels or servants are executing his will.

His character is evil, purely and entirely so (1 John iii. 8; John viii. 44). His character is denoted by his titles, Satan, Adversary, Diabolos, False Accuser, Tempter, etc. All the representations of him in Scripture show him to have unmixed and confirmed evil as the basis of his character, exhibiting itself in respect to God in assuming to be his equal, and in wishing to transfer the homage and service which belong only to God to himself; and in respect to men, in efforts to draw them away from God and attach them to his kingdom. The evil develops itself in all possible ways and by all possible means of opposition to God, and to those who are striving to establish and extend his dominion. Evil is so transcendent in him, that his whole intellectual and moral nature is subordinated to it. His character is symmetrical. It has a dreadful consistency, from the concurrence in evil, and subjection to it, of all the powers of his being. It is unique and complete in evil, made so by the act of apostasy, and continued so by a pertinacious adherence to evil as his good. Quenstedt says that 'some angels are called evil, not by reason of their essential constitution, but—first, from an evil act, that is, apostasy from God; secondly, from an habitual perverseness which followed this act of apostasy; thirdly, on account of an irreclaimable persistency in evil.' Evil is his fixed state, in which he is confirmed by the invincibility of his dispositions to sin—an invincibility which no motives can ever overcome. This confirmation of evil is denoted by the everlasting chains of darkness in which the apostate angels are reserved unto the judgment of the great day (Jude, ver. 6). The immutability of his evil character precludes the idea of repentance, and therefore the possibility of recovering grace. 'He possesses an understanding which misapprehends exactly that which is most worthy to be known, to which the key fails without which nothing can be understood in its true relations—an understanding darkened, however deep it may penetrate, however wide it may reach. He is thereby necessarily unblest; torn away from the centre of life, yet without ever finding it in himself; from the sense of inward emptiness, continually driven to the exterior world, and yet with it, as with himself, in eternal contradiction; for ever fleeing from God, yet never escaping him; constantly labouring to frustrate his designs, yet always conscious of being obliged to promote them; instead of enjoyment in the contemplation of his excellence, the never-satisfied desire after an object which it cannot

attain; instead of hope, a perpetual wavering between doubt and despair; instead of love, a powerless hatred against God, against his fellow-beings, against himself' (Twisten).

*Agency.*—The agency of Satan extends to all that he does or causes to be done: 'Qui facit per alium facit per se.' To this agency the following restrictions have been generally supposed to exist: It is limited, first, by the direct power of God; he cannot transcend the power on which he is dependent for existence;—secondly, by the finiteness of his own created faculties;—thirdly, by the established connection of cause and effect, or the laws of nature. The miracles, which he has been supposed to have the power of working, are denominated lying signs and wonders, *σημείους καὶ τέρασι ψεύδους* (2 Thess. ii. 9). With these restrictions, the Devil goes about like a roaring lion.

His agency is moral and physical. First, moral. He beguiled our first parents, and thus brought sin and death upon them and their posterity (Gen. iii.) He moved David to number the people (1 Chron. xxi. 1). He resisted Joshua the high-priest (Zech. iii. 1). He tempted Jesus (Matt. iv.); entered into Judas, to induce him to betray his master (Luke xxii. 3); instigated Ananias and Sapphira to lie to the Holy Ghost (Acts v. 3); hindered Paul and Barnabas on their way to the Thessalonians (1 Thess. ii. 18). He is the spirit that now worketh in the children of disobedience (Eph. ii. 2); and he deceiveth the whole world (Rev. xii. 9).

The means which he uses are variously called wiles, darts, depths, snares, all deceivableness of unrighteousness. He darkens the understandings of men, to keep them in ignorance. He perverts their judgments, that he may lead them into error. He insinuates evil thoughts, and thereby awakens in them unholy desires. He excites them to pride, anger, and revenge; to discontent, repinings, and rebellion. He labours to prop up false systems of religion, and to corrupt and overturn the true one. He came into most direct and determined conflict with the Saviour in the temptation, hoping to draw him from his allegiance to God, and procure homage for himself; but he failed in his purpose. Next, he instigated the Jews to put him to death, thinking thus to thwart his designs and frustrate his plans. Here, too, he failed, and was made to subserve the very ends which he most wished to prevent. Into a similar conflict does he come with all the saints, and with like ultimate ill success. God uses his temptations as the means of trial to his people, and of strength by trial, and points them out as a motive to watchfulness and prayer. Such are the nature and mode of his moral influence and agency.

But his efforts are directed against the bodies of men, as well as against their souls. That the agency of Satan was concerned in producing physical diseases, the Scriptures plainly teach (Job ii. 7; Luke xiii. 16). Peter says of Christ, that he went about doing good and healing (*ἰώμενος*) all that were oppressed of the Devil (*τοῦ διαβόλου*) (Acts x. 38). Hymeneus and Alexander were delivered to Satan, that they might learn not to blaspheme (1 Tim. i. 20); where physical suffering by the agency of Satan, as a divine chastisement, is manifestly intended.

Farmer seems to have been among the first in modern times who adopted the rationalistic or ac-

commodation principle of interpretation upon the subject of demoniacal possessions. Semler introduced his work on *Demoniacs* into Germany, and the German neologists adopted substantially his view. For a refutation of this system of interpretation, see Twisten's *Dogmatik*, Olshausen's *Commentar*, Storr and Platt's *Biblical Theol.*, and Appleton's *Lectures*; and for a general statement of the arguments on both sides, see the articles DEMON; DEMONIACS.

Whatever the demons may have been, they were considered by the N. T. writers as belonging to the kingdom of Satan. They are called unclean spirits, evil demons. They are conscious of being under condemnation (Matt. viii. 29). Christ came to destroy the works of Satan; and he refers to his casting out demons by the finger of God as proof that he was executing that work. And when charged with casting them out by the prince of demons, he meets the charge by the assertion that this would be dividing the kingdom of Satan—Satan casting out Satan, *i.e.* casting out his own subjects: the irresistible inference from which is, that Satan and the demons are *one house*, pertain to *one* and the *same kingdom*.

It is of no avail that there are difficulties connected with the agency ascribed to Satan. Objections are of little weight when brought against well-authenticated facts. Any objections raised against the agency of Satan are equally valid against his existence. If he exists, he must act; and if he is evil, his agency must be evil. The fact of such an agency being revealed, as it is, is every way as consonant with reason and religious consciousness as are the existence and agency of good angels. Neither reason nor consciousness could by themselves establish such a fact; but all the testimony they are capable of adducing is in agreement with the Scripture representation on the subject. If God communicates with good men without their consciousness, there is no apparent reason why Satan may not, without their consciousness, communicate with bad men. And if good men become better by the influence of good beings, it is equally easy to suppose that bad men may become worse by the influence of evil beings. Such an influence no more militates against the benevolence of God than does the agency of wicked men, or the existence of moral evil in any form. Evil agents are as really under the divine control as are good agents. And out of evil God will cause good to come. He will make the wrath of devils as well as of men to praise him, and the remainder he will restrain.—E. A. L.

SATANOW, ISAAC HA-LEVI. This remarkable philosopher, poet, Talmudist, lexicographer, and commentator, was born Elul 29, 1732, at Satanow or Satanov, in Russian Poland, whence he obtained his name. He came to Berlin in 1772, where, at the age of forty, he began to issue those celebrated works for which he had prepared himself in his native place, and which immortalised his name in connection with Hebrew literature and Biblical exegesis. His works in these departments are as follow:—1. A short Hebrew Grammar, entitled *The Joyful Lips* (ספר שפתי רננות), in allusion to Ps. lxi. 5, which he published in Berlin, 1773, as the first instalment of a large work, embracing the whole critical apparatus of the Biblical Hebrew; 2. A Hebrew lexicon (ספר

השרשים), in two parts. The first part, which gives all the meanings of the Hebrew words, is entitled *The Lip of Truth* (לשפת אמת), in allusion to Prov. xii. 19, which is a continuation of the former work; and the second part, which is a treatise on the synonyms and homonyms of the Hebrew language, and is the third part of his critical apparatus, Berlin 1787, 2d ed., Prague 1804; 3. A Hebrew commentary on and German translation of Job, Berlin 1799. \*Besides these, Satanow has also written several works of gnomes and apothegms in imitation of the Psalms and Proverbs, which are most masterly, and which will always be charming reading books for the student of the Hebrew language; as well as grammatical notes on all the difficult passages of the O. T., which have not as yet been published. He died in 1802. Comp. Delitzsch, *Zur Geschichte der jüdischen Poesie*, p. 115, ff., Leipzig 1836; Fürst, *Bibliotheca Judaica*, iii. 251, etc.; Jost, *Geschichte des Judenthums und seiner Secten*, vol. iii. p. 398, etc., Leipzig 1859.—C. D. G.

SATRAPS. [ACHASHDARFANIM.]

SATYRS. [SEIRIM.]

SAUL (שָׁאֹל; Sept. and N. T. Σαούλ), son of Kish, of the tribe of Benjamin, was the first king of the Israelites. The corrupt administration of justice by Samuel's sons furnished an occasion to the Hebrews for rejecting that theocracy, of which they neither appreciated the value, nor, through their unfaithfulness to it, enjoyed the full advantages (1 Sam. viii.) An invasion by the Ammonites seems also to have conspired with the cause just mentioned, and with a love of novelty, in prompting the demand for a king (1 Sam. xii. 12)—an officer evidently alien to the genius of the theocracy, though contemplated as an historical certainty, and provided for by the Jewish lawgiver (1 Sam. xii. 17-20; Deut. xvii. 14-20; on which see Grotius's note; also *De Jure Belli*, etc., i. 4. 6, with the remarks of Gronovius, who (as Puffendorf also does) controverts the views of Grotius). An explanation of the nature of this request, as not only an instance of ingratitude to Samuel, but of rebellion against Jehovah, and the delineation of the manner in which their kings—notwithstanding the restrictions prescribed in the law—might be expected to conduct themselves (משפט המלך, Sept. δικάωμα τοῦ βασιλέως; 1 Sam. viii. 11; x. 25), having failed to move the people from their resolution, the Lord sent Saul, who had left home in quest of his father's asses, which had strayed, to Samuel, who having informed Saul of the divine purpose regarding him, and having at a feast shown him a preference, which, no doubt, the other guests understood, privately anointed him king, and gave him various tokens by which he might be assured that his designation was from Jehovah (1 Sam. ix. x.) Moved by the authority of Samuel, and by the fulfilment of these signs, Saul's reluctance to assume the office to which he was called was overcome; which may be the meaning of the expression לנאחר (1 Sam. x. 9), though his hesitation afterwards returned (ver. 21, 22). On his way home, meeting a company of prophets, he was seized with the prophetic afflatus, and so gave occasion to a proverb afterwards in use among the Jews, though elsewhere a different origin is assigned to the saying

(1 Sam. xix. 24). Immediately after, Saul was elected at Mizpah in a solemn assembly by the determination of the miraculous lot—a method of election not confined to the Hebrews (Aristot. *Polit.* vi. 11; and Virg. *Æn.* ii. 'Laocoon lectus Neptuni sorte sacerdos'); and both previously to that election (x. 16), and subsequently, when insulted by the worthless portion of the Israelites, he showed that modesty, humility, and forbearance which seem to have characterised him till corrupted by the possession of power. The person thus set apart to discharge the royal function possessed at least those corporeal advantages which most ancient nations desiderated in their sovereigns (the *εἶδος ἀξίον τυραννίδος*—Eurip.) His person was tall and commanding, and he soon showed that his courage was not inferior to his strength (1 Sam. ix. 2; x. 23). His belonging to Benjamin also, the smallest of the tribes, though of distinguished bravery, prevented the mutual jealousy with which either of the two great tribes, Judah and Ephraim, would have regarded a king chosen from the other; so that his election was received with general rejoicing, and a number of men, moved by the authority of Samuel (x. 26), even attached themselves to him as a body-guard, or as counsellors and assistants. In the meantime the Ammonites, whose invasion had hastened the appointment of a king, having besieged Jabesh in Gilead, and Nahash their king having proposed insulting conditions to them, the elders of that town, apparently not aware of Saul's election (1 Sam. xi. 3), sent messengers through the land imploring help. Saul acted with wisdom and promptitude, summoning the people *en masse* to meet him at Bezek; and having at the head of a vast multitude totally routed the Ammonites (ver. 11), and obtained a higher glory, by exhibiting a new instance of clemency, whether dictated by principle or policy—'Novum imperium inchoantibus utilis clementiæ fama' (Tac. *Hist.* iv. 63), 'For lowliness is young ambition's ladder,'—he and the people betook themselves, under the direction of Samuel, to Gilgal, there with solemn sacrifices to reinstall the victorious leader in his kingdom (1 Sam. xi.) If the number set down in the Hebrew text, of those who followed Saul (1 Sam. xi. 8), can be depended on (the Sept. more than doubles them, and Josephus outgoes even the Sept.), it would appear that the tribe of Judah was dissatisfied with Saul's election, for the soldiers furnished by the other tribes were 300,000, while Judah sent only 30,000; whereas the population of the former, compared with that of Judah, appears, from other passages, to have been as about five to three (2 Kings xxiv. 9). And yet it is strange that this remissness is neither punished (1 Sam. xi. 7) nor noticed. At Gilgal Saul was publicly anointed, and solemnly installed in the kingdom by Samuel, who took occasion to vindicate the purity of his own administration—which he virtually transferred to Saul—to censure the people for their ingratitude and impiety, and to warn both them and Saul of the danger of disobedience to the commands of Jehovah (1 Sam. xii.) These were the principal transactions that occurred during the first year of Saul's reign (which we venture to assign as the meaning of the first clause

of ch. xiii. בן שנה שאול במלכו, 'the son of a year was Saul in his reigning'—the emendation of

Origen, 'Saul was thirty years old,' which the chronology contradicts, for he seems now to have been forty years old, and the omission of the whole first verse by the Sept. being evidently arbitrary, and therefore inadmissible expedients for solving a difficulty); and the subsequent events happened in the second year—which may be the meaning of the latter clause.

*Saul's first trial and transgression.*—The restrictions on which he held the sovereignty had (1 Sam. x. 25) been fully explained as well to Saul as to the people, so that he was not ignorant of his true position as merely the lieutenant of Jehovah, king of Israel, who not only gave all the laws, but whose will, in the execution of them, was constantly to be consulted and complied with. The first occasion on which his obedience to this constitution was put to the test brought out those defects in his character which showed his unfitness for his high office, and incurred a threat of that rejection which his subsequent conduct confirmed (1 Sam. xiii. 13). Saul could not understand his proper position, as only the servant of Jehovah speaking through his ministers, or confine himself to it; and in this respect he was not, what David, with many individual and private faults and crimes, was—a man after God's own heart, a king faithful to the principles of the theocracy.

Having organised a small standing army, part of which, under Jonathan, had taken a fort of the Philistines, Saul summoned the people to withstand the forces which their oppressors, now alarmed for their dominion, would naturally assemble. But so numerous a host came against Saul, that the people, panic-stricken, fled to rocks and caverns for safety—years of servitude having extinguished their courage, which the want of arms, of which the policy of the Philistines had deprived them, still further diminished. The number of chariots, 30,000, seems a mistake; unless we suppose, with Le Clerc, that they were not war-chariots but baggage-waggons (an improbable supposition), so that 3000 may be the true number. Apparently reduced to extremity, and the seventh day being come, but not being ended, the expiration of which Samuel had enjoined him to wait, Saul at least *ordered* sacrifices to be offered—for the expression (1 Sam. xiii. 9) does not necessarily imply that he intruded into the priest's office (2 Sam. vi. 13; 1 Kings iii. 2-4), though that is the most obvious meaning of the text. Whether that which Saul now disregarded was the injunction referred to (1 Sam. x. 8), or one subsequently addressed to him, this is evident, that Saul acted in the full knowledge that he sinned (xiii. 12); and his guilt, in that act of conscious disobedience, was probably increased by its clearly involving an assumption of authority to conduct the war according to his own judgment and will. Samuel having denounced the displeasure of Jehovah and its consequences, left him, and Saul returned to Gibeah (the addition made to the text of the Sept. ver. 15, where after 'from Gilgal,' the clause, 'and the rest of the people went up after Saul to meet the enemy from Gilgal to Gibeah,' etc., being required apparently by the sense, which, probably, has been the only authority for its insertion). Left to himself, Saul's errors multiplied apace. Jonathan, having assaulted a garrison of the Philistines (apparently at Michmash, 1 Sam. xiv. 31, which, therefore, must have been situated near Migron in Gibeah, ver. 1, and

within sight of it, ver. 15), Saul, aided by a panic of the enemy, an earthquake, and the co-operation of his fugitive soldiers, effected a great slaughter; but by a rash and foolish denunciation, he (1) impeded his success (ver. 30), (2) involved the people in a violation of the law (ver. 33), and (3), unless prevented by the more enlightened conscience of the people, would have ended with putting Jonathan to death for an act which, being done in invincible ignorance, could involve no guilt. This success against the Philistines was followed, not only by the retirement for a time within their own territory, but by other considerable successes against the other enemies of his country—Moab, Ammon, Edom, the kings of Zobah, the Amalekites, and the Philistines, all of whom he harassed, but did not subdue. These wars may have occupied five or six years, till the tenth or eleventh year of Saul's reign, rather than the sixteenth, as marked in the Bible chronology.

*Saul's second transgression.*—Another trial was afforded Saul before his final rejection, the command to extirpate the Amalekites, whose hostility to the people of God was inveterate (Deut. xxv. 18; Exod. xvii. 8-16; Num. xiv. 42-45; Judg. iii. 13; vi. 3), and who had not by repentance averted that doom which had been delayed 550 years (1 Sam. xiv. 48). They who represent this sentence as unworthy of the God of the whole earth should ask on what principle the execution of a criminal under human governments can be defended. If men judge that the welfare of society demands the destruction of one of their fellows, surely God, who can better judge what the interests of his government require, and has a more perfect right to dispose of men's lives, may cut off by the sword of his servants the persons whom, without any imputation of injustice, he might destroy by disease, famine, or any such visitation. It is more to our present purpose to remark, that the apparent cruelty of this commission was not the reason why it was not fully executed, as Saul himself confessed when Samuel upbraided him, 'I feared the people and obeyed their voice' (1 Sam. xv. 24). This stubbornness in persisting to rebel against the directions of Jehovah was now visited by that final rejection of his family from succeeding him on the throne, which had before been threatened (ver. 23; xiii. 13, 14), and which was now significantly represented, or mystically predicted, by the rending of the prophet's mantle. After this second and flagrant disobedience, Saul received no more public countenance from the venerable prophet, who now left him to his sins and his punishment; 'nevertheless, he mourned for Saul,' and the Lord repented that he had made Saul king (xv. 35).

*Saul's conduct to David.*—The denunciations of Samuel sank into the heart of Saul, and produced a deep melancholy, which either really was, or which his physicians (1 Sam. xvi. 14, 15; comp. Gen. 1. 2) told him, was occasioned by an evil spirit from the Lord; unless we understand the phrase רָעָה רָעָה subjectively, as denoting the condition itself of Saul's mind, instead of the cause of that condition (Is. xxix. 10; Num. v. 14; Rom. xi. 8). We can conceive that music might affect Saul's feelings, might cheer his despondency, or divert his melancholy; but how it should have the power to chase away a spiritual messenger whom the Lord had sent to chasten the monarch for his transgressions, is not so easily understood. Saul's

case must probably be judged of by the same principles as that of the demoniacs mentioned in the N. T. [DEMONIACS]. David was recommended to Saul on account of his skill as a musician (1 Sam. xvi. 16-23), though the narrative of his introduction to Saul, his subsequently killing Goliath, Saul's ignorance of David's person after he had been his attendant and armour-bearer, with various other circumstances in the narrative (1 Sam. xvi. 14-23; xvii. xviii. 1-4), present difficulties which neither the arbitrary omissions in the Sept., nor the ingenuity of subsequent critics, have succeeded in removing, and which have led many eminent scholars to suppose the existence of extensive dislocations in this part of the O. T. Certainly the solutions offered by those who would reconcile the narrative as it now stands in the Hebrew text demand too much ingenuity, and appear very unsatisfactory. That proposed by Hales and others seems to be the most feasible, which would place the passage xvi. 14-23 after xviii. 9; yet why should Saul's attendants need to describe so minutely a person whom he and all Israel knew so well already? Also, how can we conceive that Saul should love so much (xvi. 21) a person against whom his jealousy and hatred had been so powerfully excited as his probable successor in the kingdom? (xviii. 9). Besides, David had occupied already a much higher position (xviii. 5); and, therefore, his being made Saul's armour-bearer must have been the very opposite of promotion, which the text xvi. 21 supposes it was.

Though not acquainted with the unction of David, yet having received intimation that the kingdom should be given to another, Saul soon suspected, from his accomplishments, heroism, wisdom, and popularity, that David was his destined successor; and, instead of concluding that his resistance to the divine purpose would only accelerate his own ruin, Saul, in the spirit of jealousy and rage, commenced a series of murderous attempts on the life of his rival, that must have lost him the respect and sympathy of his people, which they secured for the object of his malice and envy, whose noble qualities also they both exercised and rendered more conspicuous. He attempted twice to assassinate him with his own hand (xviii. 10, 11; xix. 10); he sent him on dangerous military expeditions (xviii. 5, 13, 17); he proposed that David should marry first his elder daughter, whom yet he gave to another, and then his younger, that the procuring of the dowry might prove fatal to David; and then he sought to make his daughter an instrument of her husband's destruction; and it seems probable, that unless miraculously prevented, he would have imbrued his hands in the blood of the venerable Samuel himself (1 Sam. xix. 18), while the text seems to intimate (xx. 33) that even the life of Jonathan was not safe from his fury, though the subsequent context may warrant a doubt whether Jonathan was the party aimed at by Saul. The slaughter of Ahimelech the priest (1 Sam. xxii.), under pretence of his being a partisan of David, and of eighty-five other priests of the house of Eli, to whom nothing could be imputed, as well as the whole inhabitants of Nob, was an atrocity perhaps never exceeded; and yet the wickedness of the act was not greater than its infatuation, for it must have inspired his subjects not only with abhorrence of their king as an inhuman tyrant, but with horror

of him as an impious and sacrilegious monster. This crime of Saul put David in possession of the sacred lot, which Abiathar, the only surviving member of Eli's priestly family, brought with him, and by which he was enabled to obtain oracles directing him in his critical affairs (xxii. 21-23; xxiii. 1, 2).

Having compelled David to assume the position of an outlaw, around whom gathered a number of turbulent and desperate characters, Saul might persuade himself that he was justified in bestowing the hand of David's wife on another, and in making expeditions to apprehend and destroy him. A portion of the people were base enough to minister to the evil passions of Saul (1 Sam. xxiii. 19; xxvi. 1), and others, perhaps, might colour their fear by the pretence of conscience (xxiii. 12). But his sparing Saul's life twice, when he was completely in his power, must have destroyed all colour of right in Saul's conduct in the minds of the people, as it also did in his own conscience (xxiv. 3-7; xxvi.); which two passages, though presenting many points of similarity, cannot be referred to the same occasion, without denying to the narrative all historic accuracy and trustworthiness. Though thus degraded and paralysed by the indulgence of malevolent passions, Saul still acted with vigour in repelling the enemies of his country, and in other affairs wherein his jealousy of David was not concerned (xxiii. 27, 28).

The Bible chronology, as does also Usher, dates David's marriage with Michal A.M. 2491, the same year in which Goliath was slain. Hales, with apparent reason, makes it five years later, when David had attained the age of twenty-five. The same year Mephibosheth was born; which seems to be alluded to in 2 Sam. iv. 4; and about five years more appear to have elapsed before the death of Saul. Samuel's death had taken place not long before, as the statement in 1 Sam. xxviii. 3 implies. Probably two years are sufficient to allow time for the intermediate transactions (1 Sam. xxv.-xxxi.), instead of four, as set down in the Bible chronology.

*Saul's third offence and death.*—The measure of Saul's iniquity, now almost full, was completed by an act of direct treason against Jehovah the God of Israel (Exod. xxii. 18; Lev. xix. 31; xx. 27; Deut. xviii. 10, 11). Saul, probably in a fit of zeal, and perhaps as some atonement for his disobedience in other respects, had executed the penalty of the law on those who practised necromancy and divination (1 Sam. xxviii. 3). Now, however, forsaken of God, who gave him no oracles, and rendered, by a course of wickedness, both desperate and infatuated, he requested his attendants to seek him a woman who had a familiar spirit (which is the loose rendering in the English Bible of the expression occurring twice in ver. 7, **אִשַּׁת חַיִּים**, 'a woman a mistress of Ob'; 'habens Pythonem,' Vulg.), that he might obtain from her that direction which Jehovah refused to afford him. The question as to the character of the apparition evoked by the witch of Endor falls more properly to be considered under other articles [DIVINATION; WITCH]; but we may remark that the king himself manifestly both saw and conversed with the phantom, whatever it was, which appeared in the form and spoke in the character of Samuel, and that the predictions uttered by the spectre were real oracles, implying distinct and certain foreknow-

ledge, as the event proved (see Hales, vol. ii., who has discussed this subject very judiciously).

Assured of his own death the next day, and that of his sons; of the ruin of his army and the triumph of his most formidable enemies, whose invasion had tempted him to try this unhallowed expedient—all announced to him by that same authority which had foretold his possession of the kingdom, and whose words had never been falsified—Saul, in a state of dejection which could not promise success to his followers, met the enemy next day in Gilboa, on the extremity of the great plain of Esdraelon; and having seen the total rout of his army and the slaughter of his three sons, of whom the magnanimous Jonathan was one; and having in vain solicited death from the hand of his armour-bearer (Doeg the Edomite, the Jews say, 'A partner before of his master's crimes, and now of his punishment'), Saul perished at last by his own hand. 'So Saul died for his transgression which he committed against the word of the Lord, which he kept not, and also for asking counsel of one that had a familiar spirit, to inquire of it; and inquired not of the Lord: therefore the Lord slew him, and turned the kingdom unto David' (1 Chron. x. 13, 14).

When the Philistines came on the morrow to plunder the slain, they found Saul's body and the bodies of his sons, which, having beheaded them, they fastened to the wall of Bethshan; but the men of Jabesh-gilead, mindful of their former obligation to Saul (1 Sam. xi.), when they heard of the indignity, gratefully and heroically went by night and carried them off, and buried them under a tree in Jabesh, and fasted seven days. It is pleasing to think that even the worst men have left behind them those in whom gratitude and affection are duties. Saul had those who mourned him, as some hand was found to have strewed flowers on the newly-made grave of Nero. From Jabesh the bones of Saul and of his sons were removed by David, and buried in Zelah, in the sepulchre of Kish his father.

There is not in the sacred history, or in any other, a character more melancholy to contemplate than that of Saul. Naturally humble and modest, though of strong passions, he might have adorned a private station. In circumstances which did not expose him to strong temptation, he would probably have acted virtuously. But his natural rashness was controlled neither by a powerful understanding nor a scrupulous conscience; and the obligations of duty, and the ties of gratitude, always felt by him too slightly, were totally disregarded when ambition, envy, and jealousy had taken possession of his mind. The diabolical nature of these passions is seen with frightful distinctness in Saul, whom their indulgence transformed into an unnatural and blood-thirsty monster, who constantly exhibited the moral infatuation, so common among those who have abandoned themselves to sin, of thinking that the punishment of one crime may be escaped by the perpetration of another. In him also is seen that moral anomaly or contradiction, which would be incredible did we not so often witness it, of an individual pursuing habitually a course which his better nature pronounces not only flagitious, but insane (1 Sam. xxiv. 16-22). Saul knew that that person should be king whom yet he persisted in seeking to destroy, and so accelerated his own ruin. For it can

hardly be doubted that the distractions and disaffection occasioned by Saul's persecution of David produced that weakness in his government which encouraged the Philistines to make the invasion in which himself and his sons perished. 'I gave thee a king in mine anger, and took him away in my wrath' (Hos. xii. 11). In the prolonged troubles and disastrous termination of this first reign, the Hebrews were vividly shown how vain was their favourite remedy for the mischiefs of foreign invasion and intestine discord.—R. L.

#### SAUL OF TARSUS. [PAUL.]

SAURIN, JACQUES, was born at Nismes in 1677. After serving some time as a soldier he devoted himself to study, and in 1709 became pastor of the French church at the Hague, where he died in 1730. He acquired much fame as a preacher, and his sermons, of which 12 vols. have been published, have had a wide circulation. His title to a place in this work rests on his *Discours sur l'ancien Testament*, of which the first two vols. appeared before his death. The work was completed by Beausobre and Roques, and fills 6 vols. fol., or 11 8vo, Amst. 1720. It is a work of much research, and contains some ingenious and valuable remarks on many points of difficulty, historical and philosophical. It is adorned by a costly set of engravings. The first vol. was translated into English by John Chamberlayne, Lond. 1723, fol.—W. L. A.

SAW (מִשּׁוֹר, מְנִירָה; Sept. πλωρ). The saw was doubtless used among the Hebrews for the cutting of wood, though this is not mentioned in the Bible; it was used for the cutting of stone (1 Kings vii. 9), and also as an instrument of punishment (2 Sam. xii. 31; 1 Chron. xx. 3). The saws of the Egyptian, so far as known, were all straight and single-handed; but the double-handed saw seems to have been known to the Assyrians (Layard, *Nin. and Bab.* p. 195), and we suppose must have been known to the Hebrews from their sawing stones. Jerome is thought to allude to the circular saw, for he says (*In Esai.* xxviii. 27) that the iron wheels used to thresh corn were driven round 'in serrarum similitudinem.' The Egyptian saws in the British Museum are of bronze; but those used by David as instruments of punishment were of iron. [HANDICRAFT.]—W. L. A.

SCAPE-GOAT. [GOAT, SCAPE; ATONEMENT, DAY OF.]

#### SCARLET. [COLOURS.]

SCEPTRE. The Hebrew word thus rendered is שֵׁבִיט, which in its primary signification denotes a staff of wood (Ezek. xix. 11), about the height of a man, which the ancient kings and chiefs bore as an insigne of honour (*Iliad*, i. 234, 245; ii. 185, seq.; Amos i. 5; Zech. x. 11; Ezek. xix. 11; Wisd. x. 14. Comp. Gen. xlix. 10; Num. xxiv. 17; Is. xiv. 5). As such it appears to have originated in the shepherd's staff, since the first kings were mostly nomade princes (Strabo, xvi. 783; comp. Ps. xxix.) There were, however, some nations among whom the agricultural life must have been the earliest known; and we should not among them expect to find the shepherd's staff advanced to symbolical honour. Accordingly,

Diodorus Siculus (iii. 3) informs us, that the sceptre of the Egyptian kings bore the shape of a plough—a testimony confirmed by existing monuments, in which the long staff which forms the sceptre terminates in a form obviously intended to represent a plough.

A golden sceptre—that is, one washed or plated with gold—is mentioned in Ezek. iv. 11 (comp. Xenoph. *Cyrop.* viii. 7, 13; *Iliad*, i. 15; ii. 268; *Odys.* xi. 91). Other decorations of Oriental sceptres are noticed by Strabo (xvi. 746). Inclining the sceptre was a mark of kingly favour (Esth. iv. 11), and the kissing it a token of submission (Esth. v. 2). Saul appears to have carried his javelin as a mark of superiority (1 Sam. xviii. 10; xxii. 6).—J. K.

SCEVA (Σκευᾶς), a Jew resident at Ephesus at the time of St. Paul's second visit, and described as 'high-priest' either from his having held that office, or from his being chief of one of the twenty-four courses of priests (Acts xix. 14-16).—W. L. A.

SCHAAF, KARL, was born at Nuys or Neuss, in the electorate of Cologne, 28th Aug. 1646, and died at Leyden, where he was professor of Oriental languages, 4th Nov. 1719. His principal works are, *Grammatica Chald. et Syr.* 1686; *Nov. Test. Syriacum*, 1708; *Lexicon Syr. Concordantiale*, 1709; *Epitome Grammat. Heb.* 1716. The edition of the N. T. and the concordantial lexicon which accompanies it, have given Schaaaf a high place among Syriac scholars.—W. L. A.

SCHUCHZER, JOHANN JAKOB, M.D., professor of mathematics and physics at Zürich, was born in that town 4th Aug. 1672, and died there 25th June 1733. His principal work is his *Physica Sacra h. e. Historia Naturalis Biblicæ*, published originally in German in 1725, and translated by the author into Latin, Augsb. 1731-35, 5 vols. fol. It was also translated into French and Dutch. The first German edition is preferred, on account of the greater brilliancy of the plates, of which there are 750. As a popular and correct description of the objects of natural history in the Bible, this work possesses great attractions. It does not, however, throw much light on difficult questions.—W. L. A.

SCHINOS (Σχῖνος) occurs only in the book entitled Susannah, ver. 54, where one of the elders says that he saw Susannah with a young man, ὑπὸ σχῖνον, which is correctly translated 'under a mastic-tree.' The other elder replied, that it was ὑπὸ πρίνον, 'under a holm-tree,' that is, a species of oak. The mastic-tree was well known to the Greeks by the name of σχῖνος. It is the *Pistacia Lentiscus* of botanists, and belongs to the same genus as the *Pistachio* nut and turpentine tree. [BOTNIM and ALAH.] The mastic-tree is a native of the Mediterranean region, and is found in different parts of Syria. It is a moderate-sized tree or large shrub. It is celebrated for producing mastic, a resin which exudes from incisions made in the bark, chiefly in the island of Scio. The hardened mastic, in the form of roundish straw-coloured tears, is much chewed by Turkish women. It consists of resin, with a minute portion of volatile oil: it is much used as a varnish, and sometimes as a medicine, and by dentists in this country.—J. F. R.

SCHLEIERMACHER, FRIED. ERNEST DANIEL, was born at Breslau 21st Nov. 1778, and died at Berlin 12th Feb. 1834. He was educated at Halle, and commenced his active career as assistant minister at Landsberg, on the Warthe, and after filling several subordinate offices in the church, he became professor of theology and pastor of Trinity Church at Berlin. From this position he exercised an immense influence on the intellectual and religious life of Germany. His writings are numerous in several departments of literature. His Biblical works are: *Ueb. die Sogenannten ersten brief d. Paulus an d. Timotheus; ein Krit. Sendschreiben*, Berl. 1807; *Ueber die Schriften des Lukas. Ein Kritisches Versuch*, Berl. 1817, translated into English, with an introduction by the translator, Lond. 1825; *Hermeneutik und Kritik mit besond. beziehung auf d. N. T.*, Berl. 1838; *Einleitung ins N. T.*, Berl. 1845; both these two last published from the author's MS. by Lücke.—W. L. A.

SCHLEUSNER, JOH. FRIED., D.D., was born at Leipzig 16th Jan. 1756, and died 21st Feb. 1831, at Wittenberg, where he was professor of theology, provost, and director of the theological seminary. He rendered important service to Biblical literature by his lexicons to the LXX. and the N. T. The latter appeared first under the title *Novum Lexicon Græco-Latinum in Nov. Test., congestis et variis observationibus philologicis illustratum*, 2 vols. 8vo, Lips. 1792. Several editions of this work have appeared both in Germany and in this country. The British editions are the best as respects paper and type. The Lexicon to the LXX. bears the title, *Novus Thesaurus Philol. Crit. sive lexicon in LXX. et reliquos interpp. Græcos ac scriptt. apocryphos N. T.*, Lips. 1820-21, 5 parts, Glasg. 1822, 3 vols. These lexicons are distinguished by great copiousness of learning and illustration; and though that on the N. T. has been succeeded by works of greater exactness as regards the meaning of the words, its abundance of material will still make it attractive and useful to the student. For that on the LXX. no substitute has appeared.—W. L. A.

SCHMID, ERASMUS, born 27th April 1560 at Delitzsch, was professor of Greek and mathematics at Leipzig, where he died 22d Sept. 1637. He prepared a Latin translation of the N. T., which was published after his death (Nürm. 1658, fol.); but his great work was his *Ταμείον τῶν τῆς Κ. Δ. λέξεων, sive Concordantiæ omnium vocum N. T. Gr.*, Wittemb. 1638, fol. Of this work, which is the Concordance to the Greek N. T., new editions appeared at Gotha 1717, fol., edited by E. S. Cyprian; at Glasgow, 2 vols. 8vo, 1819; and at Leipzig 1853, edited by C. H. Bruder, 4to. This last is immeasurably superior to any of the preceding.—W. L. A.

SCHMID, SEBASTIAN, D.D., a native of Alsatia, was born 6th Jan. 1617 at Lamperheim, and died 9th Jan. 1696 at Strasburg, where he was professor of theology and canonicus. He was a voluminous writer. His principal Biblical works were his translation of the Bible: *Biblia Sacra V. T. et N. ex linguis original. in ling. lat. translata*, Strasb. 1696, 1708, N. T. 1715; and his Commentaries: on *Genesis*, Strasb. 1697; on *Judges*, ib. 1684, 1691, 1706; on *Ruth*, 1696; on *Kings*,

1687; on *Job*, 1670, and often; on *Cohleth*, 1704; on *Isaiah*, Hamb. 1702; on *Jeremiah*, Strasb. 1685, Frank. 1697, 1706; *Minor Prophets*, Leipz. 1685, 1687, 1698; *Hosea*, Frank. 1687; *Romans, Galatians, and Colossians*, etc., Hamb. 1704; *Ephesians*, Strasb. 1684, 1699; *Hebrews*, 1680, Leipz. 1693, 1722; 1 *John*, Frank. and Leipz. 1687, 1707, 1726. Some of these were posthumous publications; they are all much valued for sound and learned exegesis.—W. L. A.

SCHOLZ, JOH. MART. AUGUSTIN, was born at Kapsdorf, near Breslau, 8th Feb. 1794. Having entered the priesthood of the Roman Catholic Church in 1821, he became Catholic professor of theology at Bonn in that year, and prebendary of the cathedral at Cologne in 1831. He devoted himself to Biblical criticism, and acquired fame by his edition of the Greek N. T., 2 vols. 4to [CRITICISM, BIBLICAL]. As preparatory to this work he travelled in the East and through Europe, to examine the different MSS. of the N. T., of which travels he published accounts. He wrote also *Curæ Crit. in hist. textus Evangeliorum*, Heideb. 1820; *Handbuch der Bibl. Archaeologie*, Bonn 1834; *Einleitung in das A. und N. T.*, of which only the O. T. part was published, 3 vols. Cöln 1845-48. He completed the translation and commentary of Brentano and Dereser, of which the portion on the N. T. is wholly his. He died in 1853.—W. L. A.

#### SCHOOLS. [EDUCATION.]

SCHOTT, HEINR. AUG., D.D., successively extraordinary professor of theology at Leipzig, ordinary professor of theology at Wittenberg, and afterwards at Jena, was born at Leipzig 5th Dec. 1780, and died at Jena 30th Dec. 1835. He published some valuable works on sacred rhetoric, and several in Biblical literature. The following are the more important:—*Nov. Test. e recens. Griesbach. nova versione lat. illustratum*, Lips. 1805, 1811, 1825; *Isagoge Hist. Crit. in libros N. T.*, Jen. 1830; *Libri S. antiqui foed. ex sermone Heb. in lat. transl.* (in conjunction with J. F. Winzer), vol. i., containing the Pentateuch, Alton. 1816; *Epp. Pauli ad Thess. et Gal., Test. Gr. recognovit et comment. perpet. illust.*, Lips. 1834; *Opuscula exeget. crit. dogmat.*, 2 vols. Jen. 1817.—W. L. A.

SCHÖTTGEN, CHRISTIAN, born 14th March 1687, died 15th Dec. 1751, was successively rector of a school in Frankfort-on-the-Oder, professor at Gröningen, and rector of the Kreuzschule at Dresden. He wrote several works characterised by much learning, but his most important work is *Hora Hebraica et Talmudica in N. T.*, 2 vols. 4to, Dresd. and Leipz. 1733-42. In connection with this he issued a volume entitled *Der Wahre Messias*, in which he has collected passages from Jewish writings illustrative of the Messianic prophecies. He was the author also of *Nov. Lex. Gr. Lat. in N. T.*, Lips. 1746, of which a new edition by Krebs appeared in 1765, and another by Spohn in 1790.—W. L. A.

SCHULTENS, ALBERT, D.D., rector of the theological college of the states of Holland, and professor of Oriental languages and Hebrew antiquities at Leyden, was born 22d Aug. 1686 at Gröningen, and died 26th Jan. 1750. He was a distinguished Shemitic scholar, and the founder of the Dutch school of Hebrew philology [HEBREW

LANGUAGE]. His principal works are:—*Institutiones ad fundamenta Ling. Heb.*, Leyd. 1737, 1756; *Vetus et regia via Hebraicandi asseria*, Leyd. 1738; *Animadversiones Philol. et Crit. ad varia loca V. T.*, Amst. 1709, 1732; *Liber Jobi cum nova vers. ad Hebr. fontem et comment. perpet.*, Leyd. 1737; *Proverbia Salomonis. Versionem integram ad Hebr. fontem express.*, etc., Leyd. 1748; *Opera Minora*, Leyd. 1769.—W. L. A.

#### SCORPION. [AKRAB.]

SCOTT, THOMAS, was born at Braytoft, in Lincolnshire, Feb. 16, 1747. Having received some amount of education, he was apprenticed, in his fifteenth year, to an apothecary and surgeon in Alford, in his native county; but was, after a few months, dismissed in disgrace, and had to turn to the drudgery of a grazier's life, as an assistant to his father. Notwithstanding his difficulties and disadvantages, he applied for and obtained ordination in his twenty-sixth year, and was appointed to the united curacies of Stoke Goldington and Weston Underwood. Reversing the ordinary course, he now entered himself at Clare Hall, Cambridge, to complete his education. After this he removed to the curacy of Ravenstone, where the great change in his spiritual life, described in the *Force of Truth*, took place. At the instance of the Rev. J. Newton he accepted the curacy of Olney, left vacant by the removal of Mr. Newton to London (1781). In 1785 he became chaplain of the Lock Hospital, London; and, in 1801, was appointed to the living of Aston-Sandford, Bucks, where he died April 16, 1821. Mr. Scott was a diligent student and sound theologian of the moderate Calvinistic school. He wrote and published many useful theological works, none of which requires notice here except that which he regarded as 'the grand business' of his life: *The Holy Bible, containing the Old and New Testaments, with Original Notes, Practical Observations, and copious Marginal References*. This work was begun in 1788, and published in parts. It went through four editions during Mr. Scott's lifetime, each edition being an improvement on the preceding. The fifth edition, which received the author's last corrections, was published after his death in 6 vols. 4to, 1822. Well received at first, it has been always popular. It contains much judicious exposition, and is characterised throughout by good sense and pious feeling. [COMMENTARY.]—I. J.

#### SCREECH-OWL. [LILITH.]

SCRIBES, or Sopherim (סופרים, γραμματεῖς, *Scribæ*), the doctors of the law and interpreters of the Scriptures in, before, and after the time of Christ.

1. *Name and its signification*.—In the earlier records of the O. T. the name *Sopher* (סֹפֵר, participle of סָפַר, *to write, to count*) is given to officers of state whose functions were to write the king's letters, draw up his decrees (2 Kings xii. 10; 2 Chron. xxiv. 11), and to number and write down the military forces, as well as the prisoners (Judg. v. 14; 2 Kings xxv. 19; Is. xxxiii. 18; Jer. lii. 25). As learning was intimately connected with the art of writing, and as these two accomplishments were always associated together in ancient days, these Scribes occupied a distinguished position. Hence they are mentioned side by side with the high-priest

and the captain of the host (2 Kings xii. 10; 2 Chron. xxiv. 11); and hence too the term *Sopher* (סֹפֵר) became in the post-exile period the honourable appellation of *one who copied the law for himself or others, one skilled in the divine law, an interpreter of the Scriptures* (Jer. viii. 8; Ezra vii. 6, 12; Neh. viii. 1, *al.*) In their anxiety to preserve the text of Holy Writ, as well as to point out the import of its injunctions, these Scribes counted every letter and classified every precept of the law. To indicate this the Talmud, in accordance with its general practice always to deduce from the name the various actions of the man, derives the appellation *Sopher* from סָפַר, *to count*, maintaining that this name was given to those who counted the letters of the law (*Kiddushin*, 30 a), as well as from סָדַר, *to number, to arrange, to classify*, submitting that the name was also given to them because they classified the precepts of Scripture (*Jerusalem Shekalim*, v. 1).

2. *Origin and development*.—In describing the rise and progress of the ancient doctors and interpreters of the Scriptures we shall have to distinguish five different periods, viz.—*i.* The period of the *Sopherim*, or the Scribes in the strict sense of the word; *ii.* The period of the *Tanaim*; *iii.* The *Amoraim*; *iv.* The *Saboraim*; and *v.* The period of the *Gaonim*. It is only by separating these different epochs that the work and influence of the doctors of the law can be duly understood.

#### I. THE SOPHERIM (סופרים) OR SCRIBES.

*i. Date and institution*.—The period of the *Sopherim* begins with the return of the Jews from the Babylonish captivity, and ends with the death of Simon the Just (*circa* 458-300 B.C.), embracing nearly a hundred and sixty years. Though there were popular teachers of the law in the Babylonish captivity, as is evident from Ezra viii. 16, where these official instructors are denominated *skilled in the law* (מְבֹרָכִים), and from the fact that Ezra himself was at the head of such a class (Ezra vii. 12, 21, with Neh. xiii. 13), yet the language in which the sacred oracles were written was gradually dying out, and Hebrew ceased in many instances to be the language of the people (Neh. xiii. 24). This rendered the understanding of the Scriptures by the people at large a difficult matter. Besides, the newly altered state after the return from the Babylonish captivity, which called for new enactments as well as for the expansion and modification of some Pentateuchal laws, imperatively demanded that an authoritative body of teachers should so explain the law, which was regarded as the only rule of practice, as to adapt it to present circumstances. Hence Ezra, who reorganised the new state, also organised such a body of interpreters, of which he was the chief. It is for this reason that he is called *Sopher*=*one occupied with books, interpreter of the Book* (Ezra vii. 6, 11, 12, 21; Neh. viii. 1, 4, 9, 13; xii. 26, 36), that he is denominated the second Moses (*Sanhedrin*, 21 b; *Tosiphta*, *ibid.* cap. iv.; *Jerusalem Megilla*, i. 9), and that it is said 'when the *Tora* was forgotten by Israel Ezra came from Babylon and restored it again' (*Succa*, 20 a, with 2 *Esdras* xiv. 21-47). The skilled in the law both from among the tribe of Aaron and the laity, who with Ezra, and after his death to the time of the *Tanaim*, thus interpreted and fixed the divine law, are denominated *Sopherim*, *Scribes*, in the strict sense of the word. Many of these *Sopherim* were members of the Great Synagogue

which was formed by Nehemiah after the death of Ezra [SYNAGOGUE, THE GREAT]; hence the terms *Sopherim* and *the men of the Great Synagogue* (אַנְשֵׁי הַגְּדוֹלָה).

are frequently interchanged, and hence too the canons which were enacted during this period are sometimes recorded in the name of the former and sometimes in the name of the latter, though they proceed from one and the same body. Reserving those enactments which are recorded in the name of the Great Synagogue for that article [SYNAGOGUE, THE GREAT], we shall here specify the most important acts and monuments which have come down to us as proceeding from the *Sopherim* or *Scribes*.

ii. *The work of the Sopherim or Scribes*.—It is not too much to say that the work of these *Sopherim* embraces the whole field of civil and religious law, both as it is contained in the written word of God and as it obtained in the course of time; and that it is most essential to the criticism and interpretation of the O. T. to understand these enactments, inasmuch as they materially affect the text of the Hebrew Scriptures. This will be evident from the following brief description of some of the Sopheric work:—1. In accordance with the primary meaning of their name, the Scribes or *Sopherim* copied the Pentateuch, the Phylacteries, and Mezuzoth, for the people (*Pesachim*, 50 b), since it was only the codices which proceeded from these authoritative teachers that could be relied upon. 2. They guarded the Bible against any interpolations or corruptions, and for this purpose counted the letters of the Scriptures. Thus the Scribes tell us that in five instances (Gen. xviii. 5; xxiv. 35; Num. xxxi. 2; Ps. xxxvi. 7; lxviii. 26), a *vav* crept into the text through a vitiated provincial pronunciation, for which reason these Sopheric corrections are called *the emendations of the Scribes* (עֲמֻר סוֹפְרִים, *Nedarim*, 37 b [KERI AND KETHIV; MASORAH]; Ginsburg's translation of *Jacob b. Chajim's Introduction to the Rabbinic Bible*, p. 12), and that the י in הָיוּ (Lev. xi. 42) is the central letter of the whole Pentateuch (*Kiddushin*, 30 a). 3. They read the law before the people in the synagogues on stated occasions, for which reason Ezra, the chief Scribe, is denominated (ἀναγνώστης) the prælector of the law (1 Esdras viii. 8). Hence the usage of the word Scribe or *Sopher* (סֹפֵר) in post-biblical Hebrew to denote a public reader of the law (*Sabbath*, 31 a). Moreover they indicated to the people when words were in pause or when they were in the plural, or simply had dual forms, as is the case with אַרְבָּן, מִצְרִים, etc. These indications are called *the Reading of the Scribes* (מִקְרָא סוֹפְרִים). 4. They propounded the duties inculcated in the Scriptures to the people at large on Sabbath and festivals, and delivered lectures to their disciples in the weekdays, in the colleges, on the profounder import of Holy Writ. These expositions are called *Sopheric comments* (פִּירוּשֵׁי סוֹפְרִים). 5. They defined the limits of each precept, and determined the manner in which the sundry commands of the divine law are to be performed—*ex. gr.* they fixed the passages of Scripture meant by 'the words of command' which the Lord enjoined the Israelites 'to bind for a sign upon their hands, and to be as frontlets between their eyes' (Exod. xiii. 9, 16; Deut. vi. 8; xi. 18, with *Menachoth*, 34 b [PHYLACTERIES]); the portions of the Bible to be re-

cited at morning and evening prayer as indicated in the words 'thou shalt talk about them . . . when thou liest down and when thou risest up' (Deut. vi. 7), etc. These definitions of the injunctions are denominated *the measures of the Scribes* (שִׁיעוּרֵי סוֹפְרִים), which, though in theory they are distinguished from the letter of the Bible (דְּבָרֵי הַתּוֹרָה), yet in authority are equal to it, and are regarded as *divinely legal* (מִדְּבָרֵי הַתּוֹרָה). 6. They fixed the traditional law, which was in the mouth and memory of the people. 7. They enacted prohibitory laws, called *Fences* (גְּזֵרֹת, גְּזָרִים, גְּזָרִים), to guard the Biblical precepts from being violated, and these enactments are styled *the precepts of the Scribes of the Sopherim, the injunctions of the elders* (מִסוֹרֹת הַזְּקֵנִים, מִצְוֹת הַזְּקֵנִים, דְּבָרֵי זְקֵנִים, דְּבָרִים); and in the N. T. *the traditions of the elders* (παράδοσεις τῶν πρεσβυτέρων, Matt. xv. 2; Mark vii. 3), *the traditions of the fathers* (πατρικαὶ παράδοσεις, Gal. i. 14). Hence, as the phrase דְּבָרֵי סוֹפְרִים is not only used to express the *Sopheric expositions of the Pentateuch*, but more especially to denote the definitions and hedges of the Scribes superadded to the divine law, it is frequently identical with the phrase *oral law* (תּוֹרָה שֶׁבֶּעַל פֶּה).

Hence, too, the remark which often occurs in the Talmudic writings, 'a subject the basis of which is in the words of the Pentateuch, but the definition or superstructure of which is from the words of the Scribes' (דְּבָרֵי שִׁיעוּרֵי מִדְּבָרֵי תּוֹרָה), *Sanhedrin*, 87 a; *Jerusalem*, *ibid.* xi. 4; *Kiddushin*, 77 a); when the simple letter of the inspired code is spoken of in contradistinction to the definitions and hedges of the Scribes; and 8. They removed anthropomorphisms and other indelicate expressions from the Scriptures by introducing alterations into the text, of which the following eighteen instances are especially recorded:—1. For the original reading, יְהוָה עֹמֵד לְפָנַי אַבְרָהָם, and *Jehovah still stood before Abraham* (Gen. xviii. 22), they substituted וַאֲבְרָהָם עֹמֵד לְפָנַי יְהוָה, and *Abraham still stood before Jehovah*, because it appeared offensive to say that the Deity stood before the patriarch. 2. For the remark of Moses in his prayer, 'Kill me, I pray thee, . . . that I may not see (בְּרַעֲתִי) THY EVIL' (Num. xi. 15)—*i.e.* the punishment wherewith thou visitest Israel—they substituted, 'that I may not see (בְּרַעֲתִי) MY EVIL,' because it might seem as if Moses ascribed evil to the Deity. 3 and 4. They altered 'Let her not be as one dead, who proceeded from the womb of (אִמּוֹ) OUR MOTHER, and half of (בִּשְׂרֹנוֹ) OUR FLESH be consumed' (Num. xii. 12), into 'Let her not be as one dead born, which, when it proceeds from the womb of (אִמּוֹ) ITS MOTHER, has half (בִּשְׂרֹנוֹ) ITS FLESH consumed.'

5. They changed 'for his sons cursed (אֱלֹהִים) GOD' (1 Sam. iii. 13), which is still retained in the Sept., into 'for his sons cursed (לָהֶם) THEMSELVES,' because it was too offensive to say that the sons of Eli cursed God, and that Eli knew it and did not reprove them for it. 6. 'Will God see (בְּעֵינָיו) WITH HIS EYE' (2 Sam. xvi. 12)? they altered into 'will God look (בְּעֵינָיו) AT MY AFFLICTION?' because it was too anthropomorphic. 7. 'To his God (לְאֱלֹהָיו), O Israel, . . . and Israel went (לְאֱלֹהָיו) TO THEIR GOD' (1 Kings xii. 16), they

altered into 'TO YOUR TENTS (לְאֹהֲלֶיךָ), O Israel, . . . and Israel departed (לְאֹהֲלֵי) TO THEIR TENTS,' because the separation of Israel from the house of David was regarded as a necessary transition to idolatry, it was looked upon as leaving God and the sanctuary for the worship of idols in tents. 8. For the same reason they altered 2 Chron. x. 16, which is a parallel passage. 9. 'My people have changed (כְּבוֹדִי) MY GLORY for an idol' (Jer. ii. 11), they altered into 'have changed (כְּבוֹדִים) THEIR GLORY into an idol,' because it is too offensive to say such a thing. 10. 'They have put the rod to (אָפַי) MY NOSE' (Ezek. viii. 17), they changed into 'they have put the rod to (אָפַם) THEIR NOSE.' 11. 'They have changed (כְּבוֹדִי) MY GLORY into shame' (Hos. iv. 7), they altered into 'I will change their glory into shame' (כְּבוֹדָם בְּקֶלֶן) כְּבוֹדָם, for the same reason which dictated the ninth alteration. 12. 'Thou diest not' (תָּמֹת), addressed by the prophet to God (Hab. i. 12), they altered into 'we shall not die' (נָמֹת), because it was deemed improper. 13. 'The apple of (עֵינִי) MINE EYE' (Zech. ii. 12), they altered into 'the apple of (עֵינִי) HIS EYE,' for the reason which called forth the tenth emendation. 14. 'Ye make (אוֹתִי) ME expire' (Mal. i. 13), they altered into 'ye weary (אוֹתִי) IT,' because of its being too gross an anthropomorphism. 15. 'They have changed (כְּבוֹדִי) MY GLORY into the similitude of an ox' (Ps. cvi. 20), they altered into 'they have changed (כְּבוֹדָם) THEIR GLORY into the similitude of an ox,' for the same reason which called forth the alterations in Jer. ii. 11 and Hos. iv. 7, or emendations nine and eleven. 16. 'Am I a burden (עֹלֶיךָ) TO THEE?' (Job vii. 20), which Job addresses to God, they altered into 'so that I am a burden (אֵלַי) TO MYSELF,' to remove its offensiveness. 17. 'They condemned (אֵת אֱלֹהִים, or אֵת הָרִין) GOD, or THE DIVINE JUSTICE' (Job xxxii. 3), they altered into 'they condemned (אֵיבֹב) Job,' for the same reason which called forth the sixteenth emendation; and 18. 'Thou wilt remember, and THY SOUL WILL MOURN OVER ME' (וְתִשָּׁחַ עָלַי), Lam. iii. 20), they altered into 'and my soul is humbled within me (וְתִשָּׁחַ עָלַי נַפְשִׁי); because of the seeming impropriety on the part of the sacred writer to say that God will mourn. These alterations are denominated *Tikun Sopherim*, the eighteen emendations of the Scribes (יָחַ מְלֵין תְּקֻן סוֹפְרִים), or simply, *Tikun Sopherim* (תְּקֻן סוֹפְרִים) = the emendations of the Scribes, and are given in the *Massora magna* on Num. i. 1; xi. 15; Ps. cvi. 20; Ezek. viii. 17; Hab. i. 12; and in the *Massora finalis* פֶּסֶק, 13 (comp. Pinsker in the Hebrew Essays and Reviews, entitled *Keren Chemed*, vol. ix. p. 52, ff., Berlin 1856; Geiger, *Urschrift und Uebersetzungen der Bibel*, p. 308, ff.; Frensdorff, *Ochlah W'ochlah*, p. 37, ff., Hanover 1864; Ginsburg, *The Introduction of Jacob b. Chajim to the Rabbinic Bible, Hebrew and English*, p. 28, etc., Longman 1865).

iii. The manner in which the Sopherim or Scribes transmitted their work.—Their great reverence for the divine law, their extraordinary modesty and humility, as well as their fear lest any of their writings should be raised to the dignity of Holy Writ, prevented the Scribes or Sopherim from embodying their expositions and enactments in sepa-

rate treatises. This is the reason why there are no books of the Scribes extant, and why they most scrupulously abstained from dogmatising, so much

so that the phrase, 'the Laws of the Scribes' (הַלְכוֹת סוֹפְרִים) does not occur. It was the later doctors of the law (סוֹפְרֵי הַתְּנַאִים = νομοδιδασκαλοι) who canonised the opinions of the Scribes (דְּבָרֵי סוֹפְרִים), which had been transmitted orally and through diverse signs. These signs (סִמְנוֹת) or indications (רְמוּזִים) the Scribes put down in the margins of the copies of the Hebrew Scriptures, to indicate to them the interpretations and definitions which their predecessors, contemporaries, and which they themselves put on certain passages, and these signs formed the foundation of the *Keri* and *Kethiv*, *plene* and *defective*, etc. Thus, for instance, from Exod. xxi. 8 they deduced that it is the bouden duty of the master to marry his maiden who was sold to him for this purpose, though the law tolerates an alternative, and to indicate this opinion the Scribes put in the margin against יַעֲרָה, 'whom

he will not betroth,' the word לֹא with ו instead of א, i. e. *whom he ought to betroth* (comp. *Bechoroth*, 13 a; Rashi on *Exod.* xxi. 8). Again, in Lev. xxv. 29, 30, it is enacted that if a house in a walled city has been sold and is not redeemed within a year it becomes the absolute property of the purchaser. Now, the Scribes defined the phrase *walled city* to mean a city which had walls in the time of the conquest of Canaan by Joshua, though these walls were afterwards removed, and to indicate this they put in the margin against אֶשֶׁר לֹא

הוּמָה, 'which had a wall,' the word לֹא with ו instead of א, i. e. *which has no wall now* (comp. *Erachin*, 32 a; *Shebuoth*, 16 a; Rashi on *Lev.* xxv. 30, 31; Maimonides, *Iud Ha-Cheraka Hilchoth Shemita Ve-Jobel*, xii. 15). They concluded from Lev. xxiii. 4 that the proclamation or fixing of the new moon devolved upon the supreme court at Jerusalem (*Mishna Rosh Ha-Shana*, i. 8, 9; ii. 5, 7), and to indicate this the Scribes wrote the defective אֶתָּם, 'ye shall pronounce, i. e. *it is sanctified*' [NEW MOON], instead of the plene אותם. The Scribes also indicated that certain commandments are not to be restricted to Jerusalem, but are to be kept wherever the Jews reside, by writing in such instances the defective מִשְׁפָּתֵיכֶם, i. e. *in your desolations*, instead of the plene מוֹשְׁבֵיכֶם, *your dwellings* (Lev. xxiii. 14, 31). These signs are the basis of the *Massorah*, and account for many of the various readings which obtained in the course of time. For further information on this most important branch of the Sopheric work, we must refer to the elaborate treatise of Krochmal, entitled *More Neboche Ha-Zeman*, sec. xiii. p. 161, etc.

iv. The authority of the Scribes.—Though the Scribes themselves did not issue their expositions of what they believed to be the doctrines of Holy Writ with the declaration that 'except every one do keep them whole and undefiled, without doubt he shall perish everlastingly,' or 'except a man believe them faithfully, he cannot be saved,' but simply stated them as their opinions about the teachings of the divine law; yet the doctors of the law who succeeded the Sopherim accepted these expositions as final, and decreed that whosoever gainsays their authority commits a capital offence.

As the penalty attached to the violation of some of the Mosaic injunctions and prohibitions was not very serious, inasmuch as the law distinguished between the diverse kinds of transgression, whilst there is no distinction made in the Sopheric enactments, since the same amount of guilt and the same kind of punishment were incurred in case any one of their precepts was violated; the sages of the Mishna remark, 'To be against the words of the Scribes is more punishable than to be against the words of the Bible; he who, in order to transgress the Scriptures, says phylacteries are not enjoined in Holy Writ is acquitted, but he who says that there ought to be five compartments in the phylacteries, thus adding to the decisions of the Scribes [PHYLACTERIES], is guilty' (*Sanhedrin*, xi. 3). Hence also the Talmudic exposition of Eccles. xii. 9, which is as follows:—'Above these, my son, beware of making many books there is no end;' i.e. my son, take care of the decisions of the Scribes above the words of the Bible, for in the words of Scrip-

ture there are both (עשה) injunctions and (לא תעשה) prohibitions [the transgression of some of these involves only a slight punishment], whilst the transgression of any one of the precepts of the Scribes is a capital offence. And if thou shouldst say, seeing that they are so weighty, Why are they not written down? [Reply] To make many books there is no end' (*Eruvin*, 21 b). Now, however much these bold statements might at first appear to exalt the expositions of men above the word of God, a little reflection will show that the inference deduced therefrom, and the charges preferred by Eisenmenger, Buxtorf, M'Caul, and others, against the Jews, based thereupon, are alike unfair and unjust. Is it not true that, though we boast that the Bible is the code of Protestants, yet we accept the creeds, the articles, and the canons, which are uninspired compositions, as the exponents of Holy Writ, and that in questions of heresies our supreme ecclesiastical court does not test the soundness or unsoundness of any doctrine by the dicta of the Bible, but by these human expositions? Nay, our ecclesiastical court positively refuses to listen to any appeal to the Bible, and punishes far more severely nonconformity to its decrees than departures from some of the injunctions in Holy Writ. Still, we should rebut it as unfair if the Jews were to charge us with honouring the decisions of our Scribes above the Bible; and surely it is only just that if they, like ourselves, appeal to certain expositions and decrees of their Scribes as final, we should not charge them with annulling the Word of God. Besides, it must be remembered that, though only three names of the Scribes, properly so called, have come down to us—viz., Ezra, Zadok (*Neh.* xiii. 13), and Simon the Just—yet there can be but little doubt that, like these three, all the rest were inspired with divine wisdom, and that most of their expositions, which are dispersed through the ancient Jewish writings, exhibit the spirit of the Bible, and that their decrees answered the requirements of the time.

## II. THE TANAIM (תנאים) or TEACHERS OF THE LAW.

i. *Name and date of the Tanaim.*—The appellation *Tanaim* is Aramaic (תנאים, sing. תנאי, frequentative of the Chaldee תנה = Hebrew שנה, to repeat), and literally denotes *Repeaters of the Law*, or *Teachers of the Law*. The Hebrew equivalent

for this title is שוני הלכות, whilst in the N. T. this class of teachers are denominated νομοδιδασκαλοι (Luke v. 17; Acts v. 34). These teachers of the law are also called the *Sages*, the *Wise* (חכמים, σοφοί), *elders* (זקנים), πρεσβύτεροι, *Succa*, 46; *Sabbath*, 64), and in later times *Rabbanan* (רבנן) = *our Teacher*, *Rabbani* (= Παῖς σου, Mark x. 51; John xx. 16), *Rabbon*, and *Rabbi* [RABBI]. It is only rarely that the great doctors of this period are called סופרים, *Scribes* (comp. *Kelim*, 13 b). The period of the *Tanaim* begins with the famous Antigonos of Soho (B.C. 200), and terminates with Gamaliel III. b. Jehudah I. (A.D. 220), in whose presidency the Sanhedrim, and with it the college, were transferred from Jabne to Tiberias, thus extending over 420 years.

ii. *The work of the Tanaim.*—The labours and tenets of these doctors of the law are of the greatest interest to the Christian student of the N. T., inasmuch as it was in their midst that our Saviour appeared; and as both Christ and his apostles frequently refer to the teachings, and often employ the very language of the *Tanaim*. The chief aim of the doctors of the law during this period was—

1. To fix and formalise the views and expositions of their predecessors, the *Sopherim*, and to pass them as laws. Thus fixed and established, these views were termed *Halachoth* (הלכות) = *laws*: they are composed in Hebrew and expressed in laconic and often enigmatical formulæ. The formalising of these *Halachoth* was especially needed, since the successive ascendancy of the Persians, Egyptians, Syrians, and Romans, over Palestine greatly influenced the habits and conduct of the Jewish people; and since the Scribes themselves, as we have seen, did not set forth their opinions as final. The relation which the work of the *Tanaim* or the νομοδιδασκαλοι in this department bears to that of the Scribes will be better understood by an example. The Scribes deduced from the words, 'When thou liest down and when thou risest up' (בשכבך ובקומך, Deut. vi. 7), that it is the duty of every Israelite to repeat both morning and evening the sections of the law (i.e. Deut. vi. 4-9; xi. 13-21) which proclaim the unity of God, without specifying the hours during which the passages are to be recited. Whilst the νομοδιδασκαλοι, accepting this deduction of the Scribes as law (הלכה), fixed the time when this declaration about the unity of God is to be made by every Israelite, without mentioning the length of the section to be recited, or that it is a duty to do so, because they founded it upon the interpretation of the *Sopherim* (*Mishna Berachoth*, i. 1-5).

2. The *Tanaim* compiled exegetical rules (מדות) to show how these opinions of the Scribes, as well as the expansion of these views by doctors of the law, are to be deduced from the Scriptures. These rules are given in the articles HILLEL I. and ISHMAEL B. ELISA in this Cyclopædia. The study of the connection between the opinions of the Scribes formalised into *Halachoth* and the Bible was called the *Midrash*, or *exposition of the Scriptures* (מדרש הכתובים). 3. They developed the ritual and judicial questions hinted at in the Pentateuch in accordance with the requirements of the time and the ever-changing circumstances of the nation. As the period over which the work of these teachers of the law extended was very long, and as the older doctors of this period expressed their definitions of the *Halachoth*

in extremely concise and sometimes in obscure formulae, many of these *Halachoth*, like the Scriptures, needed further elucidation, and became the object of study and discussion among the later *Tanaim*. These discussions, as well as the different modes of exposition whereby the sundry *Halachoth* were connected with the Bible, which reflect the mental characteristics and idiosyncrasies of the particular teachers and schools, were gradually collected and rubricated, and now constitute the contents of the *Mishna*, and the commentaries on the Pentateuch entitled *Mechiltha*, *Siphra*, and *Siphri*, a description of which is given in the article MID-RASH. For the other work of the most distinguished among these doctors of the law we must refer to the article SANHEDRIM in this Cyclopædia. It must be remembered that this supreme court and chief seat of learning dates from the commencement of the *Tanaim* period.

iii. *Some of the distinguished Doctors of the Law of the period, and their tenets.*—As the presidents and vice-presidents of the chief seat of learning during the whole of this period are given in chronological order in the article EDUCATION, we shall here only mention such of the doctors of the law as have influenced the Jewish mind and the religious opinions of the nation, and by their teaching prepared the way for Christianity. Foremost among these doctors of the law are to be mentioned :—

a. Antigonus of Soho (B.C. 200-170), whose famous maxim given in the article SADDUCEES, according to tradition gave rise to Sadduceeism and Boethusianism [SADDUCEES], and who received the traditions of the fathers from Simon the Just, and transmitted them to his successors (*Aboth*. i. 3).

b. Jose b. Joëser, of Zereda, and his companion Jose b. Jochanan, of Jerusalem, who were the first of the four pairs (זוגות) that headed the Sanhedrim and the doctors of the law as president and vice-president (B.C. 170-140). Jose b. Joëser was a priest, and played an important part in the Maccabæan struggles. He was the spiritual head of the *Chasidim* (*Mishna Chagiga*, ii. 7), also called *Scribes* (γραμματεῖς, 1 Maccab. vii. 12, 13; 2 Maccab. vi. 18), who afterwards developed themselves into the Essenes [CHASIDIM; ESSENES], was among the 'company of Assideans who were mighty men of Israel, even all such as were voluntarily devoted unto the law,' and the high-priest of the sixty who were slain by Bacchides through the treachery of Alcimus (1 Maccab. ii. 42; vii. 12-16, with *Chagiga*, 18 b; *Bereshith Rabba*, Pericope

תולדות sec. lxx.) The grand maxim of Jose b. Joëser was: 'Let thy house be the place of assembly for the sages, sit in the dust of their feet, and eagerly drink in their words' (*Aboth*. i. 4). Bearing in mind the distracted state of the Jewish people at that time, and the fearful strides which Hellenism made among the highest sacerdotal functionaries, and which threatened to overthrow the ancestral doctrines, this solemn admonition of the martyr that every household should form itself into a band of defenders of the faith, headed by *sages*—i.e. *scribes*, or *doctors of the law*—and that every Israelite should strive to be instructed in the religion of his forefathers (the phrase 'to be enveloped in the dust of their feet,' has its origin in the ancient custom of disciples sitting on the ground and sometimes in the dust at the feet of their

teachers), will be appreciated. This will also explain the maxim of his colleague Jose b. Jochanan: 'Let thy house be wide open, let the poor be thy guests, and do not talk too much with women' (*Aboth*. i. 5). To erect a wall of partition between the apostate Hellenists who desecrated the sanctuary, and the faithful, as well as to prevent the residence of Jews among the Syrians, and check Hellenistic luxuries, these two doctors of the law enacted that contact with the soil of any foreign country, and the use of glass utensils, impart Levitical defilement (*Sabbath*, 14 b). These rigorous laws of Levitical purity laid the foundation of the withdrawal of the Essenes from the community at large, and of the ritual and doctrinal difference between the Pharisees and Sadducees, as hitherto the differences of these two parties were chiefly political. Hence the remark in the *Mishna*, 'since the death of Jose ben Joëser of Zereda, and Jose ben Jochanan of Jerusalem, the unity in the schools has ceased' (*Sota*, ix. 9).

c. Jochanan, the high-priest and governor of Jerusalem, ben Simon, ben Mattathias, commonly called John Hyrcanus (B.C. 135-106), was a distinguished Pharisaic scribe or doctor of the law. The enactments which he passed, as recorded in the *Mishna*, show his endeavours to render the temple service uniform, his humane feelings, and desire to alleviate the unnecessary burdens of the law. Though Ezra, to punish the Levites for their backwardness in returning from Babylon, deprived them of their tithes or transferred them to the priests (*Ezra* ii. 36-42; viii. 15; *Neh.* vii. 43-45, with *Mishna Maser Shenai*, v. 15; *Sota*, ix. 10; *Babylon Talmud Jebamoth*, 86 b; *Kethuboth*, 25 a), yet the formula consisting of Deut. xxvi. 13-15, and called confession (פירוק), in which the Israelite had to declare in the temple before God that he had paid the tithes to the *Levite*, continued to be recited at the time of the evening sacrifice or the last day of Passover. There was also a custom of singing every morning in the temple Ps. xlv. 23-26 as part of the hymnal service, and of wounding the sacrifices on their head for the blood to run into their eyes, so as momentarily to blind them in order that they might be bound easily. Moreover, up to the time of Jochanan the high-priest=John Hyrcanus, the people worked during the middle days of the festivals [PASSOVER; TABERNACLES, FEAST OF]. 'Now Jochanan the high-priest did away with the confession about the Levitical tithes (because it was now inapplicable); he also ordered the discontinuance of chanting 'Awake!' (Ps. xlv. 23, etc., because the singing of it every morning made it appear as if God were asleep), and the wounding of the sacrifices (because it was cruel), interdicted working on the middle days of the festivals, since up to his days the hammer was busily at work in Jerusalem, and ordered buyers of questionable produce whether it had been tithed or not to tithe it' (*Mishna, Maser Shenai*, v. 16; *Sota*, ix. 10).

d. Jehoshua ben Perachja, and his colleague Nitai of Arabela, who were the second of the four pairs (זוגות) that headed the Sanhedrim and the doctors of the law as president and vice-president (B.C. 140-110). Though their surviving maxims are very few, yet they are indicative of the irreparable breach which was then made between the Pharisees and the Sadducees. In harmony with the wisdom, humanity, consistency, and leniency of John Hyrcanus, under whose pontificate and

rule these two distinguished doctors of the law taught, Jehoshua b. Perachja propounded the maxim: 'Procure for thyself a teacher, gain to thyself a friend, and judge every man by the rule of innocence' (*Aboth.* i. 6). His colleague, Nitai of Arabela, however, who regarded the foreign policy of the Sadducees as desecration of God's holy heritage [SADDUCEES], and as working into the hands of those very enemies whom they had only just driven from the holy city (1 Maccab. xiii., etc.), taught: 'Keep aloof from wicked neighbours, have no fellowship with sinners, and reject not the belief in retribution' (*Aboth.* i. 7). It was this maxim which brought about the final separation between the Pharisees and the Sadducees in the time of Hyrcanus. The gulf thus created was deepened by an unhappy circumstance which made John Hyrcanus desert the ranks of the Pharisees and go over to the Sadducees, and which gave the first impulse to the bloody sufferings, and the ultimate destruction of his country and people for whose independence and religion he and his family fought so bravely. The circumstance is as follows:—Having returned from a glorious victory, and being pleased with the condition of the people at home, Hyrcanus gave a banquet, to which he invited both Pharisees and Sadducees. As he was enjoying himself in the midst of his guests, he, instigated by the Sadducees, asked the Pharisees to tell him whether there was any command which he had transgressed, that he might make amends, since it was his great desire to make the law of God his rule of life. To this one of the Pharisees replied: 'Let Hyrcanus be satisfied with the regal crown and give the priestly diadem to some one more worthy of it; because before his birth his mother was taken captive from the Maccabæan home, in a raid of the Syrians upon Modin, and it is illegal for the son of a captive to officiate as a priest, much more as high-priest.' The Sadducees, who had thus far succeeded, tried to persuade Hyrcanus that the Pharisees did this designedly in order to lower him in the eyes of the people. To ascertain it, Hyrcanus demanded of the Sanhedrim to sentence the offender to capital punishment. But the Pharisaic doctors of the law, who had no special enactment against indignities heaped upon a sovereign, who believed and taught that all men are alike in the sight of God, and whose very president at this time propounded the maxim of leniency, said that according to the law they could only give him forty stripes save one, which was the regular punishment for slanderers. It was this which made Hyrcanus go over to the Sadducees, massacre many of the Scribes, and fill the Sanhedrim with Sadducees (comp. Josephus, *Antiq.* xiii. 10. 5, 6, with *Kiddushin*, 66 a; Graetz, *Geschichte der Juden*, iii. 453, 2d ed.)

*e.* This deplorable condition, however, soon passed by, and the Scribes were again in the ascendancy in the reign of Alexander Jannai, son of John Hyrcanus, when Simon ben Shetaah, brother of queen Salome (*Berachoth*, 48, a), was the president of the Sanhedrim, and Jehudah ben Tabai vice-president (B.C. 110-65). Though Simon b. Shetaah had for a time to quit the court and hide himself, because he was accused of treason against the sovereign, yet Alexander Jannai reinstated him upon the solicitation of the Parthian ambassadors, who missed at the royal table the wisdom of this Scribe, which they had so much enjoyed on a former

occasion. He allowed himself to be elected member of the Sanhedrim, which was then filled with the Sadducees whom John Hyrcanus had put there, and by his wisdom repeatedly in the presence of the queen and king confounded these Sadducees by puzzling questions about the treatment, without tradition, of such legal cases as are not mentioned in the Mosaic law, so much so that they gradually quitted the supreme court, and Simon filled the vacancies with the Scribes. The calamitous event which happened at the Feast of Tabernacles whilst Alexander Jannai was officiating in the temple [TABERNACLES, FEAST OF] checked for a time the progress of the Scribes, but it was more than made up by the fact that this sovereign on his death-bed committed his wife to the care of the Pharisees (Joseph. *Antiq.* xiii. 16. 1, 2). Under Simon b. Shetaah and Jehudah b. Tabai the Sanhedrim was entirely cleared of the Sadducees, and a festival day was instituted (March 17, B.C. 78) to commemorate the return of *the residue of the Scribes* (פְּלִיטַת סוֹפְרֵי) who went into exile in the days of John Hyrcanus. The reconstruction of the Sanhedrim, however, was not the only important work effected by these two doctors of the law. To render divorce difficult, Simon b. Shetaah decreed that the money of marriage-settlement, which was at first deposited with the wife's father, and afterwards laid out in household furniture—thus being no loss to the husband in case he divorced his wife—should amount at least to two *minæ* silver (about £7:10) if the bride is a maiden, and half that sum to a widow; that the husband is to invest it in his business, so as to render it a matter of great inconvenience and difficulty to draw it out, and that the whole of his property is to be pledged for the payment of this settlement (כתובה, *סגוראפיה*), thus precluding the possibility of her being defrauded of it by unprincipled heirs (*Babylon Kethuboth*, 82 b; *Jerusalem Kethuboth*, cap. viii. end; *Sabbath*, xiv. 6; xvi. 6). The formula of this instrument is given in the article MARRIAGE in this Cyclopædia. Simon b. Shetaah, moreover, introduced superior schools into every provincial town, and ordained that all the youths from the age of sixteen should visit them (*Jerusalem Kethuboth*, viii. 11), which created a new epoch in the education of the nation [EDUCATION]. Their zeal, however, to uphold the law in opposition to the Sadducees led them to commit rigorous acts towards their antagonists (Joseph. *Antiq.* xiii. 16. 1); and on one occasion Jehudah b. Tabai, to eradicate the Sadducean notions from the people [SADDUCEES], condemned to death a false witness in a capital trial (*Maccoth*, v. b). But when Simon b. Shetaah reprimanded his colleague for this unlawful act, Jehudah b. Tabai, who was then president of the Sanhedrim, was so truly penitent, that he at once gave up the presidency, threw himself on the grave of the man he had condemned, crying most bitterly, and beseeching God to take his own life as an atonement for the one he had judicially taken away (*Maccoth*, *ibid.*) This rash act taught him greater leniency for the future, and accounts for his precept to judges: 'Only as long as the accused stand before thee regard them as transgressors of the law; but regard them as innocent immediately after they are released, and have suffered the penalty of the law' (*Aboth.* i. 8). The following may be mentioned as an instance of Simon b. Shetaah's extraordinary con-

scientiousness, which must have greatly impressed itself upon the minds of the people, and prepared the way for the reception of the truth as it is in Jesus. The Sadducees, out of revenge for his rigorous measures against them, suborned two witnesses who testified that his son committed a capital crime. He was accordingly sentenced to death. As he was led to the place of execution, the witnesses, being filled with horror that they had condemned innocent blood, confessed that they had borne false witness. But as the law from time immemorial had enacted that 'the evidence once given and accepted cannot be revoked' (Maimonides, *Iad Ha-Chezaka Ililchoth Eduth*, iii. 5), and though Simon's fatherly feelings for a moment made him hesitate about the propriety of the execution, yet his son, to uphold the dignity of the law, exclaimed to him, 'Father, if thou wishest that salvation should come to Israel through thee, pay no regard to my life' (אבא אם בקשה לנא)

(תשועה על ידך עשה אותי כאסקופה), and accordingly the son died a martyr to the honour of the law (*Jerusalem Chagiga*, ii. 2; *Sanhedrin*, i. 5; vii. 3). This noble sacrifice on the part of Simon b. Shetaah evidently made him lay down the maxim: 'Test witnesses most carefully, and be cautious in questioning them, lest they learn therefrom how to impart to their falsehood the garb of truth' (*Aboth*, i. 9). No wonder that tradition celebrates Simon b. Shetaah as 'the restorer of the divine law to its pristine glory' (והיה העולם משתומם עד שבא שמעון) *Kiddushin*.

*f.* Shemaia (= Σαμαίας, *Joseph. Antiq.* xiv. 9. 4) and Abtaljon (= Παλλων, *Joseph. Antiq.* xv. 1. 1, 10. 4) are the two great doctors of the law who now succeeded to the presidency and vice-presidency (B.C. 65-30) as the fourth pair (זונות). They are generally considered as having been proselytes. But this is precluded by the fact that they were at the head of the Sanhedrim, and that according to the Jewish law [*SANHEDRIM*] no proselyte could even be an ordinary member of the seventy-one. Indeed Graetz (iii. 481) has shown that they were Alexandrian Jews, and that the notion of their having been proselytes rests upon the misinterpretation of a passage in the Talmud. Though very few of their enactments have come down to us, yet the influence which their great learning and unflinching integrity gave them among the people at large, and especially among the succeeding doctors of the law, was such as to secure for any question an authoritative reception if it could be traced to have been propounded by Shemaia and Abtaljon (*Mishna, Eduoth*, i. 3; *Pesachim*, 66 a), who were styled

the two magnates of their day (גדולי הדור). The two maxims of these distinguished Scribes which have survived reflect the deplorable condition of the Jews under the Roman yoke. Thus Shemaia urged on his disciples, 'Love a handicraft, hate the Rabbinate, and befriend not thyself with the worldly powers' (*Aboth*, i. 10); whilst Abtaljon said, 'Sages, be careful in your utterances, lest ye draw upon yourselves the punishment of exile, and ye be banished to a place where the water is poisonous [*i.e.* of seductive influence], and the disciples who go with you drink thereof and die, and thus bring reproach upon the sacred name of God' (*ibid.* i. 11). Some idea may be formed of Shemaia's unflinching

integrity from his conduct at the trial of Herod before the Sanhedrim. When this magnate was summoned before the supreme tribunal to answer the accusation of the mothers whose children he had slain, and when his armed appearance, and his retinue of soldiers, frightened the other members of the court into silence, Shemaia the president had the courage to pronounce the sentence of death against him (*Joseph. Antiq.* xiv. 9. 4).

*g.* Great as was the learning, the integrity, and the influence of all the foregoing Scribes, yet Hillel I., who now succeeded to the presidential throne (B.C. 30-A.D. 10), surpassed in these and in many other respects all his predecessors. His character, however, as well as his doctrines, etc., are described in a separate article [*HILLEL I.*] in this Cyclopædia. Of the other doctors of the law (*viz.* Simon b. Hillel, Gamaliel I. b. Simon, Simon II. b. Gamaliel, Jochanan b. Zakkai, Gamaliel II., Simon III., Jehudah I., and Gamaliel III.) who successively became the heads of the colleges till the close of this period, Gamaliel I. and Gamaliel II. are noticed in separate articles, whilst the distinguished disciples of this epoch are enumerated in the article *EDUCATION*. The most cursory reflection upon the characters and teachings of the chiefs of these Scribes down to the time of Christ, as above described—and be it remembered that as is the head so is the body—will convince any impartial reader that they were not the set of formalists and hypocrites which they are too often represented to be, but that the conclusions arrived at in the article *Pharisees* and elsewhere in this Cyclopædia are based upon facts.

### III. THE AMORAIM (אמוראים), or LATER DOCTORS OF THE LAW.

*i. Name and date.*—The name *Amoraim* (אמוראים, sing. אמורא, from אמר, to say, to hold forth, to expound), like the appellation *Tanaim*, is Aramaic; it literally denotes *Recorders, Expositors*, and was given, after the redaction of the Mishna, to those 'wise men' and 'doctors of the law,' who alone constituted the authorised recorders and expositors of the received *Halacha*. The period of the *Amoraim* begins with the immediate disciples of R. Jehudah the Holy (A.D. 220), and terminates with the completion of the Babylonian Talmud (*circa* A.D. 500), embracing nearly 270 years.

*ii. The work of the Amoraim.*—As the title implies, these *Amoraim* had to examine, decide, and expound the import of the Mishna for general practice. After the redaction of the Mishna by Jehudah the Holy (A.D. 163-193), this *Corpus Juris* became the canonical code, and constituted the source of study and the rule of practice, both in Babylon, whither it was imported immediately after its appearance by the celebrated Rab [*RAB*], and in Palestine. These commentaries and discussions on the Mishna in the two countries are embodied in the two *Talmuds*, or more properly *Gemaras*, which are named after them—*viz.* Jerusalem and Babylon. The Jerusalem Talmud was made up in Tiberias about A.D. 400, because the Christian government took away from the doctors of the law the right of ordination, thus causing the extinction of the patriarchate and the declension of the Palestinian school; whilst the Babylonian Talmud was not closed finally till the period of the *Saboraim*, as the schools were still greatly flourishing in Babylon under the presidency of

*Resh Methibtha* (רִישׁ מְתִיבְתָּה), or *Heads of Schools*, and the *Resh Galutha* (רִישׁ גָּלוּתָה), or *the Princes of the Exiles*, as they were called [EDUCATION; MIDRASH; TALMUD]. For the distinguished doctors of the law who occupied the patriarchate, and were the presidents and vice-presidents of colleges during this period, we must refer to the article EDUCATION, where they are enumerated in chronological order.

IV. THE SABORAIM (סבוראים), or THE TEACHERS OF THE LAW AFTER THE CONCLUSION OF THE TALMUD.

i. *Name and date.*—The appellation *Saboraim* (סבוראים), from the Aramaic סָבַר, *to think, to discern, to judge*) properly signifies *decisors*, and was given to those doctors of the law who determined

the law (הִלְכָה) from a careful examination of all the *pros* and *cons* (סברא) urged by the *Amoraim* in their controversies on divine, legal, and ritual questions contained in the Talmud. Hence the remark of Sherira Gaon (A.D. 968-998): 'Though no independent legislation existed after the cessation of the *Amoraim*, yet there continued exposition and weighing of the transmitted and prevalent opinions; and it is from this weighing of opinions that the doctors derive their name *Saboraim*' (Graetz, v. 426). The period of the *Saboraim* extends from about A.D. 500 to A.D. 657. This period, however, is divisible into two parts, and it is only the first part—i.e. from the death of Rabina, A.D. 500—to the death of R. Giza and R. Simuna, A.D. 550, which can properly be denominated the real *Saboraim epoch*; whilst the second part, which consists of the interval between the real *Saboraim* and the rise of the *Gaonim* from A.D. 550 to 657, has no proper designation, because the doctors who lived at this time, and the work which they did, are alike unimportant and desultory.

ii. *The work of the Saboraim.*—Unlike their predecessors the *Tanaim* and *Amoraim*, and their successors the *Gaonim*, these doctors of the law neither formed a succession of teachers nor were they engaged in any new work. They were a circle of literati and teachers, who supplemented and completed the work of the *Amoraim*. They explained all doubtful questions in the Talmud, made new additions to it both from oral traditions and MS. notes, inserted into it all the anecdotes which were current in the different schools, closed it, and wrote it down in the form in which we now have it. Hence their work had nothing to do with theories, but was preeminently practical. The chief men among these *Saboraim* which have come down to us by name are R. Giza, the president of the college at Sora, R. Simuna, the president of the college at Pumbadita and Rabbi of Rob. Their

disciples and successors who belong to this period are unknown (Graetz, v. 15, ff.; 422, ff.)

V. THE GAONIM (גאונים), or THE LAST DOCTORS OF THE LAW IN THE CHAIN OF RABBINIC SUCCESSION.

i. *Name and date.*—It is now difficult to ascertain the etymology of גָּאוֹן, the title of the chief doctors of the law who succeeded the *Saboraim*. One thing, however, is certain—namely, that it is not Hebrew, since both in the Bible and in the Talmud this word signifies *pride, haughtiness*, whilst here it is an honourable appellation given exclusively to the presidents of the two distinguished colleges at Sora and Pumbadita. Now the period in which it originated may throw some light on the etymology of this title. Graetz (v. 139, 477) has shown that this title obtained circa A.D. 658. When Ali, the son-in-law and vizier of Mohammed, was elected caliph (655), and the Islamites were divided into two parties, one for and the other against him, both the Babylonian Jews and the Nestorian Christians decided in his favour and rendered him great assistance. Maremes, who supported Ali's commander-in-chief in the siege of Mosul, was nominated *Catholicos*, whilst R. Isaac the president of the college at Sora, who at the head of several thousand Jews aided Ali in the capture of Tiruz-Shabur (May 657), was rewarded with the title *Gaon* (*Excellence*). Accordingly the title גָּאוֹן is either of Arabic or Persian origin, and properly belonged to the presidents of the Sora college, who alone bore the appellation at the beginning. The president of the subordinate sister college at Pumbadita was called the *head of the college* (Heb. רִישׁ יִשְׁבֵּה, Aramaic מְתִיבְתָּה רִישׁ) by the Babylonians, and the appellation *Gaon*, whereby they were sometimes styled, obtained at first among the non-Babylonian Jews who were not thoroughly acquainted with the dignities of the respective colleges in Babylon. It was only after 917, when Pumbadita became of equal importance with Sora, and especially after 942-1038, when Sora, after the death of Saadia, began to decay altogether, and Pumbadita continued alone to be the college of the doctors of the law, that the presidents of its college, like those of Sora, were described by the title *Gaon*. The period of the *Gaonim* extends from A.D. 657 to 1034 in Sora, and from 657 to 1038 in Pumbadita, during which time the former college had no less than thirty-five presidents, and the latter forty-three.

ii. *The Presidents and Organisation of the Colleges.*—As frequent reference is made throughout this Cyclopædia to the *Gaonim* or the presidents of the colleges which were the chief seats of learning, where the successors of the Scribes or the doctors of the law were trained, we subjoin the following chronological list of these *Gaonim* both in Sora and Pumbadita.

## SORA.

1. Mar Isaac . . .	Circa A.D. 657-670
2. R. Hunai . . .	670-680
3. Mar Sheshna b. Tachlipha . . .	680-689
4. Mar Chaninai of Nehar Pakor . . .	689-697
5. Nahilai Ha-Levi of Nares . . .	697-715
6. Jacob of Nahor Pakor . . .	715-732
7. Mar b. Samuel . . .	733-751

## PUMBADITA.

1. R. Cahana . . .	Circa A.D. 658-670
2. Mar Raba . . .	670-680
3. Mar Bussai or Bostanai . . .	680-689
4. Hunai Mari b. Joseph . . .	689-700
5. R. Chija of Mesene . . .	700-710
6. Mar Rabja . . .	710-719
7. Natronai b. Nehemiah, surnamed Mar Janka . . .	719-730
8. Mar Jehudah . . .	730-739

## SORA.

8. Mari Ha-Cohen . . .	<i>Circa A.D. 751-759</i>
9. R. Acha . . .	<i>a few months</i>
10. R. Jehudah, the Blind . . .	759-762
11. Achunai Kahna b. Papa . . .	762-765
12. Chaminai Kahana b. Huna . . .	765-775
13. Mari Ha-Levi b. Mesharshaja . . .	775-778
14. Bebai Ha-Levi b. Abba . . .	778-788
15. Hilai b. Mari . . .	788-797
16. Jacob b. Mordecai . . .	797-811
17. Abumari b. Mordecai . . .	811-819
18. Zadok or Isaac b. Ashi . . .	819-821
19. Hilai b. Chaninai . . .	821-824
20. Kimoj b. Ashi . . .	824-827
21. Moses b. Jacob . . .	827-837
<i>Interregnum</i> . . .	837-839
22. Mar Cohen Zedek I. b. Abima . . .	839-849
23. Mar Sar Shalom b. Boas . . .	849-859
24. Natronai II. b. Hilai . . .	859-869
25. Mar Amram b. Sheshna . . .	869-881
26. Nachshon b. Zadok . . .	881-889
27. Mar. Zemach b. Chajim . . .	889-896
28. R. Malchija . . .	<i>a few months</i>
29. Hai b. Nachshon . . .	896-906
30. Hilai b. Mishael . . .	906-914
31. Jacob b. Natronai = Amram . . .	914-926
32. Jom Tob Kahna = Hai b. Kijumai . . .	926-928
33. Saadia b. Joseph . . .	928-932
<i>Joseph b. Satia anti Gaon</i> . . .	930-932
34. Joseph b. Satia <i>sole Gaon</i> . . .	933-937
Saadia b. Joseph <i>again</i> . . .	937-942
Joseph b. Satia <i>again</i> . . .	942-948
<i>Interregnum</i> . . .	948-1009
35. Samuel b. Chopphni . . .	1009-1034

## PUMBADITA.

9. Mar Joseph. b. Chutanai . . .	<i>Circa A.D.</i> 739-761
10. Samuel b. Mari . . .	
11. Mar Natroi Kahana b. Emuna . . .	
12. Abraham Kahana . . .	
13. R. Dadai b. Nachman . . .	761-764
14. Chananja b. Mesharshaja . . .	764-771
15. Malka b. Acha . . .	771-773
16. Rabba b. Dudai . . .	773-782
17. R. Shinui . . .	<i>a few months</i>
18. Chananai b. Abraham Kahana . . .	782-786
19. Huna Mar Ha-Levi b. Isaac . . .	786-788
20. Manasseh b. Joseph . . .	788-796
21. Isaiah b. Abba . . .	796-798
22. Joseph b. Shila . . .	798-804
23. Mar. Kahana b. Chaninai . . .	804-810
24. Abumari b. Abraham . . .	810-814
25. Joseph b. Abba . . .	814-816
26. Mar Abraham b. Sherira . . .	816-828
<i>R. Joseph b. Chija anti Gaon</i> . . .	
27. R. Joseph b. Chija <i>sole Gaon</i> . . .	828-833
28. Joseph b. Rabbi . . .	833-842
29. Paltoi b. Abaji . . .	842-858
30. Menachem b. Joseph b. Chija . . .	858-860
<i>Mar Mattathias anti Gaon</i> . . .	
31. Mar Mattathias <i>sole Gaon</i> . . .	860-869
32. Rabba b. Ami . . .	869-872
33. Mar Zemach I. b. Paltoi . . .	872-890
34. Hai b. David . . .	890-897
35. Kimoj b. Achai . . .	897-906
36. Mar Jehudah b. Samuel . . .	906-917
37. Mar Cohen Zedek II. b. Joseph . . .	917-936
38. Zemach b. Kaphnai . . .	936-938
39. Chanina b. Jehudai . . .	938-943
40. Aaron Ibn Sargadu . . .	943-960
41. Nehemia b. Cohen Zedek . . .	960-968
42. Sherira b. Chanina . . .	968-998
43. Hai b. Sherira . . .	998-1038

As to the *organisation* of these colleges, the president of each school sat in front, next to him in rank was the *superior judge* (Heb. **אב בית דין**; Aramaic, **רבינא דבבא**), who discharged the judicial functions, and was presumptive successor to the Gaonate. Then came the ten who constituted the more limited synod, seven of whom were at

the head of the assembled students (**ראשי כלות**) and three associates (**חברים**); these sat with their faces towards the president. Then came the college of 100 members, subdivided into two uneven bodies, the one consisting of 70 members, and representing the *Great Sanhedrim* [SANHEDRIM], the other consisting of 30 members, and representing the *Smaller Sanhedrim*. Of these hundred, the 70 only were ordained; they bore the title of *teachers*

(**חכמים**, *magistri*), or the *ordained sages* (**חכמי**, *haskamim*), and were capable of advancing to the highest office, whilst the other thirty were simply candidates (**בני קיומי**), and do not seem to have been legally entitled to a seat or voice. The 70 sat in seven rows, each consisting of ten, and being under one of the seven heads of the college. They transmitted their membership to their sons.

iii. *The work and authority of these Colleges.*—

In later times these colleges assembled together for two months in the year—viz. in Adar (=March) and Elul (=September). In these sittings the members explained difficult points in the Talmud, discussed and answered all the legal and ritual questions which were sent in during the vacation from the different Jewish communities abroad, and enacted new laws for the guidance and regulation of the dispersed congregations, in accordance with the requirements of the ever-shifting circumstances of the nation and the sundry localities. Each member of the college took part in the discussions, the president summed up the various opinions, decided the question, and ordered the secretary to write down the decision. All the decisions which were passed through the session were read over again by the president before the assembly was dissolved, were signed in the name of the college, sealed with the college seal, and forwarded by special messengers to the respective communities, who in return sent gifts to the college, which constituted the extraordinary revenue of these schools for training the doctors of the law. Their ordinary income was derived from regular taxes which the college fixed for those communities which were under their jurisdiction. Thus the jurisdiction of Sora ex-

tended over the south of Irak, with the two important cities Wasit and Bassra, to Ophir (= India), and its annual income, even when it began to decline, amounted to 1500 ducats; whilst that of Pumbadita extended over the north of Irak up to Chorasán. The president, with the superior judge and the seven heads of the college, appointed judges for each district, and gave them regular *diplomas*. As these judges or *dajanim* (דַּיָּנִים) had not only to decide civil questions, but also to settle religious matters, they were also the *Rabbis* of the respective communities, and selected for themselves in each place two learned members of the congregation who were styled *elders* (זִקְנִים), and with them constituted the judicial and Rabbinate college. This local college had to issue all the legal instruments, such as marriage contracts, letters of divorce, bills of exchange, business contracts, receipts, etc. etc. Though each of the two imperial colleges had the power of governing itself and of managing its own affairs and dependencies, yet the college of Sora was at first over that of Pumbadita, as may be seen from the following facts:—1. In the absence of the Prince of the Exiles the Gaon of Sora was regent, and called in the taxes from all the Jewish communities. 2. The college of Sora got two shares of the taxes, whilst Pumbadita only got one share. 3. The president of Sora took precedence of the president of Pumbadita, even though the former happened to be a young man and the latter an old man. In later times, however, the college of Pumbadita rose to the dignity of Sora, and eventually eclipsed it. These seats of learning, in which were trained the doctors of the law, the successors of the ancient *Scribes*, and which represented the unbroken chain of tradition and ordination, were extinguished in the middle of the 11th century. The remarkable men of these schools who contributed to the elucidation and exposition of the Bible and the Hebrew language are noticed in separate articles of this Cyclopædia.

D. G.

**SCRIP** (סִרְפָּ; Sept. συλλογή, πηρά), a bag used for the carrying of food or other necessities, generally made of leather and slung over the shoulder (1 Sam. xvii. 40; Matt. x. 10; Mark vi. 8; Luke ix. 3; x. 4; xxii. 35, 36). A similar article is still used by the Syrian shepherds (Porter, *Five Years in Damascus*, ii. 109).—W. L. A.

**SCRIPTURE, HOLY** (כְּתוּבִים; ἡ γραφή, αἱ γραφαί, τὰ ἱερὰ γράμματα). About A.D. 180 the term *Holy Scriptures* (αἱ ἁγίαι γραφαί) is used by Theophilus (*Ad Autolyc.* iii. 12) to include the gospels. Irenæus (ii. 27) calls the whole collection of the books of the O. T. and N. T. the *Divine Scriptures* (θεῖαι γραφαί), and the *Lord's Scriptures*, *Dominicæ Scripturæ* (v. 20. 2). By Clement of Alexandria (*Strom.* vii.) they are called the *Scriptures* (γραφαί), and the *inspired Scriptures* (αἱ θεόπνευσται γραφαί). From the end of the 2d and beginning of the 3d century, at which time a collection of the N. T. writings was generally received, the term came into constant use, and was so applied as to include all the books contained in the version of the LXX., as well as those of the Hebrew canon. [APOCRYPHA; CANON; DEUTEROCANONICAL; BIBLE; BIBLICAL CRITICISM; MANUSCRIPTS; RABBINICAL BIBLES; POLYGLOTT; RECONSION; TESTAMENT; VERSIONS; HEBREW LANGUAGE; ARAMAIC LANGUAGE; GREEK LANGUAGE, etc.]

463. A Scythian Family.

**SCYTHIAN** (Σκυθῆς), a name which occurs only in Col. iii. 11. It was anciently applied sometimes to a particular people, and sometimes to all the nomade tribes which had their seat to the north of the Black and Caspian seas, stretching indefinitely eastward into the unknown regions of Asia.

It had thus much the same latitude as 'Tartars,' and was in like manner synonymous with Barbarian, Βάρβαρος. The name also occurs in 2 Maccab. iv. 47, and Joseph. *Cont. Apion.* ii. 37. The Scythians were, in fact, the ancient representatives of the modern Tartars, and like them moved from place

to place in carts drawn by oxen. It is from this circumstance that they, or a tribe nearly allied to them, may be recognised on the monuments of Egypt. About seven centuries before Christ, the Scythians invaded south-western Asia, and extended their incursions as far as Egypt (Herodot. i. 103). In doing this they could not but have touched on or passed through Palestine : and it is

464. 1. A Scythian. 2. A Scythian General.

even supposed that Bethshan derived its classical name of Scythopolis from them [BETHSHAN]. It is singular, however, that the Hebrew writers take no notice of this transaction ; for we cannot admit that the prophecies of Joel and Zephaniah have reference to it, as some writers have imagined.—J. K.

SCYTHOPOLIS (Σκυθόπολις), the name of a city mentioned Judith iii. 10, and 2 Maccab. xii. 29. The LXX. apply this name to Bethshean (Judg. i. 27), and this identification is generally accepted. Reland, whom Gesenius follows, thinks the name a corruption of Succothopolis, the chief town of the district of Succoth ; but the older opinion, that it derived its name from having been occupied by the Scythians in their inroad on Palestine mentioned by Herodotus (i. 104-6), is still accepted as the more probable by many eminent scholars.—W. L. A.

SEA. The term יָם *yām*, or 'sea,' was used by the Hebrews more extensively than with us, being applied generally to all large collections of water, as they had not a set of terms such as we employ (defectively, indeed) to discriminate the different kinds. 'Sea' for large collections, and 'pool' for smaller, formed the extent of their vocabulary ; although, indeed, pools were distinguished into אֲגוֹן *agom*, a natural pool or pond (Ps. cvii. 35 ; cxiv. 8 ; Is. xxxv. 7 ; xli. 18, etc.), and בִּרְכָה *berakah*, the same as the Arabic *beerkeh*, an artificial pool or reservoir (2 Sam. ii. 13 ; iv. 12 ; Nah. ii. 8). The term *yām* is applied to various parts of the ocean, to large inland lakes, even to smaller lakes (Job xiv. 11), and to great rivers (Is. xix. 5 ; Jer. li. 36, etc.)

I. THE MEDITERRANEAN, being on the west, and therefore behind a person facing the east, is called in Scripture the *Hinder Sea* (הַיָּם הָאַחֲרָיִם), Dent. xi. 24 ; Joel ii. 20), that is, *Western Sea* ;

and also, 'the *Sea of the Philistines*' (Exod. xxiii. 31), as that people possessed the largest proportion of its shore in Palestine. Being also the largest sea with which the Hebrews were acquainted, they called it by pre-eminence, 'the *Great Sea*' (Num. xxxiv. 6, 7 ; Josh. i. 4 ; ix. 1 ; Ezek. xlvii. 10, 15, 20) ; or simply 'the sea' (Josh. xv. 47).

II. THE RED SEA.—This gulf of the Indian Ocean is called in Hebrew יַם סוּף *Yām Sūph* (Exod. x. 19 ; xiii. 18 ; Ps. cvi. 7, 9, 22), which is also its Egyptian name, and is supposed to mean 'weedy sea' (Michaelis, *Suppl.* p. 1726 ; Jablonsky, *Opuscul.* i. 266). This designation has been by some supposed to refer to the quantity of seaweed found in it. But Bruce, who traversed its whole extent, declares that he never saw any sort of weed in it, and gives it as his opinion that it is from the large trees or plants of white coral, spread everywhere over the bottom of the sea, and greatly resembling plants on land, that it derived its name. [Gesenius renders סוּף by *rush, reed, seaweed*. There can be no doubt that *fuci* of various kinds abound in the Red Sea (Diod. Sic. iii. 19 ; Strabo, p. 770 ; Pliny, *N. H.* xiii. 23 ; Winer, *Realw.* s. v.) ; and it does not seem improbable that the sea may have derived its name from this.] It is also called 'the Egyptian Sea' (Is. xi. 15). In other places, where the context plainly indicates what sea is intended, it is called simply 'the sea.' In the N. T. it bears its usual Greek name, ἡ ἐρυθρὰ θάλασσα (Acts vii. 36 ; Heb. xi. 29 ; also 1 Maccab. iv. 9 ; Herodot. i. 1 ; Diod. Sic. iii. 28), whence our 'Red Sea.' How it came by the name of Red Sea is not agreed. Prideaux assumes (*Connection*, i. 14, 15) that the ancient inhabitants of the bordering countries called it *Yām Edom*, or 'the sea of Edom' (it is *never* so called in Scripture), as its north-eastern part washed the country possessed by the Edomites. Now Edom means *red* (Gen. xxv. 30), and the Greeks, who borrowed the name from the Phœnicians, mistook it for an appellative instead of a proper name, and rendered it by ἐρυθρὰ θάλασσα, that is, 'the Red Sea.' Some information in correction of this notion seems, however, to have been afterwards acquired : for Strabo (xvi. p. 766), Pliny (*Hist. Nat.* vi. 23), Mela (iii. 8), Agatharcides (p. 2, ed. Oxon.), Q. Curtius (viii. 9 ; x. 1), Philostratus (iii. 15), and others, distinctly admit that the sea obtained this name, not from any redness in its waters, but from a great king called Erythrus, who reigned in the adjacent country. The word Erythrus means the same in the Greek that Edom does in the Phœnician and Hebrew languages ; which seems to prove that this king Erythrus was no other than Edom, whose name was given to the country over which his descendants reigned. This explanation seems satisfactory ; but Prideaux, from whom we take it, by a very strange confusion of ideas, in an immediately preceding page (i. 10) ascribes the name Red Sea, as applied to another part of the Erythrean Sea, to 'the waters appearing of a reddish colour by reason of the fierceness of the sunbeams constantly beating upon it in that hot climate.' Such a fancy needs no answer, as neither water nor the rays of the sun are the more red for being more hot. Others have conjectured that the Arabian Gulf derived its name from the coral rocks and reefs in which it abounds ; but the coral of the Red Sea is white, not red. In so large a tract of shore and water it would be strange if some red objects

did not appear, and minds on the watch for some physical cause for the name would naturally refer to circumstances which would not otherwise have engaged attention. Some of the mountains that stretch along the western coast have a singularly red appearance, looking, as Bruce expresses it, as if they were sprinkled with Havannah or Brazil snuff, or brick-dust; and from this a notion is derived that these mountains, presenting their conspicuous sides to the early navigators of the sea, induced them to give it a name from that predominant colour. Salt indicates a fact which affords a basis for another conjecture as to the origin of the name. He says—'At one o'clock on the 7th of February, the sea for a considerable distance around the ship became so extremely red. . . . As we were anxious to ascertain the cause of this very singular appearance, a bucket was let down into the water, by which we obtained a considerable quantity of the substance floating on the surface. It proved to be of a jelly-like consistence, composed of a numberless multitude of very small mollusca, each of which having a small red spot in the centre,

formed, when in a mass, a bright body of colour nearly allied to that produced by a mixture of red lead with water.' This account has been more recently confirmed by Ehrenberg.

The ancients applied the name of Erythræan Sea not only to the Arabian Gulf, but to that part of the Indian Ocean which is enclosed between the peninsulas of India and Arabia; but in modern usage the name of Red Sea is restricted to the Arabian Gulf, which enters into the land from the Indian Ocean in a westerly direction, and then, at the straits of Bab-el-Mandeb, turns N.N.W., maintaining that direction till it makes a near approach to the Mediterranean, from which its western arm is only separated by the isthmus of Suez. It thus separates the western coast of Arabia from the eastern coast of the north-eastern part of Africa. It is about 1400 miles in length from Suez to the straits, and on an average 150 miles in breadth. On approaching its northern termination the gulf divides into two branches, which enclose between them the peninsula of Sinai. The western arm, which terminates a little above

465. Sea of Galilee.

Suez, is far more extensive than the other, and is that which was crossed by the Israelites in their escape from Egypt. An account of this important transaction has been given under another head [Exodus]. This arm, anciently called Heroopolitic Sinus, and now the Gulf of Suez, is 190 miles long by an average breadth of 21 miles; but at one part (Birket el-Faroun) it is as wide as 32 miles. The eastern arm, which terminates at Akabah, and bears the name of the Gulf of Akabah, was anciently called Ælanitic Sinus, from the port of Ælana, the Scriptural Elath, and is about 112 miles long by an average breadth of 15 miles. Towards its extremity were the ports of Elath and Eziongeber, celebrated in the history of the attempts made by the Hebrew kings to establish a maritime traffic with the East [see the several words].—J. K.

III. THE SEA OF CHINNERETH, יַם כִּנְרֶת (Num. xxxiv. 11). [CINNERETH.]

IV. GENNESARETH, LAKE or SEA OF.—This is

only another name of the preceding; which is called besides, in the N. T., 'the sea of Galilee' (Matt. iv. 18), the 'sea of Tiberias' (John xxi. 1), and 'the sea' or 'lake of Genesareth' (Matt. xiv. 34; Mark vi. 53; Luke v. 17); which last is but a variation of the Hebrew name.

This lake lies very deep, among fruitful hills and mountains, from which, in the rainy season, many rivulets descend. The Jordan enters it on the north, and quits it on the south; and it is said that the river passes through it without the waters mingling. Its extent has been greatly over-rated: Robinson considers that its length, in a straight line, does not exceed eleven or twelve geographical miles, and that its breadth is from five to six miles. From numerous indications it is inferred that the bed of this lake was formed by some ancient volcanic eruption, which history has not recorded: the waters are very clear and sweet, and contain various kinds of excellent fish in great abundance. It will be remembered that several of the apostles were fishermen of this lake, and

that it was also the scene of several transactions in the life of Christ: it is thus frequently mentioned in the N. T., but very rarely in the Old. The borders of the lake were in the time of Christ well peopled, being covered with numerous towns and villages; but now they are almost desolate, and the fish and water-fowl are but little disturbed.

The best descriptions of the lake of Tiberias are those of Burckhardt (*Syria*, p. 332), Buckingham (*Palestine*, ch. xxvi.), Irby and Mangles (p. 295), Jowett (pp. 172-176), Hardy (pp. 237-241), Elliott (ii. 342-350), Schubert (iii. 231-240), Robinson (ii. 372-402), Olin (iii. 253, 261-265), Lord Nugent (*Lands, Classical and Sacred*, ii. 209).—J. K.

V. THE SALT or DEAD SEA is the largest lake in Palestine, and in many respects the most remarkable in the world. It has received a variety of names from writers both ancient and modern; and as they are descriptive, they demand a brief examination in an article like the present.

1. *The Salt Sea* is the most common Scripture appellation (יָם הַמֶּלַח; ἡ θάλασσα τῶν ἁλῶν, or ἁλός, also ἡ θάλασσα ἡ ἀλκή; *Mare salis*). It is evidently a descriptive name, probably intended to indicate both the saltiness of its water and the character of the plain and hills along its southern margin (Reland, *Pal.* 240). It occurs in the earliest books of the Bible, but is not found later than the time of Joshua (Gen. xiv. 3; Num. xxxiv. 3; Deut. iii. 17; Josh. iii. 16; xv. 2, 5).

2. *The Sea of the Plain*, or more properly, *of the Arabah* (יָם הָעֲרָבָה; θάλασσα Ἀραβία; *Mare solitudinis*), is also a descriptive title, showing its geographical position in the centre of the great valley of the Arabah. It is first employed in combination with the preceding, as if Moses had heard it on his approach to Palestine (Deut. iii. 17); and possibly it may have afterwards supplanted the older name (Deut. iv. 49; 2 Kings xiv. 25).

3. *The East Sea* is the only other name employed in Scripture (יָם הַקֶּדְמוֹנִי; τὴν θάλασσαν τὴν πρὸς ἀνατολὰς; *Mare Orientale*). It is used by Ezekiel (xlvii. 18), Joel (ii. 20), and Zechariah (xiv. 8, where the A. V. has 'the former sea,' although the Hebrew is the same), to distinguish it from the Mediterranean, which was called 'the western' (יָם הַמַּגֶּרֶת, literally 'latter,' though when opposed to קֶדְמוֹן it means 'western').

4. *The Sea of Sodom* is found in the Talmud (Reland, pp. 237, 243), no doubt because common tradition represented the city of Sodom as having been engulfed by it.

5. Josephus uses the name *Asphaltic Lake*—Λίμνη Ἀσφαλτῖτις (*Bell. Jud.* iii. 10. 17)—which was adopted by Galen and other ancient writers, apparently because bitumen or asphaltum was often found floating on its surface or lying along its shores (Reland, p. 241).

6. *Dead Sea*. The origin of this name is given by Jerome (ad Ezek. xlvii.), 'In quo nihil poterat esse vitale;' and in this respect modern research has to a large extent confirmed ancient tradition, proving that the name is appropriate.

The modern inhabitants apply two names to the lake; the one *El-Baheiret el-Myetah*, 'Dead Sea,' suggested by its character; the other *Baheiret Lūt*, 'Sea of Lot,' suggested by its history.

*Physical Features*.—The Dead Sea is situated in the lowest part of that great valley which stretches

in a direct line due south from the base of Hermon to the head of the gulf of Akabah. The valley is a chasm or fissure in the earth's crust, being for nearly 200 miles below the level of the ocean. The Dead Sea is the reservoir into which all its waters flow, and from which there is, and can be, no escape except by evaporation.

The general formation of the valley has already been described [PALESTINE]. It is shut in on the east and west by parallel ranges of mountains, having steep, rugged, and bare sides, furrowed by wild ravines. The eastern range is somewhat higher than the western. In the parallel of Jericho the ranges expand slightly, and the valley there attains its greatest breadth—about twelve miles; but they contract again at the northern end of the Dead Sea, and continue in parallel lines throughout its entire length. The cliffs which hem in the valley are here steeper, higher, and wilder than elsewhere, and the scenery is more bleak and desolate. The sea occupies the whole width of the valley, in many places washing the sides of the cliffs. Being slightly rounded at each end, its form is an elongated oval.

The contour of the Dead Sea, as delineated in most maps, is regular, the shore lines having few indentations, and the curves at the north and south being uniform. Recent researches—especially those of Lynch, Robinson, and Tristram—have shown that this regularity of outline is incorrect. The western shore especially has long promontories and deep bays, and the curves at the north and south are very far from being so gracefully rounded as most cartographers have delineated them. It will serve at once to show the topography of the sea, and the physical features of the plains, cliffs, and mountain-ranges which encircle it, if we pass round the shores in rapid survey. It will also tend to throw some light on the origin of the lake, and on the wondrous events of its long history.

On the north, at the embouchure of the Jordan, a low promontory is being gradually formed by the muddy deposits brought down by the river. It is mostly bare, destitute of all vegetation, and like the adjoining plain covered with a nitrous crust. At present it projects into the lake more than a mile. When the water is very high, a portion is overflowed. To the westward lies a deep bay, and beyond it a long low isthmus, covered with cairns of loose rounded stones. De Saulcy has given to this isthmus the name *Radjüm Louth*, 'Lot's ruin;' but the writer never heard the name on the spot. The ruins are shapeless and desolate. They are of the highest antiquity, and may perhaps be of the era of the 'cities of the plain.'

The shore-line now trends, with an easy curve, to the south-west, and then to the south, until it reaches the bold headland of Ras el-Feshkliah. So far it is flat and sandy, and the adjoining plain dreary and naked, save where, at long intervals, a little brackish spring rises, or a tiny streamlet flows, and there cane-brakes and shrubberies of tamarisk are seen. Ridges of drift mark the water-line, and are composed of broken canes and willow branches, with trunks of palms, poplars, and other trees, half imbedded in slimy mud, and all covered with incrustations of salt.

It is deserving of special note, that the mountainsides and low plains on both the eastern and western shores of the Dead Sea are marked by a series of terraces, manifestly water-lines of some

remote ages. The highest is very distinctly seen on the mountain-chain of Moab, extending along the tops of the cliffs like a huge shelf. Its elevation appears to be about 1300 feet; and on the western range, at various places, there is a corresponding terrace. This terrace has been frequently noticed by travellers, but special attention was recently given to it by Mr. Tristram, who remarks: 'These terraces in the old secondary limestone must be about the present level of the Mediterranean, and they seem to tell of a period long antecedent to the tertiary terraces and deposits below, when the old Indian Ocean wore the rocks and scooped out the caverns, as its unbroken tide swept up from the coasts of Africa; or when the Salt Sea formed one in a chain of African lakes' (*Land of Israel*, p. 247).

About two hundred and thirty feet above the present level of the Dead Sea are traces of another ancient shore-line, marked by a strip of alluvial marl adhering to the rocks and cliffs, particularly at the north-west angle, and down as far as Ras el-Feshkhah (*Id.* p. 256). It is also seen at Wady Derejah and Ain Jidy. The deposit is mixed with shells of existing species, layers of gypsum, and gravel. Where there are ravines running down to the sea between high cliffs, the deposit reaches up their sides in places to a height of four hundred feet, and then slopes away in a series of terraces to the present level of the sea, as if the water had gradually and slowly evaporated. At one point Tristram counted on the shore 'no less than eight low gravel terraces, the ledges of comparatively recent beaches, distinctly marked. The highest of these was forty-four feet above the present sea-level' (p. 278). At Jebel Shukif, a short distance north of Engedi, Tristram, in addition to the lower terraces noted elsewhere, measured the elevations of three high terraces. The first at a height of three hundred and twenty-two feet, marked by a deposit of marl on limestone; the second 665 feet, formed of hard limestone; and the third 1654 feet, of crystalline limestone (*Id.* p. 295).

These features of the Dead Sea valley are of the greatest interest and the highest importance to the geologist, as tending to explain the past physical history of this most extraordinary region, and to show the gradual process of evaporation by which the waters that filled it in some remote age were reduced to their present level.

A few miles north of Ras el-Feshkhah are some confused heaps and long ridges of loose unhewn stones and mounds of earth, to which M. de Sauley has given the name Goumran. The present writer was as unsuccessful as all others since and before his visits, in discovering here any traces of a ruined city, or of the name which the French savan has given to it (cf. Tristram, p. 249; *Hand-book*, p. 203).

Ras el-Feshkhah is a bold headland of crystalline limestone, descending from a height of some 1500 feet, in broken cliffs into the deep sea. It bars all passage along the shore; but Mr. Tristram by great exertions climbed round its face. It is cleft asunder by Wady en-Nar, the continuation of the Kidron. At the base of the cliff is a vein of bituminous limestone, largely used in the manufacture of little ornaments which are sold to the pilgrims at Jerusalem. 'The substance seemed to have been partially ejected in a liquid form, and to have streamed down the cliffs. It was generally

mixed with flints and pebbles, sometimes covering the boulders in large splashes, and then, in the sea itself, formed the matrix of a very hard conglomerate of gravel and flints. When thrown into the fire it burnt with a sulphurous smell, but would not ignite at the flame of a lamp' (Tristram, p. 254).

South of Ras el-Feshkhah the cliffs retreat, leaving a plain along the shore, varying from one to two miles in breadth, and extending to Ain Terabeh, about six miles distant. The plain is an alluvial deposit with layers of gravel, and having spits of pure sand projecting at intervals into the sea. It is partially covered with shrubberies of tamarisk, acacia, and retem;\* and towards the south with dense cane-brakes. The coating of alluvial marl which once covered it is now in many places worn away; and deep gullies rend it in all directions. Enough remains to show that its top, like that of the plains at the northern and southern ends of the lake, formed the old tertiary level of the waters (Tristram, p. 256).

In the plain is a copious brackish spring, with a temperature of 96° Fahr. Farther south is Ain Terabeh, a small fountain, slightly brackish, oozing up from the sand a few feet from the shore. Between it and the cliffs is a dense thicket abounding with birds and beasts: ducks, teal, pochard, thrush, bulbul; with swine, leopard, jackal, fox, hare, and porcupine (*Id.* p. 273).

From Ain Terabeh to Ras Mersed (six miles) the coast plain is a mere strip, frequently interrupted by rocky headlands which dip into the waves. Bitumen is here abundant with pebbles embedded. 'In a little bay, just before reaching Wady Shukif, we were struck by a powerful sulphurous odour, and, after some search, found hot water bubbling through the gravel, at a temperature of 95° Fahr., only six inches from the sea. The smell of sulphur and rotten eggs was very strong, and while scooping in the gravel my hands became quite black, and my boots were covered with a yellow incrustation. Pebbles thrown in became incrustated with sulphur in a few minutes, and all the rocks in the sea, which were here quite hot—of the temperature of 80° Fahr.—were covered with it. There must be an enormous discharge of this mineral water under the sea, as the heat of the water extends for 200 yards, and the odour to a much greater distance. The ordinary temperature of the sea elsewhere was 62° (*Id.* p. 279). On the south side of this spring is Jebel Shukif, a high bold peak projecting into the sea. Two miles beyond it is the oasis of Engedi, a plain some two miles square, forming a delta to two glens which empty into it perennial streamlets of fresh water. These, with the 'fountain of the kid' itself, make this spot a paradise in the midst of a dreary desert. [ENGEDI.]

South of Engedi the plain becomes wider, but it is bare and desolate. The cliffs rise over it in broken masses of pale brown limestone, divided by yawning chasms, while the alluvial deposits along their base are white as snow. Two miles southward a spring of fetid water oozes up on the margin of the sea, having a temperature of 88° Fahr. Other springs must exist beneath the waves, for the water near the shore is much hotter than

\* A species of broom; the *Genista retam* of Forskal. It abounds in the peninsula of Sinai.

*The Dead Sea*

elsewhere, and the whole surrounding air is filled with fumes of sulphuretted hydrogen.

On this plain four distinct terraces are visible. The highest is nearly 300 feet above the present sea level. Down along the beach are traces of 'three or four others, like tidal-marks, as if very recently left, which had washed into the post-tertiary marl, at heights varying from fifteen to forty-five feet above the actual water-line' (Tristram, p. 302). No traces of trap-rock are anywhere seen; but near Wady Khuderah are veins of crystalline limestone, and great quantities of flint, coated with oxide of iron. These De Saulcy and others mistook for lava torrents. The coast has the same general features as far as the hill and fortress of Sebbeh, the ancient Masada. There, at the base of the hill, are the remains of a Roman camp; and beyond it the aspect of the plain is that of utter and even painful sterility. 'Elsewhere the desolation is comparatively partial, here it reigns supreme. The two miles of rugged slope that lay between our path and the sea are difficult to describe. They are formed of a soft, white, and very salt deposit, torn and furrowed by winter torrents in every direction, which have left fantastic ruins and castles of olden shape, flat-topped mamelons, cairns, and every imaginable form into which a wild fancy could have moulded matter, standing in a labyrinth, north and south, before and behind us' (*Id.* p. 315).

Farther south the shore recedes, forming a bay some eight miles in length, the water in places almost washing the base of the cliffs. One wild glen, called Um Baghek, breaks through the mountains, and sends out a tiny stream with a dense fringe of evergreens. Not far from it is another hot sulphur spring, which spreads its suffocating odours around. On the south the bay is bounded by the oasis of the Wady Zuweireh—a plain of some extent, sprinkled with tamarisks and acacias, and torn in all directions with torrent beds, through which the winter rains and the streamlets from numerous sulphurous and brackish springs find their way to the sea. The cliffs and peaks which rise over the oasis appear from a distance to exhibit traces of volcanic action, but closer inspection proves that there are no igneous rocks here or elsewhere along the western shore. Veins of ruddy limestone, blocks of ironstone, and multitudes of nodules of black flint, look like trap-dykes and craters in the distance. There are, however, a few cinders and *scoriae* observable here and there along the shore.

A short distance south of Wady Zuweireh is *Jebel Usdum*, a range of hills running from north to south, a distance of seven miles, with an average elevation of 300 feet, composed of a solid mass of rock-salt. The top and sides are covered with a thick coating of marl, gypsum, and gravel, probably the remains of the post-tertiary deposit uplifted upon the salt. The declivities of the range are steep and rugged, pierced with huge caverns, and the summit shows a serried line of sharp peaks. The salt is of a greenish-white colour, with lines of cleavage as if stratified, and its base reaches far beneath the present surface. The name of the range, *Khashm Usdum*, appears to preserve a memorial of the ancient guilty 'city of the plain.'

At the mouth of Wady Zuweireh are some heaps of rough stones, and the shattered walls of a small tower, marked by De Saulcy as the remains

of Sodom. That city may have stood in this region, but it requires some power of imagination to identify it with these insignificant ruins.

At the northern end of *Jebel Usdum* is the mouth of Wady Muhawât, which exhibits some very remarkable geological features. Its sides are cliffs of old limestone, showing here and there on their surface traces of post-tertiary marl; 'but since the marl has been washed out, there has been a second filling in of an extraordinary character, which is only now in course of denudation. There are exposed on the sides of the wady, and chiefly on the south, large masses of bitumen mingled with gravel. These overlies a thick stratum of sulphur, which again overlies a thicker stratum of sand, so strongly impregnated with sulphur that it yields powerful fumes on being sprinkled over a hot coal. Many blocks of the bitumen have been washed down the gorge, and lie scattered over the plain below, along with huge boulders, and other traces of tremendous floods. . . . The layer of sulphurous sand is generally evenly distributed on the old limestone base, the sulphur evenly above it, and the bitumen in variable masses. In every way it differs from the ordinary mode of deposit of these substances as we have seen them elsewhere. Again, the bitumen, unlike that which we pick up on the shore, is strongly impregnated with sulphur, and yields an overpowering sulphurous odour; above all, it is calcined, and bears the marks of having been subjected to extreme heat.'

This discovery is exceedingly important; and the remarks of Mr. Tristram upon it will be read with the deepest interest by all students of the Bible. 'Here, so far as I can judge, we have the only trace of anything approaching to volcanic action which we have met with in our careful examination of the northern, western, and southern shores. The only other solution of the problem—the existence of a bituminous spring when the supply of water was more abundant—would scarcely account for the regular deposition of sulphurous sand, and then of the sand with the bitumen superimposed. I have a great dread of seeking forced corroborations of Scriptural statements from questionable physical evidence, for the sceptic is apt to imagine that, when he has refuted the wrong argument adduced in support of a Scriptural statement, he has refuted the Scriptural statement itself; but, so far as I can understand this deposit, if there be any physical evidence left of the catastrophe which destroyed Sodom and Gomorrah, or of similar occurrences, we have it here. The whole appearance points to a shower of hot sulphur, and an irruption of bitumen upon it, which would naturally be calcined and impregnated by its fumes; and this at a geological period quite subsequent to all the diluvial and alluvial action of which we have such abundant evidence. The catastrophe must have been since the formation of the wady, since the deposition of the marl, and while the water was at its present level; therefore, probably during the historic period' (pp. 355-57).

The shore-line runs for nearly three miles southwards along the base of *Jebel Usdum*, and then sweeps sharply round to the east, leaving on the south a naked miry plain called *Sabbah*, ten miles long from north to south, by about six wide. It is in summer coated with a saline crust, but is so low that when the water is high a large section of it is flooded. Numerous torrent-beds from the

salt range on the west, and from the higher ground of the Arabah on the south, run across it, converting large portions into impassable swamps. On its southern border the old diluvium terrace rises like a white wall to a height of more than 200 feet. It is only on getting close to it that the sides are seen to be rent and torn into a thousand fantastic forms by winter torrents, and the wearing away of the softer deposits.

The Sabkah is bounded on the east by Wady Tufeileh, one of the principal drains of the Arabah, and containing a brackish perennial stream. Beyond it the ground rises in an easy slope to the foot of the Moab mountains, and is covered with dense thickets of reeds, tamarisk, acacia, retam, zyziphus, and other shrubs, intermixed with fertile fields, cultivated by the Ghawarineh Arabs, and producing abundant crops of wheat, maize, indigo, melons, and cucumbers. Tristram says: 'The place positively swarmed with birds in countless myriads. There were doves by the score on every bush, large and small (*Turtur risorius* and *T. Ægyptius*), bulbuls, hopping thrush, shrikes, the gorgeous little sun-bird, resplendent in the light, and, once more, our new sparrow. The Abyssinian lark, pipits, and wagtails luxuriated in the moist rills at our feet, which were fringed by drooping tufts of caper (*Capparis Ægyptiaca*) in full flower. All teemed with a prodigality of life' (p. 336).

This fertile tract touches the south-eastern shore of the sea, and continues along it as it trends north-east for some five miles to the mouth of Wady Nimeireh, becoming gradually narrower as the shore-line approaches the rocky sides of the mountains. The geological formation of this eastern range is different from the western. The front cliffs are red sandstone, apparently overlying hard crystalline limestone, and topped by more recent calcareous rock. Trap boulders, and fragments of greenstone and syenite, are strewn along the base.

Such are the southern shores of the Dead Sea. The great valley is here narrower than at the northern shore, not because of any contraction in the mountain-ranges, but arising from the ridge of Usdum, which was evidently thrown up from the bottom of the valley at some period subsequent to the formation of the Arabah. The projecting base of Jebel Usdum on the west, and the high fertile region of Es-Safieh on the east, contract the southern end of the lake into the form of a semicircular bay about six miles in diameter. A few miles further north the shores on each side expand so much that the breadth of the sea is almost doubled. The general aspect of the shores is dreary and desolate in the extreme. The salt-incrusted plain, the white downs of the Arabah, the naked line of salt hills, the bare and scathed mountain-ranges on each side, all blazing under the rays of a vertical sun, form a picture of utter and stern desolation such as the mind can scarcely conceive.

On the northern side of Wady Nimeireh, a narrow strip of saline plain, very low and very barren, intervenes between the shore and the mountains. Here and there, at a little fountain, or at the mouth of a ravine, a clump of bushes or a cane-brake may be seen.

The *Peninsula of el-Lisân*, 'The Tongue,' is the most remarkable feature on the eastern shore. It juts out opposite the great ravine of Kerak. The neck connecting it with the mainland is a strip of low bare sand, measuring five miles across. In

outline the peninsula bears some resemblance to the human foot; the toe projecting northward, and forming a sharp promontory. Its length is about nine miles, and from the heel, or south-western point, to the southern shore line, is seven miles. The main body is a post-tertiary deposit, composed of layers of marl, gypsum, and sandy conglomerate, manifestly coeval with the great diluvial terrace, and corresponding with it in elevation. The top is a table-land, broad towards the south, but gradually narrowing to a serrated ridge at the northern end. It is white, and almost entirely destitute of vegetation. The surface is all rent and torn by torrent-beds; and the sides are worn away into pyramidal masses, resembling lines and groups of white tents. It is worthy of special note that in the wadis, and along the shores, pieces of sulphur, bitumen, rock-salt, and pumice-stone, are found in great profusion. Probably, if examined with care, geological phenomena similar to those in Wady Mahawât might be found on this peninsula, and some additional light thus thrown upon the destruction of the cities of the plain. Poole says 'the soil appeared sulphurous' (*Journal*, R. G. S. xxvi. pp. 62-64).

The little plain at the mouth of Wady Kerak affords a striking contrast, in its thickets of evergreens and luxuriant corn-fields, to the arid desolation of the adjoining peninsula.

The shore of the Dead Sea between the peninsula and the north-eastern angle has never been thoroughly explored. Seetzen, Irby and Mangles, De Saulcy, and more recently the party of the Duc de Luynes, visited a few places; and Lieutenant Lynch and his officers touched at several points. A few miles north of el-Lisân the fertile plain, called Ghor el-Mezraah, terminates, and the mountains descend in sublime cliffs of red sandstone almost to the water's edge. Higher up white calcareous limestone appears, and forms at this place the main body of the range. Basalt also appears in places, sometimes overlying the limestone, as on the plain of Bashan, at others bursting through the sandstone strata in dykes and veins. The ravines of Mojib (Arnon) and Zerka Main appear like huge rents in the mountains. Near the mouth of the latter veins of gray and black trap cut through the sandstone, and a copious fountain of hot sulphurous water sends a steaming river into the sea, amid thickets of palms and tamarisks. This is Callirhoë, so celebrated in olden time for its baths. Between this point and the plain of the Jordan volcanic eruptions have produced immense flows of basaltic rock, portions of which had been overflowed into the valley of the Jordan. Among other smaller basaltic streams three were found bordering on the eastern edge of the Dead Sea to the south of the little plain of Zarah (M. Lartet's paper to French Academy of Sciences; see in *Journal of Sac. Lit.* July 1865, p. 496).

The plain between the mountains and the mouth of the Jordan is in general well watered, and covered with luxuriant vegetation, and occasional thickets of tamarisk, retam, and acacia. At the ruins of Suweimeh M. de Saulcy found a copious hot spring, with a ruinous aqueduct (*Voyage en Terre Sainte*, i. 317). Along the shore pieces of pumice-stone, lava, and bitumen, are found embedded in the sand and mud, as if washed up by the waves; and at this point are more distinct traces of volcanic action than elsewhere around the sea.

*The Dimensions of the Dead Sea* have never yet been taken with sufficient accuracy. Its length, from the mouth of the Jordan to the plain of Sabkah, is about forty geographical miles. It must be remembered that this varies considerably at different seasons of the year, and in different years. When the sea is filled up by winter rains, the flat plain on the south is submerged for several miles. The annual rainfall too is not uniform in Palestine. Some years it is more than double what it is in others [PALESTINE]; and this produces a corresponding effect on the volume of water in the sea, and consequently on its area. The sea attains its greatest breadth in the parallel of Engedi, where it measures about nine and three-fourths miles. The peninsula of Lisân divides the sea into two sections: that on the north is an elongated oval in form; while that on the south is almost circular. The narrowest part of the channel between the peninsula and the mainland is not much more than two miles across.

The northern section is a deep regularly-formed basin, the sides descending steeply and uniformly all round, as well on the north and south as on the east and west. This is one of the most remarkable features of the sea. Lynch ran seven lines of soundings across it from shore to shore, and found it deepest between Ain Terabeh and Wady Mojib, that is about the centre of the northern section. From this point the depth decreased gradually towards Lisân on the south, and the mouth of the Jordan on the north. The greatest depth found by Lynch was 1308 feet, but Lieutenant Molyneux records one sounding taken by him as 1350 feet. The deep part of the lake terminates at the peninsula. The greatest depth of the channel between Lisân and the western shore is only thirteen feet, and no part of the southern section was more than twelve feet in depth (Lynch, *Official Report*, p. 43).

It appears that when the water is very low there are two practicable fords from the peninsula to the mainland; one across the narrow channel, and the other running from the isthmus to the northern point of Jebel Usdum (Seetzen, *Reisen*, ii. 358; Irby and Mangies, *Travels*, p. 140).

The depression of the Dead Sea is without a parallel in the world. From experiments made by boiling water, in 1837, Messrs. Moore and Beke supposed the depression to be about 500 feet. In the following year Russegger with his barometer made it about 1400 feet. Symonds by trigonometrical survey, in 1841, calculated the depression at 1312 feet; and the level run by Dale, an officer of Lynch's expedition, gave a result of 1316 feet. A still more careful measurement has been recently made by the corps of English engineers, under Captain Wilson, with the following result:—'The levelling from the Mediterranean to the Dead Sea has been performed with the greatest possible accuracy, and by two independent observers, using different instruments; and the result may be relied upon as being absolutely true to within three or four inches. The depression of the surface on the 12th March 1865 was found to be 1292 feet, but from the line of driftwood observed along the border of the Dead Sea it was found that the level of the water at some period of the year—probably during the winter freshets—stands 2 feet 6 inches higher, which would make the least depression 1289·5 feet. Captain Wilson also learned, from

inquiry among the Bedouins, and from European residents in Palestine, that during the early summer the level of the Dead Sea is lower by at least six feet: this would make the greatest depression to be as near as possible 1298 feet. . . . The most recent observation before that now given, by the Duc de Luynes and Lieutenant Vignes, of the French navy, agrees with our result in a very remarkable manner, considering that the result was obtained by barometric observation, the depression given by them being 1286 feet on the 7th of June 1864, which at most differs only 12 feet from the truth, if we suppose the Dead Sea was then at its lowest' (Sir Henry James in the *Athenæum*).

The exact amount of the depression will of course vary with the rise and fall of the waters at different seasons. Traces along the shore prove that the level has varied as much as fifteen feet within the past half-century (Robinson, *Physical Geography*, p. 190). It is a singular coincidence that the depth and depression of the Dead Sea are very nearly equal, each about 1300 feet; the elevation of Jerusalem above the Mediterranean is about twice, and above the Dead Sea about three times that number (*Id.* p. 190).

*The water of the Dead Sea* is more intensely salt than that of any other sea known. It has also a bitter nauseous taste, and leaves upon the skin a slight greasy feeling. Yet it is transparent as the water of the Mediterranean; and its colour is the same, a delicate green. Its specific gravity, and consequent buoyancy, is very great. The writer floated easily in an upright position with head and shoulders above the surface. Lynch says that eggs, which would have sunk in the ocean, floated here with only two-thirds immersed. This peculiarity was well known to the ancients (Joseph. *Bell. Jud.* iv. 8. 4; Arist. *Meteor.* ii. 3; see also in Ireland, pp. 241, 249).

The following analyses of the water will be useful to the scientific student, and will best account for the foregoing facts. The water analysed by Dr. Apjohn was lifted half a mile from the mouth of the Jordan, near the close of the rainy season, and naturally exhibits a smaller amount of salt and less specific gravity. That examined by Booth was drawn up by Lynch from a depth of 1110 feet. The third specimen was taken from the north-west shore in March 1849.

Many other analyses have been made, differing more or less from the foregoing. Such differences must be expected. When the sea is flooded by freshets the amount of salts in solution will be less; when low, after the evaporation of the summer, the amount will be more.

The presence of these foreign ingredients in such quantities is easily accounted for. The washings of the salt range of Usdum, and numerous brackish springs along the shores, supply the salt; the great sulphur fountain at Callirhoë, and many others on the north and west, with the sulphur, bitumen, iron, etc., found so abundantly in the later deposits, supply the other ingredients. It is known also that large masses of bitumen are occasionally forced up from the bed of the sea; and it may be that beneath its waves are fountains and deposits more numerous and more remarkable than those in the surrounding rocks and plains. Then, too, the constant evaporation takes away the pure water, but leaves behind all the salts, which are thus gradually increasing in quantity.

The water is fatal to animal life; and this fact, according to Jerome, originated the name *Dead Sea* (ad *Ezech.* xlviii. 8; cf. Galen, *de Simpt.* iv. 19). Shells and small fish, in a dead or dying state, have been picked up along the northern shore, and are found in some of the little fountains along the western coast; but they are all of foreign importation. Recent investigations have led some to suppose that the Dead Sea does contain and support a few inferior organisations; but the fact has not as yet been established on conclusive evidence (see, however, Grove in Smith's *Dict. of the Bible*, iii. 1183 d).

Lying in this deep caldron, encompassed by naked white cliffs and white plains, exposed during a great part of the year to the unclouded beams of a Syrian sun, it is not strange that the shores of the Dead Sea should exhibit an almost unexampled sterility, and a death-like solitude; nor is it strange that in a rude and unscientific age the sea should have become the subject of wild and wondrous superstitions. 'Seneca relates that bricks would not sink in it. Early travellers describe the lake as an infernal region; its black and fetid waters always emitting a noisome smoke or vapour, which, being driven over the land, destroys all vegetation like a frost. Hence, too, the popular report that birds cannot fly over its deadly waters' (Robinson, *Phys. Geog.* p. 199). Such stories are fabulous. It is true that the tropical heat causes immense evaporation, the exhalations from the sulphurous springs and marshes taint the air for miles, and the miasma of the swamps on the north and south give rise to fevers, and render the ordinary inhabitants feeble and sickly. But this has no necessary connection with the Dead Sea, or the character of its waters. The marshes of Iskanderûn are much more unhealthy than any part of the Ghôr. Wherever a copious fountain bubbles up along the shores, or a mountain-streamlet affords water for irrigation, tangled thickets of tropical trees, shrubs, and flowers, spread out their foliage. And there birds sing as sweetly as in more genial climes, and the Arab pitches his tent like his brethren on the eastern plateau, and an abundant harvest rewards the labours of the husbandman. Tristram exclaims with something of enthusiasm: 'What a sanitarium Engedi might be made, if it were only accessible, and some enterprising specu-

lator were to establish a hydropathic establishment! Hot water, cold water, and decidedly salt water baths, all supplied by nature on the spot, the hot sulphur springs only three miles off, and some of the grandest scenery man ever enjoyed, in an atmosphere where half a lung is sufficient for respiration' (p. 295).

ORIGIN AND HISTORY.—It is a question of the highest importance, and one which has created much controversy among scientific and Biblical students, whether the present physical aspect of the Jordan valley and shores of the Dead Sea tends to throw any light upon its origin, or upon the destruction of Sodom and Gomorrah. This is a subject of great difficulty, and perhaps of still greater delicacy in the present day. Strong statements have been made on both sides. While some Biblical students have perhaps committed themselves to rash and fanciful theories, it cannot be denied, on the other hand, that sneering references have been made to Bible history, and aspersions cast on conscientious and able Biblical interpreters which are altogether unworthy of men who profess to be in search of truth.

Our knowledge of the physical structure of the Jordan valley, and of the various strata and deposits along the shores of the Dead Sea, is not yet sufficiently extensive or minute to enable us to construct a satisfactory theory on the points at issue. But it may be well to state here in a few simple propositions what are the actual statements made in Scripture about the Dead Sea, and what are the facts which scientific investigation, so far as hitherto prosecuted, has established.

The references to the Dead Sea in Scripture are few, and mostly incidental. Three passages deserve special attention. In Gen. xiii. 10, where the sacred writer relates the story of the separation of Abraham and Lot, he represents the two as standing on the mountain-top east of Bethel. He then says, 'Lot lifted up his eyes, and beheld all the plain (or circuit) of Jordan, that it was well watered everywhere, before the Lord destroyed Sodom and Gomorrah, even as the garden of the Lord, like the land of Egypt, as thou comest unto Zoar.' It has been inferred from this that the cities of Sodom and Gomorrah, and the whole plain around them, must have been in sight at the time referred to, and must therefore have been situated at the northern end of the Dead Sea, which alone is visible from the height at Bethel. But a careful examination of the passage shows that this does not follow. The patriarchs looked toward 'the circuit of the Jordan.' It is not implied that they saw it all, nor is it said that Sodom and Gomorrah were in sight. They saw enough to give them a general idea of the whole region. One thing is evident from the statement: a remarkable change was effected in the plain at the time of the destruction of Sodom. It was fertile and well watered *before* that event; but manifestly not so, or not so much so, *after* it. And this is corroborated by the narrative in Gen. xix. 24, 25.

The second passage is Gen. xiv. 2-10, which contains the story of Lot's capture. Verse 3 is important: 'All these (kings) were joined together in the vale of Siddim, *which is the Salt Sea.*' There cannot be a doubt that the idea here expressed is that the district called in the time of Lot 'the Vale of Siddim,' had become, in the time of the writer 'the Salt Sea,' or at least constituted a

part of that sea. The Hebrew phrase establishes the identity of the two just as certainly as the similar phrase in verse 2 establishes the identity of Bela and Zoar. Attempts have been made to get over this on the ground that the clause is an explanatory note by a subsequent writer; and that though the narrative itself may be authentic the note 'must stand or fall on its own merits' (Smith's *Dict. of Bible*, iii. 1186). This is a dangerous mode of criticism, and unsound as dangerous. The clause is found in all the ancient MSS. and versions, and in the Targum of Onkelos. Its genuineness rests on the very same basis as the other portions of the narrative. We have the same evidence of its Mosaic authorship as we have of any other part of the book. It was manifestly the opinion of Moses that the Vale of Siddim was submerged. Another point in the narrative demands attention. The route of the invading host is traced. They attacked the Rephaim in Bashan, then marched southward through Moab and Edom to Paran on the west side of the Arabah, opposite Edom. There they turned, and after resting at the fountain of Kadesh, they swept the territory of the Amalekites on the south of Judah, and of the Amorites 'who dwelt in Engedi.' Having thus ravaged all the countries surrounding the cities of the plain, they descended upon their territory from the west. The inhabitants now came out against them, and were marshalled in the vale of Siddim. The exact locality of the vale is not described. It may have been north, or it may have been south of Engedi; one thing, however, is certain: if the western shores of the sea were then as they are now, no army could have marched along them from Engedi to Jericho. On the other hand, from Engedi there is a good path southward. It is said, moreover, that 'the Vale of Siddim was full of bitumen pits' (ver. 10). There is no part of the valley north of the sea to which this would apply; nor indeed is there any plain or vale along its shores 'full of bitumen pits at the present day.' These facts render it impossible that the Vale of Siddim could have been on the plain of Jericho; and they seem to confirm the previous statement that Siddim was submerged. [SIDDIM.]

The third passage is Gen. xix. 24, 25:—'Then the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord out of heaven; and he overthrew those cities, and all the plain, and all the inhabitants of the cities, and that which grew upon the ground.' Abraham, when on the succeeding morning he reached the mountain brow, 'looked toward Sodom and Gomorrah, and toward all the land of the plain, and beheld, and lo, the smoke of the country went up as the smoke of a furnace' (ver. 28).

Such, then, are the facts recorded in Scripture. The whole must stand or fall together. We have no authority for selecting such portions as may suit our own preconceived opinions, and then rejecting the rest. [See also SODOM.]

The physical facts ascertained by scientific research are as follows:—The formation of the great valley of the Jordan must have been long antecedent to historic times, and coeval with the existing mountain-ranges. The valley was at some remote period filled with water to the level of the ocean. The water has gradually decreased, apparently by evaporation, and has left a number of shore-lines traced by terraces along the mountain

sides, all antecedent to historic times. The portion of the Dead Sea north of el-Lisân forms a distinct basin, and appears to have done so from a time long anterior to Abraham. The southern section is different. It is very shallow. Its bottom is slimy. 'Sulphur springs stud its shores, sulphur is strewn, whether in layers or in fragments, over the desolate plains, and bitumen is ejected in great floating masses from the bottom of the sea, oozes through the fissures of the rocks, is deposited with gravel on the beach, or, as in the Wady Mohawat, appears with sulphur to have been precipitated during some convulsion' (Tristram, p. 358), and that at a period long subsequent to the latest diluvial formation, and apparently within the historic period.

There can be no doubt that the destruction of the cities was miraculous. A shower of ignited sulphur was rained upon them. May we not connect this historic fact with the observed fact just stated? Again, it is said that 'the plain of Siddim was filled with bitumen pits.' Bitumen is inflammable, and when ignited by the fiery shower would burn fiercely. May we not also connect this with the phenomena of Wady Mahawat, of which Tristram says: 'The whole appearance points to a shower of hot sulphur, and an irruption of bitumen upon it, which would naturally be calcined and impregnated with its fumes'? (p. 356). The sacred writer further says that the vale of Siddim became the Salt Sea, or was submerged. The southern part of the lake is now a muddy flat covered with a few feet of water. Suppose the vale to have sunk a few feet, or the water to have risen a few feet after the miraculous destruction of the cities, either supposition would accord with the Biblical narrative, would not be without a parallel in the history of countries exposed to earthquakes, and would not be opposed to any results of modern observation. It would accord besides with the views of ancient writers and with uniform Jewish tradition (Joseph. *Antiq.* i. 9; *Bell. Jud.* iv. 8. 4; Reland, pp. 254, seq.)

This was the view suggested by Dr. Robinson, and sanctioned by the distinguished geologist Leopold von Buch. In his latest work, published since his death, Robinson says: 'It seems to be a necessary conclusion that the Dead Sea extended no farther south than the peninsula, and that the cities destroyed lay on the south of the lake as it then existed. Lot fled from Sodom to Zoar, which was *near* (Gen. xix. 20); and Zoar, as we know, was in the mouth of Wady Kerak, as it opens upon the neck of the peninsula. The fertile plain, therefore, which Lot chose for himself, where Sodom was situated, and which was well watered, like the land of Egypt, lay also south of the lake, 'as thou comest to Zoar' (Gen. xiii. 10, 11). Even to the present day more living streams flow into the Ghôr at the south end of the sea, from wadis of the eastern mountains, than are found so near together in all Palestine besides. Tracts of exuberant fertility are still seen along the streams, though elsewhere the district around the southern bay is almost desert' (*Physical Geogr. of the Holy Land*, p. 213). Notwithstanding the arguments and almost contemptuous insinuations of some recent writers, not a single fact has been adduced calculated to overthrow this view; but, on the contrary, each new discovery seems as if a new evidence in its favour.

It must be admitted, however, that these are still

subjects for observation and scientific research, rather than for speculation and dogmatic affirmation. It is greatly to be desired that some accomplished practical geologist should undertake a thorough examination of the valley of the Jordan and Dead Sea. He would reap a rich harvest; and he would confer a rich boon as well upon science as upon Biblical literature.

It is not strange that the Dead Sea was never navigated to any extent. Fish do not exist in it; and the sterile character of the shores made water transit of little importance. Josephus appears to state that the Moabites crossed the sea to invade Judah (*Antiq.* ix. 1. 2); and he informs us that the Romans used boats against the fugitive Jews (*Bell. Jud.* iv. 7. 6; cf. iv. 8. 4). Costigan, an Irish traveller, was the first in modern times to navigate this Sea of Death. Having descended the Jordan in a little boat, he crossed to the peninsula of Lisân. For three days he had no fresh water; and he was carried to Jerusalem to die. No record of his journey has been found. In 1837 Moore and Beek had a light boat conveyed from Jaffa. They succeeded in visiting some points, and making a few experiments with boiling water, which were the first to prove that the lake was below the level of the ocean. Ten years later, Lieutenant Molyneux of the British navy took a boat down the Jordan, visited the peninsula, and took some soundings. He was able to return to his ship, but died shortly afterwards. A brief record of his voyage is given in the *Journal of the R. G. S.* vol. xviii. The expedition of Lynch in 1848 was the only one crowned with success. This was in part owing to the superior organisation and strength of the party, and in part to the fact that it was undertaken at a comparatively cool season, April and May. Even this, however, was too late. Several of the party took fever; and one, Lieutenant Dale, died. The unfortunate expeditions of Costigan and Molyneux were made in July and August respectively. Winter is the proper season for any such undertaking. Rain seldom falls on the shores; the air during the depth of winter is fresh and balmy, and cold almost unknown.

**LITERATURE.**—Josephus gives a brief description of the Dead Sea (*Bell. Jud.* iv. 8. 4); and several Greek and Roman authors, scientific as well as geographical, speak of its wonders. Extracts from the principal of these may be seen in Reland's *Palæstina* (pp. 238-258). Among modern writers the following may be consulted with advantage:—Seetzen, in Zach's *Monatliche Correspondenz*, vols. 17, 18, 26, 27; Burckhardt, *Travels in Syria*; Irby and Mangles, *Travels*; Wilson, *Lands of the Bible*; Ritter, *Pal. und Syr.* ii. 557-780; Poole, in *Journal of R. G. S.* vol. xxvi. The books containing the fullest and latest accounts are—Robinson, *B. R.* i. 501-523; ii. 187-192; and *Physical Geog. of Pal.* pp. 187-216; De Saulcy, *Voyage autour de la Mer Morte*, and *Voyage en Terre Sainte*; Tristram, *The Land of Israel*, pp. 242-366; and Lynch, *Official Report*, which contains Anderson's *Geological Reconnaissance*, published at the National Observatory, Washington 1852.—J. L. P.

#### VI. THE LAKE MEROM. [MEROM.]

**SEA, MOLTEN** (ים מוצק). The immense brazen reservoir which, with smaller lavers [LAVER], stood in the court of Solomon's temple, was thus,

by hyperbole, denominated. It was of a hemispherical figure, ten cubits in width, five deep, and thirty in circumference. In 1 Kings vii. 26 it is stated to have contained 2000 baths, equal to 16,000 gallons; but in 2 Chron. iv. 5 it is said to have contained 3000 baths, and the latter estimate is followed by Josephus. It was probably capable of holding the larger quantity, but did not usually contain more than the smaller. It was decorated on the upper edge with figures resembling lilies in bloom, and was enriched with various ornamental objects; and it rested, or seemed to rest, upon the backs of twelve oxen, three looking to the north, three to the east, three to the south, and three to the west (1 Kings vi. 26; vii. 40-47; 2 Chron. iv. 3-5). The Jewish writers state that this great basin was supplied with water by a pipe from the well of Etam, although some few allege that it was filled by the manual labour of the Gibeonites. It was, according to the same accounts, kept constantly flowing, there being spouts which discharged for use from the basin as much water as it received from the well of Etam. If this be correct, it is not improbable that the spouts discharged

466. Fountain of the Lions.

their water through the mouths of the oxen—or, as some suppose, through embossed heads in the sides of the vessel. This is perhaps the largest vessel of molten brass which was ever made—other large reservoirs, which might compete in dimensions with it, being either of wood, marble, or sheet copper. The Fountain of the Lions in the Moorish palace (Alhambra), at Grenada, is of stone, and the animals which support it are lions; but it supplies some remarkable analogies to Solomon's great work, in imitation of which it is said to have been constructed. The conception, and still more the successful execution of this great work, gives a very favourable idea of the state of the metallurgical arts in the time of Solomon.—J. K.

**SEAL.** There seem to have been two kinds of seals in use among the Hebrews. A notion appears to exist that all ancient seals, being signets, were rings, intended to be worn on the hand. But this was by no means the case; nor is it so now in the East, where signet-rings are still, probably, as common as they ever were in ancient times. Their general use of seals was very different from ours, as they were employed not for the purpose of impressing a device on wax, but in the place of a sign-manual, to stamp the name of the owner upon any document to which he desired to affix it. The name thus impressed had the same legal validity as the actual signature, as is still the case in the East. This practice may be illustrated by a circumstance which occurred in the last days of George IV. When he became too ill to affix his

sign-manual to the numerous documents which required it, a fac-simile was engraved on a stamp, by which it was in his presence impressed upon them. By this contrivance any one may give to any paper the legal sanction of his name, although he may be unable to write; and the awkward contrivance to which we resort in such cases, of affixing a cross or mark with the signature of an attesting witness, is unnecessary. For this purpose the surface of the seal is smeared with a black pigment, which leaves the figure of the body of the seal upon the paper, in which the characters appear blank or white. The characters required are often too large or too many to be conveniently used in a signet-ring, in which case they are engraved on a seal shaped not unlike those in use among ourselves, which is carried in the bosom, or suspended from the neck over the breast. This custom was ancient, and, no doubt, existed among the Hebrews (Gen. xxxviii. 18; Cant. viii. 6; Haggai ii. 23). These seals are often entirely of metal—brass, silver, or gold; but sometimes of stone set in metal. As an appendage thus shaped might be inconvenient from the pressure of its edges, the engraved stone was sometimes made to turn in its metal frame, like our swivel seals, so as to present a flat surface to the body. Very ancient Egyptian seals of this kind have been found.

If a door or box was to be sealed, it was first fastened with some ligament, over which was placed some well-compacted clay to receive the impression of the seal. Clay was used because it hardens in the heat which would dissolve wax; and this is the reason that wax is not used in the East. A person leaving property in the custody of strangers—say in one of the cells of a caravanserai—seals the door to prevent the place from being entered without legal proof of the fact. The simplicity of the Eastern locks, and the ease with which they might be picked, render this precaution the more necessary. We have sometimes seen a coarsely-engraved and large wooden seal employed for this purpose. There are distinct allusions to this custom in Job xxxviii. 14; Cant. iv. 12.

Signet-rings were very common, especially among persons of rank. They were sometimes wholly of metal, but often the inscription was borne by a stone set in silver or gold. The impression from the signet-ring of a monarch gave the force of a royal decree to any instrument to which it was affixed. Hence the delivery or transfer of it to any one gave the power of using the royal name, and created the highest office in the state (Gen. xli. 42; Esth. iii. 10, 12; viii. 2; Jer. xxii. 24; Dan. vi. 10, 13, 17; comp. 1 Kings xxi. 8). Kings being so much employed as seals, were called טבאוֹת *tabbooth*; which is derived from a root signifying to imprint, and also to seal. They were commonly worn as ornaments on the fingers—usually on the little finger of the right hand (Exod. xxxv. 22; Luke xv. 22; James ii. 2).—J. K.

SEASONS. [PALESTINE.]

SEBA. [SHEBA.]

SEBAC (סֶבַךְ) occurs in two or three places of the O. T., and is considered by some to be the name of a particular plant, as the bramble, smilax, jasmine, atriplex; by others it is supposed to denote briars or thorns. Celsius, however, has shown

that the meaning of the term is *perplexitas*, 'id quod densum et intricatum est;' that it is especially applied to the branches of trees, shrubs, and climbing plants, and is hence rightly translated in the A. V., in Gen. xxii. 13: 'And Abraham beheld a ram caught in a *thicket* (*sebac*) by his horns.' So in Is. ix. 18; x. 34.—J. F. R.

SECUNDUS (Σεκοῦνδος), a disciple of Thesalonica, who accompanied Paul in some of his voyages (Acts xx. 4).

SEER. [PROPHECY.]

SEFORNO, or SPHORNO, OBADIAH B. JACOB, was born at Cesena in Bologna *circa* 1475. He distinguished himself as a physician, Hebraist, and commentator; went to Rome in 1498, where he became the Hebrew tutor of the celebrated John Reuchlin, the father of the German Reformation; returned to Bologna, where he practised medicine, and died in 1550. His contributions to the elucidation of the Scriptures are:—(1.) A commentary on the Pentateuch, entitled *the Light of the Lord* (אֹר יְהוָה), which was first edited by Salomon Luzzatto, Venice 1507, and is now reprinted in Frankfurter's Rabbinic Bible [FRANKFURTER; RABBINIC BIBLES]. (2.) A commentary on the Song of Songs and Ecclesiastes, Venice 1567, also reprinted in Frankfurter's Rabbinic Bible. (3.) A commentary on the Book of Job, entitled *the Righteous Judgment* (כִּשְׁפֵּט צַדִּיק), Venice 1590, and in Frankfurter's Rabbinic Bible. (4.) A commentary on the Psalms, Venice 1586, and in Frankfurter's Rabbinic Bible. (5.) A commentary on Isaiah, Jeremiah, and Ezekiel, in Frankfurter's Rabbinic Bible. (6.) A commentary on Ruth in the same Rabbinic Bible. Besides these published commentaries, Sphorno also wrote expositions of the books of Jonah, Habakkuk, and Zechariah, which are still in MS. (comp. Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2075, etc.; Fürst, *Bibliotheca Judaica*, iii. 319).—C. D. G.

SEILER, GEO. FRIED., D.D., professor of theology and superintendent at Erlangen, was born 24th October 1733, and died 13th May 1807. He was a voluminous writer. His principal Biblical works are *Biblische Hermeneutik oder Grundsätze u. Regeln zur Erklärung der H. S. des A. u. N. T.*, Erl. 1800 [translated into Dutch with additions by J. Heringa, Leyd. 1804; into English with additional notes by W. Wright, LL.D., Lond. 1835]; *Üebersetzung der Schriften des N. T. mit erklärungen*, 2 vols. 1806; and Translation of the Psalms, 1788, and of Isaiah, 1783, with notes. His *Opuscula Theologica*, Erl. 1793, contains some valuable suggestions as to the interpretation of prophecy. Dr. Pye Smith speaks of Seiler with high commendation in his *Scripture Testimony*, ii. 432, 4th ed.—W. L. A.

SEIR (שֵׁעִיר, *hairy*; Sept. Σηελ). 1. A patriarch or chief of the Horim, who were the former inhabitants of the country afterwards possessed by the Edomites.

2. SEIR, MOUNT. The mountainous country of the Edomites, extending from the Dead Sea to the Elanitic Gulf. The name is usually derived from the Seir above-mentioned, and as he was a great chief of the original inhabitants, it is difficult to reject such a conclusion. Some, however, as

Gesenius, would rather regard Seir as an appellative, and as denoting 'the shaggy mountain'—i.e. clothed or bristly with woods and forests; but this is not, in any marked way, a characteristic of the range in question. [IDUMÆA; SELAH.]

SE'IRIM (שְׂעִירִים), the pl. of שְׂעִיר, *Sa'ir*, a *he-goat* (so called because of its hirsute and shaggy fleece, from *Sa'ir*, *hairy, shaggy, rough*), used to designate objects of religious worship (Lev. xvii. 7; 2 Chron. xi. 15, A. V. *devils*; Sept. μάταιοι), probably the goat deity Mendes of the Egyptians (Hengstenberg, *Authent. d. Pentat.* i. 119). In Is. xiii. 21, xxxiv. 14, it has been supposed by some to designate a species of demon, a fabulous being half man half goat (A. V. *Satyrs*; Sept. δαίμονια, Targ. שְׂדֵי, *demons*). The Vulg., however, gives *pilosi*, and there is no reason for departing from the ordinary meaning of the word. The prophet classes the Se'irim in these passages with animals, and he probably intended to denote some species of wild animal of the hircine order (see Henderson's note on the passages, and Alexander's Do.) [LILITH].—W. L. A.

SELAH. [PSALMS.]

SELAH, or rather SELA' סֶלָה, 'rock,' with the article in 2 Kings xiv. 7, הַסֶּלָה 'the rock'; Gr. ἡ Πέτρα, Petra, which has the same signification as Selah; sometimes plural, αἱ Πέτραι), the metropolis of the Edomites in Mount Seir. In the Jewish history it is recorded that Amaziah, king of Judah, 'slew of Edom in the valley of Salt ten thousand, and took Selah by war, and called the name of it Joktheel unto this day' (2 Kings xiv. 7). This name seems however to have passed away with the Hebrew rule over Edom, for no further trace of it is to be found; and it is still called Selah by Isaiah (xvi. 1). These are all the certain notices of the place in Scripture; for it may well be doubted whether it is designated in Judg. i. 36 and Is. xlii. 11, as some suppose. We next meet with it as the Petra of the Greek writers, which is merely a translation of the native name Selah. The earliest notice of it under that name by them is connected with the fact that Antigonus, one of Alexander's successors, sent two expeditions against the Nabathæans in Petra (Diod. Sic. xix. 94-98). For points of history not immediately connected with the city, see IDUMÆA; NEBAIOTH. Strabo, writing of the Nabathæans in the time of Augustus, thus describes their capital:—'The metropolis of the Nabathæans is Petra, so called; for it lies in a place in other respects plain and level, but shut in by rocks round about, but within having copious fountains for the supply of water and the irrigation of gardens. Beyond the enclosure the region is mostly a desert, especially towards Judæa' (*Geog.* xvi. p. 906). At this time the town had become a place of transit for the productions of the east, and was much resorted to by foreigners (Diod. Sic. xix. 95; Strabo, *l. c.*) Pliney more definitely describes Petra as situated in a valley less than two miles (Roman) in amplitude, surrounded by inaccessible mountains, with a stream flowing through it (*Hist. Nat.* vi. 28). About the same period it is often named by Josephus as the capital of Arabia Petraea, with which kingdom it passed under the immediate sway of the Romans in the time of Trajan, whose successor

Hadrian seems to have bestowed on it some advantage, which led the inhabitants to give his name to the city upon coins, several of which are still extant (Mionnet, *Med. Antiques*, v. 587; Eckhel, *Doctr. Num.* ii. 503). In the 4th century Petra is several times mentioned by Eusebius and Jerome; and in the Greek ecclesiastical Notitiæ of the 5th and 6th centuries it appears as the metropolitan see of the third Palestine (Reland, *Palæst.* pp. 215, 217); the last-named of the bishops is Theodorus, who was present at the council of Jerusalem in A.D. 536 (*Oriens Christ.* iii. 725). From that time not the slightest notice of Petra is to be found in any quarter; and as no trace of it as an inhabited site is to be met with in the Arabian writers, the probability seems to be that it was destroyed in some unrecorded incursion of the desert hordes, and was afterwards left unpeopled. It is true that Petra occurs in the writers of the era of the Crusades; but they applied this name to Kerek, and thus introduced a confusion as to the true Petra which is not even now entirely removed. It was not until the reports concerning the wonderful remains in Wady Musa had been verified by Burckhardt, that the latter traveller first ventured to assume the identity of the site with that of the ancient capital of Arabia Petraea. He expresses this opinion in a letter dated at Cairo, Sept. 12th, 1812, published in 1819, in the preface to his *Travels in Nubia*; but before its appearance the eminent geographer, Carl Ritter, had suggested the same conclusion on the strength of Seetzen's intimations (*Erdkunde*, ii. 117). Burckhardt's view was more amply developed in his *Travels in Syria*, p. 431, published in 1822, and received the high sanction of his editor, Col. Leake, who produces in support of it all the arguments which have since been relied upon—namely, the agreement of the ancient descriptions with this site, and their inapplicability to Kerek; the coincidence of the ancient specifications of the distances of Petra from the Elanitic

467. Petra, from above the Amphitheatre.

Gulf and from the Dead Sea, which all point to Wady Musa, and not to Kerek; that Josephus, Eusebius, and Jerome testify that the Mount Hor where Aaron died was in the vicinity of Petra; and that to this day the mountain which tradition and circumstances point out as the same, still rears its lonely head above the vale of Wady Musa; while in all the district of Kerek there is not a single mountain which could in itself be regarded as Mount Hor, and even if there were its position

would be incompatible with the recorded journeyings of the Israelites (Leake's Preface to Burckhardt's *Travels in Syria*, pp. vii.-ix.; Robinson's *Palestine*, ii. 576-579; 653-659).

The ruined city lies in a narrow valley surrounded by lofty, and, for the most part, perfectly precipitous mountains. These natural barriers seem to have constituted the real limits of the city; and they give an extent of more than a mile in length, nearly from north to south, by a variable breadth of about half a mile. Several spurs from the surrounding mountains encroach upon this area; but, with inconsiderable exceptions, the whole is fit for building on. The sides of the valley are walled up by perpendicular rocks, from four hundred to six or seven hundred feet high. The northern and southern barriers are neither so lofty nor so steep, and they both admit of the passage of camels. A great many small recesses or side valleys open into the principal one, thus enlarging as well as varying almost infinitely the outline. With only one or two exceptions, however, they have no outlet, but come to a speedy and abrupt termination among the overhanging cliffs, as precipitous as the natural bulwark that bounds the principal valley. Including these irregularities, the whole circumference of Petra may be four miles or more. The length of this irregular outline, though it gives no idea of the extent of the area within its embrace, is perhaps the best measure of the extent of the excavations.

The chief public buildings occupied the banks of the river and the high ground further south, as their ruins sufficiently show. One sumptuous edifice remains standing, though in an imperfect and dilapidated state. It is on the south side of the river, near the western side of the valley, and seems to have been a palace rather than a temple. It is called Pharaoh's house, and is thirty-four paces square. The walls are nearly entire, and on the eastern side they are still surmounted by a handsome cornice. The front, which looks toward the north, was ornamented with a row of columns, four of which are standing. An open piazza, behind the colonnade, extended the whole length of the building. In the rear of this piazza are three apartments, the principal of which is entered under a noble arch, apparently thirty-five or forty feet high. It is an imposing ruin, though not of the purest style of architecture, and is the more striking as the only edifice now standing in Petra.

A little east of this, and in a range with some of the most beautiful excavations in the mountain on the east side of the valley, are the remains of what appears to have been a triumphal arch. Under it were three passages; and a number of pedestals of columns, as well as other fragments, would lead to the belief that a magnificent colonnade was connected with it.

A few rods south are extensive ruins, which probably belonged to a temple. The ground is covered with fragments of columns five feet in diameter. Twelve of these, whose pedestals still remain in their places, adorned either side of this stately edifice. There were also four columns in front and six in the rear of the temple. They are prostrate on the ground, and Dr. Olin counted thirty-seven massive frustra, of which one of them was composed.

Still further south are other piles of ruins—columns and hewn stones—parts no doubt of im-

portant public buildings. The same traveller counted not less than fourteen similar heaps of ruins, having columns and fragments of columns intermingled with blocks of stone, in this part of the site of ancient Petra. They indicate the great wealth and magnificence of this ancient capital, as well as its unparalleled calamities. These sumptuous edifices occupied what may be called the central parts of Petra. A large surface on the north side of the river is covered with substructions, which probably belonged to private habitations. An extensive region still farther north retains no vestiges of the buildings which once covered it.

468. Ruined Temple.

The attention of travellers has been chiefly engaged by the excavations which, having more successfully resisted the ravages of time, constitute at present the great and peculiar attraction of the place. These excavations, whether formed for temples, tombs, or the dwellings of living men, surprise the visitor by their incredible number and extent. They not only occupy the front of the entire mountain by which the valley is encompassed, but of the numerous ravines and recesses which radiate on all sides from this enclosed area. They exist, too, in great numbers in the precipitous rocks which shoot out from the principal mountains into the southern, and still more into the northern part of the site, and they are seen along all the approaches to the place, which, in the days of its prosperity, were perhaps the suburbs of the overpeopled valley. Were these excavations, instead of following all the sinuosities of the mountain and its numerous gorges, ranged in regular order, they probably would form a street not less than five or six miles in length. They are often seen rising one above another in the face of the cliff; and convenient steps, now much worn, cut in the rock, lead in all directions through the fissures, and along the sides of the mountains, to the various tombs that occupy these lofty positions. Some of them are apparently not less than from two hundred to three or four hundred feet above the level of the valley. Conspicuous situations, visible from below, were generally chosen; but sometimes the opposite taste prevailed, and the most secluded cliffs, fronting towards some dark ravine, and quite hidden from the gaze of the multitude, were

preferred. The flights of steps, all cut in the solid rock, are almost innumerable, and they ascend to great heights, as well as in all directions. Sometimes the connection with the city is interrupted, and one sees in a gorge, or upon the face of a cliff, fifty or a hundred feet above him, a long series of steps rising from the edge of an inaccessible precipice. The action of winter torrents and other agencies have worn the easy ascent into a channel for the waters, and thus interrupted the communication.

469. Interior of a Tomb.

The situations of these excavations are not more various than their forms and dimensions. Mere niches are sometimes cut in the face of the rock, of little depth and of various sizes and forms, of which it is difficult to conjecture the object, unless they had some connection with votive offerings and religious rites. By far the largest number of excavations were manifestly designed as places for the interment of the dead, and thus exhibit a variety in form and size, of interior arrangement and external decorations, adapted to the different fortunes of their occupants, and conformable to the prevailing tastes of the times in which they were made. There are many tombs consisting of a single chamber, ten, fifteen, or twenty feet square by ten or twelve in height, containing a recess in the wall large enough to receive one or a few deposits, sometimes on a level with the floor, at others one or two feet above it, and not unfrequently near the ceiling, at the height of eight or ten feet. Occasionally oblong pits or graves are sunk in the recesses, or in the floor of the principal apartment. Some of these are of considerable depth, but they are mostly choked with stones and rubbish, so that it is impossible to ascertain it. In these plebeian tombs there is commonly a door of small dimensions, and an absence of all architectural decorations; in some of larger dimensions there are several recesses occupying two or three sides of the apartment. These seem to have been formed for family tombs. Besides these unadorned habitations of the humble dead, there is a vast number of excavations enriched with various architectural ornaments. To these unique and sumptuous monuments of the taste of one of the most ancient races of men with whom history has made us acquainted, Petra is indebted for its great and peculiar attractions. This ornamental architecture is wholly confined to the front, while the interior is quite plain and destitute of all decoration. Pass the threshold, and nothing is seen but perpendicular

walls, bearing the marks of the chisel, without mouldings, columns, or any species of ornament. But the exteriors of these primitive and even rude apartments exhibit some of the most beautiful and imposing results of ancient taste and skill which have remained to our times. The front of the mountain is wrought into façades of splendid temples, rivalling in their aspect and symmetry the most celebrated monuments of Grecian art. Columns of various orders, graceful pediments, broad rich entablatures, and sometimes statuary, all hewn out of the solid rock, and still forming part of the native mass, transform the base of the mountain into a vast splendid pile of architecture, while the overhanging cliffs, towering above in shapes as rugged and wild as any on which the eye ever rested, form the most striking and curious of contrasts. In most instances it is impossible to assign these beautiful façades to any particular style of architecture. Many of the columns resemble those of the Corinthian order, but they deviate so far both in their forms and ornaments from this elegant model, that it would be impossible to rank them in the class. A few are Doric, which are precisely those that have suffered most from the ravages of time, and are probably very ancient.

But nothing contributes so much to the almost magical effect of some of these monuments as the rich and various colours of the rock out of which, or more properly in which, they are formed. The mountains that encompass the vale of Petra are of sandstone, of which red is the predominant hue. Their surface is a good deal burned and faded by the elements, and is of a dull brick colour; and most of the sandstone formations in this vicinity, as well as a number of the excavations of Petra, exhibit nothing remarkable in their colouring which does not belong to the same species of rock throughout a considerable region of Arabia Petræa. Many of them, however, are adorned with such a profusion of the most lovely and brilliant colours as it is scarcely possible to describe. Red, purple, yellow, azure or sky blue, black and white, are seen in the same mass distinctly in successive layers, or blended so as to form every shade and hue of which they are capable—as brilliant and as soft as they ever appear in flowers, or in the plumage of birds, or in the sky when illuminated by the most glorious sunset. The red perpetually shades into pale, or deep rose or flesh colour, and again approaches the hue of the lilac or violet. The white, which is often as pure as snow, is occasionally just dashed with blue or red. The blue is usually the pale azure of the clear sky, or of the ocean, but sometimes has the deep and peculiar shade of the clouds in summer when agitated by a tempest. Yellow is an epithet often applied to sand and sandstone. The yellow of the rocks of Petra is as bright as that of saffron. It is more easy to imagine than describe the effect of tall, graceful columns, exhibiting these exquisite colours in their succession of regular horizontal strata. They are displayed to still greater advantage in the walls and ceilings of some of the excavations where there is a slight dip in the strata.

We have thus endeavoured to give the reader a general idea of this remarkable place. Detailed descriptions of the principal monuments have been furnished by Laborde (*Voyage en Arabie Pétrée*), Robinson (*Biblical Researches*), and Olin (*Travels in the East*, from which the above description has

been chiefly taken). Interesting notices of Petra may also be found in the respective *Travels, Journeys*, etc., of Burckhardt, Macmichael, Irby and Mangles, Stephens, Lord Lindsay, and Schubert. —J. K. [On the identity of Petra and Kadesh, see KADESH.]

SELAU (סֵלָא, Sept. *δρυγομήτρα*; Vulg. *coturnix*, A. V. *quail*) occurs in Exod. xvi. 13; Num. xi. 31, 32; Ps. cv. 40. Quails form a subdivision of the *Tetraonide*, or grouse family, being distinguished from partridges by their smaller size, finer bill, shorter tail, and the want of a red naked eyebrow and of spurs on the legs. There are several species, whereof the common, now distinguished by the name of *Coturnix dactylisomans*, is abundant in all the temperate regions of Europe and Western Asia, migrating to and from Africa in the proper season. Thus it crosses the Mediterranean and Black Seas twice a year in vast multitudes; but being by nature a bird of heavy flight, the passage is partially conducted by way of intermediate islands, or through Spain; and in the East, in still greater numbers, along the Syrian desert into Arabia, forming, especially at the spring season, innumerable flocks. They alight exhausted with fatigue, and are then easily caught. Guided by these facts, commentators have been led to identify the Hebrew סֵלָא with the quail; although other species of partridges, and still more of *Pterocles* ('sand grouse'), abound in Western Asia; in particular *Pterocles Alchata*, or *Attagen*, which is found, if possible, in still greater numbers on the deserts, and has been claimed by Hasselquist as the *selav* of Exodus. But the present Arabic name of the quail is *selwa*; and the circumstances connected with the bird in question—found on two occasions by the people of Israel in and around the camp so abundantly as to feed the whole population in the desert (Exod. xvi. 3-13), and at Kibroth-Hattaavah, both times in the spring—are much more applicable to flights of quail alighting in an exhausted state during their periodical migration, than to the *pterocles*, which does not proceed to so great a distance, has very powerful wings, is never seen fatigued by migration, is at all times a tenant of the wilderness far from water, and which, strictly taken, is perhaps not a clean bird, all the species subsisting for the most part on larvae, beetles, and insects. We regard these considerations as sufficient to establish the accuracy of the A. V.

Of a bird so well known no further description appears to be necessary. The providential nature of their arrival within and around the camp of the Israelites, in order that they might furnish meat to a murmuring people, appears from the fact of its taking place where it was not to be expected—the localities, we presume, being out of the direction of the ordinary passage; for, had this not been the case, the dwellers in that region, and the Israelites themselves, accustomed to tend their flocks at no great distance from the spot, would have regarded the phenomenon as a well-known periodical occurrence.—C. H. S.

SELDEN, JOHN, an eminent lawyer and antiquarian, was born at Salvington, a hamlet in the parish of West Farring, near Worthing, in Sussex, Dec. 16, 1584. He received the rudiments of his education at the free school of Chichester, and

at fourteen he entered at Hart or Hert Hall (since merged in Magdalen Hall), Oxford, where, although possessing great abilities, he did not particularly distinguish himself. He entered himself at Clifford's Inn, 1602, for the study of law; and in 1604 removed to the Inner Temple for the completion of his legal studies. He acquired very early a taste for antiquarian research, in which department he afterwards became so eminent. He was, in fact, one of the most learned men of his age. He lived in stirring times, and was, almost inevitably, mixed up with the stormy politics of the period; but he belonged to no extreme party, although a friend of liberty and of the popular cause. He died Nov. 30, 1654. His works are very numerous and learned; the following are those which require special notice here:—1. *De Diis Syris Syntagmata Duo*, 1617, which contains a history of the idol deities mentioned in Scripture, and a summary of Syrian idolatry. 2. *De Successione in bona Defuncti ad Leges Ebraeorum*, 1631. An improved edition of this work appeared in 1636, including an additional treatise entitled: *De Successione in Pontificatum Ebraeorum*. Both these treatises were republished by the author, with additions, in 1638. Their titles sufficiently indicate their nature and objects. 3. *De Jure Naturali et Gentium juxta Disciplinam Ebraeorum, libri septem*, 1640. In this work the author treats of the seven so-called precepts of Noah, and gives a digest of all the laws of the Jews, distinguishing those which belong to universal law from those which are merely national and local. 4. *Uxor Ebraica; seu de Nuptiis et Divoritiis ex Jure Civili, id est Divino et Talmudico Veterum Ebraeorum, tres libri*, 1646. Everything relating to marriage and divorce among the Jews will be found treated of here. 5. *De Synedriis et Prefecturis Juridicis Veterum Ebraeorum*, 1650. In this work, on which Selden spent twelve years, he sets forth everything recorded of the Sanhedrim or Juridical Courts of the Jews, with collateral notices of similar institutions in other countries (Johnson's *Memoirs of John Selden*; *English Cyclopædia*, art. 'Selden'; *Gen. Hist. and Crit. Dic.* vol. ix. art. 'Selden').—I. J.

SELEUCIA (Σελευκεία), a city of Syria, situated about sixteen miles west of Antioch on the sea-coast, near the mouth of the Orontes; sometimes called Seleucia Pieria, from the neighbouring Mount Pierus; and also Seleucia ad Mare, in order to distinguish it from several other cities of the same name, all of them denominated from Seleucus Nicanor. Paul and Barnabas on their first journey embarked at this port for Cyprus (Acts xiii. 4; see also 1 Maccab. xi. 8; Joseph. *Antiq.* xviii. 9. 8). —J. K.

SELEUCUS IV., surnamed PHILOPATOR, was the son and successor of Antiochus the Great. He is described as 'king of Asia'—i.e. of the provinces included in the Syrian monarchy (2 Maccab. iii. 3; comp. 1 Maccab. viii. 6; xi. 13; xii. 39; xiii. 32). He was in general conciliatory in his policy towards the Jews, and even went so far as to undertake a large part of the expenses of the temple service (2 Maccab. iii. 3, 6). Through the false representations of a Jewish officer named Simon, he was led to attempt to carry away the treasures stored up in the temple, in which, however, he failed. The agent he employed in this attempt was Heliodorus, by whom he was after-

wards treacherously assassinated. He died B.C. 175, after having reigned twelve years. He is referred to in the book of Daniel (xi. 20) as 'a raiser of taxes' (referring probably to some heavy impositions which his necessities obliged him to impose on his subjects), and his death by treachery foretold.—W. L. A.

SEMAMITH (שֶׁמַמִּית; Sept. *καλαβώτης*; Vulg. *stellio*), a species of lizard (Bochart, *Hieroz.* ii. 150). The modern Greeks seem to have borrowed this word from the Hebrews, for they call the lizard *σαμίδμυθος* (Salmas. *Exercit. Plin.* p. 817). In the A. V. the word is erroneously rendered by 'spider' (Prov. xxx. 28).—W. L. A.

SEMLER, JOH. SALOMO, D.D., ordinary professor of theology at Halle, was born at Saalfeld 18th Dec. 1725, died 14th March 1791. He may be regarded as the principal founder of the rationalistic school of criticism and exegesis in Germany. He was a very prolific writer, but his works have now little beyond a historical value as marking an epoch in the history of Biblical science. His most effective works were his *Abhandlung von feier untersch. des Canons*, 4 vols. 1771-1775; *Vorbereitung zur theol. hermeneutik*, four parts, Halle 1760-69; *Apparatus ad liberalem N. T. interpretationem*, Halle 1767; *Neue Untersuch. über d. Apokal.* Halle 1796. He wrote also paraphrastic commentaries on Romans, Corinthians, Galatians, 2d Peter, and Jude, 1 John, James; but these are of little value.—W. L. A.

SENEH (סֵנֶה) occurs in the well-known passage of Exod. iii. 2, where the angel of the Lord appeared unto Moses in a flaming fire, out of the midst of a bush (*seneh*), and the bush was not consumed. It occurs also in vers. 3 and 4, and in Deut. xxxiii. 16. The Septuagint translates *seneh* by the Greek word *βῆρος*, which usually signifies the *Rubus* or *Bramble*; so in the N. T. *βῆρος* is employed when referring to the above miracle of the burning bush. The monks of the monastery of St. Catherine, on Mount Sinai, have a species of *rubus* planted in their garden, near their Chapel of the Burning Bush; but this cannot be considered as any proof of its identity with the *seneh*, from the little attention which they have usually paid to correctness in such points. Bové says of it, 'C'est une espèce de Rubus, qui est voisin de notre R. fruticosus.' The species of *rubus* are not common either in Syria or Arabia. *Rubus sanctus*, the holy bramble, is found in Palestine, and is mentioned by Dr. Russell as existing in the neighbourhood of Aleppo, and Hasselquist found a *rubus* among the ruins of Scanderetta, and another in the neighbourhood of Seide. It is also found among the ruins of Petra (?) (Calcott). Celsius and others quote Hebrew authors as stating that Mount Sinai obtained its name from the abundance of these bushes (*seneh*): 'Dictus est mons Sinai de nomine ejus.' But no species of *rubus* seems to have been discovered in a wild state on this mountain. This was observed by Pococke. He found, however, on Mount Horeb several hawthorn bushes, and says that the holy bush was more likely to have been a hawthorn than a bramble, and that this must have been the spot where the phenomenon was observed, being a sequestered place and affording excellent pasture, whereas near the

chapel of the holy bush not a single herb grows. Shaw states that the *Oxyacantha arabica* grows in many places on St. Catherine's mountain. Bové says, on ascending Mount Sinai: 'J'ai trouvé entre les rochers de granit un *mespilus* voisin de l'*Oxyacantha*.' Dr. Robinson mentions it is called *zarur*; but it is evident that we cannot have anything like proof in favour of either plant.—J. F. R.

SENEH (סֵנֶה; *Sēna*; *Sene*), the name given to one of the two sharp rocks which rose on either side of the pass at Michmash, the scene of Jonathan's romantic adventure against the Philistines. The word may signify 'a thorn,' or 'a tooth,' and was probably applied to the rock on account of its pointed top. In the sides of the wild pass the writer saw several crags whose form and position would suit the requirements of the narrative (1 Sam. xiv. 4; see Robinson, *B. R.* i. 441.)—J. L. P.

SENIR (שֵׁנִיר), the Ammonite name for the mountain which the Hebrews called *Hermon*, and the Phœnicians *Sinai*. [HERMON.]

SENNACHERIB, king of Assyria, who in the fourteenth year of King Hezekiah (B.C. 713) came up against all the fenced cities of Judah and took them; on which Hezekiah agreed to pay the Assyrian monarch a tribute of three hundred talents of silver and thirty talents of gold. This, however, did not satisfy Sennacherib, who sent an embassy with hostile intentions, charging Hezekiah with trusting on 'this bruised reed Egypt.' The king of Judah in his perplexity had recourse to Isaiah, who counselled confidence and hope, giving a divine promise of miraculous aid. Meanwhile, 'Tirhakah, king of Ethiopia,' and of Thebes in Egypt, had come out to fight against the Assyrians, who had threatened Lower Egypt with an invasion. On learning this, Sennacherib sent another deputation to Hezekiah, who thereon applied for aid to Jehovah, who promised to defend the capital. 'And it came to pass that night that the angel of the Lord went out and smote in the camp of the Assyrians an hundred fourscore and five thousand; and when they arose early in the morning behold they were all dead corpses' (2 Kings xviii. 13, seq.) On this, Sennacherib returned to Nineveh, and was shortly after murdered by two of his sons as he was praying in the house of Nisroch his god (2 Kings xix. 36, seq.; 2 Chron. xxxii.; Is. xxxvii.) [MERODACH-BALADAN].—J. K.

SEORAH (שְׁעָרָה, said to be derived from שְׁעָרָה, 'hair'; A. V. *barley*) derives its name in Hebrew, according to lexicographers, from its long awns, or beards, as they are also called, somewhat resembling hair. This grain is mentioned in Scripture as cultivated and used in Egypt (Exod. ix. 31), and in Palestine (Lev. xxvii. 16; Deut. viii. 8; 2 Chron. ii. 10; Ruth ii. 17; 2 Sam. xiv. 30; Is. xxviii. 25; Jer. xli. 8; Joel i. 11). Barley was given to cattle, especially horses (1 Kings iv. 28), and was indeed the only corn grain given to them, as oats and rye were unknown to the Hebrews, and are not now grown in Palestine, although Volney affirms (ii. 117) that small quantities are raised in some parts of Syria as food for horses. Hence barley is mentioned in the Mishnah (*Pesach.* fol. 3) as the food of horses and asses. This is still the chief use of barley in

Western Asia. Bread made of barley was, however, used by the poorer classes (Judg. vii. 13; 2 Kings iv. 42; John vi. 9, 13; comp. Ezek. iv. 9). In Palestine barley was for the most part sown at the time of the autumnal rains—October, November (Lightfoot, *Hor. Hebr. ad Matt.* xii. 1), and again in early spring, or rather as soon as the depth of winter had passed (*Mish. Berachoth*, p. 18). This later sowing has not hitherto been much noticed by writers on this part of Biblical illustration, but is confirmed by various travellers who observed the sowing of barley at this time of the year. Russell says that it continues to be sown until the end of February (*Nat. Hist. Aleppo*, i. 74; see his meaning evolved in the *Pictorial Palestine*, *Phys. Hist.* p. 214; comp. p. 229). The barley of the first crop was ready by the time of the Passover, in the month Abib, March–April (Ruth i. 22; 2 Sam. xxi. 9; Judith viii. 2); and if not ripe at the expiration of a (Hebrew) year from the last celebration, the year was intercalated (Lightfoot, *ut supra*) to preserve that connection between the feast and the barley-harvest which the law required (Exod. xxiii. 15, 16; Deut. xvi. 16). Accordingly, travellers concur in showing that the barley-harvest in Palestine is in March and April—advancing into May in the northern and mountainous parts of the land; but April is the month in which the barley-harvest is chiefly gathered in, although it begins earlier in some parts and later in others (*Pict. Palestine*, pp. 214, 229, 239). At Jerusalem Niebuhr found barley ripe at the end of March, when the later (autumnal) crop had only been lately sown (*Beschreib. von Arabien*, p. 160).

The passage in Is. xxxii. 20 has been supposed by many to refer to rice, as a mode of culture by submersion of the land after sowing, similar to that of rice, is indicated. The celebrated passage, 'Cast thy bread upon the waters,' etc. (Eccles. xi. 1), has been by some supposed to refer also to such a mode of culture. But it is precarious to build so important a conclusion, as that rice had been so early introduced into the Levant, upon such slight indications; and it now appears that barley is in some parts subjected to the same submersion after sowing as rice, as was particularly noticed by Major Skinner (i. 320) in the vicinity of Damascus. In Exod. ix. 31 we are told that the plague of hail, some time before the Passover, destroyed the barley, which was then in the green ear; but not the wheat or the rye, which were only in the blade. This is minutely corroborated by the fact that the barley sown after the inundation is reaped, some after ninety days, some in the fourth month (Wilkinson's *Thebes*, p. 395), and that it there ripens a month earlier than the wheat (Sonnini, p. 395).

SEPHAR (סֶפֶר; Sept. Σαφρα), 'a mountain of the east,' a line drawn from which to Mesha formed the boundary of the Joktanite tribes (Gen. x. 30). The name may remind us of Saphar, which the ancients mention as a chief place of South Arabia. The excellent map of Berghaus exhibits on the south-west point of Arabia a mountain called Sabber, which perhaps supplies the spot we seek. If this be the case, and Mesha be (as usually supposed) the Mesene of the ancients, the line between them would intersect Arabia from north-east to south-west. That Sefhar is called 'a mountain of the east,' is to be understood with reference to

popular language, according to which Arabia is described as the 'east country.' See Baumgarten, *Theolog. Commentar zum A. T.* i. 152.—J. L. P.

SEPHARAD (סֶפְרָד; Sept. Ἐφραθά), a region to which the exiles from Jerusalem were taken (Obad. 20). Most of the Rabbins regard Sepharad as Spain, interpreting the whole passage with reference to their present captivity or dispersion; and so we find it in the Syriac and Chaldee. Jerome informs us that the Hebrew who was his instructor told him that Bosphorus was called Sepharad, whither Adrian is said to have sent the Jews into exile. That the district Sepharad is to be sought somewhere in the region of the Bosphorus has lately been confirmed by a palæographic discovery. In the celebrated cuneiform inscription containing a list of the tribes of Persia (Niebuhr, tab. 31, lett. i.), after Assyria, Gorydene, Armenia, Cappadocia, and before Ionia and Greece, is found the name CPaRaD, as read both by Bournouf and Lassen; and this was recognised also by De Sacy as the Sephar of Obad. 20. It was therefore a district of western Asia Minor, or at least near to it (Bournouf, *Mém. sur Deux Inscr. Cuneif.* 1836, p. 147; Gesenius, *Thesaur.* s. v.)—J. K.

SEPHARVAIM (סֶפְרַוַּיִם; Sept. Σεφραβαϊμ), a city of the Assyrian empire whence colonists were brought into the territory of Israel, afterwards called Samaria (2 Kings xvii. 24; xviii. 34; xix. 13; Is. xxxvi. 19; xxxvii. 13). The place is probably represented by Sipphara in Mesopotamia, situated upon the east bank of the Euphrates above Babylon (Ptol. v. 18).

SEPTUAGINT. [GREEK VERSIONS.]

SEPTUAGINT CHRONOLOGY. [CHRONOLOGY.]

SEPULCHRE. [BURIAL.]

SERAH (שֶׁרָה, 'abundance,' Sept. Σάρα), daughter of Asher, named among those who went down into Egypt (Gen. xli. 17; Num. xxvi. 46; 1 Chron. vii. 30). The mention of a female in a list of this kind, in which no others of her sex are named, and contrary to the usual practice of the Jews, seems to indicate something extraordinary in connection with her history or circumstances. This has sufficed to excite the ever-active imaginations of the Rabbins, and Serah shares with the princess of Egypt who saved Moses, with Jochebed his mother, and with Deborah, the honour of occupying a prominent place in their fables.—J. K.

SERIAH (שֶׁרִיָּה and שֶׁרִיָּהוּ, 'warrior of Jehovah,' Sept. Σαράτας). There are several persons of this name in Scripture.

1. The scribe or secretary of David (2 Sam. viii. 17). This person's name is in other places corrupted into שֶׁרָיָה, A. V. Sheva (2 Sam. xx. 25), שֶׁרִישָׁה, Shisha (1 Kings iv. 3), and שֶׁרִישָׁה, Shavsha (1 Chron. xviii. 16).

2. The high-priest at the time that Jerusalem was taken by the Chaldeans. He was sent prisoner to Nebuchadnezzar at Riblah, who put him to death (2 Kings xxv. 18; 1 Chron. vi. 14; Jer. lii. 24; Ezra vii. 1).

3. Son of Tanhumeth, an accomplice of Ishmael

in the conspiracy against Gedaliah (2 Kings xxv. 23; Jer. xl. 8).

4. Son of Kenaz, and father of Joab, chief of the valley of the Charashim (1 Chron. iv. 13, 14).

5. Ancestor of Jehu (1 Chron. iv. 35).

6. One of the children of the province who returned with Zerubbabel (Ezra ii. 2), called Azariah Neh. vii. 7.

7. The father of Ezra (Ezra vii. 1).

8. A priest who signed the covenant with Nehemiah (Neh. x. 2).

9. A priest, son of Hilkiah, who was ruler of the house of God after the return from Babylon (Neh. xi. 11). He is called Azariah 1 Chron. ix. 11.

10. The head of a priestly house that went up with Zerubbabel (Neh. xii. 1, 2).

11. Son of Azriel, one of the persons charged with the apprehension of Jeremiah and Baruch (Jer. xxxvi. 26).

12. Son of Neriah, who held a high office in the court of King Zedekiah, the nature of which is somewhat uncertain. In the A. V. we have, 'This Seraiah was a quiet prince,' where the words rendered 'quiet prince' are שֶׁר מְנוּחָה, which, according to Kinichi, means 'a chamberlain,' or one who attended the king when he retired to rest; but better, perhaps, according to Gesenius, 'chief of the quarters' for the king and his army, that is *quartiermaster-general*. This Seraiah was sent by Zedekiah on an embassy to Babylon, probably to render his submission to that monarch, about seven years before the fall of Jerusalem. He was charged by Jeremiah to communicate to the Jews already in exile a book in which the prophet had written out his prediction of all the evil that should come upon Babylon. It is not stated how Seraiah acquitted himself of his task; but that he accepted it at all shows such respect for the prophet as may allow us to conclude that he would not neglect the duty which it imposed.—J. K.

SERAPHIM (שֶׁרָפִים; Sept. Σεραφίμ), or SERAPHIS, the plural of the word שֶׁרָף *saraph*, 'burning, or 'fiery:' celestial beings described in Is. vi. 2-6 as an order of angels or ministers of God who stand around his throne, having each six wings, and also hands and feet, and praising God with their voices. They were therefore of human form, and, like the Cherubim, furnished with wings as the swift messengers of God. Some have indeed identified the Cherubim and Seraphim as the same beings, but under names descriptive of different qualities; *Seraphim* denoting the burning and dazzling appearance of the beings elsewhere described as *Cherubim*. It would be difficult either to prove or disprove this; but there are differences between the *cherubim* of Ezekiel and the *seraphim* of Isaiah, which it does not appear easy to reconcile. The 'living creatures' of the former prophet had four wings; the 'seraphim' of the latter, six; and while the cherubim had four faces, the seraphim had but one (comp. Is. vi. 2, 3; Ezek. i. 5-12). If the figures were in all cases purely symbolical, the difference does not signify; and whether they were so or not must be determined by the considerations which have been indicated under *CHERUBIM*.

There is much symbolical force and propriety in the attitude in which the Seraphim are described as standing; while two of their wings were kept ready for instant flight in the service of God, with

two others they hid their face, to express their unworthiness to look upon the divine majesty (comp. Exod. iii. 6), and with two others they covered their feet or the whole of the lower part of their bodies—a practice which still prevails in the East, when persons appear in a monarch's presence. It may be seen in the article *SERPENT*, that a species of serpent was called *Saraph*; and this has led some to conceive that the Seraphim were a kind of basilisk-headed Cherubim (Bauer, *Theolog. A. T.* p. 189); or else that they were animal forms with serpents' heads, such as we find figured in the ancient temples of Thebes (Gesen. *Comment. in Jes.*) Hitzig and others identify the Seraphim with the Egyptian Serapis; for although it is true that the worship of Serapis was not introduced into Egypt till the time of the Ptolemies, it is known that this was but a modification of the more ancient worship of Kneph, who was figured under the form of a serpent of the same kind, the head of which afterwards formed the crest of Serapis.—J. K.

SERGIUS PAULUS (Σέργιος Παῦλος), a Roman proconsul in command at Cyprus, who was converted by the preaching of Paul and Barnabas (Acts xiii. 7). The title given to this functionary exhibits one of those minute accuracies which, apart from its inspiration, would substantiate the sacred book as a genuine and contemporary record. Cyprus was originally a *praetorian* province (στρατηγική), and not *proconsular*; but it was left by Augustus under the Senate, and hence was governed by a proconsul (ἀνθύπατος), as stated by the Evangelist (Acts xiii. 6, 8, 12; Dion. Cass. liv. p. 523; Kuinoel, on Acts xiii. 7; see also the art. *CYPRUS*). Sergius is described by the Evangelist as a 'discreet' or 'intelligent' man; by which we are probably to understand that he was a man of large and liberal views, and of an inquiring turn of mind. Hence he had entertained Elymas, and hence also he became curious to hear the new doctrine which the apostle brought to the island. Nothing of his history subsequent to his conversion is known from Scripture. There is no reason to suppose that he abandoned his post as governor of Cyprus; but the legends assert that he did so, and followed Paul; and that eventually he went with the apostle into Spain, and was left by him at Narbonne in France, of which he became the bishop, and died there.—J. K.

SERPENT. [NACHASH; ACHSUB; PETHEN; SARAPH; SHEPHIPHON; TSEPHA']

SERPENT, BRAZEN. [BRASS, SERPENT OF.]

SERUG (שֶׁרוּג, *shoot, tendril*; Sept. and N. T. Σερούχ), son of Reu, and father of Nahor the grandfather of Abraham (Gen. xi. 20; 1 Chron. i. 6). He was 130 years old at the birth of Nahor, and died at the age of 330. The name occurs in the genealogy of Christ (Luke iii. 35). The Jewish traditions affirm that Serug was the first of his line who fell into idolatry; and this seems to be sanctioned by, and is probably built upon, the charge of idolatry brought against Terah and the fathers beyond the Euphrates in Josh. xxiv. 2.—J. K.

SERVANT. [SLAVE.]

SETH (שֵׁט, *compensation*; Sept. Σήθ), the third son of Adam, to whom Eve gave this name in consequence of regarding him as sent to replace

Abel, whom Cain had slain (Gen. iv. 25, 26; v. 3, *seq.*)

# SEVEN. [NUMBER.]

SHAALBIM (שַׁעֲלָבִים, *city of foxes*; Sept.

Judg. i. 35, Θαλαβίν; Alex. αἱ ἀλώπεκες; in 1 Kings iv. 9 Σαλαβίν; Alex. Σαλαβείμ), called also SHAAL-ABBIN, a city of the tribe of Dan (Josh. xix. 42), but of which it could not for a long while dispossess the Amorites (Judg. i. 35). In the time of Solomon it was the station of one of the twelve officers or intendants appointed to regulate the collection of provisions for the court (1 Kings iv. 9). One of David's worthies belonged to this place (2 Sam. xxiii. 32; 1 Chron. xi. 33).—J. K.

# SHAALIM. [SHALIM.]

SHAARAIM and SHARAIM (שַׁעֲרַיִם, 'two gates'; Σακαρίμ; and τῶν πηλῶν; Alex. Σαργαρεῖμ; *Saraim*), a town of Judah situated in the Shephelah, near Azekah (Josh. xv. 36). It was along 'the way of Shaaraim' that the Israelites pursued the Philistines after David's victory over Goliath in the valley of Elah. That valley runs down among the hills for some distance, and then forks below Tell Zakariah; one branch, or rather side valley, running to Gath (Tell es-Safieh), and the other to the plain of Ekron. Perhaps the town of Shaaraim may have been situated at the fork, and may have taken its name from the 'two passes' (1 Sam. xvii. 52; *Handbook for S. and P.* p. 252). The site has not been identified.

2. A town on the southern border of Palestine, occupied by the descendants of Shimei, the Simeonite, and mentioned in connection with Ziklag and other cities in that region. Nothing more is known of it than the simple fact stated in 1 Chron. iv. 31.—J. L. P.

SHAASHGAZ (שַׁעֲשֻׁגָז; Sept. Ταθ), the appropriate name (meaning in Persian, *servant of the beautiful*) of a Persian eunuch, the keeper of the women in the court of Ahasuerus (Esther ii. 14).

SHABLUL (שְׁבַלְלִל; A. V. *snail*). Snails and slugs are not very common in countries so dry in summer as Palestine. Hence, perhaps, the fact that there is only one allusion to them in Scripture. This occurs in Ps. lviii. 8, where the figure seems to be more significant if understood of snails without shells—i.e. slugs, rather than shell-snails—though true of both. 'Let them melt away . . . as the snail which melteth as it goeth.' The name itself, *shablul*, from a verb signifying 'to smear' or 'soil,' has reference to the slime and moisture of this animal (like λείμαξ, from λείβω). The Sept. does not regard the word as denoting a snail at all, but in the text cited translates it by κηρός, 'bees' wax.'—C. H. S.

SHACHAPH (שַׁחַף). This occurs as the name of an unclean bird (Lev. xi. 16; Deut. xiv. 15). In the A. V. it is rendered 'cuckow'; but that this is the bird intended some think improbable, partly because the cuckoo is not in affinity with any of the other birds mentioned, partly because of its great rarity in the part of the world inhabited by those for whom the prohibition was designed. The LXX. and the Vulg. make it the sea-gull or seamew (λάπος, *larus*), and this Bochart endeavours to support by tracing the word to שַׁחַף, *to become thin*,

on the ground that the gull is a bird that cannot be fattened—an assertion the very opposite of the fact. Dr. Shaw identifies it with the *Rhoad*, a species of bustard; but this is improbable. The subject is so involved in obscurity that perhaps the rendering in the A. V. is as near the truth as any other that has been suggested.—W. L. A.

SHADDAI (שַׁדַּי), an epithet of God, usually preceded by אֱלֹהִים in the Pentateuch (Gen. xvii. 1; xxviii. 3; xxxv. 11; xliii. 14; xlviii. 3; Exod. vi. 3). It occurs without אֱלֹהִים in Num. xxiv. 4, 16; Ruth i. 20, 21; Job v. 17, vi. 4, and frequently; Ps. lxviii. 15, xci. 1; Is. xiii. 7; Ezek. i. 24; Joel i. 15). Different derivations of the word have been suggested. Maimonides (*More Nev.* i. 63), following the Targumists, regards it as a compound of שׁ for אִשָּׁר, *who*, and י, *sufficient* = *qui sufficiens est*, or *qui sufficientia est*. Gesenius treats it as a plur. magistrat. from a sing. שַׁד, *powerful*, from שָׁדַד, *to exert power, to force*. Ewald, on the contrary, regards it as an antique singular, like יִשַׁי, *Yishai* (Jesse), and בַּרְזַי, *Barzai* (*Ausf. Lehrb. des Heb. Spr.* sec. 155 c). Others again take it to be a plur. from שָׁד, with the suffix of the first person. The view of Ewald seems that to be preferred. As to the meaning of the epithet all are agreed; it signifies the *Almighty*.—W. L. A.

SHADRACH, the Chaldee name of Hananiah, one of the three friends of Daniel who were delivered from the burning fiery furnace [ABEDNEGO; HANANIAH].

SHAIT (שַׁיִת) occurs in several passages of Isaiah: v. 6; vii. 23, 24, 25; ix. 18; x. 17; xxvii. 4; in all of which it is associated with *shamir*, the two being translated *thorns and briars* in the A. V. From the context of all the passages it is evident that some weed-like plants are intended, either of a thorny or prickly nature, or such as spring up in neglected cultures and are signs of desolation, and which are occasionally employed for fuel. Nothing has, however, been ascertained respecting the plant intended by *shait*, and consequently it has been variously translated in the several versions of the Scriptures.—J. F. R.

SHAKED (שֶׁקֶד) occurs in several passages of Scripture, and is generally acknowledged to mean the *almond* (Gen. xliii. 11; Exod. xxv. 33, 34; xxxvii. 19; Num. xvii. 8; Eccles. xii. 5, and in Jer. i. 11). In the article LUZ we have already stated that from the similarity of that word to the Arabic Louz, there could be no doubt of the former having the same meaning as the latter, both denoting the almond. There is nothing remarkable in a tree like this, so conspicuous from its early flowering, showy appearance, and useful fruit, having two names; one (*luz*) applicable to the tree, and the other (*shaked*) to the fruit. Rosenmüller says: 'The difference between *luz* and *shaked* seems to be that the former word designates the 'wild,' the latter the 'cultivated' tree.' The almond tree is said to be called *shaked*, because it flowers earlier in the spring than other trees. R. Solomon, on Eccles. xii. 5, as translated by Celsius (*Hierobot.* i. p. 297), says: '*Shaked* est arbor Amygdalarum, et sic dicitur quia flores mature profert ante omnes arbores.' This is well known to be the case even

in this country. It was observed by the ancients (comp. Plin. *Hist. Nat.* xvi. 25). The name *shaked* is said to be derived 'a verbo שָׁקַד *shakad*, assiduus et diligens fuit;' and which is also translated 'to make haste,' 'to awake early.' As the almond-tree is a native of Syria and Palestine, and extends from thence to Afghanistan, and is not likely to have been indigenous in Egypt, almonds were very likely to form part of a present from Jacob, even to the great men of Egypt; the more especially as the practice of the East is for people to present what they can afford in their respective stations. The form of the almond would lead to

470. Almond-tree.

its selection for ornamental carved work, independently of its forming an esteemed esculent, as well as probably yielding a useful oil. In Eccles. xii. 5, it is said: 'The almond-tree shall flourish, and the fruit of the caper [ABYONAH] droop, because man goeth to his long home.' This evidently refers to the profuse flowering and white appearance of the almond-tree when in full bloom, and before its leaves appear. It is hence adduced as illustrative of the hoary hairs of age, in the same way as the drooping of the fruit of the caper seems to refer to the hanging down of the head. 'There are two species of *Amygdalus* in Palestine; the common *almond*-tree, and the *peach*-tree, and both are this month (January) in blossom in every part of Palestine, on both sides of the Jordan. It was doubtless from this winter blossoming of the almond-tree, not less than from the snowy whiteness of the blossoms, that the hoary head of the aged man is, by a beautiful metaphor, said in Scripture to flourish like the almond-tree' (Kitto, *Physic. Hist. of Palestine*).—J. F. R.

SHALACH (שָׁלַח, Lev. xi. 17; Deut. xiv. 17), in common with the usual Greek version *καταράκτης*, is considered to have reference to darting, rushing, or stooping like a falcon; and accordingly has been variously applied to the eagle, the jer-falcon, the gannet, the great gull, and the cormorant. Of the Hebrew *Shalach* nothing is known

but that it was an unclean bird. The Greek *καταράκτης*, though noticed by several authors, is not referred always to the same genus, some making it a minor gull, others a diver. Cuvier considers Gesner to be right in considering it to denote a gull, and it might certainly be applied with propriety to the black-backed gull, *Larus marinus*, or to the glaucous, *Larus glaucus*; but although birds of such powerful wing and marine *habitat* are spread over a great part of the world, it does not appear that, if known at the extremity of the Mediterranean, they were sufficiently common to have been clearly indicated by either the Hebrew or Greek names, or to have merited being noticed in the Mosaic prohibition. Both the above are in general northern residents, being rarely seen even so low as the Bay of Biscay, and the species now called *Lestris cataractes* is exclusively arctic. With

471. Caspian Tern.

regard to the cormorant, birds of that genus are no doubt found on the coasts of Palestine, where high cliffs extend to the sea-shore; such, for example, as the *Phalacrocorax pygmaeus*; but all the species dive, and none of them rush flying upon their prey, though that habit has been claimed for them by commentators, who have mixed up the natural history of 'cormorants' with that of the 'sula' or 'gannet,' which really darts from great elevations into the sea, to catch its prey, rising to the surface sometimes nearly half a minute after the plunge, as we ourselves have witnessed. But the gannet (solan goose) rarely comes farther south than the British Channel, and does not appear to have been noticed in the Mediterranean. It is true that several other marine birds of the north frequent the Levant; but none of them can entirely claim Aristotle and Oppian's characters of 'cataractes,' for though the wide throat and rather large head of the dwarf cormorant may be adduced, that bird exceeds in stature the required size of a small hawk; and fishes, it may be repeated, swimming and diving, not by darting down on the wing, and is not sufficiently numerous or important to have required the attention of the sacred legislator. Thus reduced to make a choice where the objections are less and the probabilities stronger, we conclude the *shalach* to have been a species of 'tern,' considered to be identical with the *Sterna Caspica*, so called because it is found about the Caspian Sea; but it is equally common to the Polar, Baltic, and Black Seas, and if truly the same, is not only abundant for several months in the year on the coast of Palestine, but frequents the lakes and pools far inland; flying across the deserts to the Euphrates, and to the Persian and Red Seas, and proceeding up the Nile. It is the largest of the tern or sea-swallow genus, being about the weight of a pigeon, and near two feet in length, having a large black naped head; powerful, pointed crimson bill; a white and grey body, with forked tail, and wings

greatly exceeding the tips of the tail; the feet are very small, weak, and but slightly webbed, so that it swims perhaps only accidentally, but with sufficient power on land to spring up and to rise from level ground. It flies with immense velocity, darting along the surface of the sea to snap at mollusca or small fishes, or wheeling through the air in pursuit of insects; and in calm weather, after rising to a great height, it drops perpendicularly down to near the surface of the water, but never alights except on land; and it is at all times disposed to utter a kind of laughing scream. This tern nestles in high cliffs, sometimes at a very considerable distance from the sea. *Sterna Nilotica* appears to be the young bird, or one nearly allied.

Thus the species is not likely to have been unknown to the Israelites, even while they were in the desert; and as the black tern, *Sterna nigricans*, and perhaps the *Procellaria obscura* of the same locality may have been confounded with it, their number was more than sufficient to cause them to be noticed in the list of prohibited birds. Still the propriety of the identification of *shalach* with the 'great tern' must in some measure rest upon the assumption that the Greek *καταράκτης* is the same. We figure one that was shot among a flight of these birds some distance up the river Orontes.—C. H. S.

SHALEM (שָׁלֵם; Sept. Σαλήμ), a city of Shechem, to which Jacob came (Gen. xxxiii. 18). This has by some been supposed to be the place still bearing the name *Salim*, a village to the east of Nablús (the ancient Shechem), and therefore lying in the line of Jacob's journey. The majority of modern interpreters, however, prefer rendering the passage by 'Jacob came in peace to the city of Shechem.' At the same time there seems no serious objection to the rendering in the A. V., which is also that of the LXX., the Vulg., and the Peshito Syr. (see Robinson, *Bib. Res.* ii. 279; Wilson, *Lands of the Bible*, ii. 72).—W. L. A.

SHALIM [prop. SHAALIM], THE LAND OF (אֶרֶץ שָׁלֵם; Sept. ἡ γῆ Σαλήμ; Alex. Σααλείμ), a district through which Saul passed in search of his father's asses (1 Sam. ix. 4). It may be the same as 'the land of Shual' (1 Sam. xiii. 17).—†

SHALISHA (שָׁלִישָׁה; Sept. Σελχά), a district in the vicinity of the mountains of Ephraim (1 Sam. ix. 4), in which appears to have been situated the city of Baal-Shalisha (2 Kings iv. 42). This city is called by Eusebius Beth-Salisha, and is placed by him 15 miles from Diospolis (Lydda), towards the north.

SHALLECHETH, THE GATE (שַׁעַר שְׁלֵכֶת; Sept. ἡ πύλη πασσοφορίου), one of the gates of the house of the Lord. It was to the westward, and led to the causeway of the going up—i. e. the embankment leading up from the central valley of the city to the sacred enclosure. As this still remains, the gate Shallecheth has, with considerable probability, been identified with 'the *Bab silsileh*, or *Sinsleh*, which enters the west wall of the Haram area, opposite the south end of the platform of the Dome of the Rock, about 600 feet from the south-west corner of the Haram wall' (Smith, *Dict. of the Bible*, s. v.).—W. L. A.

SHALLUM (שָׁלֹום, *retribution*; Sept. Σαλλούμ), the fifteenth king of Israel. In the troubled times which followed the death of Jeroboam II., B. C. 772, his son Zechariah was slain in the presence of the people by Shallum, who by this act extinguished the dynasty of Jehu. Shallum then mounted the throne (B. C. 771), but occupied it only one month, being opposed and slain by Menahem, who mounted the throne thus vacated (2 Kings xv. 10-15).

2. A king of Judah, son of Josiah (Jer. xxii. 11), better known by the name of Jehoahaz [JEHOAHAZ, 2].

3. The husband of Huldah the prophetess (2 Kings xxii. 14). Several other persons of this name occur in Ezra ii. 42; vii. 2; x. 24, 42; Neh. iii. 12; vii. 45; 1 Chron. ii. 40; iv. 25; vii. 13; ix. 19.—J. K.

SHALMANESER, king of Assyria [ASSYRIA].

SHAMGAR (שָׁמְגָר; Sept. Σαμεγάρ), son of Anath, and third judge of Israel. It is not known whether the only exploit recorded of him was that by which his authority was acquired. It is said that he 'slew of the Philistines 600 men with an ox-goad' (Judg. iii. 31). It is supposed that he was labouring in the field, without any other weapon than the long staff armed with a strong point, used in urging and guiding the cattle yoked to the plough, when he perceived a party of the Philistines, whom, with the aid of the husbandmen and neighbours, he repulsed with much slaughter. The date and duration of his government are unknown, but may be probably assigned to the end of that long period of repose which followed the deliverance under Ehud. In Shamgar's time, as the song of Deborah informs us (Judg. v. 6), the condition of the people was so deplorably insecure that the highways were forsaken, and travellers went through by-ways; and, for the same reason, the villages were abandoned for the walled towns.—J. K.

SHAMIR (שָׁמִיר), a precious stone, named in Jer. xvii. 1; Ezek. iii. 9; Zech. vii. 12. The Sept. in Jer. xvii. 1, and the Vulgate in all the passages, take it for the diamond. The signification of the word, 'a sharp point,' countenances this interpretation, the diamond being for its hardness used in perforating and cutting other minerals. Indeed, this use of the *shamir* is distinctly alluded to in Jer. xvii. 1, where the *stylus* pointed with it is distinguished from one of iron (comp. Plin. *Hist. Nat.* xxxvii. 15). The two other passages also favour this view by using it figuratively to express the hardness and obduracy of the Israelites. Our A. V. has 'diamond' in Jer. xvii. 1, and 'adamant' in the other texts: but in the original the word is the same in all. Bochart, however (*Hieroz.* iii. 843, *seq.*), rejects the usual explanation, and comparing the word *shamir* with the Greek *σμίρις* or *σμίρις*, conceives it to mean 'emery.' This is a calcined iron mixed with silicious earth, occurring in livid scales of such hardness that in ancient times, as at present, it was used for polishing and engraving precious stones, diamonds excepted (Hoffmann, *Mineral.* i. 561, *seq.*). Rosenmüller is in favour of the diamond in his *Scholia*; but in his *Alterthumskunde* he takes up Bochart's notion, and urges that if the Hebrews had been acquainted with the diamond, and the manner of working it, we should doubtless have found it among the stones

of the high-priest's breastplate; and that, as the *shamir* was not one of the stones thus employed, therefore it was not the diamond. But to this Winer well answers, that it was perhaps not used because it could not be engraved on, or was possibly not introduced until a later period. The argument drawn from the rarity of the word in the O. T. is of little weight, and there is no necessity for seeking an Oriental origin of the word *שָׁמִיר*, or ground for considering it identical with *shamir*, as it may easily be traced from the Greek itself. (See Passow, *s. v.*; Eichhorn, *De Gemmis Sculpt. Hebr.*)—J. K.

SHAMIR (שָׁמִיר) occurs in all the passages in which the word *shait* occurs, with the addition of Is. xxxii. 13: 'Upon the land of my people shall come up thorns (*kozim*) and briers' (*shamir*). Being associated with *koz*, it has been inferred that *shamir* must also mean some thorny plant.

*samir*, in Arabic, according to Celsius (*Hierobot.* xi. p. 188), from Abulfeda, is a thorny plant, said

472. *Zizyphus Paliurus*.

to be a species of *sidri*, which does not bear fruit. *Sidr* is another name of *Nabca*, a species of *Zizyphus*. No plants are more common in the warm and dry uncultivated parts of the East than prickly species of *Zizyphus*, which impede the path and choke up vegetation, and are therefore very suitable for the illustration of the passages in which *shamir* occurs. This kind of *sidri* not bearing fruit may be the *Paliurus aculeatus* of botanists.—J. F. R.

SHAMIR, 1. A city of Judah (Josh. xv. 48). 2. A city in the mountains of Ephraim, where Tola lived and was buried (Judg. x. 1, 2).

SHAMMAH (שָׁמַח, *astonishment*; Σαματα), one of the three chief of the thirty champions of David. The exploit by which he obtained this high distinction, as described in 2 Sam. xxiii. 11, 12, is manifestly the same as that which, in 1 Chron. xi. 12-14, is ascribed to David himself, assisted by Eleazar the son of Dodo. The inference, therefore, is, that Shammah's exploit lay in the assistance which he thus rendered to David and Eleazar. It consisted in the stand which the others enabled David to make, in a field of lentiles, against the

Philistines. Shammah also shared in the dangers which Eleazar and Jashobeam incurred in the chivalric exploit of forcing a way through the Philistine host to gratify David's thirst for the waters of Bethlehem (2 Sam. xxiii. 16).

Other persons of this name occur. 2. A son of Reuel (Gen. xxxvi. 13, 17). 3. A brother of David (1 Sam. xvi. 9; xvii. 3), who is elsewhere called Shimeah (2 Sam. xiii. 3, 32) and Shimma (1 Chron. ii. 13). 4. One of David's thirty champions, seemingly distinct from the chief of the same name (2 Sam. xxiii. 33). 5. Another of the champions distinguished as Shammah the Harodite; he is called Shammoth in 1 Chron. xi. 27, and Shamhuth in 1 Chron. xxvii. 8. That three of the thirty champions should bear the same name is somewhat remarkable.—J. K.

SHAPHAN (שָׁפָן) occurs in Lev. xi. 5; Deut. xiv. 7; Ps. civ. 18; Prov. xxx. 26. Commentators in general now conclude, on the most satisfactory grounds, that those versions which give Cony for the Hebrew Shaphan are incorrect; but several still maintain that the species to which Shaphan belongs ruminates, which is equally an error. The Shaphan is, in truth, as Bruce justly indicated, the same as the Ashkoko, the Ganam, not Daman, Israel, the Wabber of the Arabs, and in scientific zoology is one of the small genus Hyrax, distinguished by the specific name of Syrian (*Syriacus*). Externally, the hyrax is somewhat of the size, form, and brownish colour of a rabbit, and, though it has short round ears, sufficiently like for inexact observers to mistake the one for the other.

473. *Hyrax Syriacus*.

The hyrax is of clumsier structure than the rabbit, without tail, having long bristly hairs scattered through the general fur; the feet are naked below, and all the nails are flat and rounded, save those on each inner toe of the hind feet, which are long and awl-shaped; therefore the species cannot dig, and is by nature intended to reside, not, like rabbits, in burrows, but in the clefts of rocks. This character is correctly applied to the Shaphan by David.

Their timid gregarious habits, and the tenderness of their paws, make them truly 'the wise and feeble folk' of Solomon; for the genus lives in colonies in the crevices of stony places in Syria, Palestine, Arabia, Eastern Egypt, Abyssinia, and even at the Cape of Good Hope, where one or two additional species exist. In every locality they are quiet gentle creatures, loving to bask in the sun, never stirring far from their retreats, moving with caution, and shrinking from the shadow of a passing bird; for they are often the prey of eagles and hawks. Their habits are strictly diurnal, and they feed on vegetables and seeds.—C. H. S.

SHAPHAN, the scribe or secretary of king Josiah (2 Kings xxii. 3, 12; Jer. xxxvi. 10; comp. Ezra viii. 11). Contemporary with him was a state officer named Ahikam, constantly mentioned as 'the son of Shaphan' (2 Kings xxii. 12; xxv. 22; Jer. xxvi. 24; xxxix. 14; and perhaps xxix. 3); but whether this Shaphan, the father of Ahikam, was the same with Shaphan the scribe, remains a matter of some uncertainty. Shaphan the scribe appears to have had the charge of receiving and paying out money for the king (2 Kings xxii. 4; 2 Chron. xxiv. 9; comp. 2 Kings xii. 10). Ewald calls him *finance-minister* (*Gesch.* iii. 697).

SHARAB (שָׂרָב). This word properly means 'heat of the sun,' as in Is. xlix. 10. Hence it is used to designate a phenomenon which is frequent in Arabia and Egypt, and may be occasionally seen in the southern parts of Europe; called by the Arabs *Serab*, and by the French *le Mirage*, by which name it is also commonly known in English. Descriptions of this illusion are often given by travellers. It consists in the presentation to the view of a lake or sea in the midst of a plain where none in reality exists. It is produced by the refraction of the rays of light, during the exhalation of vapours, by the excessive heat of the sun; and it frequently exhibits, along with the undulating appearance of water, the shadows of objects within or around the plain, both in a natural and in an inverted position. The deception is most complete, and to the weary traveller who is attracted by it in the highest degree mortifying, since, instead of refreshing water, he finds himself in the midst of nothing but glowing sand. It is often used proverbially, or for the sake of comparison, by the Arabs, as in the Koran (Sur. xxiv. 39): 'But as for those who believe not, their works are like the Serab of the plain: the thirsty imagines it to be water, but when he reaches it he finds it is nothing.' The same figure occurs in Is. xxxv. 7: 'The *sharab* shall become a lake'—*i. e.* the illusive appearance of a lake in the desert shall become a real lake of refreshing waters. (See Gesenius and Henderson on Isaiah, and comp. the descriptions and explanations in Kitchin's *Physical History of Palestine*, pp. 147, 150, 151.)—J. K.

SHAREZER (שָׂרְאֶצֶר, Persic, *prince of fire*; Sept. Σαρασέρ), a son of Sennacherib, one of those who slew his father (2 Kings xix. 37; Is. xxxvii. 38). Another person of this name occurs in Zech. vii. 2.—J. K.

SHARON (שָׂרֹן, with the art. 'the plain'; Σαρόν; in Is. lxx. 10, δρυμός; and in Cant. ii. 1, πεδιον; *Saron*), a plain of Palestine extending along the sea-coast from the southern base of Carmel to Joppa. It was celebrated for its pastures, and upon it Shitrai the Sharonite fed the herds of king David (1 Chron. xxvii. 29). Isaiah, when predicting the returning prosperity of Israel, says, 'Sharon shall be a fold for flocks' (Is. 10). The language is very expressive. The best pastures of the land were on this plain. So long as the curse rested on the country they were deserted; but the very first evidence of returning blessings would be the return of the flocks to these pastures. Sharon was celebrated for its beauty as well as its richness (Is. xxxv. 2); and for its flowers as well as its pastures (Cant. ii. 1); and among the most

graphic predictions of divine vengeance upon a sin-stained country was the declaration, 'Sharon is like a wilderness' (Is. xxxiii. 9).

Sharon is once mentioned in the N. T. under its Greek form *Saron*. When Peter cured Æneas at Lydda, Luke says, 'all that dwelt at Lydda and Saron saw him, and turned unto the Lord' (Acts ix. 35). Reference may be made to a village in the plain, or more probably to the plain itself, as Lydda stood on its southern border.

Eusebius and Jerome mention two Sharons, the one between Tabor and Tiberias, and the other extending from Cæsarea on the sea-coast to Joppa (*Onomast.* s. v. *Saron*). The latter is doubtless the place referred to by the sacred writers (cf. Jerome, *ad Is.* lxx. 10 and xxxiii. 9). Even now, though almost deserted, Sharon furnishes some of the richest pasture-lands in Palestine. It is abundantly watered by large fountains and streams descending from Carmel on the north, and the mountains of Samaria on the east. The writer has traversed it in several directions, and he was always struck with the luxuriance of its grass and the beauty of its flowers (see *Handbook*, pp. 380, *seq.*; Porter, *Giant Cities*, pp. 223, *seq.*).

In Is. lxx. 10 the Septuagint renders Sharon, δρυμός, which signifies 'a wooded region'; and this word appears to have been applied by Greek writers as a proper name to the plain (Joseph. *Antiq.* xiv. 13. 3; *Bell. Jud.* i. 13. 2; Strabo, xvi. p. 758; Reland, pp. 188, *seq.*) It was appropriate, for not only do the oak forests of Carmel stretch down into Sharon, but it is interspersed, especially on the north and east, with groves and extensive copses.

The scenery and physical features of the plain have already been described under the article PALESTINE.

Some have supposed that *Lasharon*, mentioned in Josh. xii. 18, is identical with Sharon. This, however, is very improbable. The point is examined in the article LASHARON.

2. A region situated on the east side of the Jordan, mentioned in connection with Gilead and Bashan. The exact position is not defined, and the name only occurs in 1 Chron. v. 16. It seems probable that some plain is meant; and as it was possessed by the Gadites, it may be that plain or plateau which extends eastward from Rabbath-Ammon and Gerasa towards Bozrah.—J. L. P.

SHARUHEN (שָׂרְהוֹן; Sept. οἱ ἀγροὶ αὐτῶν reading probably שָׂרְהוֹן), a city mentioned among those allotted to Judah in the country of Simeon (Josh. xix. 6). In ch. xv. 32 we find Shilchim in place of this; and in 1 Chron. iv. 31 Shaaraim. These are probably different names of the same place. Knobel suggests *Tell Sheriah*, at the head of the *Wady Sheriah*, as probably identical with Sharuhin (*Exeget. Hdb.* in loc.)—W. L. A.

SHAVE. [BEARD; HAIR; MOURNING.]

SHAVEH (שָׁוֶה; Sept. Σαβύ), a valley on the north of Jerusalem, called also the King's Dale (Gen. xiv. 17; comp. 2 Sam. xviii. 18).

SHAVEH-KIRJATHAIM (שָׁוֶה קִרְיָתַיִם; Sept. ἐν Σαβὴ τῇ πόλει; Gen. xiv. 5), a plain near the city of Kirjathaim, beyond Jordan, which eventually belonged to Reuben (Num. xxxii. 37; Josh. xiii. 19).

SHEALTIEL (שְׂאִלְתִּיֵּאל, *asked of God*; Sept. Σαλαθιήλ). [SALATHIEL.]

SHEAR-JASHUB (יֵשׁוּב, *the remnant shall return*; Sept. ὁ καταλειφθεὶς Ἰασοῦβ), son of the prophet Isaiah, who accompanied his father when he proceeded to deliver to king Ahaz the celebrated prophecy contained in Is. vii. (see ver. 3). As the sons of Isaiah sometimes stood for signs in Israel (Is. viii. 18), and the name of Maher-shalal-hash-baz was given to one of them by way of prophetic intimation, it has been conjectured that the somewhat remarkable name of Shear-jashub intimated that the people who had then retired within the walls of Jerusalem should return in peace to their fields and villages. But we cannot build on this, as it is not distinctly stated that the name of Shear-jashub was chosen, like that of his brother, with any prophetic intention.—J. K.

SHEBA, SEBA, SABÆANS. As much confusion has been introduced by the variety of meanings which the name *Sabæans* has been made to bear, it may be proper to specify in this place their distinctive derivations and use. In our A. V. of Scripture the term seems to be applied to three different tribes:—1. To the *Sebaiim* (סְבִיאים, with a *samech*), the descendants of Seba or Saba, son of Cush, who ultimately settled in Ethiopia (see the article *Seba*). 2. To the *Shebaiim* (שְׂבִיאים, with a *shin*), the descendants of Sheba, son of Joktan, the *Sabei* of the Greeks and Romans, who settled in Arabia Felix. They are the 'Sabæans' of Joel iii. 8, to whom the Jews were to sell the captives of Tyre. The unpublished Arabic version, quoted by Pococke, has 'the people of Yemen.' Hence they are called 'a people afar off,' the very designation given in Jer. vi. 20 to Sheba, as the country of frankincense and the rich aromatic reed, and also by our Lord in Matt. xii. 42, who says, the queen of Sheba, or 'the south,' came, ἐκ τῶν περὶ τῶν ἄκρων τῆς γῆς, 'from the earth's extremes.' 3. To another tribe of *Shebans* (שְׂבִיאים, also with a *shin*), a horde of Bedawee marauders in the days of Job (ch. i. 15); for whether we place the land of Uz in Idumæa or in Ausitis, it is by no means likely that the Arabs of the south would extend their excursions so very far. We must, therefore, look for this tribe in Desert Arabia; and it is singular enough, that besides the Seba of Cush, and the Shaba of Joktan, there is another Sheba, son of Jokshan, and grandson of Abraham by Keturah (Gen. xxv. 33); and his posterity appear to have been 'men of the wilderness,' as were their kinsmen of Midian, Ephah, and Dedan. To them, however, the above-cited passage in the prophecy of Joel could not apply, because in respect neither to the lands of Judah nor of Uz could they be correctly described as a people 'afar off.' As for the *Sabaim* of Ezek. xxiii. 42 (which our version also renders by 'Sabæans'), while the Keri has סְבִיאים, the Kethib has שְׂבִיאים, *i. e.* 'drunkards,' which better suits the context.

Yet, as if to increase the confusion in the use of this name of 'Sabæans,' it has also been applied—4. To the ancient star-worshippers of Western Asia, though they ought properly to be styled *Tsabiens*, and their religion not Sabaism but *Tsabism*, the name being most probably derived from

the object of their adoration, יְצִבָּה, *the host*, *i. e.* of heaven (see an excursus by Gesenius in his translation of Isaiah, *On the Astral Worship of the Chaldeans*). 5. The name of Sabæans, or Sabians, has also been given to a modern sect in the East, the *Mandaites*, or, as they are commonly but incorrectly called, the 'Christians' of St. John; for they deny the Messiahship of Christ, and pay superior honour to John the Baptist. They are mentioned in the Koran under the name of *Sabianna*, and it is probable that the Arabs confounded them with the ancient Tsabians above mentioned. Norberg, however, says that they themselves derive their own name from that which they gave to the baptist, which is *Abo Sabo Zakrio*; from Abo, 'father'; *Sabo*, 'to grow old together'; and *Zakrio*, *ex. gr.* Zecharia. 'The reason they assign for calling him *Sabo* is because his father, in his old age, had this son by his wife *Anschbat* (Elizabeth), she being also in her old age (see Norberg's *Codex Nasareus, Liber Adami Apellatus*, and Silvestre de Sacy, in the *Journal des Savans* for 1819).

SEBA (סֶבָא) was the eldest son of Cush (Gen. x. 7; 1 Chron. i. 9), and gave name to the country of Seba or Saba, and to one of the tribes called Sabæans, not, however, the *Shebaiim* (with a *shin*), but the *Sebaiim* (with a *samech*). There seems no reason to doubt that their ultimate settlement was in that region of Africa which was known to the Hebrews as the land of Cush, and to the Greeks and Romans as Ethiopia; and the Scriptural notices respecting them and their country have been already anticipated in the articles CUSH and ETHIOPIA. If the kingdom of *Seba* was the far-famed Meroë, and the kingdom of *Sheba* the no less famous Yemen, then it is with peculiar propriety that the king of African Seba in the west, and the king of Asiatic Sheba in the east, are represented by the Psalmist (Ps. lxxii. 10) as bearing their united homage to the 'great king of Judah.' The commerce and wealth of these Sabæans of Ethiopia, as also their gigantic stature, are alluded to by the prophet Isaiah (ch. xliii. 3; xlv. 14), and his testimony is confirmed by the profane writers of antiquity. The passages quoted, however, are the only places in Scripture where the Sabæans of Africa are expressly mentioned; for the Sabæans of Job i. 15 were a tribe of Bedowees, or 'men of the desert,' descended from Sheba, grandson of Keturah; and the Sabæans of Joel iii. 8 were the posterity of another Sheba, son of Joktan, in Arabia Felix. There was, indeed, another Sheba, the son of Raagmah and the grandson of Cush, and consequently the nephew of the Seba who is the subject of the present article, but his posterity appear to have mingled with those of his uncle. As for the 'Sabæans' mentioned in our version at Ezek. xxiii. 42, although the Keri reading is סְבִיאים, *Sabaim*, the Kethib has שְׂבִיאים *Sobeim*, 'drunkards,' which gives a better sense; besides that elsewhere the African Sabæans are not styled *Sabaim* but *Sebaiim*, and the Arab Sabæans, *Shebaiim*.—N. M.

SHEBAH, prop. SHIBE'AH (שִׁבְעָה; Sept. ὄκος), the well dug by Isaac's servants, and which gave its name to Beersheba (Gen. xxvi. 33) [BEER-SHEBA].

ST. ROLDS.  
SOUTHERN.

SHEBARIM (שֶׁבָרִים, with the def. art.), a place to which the men of Ai chased the Israelites (Josh. vii. 5). The LXX. Targ. and Syr. treat the word as part of the verb שָׁבַר, *to break*, and translate accordingly 'until they had broken or destroyed them.' But this is inadmissible; partly because the word cannot be so construed, partly because the history shows that only a very few of the Israelites were slain on this occasion. The use of the def. art. *The Shebarim*, favours the opinion that the word is a proper name; but whether it denotes *stone quarries* (as Keil suggests), or *rough broken ground*, as others propose, cannot be determined.—W. L. A.

SHEBAT (שֶׁבַט; Sept. Σαβάρ), the eleventh month of the Hebrew year, from the new moon of February to the new moon of March. The name only occurs once in Scripture (Zech. i. 7), and is the same which is given in the Arabic and Syriac languages to the same month.

SHEBNA (שֶׁבְנָא, *a youth*; Sept. Σοβνάς), the prefect of the palace to king Hezekiah (Is. xxii. 15); afterwards promoted to be scribe or secretary to the same monarch, when his former office was given to Eliakim (Is. xxii. 15; xxxvi. 3; 2 Kings xviii. 26, 27; xix. 2).

SHEBO (שֶׁבֹּה; Sept. ἀχάτης; Vulg. *achates*), a precious or rather ornamental stone, which was one of those in the pectoral of the high-priest (Exod. xxviii. 19; xxxix. 12). It seems not to have been questioned that some stone of the agate kind is intended. This stone is popularly known in this country under the name of Scotch pebble. Theophrastus describes the agate as 'an elegant stone, which took its name from the river Achates (now the Drillo in the Val di Noto) in Sicily, and was sold at a great price' (καλὸς καὶ λίθος καὶ ὁ Ἀχάτης ὁ ἀπὸ τοῦ Ἀχάτου ποταμοῦ τοῦ ἐν Σικελίᾳ καὶ πωλεῖται τίμιος, 58). This, no doubt, means that the stone was first found by the Greeks in the Achates. But it must have been known long before in the East; and, in fact, there are few countries in which agates of some quality or other are not produced. The finest are those of India; they are plentiful, and sometimes fine, in Italy, Spain, and Germany; but those found in this country are seldom good.

We have no evidence that agates were found in Palestine. Those used in the desert were doubtless brought from Egypt. Pliny says that those found in the neighbourhood of Thebes were usually red, veined with white. Agate is one of the numerous modifications of form under which silica presents itself, almost in a state of purity, forming 98 per cent of the entire mineral. The silicious particles are not so arranged as to produce the transparency of rock crystal, but a semi-pellucid, sometimes almost opaque substance, with a resinous or waxy fracture; and the various shades of colour arise from minute quantities of iron. The same stone sometimes contains parts of different degrees of translucency, and of various shades of colour; and the endless combinations of these produce the beautiful and singular internal forms, from which, together with the high polish they are capable of receiving, agates acquire their value as precious stones. Agates are usually found in detached

rounded nodules in that variety of the trap rocks called amygdaloid or mandelstein, and occasionally in other rocks. Some of the most marvellous specimens on record were probably merely fancied, and possibly some were the work of art, as it is known that agates may be artificially stained. From Pliny we learn that in his time agates were less valued than they had been in more ancient times (*Hist. Nat.* xxxvii. 10). The varieties of the agate are numerous, and are now, as in the time of Pliny, arranged according to the colour of their ground. The Scripture text shows the early use of this stone for engraving; and several antique agates, engraved with exquisite beauty, are still preserved in the cabinets of the curious.—J. K.

SHECHEM (שֶׁכֶּם; Sept. Συχέμ, also τὰ Σίκιμα), a town of central Palestine, in Samaria, among the mountains of Ephraim (Josh. xx. 7; 1 Kings xii. 25), in the narrow valley between the mountains of Ebal and Gerizim (comp. Judg. ix. 7; Joseph. *Antiq.* iv. 8. 44), and consequently within the tribe of Ephraim (Josh. xxi. 20). It is in N. lat. 32° 17', E. long. 35° 20', being thirty-four miles north of Jerusalem and seven miles south of Samaria. It was a very ancient place, and appears to have arisen as a town in the interval between the arrival of Abraham in Palestine and the return of Jacob from Padam-aram, for it is mentioned only as a place, described by reference to the oaks in the neighbourhood, when Abraham came there on first entering the land of Canaan (Gen. xii. 6). But in the history of Jacob it repeatedly occurs as a town having walls and gates: it could not, however, have been very large or important, if we may judge from the consequence which the inhabitants attached to an alliance with Jacob, and from the facility with which the sons of the Patriarch were able to surprise and destroy them (Gen. xxxiii. 18, 19; xxxiv. 1, 2, 20, 24, 26). After the conquest of the country, Shechem was made a city of refuge (Josh. xx. 7), and one of the Levitical towns (Josh. xxi. 21), and during the lifetime of Joshua it was a centre of union to the tribes (Josh. xxiv. 1, 25), probably because it was the nearest considerable town to the residence of that chief in Timnath-serah. In the time of the judges, Shechem became the capital of the kingdom set up by Abimelech (Judg. ix. 1, *seq.*), but was at length conquered and destroyed by him (Judg. ix. 34). It must, however, have been ere long rebuilt, for it had again become of so much importance by the time of Rehoboam's accession, that he there gave the meeting to the delegates of the tribes, which ended in the separation of the kingdom (1 Kings xii. 10). It was Shechem which the first monarch of the new kingdom made the capital of his dominions (1 Kings xii. 25; comp. xiv. 17), although later in his reign the pleasantness of Tirzah induced him to build a palace there, and to make it the summer residence of his court; which gave it such importance, that it at length came to be regarded as the capital of the kingdom, till Samaria eventually deprived it of that honour (1 Kings xiv. 7; xvi. 24; see ISRAEL). Shechem, however, still thrived. It subsisted during the exile (Jer. xli. 5), and continued for many ages the chief seat of the Samaritans and of their worship, their sole temple being upon the mountain (Gerizim), at whose foot the city stood (Joseph. *Antiq.* xi. 8. 6; comp. John iv. 20; and see also the articles EBAL

and GERIZIM; SAMARITANS). The city was taken, and the temple destroyed, by John Hyrcanus, B.C. 129 (Joseph. *Antiq.* xiii. 9. 1; *De Bell. Jud.* i. 2. 6). In the N. T. it occurs under the name of Sychar (Συχαρ; John iv. 5), which seems to have been a sort of nickname (perhaps from שֶׁקֶר, *sheker*, 'falsehood,' spoken of idols in Hab. ii. 18; or from שִׁכְוֹר, *shikkor*, 'drunkard,' in allusion to Is. xxviii. 1, 7)—such as the Jews were fond of imposing upon places they disliked; and nothing could exceed the enmity which existed between them and the Samaritans, who possessed Shechem. Stephen, however, in his historical retrospect, still uses the proper and ancient name (Acts vii. 16). Not long after the times of the N. T. the place received the name of Neapolis, which it still retains in the Arabic form of Nablûs, being one of the very few names imposed by the Romans in Palestine which have survived to the present day. It had probably suffered much, if it was not completely destroyed, in the war with the Romans, and would seem to have been restored or rebuilt by Vespasian, and then to have taken this new name; for the coins of the city, of which there are many, all bear the inscription, Flavia Neapolis—the former epithet no doubt derived from Flavius Vespasian (Eckhel, *Doctr. Num.* iii. 433; Mionnet, *Méd. Antig.* v. 499). The name occurs first in Josephus (*De Bell. Jud.* iv. 8. 1), and then in Pliny (*Hist. Nat.* v. 14), Ptolemy (*Geog.* v. 16). There had already been converts to the Christian faith at this place under our Saviour, and it is probable that a church had been gathered here by the apostles (John iv. 30-42; Acts viii. 25; ix. 31; xv. 3). Justin Martyr was a native of Neapolis (*Apolog.* ii. 41). The name of Germanus, bishop of Neapolis, occurs in A.D. 314; and other bishops continue to be mentioned down to A.D. 536, when the bishop John signed his name at the synod of Jerusalem (Reland, *Palast.* p. 1009). When the Moslems invaded Palestine, Neapolis and other small towns in the neighbourhood were subdued while the siege of Jerusalem was going on (Abulfeda, *Annal.* i. 229). After the taking of Jerusalem by the Crusaders, Neapolis and other towns in the mountains of Samaria tendered their submission, and Tancred took possession of them without resistance (Will. Tyr. ix. 20). Neapolis was laid waste by the Saracens in A.D. 1113; but a few years after (A.D. 1120) a council was held here by king Baldwin II., to consult upon the state of the country (Fulcher, p. 424; Will. Tyr. xii. 13). Neapolis was not made a Latin bishopric, but belonged probably to that of Samaria, and the property of it was assigned to the abbot and canons of the Holy Sepulchre (Jac. de Vitriacus, ch. lviii.) After some disasters in the unquiet times which ensued, and after some circumstances which show its remaining importance, the place was finally taken from the Christians in A.D. 1242, by Abu Ali, the colleague of Sultan Bibars, and has remained in Moslem hands ever since.

There is no reason to question that the present town occupies the site of the ancient Shechem, although its dimensions are probably more contracted. The fertility and beauty of the deep and narrow valley in which the town stands, especially in its immediate neighbourhood, have been much admired by travellers, as far exceeding what they had seen in any other part of Palestine. This valley is not more than 500 yards wide at the town,

which stands directly upon its watershed, the streams on the eastern part flowing off east into the plain, and so towards the Jordan, while the fountains on the western side send off a pretty brook down the valley N.W. towards the Mediterranean. The town itself is long and narrow, extending along the N.E. base of Mount Gerizim, and partly resting upon its declivity. The streets are narrow; the houses high, and in general well built, all of stone, with domes upon the roofs as at Jerusalem. The bazaars are good and well supplied. There are no ruins which can be called ancient in this country, but there are remains of a church of fine Byzantine architecture, and a handsome arched gateway, both apparently of the time of the first Crusades. These occur in the main street, through the whole length of which a stream of clear water rushes down—a rare circumstance in the East. The population of the place is rated by Dr. Olin at 8000 or 10,000, of whom 500 or 600 are Christians of the Greek communion, and the rest Moslems, with the exception of about 130 Samaritans, and one-third that number of Jews. The inhabitants bear the character of being an unusually valiant as well as a turbulent race, and some years since maintained a desperate struggle against the Egyptian government in some bloody rebellions (Robinson, *Palestine*, ii. 94-136; Olin, *Travels*, ii. 339-365; *Narrative of the Scottish Deputation*, pp. 208-218; Schubert, *Morgenland*, iii. 136-154; Winer, *Real-wört.* s.v.; Lord Nugent, *Lands Classical and Sacred*, ii. 172-180).—J. K.

[Near to Nablûs are two famous spots which tradition signalises as the well of Jacob and Joseph's tomb. The former lies about a mile and a half to the west of the city; it is in the middle of the ruins of a church by which it was formerly surrounded. The opening over the well is an orifice in a dome or arch, less than two feet in diameter. The well is very deep, not less than 75 feet (Wilson, *Lands of the Bible*, ii. 56). The latter is about a quarter of a mile north of the well, and is a tomb of the ordinary kind, enclosed in a square of high white-washed walls. In the walls are two slabs with Hebrew inscriptions (Wilson, ii. 61). There seems no reason to doubt the accuracy of these traditional identifications, especially the former. It is one in which Jews, Samaritans, Christians, and Mohammedans agree, and which everything connected with the well itself favours. We may therefore, with all confidence, regard this as the memorable spot beside which the Saviour sat and conversed with the woman of Samaria.]

SHECHEM, son of Hamor, prince of the country or district of Shechem, in which Jacob formed his camp on his return from Mesopotamia. This young man having seen Jacob's daughter Dinah, was smitten with her beauty, and deflowered her. This wrong was terribly and cruelly avenged by the damsel's uterine brothers, Simeon and Levi, as described in the article DINAH (Gen. xxxv.) It seems likely that the town of Shechem, even if of recent origin, must have existed before the birth of a man so young as Hamor's son appears to have been; and we may therefore suppose it a name preserved in the family, and which both the town and the princes inherited. Shechem's name is always connected with that of his father Hamor (Gen. xxxiii. 19; xxxiv.; Acts vii. 16).—J. K.

SHECHINAH. [SHEKINAH.]

SHEEP (שֶׂה, צֹאן, with the varying forms צֹאֵן, צֹאִים, and צֹאֶה, the latter generally used as a collective term, including goats; Arab. *zain*; צֶבֶד, a lamb under a year old; אֵיל, the adult ram, but originally applied also to the males of other ruminants, such as deer, etc.; רֶחֶל, a female or ewe sheep—all referable to Hebrew roots with apposite meanings, deserving the more confidence since the earliest patriarchs of the nation, being themselves shepherds and graziers, had never at any time received this portion of their domesticated cattle from foreign nations, and therefore had indigenous names for them). Domestic sheep, although commonly regarded as the progeny of one particular wild species, are probably an instance, among many similar, where the wisdom of Providence has provided subsistence for man in different regions, by bestowing the domesticating and submissive instincts upon the different species of animals which the human

474. Syrian Sheep.

family might find in their wanderings; for it is certain that even the American *argali* can be rendered tractable, and that the Corsican *musmon* will breed with the common sheep. The normal animal, from which all or the greater part of the western domestic races are assumed to be descended, is still found wild in the high mountain regions of Persia, and is readily distinguished from two other wild species bordering on the same region. What breeds the earliest shepherd tribes reared in and about Palestine can now be only inferred from negative characters; yet they are sufficient to show that they were the same, or nearly so, as the common horned variety of Egypt and continental Europe: in general white, and occasionally black, although there was on the upper Nile a speckled race; and so early as the time of Aristotle the Arabians possessed a rufous breed, another with a very long tail, and above all a broad-tailed sheep, which at present is commonly denominated the Syrian. These three varieties are said to be of African origin, the red hairy, in particular, having all the characteristics to mark its descent from the wild *Ovis Tragelaphus* or *Barbatus* (كشش), or *Kebseh* of the Arabian and Egyptian mountains [RAMS' SKINS RED]. Flocks of the ancient breed, derived from the Bedouins, are now extant in Syria, with little or no change in external characters, chiefly the broad-tailed and the common horned white, often with black and white about the face and feet, the tail somewhat thicker and longer than the European. The others are chiefly valued for the fat of their broad tails, which taste not unlike marrow; for the flesh of neither

race is remarkably delicate, nor are the fleeces of superior quality. Sheep in the various conditions of existence wherein they would occur among a pastoral and agricultural people are noticed in numerous places of the Bible, and furnish many beautiful allegorical images, where purity, innocence, mildness, and submission are portrayed—the Saviour himself being denominated 'the Lamb of God,' in twofold allusion to his patient meek-

475. Supposed Kesitah.

ness and to his being the true paschal lamb, 'slain from the foundation of the world' (Rev. xiii. 8). Besides the words above noticed, the term קֶשִׁיטָה, occurring only Gen. xxxiii. 19; Job xlii. 11, has been by some rendered *sheep* or *lambs*. [KESITAH.]

SHEEP-GATE, THE (שַׁעַר הַצֹּאן; Sept. ἡ πύλη ἡ προβατική), one of the ancient gates of Jerusalem, the position of which is uncertain (Neh. iii. 1, 32; Robinson, *B. R.* i. 472). If it be this which is referred to in John v. 3 (where the A. V. has *sheep-market*, but without any authority, the probable supplement to προβατική being πύλη) it was probably near the temple (Lightfoot, *Harmonia Evangg.* p. iii.; *Opp.* i. 532).—W. L. A.

SHEEP-MARKET. [SHEEP-GATE.]

SHEKEL. [WEIGHTS AND MEASURES.]

SHEKEL. Besides being a weight, the shekel was, before the Exile, established as uncoined money. In silver shekels were paid the contributions to the Temple (Exod. xxx. 13), the fines for offences (Exod. xxi. xxii.; Deut. xxii. 19, 29; Lev. v. 15), taxes exacted by kings or governors (2 Kings xv. 20; Neh. v. 15), purchasable articles (2 Sam. xxiv. 24; 2 Kings vii. 1), etc. In some cases large sums were weighed together (Gen. xxiii. 16; Jer. xxxii. 9), though it is certain that there were pieces of different denominations—both half and quarter shekels (Exod. xxx. 13, 15; 1 Sam. ix. 8, 9). [MONEY.] In many instances relating to purchases, a word is omitted in the Hebrew, and the rendering is always 'a thousand,' or the like, 'of silver.' The term 'pieces' has been supplied in the A. V., but there is not much doubt that 'shekels' is the word understood in all cases. [PIECE OF SILVER.]

Of the extant silver and copper shekels of the time of Simon Maccabæus a list has already been given in a previous article. [MONEY.] It may, however, be observed that, notwithstanding the authority of the principal numismatists of Italy, Germany, Spain, and England, M. de Saulcy has recently objected to the attribution of these silver and copper shekels and their divisions to Simon Maccabæus, preferring still to adhere to his former opinion that they were struck by Jaddua the high-priest, at the time of Alexander the Great (*Rev. Num. Franc.* 1864, p. 373). That they were struck at this period is impossible for many reasons, and

principally on account of their weight, as Alexander would never have allowed any other weight but the Attic to have been used by the Jews, whereas these shekels belong to the Phœnician or Æginetan talent. [WEIGHTS.] For further information on this question, consult the remarks of the Abbé Cavedoni (*Le Princ. Quest. riguardanti la Num. Giud. definitiv. decise*, Modena 1864) and F. W. Madden (*Num. Chron.* N. S. vol. v. p. 191).

We may now allude to the rendering of the Hebrew 'shekel' of the O. T. by διδραχμα in the LXX. This has caused a difficulty to many writers; but the objections have been already ably treated by the late Colonel Leake [DIDRACHM], who supposes that 'as the word διδραχμον is employed by the LXX. synonymously with σίκλος for the Hebrew word shekel, the shekel and didrachmon were of the same weight,' and 'from the fact of the half shekel of the Pentateuch being translated by the LXX. τὸ ἥμισυ τοῦ διδράχμου, therefore the Attic and not the Græco-Egyptian didrachm was intended by them' [DIDRACHM; MONEY]. Were this the case, the didrachm of the LXX. would be a shekel, and the didrachm of the N. T. a half shekel [STATÉR]. It is, however, extremely probable that the Alexandrian Jews adopted the term 'didrachm' as the common name of the coin which was equal in weight to the shekel—i. e. the so-called tetradrachm of the Ptolemaic talent, but really a didrachm—as there were few, if any, current Attic didrachms at the time of our Lord; and this is singularly corroborated, as Mr. Poole has suggested (art. 'Money,' Dr. Smith's *Dict. of the Bible*), in the account of the miracle of the tribute-money, when St. Peter finds a *stater*, which was a *silver tetradrachm* [STATÉR] in the mouth of the fish, to pay for our Lord and himself. The tax of half a shekel was still paid by the Jews, when dispersed throughout the world, for the use of the Temple (Joseph. *Antiq.* xviii. 9. 1); and Josephus uses the term διδραχμον, whereas he should have said τὸ ἥμισυ τοῦ διδράχμου. But in all probability he employs it as St. Matthew does the plural, τὰ διδραχμα (Matt. xvii. 24), to express the *tax*, and not the *payment*, or he intends it to represent two Attic drachms, each such drachm being equivalent to a quarter of a Maccabæan shekel (F. W. Madden, *Hist. of Jewish Coinage*, p. 238; cf. p. 234). Thus is explained another curious passage in Josephus (*Antiq.* iii. 8. 2), in which he says, ὁ δὲ σίκλος, νόμισμα Ἑβραίων ἐν Ἀττικᾷ δέχεται δράχμας τέσσαρας, thus making the shekel equal to four current Attic drachms, and not to the older pieces of full weight [STATÉR]. As 'thirty shekels of silver' was the price of blood to be paid in the case of a servant accidentally killed (Exod. xxi. 32), it has been suggested (Smith's *Dict. of Bible*, s.v. 'Piece of Silver') to understand by the 'thirty pieces of silver' for which our Lord was betrayed 'thirty shekels of silver,' not current shekels, but the tetradrachms of the Greek cities of Syria and Phœnicia, which have the same weight as the shekels of Simon Maccabæus.

In Neh. v. 15 mention is made of forty shekels of silver paid to the governors, and probably these shekels may have been the silver coin circulating in Persia called σίκλος. This coin has generally been considered a kind of shekel; but as, according to Xenophon (*Anab.* i. 5, 6), it was equal to 7½ Attic oboli, and an obolus weighed 11.25 grains (11.25 + 7.5 = 85.375), giving a Persian silver coin of 84 grains, it is clear that the σίκλος

can have no connection with the σίκλος (weighing 220 grains), excepting in name. (Cf. Leake, *Num. Hell. Europe*, p. 21; F. W. Madden, *Hist. Jew. Coin.* p. 20.) [DRACHM; *note*.] But at this time there were coins also current in Persia of the same standard as the shekel (Mionnet, *Descrip. de Méd.* vol. v. p. 645, Nos. 30-40; *Suppl.* vol. viii. p. 426, Nos. 29-33).—F. W. M.

SHEKINAH or SHECHINAH (שְׁכִינָה), a term applied by the ancient Jews, especially in the Chaldee Targums, to that visible symbol of the divine glory which dwelt in the tabernacle and temple. The word, though nowhere met with in this form in the Scriptures, is a direct derivative from the Hebrew root שָׁכַן *shachan*, 'to dwell,' 'to dwell in a tent or tabernacle,' which is of frequent occurrence in the sacred writers, and is used mainly to imply the *tabernacled presence and residence* of the Most High by a visible symbol among the chosen people. Though found in several connections where the sense of *secular habitation* is obvious, yet there can be no doubt that the dominant idea is that of *sacred indwelling*, of which the following passages afford striking specimens: Exod. xxv. 8, 'Let them make me a tabernacle that I may dwell (שָׁכַנְתִּי) among them.' Exod. xxix. 45, 'And I will dwell (שָׁכַנְתִּי) among the children of Israel, and will be their God.' Num. v. 3, 'That they defile not their camps, in the midst whereof I dwell (שָׁכַנְתִּי).' Ps. lxxviii. 16, 'This is the hill which God delighteth to dwell in, yea, the Lord will dwell in it (יִשְׁכֵּן) for ever.' Ps. lxxiv. 2, 'Remember—this Mount Zion wherein thou hast dwelt (שָׁכַנְתָּ).' It is more especially employed when the Lord is said to 'cause his name to dwell,' implying the stated visible manifestation of his presence. Ezra vi. 12, 'And the God that had caused his name to dwell there (שָׁכַן שְׁמוֹ), literally, *hath shekinized his name*' (comp. Deut. xii. 11; xiv. 23; xvi. 6; xxvi. 2). It is emphatically employed in speaking of the cloud of the divine glory dwelling upon Mount Sinai: Exod. xxiv. 16, 'And the glory of the Lord abode (יִשְׁכֵּן) upon Mount Sinai.' The term *shekinah* (שְׁכִינָה) is defined by Buxtorf (*Lex. Talm.* voc. שָׁכַן) as meaning primarily *habitation*, or *inhabitation*, but as having a dominant reference to the *divine glory in its outward visible manifestation*. The term is of very frequent occurrence in the Chaldee Targums, where it is employed interchangeably with 'Glory,' 'Glory of the Lord,' 'Angels of the Lord,' and often with 'Lord' (Jehovah) itself. The citations that follow will more fully disclose the usage in this respect: Ps. lxxii. 2, 'This Mount Zion wherein thou hast dwelt;' Targ. 'wherein thy *shekinah* has dwelt.' Exod. xxv. 8, 'Let them make me a tabernacle that I may dwell among them;' Targ. 'I will make my *shekinah* to dwell among them;' Arab. 'I will make my light (or splendour) to dwell among them.' Haggai i. 8, 'I will take pleasure, and will be glorified, saith the Lord;' Targ. 'I will make my *shekinah* to dwell there in glory.' Ps. lxxxv. 10, 'His salvation is nigh them that fear him, that glory may dwell in our land;' thus explained by Aben Ezra, 'That the *shekinah* may be established in the land.' It would be easy to multiply these quotations to almost any extent, but sufficient has been produced to illustrate the *usus loquendi*, and to show that we have ample

authority for employing the term with the utmost freedom in reference to the divine *theophanies* or *manifestations*.

From the tenor of these and a multitude of similar texts, it is evident that the Most High, whose essence no man hath seen, or can see, was pleased anciently to manifest himself to the eyes of men by an external visible symbol.\* As to the *precise nature* of the phenomenon thus exhibited, we can only say that it appears to have been a concentrated glowing brightness, a preternatural splendour, an effulgent something, which was appropriately expressed by the term 'Glory;' but whether in philosophical strictness it was material or immaterial, it is probably impossible to determine. A luminous object of this description seems intrinsically the most appropriate symbol of that Being of whom, perhaps, in allusion to this very mode of manifestation, it is said, that 'he is light,' and that 'he dwelleth in light unapproachable, and full of glory.' The presence of such a sensible representation of Jehovah seems to be absolutely necessary in order to harmonise what is frequently said of 'seeing God' with the truth of his nature as an incorporeal and essentially invisible spirit. While we are told in one place that 'no man hath seen God at any time,' we are elsewhere informed that Moses and Aaron, and the seventy elders, 'saw the God of Israel,' when called up to the summit of the Holy Mount. So also Isaiah says of himself (Is. vi. 1, 5) that 'in the year that king Uzziah died he saw the Lord sitting upon his throne,' and that, in consequence, he cried out, 'I am undone; for mine eyes have seen the Lord of hosts.' In these cases it is obvious that the object seen was not God in his essence, but some external visible symbol, which, because it stood for God, is called by his name.

It seems beyond question that the divine appearance vouchsafed in the earlier ages of the world to the patriarchs and prophets, was under the aspect, or with the accompaniment of light or fire, or that which conveys to the mind the idea of 'Glory.' Thus, in Stephen's account of the call of Abraham (Acts vii. 2): 'And he said, Men, brethren, and fathers, the God of Glory appeared unto our father Abraham when he was in Mesopotamia,' etc. This is a phrase very unwonted in plain narrative prose, and doubtless carries with it an allusion to the fact of God's appearing in a *glorious* manner, with a bright and overpowering effulgence, or, in other words, by the symbol of the *shekinah*. So, too, when he appeared to Moses in the burning bush, it was doubtless by the usual symbol; and this supernatural light or fire, glowing with a lambent and vivid, but innocuous flame, was no other than the splendour of the *shekinah*. To this august phenomenon the apostle plainly alludes when speaking of the distinguished prerogatives of the covenanted race (Rom. ix. 4), 'to whom pertaineth the adoption, and the glory, and the covenants, and the giving of the law,' etc.

\* Even at the early period of the expulsion of our sinning progenitors from Paradise, such a manifestation seems to have been made in connection with the cherubim which the Most High placed (Heb. יִשְׁכָּן *yishkan*, shekinised) at the east of the garden of Eden, and which, probably, constituted that 'presence of the Lord,' from which Cain fled after the murder of his brother.'

But of all these ancient recorded theophanies, the most signal and illustrious was undoubtedly that which was vouchsafed in the pillar of cloud that guided the march of the children of Israel through the wilderness on their way to Canaan. A correct view of this subject clothes it at once with a sanctity and grandeur which seldom appear from the naked letter of the narrative. There can be little doubt that the columnar cloud was the seat of the *shekinah*. We have already seen that the verb שָׁכַן is applied to the abiding of the cloud

on the summit of the mountain (Exod. xxiv. 16). Within the towering aerial mass, we suppose, was enfolded the inner effulgent brightness, to which the appellation 'Glory of the Lord' more properly belonged, and which was only occasionally disclosed. In several instances in which God would indicate his anger to his people, it is said that they looked to the cloud and beheld the 'Glory of the Lord' (Num. xiv. 10; xvi. 19, 42). So when he would inspire a trembling awe of his majesty at the giving of the Law, it is said, the 'Glory of the Lord appeared as a devouring fire' on the summit of the Mount. Nor must the fact be forgotten in this connection, that when Nadab and Abihu, the two sons of Aaron, offended by strange fire in their offerings, a fatal flash from the cloudy pillar instantaneously extinguished their lives. The evidence would seem then to be conclusive, that this wondrous pillar-cloud was the seat or throne of the *shekinah*, the visible representative of Jehovah dwelling in the midst of his people.

But it will be proper, in a matter of so much importance, to enter somewhat more fully into the genius of that mode of diction which obtains in regard to the *shekinah*; particularly the usage by which the term 'Angel' is applied to this visible phenomenon deserves our investigation. This term occurs frequently in the Arabic version of those passages which speak of the divine manifestations, especially as made in connection with the cloudy pillar. Thus, when we read (Exod. xiii. 21), 'That the Lord went before them in a pillar of cloud by day, and by night in a pillar of fire;' the Arabic translation has it, 'The angel of the Lord went before them.' This is countenanced by the express language of Exod. xiv. 19, 'And the angel of God, which went before the camp of Israel, removed and went behind them; and the pillar of the cloud went from before their face, and stood behind them.' Here it is obvious that the same object is set before us under two different forms of expression; the 'Pillar of Cloud' in the last clause being evidently the same as 'Angel of God' in the first. In seeking the true solution of this phraseology, it is necessary to bear in mind that 'Angel,' in the Scripture idiom, is a term of *office*, and not of *nature* [ANGELS]. It is by no means confined to any order of rational, intelligent, or *personal* beings, whether celestial or terrestrial. Though primarily employed to denote *messengers*, yet nothing is clearer than that it is used in speaking of *impersonal* agents, such as winds, fires, pestilences, remarkable dispensations—anything in fact which might serve as a *medium* to make known the divine will, or to illustrate the divine working: 'He maketh the winds his angels, and the flaming fires his ministers.'

From the wide and extensive use of the term *angel* in the language of Holy Writ, we are pre-

pared to recognise at once the propriety of its application to the *theophanies*, or special manifestations of the Deity, of which so much is said in the O. T. We perceive that we are furnished from this source with a key to all those passages in which mention is made of the appearance of the *angel of the Lord*, whether to Abraham, to Isaac, to Jacob, to Hagar, to Moses, or any of the ancient worthies. So far as the letter is concerned, the intimation would seem, in many cases, to be, that a created and delegated angel was sent upon various messages to the patriarchs, and became visible to their eyes and audible to their ears. These celestial messengers have been supposed occasionally to speak in the name, and even in the person, of him whose mandates they communicated. Thus, when Abraham was about to offer up Isaac we are told that the *angel of the Lord* called to him out of heaven, and said (Gen. xxii. 15-18), 'By myself I have sworn, that in blessing I will bless thee, and that in multiplying I will multiply thy seed as the stars of heaven,' etc. This might seem at first view to be the voice of an angel messenger speaking in the name, and by the authority, of him who sent him. But from the usage now developed, we understand that it was the *visible object that appeared*, which is called the angel. So when it is said that 'the angel of the Lord appeared to Moses in the burning bush,' we see it was the burning bush itself that was called the angel, because it was the *medium of manifestation* to Jehovah in making this communication to his servant. The language which he utters on that occasion is evidently not competent to any created being, and must be considered as proceeding from the *shekinah*, to which no other than the infinite Spirit was present. The appropriation, therefore, of this language to the majestic pillar of cloud viewed as the *shekinah* of Jehovah, receives a countenance which cannot be questioned. We see no room to hesitate in believing, that when it is said 'the *angel of God* went before them,' the meaning is, that the pillar of cloud went before them; or, in other words, that the pillar is called 'the angel.'

In pursuance then of this train of investigation, we advance to another phasis of the mystic column that marshalled the way of the sojourning hosts in their march to Canaan. In Exod. xxiii. 2 it is said, 'Behold I send an angel before thee to keep thee in the way, and to bring thee into the place that I have prepared. Beware of him, and obey his voice, provoke him not; for he will not pardon your transgressions: for my name is in him.' The first impression, upon the perusal of this, would perhaps be, that a created and tutelary angel was intended, one whom, whether visible or invisible, they used to treat with the greatest reverence as a kind of personal representative of Jehovah himself. This representative and commissioned character would be apt to be recognised in the phrase, 'my name is in him,' equivalent, as would be supposed, to the declaration, 'my authority is in him.' But then, on the other hand, we have shown that the term 'angel' is applied to the cloudy pillar, and as we have no intimation of any other angel being visibly present with the travelling tribes, the inference is certainly a fair one, that the angel here mentioned is but the designation of that glorious object which stood forth to the eye of the congregation as having the *shekinah* essentially connected with it.

And now, with the light of this peculiar usage to

guide us, can we hesitate in regard to the genuine scope of the following passage from Isaiah, which we must assuredly recognise as a parallelism (Is. lxiii. 8)? 'For he said, surely they are my people, children that will not lie; so he was their Saviour. In all their afflictions he was afflicted, and the *angel of his presence* saved them: in his love and in his pity he redeemed them; and he bore them and carried them all the days of old.' The allusion is undoubtedly to the same grand symbolical object which we are now considering. After what has been said we can have no difficulty in understanding why the title 'Angel of his presence,' is applied to the cloudy column of the wilderness. It was evidently so termed because it was the medium of manifestation to the divine presence. The invisible Deity, in some mysterious manner, dwelt in it, and was associated with it. It was called the 'Angel of the Divine Presence,' or more literally *face* (פָּנִי), because as the human face is the grand medium of expression to the human spirit, so the *shekinah* was the medium of manifestation or expression to the Divine Spirit. Indeed Moses, on one occasion, when apprehensive that the guiding glory of his people would be withdrawn on account of their transgressions, makes use of this language: 'If thy presence go not with me, carry us not up hence. And the Lord said, my presence shall go with thee.' So also in Deut. iv. 37 we find the word *presence* or *face* used with a personal import: 'And because he loved thy fathers, therefore he chose their seed after them, and brought thee out in his sight (בְּפָנָי, *with, by, or through, his presence*—i.e. the angel of his presence), with his mighty power out of Egypt.' We see not, therefore, that anything is hazarded in the position that the *angel of God's presence* of whom Isaiah speaks is essentially the same with the *angel of God's pillar* of which Moses speaks, and which is invested with personal attributes, because the Israelites were taught to view it in a personal character as a visible representative of their covenant God.

But our conception of the subject is essentially incomplete without the exhibition of another aspect of the cloudy pillar. This is as the *oracle* of the chosen people. So long as that sublime symbol continued as the outward visible token of the divine presence, it performed the office of an oracle in issuing commands and delivering responses. 'They called upon the Lord,' says the Psalmist (Ps. xcix. 6, 7), 'and he answered them. He *spoke unto them in the cloudy pillar*;' that is, the cloudy pillar was the medium of his communications. This is indeed sufficiently express; but still more unequivocal is the language of Exod. xxxiii. 9: 'And it came to pass, as Moses entered into the tabernacle, the cloudy pillar descended and stood at the door of the tabernacle, and *talked with Moses*.' It is true indeed that in our established version we read that '*the Lord* talked with Moses,' but the words 'the Lord' are printed in italics to show that there is nothing in the original answering to them. We have given a literal translation; still there is no special impropriety in supplying the words as above, if it be borne in mind that the mystic pillar was regarded as a visible embodiment of Jehovah, and, therefore, that in the diction of the sacred writer the two terms are equivalent and convertible. This is evident from what follows in the connection: 'And all the people saw the cloudy pillar stand at the tabernacle door, and the Lord

spake unto Moses face to face, as a man speaketh to his friend.' The 'Lord' here must unequivocally be applied to the symbol of the Lord, or the *shekinah*, which was the true organ of communication with the people. It would be easy to carry out this line of investigation to still further results; but the considerations which have been offered will suffice to indicate the general bearings of this interesting subject.

**SHELEPH** (שֶׁלֶפֶח; Σαλέφ; Alex. Σαλέφ; *Saleph*), the second son of Joktan, and founder of one of the minor tribes of eastern Arabia. After the genealogical records in Gen. x. 26, and 1 Chron. i. 20, there is no mention of this tribe in Scripture. The whole family of the Joktanites, or as they are called by Arab writers Beni Kahtân, settled in south-eastern Arabia [JOKTAN; ARABIA].

Ptolemy, in enumerating the Arab tribes in the interior of Arabia, mentions the *Salapenæ* (Σαλαπηνῶν), which appears to be the gentile form of *Saleph* (Σαλέφ), the Greek representative of the Semitic *Sheleph* (Ptol. vi. 7). Bochart was the first to suggest this identity (*Opera*, i. 99); and his opinion is fully corroborated by the researches of Niebuhr and other Oriental scholars since his time. Niebuhr found in the province of Yemen an extensive district called *Salfie* (or *Salafiyeh*), which doubtless retains the name of the primeval tribe (*Description de l'Arabie*, p. 214). The name appears to have been given to the region by the tribe of *Beni Sulaf*, mentioned by Arab historians as forming a subdivision of the Beni Kahtân.

Forster endeavours to identify the Beni Saleph with the Meteyr tribe, whose chief residence is in Kasym, in the province of Nejd (*Geog. of Arabia*, i. 109; Burckhardt, *Notes on the Bedouins*, p. 233). For this, however, there appears to be no sufficient evidence.—J. L. P.

**SHELOMITH** (שְׁלֹמִית), the name of several persons male (1 Chron. xxiii. 18; xxiii. 9; xxvi. 25; Ezra viii. 10) and female (Lev. xxiv. 11; 1 Chron. iii. 19).

**SHEM** (שֵׁם; name; Sept. Σήμ), one of the three sons of Noah (Gen. v. 32), from whom descended the nations enumerated in Gen. x. 22, *seq.*, and who was the progenitor of that great branch of the Noachic family (called from him Semitic or Semitic) to which the Hebrews belong. The name of Shem is placed first wherever the sons of Noah are mentioned together: whence he would seem to have been the eldest brother. But against this conclusion is brought the text Gen. x. 21, which according to the Authorised, and many other versions, has 'Shem the brother of Japheth the elder;' whence it has been conceived very generally that Japheth was really the eldest, and that Shem is put first by way of excellency, seeing that from him the holy line descended. But this conclusion is not built upon a critical knowledge of the Hebrew, which would show that הֶנֶךְ, 'the elder,' must in this text be referred not to Japheth but to Shem, so that it should be read 'Shem . . . the elder brother of Japheth.' The current version of

the text is sanctioned only by the Septuagint among the ancient versions, and it is there supposed by some to be corrupt. The Samaritan, Syriac, Arabic, and Vulgate, adopt the other interpretation, which indeed is the only one that the analogy of the Hebrew language will admit. The whole Bible offers no other instance of such a construction as that by which אֶחָיו יֶפֶת הֶנֶךְ becomes 'the brother of Japheth the elder,' which indeed would be an awkward phrase in any language. The object of the sacred writer is to mark the seniority and consequent superiority of Shem. He had already told us (Gen. ix. 24) that Ham was, if not the youngest, at least a younger son of Noah, and he is now careful to acquaint us that Shem, the stem of the Hebrews, was older than Japheth (see Baumgarten, *Theolog. Commentar zum Alten Test.*; Geddes, *Critical Remarks*: respecting the posterity of Shem, see NATIONS, DISPERSION OF).—J. K.

**SHEMAIAH** (שְׁמַעְיָה, whom *Jehovah* hears; Sept. Σαμαίας). 1. A prophet of the time of Rehoboam who was commissioned to enjoin that monarch to forego his design of reducing the ten tribes to obedience (1 Kings xii. 22-24). In 1 Chron. xii. 15, this Shemaiah is stated to have written the Chronicles of the reign in which he flourished.

2. A person who, without authority, assumed the functions of a prophet among the Israelites in exile. He was so much annoyed by the prophecies which Jeremiah sent to Babylon, the tendency of which was contrary to his own, that he wrote to Jerusalem, denouncing the prophet as an impostor, and urging the authorities to enforce his silence. In return he received new prophecies, announcing that he should never behold that close of the bondage which he fancied to be at hand, and that none of his race should witness the re-establishment of the nation (Jer. xxix. 24-32).—J. K. [Many others of the same name are mentioned, but none requiring special notice].

**SHEMARIM**. [WINE.]

**SHEMEBER** (שִׁמְעָבֶר, lofty flight; Sept. Συμβέρ), king of Zeboim, one of the five 'cities of the plain' (Gen. xiv. 2).

**SHEMEN**. [OIL.]

**SHEMER** (שִׁמֶר, lees; Sept. Σεμήρ), the owner of the hill of Samaria, which derived its name from him. Omri bought the hill for two talents of silver, and built thereon the city, also called Samaria, which he made the capital of his kingdom (1 Kings xvi. 24) [see SAMARIA]. As the Israelites were prevented by the law (Lev. xxv. 23) from thus alienating their inheritances, and as his name occurs without the usual genealogical marks, it is more than probable that Shemer was descended from those Canaanites whom the Hebrews had not dispossessed of their lands.

**SHEMINITH**. [PSALMS.]

**SHEMITIC**, or rather **SEMITIC LANGUAGES**,\* a term commonly applied to a certain number of cognate idioms supposed to have been

\* Having devoted special articles to the different branches of the Shemitic Languages, it is our intention here to give only the briefest pos-

spoken by the Shemites—*i.e.* the descendants of Shem. Considering, however, that the Canaanites and the Phœnicians, the Cushites and a number of Arabic tribes, all derived in the genealogical list of Genesis x. from Cham, *did* speak 'Shēmitic,' while Elam and Lud derived from Shem did not, as far as our present information goes (Ashur has now the benefit of a strong doubt):—that designation, first advocated by Eichhorn and Schlözer, must be pronounced a complete misnomer, although it has kept its ground up to this moment for sheer want of a precise and accurate term. It has supplanted that other one, used from the Church Fathers downward, of 'Oriental Languages;' a denomination perfectly satisfactory to the 'linguistic consciousness' of generations that viewed Hebrew as the mother of all languages, and whose acquaintance with Eastern idioms was limited to this and an imperfect idea of Phœnico-Punic, 'Chaldee'—Jewish or Christian—and Arabic. But when, towards the end of the last century, the gigantic discoveries in the realm of Eastern philology suddenly made these idioms shrink into the small proportions of a family of dialects confined for a long period to a narrow corner of the south-west of Asia; that most comprehensive name of Oriental Languages had, notwithstanding single protests, to be put aside for ever. Leibnitz's suggestion of 'Arabic' being too narrow for the whole stock, 'Syro-Arabic,' formed in analogy to 'Indo-European,' was proposed, but that too has not been found generally expressive enough, apart from the objection of its being apt to be erroneously understood in a linguistical rather than in a geographical sense. Thus, in default of a better name, the above will probably be retained for some time to come, with the distinct understanding of its being a false and merely conventional expression.

Comparative philology, although, compared with what we now understand by this term, a very embryonic one, exercised itself at an early period, and in a vague manner, in these idioms. The resemblance between them is indeed so striking at first sight—its roots being as nearly identical as can be—that it could hardly have been otherwise. It is the difference between them rather than the similarity that requires a closer scrutiny in order to be discovered at all. As it is, they do not vary among themselves to the extent even of the dialects in any single group of the Indo-European languages. Yet, as we shall further show, the idea still entertained by not a few scholars—viz. of one of the Shemitic languages standing in the relation of maternity to another—must now be utterly discarded, and all that can be granted to the speculative 'Science of Language' is the possibility of some kind of extinct prototype, out of which they might have individually developed. Exactly as there is an 'Idea' (in the Platonic sense) of a primeval mother of all the Indo-European tongues floating before the minds of our modern investigators.

Meanwhile, the existence of three distinct 'Shemitic' dialects of independent existence, each bearing a clearly-marked individuality of its own in historical times, has been established beyond all

sible *resumé*; and in taking a general and comprehensive view of the questions connected with this subject, we presuppose an acquaintance with its details.

doubt; and, as usual, different names and divisions have been proposed for them. The most widely adopted and the most rational ones are those that are taken from the abodes of the different tribes who first spoke them. Thus we have: *a.* The northern or north-eastern branch—*i.e.* that of the whole country between the Mediterranean and the Tigris, bordered by the Taurus in the north; by Phœnicia, the land of Israel, and Arabia, in the south; and embracing Syria, Mesopotamia (with its different 'Arams'), and Babylonia. This is called the 'Aramaic' branch. *b.* The idiom spoken by the inhabitants of Palestine: 'Hebraic.' And *c.* That of the south or the peninsula of Arabia—'Arabic'; the idiom confined to this part up to the time of Mohammed. Another recent division is the so-called historical, framed in accordance with the preponderance of these special branches at different periods. By this the Hebraic would assume the first place, extending from the earliest times of our knowledge of it down to the 6th century B. C., when the Aramaic begins to take the lead, and the field of Hebrew and Phœnician—the chief representatives of Hebraic—becomes more and more restricted. The Aramaic again would be followed by the Arabic period, dating from the time of Mohammed, when the Islam and its conquests spread the language of the Koran, not merely over the whole Shemitic territory, but over a vast portion of the inhabited globe. But this last division is so arbitrary, not to say fallacious—for there is every reason to suppose that 'Aramaic' flourished vigorously in its own sphere during, if not before the whole Hebraic period, and again that 'Hebraic' (as Phœnician) kept its ground simultaneously with the later 'Aramaic' period—that its own authors had to hedge it in with many and variegated restrictions. So that it is, in fact, reduced simply to a 'subjective' notion or method, not further to be considered. But we further protest all the more strongly against it, as it might easily lead to the belief that the one idiom gradually merged into the other—Hebrew *into* Aramaic, Aramaic *into* Arabic, much as Latin did into the *Vulgar*—which would be utterly contrary to fact. The vulgar Arabic spoken now in Palestine no more developed out of Aramaic, than the English spoken in Ireland developed out of Celtic or 'Fenian.'

Sinking for a moment the distinctions between these different Shemitic idioms, and viewing them as one compact Unity, more especially in comparison with that other most important family, the Indo-European languages, we are struck, as were the Church Fathers and the mediæval grammarians, with more signs of primæval affinity than their mere identity of word-roots. And indeed, if this had constituted our sole proof and criterion, the circle of relationship would have had to be widened to an astonishingly large extent. One of the chief and indisputable characteristics of Shemitic has, since the days of Chajug, been held to be their trilateralness. That is, that every word consists, in the first instance, merely of three consonants, which form, so to say, the soul of the idea to be expressed by that word; while the respective special modifications are produced by certain vowels or additional letters. Some of the latter have, in a few instances, remained stationary, but even then they are always clearly distinguishable from the root, as mere casual accessories. But these very additional and only casually

annexed consonants have led investigation to doubt that time-hallowed axiom of trilateralism. So far, it has been said, from this being a primæval inborn attribute of these idioms, nay, a sign of their having been handed down (especially in the Hebraic form) as nearly like their original prototype as can be: it is rather a sign of a very advanced stage of a development in which they all participated, and which renders them almost as unlike their primitive type as any foreign group of languages. There must have been a time, it is contended, when not three, but two radicals with an intermediate vowel—a monosyllable in fact—formed the staple of some original 'Shemitic' language. Out of this they may have sprung simultaneously, by one of those linguistic revolutions consequent upon sudden historical events—emigrations and the like. Not indeed in the sharply-outlined form in which we now find them, but predisposed to their development of linguistic individual peculiarities: one and all however bent upon the extension of their monosyllabic root into a trilateral—in a way that the consonant prefixed should express what *nuances* an advancing civilisation found it necessary to distinguish in every one of the scanty roots forming the common stock of the whole Shemitic family. These bilaterals, to which the roots thus are traced back, are nearly all of an onomatopoeical nature; that is, they are imitative sounds of a primitive kind. As long as they were used, the untold grammatical distinctions of an advanced human stage—flexions, categories, constructions—could, if they existed at all, only have existed in an embryonic state.—The authors and defenders of this ingenious conjecture—the unexpected use of which we shall presently show—fail, however, to answer the question, when and how this most extraordinary step from two to three letters could so suddenly and simultaneously have been introduced as must needs be presupposed. Not one of the monosyllabic languages known to us has ever changed its roots in this extraordinary manner, and the adduced analogy of the quadrilaterals having been formed from the trilaterals is not to the point.

Yet this analytical discovery of monosyllabic bases, if it does not assist us as much as was expected in the solution of the many difficult problems offered by the Shemitic idioms when compared among themselves; was made to support a much more sweeping theory—viz. that of an original affinity, nay identity, between Shemitic and Aryan, at some most remote period. A period, in fact, when Aryans and Shemites dwelt in the same homesteads; a period anterior to the final development of the roots of their—common—rudimentary language, and, of course, long anterior to grammars: and therefore also called the *antegrammatical* stage. And this theory has been advocated and warmly defended from Schlegel down to our day by some of the most eminently Aryan and Shemitic scholars. Nay, even the absurd extreme to which it has been carried by Delitzsch and Fürst did not bring its original form into discredit. These two scholars, to wit, do not stop at the affinity, but assume a downright relationship of parentage between the two groups. Their proofs and their specimens of words, however, do not sufficiently support their hypothesis. For the most part arbitrary to an immense degree, and erroneous in their application, they resolve themselves either into accidental similarities or into such affinities as are easily

explained by late importations (the existence of which has never been doubted) from one group into the other—caused by the constant contact between the two families in prehistorical as well as historical times. Quite apart from that other most unfortunate accident of their trying to prove their case by certain talmudical and Syriac words which bore an undeniable family-likeness to certain Greek and Latin words of similar meanings; but which were really words taken from Greek and Latin in late Roman times, and spelt in a slightly disguised Shemitic fashion.

We cannot in this place further enlarge upon a point which trenches so nearly upon those obscure problems about the origin of language in general, that prominently occupy the minds of scientific inquirers in these days. Whatever be the final issue, if ever there be one, we cannot but simply state the fact that, grammatically, there cannot be a more radical difference than that which exists between the two groups, while lexically or etymologically a certain affinity between them is perfectly incontestable even to the most critical and unprejudiced eye. However different the conclusions they draw, on these points even the most extreme schools agree. But whether, as some hold, there was once a stage where there was no grammar at all, or whether there was a kind of grammar which contained the two subsequently so widely varying forms of it *in nuce*; or again whether the two races ever did inhabit the same soil at all, and the phenomenon of the lexical property common to both may be explained on the one hand by certain linguistic laws that unchanging rule body and soul of humanity and produce everywhere the same onomatopoeical sounds, the origin of which we may or may not be able to trace in our present stage, and on the other hand by a certain interchange of ideas and objects at different periods of their existence:—we shall leave undiscussed in this place, content to have shown the different standpoints. The most remarkable, and perhaps the least easily-accounted for phenomenon, is the striking similarity of the pronouns and numerals, not only in Indo-Germanic and Shemitic, but even in Coptic, which for this and other reasons has indeed been held by some to be both lexically and grammatically the Chamite link between the two. With what small show of reason, however, we cannot stop to explain.

Among these last-mentioned curious mutual interchanges that took place in what we may call—comparatively speaking—historical times, we find first of all certain Egyptian words that have early crept into Hebrew, partly possibly before the sojourn at Goshen. Thus we find *אור*, *ארהו*, *פרעה*, *אברך*, *תבנה*, *תבנה*, and others, some of them still to be found in Coptic, and not explained by Shemitic etymology. On the other hand, certain words, chiefly designations of animals, are found in Coptic which are taken from Shemitic—*גמל*, *פיל*, *איל*, *נישר*, etc. Next stand those verbal importations from India, brought home by the trading expeditions to 'Ophir'—*ארהלים*, *קוף*, *נר*, *כרכם*, and the like—which are easily traceable to Sanscrit and its dialects. [And here we would draw attention to the word *יון* (Yavan), the Shemitic designation for the Greeks, which seems to be the Sanscrit *युवजान* Yuvajana = Lat. juvenis—i.e. a younger branch (of emigrants probably).] Strangely enough, while the Greek was enriched to

an extraordinary extent by the Shemitic traders, in proportion to the immense variety of articles then imported into Greek ports; the Greek idiom is generally supposed to have added next to nothing to the Shemitic before the time of Alexander. Vegetable substances, precious stones, materials for garments, the garments themselves, animals, musical instruments, weights, and last not least, the letters of the alphabet—all these, together with their native names, were imported by Shemites (Phœnicians) into the Greek territory and language, when they first emerged from their narrow West-Asiatic homes and opened up a trade with the whole world. The use of many of these words in the fragments of the most ancient Greek literature that has survived shows them to have been at the earliest period already part and parcel of that idiom to such an extent that even their origin had been completely forgotten, cf. *ἄνωβ*, *ὑσσώπος*; *בשם*, *βάλσαμον*; *בוץ*,

*βύσσος*; *לכנה*, *λίβανος*; *ספיר*, *σάπφειρος*; *כתונת*, *χιτὼν*; *כנור*, *κινύρα*, etc. Whether, however, many of the hitherto unexplained Shemitic words may or may not be Greek, and date from exactly the same period, and their importation be owing to the same causes, we cannot here discuss.

And leaving altogether the ever-shifting quicksands of this lexical affinity between the two families, which, as we said, cannot but be accepted in the main as an established fact, we come to the more safe and easy ground of their grammatical difference. This may be summed up briefly in the above-mentioned present triliteral nature of the Shemitic roots; and in the peculiarity of the three consonants that constitute them representing the idea, and the ever-changing vowels added to them its ever-changing aspects, varieties, and modifications. The consonants of the Shemitic root form, in this wise, without the accessory vowels, an unpronounceable word, while the Indo-Germanic root or word is complete and self-sufficient. Among further most vital differences between the two, we may point to the totally different way of the declensions of their nouns (cf. the Shemitic status constructus and emphaticus), the numerous verbal modes utterly unknown to the Aryan conjugation, the absence of a definite tense in Shemitic, the inability of the latter of forming compound nouns or new nuances of verbs by prepositions, and the like. All of which cripples the action of the Shemitic idioms to no small extent, while the unlimited power of forming words upon words at the spur of the moment, and the marvellous flexibility of the verb and the precision of its tenses, endow the Aryan with unequalled wealth, power, and elegance.

This most fittingly leads us to the question of the respective 'ages' of these two prominent families of languages. Not that to the one or the other is to be assigned a longer, more ancient term of existence—for this notion of the direct parentage is, as we said, confined to bygone unscientific centuries, and to the Delitzsch-Fürst school: if there be one. But it may fairly be asked—and this is by no means a barren speculation—which may have retained its ancient stamp with greater fidelity, and which thus reflects best the shape of its original? And there can be but one answer. The more simple, child-like, primitive of the two is, without any doubt, the Shemitic. Abstraction and metaphysics, philosophy and speculation, as we find them in the Aryan, are not easily expressed in an

idiom bereft of all real syntactic structure; bereft further of that infinite variety of little words, particles, conjunctions, auxiliary verbs, etc., which, ready for any emergency, like so many small living links, imperceptibly bind word to word, phrase to phrase, and period to period: which indeed are the very life and soul of what is called Construction. This want of exactness and precision, moreover, naturally inherent in idioms represented by words of dumb sounds, whose meaning must be determined according to circumstances by a certain limited number of shifting vowels, whose conjugations, though varied and flexible to an extraordinary degree, yet lack a proper distinction between the past and the future (cf. the Hebrew 'perfect' and 'aorist,' which lend themselves to almost any tense between past and future). There certainly is—who can doubt it?—notwithstanding all these shortcomings, a strength, a boldness, a picturesqueness, a delicacy of feeling and expression about these Shemitic idioms which marks them, one and all, as the property of a poetically, not to say 'prophetically' inspired race. But compare with this the suppleness of Aryan languages and that boundless supply of aids that enable them to produce the most telling combinations at the spur of the moment; their exquisitely consummate and refined syntactical development, that can change, and shift, and alter the position of word, and phrase, and sentence, and period, to almost any place, so as to give force to any part of their speech. With all these, and a thousand other faculties and capabilities, they might certainly at first sight almost lead one to the belief that they must have grown upon another stock—the Shemitic—and outgrown it. But discarding this unscientific notion, it cannot be denied that they are the 'younger' of the two. The stage of Realism, as represented by the former, must naturally have preceded that of Idealism, of which the Aryan alone is the proper type and expression. The Shemitic use of the materialistic, 'sensual,' term for physiological and psychological phenomena must be older than the formation and common usage of the Aryan abstract term. The name for the outward tangible impression which must have everywhere been identical originally with that of the sensation or idea connected with it, has remained identical in the Shemitic from its earliest stage to its final development. It is, in fact, this unity of idea and expression, which, above all other symptoms, forces us irresistibly to place the Shemitic into the first rank as regards 'antiquity,' such as we explained it; that is, of its having retained the closest likeness to some original form of human speech that preceded both the other family of language and itself.

The signs characteristic of the common Shemitic stock have been touched upon already in the foregoing paragraphs, as far as they could be brought to bear upon the questions under consideration. To these we may now add the peculiarity of there being but two genders in Shemitic, and that these are also distinguished in the second and third person of the verb; that, further, the genitive is formed by the juxtaposition merely of the two respective nouns, slightly changed in their vocalisation, while prepositions principally form the other cases, and suffixes indicate the oblique cases of pronouns.

We shall now, as summarily as possible, speak

of the Shemitic idioms in their special branches, and endeavour to point out as we proceed whatever is best fit to throw a light on the many questions respecting their comparative age, development, and history, referring always for fuller details and points beyond our present task to the several articles devoted to them individually in the course of this work. The first and to the Biblical student most important of these idioms, is the middle-Shemitic, Hebraic, or Hebrew, the language of the Hebrew people during the time of their independence in Canaan. The term Hebrew (עברי) itself has been derived by some from Eber, the father of Peleg and Joktan; by others from the appellative עבר, scil. הנהר—i. e. the other side of the river Euphrates, whence the Abrahamites immigrated into Canaan (LXX. ὁ περάτης). This double derivation is already mentioned in Theodoretus; other derivations are from עבר, to explain, etc. No less

have Iberians, Arabians, and other words of similar sound been pressed into the service. The canonical books of the O. T. do not use that term to designate the language, which they call variously שפת כנען, language of Canaan, in contradistinction to Egyptian; and יהודית Jewish, in contradistinction to Aramaic (or Ashdodian). It first occurs in Ecclesiasticus and Josephus, as ἑβραϊστὶ, γλῶττα τῶν Ἑβραίων. In the N. T., ἑβραϊστὶ, ἑβραῖς διδλεκτος, means Aramaean, in contradistinction to Greek. Philo, ignorant of the language, calls it γλωσσὴν χαλδαϊκὴν. When Aramaic had, after the return from the captivity, become the popular tongue, and Hebrew was chiefly confined to temple, syna-

gogue and academy, it received the name לשון הקדש, holy language, or, more accurately, לשון בית קודש, language of the sanctuary. One of the many vexed and barren questions connected with it is that regarding its original soil—that is, whether Abraham imported it as his own native tongue into Canaan, or whether, finding it there, he and his descendants merely adopted it. Those who held or hold Hebrew to be, if not the oldest of all languages, the oldest at least of the Shemitic idioms, naturally decide for the former view, since it could not but have remained the traditional inheritance of the chosen race. The defenders of the latter view, on the other hand, point to the circumstance that Abraham came from Mesopotamia, where Aramaic was the common idiom used—e.g. by Laban, the grandnephew of Abraham (Gen. xxxi. 47), as a translation of Jacob's Hebrew; further, to its denomination 'language of Canaan,' the geographical position of which country, between the Aramæans and the Arabs, would seem exactly to correspond to the linguistical position of their respective tongues. Again, the close resemblance of the Phœnician to the Hebrew, and certain

proper names of Canaan, such as מלכי צדק, and the like, are brought forward in support of this second theory. Yet there is a third—viz. that the idiom itself may first have been fully developed by the Abrahamides in Canaan, who may have neither brought it nor found it there, but from a fusion of their own original 'Aramaic' and the Canaanitish language spoken in their new homes produced it and developed it.

Intimately connected with this question is the more general one as to the age of this language

itself. That it was the aboriginal tongue from which all others have been derived is, as we hinted before, an opinion not in accordance with the uncontested results of modern philology. The argument of the etymology of certain proper names in the early documents of Genesis (אדם from אדמה, earth; חוה from חַי, life, etc.), was already disposed of by Grotius, who held that Moses may have translated them simply into Hebrew according to the genius of this language, and by Clericus, who pointed out how these names were chiefly appellative names, to a great extent given after the events had taken place to which they point. Yet it was further argued, many names (from Kain to Lemech principally) allow of no etymology whatsoever, therefore this must be the original tongue of all men. Such most primitive arguments, however, disposed of, we are still left in the utmost uncertainty: and, in the absence of documents and testimonies, we must resign ourselves to give up all hopes of ever arriving at more than vague theories on the subject. Much more to the purpose, however, is the attempt to find out the relative position of Hebrew among its sister idioms. The oldest Shemitic documents that have survived are in Hebrew, and in them we find this language and its structure fully developed; so fully indeed, that what progress we do perceive in it is a downward progress: the beginning of decay. It further bears so distinctive a character of high antiquity, originality, simplicity, and purity—the etymology of its grammatical forms is still at times so clearly visible in it and it alone, while it has disappeared in the other dialects—that if not the oldest absolutely, it is certainly the one Shemitic tongue which seems to come nearest to the one primitive type of the Shemitic idioms now generally assumed. With regard to its lexical and grammatical position, it occupies that mean between the Aramaic as the poorest, and the Arabic as the richest. Its principal wealth and strength, however, lies in its religious and ethical element. Whatever may have been lost of its documents and the words which they contained, that which remains is sufficient to show the peculiar tendency and character of its vocabulary. There are, e.g., 14 different terms for 'ask, inquire,' 24 for 'keep the Law,' 9 for 'trust in God,' etc. Of foreign elements we chiefly discover those original terms for foreign objects, persons, or dignities, introduced from the Egyptian idiom during the Mosaic period, and from the Assyrian, Babylonian, Persian, etc., at later times. Few traces are found of dialectal differences—although there are some of a vulgar idiom (מן, מנה, Manna, etc.)—while on the other hand the difference between prosaic and poetical diction is most striking. Fuller forms in flexions, in suffixes, peculiar formations of nouns, the use of grand epithets, and above all, rare words (mostly Aramaic), are the distinguishing characteristic of its poetry. It loves to draw for peculiarity of expression both upon the ancient and partly obsolete stock of words, and upon the language of the common people: no less than upon dialects of idiomatic affinity. Other poetical peculiarities are the omission of the relative or the use of the demonstrative in its stead, the omission of the article, and the like.

There is, however insignificant the changes undergone by the Hebrew and the Shemitic languages in general be, as compared with those of Indo-Germanic—and the reasons for this stability of the

former are founded in their whole character and history—yet a certain change noticeable in the Hebrew, as preserved in the O. T. Whether this be due to the difference<sup>1</sup> of the ages in which the several books were written, or to peculiarities of the respective writers, as some hold, seems hardly to allow of a doubt. Whatever may be owing to provincialism, or individuality, or even to the more solemn and therefore different style of poetry—and we cannot always distinguish these things as clearly as we could wish—enough remains to show a gradual and important difference between the earlier and the later stages of the language in the earlier and later books of the O. T. Certain corresponding periods—two, three, or more—have accordingly been assumed. Thus some distinguish between the time before and that after the exile; others between Mosaic, Davidic, Solomonic periods, and the period after the exile. Yet these divisions are of a most precarious nature. It is quite true that certain words and forms which occur in the Pentateuch do not occur again until very late. That again, terms used at first in prose occur afterwards only in poetry, or have completely changed their forms and meanings. Further it is undoubtedly true that during the Davidian time, and that of his son, the influence of the schools founded by Samuel, and the influence of two such eminent kings and their brilliant literary achievement, together with the flourishing condition of the country itself, could not but make itself felt also in a generally higher and finer cultivation of style, diction, and language, throughout the writings of the period. It must also be allowed that the Assyrian invasion, and all its consequences—principally the spread of Aramæan in Palestine—corrupted the purity of the language, blunted its sense of grammatical niceties, and caused those who most desperately clung to the ancient style to introduce, instead of the living elements of former days, dead archaisms. But we doubt whether any genuine division can be instituted, as long at least as the now prevailing uncertainty as to the date of certain parts of the Scripture will last—and we fear it will not soon be removed.

Vague though our notions about the time when Hebrew was first spoken be, we have the clearest dates as to the time of its disappearance as a living language. When at the return from the exile all the ancient institutions were restored, it was found that the people no longer understood their own Scriptures in their vernacular, and a translation into Aramaic (out of which sprang the Targums) had to be added, 'so that they might understand them.' It soon became, as we said, the language of the schools and of public worship almost exclusively, somewhat like the Latin in the Middle Ages.

Closely allied to the Hebrew, as already observed by Augustine, Jerome, and others, is the Phœnician, which in our own days, with the increasing number of monuments brought to light, has risen to high importance. No language of antiquity perhaps was so widely spread. The whole ancient world almost being the vantage-ground of Phœnician enterprise, the language was naturally disseminated over the widest possible space, and the natural consequence was, that gradually yielding to foreign influence it did not keep up its original purity, and became in proportion more and more divergent from the Hebrew. Characteristic to it are

certain inflexions it retained, which were long obsolete in Hebrew, no less than certain words and phrases, considered archaic in Hebrew, but of common occurrence in Phœnician. Again, there is a tendency towards a darkening, so to say, of vowels—*e.g.* the Hebrew *a* becomes occasionally *o*, the *e* becomes *i* or *y*, the *i* changes into *y* or *u*, the *o* into *u*, and the like. The gutturals are at times interchanged, consonants are assimilated or omitted, etc. A grammar of this idiom has not been attempted yet, nor does the knowledge of the inflexions which we possess offer sufficient material for a systematic investigation at this present moment. A few items towards it, however, are, that the Hebrew termination of the nominative in *ah* becomes *at* in Phœnician, that the formation of the pronoun differs, that there is a greater variety of genitive forms in the Phœnician, etc. The abundance of Aramaism noticed in the language may have crept in at a late period only. The surviving remnants consist merely of inscriptions on coins and stones, chiefly discovered in their colonies. Of a written literature nothing has come down to us, save a few proper names and texts imbedded in a fearfully mutilated state in Greek and Roman writings, and a few scraps of extracts from their writers translated into Greek, but of extremely doubtful genuineness. From all we can gather there must have existed an immense number of Phœnician writings at a remote period of antiquity: chiefly of a theological or theogonical nature, whose authors were identified with the gods themselves. From the Phœnician is to be distinguished the Punic, a corrupted dialect of it, spoken in the western colonies up to the 7th century A.D., while the mother-tongue had completely died out on its native soil as early as the 3d century. There was even a translation of the Bible extant in Punic, but not a trace of it has remained.

We now turn to the northern Shemitic or 'Aramaic' branch, spoken between the Mediterranean and the Tigris; north of Phœnicia, the land of the Israelites, and Arabia; and south of the Taurus; a dialect poorer both grammatically and phonetically than either of the two others. Its peculiarities, moreover, are much of the nature of provincialisms, or perhaps even point to a stage of corruption of language. Thus it is not the change of vowel which produces the passive mood, but a special prefix (את); the article does not begin but end the word; the sibilants are hardened (cf. דָּהָב, gold; סוֹר, rock; תוֹב, return), etc. The earliest trace of its distinction from the Hebrew is

the well-known translation of Jacob's נָלַךְ into נִיר שְׁהֶרֶתָּ. A very difficult question, and one, we fear, not to be solved before further progress in our knowledge of cuneiform literature has been made, is that of the language of Babylonia. That Aramaic was spoken there is undoubted, but whether it was the only idiom prevalent, as in Syria and Mesopotamia, or whether the Chaldeans who had conquered Babylonia had brought with them another non-Shemitic (Medo-Persian) language 'akin to the Assyrian,' has been the subject of long discussions. But even granted that 'Chaldean' was akin to Assyrian, it need not therefore by any means have been a non-Shemitic language. It is, on the contrary, now assumed almost unanimously to be Shemitic; how far, however, it differs from the other dialects, and in particular what may have

been its direct or indirect influence upon Aramaic, we cannot here investigate.

Considering the vast importance of cuneiform studies—for Shemitic in general, and for our knowledge of Aramaic or 'Chaldee' in particular—we shall try briefly to sum up the results hitherto arrived at in this youngest of philological and palaeographical sciences. There are three principal kinds of cuneiform—a mode of writing, be it observed by the way, principally used for monumental records: a kind of cursive being used for records of minor importance—called respectively the Persian, Median, and Assyrian. The first, which seems to have died out 370 B.C., has from 39 to 44 alphabetical signs or combinations, which never consist of more than five wedges. Its words are divided by oblique strokes. The language it represents is Indo-Germanic—the mother of Zend. The second, variously called Median, Scythic, etc., and supposed to represent a Turanian dialect, is the least known and the least important. An alphabet of about 100 syllabic combinations has been constructed out of the very scanty remains in which it appears. The third and most momentous kind, the Assyrian, seems to have spread widest. Not only in Babylon and Nineveh, on the Euphrates and Tigris, but in Egypt itself has it been found. More than 400 combinations, phonetic, syllabic, and ideographic, have been distinguished in it, although our knowledge is limited to a proportionately small number of them. But the difficulties offered here are of the most extraordinary kind. The spelling is varied constantly, the signs occasionally represent different sounds (polyphonous), and the same sounds again are represented by different signs (homophonous). Finally, not one, but five or more dialects have been traced in them; dialects belonging to different tribes or periods. Thus it will be easily understood that many and momentous philological problems await their solution from the progress on this field; and little but conjecture is as yet allowed on the special points of our present subject. Of a primæval Babylonian literature, however, supposed to be preserved in certain Arabic translations, of which some hopes were entertained of late years, nothing reliable has come to light—although the existence of ancient Babylonian writings on mathematics, astronomy (combined with astrology), and chronology, is affirmed by ancient authors.

Turning, however, to what specimens of 'Aramaic' there are preserved, we first of all find certain dialects represented in them which have been variously divided into 'Chaldee' and 'Aramaic,' or into 'East-Aramaic' and 'West-Aramaic,' or again, into 'Jewish,' 'Heathen,' and 'Christian,' and finally, into 'Palestinian' and 'Babylonian' Aramaic. Discarding the term 'Chaldee' as liable to give most rise to misunderstanding—it is first found in the Alexandrines (χαλδαϊστί), and was adopted by Jerome—we may, for the sake of brevity, distinguish between Aramæan (אַרַמִּיָּת)

and Syriac (סורִיָּת, דְּבַר הַנְּהַר, לְשׁוֹן דְּבַר הַנְּהַר), which carry, at least in their present form of writing, the most unmistakable line of demarcation on their face. In the first, the Aramaic (Jewish), we have further to distinguish—*a.* The *Galilean* dialect, which seems to have been notorious for its carelessness in the use and pronunciation of its consonants and vowels. The sounds of K and Ch, P and B, etc.,

and above all the gutturals, were hardly distinguishable in their speech. Of so little importance, indeed, do these seem to have been, that they are frequently lost altogether, and entirely new sounds and compounds are formed—scarcely to be reduced to any grammatical or logical rule—by the mere vulgarity of an idiom saturated, moreover, with unconglomerated foreign elements to the last degree. *b.* The *Samaritan*—*i. e.* vulgar Hebrew and Aramæan mixed up together, in accordance with the genesis of the people itself. It, too, changes its gutturals, uses the *y* most extensively, and does not distinguish the mute consonants. *c.* The *Jerusalem* or *Judean* dialect scarcely ever pronounces the final gutturals; and has besides many peculiar turns of its own, which show all the symptoms of provincialism, but it boasts of a fuller vocalisation. Its orthography, however, is one of the strangest imaginable. This last is the most important dialect of the three Aramaic ones, for in it the whole gigantic targumic and (partly) talmudical literature is written, while of the Samaritan there exist but few documents of a theological (Sam. Version), liturgical, and grammatical nature, and the Galilean never had, as far as we know, any literature of its own. We need but briefly mention here the minor ('heathen') branches, such as *Zabian*—standing between Aramaic and Syriac, the language of a mystico-theosophical sect called the Mendaïtes (= Gnostics), which is largely mixed with Persian elements, and almost bereft of grammar; the *Palmyrene*, a kind of Syriac, written in square Hebraic characters; and the *Egypto-Aramaic*, found on some monuments (stone of Carpentras, Papyri), probably due to Babylonian Jews living in Egypt, who had adopted the religion of their new country.

All 'Aramæan' literature—in contradistinction to 'Syriac'—is, it need hardly be added, Jewish; from the chapters in Daniel, written in this idiom, to the last remnant penned in Palestine or Babylon (the worship in the temple and the earlier schools being, as we said, the only places for which the 'Holy Language,' was partly retained), this was the exclusively used popular idiom. It had, in fact, become so popular and universal that it came to be called Ἑβραϊστί (N. T. *passim*). How it grew to be so universally adopted has hardly been sufficiently explained as yet; for the Captivity alone, or even any number of successively returning batches of immigrants from Babylonia, do not quite account for the phenomenon of a seemingly poor and corrupt dialect supplanting so completely that other hallowed by the most sacred traditions, that this became a dead language in its own country. The fact, however, is undeniable, as at the time of Christ even Scripture itself was popularly only known through the medium of the Aramaic Targums. Nearly all the Shemitisms in the N. T. are Aramaic, and the same may be said with regard to those found in Josephus: cf. Matt. v. 22, ῥακά = רִיקָא; xvi. 17, βάρ Ἰωνᾶ = בֶּר יוֹנָה; xxvii. 46, ἡλὶ

ἡλὶ λημὰ σαβαχθονί = אֱלִי לִכּוֹה שְׁבַח־תִּנִּי; 1 Cor. xvi. 22, μαρὰν ἀθά = מָרָן אַתָּה; Joseph. *Antiq.* iii. 10. 6, Ἀσαρθᾶ = עֲצֵרְתָּה; iii. 7. 1, οὗς Χαραίας καλοῦσι = כְּהֵנִיָּה, etc.

'Syriac' is the designation of an idiom used since the second Christian century in the church, which, though written in different characters (Estrangelo), is yet so closely akin to Aramæan that up to this

day the opinions are divided as to the propriety of making any difference at all between the two. As distinguishing marks between them have been adduced, principally, the 'darker' vocalisation of Syriac—*o* for *a*, *au* or *ai* for *o* or *i*, etc.—its different accentuation, its *š* as the prefix of the 3d pers. future for the Aramaic *š*, the formation of the Syriac infinite by *š*, and its greater wealth of words, chiefly taken from the Greek; all of which, however, together with other peculiarities, are reduced by the advocates of the unity of both dialects to provincial differences and to the peculiar circumstances of the times. But here again, without entering more fully into the question, we can only venture the statement that there seems to be a great *prima facie* probability at least for their being radically identical; only let it not be forgotten that in order to be able to form a real judgment it will be first of all necessary that carefully-prepared editions of the literatures of both should be in our hands. Something has been done for the comparatively poor Syriac branch; for the Aramaic, nothing. That, however, the present Maronite dialect, as well as those of the Jacobites, Nestorians, and other Chaldee Christians, is essentially different from both Syriac and Aramaic, is undoubted: just as the vulgar Arabic spoken in Morocco and Algeria differs from classical Arabic [ARAMAIC; SYRIAC].

The Southern or 'Arabic' branch presents to us the most remarkable phenomenon of one special idiom—the Arabic—suddenly, as it were, starting out of utter obscurity as the richest, most complete, and most refined among its sister idioms, at a time comparatively modern, and exactly when the two other branches seemed to have accomplished their mission, and what remained of their life was merely artificial. So exquisitely finished and so boundlessly wealthy, both lexically and grammatically, has it been from the moment when it first became known, that, as there was no unripe infancy and no struggling growth observable in it, so there was also no age, and far less a decay. It thus ranks as the freshest and 'youngest:' precisely in the same sense as the Hebrew may be styled the 'oldest' among the Shemitic idioms—not, as we said above, on account of its having in reality preceded the others, or still less of its having given birth to the others, but because for some reason or other its growth stopped at a certain period, and it seems to have retained its ancient physiognomy, while its sister dialects went on developing and renewing themselves as much as in them lay and circumstances permitted. As the Arabic was in the 6th century, so it remained almost unchanged up to our day, except perhaps that in absorbing foreign, especially Greek elements of culture, it did not assimilate them quite in the same congenial manner as an Indo-Germanic idiom would have done. But for all that this language must have an age equal at least to that of the other two sister dialects. There are traces of its peculiarities—peculiarities which divide it as sharply as can be from them—to be found in the earliest records of the O. T. We have, e.g.

the article אל (the Hebrew אלה) אלמדר (Gen. x. 26), and further in words like אלאמים, אלאש, אלקים.

אלקש. The phenomenon, further, of a real declension by the change of the termination of the cases, by certain 'broken' plurals, etc., together with many forms of its conjugation, entirely and

radically unknown to Shemitic as represented by its other dialects, proves its early and most independent existence. That, further, the Arabs stood in great renown for wisdom, or what we should now call literary proficiency—if this be not a misnomer for a time when writing was unknown among them—in the earliest historical times, seems clear enough from the queen of Sheba's being an Arab queen, the friends of Job being Arabs, and Solomon's own wisdom being compared to the wisdom of the Arabs. How it came to pass that absolutely nothing should have survived of all that literature which certainly must have been produced among them is a phenomenon no less remarkable. Although two facts must be borne in mind always—viz. that it all was oral and that it was in verse, or at least in a rhythmical form adapted to those early proverbial sayings and poems of which a vague Arabic tradition still speaks; and Mohammed, for reasons of his own, discouraged, nay condemned, poetry—the sole vehicle of all science, all tradition, all religion, before him, in the 'time of ignorance.' A comparison between the Arabic and the two other branches most strikingly shows that superabundance, lexically and grammatically, of the former over the two latter of which we spoke. No one, the Arabs hold, could, without being inspired, keep the whole wealth of their language in his memory. For not only have single words (sword, lion, serpent, etc.), hundreds and thousands of nuances of terms, but many a single word has untold numbers of different meanings. The number of its root and words is like 3, respectively 10, to those of the Hebrew—such as the monuments of both now are in our hands. No doubt, had more survived of the Hebrew literature, the proportion would not have been quite as startling—for we now have only fragments of its religious writings to compare with the endless series of historical, poetical, philological, astronomical, and other Arabic literature; a literature which indeed does not leave a single part of science or belles lettres uncultivated, and which spreads over about eight hundred years—subsequently to the time of Greece and Rome. Nor can the brilliant Hebrew literature that sprang up in the middle ages, partly through Arabic influence, be taken into account. Arabic, though its 'classical' period may be closed with Mohammed, never became Neo-Arabic, while the difference between classical Hebrew and late Hebrew, which had to coin new words at every turn, is quite unmistakable. Arabic grammar shows the same ascendancy over that of its sister idioms as does its dictionary. It has twice as many forms of conjugation as the Hebrew, itself richer than the Aramaic by the Hiphal, the futurum *paragop.* and *apocop.* etc. The Arabic has, besides, over both the advantage of a *comparative*, and of a *dual* in the verb. The Hebrew לִי verbs, which in Aramaic are hardly distinguishable from the לִי, in Arabic split into the two distinct forms of לִי and לִי; just as many a Hebrew root with more than one signification appears in Arabic as a variety of roots, by a slight change of a consonant. Nay, of these, it has five more than the Hebrew and Aramaic. It has also, through the amplitude of its vocalisation, the charm of a more sonorous, a fuller and richer tone and colour than either. But it must also be acknowledged that the harmonious flow of the more ancient idioms, their unfettered ease and freedom,

together with a number of peculiar forms, like the parallelism with its exquisite natural beauty, is lost to a great extent in the Arabic, in which the work of the schools, their pedantic striving after a consummate correctness of expression, and their rhetorical 'painting of the lily,' is often painfully clear. But to the Arabic alone is also due the spread of Shemitic—which had been carried atomically, so to speak, by the Phœnicians to the ends of the earth, but which, with a few isolated exceptions, never really struck root anywhere—to an extent never dreamed of by any ancient or even modern language; a spread that has not ceased yet, but is enlarging its circles from year to year, together with Islam itself. It is, however, as we said, only the last century before Mohammed, that has left us a few traces of preislamic literature. From the time of Mohammed it grew with exotic rapidity into one of the most widely and brilliantly cultivated. It embraced well nigh all the branches of human knowledge and research. Theology, medicine, philosophy, philology, history, mathematics, geography, astronomy, etc., are most extensively represented—though as yet only a beginning has been made in making the treasures of information these works contain as widely useful as they might be made. From the 14th century, however, the glory of Arabic literature began to wane.

We have here spoken only of the chief representative of the Arabic branch, the Arabic itself—still spoken now in the whole south-west of Asia, in the north and east of Africa, in Malta, partly even in India, and everywhere in fact where Mohammedanism reigns supreme—which was originally the dialect of one tribe only, viz. the Koreish. The ancient traditions speak of Cahtanic and Ismaelitic dialects: but at present we can only make a vague distinction between those of Yemen and of Hedjaz, during the anteislamic times. As the Koreish in the north-west were the spokesmen, as it were, of the latter, so the Himyars or Homerites made their dialect the predominant one in the South, until the Koran swept it completely out of Arabia, and, save a few scattered quotations imbedded in later writings, and some partly mutilated inscriptions of difficult reading and more difficult understanding, every trace of it in its original form has disappeared. The Ethiopic or Geez alone, which was spoken up to the 14th century in Abyssinia, seemed to have come nearest to it. But considering the scantiness of its own literary remains, which are chiefly of a theological nature (partly unpublished), and as such subject to the influence of foreign (European) missionaries—who also left their imprint upon it in its exceptional writing from left to right; considering further the small progress we have as yet made in deciphering the Himyaritic, nothing but a very cautious judgment on the relation of the two can be pronounced. The Amharic, a barbarous Gheez dialect, stands, so to say, on the utmost line of the Arabic Shemite, and deserves but a passing mention. The idioms of the Gallas, Hamtonga, and a number of other tribes, however, no longer belongs to the Shemitic, notwithstanding some outer resemblances which have misled former investigators.

Respecting the visible representation of the Shemitic Languages, it may be broadly observed that writing, which in no language fully expresses all the sounds in their various shades, has, in the Shemitic

Languages this additional imperfection, that only the consonants—the skeleton of the word—are represented by real letters, while the vowels originally are either entirely omitted, or only the longer ones are expressed by certain consonants (*matres lectionis*). It was only at a comparatively late period that also the minor vowels were added in the shape of little strokes and dots above or below the line, but this aid too is only intended for less practised readers. Arabic and Hebrew are still commonly written and printed without vowels. Another point is the direction of the Shemitic writing from right to left (of which only modern Ethiopic makes an exception), a peculiarity still inherent in the alternate line of the *Boustrophedon* of the early Greeks. The nearest approach to the most ancient form of the Shemitic characters is found in the Phœnician, from which also all our European alphabets are derived [ARABIC LANGUAGE; ARAMAIC; HEBREW; WRITING, etc.]

SHEN (שֵׁן), *The shen*; Sept. τῆς παλαιᾶς, reading probably שֵׁן, *old*, a place between which and Mizpeh Samuel set up the stone Ebenezer (1 Sam. vii. 12). It has not been identified.—†

SHENIR. [SENIR.]

SHEOL. [HADES.]

SHEPHAM (שֶׁפָּחַם, 'a bare region,' from שֶׁפַּח 'to scrape'; Σεφαμάρ; *Sephama*), a place mentioned only in the description given by Moses of the eastern border of the Land of Promise (Num. xxxiv. 10, 11). It lay between Hazar-enan and Riblah. Hazar-enan, as has been stated, is probably identical with the village of Kuryetein; and Riblah still retains its old name and site on the banks of the Orontes; Shepham, therefore, must be sought for somewhere between these two. No trace of the name has yet been found; but the bare treeless country shows that the name was an appropriate one. It ought to be borne in mind that in the above passage Moses is not describing the country which was actually allotted to the twelve tribes, but only the country given to them in covenant promise on certain conditions (see art. PALESTINE, p. 383; Porter's *Damascus*, ii. 354, seq.)—J. L. P.

SHEPHATIAH (שֶׁפְּתִיָּה, *whom Jehovah defends*; Sept. Σαφατία). 1. A son of David by Abital (2 Sam. iii. 4).

2. One of the nobles who urged Zedekiah to put Jeremiah to death (Jer. xxxviii. 1).

3. One of the heads of families who settled in Jerusalem after the exile (Neh. xi. 6).

4. The head of one of the families, numbering three hundred and seventy-two persons, of the returned exiles (Ezra ii. 4, 57).

The same name, with a slight variation in the original (שֶׁפְּתִיָּה), but not in the A. V., occurs in the following:

5. A son of king Jehoshaphat (2 Chron. xxi. 2).

6. One of the chief of those valiant men who went to David when at Ziklag (1 Chron. xii. 5).

7. The governor of the tribe of Simeon in the time of David (1 Chron. xxvii. 16).

SHEPHELAH, THE (שֶׁפְּלָהָה), the native name of the tract of country lying between the highlands of Judæa and the Mediterranean, to the south of

Sharon. In the Onomasticon it is described as the region round Eleutheropolis on the north and west (s. v. *Sephela*). In the A. V. the word is invariably treated as an appellative, and is rendered by 'vale,' 'valley,' 'plain,' 'low plains,' 'low country' (Deut. i. 7; Josh. ix. 1; x. 40; xi. 2, 16; xii. 8; xv. 33; Judg. i. 9; 1 Kings x. 27; 1 Chron. xxvii. 28; 2 Chron. i. 15; ix. 27; xxvi. 10; xxviii. 18; Jer. xvii. 26; xxxii. 44; xxxiii. 13; Obad. 19; Zech. vii. 7). In 1 Maccab. xii. 38 the Greek form of the word *Sephela* (Σεφέλα) is retained in the A. V.

In Josh. xv. 33-47 the cities in the Shephelah are enumerated. They are presented in four groups; the first (33-36) comprising those situated in the hilly region at the northern end of the plain; the second (37-41) those of the plain itself; the third (42-44) those in the southern part of the hill-region; and the fourth (45-47) those on the coast of Philistia. This shows that the term *Shephelah* did not originally denote a plain, or that if it did it was used in this instance to denote not only the plain but the hills inclosing it [PLAINS; PHILISTIA; PHILISTINES].—W. L. A.

#### SHEPHERD. [PASTURAGE.]

SHEPHIPHON (שִׁפְפוֹן) is a viper with two scales on the head, one above each eye, standing erect somewhat in the form of horns. This is a dangerous species, usually burrowing in sand near the holes of jerboas, and occasionally in the cattle-paths; for there are now few or no ruts of cart-wheels, where it is pretended they used to conceal themselves to assault unwary passers. It is still common in Egypt and Arabia. The other species is the *Eryx* *Cerastes* of Daudin, also small, having no movable poison-fangs, but remarkable for two very long back teeth in the lower jaw, which pass through the upper jaw, and appear in the shape of two white horns above its surface. It is known to the Egyptian Arabs by the name of Harbagi, which may be a distortion of *Ophis* in Horapollo, and is classed by Hasselquist among slow-worms, because in form the tail does not taper to a point. Its colours are black and white marblings, and the eyes being lateral and very near the snout the species has an exceedingly sinister aspect, which may be the cause of the ancient opinion that the

מֶלֶכָה *melekeh*, or basilisk, for we take it for this species, killed with its looks, and had a pointed crown on the head: now serpents in the form of slow-worms, reputed to kill by their sight, are evidently not rapid in their movements.—C. H. S.

#### SHEPHUPHAN. [MUPPIM.]

SHESH (שֵׁשׁ), also SHESHI, translated *fine linen* in the A. V., occurs twenty-eight times in Exodus, once in Genesis, once in Proverbs, and three times in Ezekiel. Considerable doubts have, however, always been entertained respecting the true meaning of the word; some have thought it signified *fine wool*, others *silk*; the Arabs have translated it by words referring to colours in the passages of Ezekiel and of Proverbs. Some of the Rabbins state that it is the same word as that which denotes the number six, and that it refers to the number of threads of which the yarn was composed. Thus Abarbanel on Gen. xxv. says: 'Schesh est linum Ægyptiacum, quod est preti-

osissimum inter species lini. Quum vero tortum est sex filis in unum, vocatur *schesh*, aut *schesh moschisar*. Sin ex unico filo tantum, dicitur *bad*' (Cels. *Hierobot.* ii. p. 260). This interpretation, however, has satisfied but few. The Greek Alexandrian translators used the word βύσσως, which by some has been supposed to indicate 'cotton,' and by others 'linen' [Byssus].

In the several passages where we find the word *Shesh* used, we do not obtain any information respecting the plant; but it is clear it was spun by women (Exod. xxx. 25), was used as an article of clothing, also for hangings, and even for the sails of ships, as in Ezekiel xxvii. 7. It is evident from these facts that it must have been a plant known as cultivated in Egypt at the earliest period, and which, or its fibre, the Israelites were able to obtain even when in the desert. As cotton does not appear to have been known at this very early period, we must seek for *shesh* among the other fibre-yielding plants, such as flax and hemp. Both these are suited to the purpose, and were procurable in those countries at the times specified. Lexicographers do not give us much assistance in determining the point, from the little certainty in their inferences. The word *shesh*, however, appears to us to have a very great resemblance, with the exception of the aspirate, to the Arabic name of a plant, which, it is curious, was also one of those earliest cultivated for its fibre, namely *hemp*.

Of this plant, one of the Arabic names is حشيش

*husheesh*, or the herb *par excellence*, the term being sometimes applied to the powdered leaves only, with which an intoxicating electuary is prepared. This name has long been known, and is thought by some to have given origin to our word *assassin* or *hassasin*. Makrizi treats of the hemp in his account of the ancient pleasure-grounds in the vicinity of Cairo, 'famous above all for the sale of the *hasheesh*, which is still greedily consumed by the dregs of the people, and from the consumption of which sprung the excesses, which led to the name of 'assassin' being given to the Saracens in the holy wars.'

Hemp is a plant which in the present day is extensively distributed, being cultivated in Europe, and extending through Persia to the southernmost parts of India. There is no doubt, therefore, that it might easily have been cultivated in Egypt. We are, indeed, unable at present to prove that it was cultivated in Egypt at an early period, and used for making garments, but there is nothing improbable in its having been so. Indeed, as it was known to various Asiatic nations, it could hardly have been unknown to the Egyptians. Hemp might thus have been used at an early period, along with flax and wool, for making cloth for garments and for hangings, and would be much valued until cotton and the finer kinds of linen came to be known.

So many words are translated *linen* in the A. V. of the Scriptures, that it has been considered doubtful whether they indicate only different qualities of the same thing, or totally different substances. The latter has by some been thought the most probable, on account of the poverty of the Hebrew language; hence, instead of considering the one a synonym of the other, we have been led to inquire, as above, whether *shesh* may not signify cloth made of *hemp* instead of flax. This would leave *bad* and

*pishtah* as the only words peculiarly appropriated to *linen* and *flax*. The passages in which *bad* occurs have already been indicated [BYSSUS]. On referring to them we find that it is used only when articles of clothing are alluded to. It is curious, and probably not accidental, that the Sanscrit word *pat* signifies cloth made from flax-like substances. It has been remarked that the official garments of the Hebrews, like those of the Egyptians, were all made of linen; and we find in the several passages where *bad* occurs that linen garments and clothes, linen breeches, linen girdle, linen ephod, linen mitre, are intended; so in Exod. xxxix. 28, and they made for Aaron and his sons 'a mitre of fine linen, and goodly bonnets of fine linen, and linen breeches of fine twined linen.' There is reason to believe that the mummy-cloths are composed very generally, if not universally, of linen cloth.—J. F. R.

SHESHACH (שֶׁשַׁח), a name twice given by Jeremiah to Babylon (Jer. xxv. 26; li. 41). Its etymology and proper signification are doubtful. The Jewish interpreters, followed by Jerome, suppose שֶׁשַׁח, *Sheshach*, to stand for בָּבֶל, *Babel*, according to the secret or cabalistic mode of writing called *athbash*, in which the alphabet is inverted, so that ת, the last letter, is put for א, the first; ש, the penultimate letter, for ב, the second, and so on; and this they suppose was done by the prophet for fear of the Chaldeans. But Gesenius very properly asks, even supposing these cabalistic mysteries of trifling had been already current in the time of Jeremiah, which cannot by any means be admitted, how comes it to pass that Babylon is in the very same verse mentioned under its own proper name? C. B. Michaelis ingeniously conjectures that שֶׁשַׁח comes from שִׁכְשַׁח, *shikshach*, 'to overlay with iron or other plates,' so that it might designate Babylon as χαλκόπυλος. Von Bohlen thinks the word synonymous with the Persian *Shih-Shah*—i.e. 'house of the prince;' but it is doubtful whether, at so early a period as the age of Jeremiah, Babylon could have received a Persian name that would be known in Judæa.—J. K.

SHESHAN (שִׁשָּׁן, *lily*; Sept. Σωσαν), a Hebrew who, during the sojourn in Egypt, gave his daughter in marriage to his freed Egyptian slave (1 Chron. ii. 34). [JARHAH.]

SHESHBAZZAR. [ZERUBBABEL.]

SHETHAR (שֶׁתָּר; Pers., *a star*; Sept. Σαθραβαῖος), one of the seven princes of Persia and Media, 'who saw the king's face, and sat the first in the kingdom' (Esther i. 14; comp. Ezra vii. 14).

SHETHAR-BOZNAI (שֶׁתָּר בּוֹזְנַי; Pers., *shining star*; Sept. Σαθαρβουζαναῖ), one of the Persian governors in Syria who visited Jerusalem in company with Tatnai, to investigate the charges made against the Jews (Ezra v. 3; vi. 6). [TATNAI.]

SHEVA. [SERAIAM.]

SHEW-BREAD. In the outer apartment of the tabernacle, on the right hand, or north side, stood a table, made of acacia (shittim) wood, two cubits long, one broad, and one and a half high, and covered with laminae of gold. The top of the leaf of this table was encircled by a border or rim of gold. The frame of the table, immediately

below the leaf, was encircled with a piece of wood of about four inches in breadth, around the edge of which was a rim or border, similar to that around the leaf. A little lower down, but at equal distances from the top of the table, there were four rings of gold fastened to the legs, through which staves covered with gold were inserted for the purpose of carrying it (Exod. xxv. 23-28; xxxvii. 10-16). These rings were not found in the table which was afterwards made for the temple, nor indeed in any of the sacred furniture, where they had previously been, except in the ark of the covenant. Twelve unleavened loaves were placed upon this table, which were sprinkled with frankincense (the Sept. adds salt; Lev. xxiv. 7). The number twelve represented the twelve tribes, and was not diminished after the defection of ten of the tribes from the worship of God in his sanctuary, because the covenant with the sons of Abraham was not formally abrogated, and because there were still many true Israelites among the apostatising tribes. The twelve loaves were also a constant record against them, and served as a standing testimonial that their proper place was before the forsaken altar of Jehovah.

The loaves were placed in two piles, one above another, and were changed every Sabbath-day by the priests. The frankincense that had stood on the bread during the week was then burnt as an oblation, and the removed bread became the property of the priests, who, as God's servants, had a right to eat of the bread that came from his table; but they were obliged to eat it in the holy place, and nowhere else. No others might lawfully eat of it; but in a case of extreme emergency the priest incurred no blame if he imparted it to persons who were in a state of ceremonial purity, as in the instance of David and his men (1 Sam. xxi.

4-6; Matt. xii. 4). The bread was called לֶחֶם פָּנִים, 'the bread of the face,' or 'of the presence,' because it was set forth before the face or in the presence of Jehovah in his holy place.\* This is translated 'shew-bread.' It is also called לֶחֶם הַמַּעֲרֹכָה, 'the bread arranged in order,' and לֶחֶם הַמִּיד, 'the perpetual bread,' because it was never absent from the table (Lev. xxiv. 6, 7; 1 Chron. xxiii. 29).

Wine also was placed upon the table of 'shew-bread,' in bowls, some larger, קַעֲרוֹת, and some smaller, כַּפּוֹת, also in vessels that were covered, קַשּׁוֹת, and in cups, מִנְקִיּוֹת, which were probably

\* [But so were *all* the objects within the sanctuary, and there seems no reason for specifically affixing this description to the shew-bread if nothing more is intended to be conveyed by it than simply that the bread was set forth before the Lord. It is probable that a deeper symbolical meaning is intended by the phrase. The 'bread of the presence,' like 'the angel of the presence' (Is. lxiii. 9), was probably so called because in some special manner it betokened or symbolised God's presence with his people. Was it not intended to be a perpetual memorial to Israel that God is the support, the sustenance, the strength of his people; that it is his presence with them that gives them spiritual nourishment, even as bread sustains and nourishes the body? (Comp. Bähr, *Symbolik des Mos. Cult.* i. 425, ff.)—ED.]

employed in pouring in and taking out the wine from the other vessels, or in making libations. Gesenius calls them 'pateræ libatoriae'; and they appear in the A. V. as 'spoons' (see generally Exod. xxv. 29, 30; xxxvii. 10-16; xl. 4, 24; Lev. xxiv. 5-9; Num. iv. 7).—J. K.

**SHIBBOLETH** (שִׁבּוֹלֶת). The word means a stream or flood, and was hence naturally suggested to the followers of Jephthah, when, having seized the fords of the Jordan to prevent the retreat of the defeated Ephraimites, they sought to distinguish them through their known inability to utter the aspirated sound *sh*. The fugitives gave instead the unaspirated *s*, *sibboleth*, on which they were slain without mercy (Judg. xii. 6). The certainty which was felt that the Ephraimites could not pronounce *sh* is very remarkable, and strongly illustrates the varieties of dialect which had already arisen in Israel, and which perhaps even served to distinguish different tribes, as similar peculiarities distinguish men of different counties with us. If what is here mentioned as the characteristic of a particular tribe had been shared by other tribes, it would not have been sufficiently discriminating as a test. [HEBREW LANGUAGE].—J. K.

**SHIBMAH**, or more properly **SIBMAM** (שִׁבְמָה; Σεβμάδ; *Sebamad*), a city, occupied and rebuilt by the Reubenites (Num. xxxii. 38). It was situated on the plateau east of the Dead Sea. It originally belonged to that section of the territory of Moab which was captured by the Amorites under Sihon (Num. xxi. 26). From the Amorites Moses took it, and gave it to the children of Reuben (xxxii. 1, *seq.*) Shibmah is grouped with Heshbon and Nebo, and must consequently have stood near the western brow of the plateau. A comparison of Num. xxxii. 38 with ver. 3 of the same chapter shows that Shibmah and *Shebam* are identical. The only difference in the Hebrew words is the addition of the fem. termination to the former. They are both rendered Σεβμάδ in the LXX.; but the Vulgate has *Saban* for Shebam.

In Josh. xiii. 19, the A. V. reads Sibmah, which is the proper pronunciation of the Hebrew according to the Masoretic pointing. It is unquestionably the same place which Isaiah mentions in his lamentation over Moab: 'The fields of Heshbon languish, and the vine of Sibmah' (xvi. 8, 9). The environs, it appears, were famous for their vineyards; and Jeremiah, when predicting the desolation of Moab, laments in the same strain: 'O vine of Sibmah, I will weep for thee. . . I have caused wine to fail from the winepress; none shall tread with shouting' (xlviii. 32, 33).

It will be observed that these prophets speak of the city as belonging to Moab, whereas in the books of Numbers and Joshua it is enumerated among the cities of Reuben. The reason is, on the captivity of the transjordanic tribes by the Assyrians, the Moabites returned to their ancient possessions, and reoccupied their ancient cities, and among them Sibmah [MOAB]. Though Eusebius mentions the name in his *Onomasticon*, it does not appear that he knew anything of it (s.v. *Sebama*); but Jerome (*Comment. in Isai.* xvi. 8) says, 'Inter Esbon et Sabama vix quingenti passus sunt.' He must have known the place therefore; and from the way in which it is grouped in the Bible it seems to have been on the south or south-west of Hesh-

bon; but even the minute researches of De Saulcy, in his recent tour through that country, have failed to discover a trace of it. There are several nameless ruins mentioned by him and noted in his map, one or other of which may mark the site (*Voyage en Terre Sainte*, i. pp. 277, *seq.*) It is interesting to observe, however, that around Heshbon he found traces of the vineyards for which the region was once celebrated; and that from the lips of the Bedawin both he and Tristram (*Land of Israel*, p. 535) heard the name *Neba* given to a mountain-peak a short distance south-west of Heshbon [NEBO].—J. L. P.

**SHICRON** (שִׁכְרוֹן, 'drunkenness'; Σοκρώς; Alex. Ἀκκαρών; *Sechirona*), a town on the northern border of Judah, mentioned only in Josh. xv. 11. It is located between Ekron and Jabneel, and apparently very close to the former, as it lay between it and the low range of Mount Baalah, which is only a very short distance west of Ekron (*Handbook*, p. 275). The writer was unable to discover any trace of this old town. It appears to have been unknown to Eusebius (*Onomast.* s.v. 'Sacharona').—J. L. P.

**SHIELD**. [ARMS.]

**SHIGGAION**. [PSALMS.]

**SHIHOR** and **SIHOR** (שִׁיחֹר, 'dark' or 'turbid,' from the root שָׁחַר; δολιχῆρος; *fluvius turbidus*; ὄρια; *Sihor*; μεταβολή; *Nilus*; Ἰγών; *aque turbide*), one of the names given to the river Nile, probably arising from its dark and turbid waters, like the Greek Μῆλας (Gesen. *Thesaurus*, p. 1393). The word is variously rendered in the Sept. and Vulgate, as seen above; and there is some little doubt as to its exact meaning in every passage in which it occurs—whether it is applied to the Nile, the river of Egypt, or to Wady-el-Arish, the torrent of Egypt [RIVER]. It is plain that in Is. xxiii. 3, it must be identical with יְאֹר, the Egyptian name of the Nile: 'And in great waters the fruit of *Shihor*, the harvest of *Yeor*, was her revenue'; so also in Jer. ii. 18 it must likewise mean the Nile, which forms the all but exclusive drink of the Egyptians.

There may be more doubt about the other two passages in which the name occurs. In 1 Chron. xiii. 5 it is mentioned as the southern boundary of David's kingdom: 'David gathered all Israel, from Shihor of Egypt even unto the entering of Hemath.' At this period the kingdom of Israel was at the highest pitch of its prosperity. David's rule extended over a wider space than any other monarch who ever sat upon the throne; and 'probably as an evidence of this fact, and as a recognition of the fulfilment of the divine promise to Abraham—'Unto thy seed have I given this land, from the river of Egypt unto the great river, the river Euphrates'—the sacred historian may here have meant the Nile. Yet in other places, where the northern boundary is limited to the 'entrance of Hamath,' the southern is usually 'the torrent of Egypt,' that is, Wady (נהל, not נהר) el-Arish (Num. xxxiv. 5; 1 Kings viii. 65).

The passage in Josh. xiii. 3 is even more obscure. The sacred writer is describing the territory still remaining to be conquered at the close of his life, and when about to allot the conquered portion to

the tribes: 'This is the land that yet remaineth: all the borders of the Philistines and all Geshuri,

from *Sihor*, which is before (על־פני, 'in the face of; not 'east of,' but rather 'on the front of') Egypt, even unto the borders of Ekron northward.' Keil argues that Wady el-Arish, and not the Nile, must here be meant (*ad loc.*); but his arguments are not conclusive. Joshua may have had the Lord's covenant promise to Abraham in view; if so, Sihor means the Nile; but, on the other hand, if he had the boundaries of the land as described by Moses in Num. xxxiii. 5, *seq.*, in view, then Sihor must mean Wady el-Arish. It is worthy of note, that while in all the other passages in which this word is used, it is anarthrous, here it has the article. This does not seem to indicate any specific meaning; for it can scarcely be doubted that here and in 1 Chron. xiii. 5 the word is employed in the same sense. Gesenius considers that Sihor, wherever used, means the Nile; and upon a careful consideration of the several passages, and of the etymology of the word, the writer is of opinion that it cannot appropriately be applied to Wady el-Arish, and must therefore be regarded as a name of the river Nile (see Ges. *Thes.* p. 1393; Jerome, *ad Isa.* xxiii. 3; Reland, *Pal.* p. 286).—J. L. P.

SHIHOR-LIBNATH (שִׁיחֹר לִבְנָת; δ Σιῶν καὶ Λαβανῶν; Alex. Σῶρ κ. Λ.; *Sihor et Labanath*), a river or stream, as appears from the etymology of the word, on the southern boundary of the tribe of Asher, near Carmel. It is only mentioned in Josh. xix. 26. Gesenius suggests that the river Belus, now called Nahr Namân, is meant, because on its banks glass was first made; and the word *Libnath* may probably refer to that fact, as it signifies 'whiteness' (*Thes.* p. 1393). This is a very questionable theory; and the Belus seems to be too far north for the requirements of the words of Joshua. Reland would identify Shihor-Libnath with the Crocodile river between Carmel and Caesarea, because the Nile is called Shihor, and it contains crocodiles; and hence a similar name was given to this stream, which was also supposed to contain them (*Pal.* p. 289). This view is still more fanciful than the preceding. Perhaps the sacred writer may have given this name to some little town upon the banks of one of the streamlets which fall into the Mediterranean between Carmel and Dor. The sand there is white and glistening, and for a town built upon the bank of one of the streams the name Shihor-Libnath would be appropriate.—J. L. P.

SHIKMOTH (שִׁקְמוֹת) and SHIKMIM (שִׁקְמִים), translated 'sycamore,' occur in several passages of the O. T., but always in the plural. From the context it is evident that it must have been a tree of some size, common in the plains, unable to bear great cold, with wood of inferior quality, but still cultivated and valued on account of its fruit. It was not what is called sycamore in this country, which is a kind of maple, and in some of its characters the reverse of what is required; but the tree which was called *συκῆμορος* by the Greeks (from *συκῆ*, a fig, and *μόρος*, the mulberry tree), and which is the *Ficus Sycomorus* of botanists, being a genuine species of *Ficus*, to which the ancient name has been added as the specific one. The fruit in its general characters

resembles that of the fig, while the leaves resemble those of the mulberry tree.

The ancients were well acquainted with it; and it is common in Egypt as well as in Syria. In Egypt, being one of the few trees indigenous in that country, its wood was proportionally much employed, as in making mummy-cases, though it is coarse-grained, and would not be valued where other trees are more common (comp. Is. ix. 10; 1 Kings x. 27; 2 Chron. i. 15). The sycamore being a tree abundant in Egypt, must necessarily be one suited to plains and vales, and hence would also be one likely to be injured by cold (comp. Ps. lxxviii. 47). That the sycamore was cultivated and esteemed in Palestine we learn from 1 Chron. xxvii. 28: 'And over the olive trees and the *sycamore* trees that were in the low plains was Baalhanan the Gederite.' This was on account of its fruit, which it bears on its stem and branches, like the common fig, and continues to produce in succession for months. The fruit is palatable, sweetish in taste, and still used as food in the East.

476. Sycamore-Fig. (*Ficus Sycomorus*.)

One mode of ripening the fruit is supposed to be alluded to in Amos vii. 14: 'I was an herdsman, and a *gatherer* of sycamore fruit;' but the latter part of the sentence is understood to mean 'scraping or making incisions in the sycamore fruit,' and to refer to the practice mentioned by Hasselquist as existing even in modern times. When the fruit has reached the size of an inch in diameter, the inhabitants pare off a part at the centre point. They say that without this operation it would not come to maturity. The same practice is mentioned by Theophrastus and Pliny, etc. As the sycamore is a lofty, shady tree, it was well suited for climbing up into, as described in Luke xix. 4, where Zacchæus ascends one to see Jesus pass by.—J. F. R.

SHILHIM. [SHARUHEN.]

SHILOAH. [SILOAM.]

SHILOH (שִׁילֹה), the epithet applied, in the prophetic benediction of Jacob on his death-bed

(Gen. xlix. 10), to the personage to whom 'the gathering of the nations should be,' and which has ever been regarded by Christians and by the ancient Jews as a denomination of the Messiah. The oracle occurs in the blessing of Judah, and is thus worded: 'The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh come: and unto him the gathering of the people shall be.' The term itself, as well as the whole passage to which it belongs, has ever been a fruitful theme of controversy between Jews and Christians; the former, although they admit for the most part the Messianic reference of the text, being still fertile in expedients to evade the Christian argument founded upon it. Neither our limits nor our object will permit us to enter largely into the theological bearings of this prediction; but it is perhaps scarcely possible to do justice to the discussion as a question of pure philology, without at the same time displaying the strength of the Christian interpretation, and trenching upon the province occupied by the proofs of Jesus of Nazareth being the Messiah of the O. T. prophecies.

Before entering upon the more essential merits of the question, it may be well to recite the ancient versions of this passage, which are mostly to be referred to a date that must exempt them from the charge of an undue bias towards any but the right construction. Influences of this nature have, of course, become operative with Jews of a later period. The version of the Sept. is peculiar: 'A prince shall not fail from Judah nor a captain out of his loins, *ὅς ἀν ἐλθῇ τὰ ἀποκείμενα αὐτῷ, until the things come that are laid up for him.*' In some copies another reading is found, *ὃς ἀποκείται, for whom it is laid up;* meaning doubtless in the kingdom—for whom the kingdom is laid up in reserve. This rendering is probably to be referred to an erroneous lection, *אִשֶּׁר לוֹ, whose it is.* Targ. Onk.: 'One having the principality shall not be taken from the house of Judah, nor a scribe from his children's children, until the Messiah come, whose the kingdom is.' Targ. Jerus.: 'Kings shall not fail from the house of Judah, nor skilful doctors of the law from their children's children, till the time when the King's Messiah shall come.' Syr.: 'The sceptre shall not fail from Judah, nor an expounder from between his feet, till he come whose it is;' i.e. the sceptre, the right, the dominion. Arab.: 'The sceptre shall not be taken away from Judah, nor a lawgiver from under his rule, until he shall come whose it is.' Sam.: 'The sceptre shall not be taken away from Judah, nor a leader from his banners, until the Pacific shall come.' Lat. Vulg.: 'The sceptre shall not be taken away from Judah, nor a leader from his thigh—donec veniet qui mittendus est, *until he shall come who is to be sent.*' This is evidently founded

upon mistaking in the original שִׁלֹּה שִׁלָּח, which latter comes from the root שָׁלַח, signifying to send. It is, however, adopted by Grotius as the truest reading, the present form of the word being owing, in his opinion, to the error of transcribers in substituting ה for ח.

Various other etymologies have been assigned to the term, the advocates of which may be divided into two classes: those who consider the word שִׁלָּה as a compound; and those who deem it a radical or simple derivation. Those of the first class coincide,

for the most part, with the ancient interpreters, taking שִׁלָּה as equivalent to שָׁלוּ, and this to be made up of ש, the contraction of אִשֶּׁר, *who*, and לוֹ, the dative of the third personal pronoun. The rendering, accordingly, in this case, would be *cujus est, or cui est, whose it is, to whom it belongs*—i.e. the sceptre or dominion. This interpretation is defended by Jahn (*Eint. in A. T.* i. p. 507, and *Vat. Mes.* ii. p. 179). It is approved also by Hess, De Wette, Krummacher, and others. The authority of the ancient versions, already alluded to, is the principal ground upon which its advocates rely. But to this sense it is a serious objection, that there is no evidence that the abbreviation of אִשֶּׁר into ש was known in the time of Moses. There is no other instance of it in the Pentateuch, and it is only in the book of Judges that we first meet with it. However the rendering of the old translators is to be accounted for, there is no sufficient ground for the belief that the form in question was the received one in their time. If it was, we should doubtless find some traces of it in existing manuscripts.

But though these copies exhibit the reading שִׁלֹּה, not one of them gives שָׁלוּ, and but very few שִׁלָּה: which Hengstenberg deems of no consequence, as the omission of the *yod* was merely a defective way of writing, which often occurs in words of similar structure. An argument for this interpretation has indeed been derived from Ezek. xxi. 27, where the words, 'until he shall come, whose is the dominion, אִשֶּׁר לוֹ הַמּוֹשֵׁב, are regarded as an obvious paraphrase of שָׁלוּ or שִׁלָּה. But to this it may be answered, that while Ezekiel may have had the present passage in his eye, and intended an allusion to the character or prerogatives of the Messiah, yet there is no evidence that this was designed as an interpretation of the name under consideration. The reasons, therefore, appear ample for setting aside, as wholly untenable, the explication of the time here propounded, without adverting to the fact that the ellipsis involved in this construction is so unnatural and violent, that no parallel to it can be found in the whole Scriptures.

Another solution proposed by some expositors is, to derive the word שִׁלָּה from שָׁלַח, *child*, and the suffix ה for י. This will yield the reading, 'until his (Judah's) son or descendant, the Messiah, shall come.' Thus the Targ. Jon.: 'Until the time when the King's Messiah shall come, *the little one of his sons.*' This view is favoured by Calvin (*in loc.*) and by Knapp (*Dogn.* ii. p. 138), and also by Dathe. But as this resolves שִׁלָּה into a synonym with שָׁלוּ, *after-birth* (Deut. xxviii. 57), rendered 'young one,' it requires us to adopt the unnatural supposition, that the term properly denoting the *secundines*, or the membrane that encloses the foetus, is taken for the foetus itself. Besides, this exposition has an air of grossness about it which prompts its involuntary rejection.

The second class consists of those who consider שִׁלָּה as a radical or simple derivative. Of these we may remark, that it is principally among the Jews that the opinion of Aben Ezra finds currency, who makes שִׁלָּה here to be the name of the place (Shiloh) where the tabernacle was first fixed after the conquest of Canaan. The sense of the oracle,

who grievously insulted king David when he fled from Absalom (2 Sam. xvi. 5-13). The king not only saved him from the immediate resentment of his followers, but on his triumphant return by the same road after the overthrow of his rebellious son, he bestowed on Shimei the pardon which he implored (2 Sam. xix. 16). It seems, however, that it was policy which chiefly dictated this course, for it was by the advice of David himself (1 Kings ii. 8, 9) that Solomon, after his father's death, made Shimei a prisoner at large in Jerusalem (1 Kings ii. 36, 37). Three years after he broke his parole by leaving Jerusalem in pursuit of some runaway slaves, and was, on his return, put to death by order of the king (1 Kings ii. 39-46).—J. K.

SHIMRON (שִׁמְרוֹן; Συμρών; Alex. Σεμρών, and Σομερών; *Semeron*), one of the ancient cities of Canaan, whose king joined with Jabin, king of Hazor, in the attempt to resist the conquests of Joshua (Josh. xi. 1). The position of the city is not stated; it can only be inferred that it was situated somewhere in the north of Palestine. It is, however, in all probability the same place which, as is stated in Josh. xix. 15, was allotted to Zebulun, and is grouped with Idalah and Bethlehem. The site of Bethlehem is known. It is about six miles west of Nazareth. Guided by the Vatican MS. of the Septuagint, we might identify Shimron with the village of *Simónieh*, which stands about two miles south-east of Bethlehem. Under its Greek name, *Simonias*, it is mentioned in the Life of Josephus as a village of Galilee (*Vita*, 24). The position, as well as the name, favours the identity; and the same view is taken by the Jewish Rabbins (See Ges. *Thes.* 1445).

In Josh. xii. 20 the king of SHIMRON-MERON (שִׁמְרוֹן מֶרֶוֹן; Alex. Ἀμαρών; *Semeron*) is mentioned among those conquered by the Israelites. Probably the same city is meant. According to the tradition, however, existing among the Jews of Safed, Shimron-Meron is identical with the sacred village of *Meiron*, where the tombs of the Rabbis Hillel and Shammai are still preserved and honoured (Wilson, *Lands of the Bible*, ii. 313). Reland maintains, on the other hand, that Shimron and Shimron-meron are identical, and, according to the Talmudical writers, are now represented by Semunieh (*Pal.* p. 1017). On the whole, this seems more probable.—J. L. P.

SHINAR (שִׁנְעַר; Sept. Σεναρ, *Sennaar*), the district of country in which were the cities of Babel (Babylon), Erech (Orchoi), Calneh (probably Niffer), and Accad. It was a level country, where 'they had brick for stone, and slime [bitumen] used they for mortar' (Gen. xi. 2, 3). These facts identify it with the district afterwards known as Babylonia, of which Shinar was probably the primitive name. Of the name itself no satisfactory explanation has been given [BABYLONIA].—W. L. A.

SHIP. In few things is there greater danger of modern associations misleading the reader of the Scriptures than in regard to the subject of the present article. To an Englishman a ship calls up the idea of 'the wooden walls of old England,' which have so long withstood the 'battle and the breeze,' and done so much to spread the fame and the in-

fluence of the British nation throughout the world. But both the ships and the navigation of the ancients, even of the most maritime states, were as dissimilar as things of the same kind can well be to the realities which the terms now represent. Navigation confined itself to coasting; or if necessity, foul weather, or chance drove a vessel from the land, a regard to safety urged the commander to a speedy return, for he had no guide but such as the stars might afford under skies with which he was but imperfectly acquainted. And ships, whether designed for commercial or warlike purposes, were small in size and frail in structure, if our immense piles of oak and iron be taken as the objects of comparison.

The Jews cannot be said to have been a seafaring people; yet their position on the map of the world is such as to lead us to feel that they could not have been ignorant of ships and the business which relates thereunto. Phœnicia, the north-western part of Palestine, was unquestionably among, if not at the head of the earliest cultivators of maritime affairs. Then the Holy Land itself lay with one side coasting a sea which was anciently the great highway of navigation, and the centre of social and commercial enterprise. Within its own borders it had a navigable lake. The Nile, with which river the fathers of the nation had become acquainted in their bondage, was another great thoroughfare for ships. And the Red Sea itself, which conducted towards the remote east, was at no great distance even from the capital of the land. Then at different points in its long line of sea-coast there were harbours of no mean repute. Let the reader call to mind Tyre and Sidon in Phœnicia, and Acre (Acco) and Jaffa (Joppa) in Palestine. Yet the decidedly agricultural bearing of the Israelitish constitution checked such a development of power, activity, and wealth, as these favourable opportunities might have called forth on behalf of seafaring pursuits. There can, however, be no doubt that the arts of shipbuilding and of navigation came to Greece and Italy from the East, and immediately from the Levant; whence we may justifiably infer that these arts, so far as they were cultivated in Palestine, were there in a higher state of perfection, at an early period at least, than in the more western parts of the world (Ezek. xxvii.; Strabo, lib. xvi.; Comenz, *De Nave Tyriâ*). In the early periods of their history the Israelites themselves would partake to a small extent of this skill and of its advantages, since it was only by degrees that they gained possession of the entire land, and for a long time were obliged to give up the sovereignty of very much of their seaboard to the Philistines and other hostile tribes. The earliest history of Palestinian ships lies in impenetrable darkness, so far as individual facts are concerned. In Gen. xlix. 13 there is, however, a prophecy, the fulfilment of which would connect the Israelites with shipping at an early period: 'Zebulun shall dwell at the haven of the sea, and he shall be for a haven of ships, and his border shall be unto Zidon' (comp. Deut. xxxiii. 19; Josh. xix. 10, *seq.*): words which seem more fitly to describe the position of Asher in the actual division of the land. These local advantages, however, could have been only partially improved, since we find Hiram, king of Tyre, acting as carrier by sea for Solomon, engaging to convey in floats to Joppa the timber cut in Lebanon for the temple, and leaving to the

Hebrew prince the duty of transporting the wood from the coast to Jerusalem. And when, after having conquered Elath and Ezion-geber on the further arm of the Red Sea, Solomon proceeded to convert them into naval stations for his own purposes, he was still, whatever he did himself, indebted to Hiram for 'shipmen that had knowledge of the sea' (1 Kings ix. 26; x. 22). The effort, however, to form and keep a navy in connection with the East was not lastingly successful; it soon began to decline, and Jehoshaphat failed when at a later day he tried to give new life and energy to the enterprise (1 Kings xxii. 49, 50).

In the time of the Maccabees Joppa was a Jewish seaport (1 Maccab. xiv. 5). Herod the Great availed himself of the opportunities naturally afforded to form a more capacious port at Cæsarea (Joseph. *De Bell. Jud.* iii. 9. 3). Nevertheless no purely Jewish trade by sea was hence even now called into being. Cæsarea was the place whence Paul embarked in order to proceed as a prisoner to Rome (Acts xxvii. 2). His voyage on that occasion, as described most graphically in the Acts of the Apostles (ch. xxvii. xxviii.), if it requires some knowledge of ancient maritime affairs in order to be rightly understood, affords also rich and valuable

materials towards a history of the subject, and might, we feel convinced, be so treated as of itself to supply many irresistible evidences of the certainty of the events therein recorded, and, by warrantable inferences, of the credibility of the evangelical history in general. No one but an eyewitness could have written the minute, exact, true, and graphic account which these two chapters give.

The reader of the N. T. is well aware how frequently he finds himself with the Saviour on the romantic shores of the sea of Gennesareth. There Jesus is seen, now addressing the people from on board a vessel, *πλοῖον* (Matt. xiii. 2; Luke v. 3); now sailing up and down the lake (Matt. viii. 23; ix. 1; xiv. 13; John vi. 17). Some of his earliest disciples were proprietors of barks which sailed on this inland sea (Matt. iv. 21; John xxi. 3; Luke v. 3). These 'ships' were indeed small. Josephus designates the ships here employed by the term *σκάφη*. They were not, however, mere boats. They carried their anchor with them (*De Bell. Jud.* iii. 10. 1; *Vit.* xxxiii.) There was too a kind of vessel larger than this, called *σχεδια* by Josephus, who narrates a sea-fight which took place on the lake, conducted on the part of the Romans by Vespasian himself (*De Bell. Jud.* iii. 10. 9). It

477. Ancient Ship of the largest kind.

thus appears that the lake was not contemptible, nor its vessels mean; and those should hence learn to qualify their language who represent the Galilean fishermen as of the poorest class.

478. Ancient Light-vessel, Pompeii.

The vessels connected with Biblical history were for the most part ships of burden, almost indeed exclusively so, at least within the period of known historical facts, though in a remote antiquity the

Phœnician states can hardly fail to have supported a navy for warlike, as it is known they did for predatory purposes. This peculiarity, however, of the Biblical ships exonerates the writer from entering into the general subject of the construction of ancient ships and their several sub-divisions. A good general summary on that head may be found in Smith's *Dictionary of Greek and Roman Antiquities*, p. 875, *seq.* A few details respecting chiefly ships of burden may be of service to the Scriptural student. In a ship of this kind was Paul conveyed to Italy. They (*naves onerariæ*) were, for the purposes to which they were destined, rounder and deeper than ships of war, and sometimes of great capacity. In consequence of their bulk, and when laden, of their weight, they were impelled by sails rather than by oars. On the prow stood the insignia from which the ship was named, and by which it was known. These in Acts (xxviii. 11) are called *παράσημον*, 'sign,' which it appears consisted in this case of figures of Castor and Pollux—*lucida sidera*—brilliant constellations, auspicious to navigators (Horat. *Od.* i. 3; Liv. xxxvii. 92; Tac. *Ann.* vi. 34; Ovid. *Trist.* i. 10. 1). Each ship was provided with a boat, intended in the case of peril to facilitate escape,

σκάφη (Acts xxvii. 16, 30, 32; Cic. *De Invent.* ii. 51); and several anchors (Acts xxvii. 29, 40; Cæs. *Civ.* i. 25); also a plumb-line for sounding (Acts xxvii. 28; Isidor. *Orig.* xix. 4). Among the sails one bore the name of ἀπρέμων, translated in Acts xxvii. 40, by 'mainsail;' but possibly the word may rather mean what is now termed the 'topsail' (*Schol. ad Juven.* xii. 68). In great danger it was customary to gird the vessel with cables, in order to prevent her from falling to

479. Ancient Anchors.

pieces under the force of wind and sea (Acts xxvii. 17; Polyb. xxvii. 3. 3; Athen. v. 204; Hor. *Od.* i. 14. 6). The various expedients that were employed in order to prevent shipwreck are described to the eye in the passage in the Acts. First, the vessel was lightened by throwing overboard all lumber, luggage, and everything that could be spared. The term employed by Luke is σκευή (xxvii. 19), one of a very wide signification, which the words we have just employed do not, we think, more than equal. If the peril grew more imminent,

480. Modern Levantine Ship.

the freight was sacrificed (xxvii. 38). When hope or endurance had come to a period, recourse was had to the boat, or efforts were made to reach the shore on spars or rafts (xxvii. 38, 44). The captain was denominated ναύκληρος (xxvii. 11), steersman, though he was a different person from him

who had the actual charge of the helm, who bore the name of κυβερνήτης, which is the root of our word 'governor' (Lat. gubernator, helmsman).

The dangers of the ocean to sailors on board such ships as these were, and in the then ignorance of navigation, caused sailing to be restricted to the months of spring, summer, and autumn; winter was avoided. To the Romans the sea was opened in March and closed in November (Cæs. *Bell. Gall.* iv. 36; v. 23; Philo, *Opp.* iv. 548; Acts xxvii. 9); and ships which towards the end of the year were still at sea earnestly sought a harbour in which to pass the winter (Acts xxvii. 12).

#### SHIPRAH. [PUAH.]

SHISHAK (שִׁשַׁק; Sept. Σουσακιμ), a king of Egypt contemporary with Jeroboam, to whom he gave an asylum when he fled from Solomon (1 Kings xi. 40). This was indicative of his politic disposition to encourage the weakening of the neighbouring kingdom, the growth of which under David and Solomon was probably regarded by the kings of Egypt with some alarm. After Jeroboam had become king of Israel, and probably at his suggestion, Shishak invaded the kingdom of Judah, B.C. 971, at the head of an immense army; and after having taken the fortified places, advanced against Jerusalem. Satisfied with the submission of Rehoboam, and with the immense spoils of the Temple, the king of Egypt withdrew without imposing any onerous conditions upon the humbled grandson of David (1 Kings xiv. 25, 26; 2 Chron. xii. 2-9). Shishak has been identified as the first king of the 22d or Diospolitan dynasty, the Sesonchis of profane history. His name has been found on the Egyptian monuments in the form of She-shonk. He is said to have been of Ethiopian origin, and it is supposed that, with the support of the military caste, he dethroned the Pharaoh who gave his daughter to Solomon (1 Kings iii. 1). In the palace-temple of Karnak there still exists a large bas-relief representing Sesonchis, who bears to the feet of three great Theban gods the chiefs of vanquished nations. To each figure is attached an oval, indicating the town or district which he represents. One of the figures, with a pointed beard and a physiognomy which some decide to be Jewish, bears on his oval characters which M. Champollion interprets *Yooda Melchi*, or 'kingdom of Judah,' a name whose component letters agree with the hieroglyphics, though Sir J. G. Wilkinson and others think that the place it holds is not sufficiently marked to satisfy the scruples of a rigid sceptic. It is well to observe that this figure has not, as some have hastily conceived, been alleged to represent the king, but to personify the kingdom of Judah (Champollion, *Système Hieroglyph.* p. 205; Rosellini, *Monumenti Storici*, i. 85; Wilkinson. *Anc. Egypt.* i. 37; Cory, *Chronological Inquiry*, p. 5) [CHRONOLOGY].—J. K.

## SHITTAH (שִׁטָּה) and SHITTIM (שִׁטִּים)

occur in several passages of Exodus, and indicate the kind of wood which was employed in making various parts of the tabernacle while the Israelites were wandering in the wilderness. It is mentioned also as forming part of the offerings, as in Exod. xxv. 5, 'rams' skins dyed red, and badgers' skins, and *shittim* wood;' and in xxxv. 7, 24. In Is. xli. 19 it is mentioned as a tree worthy of planting. According to some it was some valuable foreign wood.

But there does not appear any proof that *shittim* was an imported wood, and it is more probable that it was the wood of a tree of the desert. Rosenmüller (after Celsius, ii. p. 499) says: 'The Hebrew name, which is properly *shintah*, was formed from the Egyptian word *shant*, the double *t* being substituted for the *nt*, for the sake of sound and an easier pronunciation.' The Arabs also call it

قرظ *kart* or *karatz*, written also *kharad*. The Arabs pronounce the Egyptian name *sout*. This is a tree of the genus *Acacia*, found both in Egypt and in the deserts of Arabia (Prosper Alpinus, *De Plantis Aegypti*, p. 6). 'The acacia tree,' says Dr. Shaw, 'being by much the largest and most common tree in these deserts (Arabia Petrea), we

48r. *Acacia Seyal*.

have some reason to conjecture that the *shittim* wood was the wood of the acacia, especially as its flowers are of an excellent smell, for the *shittah* tree is, in Is. xli. 19, joined with the myrtle and other fragrant shrubs.' Mr. Kitto says: 'The required species is found in either the *Acacia gummifera*, or in the *A. Seyal*, or rather in both. They both grow abundantly in the valleys of that region in which the Israelites wandered for forty years, and both supply products which must have rendered them of much value to the Israelites. We think the probability is, that the *A. Seyal* supplied the *shittim* wood, if indeed the name did not denote acacia wood in general. This tree grows from fifteen to twenty feet in height.' Robinson and Smith frequently mention the *Seyal* as occurring in the same situations. It is very probable therefore that it yielded the *shittim* wood of Scripture.—J. F. R.

SHITTIM (שִׁטִּים, *The Acacias*; Sept. *Sar-τελν*), the place where the Israelites encamped for the last time before they crossed the Jordan (Num. xxv. 1; comp. Micah vi. 5), and from which Joshua sent spies to spy the land as far as Jericho (Josh. ii. 1). It was in the Arboth of Moab, at the foot of the mountain-range Abarim, and immediately under Nebo and opposite to Jericho (Deut. xxxii. 49). Hence it is to be looked for near the point where the Wady Hesban enters the plains of Moab, probably to the south of this wady. According to Josephus (*Antiq.* iv. 8. 1) the town of Abila was afterwards built on the site of Shittim, 60 stadia from the Jordan (Keil, *Comment. on Josh.* p. 79). The full name seems to have been *Abel Hashshittim* (which see).—W. L. A.

SHITTIM, VALLEY OF, mentioned in Joel iii. 18. It must certainly have been west of the Jordan, and probably in the neighbourhood of Jerusalem, although the particular vale cannot now be distinguished. The name is probably to be regarded as an appellative—'acacia vale' denoting, perhaps, as that tree delights in a dry soil, an arid, unfruitful vale.

SHOA (שׁוֹא; Sept. *Σοῦ*; Alex. *Σοῦδ*). [KOA.]

SHOE. [SANDAL.]

SHOHAM (שׁוֹהָם), a precious stone mentioned in Gen. ii. 12; Exod. xxviii. 9; xxxv. 9-27; Job xxviii. 16; Ezek. xxviii. 13. That it is really unknown is evinced by the variety of opinions which have been hazarded concerning it. In the two last texts the Sept. makes it the beryl (*βηρύλλιον*), and is followed by the Vulgate. Josephus also gives it the same name (*Antiq.* iii. 7. 5). This is a great weight of authority; and whether the beryl be the *shoham* or not, it is a Scriptural stone by virtue of the mention of it in Rev. xxi. 20. There is no doubt that the stone which we call beryl is the substance to which the ancients gave the same name. It is of a pale sea-green colour, inclining sometimes to water blue, and sometimes to yellow. In its crystallised form it exhibits hexagonal columns striped longitudinally. The *shoham* furnished the shoulder-pieces in the breastplate of the high-priest, on each of which six names were engraved; and for this purpose the stalky beryl, consisting of long, stout, hexagonal pieces, was peculiarly suited. Beryls are found, but not often, in collections of ancient gems. In Gen. ii. 12 the *shoham* is named as the product of Havilah; in Job xxviii. 16 it is mentioned as a stone of great value, being classed with the sapphire and the gold of Ophir; in Ezek. xxviii. 13 it appears as a valuable article of commerce.

In Gen. ii. 12 the Sept. renders the word, which it elsewhere gives as the beryl, by *λίθος ὁ πράσινος*, or the 'chrysoprasus,' according to its etymology, 'leek-green stone;' but as the ancients did not nicely distinguish between stones of similar quality and colour, it is probable that the beryl is still intended by the translator in this text. The chrysoprasus (*χρυσόπρασος*) is, however, a Scriptural stone, being named in Rev. xxi. 20. It is, as the name imports, of a greenish golden colour, like a leek—*i.e.* usually apple-green—passing into a grass-green (Plin. *Hist. Nat.* xvii. 20, 21).

Luther, relying upon the authority of some ancient versions, makes the *shoham* to have been

the onyx, an interpretation which Braun, Michaelis, Eichhorn, and others support on etymological grounds. This, indeed, is the stone usually given for the Shoham in Hebrew lexicons, and is the one which the A. V. has also adopted.—J. K.

SHOR (שׁוֹר), a generic word denoting an animal of the bovine species, whether male or female, young or old. It is sometimes used collectively of several animals (Gen. xxxii. 6; 1 Sam. xxii. 19; 2 Sam. xv. 3), but generally it is used of only one (Exod. xxi. 28, 29, 37; xxii. 8, 9; xxxiv. 19; Lev. vii. 23; xxii. 27; xxvii. 26; Num. xxii. 4; Neh. v. 18; Job vi. 5; xxi. 10; Is. i. 3). It is used metaphorically of a *chief* or *leader* (Deut. xxxiii. 17). A singular use of it occurs Gen. xlix. 6, where according to some it stands for *men of valour or strength*; but the rendering in the margin of the A. V. ('they houghed oxen') is probably the true one: while they slew the men they disabled the cattle, at least such as they did not care to drive off as spoil (xxxiv. 28). [BAQAR.]—W. L. A.

SHOSHANNIM. [PSALMS; SHUSHAN.]

SHU'AL שׁוּאֵל and 'ש, jackal (?), are both somewhat arbitrarily interpreted by the word 'fox;' although that denomination is not uniformly employed in different texts (Judg. xv. 4; Neh. iv. 3; xi. 27; Ps. lxxiii. 10; Cant. ii. 15; Lam. v. 18; Ezek. xiii. 4). Fox is thus applied to two or more species, though only strictly applicable in a systematic view to *Taaleb*, which is the Arabic name of a wild canine, probably the Syrian fox—*Vulpes Thaleb* or *Taaleb* of modern zoologists—and the only genuine species indigenous in Palestine. Fox is again the translation of ἀλώπηξ, in Matt. viii. 20; Luke ix. 58; xiii. 32: but here also the word in the original texts may apply generically to several species rather than to one only.

482. Syrian Fox.

We have no proof that *shu'al* denotes exclusively the fox, and that *iyim* and Hasselquist's little foxes refer solely to jackals; particularly as these animals were, if really known, not abundant in Western Asia, even during the first century of the Roman empire; for they are but little noticed by the Greek writers and sportsmen who resided where now they are heard and seen every evening; these authorities offering no remark on the most prominent characteristic of the species—namely, the chorus of howlings lasting all night—a habit so intolerable that it is the invariable theme of all the Semitic writers since the Hegira whenever they mention the jackal. We may therefore infer that *shu'al* is a general denomination, and that *iyim*, if the etymology be just, is derived from howling or barking, and may designate the jackal, though more probably it includes also those wild Canidae which have a similar habit.

*Vulpes Thaleb*, or *Taleb*, the Syrian fox, is of the size of an English cur fox, and similarly formed; but the ears are wider and longer, the fur in general ochry-rufous above, and whitish beneath: there is a faint black ring towards the tip of the tail, and the back of the ears are sooty, with bright fulvous edges. The species burrows, is silent and solitary, extends eastward into Southern Persia, and is said to be found in Natolia. Ehrenberg's two species of *Taleb* (one of which he takes to be the *Anubis* of ancient Egypt, and Geoffrey's *Canis Niloticus*, the Abou Hossein of the Arabs) are nearly allied to or varieties of the species, but residing in Egypt, and further to the same south, where it seems they do not burrow. The Syrian *Taleb* is reputed to be very destructive in the vineyards, or rather a plunderer of ripe grapes; but he is certainly less so than the jackal, whose ravages are carried on in troops and with less fear of man.

None of the explanations which we have seen of the controverted passage in Judg. xv. 4, 5, relative to the *shu'alim*, foxes, jackals, or other canines, which Samson employed to set fire to the corn of the Philistines, is altogether satisfactory to our mind. First, taking Dr. Kennicott's proposed explanation of the case by changing שׁוּעִלִים

to שְׁעִלִים, thus reading 'sheaves' instead of 'foxes,' and translating שְׁעִלֵּי 'ends' instead of 'tails,' the meaning then would be, that Samson merely connected by bands or ends three hundred shocks of corn, already reaped, and thus burned the whole. We admit that this, at first view, appears a rational explanation; but it should be observed that three hundred shocks of corn would not make two stacks, and therefore the result would be quite inadequate, considered as a punishment or act of vengeance upon the Philistine population, then predominant over the greater part of Palestine: and if we take shocks to mean corn-stacks, then it may be asked how, and for what object, were three hundred corn-stacks brought together in one place from a surface of country at least equal to Yorkshire? The task, in that hilly region, would have occupied all the cattle and vehicles for several months; and then the corn could not have been threshed out without making the whole population travel repeatedly, in order finally to reload the grain and take it to their threshing-floors.

Reverting to the interpretation of foxes burning the harvest by means of firebrands attached to their tails, the case is borne out by Ovid (*Fasti*, iv. 681)—

'Cur igitur misse junctis ardentia telis  
Terga ferunt vulpes?'

And again in the fable of Aphonius, quoted by Merrick; but not, as is alleged, by the brick with a bas-relief representing a man driving two foxes with fire fastened to their tails, which was found twenty-eight feet below the present surface of London; because tiles of similar character and execution have been dug up in other parts of England, some representing the history of Susanna and the elders, and others the four Evangelists, and therefore all derived from Biblical, not pagan sources.

Commentators, following the reading of the Septuagint, have with common consent adopted the interpretation, that two foxes were tied together by their tails with a firebrand between them. Now this does not appear to have been the practice of

the Romans, nor does it occur in the fable of Aphonius. We understand the text to mean that each fox had a separate brand; and most naturally so; for it may be questioned whether two united would run in the same direction. They would assuredly pull counter to each other, and ultimately fight most fiercely; whereas there can be no doubt that every canine would run, with fire attached to its tail, not from choice but necessity, through standing corn, if the field lay in the direction of the animal's burrow; for foxes and jackals, when chased, run direct to their holes, and sportsmen well know the necessity of stopping up those of the fox while the animal is abroad, or there is no chance of a chase. We therefore submit that by the words rendered 'tail to tail' we should understand the end of the firebrand attached to the extremity of the tail. Finally, as the operation of tying three hundred brands to as many fierce and irascible animals could not be effected in one day by a single man, nor produce the result intended if done in one place, it seems more probable that the name of Samson, as the chief director of the act, is employed to represent the whole party who effected his intentions in different places at the same time, and thereby insured that general conflagration of the harvest which was the signal of open resistance on the part of Israel to the long-endured oppression of the Philistine people. These observations, though by no means sufficiently answering all the objections, are the best we can offer on a difficult question, which could not be passed over altogether without notice [KELEB; ZEEB].—C. H. S.

SHUAL, LAND OF (אַרְצֵ שְׁוָאֵל; ἡ γῆ Σωαλ; *terra Sual*). When describing the routes taken by the Philistine spoilers who went forth from the garrison at Michmash, the sacred writer says: 'One company turned unto the way of Ophrah, unto the land of Shual' (1 Sam. xiii 17). Ophrah, as has been seen [OPHRAH], is probably identical with Taiyibeh, a village about six miles north-east of Bethel. The land of Shual, therefore, doubtless lay in that region. It is a wild mountainous district, a maze of rocky hill-tops, intersected by deep ravines which run down into the Jordan valley. The name appears to have been forgotten. The word *Shual* signifies 'fox' or 'jackal'; and both these animals abound amid the rocks of this district. Jackals are especially numerous; and the writer has more than once been kept awake for hours in his tent by their howlings.—J. L. P.

SHUCKFORD, SAMUEL, D.D. Of the time and place of his birth we have not been able to find any record. He was educated at Caius College, Cambridge, and was successively curate of Shelthorpe, Norfolk, prebendary of Canterbury, and rector of All-Hallows, Lombard Street, London. He died in 1754. He wrote *The Sacred and Prophane History of the World connected, from the creation of the world to the dissolution of the Assyrian Empire*. Of this work, which was designed to complete that of Prideaux, only four volumes appeared, bringing down the history to the death of Joshua. It is a work of solid learning, though inferior to that of Prideaux.—W. L. A.

SHUHITE, THE (שְׁחִיטָה, *The Shuchite*), a designation of Bildad, one of the friends of Job (Job ii. 11, etc.) It is probably a patronymic from שָׁחַט,

*Shuach*, one of the sons of Abraham by Keturah. In the Peutinger Tables the district immediately above Babylonia is called *Sohene*; and the Assyrian inscriptions mention a powerful tribe, the *Tsuchi*, located above Hit on both sides the Euphrates. In these names we have probably traces of the Shuchites. Some, however, think that the *Sakkala* which Ptolemy (v. 14) places eastward of Batanea is more probably their representative.—W. L. A.

SHULAMITE, THE (הַשְׁלֵמִית), the name given to a person in the Song of Solomon. Whether this is a proper name, *Shulamith*, or an ethnic designation, and whether it is used of the heroine of the song or of some other, are points to be discussed elsewhere. [SOLOMON, SONG OF].—†

SHUMIM (שְׁוִמִּים) occurs only once in Scripture (Num. xi. 5), where it is translated *garlick* in the A. V. There can be no doubt of its being correctly so translated, as the Arabic ثوم (*thom*)

still signifies a species of garlic, which is cultivated and esteemed throughout Eastern countries. Ancient authors mention that garlic was cultivated in Egypt. Herodotus enumerates it as one of the substances upon which a large sum (1600 talents)

483. Shallot. (*Allium Ascalonicum*.)

was spent for feeding labourers employed in building the pyramids; so also Pliny, who, moreover, states that it was so highly esteemed, that 'allium cepasque inter Deos in jurejurando habuere olim Ægyptiæ.' The species considered to have been thus cultivated in Egypt is *Allium Ascalonicum*, which is the most common in Eastern countries, and obtains its specific name from having been brought into Europe from Ascalon. It is now usually known in the kitchen-garden by the name of 'eschalot' or 'shallot,' and is too common to require a fuller notice.—J. F. R.

SHUNAMMITE, THE (הַשְׁנַמִּיתָה; Sept. ἡ Σωμαννίτις), one resident in Shunem; applied to Abishag (1 Kings i. 3, 15; ii. 17, 21, 22), and to the hostess of Elijah (2 Kings iv. 12, 25, 36). As the modern name of Shunem is Solam, it has been suggested that Shunammite and Shulamite are identical (see Gesenius and Fürst on the word).—W. L. A.

SHUNEM (שֻׁנֵם; Sept. Σουνῆμ), a town of the tribe of Issachar (Josh. xix. 18), where the Philistines encamped before Saul's last battle (1 Sam. xxviii. 4), and to which belonged Abishag, the last wife of David (1 Kings i. 3), and 'the Shunammite woman' with whom Elisha lodged (2 Kings iv. 8-37; viii. 1-6). Eusebius and Jerome describe it as, in their day, a village, lying five Roman miles from Mount Tabor towards the south. They call it Sulem (Σουλῆμ). It has of late years been recognised in a village called Solam, three miles and a half north of Zerin (Jezreel), which is a small place on the slope of a hill, where nothing occurs to denote an ancient site (Elliot, ii. 378; Schubert, iii. 165; Robinson, iii. 169, 170). —J. K.

#### SHUPHAN. [SHUPPIM.]

SHUPPIM is mentioned (1) in 1 Chron. vii. 12 (שֻׁפִּים; Σαφῖν; Alex. Σαφῆμ; *Sephm*) as one of the two 'children of Ir.' If, as is likely, this Ir be the same as the 'Iri' of ver. 7, the son of Bela, Shuppim was the great-grandson of the patriarch Benjamin. There is no good reason for identifying the subject of this article with the Muppim of Gen. xli. 21, or Shephuphan (less correctly Shuphan) of Num. xxvi. 39, and Shephuphan of 1 Chron. viii. 5, as we have shown elsewhere [MUPPIM]; so that the difficulty of assigning to Benjamin a descendant of the third generation at the time of his removal with Jacob into Egypt is avoided in this instance. (2.) SHUPPIM (שֻׁפִּים; Σαφῖν; Alex.

Σεφφῆμ; *Saphan*) is mentioned again in 1 Chron. vii. 15. According to A. V. he is the same man as occurs in ver. 12. The Vulgate, however, not only varies the name, but makes the bearer of it one of the sons of Machir, of the tribe of Manasseh ['Machir autem accepit uxores filiis ejus Happphim et Saphan']. This verse from its obscurity has given rise to much discussion among commentators and variety among the chief versions. The Sept. follows the original more closely, and so partakes of its obscurity, which the A. V. and the Vulgate only escape by a paraphrase instead of a version [comp. LXX. Μαχὴρ ἐλαβεν γυναῖκα τῶ 'Αφφῆμ καὶ Σεφφῆμ with the Masor. text מַכִּיר לָקַח אִשָּׁה תֶּן 'Αφφῆμ καὶ Σεφφῆμ].

לְחָפִים וְלִשְׁפִים. The Peschito seems to have treated the proper names of the clause as appellatives. Manifest also are the expedients of critics to smooth the difficulties of the verse. Some (Houbigant, Clericus) suppose an omission of some words in the text; others (among them Bertheau) a redundancy from the margin, and they would remove the words לְחָפִים וְלִשְׁפִים out of the text. Most, however, accept the text as substantially correct, but differ in its interpretation. Some, and they are the majority, take the sense adopted in our A. V., regarding the ל prefixed to the names as a sign of the periphrastic genitive (see Gesen. *Gram.* sec. 115), before which they would supply an understood אָחוֹת [sister] from the succeeding clause. They thus produce the version: 'Machir took to wife [the sister] of Huppim and Shuppim.' (The high authority of D. Kimchi favours this construction; see also J. H. Michaelis, *Comment. in Hagiograph.* in loc.) This view makes our Shuppim and his brother Benjamites, as mentioned in ver. 12, whose sister Maachah became the wife of

Machir of the tribe of Manasseh. As, however, the ל may well be the sign of an acquisitive dative dependent on the verb לָקַח, the simplest translation would be that of the Vulgate [and probably of the Sept. also]: 'Machir took a wife for Huppim and Shuppim' (comp. 1 Sam. xxv. 45)—supposing these to be his sons, and therefore Manassites. The support of these ancient versions to this view goes far to obviate the objection which arises from the improbability of two brothers being found in a family of Manasseh bearing the same names as the two Benjamite brothers mentioned only three verses before. This sense is supported by Movers (*Chronik.* 89; see Bertheau, *in loc.*) (3.) In 1 Chron. xxvi. 16 mention is made of another SHUPPIM (שֻׁפִּים;

Sept. Alex. Σεφῆμ; *Sephim*), a Levite, one of the doorkeepers appointed (together with the Merarite Hosah) to superintend the watch on the western side of the temple, including 'the gate Shallecheth.' Bertheau (*in loc.*) supposes this insertion of Shuppim's name to be a copyist's error, arising from a repetition of the preceding word הָאֲסָפִים [Kennicott among his MSS. discovered שֻׁפִּים with *samech* (instead of שְׁפִים with *shin*), which is nothing but a repetition, as Bertheau supposed, of the last letters of the הָאֲסָפִים, and he sees a confirmation of his view in the absence, as he says, of the name from the Septuagint. This statement is not absolutely correct. The Codex Alex. reads Σεφῆμ, and the Vulgate also treats the word as a proper name: so that ancient texts must have had the same reading as the Masoretic, which our A. V. follows. It must not, however, be denied that there is force in Bertheau's supposition. From ver. 14, 15, it appears that the lots 'eastward,' 'northward,' and 'southward,' fell in each case to *individuals*; it is not easy therefore to see why *two* persons should be mentioned for the 'westward' lot. In the Vatican text of the Sept., ver. 16 begins with the words ἐς δεύτερον τῶ 'Οσᾶ πρὸς δυομαῖς, making the last lot fall but to one man, like the preceding three. The phrase ἐς δεύτερον seems to indicate that the text which it translates had the word שְׁנֹם (*two*) instead of שֻׁפִּים. Now it is observable that the 17th verse actually terminates with the words לְאֲסָפִים שְׁנִים [the best MSS. not having the שְׁנִים repeated], 'Asuppim, two.' If we suppose the 15th verse to terminate with the same words, which are equally suitable *there*, then our 16th verse will begin with

וְלִחְסָה, 'and to Hosah westward'—a reading which will square evenly with the two foregoing verses. If this conjecture be true, our third Shuppim the Levite is of course to be cancelled.—P. H.

SHUR (שֹׁר; Sept. Σούρ), a city on the confines of Egypt and Palestine (Gen. xvi. 7; xx. 1; xxv. 18; 1 Sam. xv. 7; xxvii. 8). Josephus makes it the same as Pelusium (*Antiq.* vi. 7. 3; comp. 1 Sam. xv. 7); but this city bore among the Hebrews the name of Sin. More probably Shur was somewhere in the vicinity of the modern Suez. The desert extending from the borders of Palestine to Shur is called in Exod. xv. 22 the 'desert of Shur,' but in Num. xxxiii. 8 the 'desert of Etham.' —J. K.

SHUSHAN (שֹׁשָׁנָה), also SHOSHANNAH (שֹׁשָׁנָה; Sept. κρήνη), occurs in several passages of the O.

T., and is translated *lily* in the A. V. The word has been variously interpreted by translators, being by some thought to be the rose, by others the violet or convallaria, a jasmine, or some one or more of the plants included under the general name of lily. But it appears to us that none but a plant which was well known and highly esteemed would be found occurring in so many different passages. Thus, in 1 Kings vii. 19-26, and 2 Chron. iv. 5, it is mentioned as forming the ornamental work of the pillars and of the brazen sea, made of molten brass, for the house of Solomon, by Hiram of Tyre. In Canticles the word is frequently mentioned; and it is curious that in five passages (Cant. ii. 2 and 16; iv. 5; vi. 2 and 3) there is a reference to feeding among lilies: which appears unaccountable, when we consider that the allusion is made simply to an ornamental or sweet-smelling plant; and this the *shushan* appears to have been from the other passages in which it is mentioned (Cant. ii. 1, 2; v. 13; vii. 2). If the book of Canticles is the production of Solomon it may be presumed to contain allusions to Egyptian objects, from his connection by marriage with that country; and in this case the lily to which he refers may be a plant of Egypt rather than of Palestine. And this appears to us to be the case, especially as the water-lily or lotus of the Nile seems suitable to most of the above passages. Herodotus (ii. 92) says: 'When

484. Lotus. Water-lily.

the waters have risen to their extremest height, and all the fields are overflowed, there appears above the surface an immense quantity of plants of the lily species, which the Egyptians call the lotus; having cut down these they dry them in the sun. The seed of the flowers, which resembles that of the poppy, they bake, and make into a kind of bread: they also eat the root of this plant, which is round, of an agreeable flavour, and about the size of an apple. There is a second species of the lotus, which grows in the Nile, and which is not unlike a rose. The fruit, which grows from the bottom of the root, resembles a wasp's nest: it is found to contain a number of kernels of the size of an olive stone, which are very grateful either fresh or dried.' All this exists even to the present day. Both the roots and the stalks form articles of diet in Eastern countries, and the large farinaceous seeds

of both the nymphæa and nelumbium are roasted and eaten. Hence probably the reference to feeding among lilies in the above-quoted passages.

In confirmation of this view we may adduce also the remarks of Dr. W. C. Taylor in his *Bible illustrated by Egyptian monuments*, where he says that the lilies of the xlv. and lxix. Psalms have puzzled all Biblical critics. The title, 'To the chief musician upon Shoshannim,' has been supposed to be the name of some unknown tune to which the Psalm was to be sung. But Dr. Taylor says: 'The word Shoshannim is universally acknowledged to signify lilies, and lilies have nothing to do with the subject of the ode. But this hymeneal ode was intended to be sung by the female attendants of the Egyptian princess, and they are called 'the lilies,' not only by a poetic reference to the lotus lilies of the Nile, but by a direct allusion to their custom of making the lotus lily a conspicuous ornament of their head-dress.' Thus, therefore, all the passages of Scripture in which *Shoshan* occurs appear to be explained by considering it to refer to the lotus lily of the Nile.—J. F. R.

SHUSHAN, or SUSA (שִׁשָּׁן; Sept. Σοῦσα), the chief town of Susiana, and capital of Persia, in which the kings of Persia had their winter residence (Dan. viii. 2; Neh. i. 1; Esther i. 2, 5). It was situated upon the Eulæus or Choaspes, probably on the spot now occupied by the village Shus (Rennel, *Geog. of Herodotus*; Kinneir, *Mem. Pers. Empire*; K. Porter, *Travels*, ii. 4, 11; Ritter, *Erzkunde Asien*, ix. 294; *Pictorial Bible*, on Dan. viii. 2). Others believe the site to be that of Shuster (Vincent, *Commerce and Navig. of the Ancients*; Von Hammer, in *Mem. of the Geog. Soc. of Paris*, ii. 320, seq.; 333, seq.) At Shus, which is the more likely position, there are extensive ruins, stretching perhaps twelve miles from one extremity to the other, and consisting, like the other ruins of this region, of hillocks of earth and rubbish covered with broken pieces of brick and coloured tile. At the foot of these mounds is the so-called tomb of Daniel, a small building erected on the spot where the remains of that prophet are locally believed to rest. It is apparently modern; but nothing but the belief that this was the site of the prophet's sepulchre could have led to its being built in the place where it stands (Malcolm, *Hist. of Persia*, i. 255, 256); and it may be added that such identifications are of far more value in these parts, where occasion for them is rare, than among the crowded 'holy places' of Palestine. The city of Shus is now a gloomy wilderness, infested by lions, hyenas, and other beasts of prey. It is in N. lat. 31° 56' and E. long. 48° 26'.—J. K.

SHUTHELAH. [BECHER.]

SIBBECHAI. [HUSHATHITE.]

SIBMAH. [SHIBMAH.]

SICHEM. [SHECHEM.]

SICYON (Σικυών), a city lying on the north coast of the Peloponnesus, to the west of Corinth, and capital of the small state Sicyonia (1 Maccab. xv. 23). It no longer exists.—†

SIDDIM, THE VALE OF (עֵמֶק הַשִּׁדִּים; ἡ φάραγξ ἡ ἀλυκή, and ἡ κοιλίς ἡ ἄ. ; *vallis silvestris*). In the article SALT SEA the vale of Siddim has

been noticed. In this place it may be well to group together the leading statements made regarding it in Scripture history, and to combine with them the results of recent scientific research in the region in which it must have been situated.

The word *Siddim* appears to be from the root שָׁדַד, 'to be straight or level.' The singular שָׁדָד or שָׁדָה would thus signify 'a level field'; and the phrase *Emek Siddim* (שְׁדִיִּים, pl.), 'the valley of fields.' So it is rendered substantially in the Targums, and in the version of Saadias (سرج الحقل).

The authors of the Septuagint probably thought that the clause 'which is the Salt Sea,' was explanatory of the word *Siddim*, which they therefore rendered ἡ ἀλυσή. Or perhaps they may have read הַשְׂדִּים instead of הַשְׂדִּים; and ἀλυσή may be an error for ἀλυσκός = ἀλυσώδης, 'wooded'; a view which is corroborated by the Vulgate, which has *silvestris*; and by the reading of Symmachus and Theodotion, τῶν ἀλσῶν. Kalisch gives another explanation: '*Emek ha-Siddim* is a valley filled with rocks and pits (v. 10), causing obstructions and obstacles (comp. سى and سددة; Aquil. ἐν κοιλάδι τῶν περιπεδῶν).

The word rendered 'vale' is in Hebrew *Emek*, which means a low or sunk tract of land. It was probably a section of the Arabah somewhat lower than the rest; perhaps resembling the plain of Sakhah at the southern end of the Dead Sea. It was 'full of bitumen-pits,' or, as the Hebrew idiom expresses it, it was 'wells wells of bitumen' (בְּאֵרֵי חִמְרִי). They are so numerous as to stud its whole surface (ver. 10). It was the battle-field in which the king of Sodom and his allies were vanquished. It seems probable, though it is not stated, that Sodom and Gomorrah were situated in the vale. Be this as it may, the vale was included in the general destruction when 'the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord in heaven' (xix. 24).

But the most remarkable fact regarding the vale of Siddim is that stated in ver. 3—'*It is the Salt Sea*' (הוּא יָם הַמֶּלַח). The meaning of these words cannot be mistaken; and it has already been shown that we have no more ground for questioning their genuineness than for questioning the genuineness of any other passage in Genesis. There is abundant evidence that the book as it now stands was the production of Moses. He may have embodied in it authentic documents handed down from a remoter age, arranging and supplementing them as he deemed necessary. But his additions would be as authoritative as the documents themselves. Until we can prove from clear evidence that the clause was interpolated by an uninspired writer, we must regard it as an integral part of the Mosaic record, and we must believe that the vale of Siddim was submerged.

The most careful explorations of recent travellers have not brought to light a single fact calculated to overthrow this view. On the contrary, the following results of scientific research go far to establish it. At the present day there are no bitumen-pits in the plains around the Dead Sea, and time could not have effaced them had they remained above water. It has been ascertained, from masses

of bitumen frequently thrown to the surface, that there must be wells of bitumen in the bed of the sea towards its southern end. Traces of what appears to have been 'a shower of sulphur' have been discovered recently on the south-west shore; and with it are layers and lumps of bitumen calcined by heat [SALT SEA]. The section of the Dead Sea south of el-Lisân has been found to be very shallow, only a few feet, and in places only a few inches of water covering a flat slimy plain—whereas the whole northern section is a deep and regularly-formed basin.

These facts would seem at least to suggest that that section of the Dead Sea which is south of the peninsula covers the region which was called in Lot's time 'the vale of Siddim.'—J. L. P.

SIDÈ (Σιδῆ), a town in Pamphylia on the coast, thirty stadia to the west of the river Melso. It is now called *Esy Adalia* (Beaufort, *Karamania*, p. 146, ff.)—†

SIDON. [ZIDON.]

SIHON (סִיחֹן, *sweeping away*; i.e. a warrior sweeping all before him; Sept. Σηών), the king of the Amorites, reigning at Heshbon, who was destroyed, and his kingdom subjugated, in the attempt to resist the progress of the Israelites through his dominions (Num. xxi. 21, 23, seq.) [AMORITES.]

SIHOR. [SHIHOR.]

SIHOR-LIBNATH. [SHIHOR-LIBNATH.]

SILAS (Σίλας), a contraction of SILVANUS (Σιλωνός), a distinguished Christian teacher in the church at Jerusalem, who, with Barnabas, was associated by that church with Paul (Acts xv. 22, 32), and accompanied him in his second journey through Asia Minor to Macedonia (Acts xv. 40; xvi. 19, 25; xvii. 4). He remained behind at Berea for a short time, when Paul was obliged to flee from that place (Acts xvii. 10, 14). They met again at Corinth (Acts xviii. 5; comp. Thess. i. 1), where Silas was active in the work of an evangelist (2 Cor. i. 19). He is invariably called Silvanus in the Epistles, but the contraction Silas is always used in the Acts. Whether this Silvanus is the same person who was the bearer of St. Peter's epistle to the churches in Asia Minor (1 Pet. v. 12) cannot be ascertained. The traditions (ap. Dorotheum et Hippolytum) regard Silas and Silvanus as different persons, making the former bishop of Corinth and the latter bishop of Thessalonica. See Fabricius, *Lux Evang.* p. 117; Cellarius, *Diss. de Sila Viro Apostol.*—J. K.

SILK. Whether this fabric was known to the Hebrews is extremely doubtful. There is no word in Hebrew answering to it, for the Hebrew words translated *silk* in the A. V., מָשִׁי (Ezek. xvi. 10, 13), and קָשִׁי (Prov. xxxi. 22), cannot be proved to be properly so rendered. Of the latter, indeed, it may be confidently affirmed that it is erroneously so rendered [SHESH]; and the presumption that the former designates *silk* rests solely on its being supposed to stand connected with the verb מָשָׁה, *mashah*, to draw out. The LXX. render it by τριχαπτον, which, though it may be used of silk, is used generally of any fine fabric. Some have suggested that the word קָשִׁי (Amos iii. 12) should be rendered *silk*, from a supposed identity with the

Arabic *dimakso* or *dimkās* silk. But this denotes *raw silk*, not *spun* or *thread silk*; and besides, the Hebrew and Arabic words are different (Henderson, *in loc.*; Pusey, *in loc.*) The only undoubted reference to silk in the Bible is in Rev. xviii. 12, where *σηρικόν* is mentioned as among the treasures of Babylon.—W. L. A.

SILLON (סִלּוֹן) occurs in Ezek. xxviii. 24, where it is rendered 'prickling brier' in the A. V. As

*sillon* is here mentioned with *koz*, it has been inferred that it must mean something of the same kind. Several Arabic words resemble it in sound; as *seel*, signifying a kind of wormwood; *silleh*, the plant *Zilla myagrurum*; *sillah*, the *πάρος* of the Greeks, supposed to be *Salsola kali* and *S. tragus*; *sulal* or *sulalon*, which signifies the *thorn* of the date-tree, while the Chaldee word *sillela* signifies a thorn simply. It is probable, therefore, that *sillon* has something of the same meaning, as also *sal-*

485. Village of Siloam.

*lonim* or *sillonim*, which occurs in Ezek. ii. 6 along with *sarabim*; but we are unable to fix upon any particular plant of Syria as the one intended.—J. F. R.

SILOAH. [SILOAM.]

SILOAM (Σιλωάμ), or SHILOAH (שִׁילֹחַ). The name Siloah or Siloam is found only three times in Scripture as applied to water: once in Isaiah

(viii. 6), who speaks of it as running water; again, as a pool, in Neh. ii. 15; and lastly, also as a pool, in the account of our Lord's healing the man who had been born blind (John ix. 7-11). None of these passages affords any clue to the situation of Siloam; but this silence is supplied by Josephus, who makes frequent mention of it as a fountain (*De Bell. Jud.* v. 4, sec. 1, 2), and indicates its situation at the mouth of the valley of Tyropæon,

where the fountain, now and long since indicated as that of Siloam, is still found. He describes its waters as sweet and abundant. Jerome (*Comment. in Esa.* viii. 6), indicating its situation more precisely, also mentions its irregular flow—a very remarkable circumstance, which has been noticed by most subsequent pilgrims and travellers. This assures us that the present fountain of Siloam is that which he had in view; and that it is the same to which the Scriptural notices refer there is no reason to doubt. The pool of Siloam is within and at the mouth of the valley of Tyropœon, and about eighty paces above its termination is that of Jehoshaphat. The water flows out of a small artificial basin under the cliff, the entrance to which is excavated in the form of an arch, and is immediately received into a larger reservoir, fifty-three feet in length by eighteen feet in width. A flight of steps leads down to the bottom of the reservoir, which is nineteen feet deep. This large receptacle is faced with a wall of stone, now slightly out of repair. Several columns stand out of the side walls, extending from the top downward into the cistern, the design of which it is difficult to conjecture. The water passes out of this reservoir through a channel cut in the rock, which is covered for a short distance; but subsequently it opens and discloses a lively copious stream, which is conducted into an enclosed garden planted with fig-trees. It is afterwards subdivided, and seems to be exhausted in irrigating a number of gardens occupied with figs, apricots, olive and other trees, and some flourishing legumes. The small upper basin or fountain excavated in the rock is merely the entrance, or rather the termination of a long and narrow subterranean passage beyond, by which the water comes from the Fountain of the Virgin. This has been established beyond dispute by Dr. Robinson, who, with his companion, had the hardihood to crawl through the passage. They found it 1750 feet in length, which, owing to its windings, is several hundred feet more than the direct distance above ground. It is thus proved that the water of both these fountains is the same, though some travellers have pronounced the water of Siloam to be bad, and that of the other fountain good. It has a peculiar taste, sweetish and very slightly brackish, but not at all disagreeable. Late in the season, when the water is low, it is said to become more brackish and unpleasant. The most remarkable circumstance is the ebb and flow of the waters, which, although often mentioned as a characteristic of Siloam, must belong equally to both fountains. Dr. Robinson himself witnessed this phenomenon in the Fountain of the Virgin, where the water rose in five minutes one foot in the reservoir, and in another five minutes sunk to its former level. The intervals and the extent of the flow and ebb in this and the fountain of Siloam vary with the season; but the fact, though it has not yet been accounted for, is beyond dispute (see Robinson's *Palestine*, i. 460, 492-498; Olin's *Travels*, ii. 153, 154; Williams's *Holy City*, pp. 378, 379).—J. K.

SILVANUS. [SILAS.]

SILVER. [KESEPH.]

SILVERLINGS (שִׁלְשִׁלִּים; LXX. σίκλος; Vulg. *argentus* sc. *siclus*), a word employed once in the A. V. (Is. vii. 23) as a translation of the Hebrew שִׁלְשִׁלִּים, which is generally elsewhere rendered in

the LXX. by ἀργύριον, though sometimes by χρυσός, and in the A. V. by 'silver' or 'money,' [PIECE OF SILVER.]—F. W. M.

SIMEON (שִׁמְעוֹן, *favourable hearing*; Συμεών).

1. The second son of Jacob, born of Leah (Gen. xxix. 33), and progenitor of the tribe of the same name. He was the full brother of Levi (Gen. xxxiv. 25; xxxv. 23), with whom he took part in cruelly avenging upon the men of Shechem the injury which their sister Dinah had received from the son of Hamor (Gen. xxxiv. 25-30). [DINAH.] The ferocity of character thus indicated probably furnishes the reason that Joseph singled Simeon out to remain behind in Egypt, when his other brethren were the first time dismissed (Gen. xlii. 24); but when they returned he was restored safely to them (Gen. xliii. 23). Nothing more of his personal history is known. The tribe descended from Simeon contained 59,300 able-bodied men at the time of the Exode (Num. i. 23), but was reduced to 22,200 before entering Palestine (Num. xxvi. 14). This immense decrease in the course of one generation was greater than that sustained by all the other tribes together, and reduced Simeon from the third rank to the lowest of all in point of numbers. It cannot well be accounted for but by supposing that the tribe erred most conspicuously, and was punished most severely in those transactions which drew down judgments from God. As it appeared that Judah had received too large a territory in the first distribution of lands, a portion of it was afterwards assigned to Simeon. This portion lay in the south-west, towards the borders of Philistia and the southern desert, and contained seventeen towns (Josh. xix. 1-9). However, the Judahites must afterwards have re-appropriated some of these towns; at least Beersheba (1 Kings xix. 3) and Ziklag (1 Sam. xxvii. 6) appear at a subsequent period as belonging to the kingdom of Judah. The remarkable passage in 1 Chron. iv. 41-43 points to an emigration of or from this tribe, perhaps more extensive than the words would seem to indicate, and suggests that when they ceased to have common interests this small tribe was obliged to give way before the greater power of Judah and the pressure of its population (comp. Gen. xlix. 7). Nothing more of this tribe is recorded, although its name occurs in unhistorical intimations (Ezek. xlviii. 24; Rev. vii. 7).

2. The aged person who, when Jesus was presented by his mother at the temple, recognised the infant as the expected Messiah, and took him in his arms and blessed him, glorifying God (Luke ii. 25-35). The circumstance is interesting, as evincing the expectations which were then entertained of the speedy advent of the Messiah; and important from the attestation which it conveyed in favour of Jesus, from one who was known to have received the divine promise that he should 'not taste of death till he had seen the Lord's Christ.'

3. A person surnamed NIGER, probably from his swarthy complexion, or perhaps from his belonging to the negro race. He was one of the most distinguished among the prophets and teachers in the primitive church at Antioch (Acts xiii. 1).

SIMON (Σίμων), the same name, in origin and signification, as SIMEON.

1. Son of Matthias. [MACCABEAN FAMILY.]

2. The apostle to whom Christ gave the name

of Peter, after which he was rarely called by his former name alone, but usually by that of Peter, or else Simon Peter [PETER].

3. SIMON ZELOTES (Σίμων ὁ Ζηλωτής), one of the twelve apostles (Luke vi. 15; Acts i. 13), and probably so named from having been one of the Zealots. He is also called 'The Canaanite' (Σίμων ὁ Κανανίτης) in Matt. x. 4; Mark iii. 18. This is not to be taken for a Gentile name; it is an Aramaic word (ܣܝܡܢ) signifying 'zeal,' and therefore of the same signification as Zeletes. Simon is the least known of all the apostles, not a single circumstance beyond the fact of his apostleship being recorded in the Scriptures. He is probably to be identified with Simon the son of Cleophas; and if so, the traditions concerning that person given by those who make them distinct must be assigned to him. These traditions, however, assign a different destiny to this Simon, alleging that he preached the Gospel throughout North Africa, from Egypt to Mauritania, and that he even proceeded to the remote isles of Britain.

4. A brother of the apostles James and Jude, and a kinsman of Jesus (Matt. xiii. 55; Mark vi. 3). According to some he is the same with the Simon Zelotes above mentioned; but for this there is no evidence. The prevailing opinion is that he is the Simeon who became bishop of the church at Jerusalem after the death of James (Euseb. *H. E.* iii. 11; iv. 22); but according to Eusebius this Simeon was the son of Clopas, and if so could not be the same as the brother of James and Jude. It is of him that Eusebius records that when Trajan caused search to be made for all those who claimed to be of the race of David, he was accused before Atticus, the governor of Palestine, and after enduring great torture was crucified, being then 120 years of age (Euseb. *Hist. Eccles.* iii. 32; Epiphanius, *Hæres.* c. 14; Tillemont, *Hist. Eccles.* ii. 204).

5. The father of Judas Iscariot (John vi. 71; xii. 4; xiii. 2, 26).

6. A Pharisee who invited Jesus to his house (Luke vii. 40, 43, 44).

7. SIMON THE LEPER, so called from having formerly been afflicted with leprosy (Matt. xxvi. 6; Mark xiv. 3). He was of Bethany, and after the raising of Lazarus gave a feast, probably in celebration of that event, at which both Jesus and Lazarus were present (comp. John xii. 2). He was therefore probably a near friend or relation of Lazarus: some suppose that he was his brother; others that he was the husband of Mary, the sister of Lazarus, who at this feast anointed the Lord's feet, and that Lazarus abode with them. But all this is pure conjecture.

8. SIMON THE CYRENIAN, who was compelled to aid in bearing the cross of Jesus (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26). Whether this surname indicated that Simon was one of the many Jews from Cyrene who came to Jerusalem at the Passover, or that he was originally from Cyrene, although then settled at Jerusalem, is uncertain. The latter seems the more likely opinion, as Simon's two sons, Alexander and Rufus, were certainly disciples of Christ; and it was perhaps the knowledge of this fact which led the Jews to incite the soldiers to lay on him the burden of the cross. The family of Simon seems to have resided afterwards at Rome; for St. Paul, in his epistle to the church there, salutes the wife of Simon with tender-

ness and respect, calling her his 'mother,' though he does not expressly name her: 'Salute Rufus, and his mother and mine' (Rom. xvi. 13).

9. SIMON THE TANNER, with whom St. Peter lodged at Joppa (Acts ix. 43; x. 6; xvii. 32). He was doubtless a disciple. His house was by the sea-side, beyond the wall, as the trade of a tanner was one which the Jews did not allow to be carried on inside their towns.

10. SIMON MAGUS. In the eighth chapter of the Acts we read that Philip the Evangelist, whilst preaching the gospel in a city of Samaria, came in contact with a person of the name of Simon, who had formerly exercised immense power over the minds of the people by his skill in the resources of magic. So high were the pretensions of this impostor, and so profound the impression he had made on the minds of the multitude, that they not only received with readiness all that he taught, but admitted his claim to be regarded as an incarnation of the demiurgic power of God. The doctrines of Philip, however, concerning Christ as the true and only incarnation of Deity, supported by the unparalleled and beneficent miracles which he performed, had the effect of dispelling this delusion, and inducing the people to renounce their allegiance to Simon and receive baptism as the disciples of Christ. On the mind of Simon himself a deep impression was also produced. In his former pursuits he had been probably not a little of a dupe as well as a deceiver, for the belief in the reality of magical power was so widely diffused through the East that we can easily suppose Simon to have been thoroughly convinced, not only that the possession of such power was attainable, but that the charms of which he was master actually conferred upon him a portion of that power, though very far short of what he pretended to have. To his mind, therefore, the idea in all probability suggested by the miracles of Philip, the reality of which he could not doubt, was, that here was a magician of a higher order than himself—one who was possessed of charms and secrets more powerful and mysterious than those which he had obtained. To Philip, consequently, as a greater master of his science than himself, he deemed it wise to succumb, in the hope doubtless of being able ere long to participate in his knowledge and to wield his power. With this view he professed himself a disciple of Jesus, and as such was baptized by Philip.

On the news of Philip's success reaching Jerusalem, Peter and John went down to Samaria to confer upon the new converts the spiritual gifts which were vouchsafed to the primitive churches. During their visit Simon discovered that by means of prayer and the imposition of hands the apostles were able to dispense the power of the Holy Ghost; and supposing probably that in this lay the much-prized secret of their superior power, he attempted to induce the apostles to impart to him this power by offering them money. This, which for such a man was a very natural act, intimated to the apostles at once his true character (or rather, to express more accurately our conviction, it enabled them to manifest to the people and publicly to act upon what their own power of discerning spirits must have already taught them of his true character); and accordingly Peter indignantly repudiated his offer, proclaimed his utter want of all true knowledge of Christian doctrine (so we understand the words οὐκ ἔστι σοι μερίς οὐδὲ κληρος ἐν τῷ λόγῳ

τούτω, ver. 21), and exhorted him to repentance and to prayer for forgiveness. The words of Peter on this occasion, it is justly remarked by Neander, 'present the doctrine of the gospel, which so expressly intimates the absolute necessity of a right state of mind for the reception of all that Christianity conveys, in direct opposition to the Magianism, which denies all necessary connection between the state of mind and that which is divine and supernatural, brings down the divine and supernatural within the sphere of ordinary nature, and imagines that divine power may be appropriated by means of something else than that which is allied to it in man's nature, and which supplies the only point of union between the two' (*Apostol. Zeitalt.* i. 82). The solemn and threatening words of the apostle struck dread into the bosom of the impostor, who besought the apostle to pray for him that none of the things he had threatened might come upon him—an entreaty which shows that his mind still laboured under what Neander above describes as the chief error of the Magian doctrine.

After this we read no more of Simon Magus in the N. T. By the ecclesiastical writers, however, he is frequently referred to, and several curious particulars are recorded concerning him, some of which must unquestionably be abandoned to the region of fable, but many of which are apparently true. According to Justin Martyr (*Apol.* i. sec. 26), Theodoret (*Hæret. fab.* i. 1), Epiphanius (*Hæret.* xxi. 55), and others, he was a native of Gittion or Gittum, a town of Samaria. The Clementine Homilies (ii. 22) inform us that he studied at Alexandria; but their authority is very doubtful. Josephus speaks of a Simon Magus who was a dependent of Felix and the minister of his vices (*Antiq.* xx. 7. 2), and whom Neander regards as the same person with the one now under notice (*lib. cit.* p. 84). Justin says he went to Rome in the reign of Claudius, where he attracted much attention, and gained such reverence that he was worshipped as a god. The same writer affirms that he even saw a statue erected in the Tiber, between the two bridges, to his memory, and bearing the inscription 'SIMONI DEO SANCTO,' and this is repeated by many of the fathers. It is now, however, very generally supposed that Justin's partial acquaintance with the Latin language and mythology led him to mistake a statue of the Sabine deity, Semo, for one to Simon, a supposition which it is hardly possible to resist when we know that a piece of marble has been found in an island of the Tiber actually bearing the inscription SEMONI SANCO DEO FIDIO SACRUM (Salmasius, *Ad Spartianum*, p. 38; Van Dale, *De Oraculis*, p. 579; Burton, *Heresies of the Apostolic Age*, p. 374, etc.) Eusebius adds (*Hist. Eccles.* ii. 13, 14), that the popularity of the impostor was completely destroyed by St. Peter's coming to Rome; and later writers give us a wonderful legend of his destruction by the miraculous power of the apostle's prayers joined to those of St. Paul. All are agreed in regarding these legendary accounts as fabulous, but Dr. Burton has with much ingenuity endeavoured to expiscate the truth which may be involved in them. According to his view it is probable that Simon, in endeavouring to work something that should pass for a miracle, and to maintain his credit against the apostles, met with an accident which ended in his death (*lib.*

*cit.* p. 371). To us it appears more probable that the whole is a mythic fable; the silence of all the earlier fathers regarding it is sufficient to invalidate its pretensions to be viewed as history.

Simon's doctrines were substantially those of the Gnostics, and he is not without reason regarded as the first who attempted to engraft the theurgy and egotism of the Magian philosophy upon Christianity. He represented himself, according to Jerome (*In Matt.* Opp. iv. 114), as the Word of God, the Perfection, the Paraclete, the Almighty, the All of Deity; and Irenæus (i. 20) tells us he carried with him a beautiful female named Helena, whom he set forth as the first idea (*ἔννοια*) of Deity. If this be not exaggerated fable on the part of his enemies, we must suppose that such modes of speech and representation were adopted by him as suited to the highly allegorical character of Orientalism in his day: for were we to suppose him to have meant such utterances to be taken literally, we should be constrained to look upon him in the light of a madman.

SIMON, RICHARD, was born at Dieppe, May 13, 1638. He entered the congregation of the Oratory at an early age, and soon distinguished himself as a learned and laborious Hebrew scholar. He taught philosophy first at Juilly, and then at Paris, where he employed himself in forming a catalogue of the numerous and valuable Oriental MSS. in the library of the Oratory, and thence making collections which assisted him greatly in his subsequent labours. From the beginning of his career he was distinguished by a boldness of thought and action which are rarely found in members of his communion; and the first work of magnitude which he attempted was prompted by the offer of 12,000 livres by the Protestants of Charenton for a new translation of the Bible in place of that of Geneva, which was objected to as antiquated and obscure. But his plan of a version which should be equally acceptable to Protestants and Roman Catholics had no result except to bring upon him the rebukes of his Roman Catholic brethren. His celebrity is chiefly owing to his (1.) *Critical History of the O. T.*, first published in 1678. In the course of this work he denies that Moses was the author of the Pentateuch, and attributes its compilation to scribes of the time of Esdras, acting under the direction of the Great Synagogue. So daring a criticism could not fail to excite the alarm of his censor Pirot, and was by him submitted to Bossuet, who obtained an order from the Chancellor to forbid its publication until more rigorously examined. The result of the examination was a decree of council suppressing the work, and ordering all copies of it to be destroyed. One of these escaped, and was the basis of a defective edition published by the Elzevirs in Holland. A Latin translation by Aubert de Verse is still more defective. But a very correct edition, with preface, apology, marginal notes, and controversial tracts, was published at Rotterdam in 1685, by Raineer Leers. An English translation was published in London in 1682. The scandal

occasioned by this work fell on the congregation of the Oratory, and after a vain attempt by Abel-Louis de Sainte Marthe, the general of the order, to make him modify his views, he was ejected from the body, and retired to his cure at Bolleville in Normandy. Having returned to Paris after an absence of two years, he published in 1689 his (2.) *Critical History of the N. T.*, and in 1690 his (3.) *Critical History of the Versions of the N. T.* These works were well received, and it was proposed to republish his *Histories*, while Bossuet wished to engage him in the translation into Latin of a number of the theological tractates of the Greek church for the information of Catholics. But these plans fell to the ground from his refusal to alter his criticisms on the Pentateuch, and in 1693 he published at Rotterdam his (4.) *Critical History of the Principal Commentators on the N. T.*, in which he spoke very contemptuously of councils and fathers, especially St. Augustine, while he extolled the merits of Grotius and the Unitarians. His next work was (5.) *A French Translation of the N. T. with critical remarks*, printed in 1702 at Trevoux, the capital of the little state of Dombes, to whose sovereign, the Duke du Maine, he dedicated the work. But notwithstanding the *privilege* of this prince, and the approbation of Bouvet, a doctor of the Sorbonne, the keen judgment of Bossuet detected false views and dangerous principles in every part of the work, and stopped its publication. This led to a good deal of controversy, and some manœuvring on the part of Simon, who succeeded in obtaining for it the privilege of Pontchartrain, the Chancellor of France. But the Cardinal de Noailles, Archbishop of Paris, forbade its perusal by a mandate of the 15th October 1702. Simon, however, had powerful supporters, and it required all the address and resolution of Bossuet to obtain a revocation of the privilege granted by Pontchartrain, and pass against the work a mandate similar to that of the Cardinal Archbishop. He died at Dieppe, April 11, 1712, after leaving his books and MSS. to the Cathedral of Rouen.

He was a man of immense learning, and his works abound in curious and instructive observations; but he was too fond of new and paradoxical opinions, and too obstinately attached to those he had formed, never allowing that any harm could result from them. He had the fancy of writing under fictitious names, and did not scruple to disown a work which he thought it dangerous to acknowledge. He wrote many books besides the above, among which may be named *Fides Ecclesie Orientalis*, 1671 and 1682; *Ceremonies et Coutumes des Juifs d'aujourd'hui*, translated from the Italian of Leon de Modena—the edition of 1681 has a supplement on the Caraites and Samaritans; *Histoire Critique de la Creance et des Coutumes des nations du Levant*, 1684, 1711; *Histoire de l'Origine et des Progres des Revenus Ecclesiastiques*, 1684; *Novorum Bibliorum Synopsis*—this was the project of a new Polyglott to contain the Hebrew and the Greek text, and the Latin Vulgate, in three columns, 1684; the work was far advanced at the time of his death. *Ambrosii Origenis Epistola de Novis Bibliis Polyglottis* contains the plan of a dictionary and Hebrew grammar, to be used with his Polyglott.—M. H.

SIMONIS, JOH., conrector of the gymnasium, and professor of church history and antiquities in

the university of Halle, was born 10th Feb. 1698, and died 2d Jan. 1768. He was an excellent Hebraist. Besides an admirable edition of the Hebrew text of the O. T., often reprinted, he issued an *Onomasticon V. T.* 1741; *N. T. et Libb. V. T. apocryphorum*, 1762; *Lexicon Manuale Heb. et Chald.* 1752, 1771, re-edited by Eichhorn 1793, and again by Winer 1828.—W. L. A.

SIN (סִין; Sept. Σαῖς), a city of Egypt, which is mentioned in Ezek. xxx. 15, 16, in connection with Thebes and Memphis, and is described as 'the strength of Egypt,' showing it to have been a fortified place. The Sept. makes it to have been Saïs, but Jerome regards it as Pelusium. This latter identification has been generally adopted, and is scarcely open to dispute. Sin means 'mire,' and Pelusium, from the Greek *pelos*, has the same meaning, which is, indeed, preserved in the modern name Tineh, 'clay,' all doubtless derived from the muddy nature of the soil in the vicinity. Sir J. G. Wilkinson, however, supposes that the ancient native name more nearly resembled the PEREMOUN or PHEROMIS of the Copts; and the latter is doubtless the origin of the Farama of the Arabs, by which it is still known. Pelusium was anciently a place of great consequence. It was strongly fortified, 'being the bulwark of the Egyptian frontier on the eastern side, and was considered the 'key,' or, as the prophet terms it, 'the strength' of Egypt' (*Hist. Bell. Alexand.* pp. 20, 27; *Liv.* xiv. 11; *Joseph. Antiq.* xiv. 8. 1; *De Bell. Jud.* i. 8. 7; i. 9. 3). It was near this place that Pompey met his death, being murdered by order of Ptolemy, whose protection he had claimed. It lay among swamps and morasses on the most easterly estuary of the Nile (which received from it the name of Ostium Pelusiacum), and stood twenty stades from the Mediterranean (Strabo, xvi. p. 760; xvii. 801, 802; *Plin. Hist. Nat.* v. 11). The site is now only approachable by boats during a high Nile, or by land when the summer sun has dried the mud left by the inundation: the remains consist only of mounds and a few fallen columns. The climate is very unwholesome. (Wilkinson's *Mod. Egypt.* i. 406, 444; Savary's *Letters on Egypt*, i. let. 24; Henniker's *Travels*).—J. K.

SIN, THE WILDERNESS OF, the desert tract on which the Israelites entered on turning off from the Red Sea (Exod. xvi. 1; xvii. 1; Num. xxxiii. 12) [SINAI].

SINAI (סִינַי; *Swâ*; Alex. in *Judg.* v. 5, *Seuâ*, and in *Neh.* ix. 13, *Suwa*; in the N. T. *Swâ*; *Sinai*), a well-known mountain in the peninsula formed by the gulfs of Suez and Akabah. The name appears to be primeval, and its meaning is unknown. It is mentioned thirty-one times in the Pentateuch, and only four times in the rest of the O. T. (*Judg.* v. 5; *Neh.* ix. 13; *Ps.* lxxviii. 8, 17), and four in the N. T. (*Acts* vii. 30, 38; *Gal.* iv. 24, 25). It would thus appear that the name had in a great measure become obsolete at an early period.

The leading statements made regarding Sinai in the Pentateuch demand special notice, as they constitute the chief evidences in establishing its identity. A small section of the wilderness through which the Israelites passed took its name from the mountain (Exod. xix. 1, 2). In one direction was

Rephidim, only a short day's march distant; while Kibroth-hattaavah lay a day's march in another. The 'desert of Sinai,' therefore, could only have been a very few miles across.

In the third month of their journey, the Israelites 'departed from Rephidim, came into the wilderness of Sinai . . . and camped before the mount' (xix. 1, 2). The base of the mount in front of the camp appears to have been so sharply defined that barriers were put up to prevent any of the people from approaching rashly or inadvertently to 'touch the mount' (ver. 12). The 'top of the mount' was in full view from the camp; so that when the Lord 'came down' upon it, the thick cloud in which his glory was shrouded was 'in sight of all the people' (ver. 11, 16). While Moses was receiving the law on the summit of Sinai, 'the thunders and lightnings, and the voice of the trumpet' were so near the camp, that the people in terror 'removed and stood afar off,' yet still remained in sight of the mount, for 'the sight of the glory of the Lord was like devouring fire on the top of the mount in the eyes of the children of Israel' (cf. xx. 18; xxiv. 17). Upon that peak the tables of the law were twice given to Moses, with all the details of the rites and ceremonies recorded in the Pentateuch (xxi. 18; xxxiv.) Sinai was thus emphatically 'the mount of the Lord' (Num. x. 33). There the Lord spake with Moses 'face to face, as a man speaketh unto his friend' (Exod. xxxiii. 11); and there he revealed himself in such glory and majesty as were never witnessed on earth.

In these notices 'there are implied three specifications, which must all be present in any spot answering to the true Sinai:—1. A mountain-summit overlooking the place where the people stood. 2. Space sufficient, adjacent to the mountain, for so large a multitude to stand and behold the phenomena on the summit; and even when afraid, to remove afar off and still be in sight. 3. The relation between this space where the people stood and the base of the mountain must be such that they could approach and stand at 'the nether part of the mount;' that they could also touch it; and that bounds could be set round the mount' (*Bibliotheca Sac.* May 1849, p. 382).

Another point of interest to the geographer is the connection established in Scripture between Horeb and Sinai.

Horeb is mentioned before Sinai. It was the spot on which Moses had his first interview with Jehovah at the 'burning bush;' and it is called 'the mountain of God' (Exod. iii. 1, 2). When the people were at Rephidim, Moses was commanded to go and smite the rock in Horeb, and from it a supply of water was obtained (xvii. 6). An incidental notice in Exod. xxxiii. 6 shows that Horeb was beside the camp in 'the desert of Sinai;' and another notice in Deut. iv. 10-12 identifies it with Mount Sinai (cf. Deut. xviii. 16; Ps. cvi. 19). Perhaps Horeb may have been the name given to a mountain-group, while Sinai was restricted to one peak (see, however, Robinson, *B. R.* i. 120; Winer, *R. W.* s. v. 'Sinai;') Lepsius, *Letters*, p. 365; and the clever, but not convincing arguments of Sandie, pp. 208, *seq.*)

Such, then, are the general conclusions to which an examination of the Biblical narrative leads, apart altogether from ecclesiastical tradition and modern theory; and to these the writer feels himself bound to adhere.

The question now arises: Are there sufficient data to determine conclusively the mountain-peak to which the name Sinai was given? This is a question not merely of literary curiosity, but of the highest geographical importance. A brief sketch of the geography of the peninsula will best prepare the way for a satisfactory answer, and the identification of Sinai.

The physical features of the peninsula are broadly and deeply marked. In form a triangle, it is shut in on two sides by the gulfs of Akabah and Suez, and on the third by the desert of Tih. Within these outer barriers are others, enclosing what may be termed the shrine. Along the southern edge of Tih runs, like a vast wall, a bleak limestone ridge; and south of it again is a parallel belt of sandy plain, appropriately termed *Debbet er-Ramleh*. A naked gravelly plain called el-Kâa extends along the whole shore of the gulf of Suez. Between el-Kâa, Debbet er-Ramleh, and the gulf of Akabah, lies a group of mountains, triangular in shape, which forms as it were the nucleus of the peninsula, and is now called emphatically *el-Tôr*, 'The mountains.'

On the north and west the group has projecting buttresses of ruddy sandstone, on which most of the inscriptions in the 'written valley' are traced; but the main body, and all the loftiest peaks are granite, and exhibit a variety of colouring—red, yellow, purple, and green—making them objects of singular beauty when bathed in the bright sunshine. They are all, however, naked and desolate. As the eye wanders over their riven sides, and up their jagged peaks, not a tree, not a shrub, not a blade of grass is seen (cf. Olin, *Travels*, i. 389). Rugged passes, almost as bare and dry and desolate as the granite cliffs overhead, wind from the outer borders up into the centre of the group. On penetrating these ravines, a few acacias are here and there seen in a cranny of the rocks, and a clump of wild palms is occasionally met with fringing a well or fountain. In the heart of these mountains, in nature's profoundest solitude, amid scenery unsurpassed for wild and stern grandeur, history, tradition, and geography, have combined to locate Sinai, 'the mount of the Lord,' and all those wondrous events which were enacted round it.

There are three claimants for the name SINAI; and it will be necessary to examine them successively.

1. *Mount Serbâl*.—Its claims are advocated by Lepsius (*Letters from Egypt*, London 1853), Bartlett (*Forty Days in the Desert*), Stewart (*The Tent and the Khan*), and others. The arguments in its favour may be thus summed up:—It was the most conspicuous mountain in the peninsula, and therefore the best known to the Egyptian colonists. Near its northern base was the oasis of Feirân, which was probably the centre of the primeval Sinaitic population; and the summit of Serbâl would form their natural sanctuary. Moses, knowing such a fertile and well-watered spot as Feirân, would never have led the Israelites past it, but would naturally select it as the place of the permanent camp (Lepsius, pp. 356-363). Besides, it is supposed to be more in accordance with the narration of the wilderness journey than any other mountain; and it is alleged that early historical tradition is wholly in its favour.

The two last arguments are the only ones of any weight; and neither of them stands the test of

critical examination. The basis of Lepsius' argument is that Rephidim is identical with Feirân; and that Moses selected this spot as the site of a permanent camp because it was well watered and fertile; but the sacred writer tells us that in Rephidim 'there was no water for the people to drink' (Exod. xvii. 1). With strange inconsistency Lepsius affirms that the 'wonderful fountain of Feirân' was opened by the miracle recorded in Exod. xvii. If so, then how could the place have been well watered previously? But further: Rephidim was a day's march—probably a short one—from the permanent camp before Sinai (xix. 1). These facts totally overthrow the alleged argument from Scripture.

The historical argument is not more convincing, although Dean Stanley somewhat rashly says: 'It (Serbâl) was undoubtedly identified with Sinai by Eusebius, Jerome, and Cosmas; that is, by all known writers till the time of Justinian' (*S. and P.* p. 40). Eusebius merely states that 'Rephidim is a place in the wilderness by Horeb, and that there Joshua fought with Amalek near Pharan.\* Jerome only translates his words without addition or comment (he renders *ἐγγυς* by *prope*). The language of Cosmas is equally indefinite,† especially as it is known that Pharan was a pretty large district, and that Horeb is said to be *six miles* distant from it.‡

But the nature of the country around Serbal is sufficient of itself to show that it could not possibly have been Sinai. Wady Feirân is three miles distant, and from it an occasional pass only can be got at the summit. Wady Aliyât, which leads up to Serbâl, is narrow, rugged, and rocky, affording no place for a large camp. This is acknowledged on all hands (Lepsius, pp. 423, *seq.*; Bartlett, p. 57; Stanley, p. 44; Sandie, *Horeb and Jerusalem*, p. 149); and as there is no other valley or plain at the base of the mountain, it follows that Serbâl cannot be Sinai.

2. *Jebel Mûsa* is the Sinai of recent ecclesiastical tradition, and it has found some advocates among

modern travellers (Wilson, *Lands of the Bible*, i. 219; Sandie, *Horeb*, etc.) It is situated in the very centre of the mountain group; but it is neither so lofty nor so commanding as some others around it. Its elevation is only about 7000 feet, while Jebel Katherîn, three miles south, is 8700 feet, and Um Shaumer beyond it attains an altitude of 9300

486. Sketch Plan of Sinai.

feet. Jebel Mûsa is the highest point of a short isolated ridge which runs from north-west to south-east, between the two parallel ravines of Shueib and Leja. At one end (the south-east) it is bounded by a rugged wady called Sebafeyeh, at the other by the upland plain of *er-Rahah*. In Wady Shueib, on the north-east of the ridge, stands the convent of St. Catherine, with the naked cliffs rising almost perpendicularly over it. In the glen of Leja, on the opposite side, is the reputed rock of Moses. The peak of *Jebel Mûsa* ('Moses' Mountain'), which the monks identify with Sinai, is at the southern extremity of the range, overlooking Wady Sebafeyeh and a confined region of rugged gravelly hills near it. The summit is a platform about thirty paces in diameter, partly covered with ruins. At its eastern end is a little chapel, and near it a mosque. Notwithstanding the elevation the view is not extensive; and no plain is in sight on which the camp of the Israelites could have stood; nor is the base of the peak at all so clearly defined as the incidents of the sacred narrative require.

Various traditions—Jewish, Christian, and Mohammedan—have found a local habitation on this mountain. A rugged ancient path, in many places hewn into flights of steps up the granite cliffs, passes a grotto of the Virgin, the cave where Elijah

\* His words are: 'Ραφιδίμ, τόπος τῆς ἐρήμου παρὰ τὸ Χωρήβ ὄρος . . . ἐνθα καὶ πολεμεῖ Ἰησοῦς τὸν Ἀμαλὴκ ἐγγυς Φαράν (*Onomast.* s. v.)

† Εἴτα πάλιν παρενέβαλον εἰς Ῥαφιδίον, εἰς τὴν νῦν καλουμένην Φαράν· καὶ διψουσάντων αὐτῶν, πορεύεται κατὰ πρόσταξιν Θεοῦ ὁ Μωϋσῆς μετὰ τῶν πρεσβυτέρων καὶ ἡ βασιδὸς ἐν τῇ χειρὶ αὐτοῦ, εἰς Χωρήβ τὸ ὄρος, τοιούτως ἐν τῷ Σινάϊ, ἐγγυς ὄντι τῆς Φαράν ὡς ἀπὸ μιλίων ἑξ (*Topogr. Christ.* v.)

‡ The writer has not considered it necessary to discuss the argument grounded on the remarkable Siniatic inscriptions, though Lepsius presses it, and Stanley says that the natural inference from them is that Serbal 'in the earlier ages enjoyed a larger support of tradition than Gebel Mousa' (p. 39). But how can this be? Wady Mokatteb, in which most of the inscriptions are found, is the leading route to Jebel Mûsa as well as to Serbâl. Inscriptions have also been discovered on the northern road from Egypt to Jebel Mûsa by Surabet el-Khâdem; and they are much more numerous in the passes around Jebel Mûsa—in Wady Leja, Nukb Hâwy, etc.—than in Wady Aliyât, the only pass leading to Serbâl. It may be safely affirmed that the Siniatic inscriptions do not, for the present at least, affect the question at issue in any way (*Handbook*, pp. 16, *seq.*)

dwelt in Horeb, the footmarks of Mohammed's camel, and other spots equally apocryphal, in its winding course to the summit. This is the Sinai of tradition, but certainly not that of the Bible.

3. *Ras es-Sufsâfeh* is the third claimant for the name Sinai; and its claim is valid. It forms the north-western point of the ridge of which Jebel-Mûsa is the south-eastern. The name signifies 'the peak (or head) of the willow';\* and is derived from a willow-tree which grows in a cleft on its side. The summit is very clearly defined, rising high above all the other peaks near it. In front it descends in broken crags of naked granite to Wady er-Râhah. The view from it is not so extensive as that from Jebel Mûsa, but it is far more interesting and impressive. The whole extent of the plain of er-Râhah, measuring more than two miles in length, and ranging from one-third to two-thirds of a mile in breadth, is visible. The

eye can follow its windings as it runs away among the mountains in the distance. The level expanse of Wady esh-Sheikh, which joins er-Râhah, is also seen opening out on the right; while opposite it on the left is another section of plain forming a recess in the mountains. From near the summit a wild ravine runs down the front of the mountain, conveying a winter torrent into er-Râhah. Up this ravine the ascent may be made from the plain. It is rugged and steep; but an active mountaineer, such as Moses was, could easily accomplish it.

There can scarcely be a doubt that Râs es-Sufsâfeh is Sinai, 'The Mount of the Lord'; every requirement of the sacred narration is supplied, and every incident illustrated, by the features of the surrounding district. Here is a plain sufficient to contain the Israelitish camp, and so close to the mountain's base that barriers could be erected to prevent the rash or the heedless from touching it.

487. The Summit of Mount Sinai.

Here is a mountain-top where the clouds that enshrined the Lord when he descended upon it would be visible to the vast multitude, even when in fear they would withdraw from the base, and retire to a distance. From this peak the thunderings and the voice of Jehovah would resound with terrific effect through the plain, and away among the cliffs and glens of the surrounding mountains. When descending through the clouds that shrouded it, Moses could hear also the songs and shouts of the infatuated people as they danced round the golden calf; and in 'the brook that descends out of the mount' (Deut. ix. 21), through the ravine into er-Râhah, he could cast the dust of the destroyed

idol. In fact, the mountain, the plain, the streamlet, and the whole topography, correspond in every respect to the historical account given by Moses.

The words of Dean Stanley are equally graphic and convincing. 'No one who has approached the Ras Sasâfeh through that noble plain, or who has looked down upon the plain from that majestic height, will willingly part with the belief that these are the two essential features of the view of the Israelite camp. That such a plain should exist at all in front of such a cliff is so remarkable a coincidence with the sacred narrative, as to furnish a strong internal argument, not merely of its identity with the scene, but of the scene itself having been described by an eyewitness. The awful and lengthened approach, as to some natural sanctuary, would have been the fittest preparation for the coming scene. The low line of alluvial mounds at the foot of the cliff exactly answer to the 'bounds' which were to keep the people off from 'touching

\* Stanley spells it *Sasâfeh*, and is followed by most recent travellers. The proper orthography, as all Arabic scholars must know, is *Sufsâfeh*,

صفاة.

the mount.' The plain itself is not broken and uneven, and narrowly shut in, like almost all others in the range, but presents a long retiring sweep, against which the people could 'remove and stand afar off.' The cliff, rising like a huge altar, in front of the whole congregation, and visible against the sky in lonely grandeur from end to end of the whole plain, is the very image of 'the mount that might be touched,' and from which the voice of God might be heard far and wide over the stillness of the plain below, widened at that part to its utmost extent by the confluence of all the contiguous valleys. Here, beyond all other parts of the peninsula, is the adytum, withdrawn as if in the 'end of the world,' from all the stir and confusion of earthly things' (pp. 42, 43).

It is a remarkable fact that Sinai never became a place of Jewish pilgrimage. Elijah went there, but it was at the command of God, and to escape the vengeance of Jezebel. He is the only Jew, so far as history tells, who visited 'the mount of the Lord' after the time of Moses. At a very early period, however, in the Christian era, Sinai began to be an object of reverence. It appears that refugees from persecution in Egypt first sought an asylum amid the mountains. Anchorites consequently flocked to it, and convents were at length founded. The poor monks had hard fare, and were exposed during a long course of ages to persecutions and fearful massacres at the hands of the wild nomads. In the early part of the 6th century the emperor Justinian caused a church to be erected, and a fortified convent to be built round it, to protect the monks from the incursions of the Ishmaelites. It is the same which still exists in the wild ravine under the northern brow of Sinai. The number of resident monks is now usually about twenty-four, though in the 14th century it is said to have been as high as four hundred. They are ruled by a prior; but there is an archbishop who always resides at Constantinople, and is one of the four independent archbishops of the Greek Church. The library of the convent contains some 1500 printed books, and about 700 manuscripts. A few of the latter are of great antiquity and value; among them Tischendorf was so fortunate as to discover, in the year 1859, the celebrated *Codex Sinaiticus*, one of the most ancient and valuable copies of the Greek N. T. extant (Robinson, *B. R.* i. 88-144; Burckhardt, *Travels in Syria*, pp. 541-590; *Bibliotheca Sac.* May 1849, pp. 381-386; Stanley, *S. and P.* pp. 3-77; Beamont, *Cairo to Sinai*, pp. 58-85; Sandie, *Horeb and Jerusalem*, pp. 154-224. The German writers—Ritter, *Pal. und Syr.* i.; Ruppel, *Reise*; Schubert, *Reise*, ii.; and Niebuhr, *Description de l'Arabie*—may be consulted with advantage; and full descriptions of the convent, with views, are given in Laborde's *Mount Sinai and Petra*, and in Bartlett's *Forty Days in the Desert*).

The remarks of Mr. Beamont, a recent and observant traveller, are of some importance, as showing that some traces of the ancient Scripture names still linger around Mount Sinai: 'Two or three facts seem to me well worthy of observation. Immediately above Wady esh-Sheikh rises Gebel Fureia; the front of this is named Gebel *Seneh*. Of this name our sheikh from Tor knew nothing; but our guide on Ras es-Sufsafeh needed no prompting to give it its designation. This cluster of Fureia or Zipporah is nearly parallel with the cluster of Jebel Musa, and extends northward from

it to the head of the central Sinaitic cluster. Separated from the same central cluster of Jebel Musa on the left by Wady Leja runs another parallel range of Sinaitic rocks. To one of these, and separated from Gebel Fureia by the broad er-Rahah, the name *Urrebbek* is given. This name also, as well as the name of the other group, was spontaneously assigned to it by our guide Mohammed. I was rather sceptical on the point, and made him repeat his designation three or four times, that there might be no mistake. My orthography is intended to express, as nearly as I can, the sound of his utterance, for it would have been vain to ask him to spell the word. Supposing, then, that his nomenclature was correct, we have a cluster bearing the name of *Seneh* (*Sinai*; cf. Stanley, p. 42) on the right of Gebel Musa, and one bearing the name *Urrebbek* (*Horeb*) on the left; the central cluster itself has no local appellative, and is called after the prophet Moses. May we not, then, suppose that this central cluster bore the name Sinai or Horeb indiscriminately, serving as the nucleus to which the ranges of Sinai and Horeb trended; and that, after the delivery of the law from the peak of Ras es-Sufsafeh, this bare the special name of Mountain of Moses; and that subsequently the local designations were restricted to the ridges on the right and left?' (*Cairo to Sinai*, pp. 81, 82).

The name *Wady er-Rahah*, which is given to the upland plain in front of Ras es-Sufsafeh, is also

suggestive. It signifies 'The vale of rest' (رَاحَة),

rest after labour, as that enjoyed by beasts of burden at the close of the day. This is very expressive as applied to the long encampment of the Israelites in this plain, after the toilsome march from Egypt. The monks, as has been stated, give the name of Jebel Mûsa to the southern peak of the central ridge, identifying it with Sinai; but they identify Ras es-Sufsafeh with Horeb. There are several traditional sites pointed out in Wady er-Rahah along the base of Sufsafeh, but they are so manifestly apocryphal as to be scarcely worth notice; such as the hill on which Aaron stood, the mould in which the golden calf was formed, and the pit of Korah (*Handbook*, p. 35).

It is worthy of note that no other district in the whole peninsula, with the exception of a small portion of Wady Feirân, possesses such supplies of water and pasture as that around Mount Sinai. When the springs and wells are dry elsewhere, the Bedawin resort hither. On Sinai itself, on Jebel Katherin, in Wady el-Leja, in the convent, and in the plain of Rahah, are perennial sources. The pastures, too, among the rocks, and in the glens and little upland plains, are comparatively abundant (see Olin, *Travels*, i. 386, 415).—J. L. P.

SINAPI (*Σινάπι*), translated 'mustard tree' in the A. V. of the N. T., has engaged the attention of many commentators, great difficulty having been experienced in finding a plant with the requisite characteristics. The subject was investigated by the present writer in a paper read before the Royal Asiatic Society on the 16th March 1844. The passages of the N. T. in which the word occurs are Matt. xiii. 31; xvii. 20; Mark iv. 31; Luke xiii. 19; xvii. 6; and it may easily be shown how unsuitable are the plants which have been adduced to the circumstances of the sacred narrative. There

is a tree found near Jerusalem, but most abundantly on the banks of the Jordan and round the sea of Tiberias, the seed of which is employed as a substitute for mustard; it is called *khardal*, which, indeed, is the common Arabic name for mustard. There are different species of *khardal*:—1. *Khardal*, or common mustard; 2. *Khardal barree*, or wild mustard; 3. *Khardal roomee*, Turkish mustard. The last appears to be the plant referred to. In the writer's *Illustrations of Himalayan Botany*, he found a tree of N. W. India, which was there called *khajjal*, and which appeared possessed of the requisite properties, but he could not find it mentioned in any systematic work, or local Flora, as a native of Palestine. The plant is *Salvadora Persica*, a large shrub, or tree of moderate size, a native of the hot and dry parts of India, of Persia,

488. *Salvadora Persica*.

and of Arabia. Dr. Roxburgh describes the berries as much smaller than a grain of black pepper, having a strong aromatic smell, and a taste much like that of garden cresses. Dr. Lindley informed the writer that he had seen them in a collection made by Bové. Lastly, Irby and Mangels, in their travels, mention a tree which they suppose to be the mustard tree of Scripture. They met with it while advancing towards Kerek from the southern extremity of the Dead Sea. It bore its fruit in bunches resembling the currant; and the seeds had a pleasant, though strongly aromatic taste, nearly resembling mustard. They say: 'We think it possible that this is the tree our Saviour alluded to in the parable of the mustard seed, and not the mustard plant which we have in the north, and which, even when growing large, can never be called a tree, whereas the other is really such, and birds might easily, and actually do, take shelter under its shadow.'

It is interesting to know that the name *khajjal* is applied, even in so remote a country as the north-west of India, to the same plant which, in Syria, is called *khardal*, and which no doubt is the *khardal* of the Talmudists, one of whom describes it as a tree of which the wood was sufficient to cover a potter's shed; and another says that he was wont to climb into it, as men climb into a fig-tree. Hence the author has no doubt but that *Salvadora Persica* is the mustard tree of Scripture. The plant has a small seed, which produces a large

tree with numerous branches, in which the birds of the air may take shelter. The seed is possessed of the same properties, and is used for the same purposes, as mustard, and has a name, *khardal*, of which *sinapi* is the true translation, and which, moreover, grows abundantly on the very shores of the sea of Galilee, where our Saviour addressed to the multitude the parable of the mustard seed.—J. F. R.

SINIM (סִינִים; Sept. γῆ Περσῶν), a people whose country, 'land of Sinim,' is mentioned only in Is. xlix. 12, where the context implies a remote region, situated in the eastern or southern extremity of the earth. Many Biblical geographers think this may possibly denote the Sinese or Chinese, whose country is Sina, China. This ancient people were known to the Arabians by the name of

سِينَ, *Sin*, and to the Syrians by that of سِينَ, *Tsini*; and a Hebrew writer may well have heard of them, especially if sojourning at Babylon, the metropolis, as it were, of all Asia. This name appears to have been given to the Chinese by other Asiatics; for the Chinese themselves, though not unacquainted with it, do not employ it, either adopting the names of the reigning dynasties, or ostentatiously assuming high-sounding titles—*ex. gr.* Tchungkue, 'central empire.' But when the name was thus given by other nations, and whence it was derived, is uncertain. The opinion of those writers is possibly correct who suppose that the name סִינִים, *Sinese*, came from the fourth dynasty, called Tshin, which held the throne from 249 to 206 B.C. (Du Halde, *Descript. de la Chine*, i. sec. 1, p. 306; A. Rémusat, *Nouv. Mélanges Asiatiques*, ii. 334, *seq.*; Klaproth, *Journal Asiat.* x. 53, *seq.*) A people called Tshinas are spoken of in the laws of Menu, and the name of this dynasty may have been known among foreign nations long before it acquired the sovereign power over all China. See this view more largely stated by Gesenius (*Thesaurus*, pp. 948-950). It is not void of probability, but objections to it are obvious and considerable. Some, therefore, think that by the Sinim the inhabitants of Pelusium (*Sin*) are, by synecdoche, denoted for the Egyptians (Bochart, *Phaleg*, iv. 27). But as the text seems to point to a region more distant, others have upheld the claims of the people of Syene, taken to represent the Ethiopians (Michaelis, *Spicil.* ii. 32, *seq.*; *Suppl.* p. 1741, *seq.*) [SYENE.] If, however, 'the land of Sinim' was named either from *Sin* or *Syene*, it is remarkable that the LXX., who knew Egypt well, should have gone eastward in search of it, even so far east as Persia; and if they considered it as lying in the remote eastern parts of the Persian empire, which extended to the borders of India, the great step which is thus taken in the direction of China would give some support to the identification of the Chinese with the Sinim.—J. K.

SINITE (סִינִי; Sept. Ἀσσηναῖος), a people probably near Mount Lebanon (Gen. x. 17; 1 Chron. i. 15). Strabo mentions a city in Lebanon called Sinna (*Geog.* xvi. 756). Jerome also speaks of a place called Sini, not far from Arca (*Quæst. Heb. in Gen.*)

SIN-OFFERING. [OFFERING.]

SION (שִׁיּוֹן; Sept. Σῴων), a name (perhaps the ancient name) of Mount Hermon (Deut. iv. 48). In the Apocryphal books and in the N. T. Mount Zion (צִיּוֹן) is called Sion (Σῴων); comp. 1 Maccab. iv. 37, 60; v. 54, etc.; Heb. xii. 22; Rev. xiv. 1.

SIONITA, GABRIEL. [GABRIEL SIONITA.]

SIRIM (סִרִּים) occurs in several passages, *ex. gr.* in Eccles. vii. 6, 'as the crackling of thorns (*sirim*) under a pot,' etc.; Is. xxxiv. 13, 'And thorns (*sirim*) shall come up in her palaces,' etc.; Hosea ix. 6; Amos iv. 2; Nahum i. 10). The LXX. and other translators have employed words signifying thorns as conveying the meaning of *sirim*, but nothing has been advanced to lead us to select one plant more than another.—J. F. R.

SIRION or SHIRION (שִׁרְיֹן, Deut. iii. 9; שִׁרְיֹן, Ps. xxix. 6), the Sidonian name for Hermon. The word signifies breastplate, and Gesenius supposes it may have been imposed as a name on Mount Hermon from some fancied resemblance of that elevation to a breastplate, as the Greek Σωπῆξ was the name of a hill near Magnesia.—W. L. A.

SIRPAD (סִרְפָּד) is mentioned only once by Isaiah (lv. 13): 'And instead of the brier (*sirpad*) shall come up the myrtle.' Though this has generally been considered a thorny and prickly plant, it does not follow from the context that such a plant is necessarily meant. It would be sufficient for the sense that some useless or insignificant plant be understood, and there are many such in desert and uncultivated places. In addition to *Paliurus Carduus*, *Urtica*, *Conyza*, species of *Polygonum*, of *Euphorbia*, etc., have been adduced; and also *Ruscus aculeatus*, or 'butcher's broom.'—J. F. R.

SIS (סִיס) or SUS (סוּס) occurs only in Is. xxxviii. 14, Jer. viii. 7, where it is translated *crane* in the A. V. The LXX. give χελιδών, and this is probably the true meaning, as Bochart has shown (*Hieroz.* ii. 1. 69), although Rabbinical writers produce Arabic authority to prove that *Sis* is the name of a long-legged bird. *Sis*, however, is an imitative name expressive of the swallow's voice or twitter. Bochart says that the Venetians call the swallow *Zisilla*. He also calls attention to the connection between *Sis* and the Egyptian *Isis*, of whom it was fabled that she was turned into a swallow.

The species of swallows in Syria and Palestine, so far as they are known, appear all to be the same as those of Europe: they are—1. *Hirundo rustica* or *domestica*, the chimney swallow, with a forked tail, marked with a row of white spots, whereof *Hirundo Syriaca*, if at all different, is most likely only a variety.

2. *Hirundo Urbica*, the martin or common window swallow. These two are most likely the species comprehended under the name of *Sis*.

3. *Hirundo Riparia*, sand-martin or shore-bird, not uncommon in northern Egypt, near the mouths of the Delta, and in southern Palestine, about Gaza, where it nestles in holes, even on the sea-shore.

4. *Hirundo Assus*, the swift or black martin, distinguished by its larger size, short legs, very long

wings, forked tail, and by all the toes of the feet turning forward: these, armed with small, crooked, and very sharp claws, enable the bird to hang against the sides of walls, but it cannot rise from the ground on account of the length of its wings. The last two, but more particularly this species, we take to be the *Deror*, on account of the name *Dururi*; which was most probably applied to it, because the swift martin prefers towers, minarets, and ruins to build in, and is, besides, a bird to which the epithet of 'free' is particularly ap-

489. The Swift.

plicable [DEROR]. On the European coast of the Mediterranean it bears the name of *Barbota*, and in several parts of France, including Paris, is known by the vulgar name of 'le Juif,' the Jew; and, finally, being the largest and most conspicuous bird of the species in Palestine, it is the type of the heraldic martlet, originally applied in the science of blazon as the especial distinction of Crusader pilgrims, being borrowed from Oriental nations, where the bird is likewise honoured with the term *Hadjji*, or Pilgrim, to designate its migratory habits.—C. H. S.

SISERA (סִסְרָא, *battle array*; Sept. Σισάρα).

1. The general in command of the mighty army of the Canaanitish king Jabin. As this is the only instance in those early times of armies being commanded by other than kings in person, the circumstance, taken in connection with others, intimates that Sisera was a general eminent for his abilities and success. He was, however, defeated by Barak, and slain (Judg. iv. 2-22), under the circumstances which have been described in the article Jael. (See Stanley, *Lectures on the Jewish Church*, Lect. xiv.)

2. The head of one of the families that came up with Zerubbabel (Ezra ii. 53; Neh. vii. 55). They appear among the Nethinim, and were probably the descendants of a Canaanite captive. [NETHINIM.]

SIVAN (סִיָּן; Sept. Σῴων), the third month of the Hebrew year, from the new moon of June to the new moon of July. The name admits of a Hebrew etymology; but as it occurs only in Esther viii. 9, it is better to regard it as of Persian origin, like the other names of months—the corresponding Persian month being called *Sefendarmed*; Zend, *Çpenti Armaiti*; Pehlvi. *Sapandomad* (Benfey,

*Monatsnamen*, pp. 13, 41, *seq.*; 122, *seq.*; *Gesen. Thesaur.* p. 946).

SLAVE (עֶבֶד; Sept. *παῖς*, δούλος, οἰκέτης; Vulg. *servus*; A. V., *servant* and *bondman*; Fem. אִמָּה and עֲבֵדָה, δούλη, παιδίσκη, οἰκέτις, *ancilla*). The term slavery, though frequently applied to the Jewish system of servitude, is not wholly appropriate. Among the Greeks and Romans it properly expressed the legal condition of captives taken in war, or the victims of the existing slave-trade and the offspring of female slaves. Those slaves were held to be the absolute property of their masters, and their slavery was regarded as perpetual and hereditary. Nor does Jewish servitude bear any resemblance to modern slavery, which, however it may differ from the Greek and Roman in some of its minor incidents, resembles it in its essential principles. If under the Roman law slaves were held 'pro nullis, pro mortuis, pro quadrupedibus,' so under the law of some modern Christian states they have been adjudged to be chattels personal in the hand of their owners, to all intents, constructions, and purposes whatsoever; and their slavery, like that of the ancient Romans, is, as a necessary consequence, perpetual and hereditary.

It is difficult to trace the origin of slavery. It may have existed before the deluge, when violence filled the earth, and drew upon it the vengeance of God. But the first direct reference to slavery, or rather slave-trading, in the Bible, is found in the history of Joseph, who was sold by his brethren to the Ishmaelites (Gen. xxxvii. 27, 28). In Ezek. xxvii. 12, 13, we find a reference to the slave-trade carried on with Tyre by Javan, Tubal, and Meshech. And in the Apocalypse we find enumerated in the merchandise of pagan Rome (the mystic Babylon) *slaves* (σῶματα) and the souls of men (Rev. xviii. 13).

The sacred historians refer to various kinds of bondage:—

1. *Patriarchal Servitude*.—The exact nature of this service cannot be defined; there can be no doubt, however, that it was regulated by principles of justice, equity, and kindness. The servants of the patriarchs were of two kinds, those 'born in the house,' and those 'bought with money' (Gen. xvii. 13). Abraham appears to have had a large number of servants. At one time he armed three hundred and eighteen young men, 'born in his own house,' with whom he pursued the kings who had taken 'Lot and his goods, and the women also, and the people,' and recaptured them (Gen. xiv. 1-16). The servants born in the house were perhaps entitled to greater privileges than the others. Eliezer of Damascus, a home-born servant, was Abraham's steward, and, in default of issue, would have been his heir (Gen. xv. 2-4). This class of servants was honoured with the most intimate confidence of their masters, and was employed in the most important services. An instance of this kind will be found in Gen. xxiv. 1-9, where the eldest or chief servant of Abraham's house, who ruled over all that he had, was sent to Mesopotamia to select a wife for Isaac, though then forty years of age. The authority of Abraham was that of a prince or chief over his patriarchate or family, and was regulated by usage and the general consent of his dependents. It could not have been otherwise in his circumstances; nor,

from the knowledge which the Scriptures give of his character, would he have taken advantage of any circumstances to oppress or degrade them: 'For I know him, saith the Lord, that he will command his children and his household after him, and they shall keep the way of the Lord, to do justice and judgment, that the Lord may bring upon Abraham that which he hath spoken of him' (Gen. xviii. 19). The servants of Abraham were admitted into the same religious privileges with their master, and received the seal of the covenant (Gen. xvii. 9, 14, 24, 27).

There is a clear distinction made between the 'servants' of Abraham and the things which constituted his property or wealth. Abraham was very rich in cattle, in silver, and in gold (Gen. xiii. 2, 5). But when the patriarch's power or greatness is spoken of, then servants are spoken of as well as the objects which constituted his riches (Gen. xxiv. 34, 35). It is said of Isaac: 'And the man waxed great, and went forward, and grew until he became *very great*, for he had possession of flocks, and possession of herds, and great store of *servants*' (Gen. xxvi. 13, 14, 16, 26, 28, 29). When Hamor and Shechem speak to the Hivites of the riches of Jacob and his sons, they say: 'Shall not their cattle and their substance and every beast of theirs be ours?' (Gen. xxxiv. 23). Jacob's wives say to him: 'All the *riches* which God hath taken from our father, that is ours and our children's.' Then follows an inventory of property: 'All his cattle,' 'all his goods,' 'the cattle of his getting.' His numerous servants are not included with his property (comp. Gen. xxxi. 43-16, 18). When Jacob sent messengers to Esau, wishing to impress him with an idea of his state and sway, he bade them tell him not only of his *riches*, but of his *greatness*, and that he had oxen and asses and flocks, and men-servants and maid-servants' (Gen. xxxii. 4, 5). Yet in the present which he sent there were no servants, though he manifestly selected the most valuable kinds of property (Gen. xxxii. 14, 15; see also xxxiv. 23; xxxvi. 6, 7). In no single instance do we find that the patriarchs either gave away or sold their servants, or purchased them of *third* persons. Abraham had servants 'bought with money.' It has been assumed that they were bought of third parties, whereas there is no proof that this was the case. The probability is that they sold themselves to the patriarch for an equivalent; that is to say, they entered into voluntary engagements to serve him for a longer or shorter period of time, in return for the money advanced them. It is a fallacy to suppose that whatever *costs* money *is* money or property. The children of Israel were required to purchase their first-born (Num. xviii. 15, 16; iii. 45, 51; Exod. xiii. 13; xxxiv. 20). They were, moreover, required to pay money for their own souls; and when they set themselves or their children apart by vow unto the Lord, the price of release was fixed by statute (Lev. xxvii. 2-8). Boaz bought Ruth (Ruth iv. 10). Hosea bought his wife (Hos. iii. 2). Jacob bought his wives Rachel and Leah; and not having money, paid for them in labour, seven years apiece (Gen. xxix. 16-23). That the purchase of wives, either with money or by service, was the general practice, is plain from such passages as Exod. xxii. 17, and 1 Sam. xviii. 25. But the idea of property does not appear in any of these purchases. For the various ways in

which the terms 'bought,' 'buy,' and 'bought with money,' are used, consult Neh. v. 8; Gen. xlvii. 18-26, etc. In Lev. xxv. 47 will be found the case of the Israelite who became the servant of the stranger. The words are: 'If he sell himself unto the stranger.' Yet the 51st verse says that this servant was 'bought,' and that the price of the purchase was paid to himself. For a further clue to Scripture usage, the reader is referred to 1 Kings xxi. 20, 25; 2 Kings xvii. 17; Is. lv. 1; lli. 3; see also Jer. xxxiv. 14; Rom. vi. 16; vii. 14; John viii. 34. Probably Job had more servants than either of the patriarchs to whom reference has been made (Job i. 2, 3). In what light he regarded, and how he treated, his servants, may be gathered from Job xxxi. 13-23. And that Abraham acted in the same spirit we have the divine testimony in Jer. xxii. 15, 16, 17, where his conduct is placed in direct contrast with that of some of his descendants, who used their neighbour's service without wages, and gave him not for his work (ver. 13).

2. *Egyptian Bondage*.—The Israelites were frequently reminded, after their exode from Egypt, of the oppressions they endured in that 'house of bondage' from which they had been delivered by the direct interposition of God. The design of these admonitions was to teach them justice and kindness towards their servants when they should become settled in Canaan (Deut. v. 15; viii. 14; x. 19; xv. 15; xxiii. 7, etc.), as well as to impress them with gratitude towards their great deliverer. The Egyptians had domestic servants, who may have been slaves (Exod. ix. 14, 20, 21; xi. 5). But the Israelites were not dispersed among the families of Egypt—they formed a special community (Gen. xli. 34; Exod. viii. 22, 24; ix. 26; x. 23; xi. 7; iv. 29; ii. 9; xvi. 22; xvii. 5; vi. 14). They had exclusive possession of the land of Goshen, 'the best part of the land of Egypt.' They lived in permanent dwellings, their own houses, and not in tents (Exod. xii. 22). Each family seems to have had its own house (Exod. xii. 4; comp. Acts vii. 20); and judging from the regulations about eating the passover, they could scarcely have been small ones (Exod. xii. etc.) They appear to have been well clothed (Exod. xii. 11). They owned 'flocks and herds, and very much cattle' (Exod. xii. 4, 6, 32, 37, 38). They had their own form of government; and although occupying a province of Egypt, and tributary to it, they preserved their tribes and family divisions, and their internal organisation throughout (Exod. ii. 1; xii. 19, 21; vi. 14, 25; v. 19; iii. 16, 18). They had to a considerable degree the disposal of their own time (Exod. iii. 16, 18; xii. 6; ii. 9; iv. 27, 29, 31). They were not unacquainted with the fine arts (Exod. xxxii. 4; xxxv. 22, 35). They were all armed (Exod. xxxii. 27). The women seem to have known something of domestic refinement. They were familiar with instruments of music, and skilled in the working of fine fabrics (Exod. xv. 20; xxxv. 25, 26); and both males and females were able to read and write (Deut. xi. 18, 20; xvii. 19; xxvii. 3). Their food was abundant, and of great variety (Exod. xvi. 3; Num. xi. 4, 5; xx. 5). The service required from the Israelites by their taskmasters seems to have been exacted from males only, and probably a portion only of the people were compelled to labour at any one time. As tributaries,

they probably supplied levies of men, from which the wealthy appear to have been exempted (Exod. iii. 16; iv. 29; v. 20). The poor were the oppressed; 'and all the service wherewith they made them serve was with rigour' (Exod. i. 11-14). But Jehovah saw their 'afflictions and heard their groanings,' and delivered them, after having inflicted the most terrible plagues on their oppressors.

3. *Jewish Servitude*.—Whatever difficulties may be found in indicating the precise nature of patriarchal servitude, none exists in reference to that which was sanctioned and regulated by the Mosaic institutes.

The moral law is a revelation of great principles. It requires supreme love to God and universal love among men, and whatever is incompatible with the exercise of that love is strictly forbidden and condemned. Hence immediately after the giving of the law at Sinai, as if to guard against all slavery and slave-trading on the part of the Israelites, God promulgated this ordinance: 'He that stealeth a man and selleth him, or if he be found in his hands, he shall surely be put to death' (Exod. xxi. 16; Deut. xxiv. 7). The crime is stated in its threefold form, man-stealing, selling, and holding; the penalty for either of which was death. The law punished the stealing of mere property by enforcing restitution, in some cases twofold, in others fivefold (Exod. xxii. 14). When property was stolen, the legal penalty was compensation to the person injured; but when a man was stolen, no property-compensation was allowed; death was inflicted, and the guilty offender paid the forfeit of his life for his transgression; God thereby declaring the infinite dignity and worth of man, and the inviolability of his person. The reason of this may be found in the great fact that God created man in his own image (Gen. i. 26-28)—a high distinction, more than once repeated with great solemnity (v. 1; and ix. 6). Such was the operation of this law, and the obedience paid to it, that we have not the remotest hint that the sale and purchase of slaves ever occurred among the Israelites. The cities of Judæa were not, like the cities of Greece and Rome, slave-markets, nor were there found throughout all its coasts either helots or slaves.

[There were three causes of servitude to native Hebrews: *i.* A man might be constrained by poverty, especially when in debt, to sell himself to another Hebrew (Lev. xxv. 39). This was, however, to be a purely voluntary act on his part; there is no evidence that the law authorised a creditor forcibly to constrain his debtor to servitude, though at a later period usage seems to have sanctioned this (2 Kings iv. 1; Neh. v. 5; Matt. xviii. 25). The law also prescribed that the person so selling himself should be treated as a hired servant and receive wages (Lev. xxv. 39, 40), so that this servitude really amounted to nothing more than that the man bound himself to serve a particular master as a hired servant for a specified time. Necessity might also compel a Hebrew to bind himself in the same way to a stranger resident in the land; in this case it became the duty of his kindred to rescue him if they could; but if they could not, or if he could not save enough out of his wages to redeem himself, he must serve until the year of jubilee brought him release (Lev. xxv. 47-54). *ii.* The law enacted servitude as a penalty for the commission of theft when restitution could not be made as the law prescribed (Exod. xxii. 1-14). It was

provided, however, that this servitude should last only until the bondman had by his labour made restitution to the amount of his theft. *iii.* The law permitted a man to sell his daughter to another man to be his wife, or the wife of his son (Exod. xxi. 7). The woman thus sold was not free to go out at the expiry of a period like the men-servants; but, on the other hand, the man to whom she was sold came under obligation, if he did not wish to make her his wife, to allow her to be redeemed, or if he betrothed her to his son, to make provision for her as for a daughter, and if either he or his son, after marrying her, took another wife, this was in no respect to be to her disadvantage; in case of his violating these conditions, she was at liberty to go out free. A Hebrew master might also give to his bond-servant a wife; and if the husband, on obtaining his freedom, chose to leave his master's service, the woman and her children remained with the master (Exod. xxi. 4, 5).

As respects those who were not Hebrews, they might become the property of Hebrew masters, either as captives taken in war (Deut. xx. 14; Num. xxxi. 26, ff.) or by being purchased of foreign dealers (Lev. xxv. 44-46). According to the Talmud, as explained by Bartenora and Maimonides (*Mish. Kadush. i. 3*), any person doing a slave's work became thereby a slave. Such were considered their master's property in a sense in which the Hebrew slave was not.

That the servants in an Israelitish household were of different grades may be inferred from the nature of the case; but our information on that subject is scanty. Eliezer, the servant of Abraham, is described as the steward of his house; and there was, doubtless, in all families of wealth, such an officer (comp. Luke xvi. 1, ff.) Among the female servants the *Amah* was superior to the *Shipchah* (comp. 1 Sam. xxv. 41); the former was probably the housekeeper, the latter a servant of all work. In a position of peculiar importance stood the nurse. [NURSE.]

Servitude among the Hebrews was rendered easy by many benevolent provisions. The master was not suffered to forget that naturally he and his servant were equals; each returning Sabbath reminded him of this, when his servant was entitled to rest as well as he (Deut. v. 14, 15; comp. Job xxxi. 13, 14).] However acquired, the law gave the Jewish servants many rights and privileges: they were admitted into covenant with God (Deut. xxix. 10, 13); they were guests at all the national and family festivals (Exod. xii. 43, 44; Deut. xii. 18; xvi. 10-16); they were stately instructed in morals and religion (Deut. xxxi. 10-13; Josh. viii. 33-35; 2 Chron. xvii. 8, 9; xxxv. 3; xxxiv. 30; Neh. viii. 7, 8); they were released from their regular labour nearly one-half of their term of servitude—viz. every seventh year (Lev. xxv. 3-6); every seventh day (Exod. xx.).] at the three annual festivals (Exod. xxxiii. 17; xxxiv. 23)—viz. the Passover and Feast of Weeks, which lasted each seven days, and the Feast of Tabernacles, which lasted eight. Also on the new moons, the Feast of Trumpets, and the Day of Atonement. Besides these were the local festivals (Judg. xxi. 19; 1 Sam. ix. 12, 22, etc.), and the various family feasts, as the weaning of children, marriages, sheep-shearing, and circumcisions; the making of covenants, etc. (1 Sam. xx. 6, 28, 29). To these must be added the Feast of Purim, which lasted three days,

and the Dedication, which lasted eight. The servants of the Israelites were protected by the law equally with their masters (Deut. i. 16, 17; xxvii. 19; Lev. xix. 15; xxiv. 22; Num. xv. 29); and their civil and religious rights were the same (Num. xv. 15, 16, 29; ix. 14; Deut. i. 16, 17; Lev. xxiv. 22). [MURDER.] To these might be added numerous passages which represent the Deity as regarding alike the natural rights of all, and making for all an equal provision (2 Chron. xix. 7; Prov. xxiv. 23; xxviii. 21; Job xxxiv. 19; 2 Sam. xiv. 14; Eph. vi. 9). Finally, these servants had the power of changing their masters, and of seeking protection where they pleased (Deut. xxiii. 15, 16); and should their masters by any act of violence injure their persons, they were released from their engagements (Exod. xxi. 26, 27). The term of Hebrew servitude was six years, beyond which they could not be held unless they entered into new engagements (Exod. xxi. 1-11; Deut. xv. 12); but it might be greatly shortened by the occurrence of the year of Jubilee, when all went free.

[JUBILEE.] In the case of strangers, over whom the rights of the master were comparatively absolute (Lev. xxv. 44-46), servitude terminated in every case on the return of the jubilee, when liberty was proclaimed to all (Lev. xxv. 8, 10, 54). On one occasion the state of the sexennial slavery was violated, and the result was fearful (Jer. xxxiv. 8-22). See also Exod. xxi. 20; Lev. xix. 20-22; Tobit x. 10 (*σώματα*); Ecclus. vii. 20, 21; x. 25; xxxiii. 24-31. The slave, however, might be manumitted at any term by the master (Exod. xxi. 26, 27; Lev. xix. 20).

[If a servant did not choose to go free when the period of his servitude terminated, his master was required to signify this formally to the judges, and then to take an awl and bore it through the servant's ear (through the hole made for the ear-ring probably), so as to fasten him to the door-post; after which he became the master's servant in perpetuity. The same law held in the case of a maid-servant (Exod. xxi. 5, 6; Deut. xv. 16, 17). Whether this engagement was affected by the jubilee is a point of uncertainty. Jewish opinion is in favour of the affirmative (Joseph. *Antiq.* iv. 8. 28); but the other view is to be preferred. [JUBILEE.]

No provision of the law authorised a master to inflict personal chastisement on a servant. In the case of children born in the house, however, such chastisement would be inflicted as a matter of course when deserved; and there are indications that even in the case of adults it was not unusual to inflict it. The law may be regarded as tacitly recognising it, for it provides that if a master shall destroy the eye or strike out the tooth of his servant, whether male or female, the party so injured shall be entitled to freedom (Exod. xxi. 26, 27). Should the servant die under his master's hand, the law enacted that it should be held as a case of murder. [MURDER.] Such provisions show that the right over life and limb claimed by the slave-masters of Greece and Rome in respect of their servants was not recognised among the Hebrews.]

4. *Gibeonitish Servitude.*—The condition of the inhabitants of Gibeon, Chephirah, Beeroth, and Kirjath-jearim, under the Hebrew commonwealth, was not that of slavery. It was voluntary (Josh. ix. 8-11). They were not employed in the families of the Israelites, but resided in their own cities,

tended their own flocks and herds, and exercised the functions of a distinct though not independent community (Josh. x. 6-18). The injuries inflicted on them by Saul were avenged by the Almighty on his descendants (2 Sam. xxi. 1-9). They appear to have been devoted exclusively to the service of the 'house of God' or the Tabernacles, and only a few of them comparatively could have been engaged at any one time. The rest dwelt in their cities, one of which was a great city, as one of the royal cities. The service they rendered may be regarded as a natural tribute for the privilege of protection. No service seems to have been required of their wives and daughters. On the return from the Babylonish captivity they dwelt at Ophel (Neh. iii. 26). See also 1 Chron. ix. 2; Ezra ii. 43; Neh. vii. 25; viii. 17; x. 28; xi. 21 [NETHINIM].

5. *Roman Slavery*.—Our limits will not allow us to enter into detail on the only kind of slavery referred to in the N. T., for there is no indication that the Jews possessed any slaves in the time of Christ. Suffice it therefore to say that, in addition to the fact that Roman slavery was perpetual and hereditary, the slave had no protection whatever against the avarice, rage, or lust of his master. The bondsman was viewed less as a human being, subject to arbitrary dominion, than as an inferior animal, dependent wholly on the will of his owner. The master possessed the uncontrolled power of life and death over his slave—a power which continued at least to the time of the Emperor Hadrian. He might, and frequently did, kill, mutilate, and torture his slaves, for any or for no offence, so that slaves were sometimes crucified from mere caprice. He might force them to become prostitutes or gladiators; and instead of the perpetual obligation of the marriage-tie, their temporary unions (*contubernia*) were formed and dissolved at his command, families and friends were separated, and no obligation existed to provide for their wants in sickness or in health. But, notwithstanding all the barbarous cruelties of Roman slavery, it had one decided advantage over that which was introduced in modern times into European colonies, both law and custom being decidedly favourable to the freedom of the slave (*Inquiry into the State of Slavery among the Romans*, by W. Blair, Esq., 1833). The Mohammedan law also, in this respect, contrasts favourably with those of the European settlements.

6. *Christianity in relation to Slavery*.—The laws which the great Deliverer and Redeemer of mankind gave for the government of his kingdom, were those of universal justice and benevolence, and as such were subversive of every system of tyranny and oppression. To suppose, therefore, as has been rashly asserted, that Jesus or his apostles gave their sanction to the existing systems of slavery among the Greeks and Romans, is to dishonour them. That the reciprocal duties of masters and servants (*δοῦλοι*) were inculcated, admits, indeed, of no doubt (Col. iii. 22; iv. 1; Tit. ii. 9; 1 Pet. ii. 18; Eph. vi. 5-9). But the performance of these duties on the part of the masters, supposing them to have been slave-masters, would have been tantamount to the utter subversion of the relation. There can be no doubt either that 'servants under the yoke,' or the slaves of heathens, are exhorted to yield obedience to their masters (1 Tim. vi. 1). But this argues no appro-

val of the relation; for—(1.) Jesus, in an analogous case, appeals to the paramount law of nature as superseding such temporary regulations as the 'hardness of men's hearts' had rendered necessary; and (2.) St. Paul, while counselling the duties of contentment and submission under the inevitable bondage, inculcates at the same time on the slave the duty of adopting all legitimate means of obtaining his freedom (1 Cor. vii. 20, 21). We are aware that the application of this passage has been denied by Chrysostom, Photius, Theodoret, and Theophylact, who maintain that it is the state of slavery which St. Paul here recommends the slave to prefer. But although this interpretation is indeed rendered admissible by the context, yet the more received meaning, or that which counsels freedom, is both more easily connected with the preceding phrase, 'if thou mayest be made free, use it rather,' and is, as Neander observes, 'more in accordance with the liberal views of the free-minded Paul' (Billroth, 'Commentary on Corinthians,' in *Bib. Cabinet*). Besides which, the character of the existing slavery, to which we shall now refer, was utterly inconsistent with the entire tenor of the moral and humane principles of the precepts of Jesus.

Although the condition of the Roman slaves was no doubt improved under the emperors, the early effects of Christian principles were manifest in mitigating the horrors, and bringing about the gradual abolition of slavery. Onesimus, according to the concurrent testimony of antiquity, was liberated by Philemon (Philem. ver. 21). The servile condition formed no obstacle to attaining the highest dignities of the Christian priesthood. Our space will not allow us to pursue this subject. 'It was,' says M. Guizot, 'by putting an end to the cruel institution of slavery that Christianity extended its mild influence to the practice of war; and that barbarous art, softened by its humane spirit, ceased to be so destructive' (Milman's *Gibbon*, i. 61). 'It is not,' says Robertson, 'the authority of any single detached precept in the gospel, but the spirit and genius of the Christian religion, more powerful than any particular command, which has abolished the practice of slavery throughout the world.' Although, even in the most corrupt times of the church, the operation of Christian principles tended to this benevolent object, they unfortunately did not prevent the revival of slavery in the European settlements in the 16th and 17th centuries, together with that nefarious traffic, the suppression of which has rendered the name of Wilberforce forever illustrious. Modern servitude had all the characteristic evils of the Roman, except, perhaps, the uncontrolled power of life and death, while it was destitute of that redeeming quality to which we have referred, its tendency being to perpetuate the condition of slavery. It has also been supposed to have introduced the unfortunate prejudice of colour, which was unknown to the ancients (Linsant's *Essai*, 1841). It was the benevolent wish of the philosophic Herder (*History of Man*, 1788) that the time might come 'when we shall look back with as much compassion on our inhuman traffic in negroes as on the ancient Roman slavery or Spartan helots.' This is now no longer a hope, so far as England is concerned, as she not only set the example of abolishing the traffic, but evinced the soundness of her Christian principles by the greatest national act of justice which history

has yet recorded, in the total abolition of slavery throughout all her dependencies.—W. W.

**SLAVONIC VERSION.** This translation, embracing the O. and N. T., was made by Cyril of Thessalonica and his brother Methodius, who invented the Slavic alphabet. In the O. T. the Septuagint was followed; and in the New the original Greek, in MSS. belonging to the Constantinopolitan family. According to Alter, the O. T. portion was originally made from the *Vetus Italica*, and altered in the 14th century from Greek MSS. This is a very questionable opinion. The translation is very literal, so that the idiom of the Slavonic is often violated for the sake of retaining the Greek construction. Of the readings adopted by Griesbach, this version has many. The edition of the entire Bible published at Östrog, 1581, is the basis of all succeeding impressions. It is disputed whether the text of the N. T. has been altered from the Latin. Probably Hug is right in thinking so, notwithstanding Dobrowsky's opinion to the contrary. In 1843 two copies of the Gospels were published at Petersburg and Paris, from MSS. of the 11th century, by Vostokow and Silvestre.—S. D.

**SLIME.** [CHEMAR.]

**SLING.** [ARMS.]

**SMITH** (חָרָץ), a workman in stone, wood, or metal, like the Latin *faber*, but sometimes more accurately defined by what follows, as חָרָץ בְּרֹחַל, a workman in iron, a smith; Sept. τέκτων, τέκτων σιδήρου, χαλκός, τεχνίτης; Vulg. *faber et faber ferrarius* (1 Sam. xiii. 19; Is. xlv. 1, 2; liv. 16; 2 Kings xxiv. 14; Jer. xxiv. 1; xxix. 2). In 2 Chron. xxiv. 12, 'workers in iron and brass' are mentioned. The first smith mentioned in Scripture is Tubal-Cain, whom some writers, arguing from the similarity of the names, identify with Vulcan (Gerh. Vossius, *De Orig. Idolol.* i. 16). He is said to have been an instructor of every artificer in brass and iron (Gen. iv. 22), or perhaps more properly, a whetter or sharpener of every instrument of copper or iron. So Montanus, '*acuentem omne artificium æris et ferri*'; Sept. σφυροκόπος χαλκός χαλκοῦ καὶ σιδήρου; Vulg. 'fuit malleator et faber in cuncta opera æris et ferri.' Josephus says that he first of all invented the art of making brass (*Antiq.* i. 2. 2). As the art of the smith is one of the first essentials to civilisation, the mention of its founder was worthy of a place among the other fathers of inventions. So requisite was the trade of a smith in ancient warfare that conquerors removed these artificers from a vanquished nation, in order the more effectually to disable it. Thus the Philistines deprived the Hebrews of their smiths (1 Sam. xiii. 19; comp. Judg. v. 8). So Nebuchadnezzar, king of Babylon, treated them in later times (2 Kings xxiv. 14; Jer. xxiv. 1; xxix. 2). With these instances the commentators compare the stipulation of Porsenna with the Roman people, after the expulsion of their kings: 'Ne ferro, nisi in agricultura, uterentur' (Pliny, *Hist. Nat.* xxxi. 14). Cyrus treated the Lydians in the same manner (Herod. i. 55, 156). מַסְכֵּי, *smith*, occurs in 2 Kings xxiv. 14, 16; Sept. συγκλινοντα; Jer. xxiv. 1; xxix. 2; Vulg. 'clusor,' or 'inclusor.' Buxtorf

gives 'claustrarius, faber ferrarius.' The root סָכַר, *to close*, indicates artificers 'with busy hammers closing rivets up;' which suits the context better than other renderings, as setters of precious stones, seal-engravers, etc. In the N. T. we meet with Demetrius, 'the silversmith,' at Ephesus, ἀργυροκόπος, 'a worker in silver,' Vulg. *argentarius*; but the commentators are not agreed whether he was a manufacturer of small silver models of the Temple of Diana, ναοὺς ἀργυροῦς, or at least of the chapel which contained the famous statue of the goddess, to be sold to foreigners, or used in private devotion, or taken with them by travellers as a safeguard; or whether he made large *coins* representing the temple and image. Beza, Scaliger, and others, understand a coiner or mintmaster (see Kuinoel *in loc.*) That the word may signify a silver-founder, is clear from the Sept. rendering of Jer. vi. 29. From Plutarch (*Opp.* t. ix. pp. 301 and 473, ed. Reisk) and Hesychius it appears that the word signifies any worker in silver or money. A copper-smith named Alexander is mentioned as an opponent of St. Paul (2 Tim. iv. 14). [COAL; IRON; METALS; HANDICRAFT.]—J. F. D.

**SMITH, JOHN PYE, D.D., LL.D.**, was born at Sheffield 25th May 1774. He was educated at Rotherham College, and became first (1801) classical, and afterwards (1805) theological tutor in Homerton College. At a later date he conjoined with this the office of pastor of the congregation meeting in the Old Gravel Pits meeting-house. He wrote *The Scripture Testimony to the Messiah*, 2 vols. 8vo, 1818-1821, 3 vols. 1829, do. 1837, 2 vols. 1847; *Four Discourses on the sacrifice and priesthood of Christ*, 1828, 3d ed. 1847; *Principles of Interpretation as applied to the Prophecies of Scripture*, 1829, 2d ed. 1831; *The relation between Holy Scripture and some parts of Geological Science*, 8vo, 1839, 4th ed. 1848; besides many sermons, controversial pieces, and reviews. After his death appeared *First Lines of Christian Theology*, being notes of his lectures to his students, 1854, 2d ed. 1860. He wrote also several articles in this work. He was one of the greatest Biblical scholars of his day; and the works above enumerated are full of most valuable criticism and exegesis. He died at Guildford 5th Feb. 1851.—W. L. A.

**SMYRNA** (Σμύρνα), a celebrated commercial city of Ionia (Ptolem. v. 2), situated near the bottom of that gulf of the Ægean Sea which received its name from it (Mela, i. 17. 3), at the mouth of the small river Meles, and 320 stades north of Ephesus (Strabo, xv. p. 632). It is in N. lat. 38° 26', E. long. 27° 7'. Smyrna was a very ancient city, but having been destroyed by the Lydians it lay waste 400 years, to the time of Alexander the Great (Plin. v. 29; Pausan. vii. 5); or, according to Strabo, to that of Antigonus. It was rebuilt at the distance of twenty stades from the ancient city (Strabo, xiv. p. 646), and we soon find it flourishing greatly; and in the time of the first Roman emperors it was one of the finest cities of Asia (Strabo, iv. 9). It was at this period that it became the seat of a Christian church, which is noticed in the Apocalypse, as one of 'the seven churches of Asia' (Rev. i. 11; ii. 8-11). It was destroyed by an earthquake in A.D. 177; but the emperor Marcus Aurelius caused it to be rebuilt with even more than its former splendour. It afterwards, however, suffered greatly from earthquakes and

conflagrations, and must be regarded as having declined much from its ancient importance, although from the convenience of its situation it has still maintained its rank as a great city and the central emporium of the Levantine trade; and seeing the terrible decay which has fallen upon the numerous great and beautiful cities of Asia Minor, its relative rank among the existing cities of that region is probably greater than that which it anciently bore. The Turks call it Izmir. It is a better built town than Constantinople, and in proportion to its size there are few places in the Turkish dominions which have so large a population. It is computed at 130,000, of which the Franks compose a far greater portion than in any other town of Turkey; and they are generally in good circumstances. Next to the Turks the Greeks form the most numerous class of inhabitants, and they have a bishop and two churches. The unusually large proportion of Christians in the town renders it peculiarly unclean in the eyes of strict Moslems, whence it has acquired among them the name of Giaour Izmir or Infidel Smyrna. There are in it 20,000 Greeks, 8000 Armenians, 1000 Europeans, and 9000 Jews: the rest are Moslems.

The prosperity of Smyrna is now rather on the increase than the decline; houses of painted wood are giving way in all directions to mansions of stone; and probably not many years will elapse before the modern town may not unworthily represent that city which the ancients delighted to call 'the lovely—the crown of Ionia—the ornament of Asia.'

Smyrna stands at the foot of a range of mountains, which enclose it on three sides. The only ancient ruins are upon the mountains behind the town, and to the south. Upon the highest summit stands an old dilapidated castle, which is supposed by some to mark the previous (but not the *most* ancient) site of the city; frequent earthquakes having dictated the necessity of removing it to the plain below, and to the lower declivities of the mountains. Mr. Arundell says: 'Few of the Ionian cities have furnished more relics of antiquity than Smyrna; but the convenience of transporting them, with the number of investigators, has exhausted the mine; it is therefore not at all wonderful that of the stoas and temples the very ruins have vanished; and it is now extremely difficult to determine the sites of any of the ancient buildings, with the exception of the stadium, the theatre, and the temple of Jupiter Acreus, which was within the Acropolis' (*Discoveries in Asia Minor*, ii. 407). Of the stadium here mentioned the ground-plot only remains, it being stripped of its seats and marble decorations. It is supposed to be the place where Polycarp, the disciple of St. John, and probably 'the angel of the church of Smyrna' (John ii. 8), to whom the Apocalyptic message was addressed, suffered martyrdom. The Christians of Smyrna hold the memory of this venerable person in high honour, and go annually in procession to his supposed tomb, which is at a short distance from the place of martyrdom (Rosenmüller, *Alterthumsk.* i. 2. 224, seq.; Turner, *Travels*, iii. 138-141; 285-291; Arundell, u. s.; Richter, p. 495; Schubert, i. 272-283; *Narrat. of Scottish Mission*, pp. 328-336; *Eöthen*, ch. v.)—J. K.

SNAIL. [CHOMET; SHABLUL.]

SNOW. [PALESTINE].

SO (סֹד ; Sept. Σηγώρ), a king of Egypt, whom Hoshea, the last king of Israel, called to his help against the Assyrians under Shalmaneser (2 Kings xvii. 4). It has been questioned whether this So was the same with Sabaco (Shebek), the first king of the Ethiopian dynasty in Upper Egypt, or his son and successor Sevechus (Shebetek), the second king of the same dynasty, and the immediate predecessor of Tirhakah. Winer hesitates between them, and Gesenius concludes for the latter. Sevechus reigned twelve years, according to Manetho, fourteen according to Syncellus. This name, in Egyptian Sevech, is also that of the god Saturn (Champollion, *Panth. Egypt.* Nos. 21, 22; Winer, *Real-Wörterb.* s. v.; Gesenius, *Comment. in Jes.* i. 696).—J. K.

SOAP. [BORITH; NETER].

SOCOH (סֹכֹחַ). 1. (Sept. Σαωχά; Alex. Σαχά). A town in the Shephelah classed with Jarmuth, Adullam, and Azekah (Josh. xv. 35). It has been identified with the ruins of *Esh-Shuweikeh*, in the Wady Sumt, about three miles and a half to the S.W. of Jerusalem (Robinson, *Bib. Res.* ii. 343; Von Raumer, *Paläst.* p. 218; Porter, *Handbook*, p. 249).

2. (Sept. Σαχά; Alex. Σαχά). A town belonging also to Judah, but in the hill region (Josh. xv. 48). Robinson found in the Wady el-Khalil a place bearing the name *esh-Shuweikeh*, like the preceding, which he identifies with this Socoh (ii. 195).

*Shuweikeh* (شوبكة) is the diminution of *Shaukeh* (شوكه).

In 1 Kings iv. 10 Socoh (A. V. Sochoh) is mentioned as one of the places whence provisions were drawn for Solomon's household; this was probably the town in the Shephelah. The Socoh (A. V. Socho) of 1 Chron. iv. 18 was probably also one of the above, but which remains uncertain.—W. L. A.

SODOM (סְדֹם; Σόδομα; *Sodoma*), the chief city of the Pentapolis, situated in the valley of the Jordan. There are various opinions as to the meaning of the word Sodom. Primeval names of places were generally descriptive; and it might throw some light on the site of this ancient city, and on the features of the district in which it stood, could the signification of its name be discovered. This cannot now be done with certainty. It may be from an obsolete root equivalent to שָׂדֶם, 'to burn,' and might thus mean 'burning,' a signification applicable to the bituminous plain of Siddim, in or near which it was situated; or the same word may signify 'a cultivated field,' and may have been derived from that fertile circuit of the Jordan which the sacred writer states was 'like the garden of the Lord' (Gen. xiii. 10). Philology throws no clearer light than this on Sodom's wondrous mystery.

The exact geographical position of Sodom is nowhere described with such accuracy in the Bible as absolutely to determine its site. When giving the bounds of the territory colonised by the old Canaanites, the sacred writer locates Sodom with Gomorrah, Admah, Zeboim, and Lasha, in a group at the south-eastern angle (x. 19). A more definite description is given in the narrative of the separation of Abraham and Lot (xiii.) The patriarchs were standing on the summit of the ridge east of

Bethel, which commands a portion of the plain of Jericho and of the Dead Sea beyond it. 'And Lot lifted up his eyes and beheld all the circuit (כְּכֹל) of

the Jordan, that it was all well watered everywhere, before the Lord destroyed Sodom and Gomorrah, like the garden of the Lord, like the land of Egypt, towards Zoar' (v. 10). Sodom stood in the 'circuit of the Jordan'; but this term is indefinite. It may mean, and probably in its widest sense did mean (cf. PLAIN, 5), the whole valley of the Jordan from Tiberias southward; or it may have been applied in a more restricted sense to what may be called the valley of the Dead Sea basin. But whatever may be its specific meaning here, it would unquestionably be an overstraining of the words to say that Lot absolutely saw the whole of the region. If it included merely the plain of Jericho, as some seem to suppose, this would not be strictly true, for the intervening hills cover a large section of its western side. The meaning evidently is, that Lot saw so much of 'the circuit of the Jordan,' and of its rich fields and pastures, as gave him a general idea of the whole.

Another point deserves notice. 'The circuit of the Jordan' extended 'towards Zoar' (בְּאַחַד צֶעַר). This remark might determine the bounds of the circuit, but unfortunately the site of Zoar is disputed. It will be shown, however, that it probably stood at the south-east angle of the Dead Sea [ZOAR]; and if so 'the circuit of the Jordan' must have included the whole of the Dead Sea basin.

It has been alleged that because the Jordan falls into the Dead Sea at the northern end, the district called 'the circuit of the Jordan' could not have extended farther south. This statement has no weight. Names derived from rivers and towns often extend to a wide region; and the very word circuit would seem to denote a district defined by some great natural boundaries, such as the mountain-ranges which shut in the Jordan valley. It is not uncommon in the present day for geographers to give the name 'Jordan valley' to the whole valley reaching from Hermon to Jebel Usdom. It would seem from the statement in ver. 12 that whatever may have been the bounds of 'the circuit of the Jordan,' Sodom was situated near its extremity; for it is said, 'Lot dwelt in the cities of the circuit, and pitched his tents as far as Sodom' (עַד־סֹדֹם). Sodom appears to have been the limits of his selected region.

The words of Scripture, therefore, lead to no such conclusion as that Sodom must have been situated to the north of the Dead Sea. They are very indefinite; but they seem on careful and critical examination to render it probable that Sodom stood much farther south—a view which, as will be seen, is confirmed by other considerations.

It has already been shown [SALT SEA; SIDDIM] that the narrative given in Gen. xiv. favours the view that would place Sodom south of Engedi. It is not distinctly said that Sodom stood in the vale of Siddim; but it may be inferred from the narrative that it must have been either in the vale or very close to it. The vale was the battle-field in which the people attempted to defend their cities; and immediately after the battle Sodom was plundered, and Lot, who seems to have been then living in the town, was taken captive (v. 12).

Nothing absolutely certain regarding the site of

Sodom can be gathered from the history of its destruction, except that it was near Zoar—so near that Lot, escaping from Sodom at dawn, was able to reach Zoar at sunrise. The distance, therefore, could not have been more than four or five miles. Abraham was at the time encamped at Hebron. The Lord visited him there; and Abraham went with Him on the way toward Sodom. On the next day—the day of the destruction of the guilty cities—Abraham went out to the place where he had stood before the Lord. It must have been some mountain-brow not very far distant from his tent:—'And he looked toward Sodom and Gomorrah, and toward all the land of the circuit, and saw, and behold the smoke of the country rose like the smoke of a furnace' (xix. 28). Hebron is nearly due west of Engedi, which stands about the middle of the western shore of the Dead Sea. There is a commanding peak about three miles east of Hebron from which a portion of the southern end of the sea, and of the peninsula of el-Lisân, can be seen; though the northern end and the whole plain of the Jordan are completely shut out by intervening ridges. A very early tradition locates on this peak, now crowned by the village of Beni Naim, the scene of Abraham's intercession for Sodom (Robinson, *B. R.* i. 490).

The testimony of ancient historical and geographical writers regarding the site of Sodom is conflicting. Some affirm that it was engulfed by the waters of the Dead Sea, others that it was on the shore. Josephus places the territory of Sodom at the southern end of the lake (*Bell. Jud.* iv. 8. 2); and he says of the lake that it 'extends toward Zoar in Arabia' (iv. 8. 4). Adamnanus repeats these statements almost in the same words (Reland, p. 451). Ancient writers, therefore, in so far as they give any information on the point, agree in locating Sodom at the southern end of the Dead Sea.

The existing names and physical features of the region appear to support the same view. On the south-west shore of the lake is the remarkable range of salt hills called *Khashm Usdom*, 'the ridge of Sodom.' Bitumen-pits are now unknown in any part of the plain, but large masses of bitumen are frequently thrown up from the bottom of the lake, south of el-Lesân, especially after earthquakes, which in this region are very numerous, as if indicating that the 'slime-pits' of the ancient vale of Siddim still exist beneath the waves. [SIDDIM.] In destroying Sodom 'the Lord rained upon it brimstone and fire from heaven' (Gen. xix. 24); and Tristram, who has made a more thorough examination of the region than any other man, describing a remarkable deposit discovered by him in Wady Mohawat, at the north end of the salt range, says: 'The whole appearance points to a shower of hot sulphur and an irruption of bitumen upon it, which would naturally be calcined and impregnated by its fumes; and this at a geological period quite subsequent to all the diluvial and alluvial action of which we have such abundant evidence' (*Land of Israel*, p. 356; SALT SEA).

These historic statements, allusions, and scientific discoveries may not determine the site of Sodom with such absolute certainty as to command the assent of all parties; but certainly they do tend to locate, with a high degree of probability, that ancient city towards the south end of the Dead Sea,

The destruction of Sodom ranks among the most

wonderful events in Bible history. In the original narrative, and in every subsequent allusion made to it in Scripture, it is described as miraculous. The sin of the people became so great, so abominable, so universal, that even Divine mercy could no longer suffer it to pollute the earth—a mercy that would have spared the whole guilty Pentapolis had only ten righteous men been found therein. Sulphur and fire were rained upon the cities and the plain from heaven. The destructive power of these agencies was doubtless greatly increased by the bitumen which was so abundant in the surrounding region. It was a fiery destruction, and the Bible nowhere takes cognisance of any other element. The cities were totally consumed, and their ruin was final. In fact, the destruction of Sodom and the other cities of the plain was so terrible and so complete, that it was taken in all subsequent ages as the type of utter and everlasting ruin. Thus Jeremiah writes: 'As in the overthrow of Sodom and Gomorrah, and the neighbour cities thereof, saith the Lord, no man shall abide there, neither shall a son of man dwell in it' (xlix. 18). The same idea is expressed in many other passages (Deut. xxix. 23; Is. xiii. 19; Jer. l. 40; and in the N. T., Rom. ix. 29; 2 Pet. ii. 6; Jude 7); but none of these are opposed to the theory that the site of Sodom was subsequently covered with water. On a first view, Zeph. ii. 9 might appear to be so: 'Surely Moab shall be as Sodom, and the children of Ammon as Gomorrah, even the breeding of nettles, and salt-pits, and a perpetual desolation.' But the grand idea before the prophet's mind is manifestly *utter and perpetual desolation*, without any special reference to the nature of that desolation.

Fire was the agent employed in the destruction of Sodom. The city was burned, and left desolate. The word 'overthrew' (וַיִּהְרֹס; κατέστρεψε; subvertit)—'He overthrew these cities, and the whole district'—may perhaps imply something more than, or additional to, the action of the fire. Taken in connection with another statement, this appears still more probable. In Gen. xiv. 3 it is said: 'All these joined in the vale of Siddim, *that is the Salt Sea*.' We cannot doubt that the vale of Siddim was submerged; but it is not said that Sodom was in it. The probability is that it was in it; and this was the common belief in ancient times, and is so still. Some even went so far as to affirm that the ruins of the cities could be seen beneath the waves (D'Herbelot, *Bibliothèque Orientale*, s. v. *Daoura*; Reland, p. 257). Josephus, however, says: 'Adjacent to it (the Dead Sea) is the land of Sodom, in ancient times a favoured district, renowned for its productions and the wealth of its cities; but now totally burnt up. It is said that it was consumed by lightning, and accordingly vestiges of the divine fire, and some faint remains of the five cities, are still discernible' (*Bell. Jud.* iv. 8. 4). Tacitus gives a similar account: 'At a small distance from the lake lie those wide extended plains which tradition says were formerly a rich and fertile country, abounding with populous cities, but long since destroyed by fire from heaven, and now a barren desert' (*Hist.* v. 7). Strabo is less definite; but he states that 'some of the cities were swallowed up' (*Geog.* xvi. p. 764). Reland held that though the vale of Siddim was submerged, Sodom

was not in it (pp. 254, *seq.*) De Saulcy is the most ardent champion of this view in modern times. He even believes that he has discovered the ruins of Sodom in the remains of an old tower at the northern end of the salt hills, to which he has given the name *Kharbet Esdoun* (*Journey round the Dead Sea*, i. 453). It is unfortunate for the alleged discovery that no other traveller has been able to find on the spot a trace of this name, or any remains that would indicate the site of a city (Tristram, p. 329; Van de Velde, *Travels*, ii. 115, *seq.*)

Mr. Grove (Smith, *Dict. of Bible*, s. v. 'Sodom' and 'Siddim') goes much farther than either Reland or De Saulcy. He maintains that neither Sodom nor the vale of Siddim was submerged; and that the explanatory clause in Gen. xiv. 3, '*that is the Salt Sea*,' is an interpolation of a late writer. Such a statement from so high an authority upon sacred geography the present writer cannot pass without a solemn protest. The Bible does not shrink from the most searching criticism; but to pronounce a clause spurious without adducing, or being able to adduce, a particle of evidence from MS., version, or ancient quotation, is not criticism (see more fully on this point in the article SIDDIM).

The most careful survey of the shores of the Dead Sea has failed to bring to light a single vestige of Sodom. It is in the highest degree probable that the city stood somewhere near the range of Khashm Usdom, and gave to it the name which it has handed down to our own day. But whether the site was on the shore, and has been completely obliterated by the action of the fiery shower, and the lapse of well nigh four thousand years; or whether the waters of the Dead Sea, as they covered the vale of Siddim, covered also the scathed ruins of Sodom, it is now, and probably ever will be, impossible satisfactorily to determine. The recent discoveries of Mr. Tristram are most interesting and important, and it is to be hoped they will be followed up by properly qualified men.

The probable mode of the destruction of Sodom, and the supposed traces of it recently discovered by Tristram, have already been described in the articles SALT SEA and SIDDIM, to which the present article is to some extent supplementary.—J. L. P.

SODOMITE (קִדְּשָׁי, a male prostitute set apart in the service of an idol for abominable indulgence (Deut. xxiii. 17; 1 Kings xiv. 24; xv. 12; xxii. 46; 2 Kings xxiii. 7; Job xxxvi. 14). The word is derived from קִדַּשׁ, *to devote, separate, consecrate, be holy*, and is used only of such as were devoted to prostitution as a religious service. The fem. קִדְּשָׁה, *q'dēshah*, occurs Gen. xxxviii. 21, 22; Deut. xxiii. 17; Hos. iv. 14. A prostitute for hire ('harlot') was called זֹנָה, *zōnah*.—W. L. A.

SOHERETH (סֹהֲרֵת; ὁλίθος), a kind of costly stone used for tessellated pavements (*Esth.* i. 6). It seems to have been either a species of black marble, as a similar word in Syriac would suggest; or else marble marked with round spots like shields—*i.e.* spotted or shielded marble. This interpretation finds the meaning in the Hebrew word סֹהֲרָה, *sohrah*, which is the name for a shield. It is, however, easier to discover the meaning of the name than the application of it. We do not feel satisfied with that which has been given;

and still less with that of Hartmann (*Hebräerin*, iii. 363), who supposes the *sohereth* to have been *tortoise-shell*, consisting, as it were, of shields; for tortoise-shell would hardly be interspersed in a pavement with various kinds of marble.—J. K.

SOLOMON (שְׁלֹמֹה, *pacific*; Sept. Σαλωμών).

[What is known of the early history of Solomon may be stated in a few sentences. The youngest son of David and Bathsheba (1 Chron. iii. 51), he seems to have been from his birth the object of his father's special affection. By this time the 'man of war from his youth' had softened down into one in whom religious feeling and peaceful aspirations predominated, and he indicated this by the name he gave his son, *Shelomoh*, 'the peaceful.' That he might fulfil the high destinies these names express was the desire of his father's heart; and we may rest assured that nothing would be wanting to make his training and education such as should best secure this result. We only know, however, that he was committed to the care of Nathan the prophet (2 Sam. xii. 25), where the true reading probably is: 'And he (David) entrusted him to Nathan the prophet, and he (Nathan) called him Jedidjah [*i.e.* loved of *Jehovah*]', according to the word (דָּבִיד) of the Lord.]

Though a favourite with his father, no intention of making him heir to his throne seems to have been entertained by David until after the revolt and death of Absalom. When that took place, the influence of Bathsheba was employed, apparently with the concurrence of Nathan the prophet, to obtain from the king a solemn promise that Solomon should be his successor on the throne (1 Kings i. 11-14). The promise thus given was not, however, followed by any public action, until circumstances occurred which threatened failure to the project.]

In the declining age of David, his eldest surviving son, Adonijah, endeavoured to place himself on the throne, by the aid of Joab the chief captain, and Abiathar one of the chief priests, both of whom had been associated with David's early sufferings under the persecution of Saul. The aged monarch did not for a moment give way to the formidable usurpation, but at the remonstrance of his favourite Bathsheba, resolved forthwith to raise Solomon to the throne. To Joab he was able to oppose the celebrated name of Benaiah; to Abiathar, his colleague Zadok and the aged prophet Nathan. The plot of Adonijah was at once defeated by this decisive measure; and Solomon, being anointed by Nathan (1 Kings i. 5-40), was solemnly acknowledged as king. The date of this event is, as nearly as can be ascertained, B.C. 1015.

The death of David would seem to have followed very quick upon these transactions. At least, no public measures in the interval are recorded, except Solomon's verbal forgiveness of Adonijah. But after the removal of David, the first events of which we hear are the destruction of Adonijah, Joab, and Shimei, son of Gera, with the degradation of Abiathar.

[This has been by some attributed to that jealous cruelty so common in Oriental despots, which leads the newly-crowned monarch to remove by death all who, by their proximity to the throne or their real or supposed unfriendliness to the king, might be induced to disturb, by treasonable at-

tempts, his reign. But for this there are no grounds. Had Solomon been moved by such jealous fears, there were others of his father's sons besides Adonijah against whose ambition he would have sought to protect himself, by putting them to death. But no such act is recorded; on the contrary, we know that one of them, Nathan, became the head of a family, from which the failure in the direct line was at a later period filled up (Luke iii. 27, 31 [SALATHIEL]; comp. Zech. xii. 12). It is to be kept in mind, also, that Adonijah had obtained his favour on the express condition of his acting as a 'worthy' man for the future, and with the assurance that if 'wickedness' should be found in him he should die. That his request through Bathsheba for Abishag, the virgin concubine of David, to be his wife, should have been construed into a breach of this contract, may seem strange to us; but looked at from an Oriental point of view it is not so. We need not resort to the very doubtful supposition that Abishag was the Shunamite of the Song of Songs, and the object of Solomon's first love, to account for the severe sentence which he pronounced on Adonijah for aspiring to her hand. The request was in itself a presumptuous one. It was a request that Solomon would concede to him one of the treasures which fell by right to the reigning prince; and very probably Solomon may have detected in it the promptings of a restless ambition, if not a covert attempt to get a foothold for subsequent treason. As for Joab, his crimes had already brought on him the condemnation of David himself, and Solomon simply carried out his father's sentence when he caused him to be slain. Shimei had proved himself so dangerous a subject, that the confining him as a prisoner on parole in Jerusalem was only an act of policy at once wise and merciful; and when he broke his parole and went beyond the allotted bounds, he violated the condition on which he held his life, and few monarchs would have hesitated to follow the same course as Solomon in putting him to death. The disgrace and banishment of Abiathar may have been essential to the order and security of the new government. Solomon is not the only prince whom history commemorates as needing to consolidate his power by getting rid of a meddling and unfriendly priest. Unlike most other princes, however, in similar circumstances, Solomon contented himself with banishing his enemy, instead of imprisoning him or putting him to death.]

After this the history enters upon a general narrative of the reign of Solomon; but we have very few notices of time, and cannot attempt to fix the order of any of the events. All the information, however, which we have concerning him, may be consolidated under the following heads: (1) his traffic and wealth; (2) his buildings; (3) his ecclesiastical arrangements; (4) his general administration; (5) his seraglio; (6) his enemies.

(1.) The overflowing wealth in which he is so vividly depicted is not easy to reduce to a modern financial estimate; partly because the numbers are so often treacherous, and partly because it is uncertain what items of expenditure fell on the general funds of the government. In illustration of the former topic, it is enough to observe that the money prepared for the temple by David is computed in 1 Chron. xxix. 4 at 3000 talents of pure gold and 7000 of silver, while in xxii. 14 it is called

100,000 of gold and 1,000,000 of silver; also the sum for which David buys the floor of Araunah is, in 2 Sam. xxiv. 24, 50 shekels of silver; but this in 1 Chron. xxi. 25 is become 600 shekels of gold. Efforts are made to resolve the former difficulty; but they are superseded by the latter, and by numerous other manifestly exaggerated figures. But abandoning all attempt at numerical estimates, it cannot be doubted that the wealth of Solomon was very great; and it remains for us to consider from what sources it was supplied.

The profound peace which the nation enjoyed as a fruit of David's victories stimulated the industry of all Israel. The tribes beyond the Jordan had become rich by the plunder of the Hagarenes, and had a wide district where their cattle might multiply to an indefinite extent. The agricultural tribes enjoyed a soil and climate in some parts eminently fruitful, and in all richly rewarding the toil of irrigation; so that, in the security of peace, nothing more was wanted to develop the resources of the nation than markets for its various produce. In food for men and cattle, in timber and fruit trees, in stone, and probably in the useful metals, the land supplied of itself all the first wants of its people in abundance. For exportation, it is distinctly stated that wheat, barley, oil, and wine, were in chief demand; to which we may conjecturally add wool, hides, and other raw materials. The king had undoubtedly large districts and extensive herds of his own; but besides this, he received presents *in kind* from his own people and from the subject nations; and it was possible in this way to make demands upon them, without severe oppression, to an extent that is unbearable where taxes must be paid in gold or silver. He was himself at once monarch and merchant; and we may with much confidence infer that no private merchant will be allowed to compete with a prince who has assumed the mercantile character. By his intimate commercial union with the Tyrians he was put into the most favourable of all positions for disposing of his goods. That energetic nation, possessing so small a strip of territory, had much need of various raw produce for their own wants. Another large demand was made by them for the raw materials of manufactures, and for articles which they could with advantage sell again; and as they were able to furnish so many acceptable luxuries to the court of Solomon, a most active exchange soon commenced. Only second in importance to this, and superior in fame, was the commerce of the Red Sea, which could not have been successfully prosecuted without the aid of Tyrian enterprise and experience. The navigation to Sheba, and the districts beyond—whether of Eastern Arabia or of Africa—in spite of its tediousness, was highly lucrative, from the vast diversity of productions between the countries so exchanging; while, as it was a trade of monopoly, a very disproportionate share of the whole gain fell to the carriers of the merchandise. The Egyptians were the only nation who might have been rivals in the southern maritime traffic; but their religion and their exclusive principles did not favour sea-voyages; and there is some reason to think that at this early period they abstained from sending their own people abroad for commerce. The goods brought back from the south were chiefly gold, precious stones, spice, almug or other scented woods, and ivory; all of which were probably so abundant in their

native regions as to be parted with on easy terms, and of course were all admirably suited for re-exportation to Europe. The carrying trade, which was thus shared between Solomon and the Tyrians, was probably the most lucrative part of the southern and eastern commerce. How large a portion of it went on by caravans of camels is wholly unknown; yet that this branch was considerable is certain. From Egypt Solomon imported not only linen yarn, but even horses and chariots, which were sold again to the princes of Syria and of the Hittites, and were probably prized for the superior breed of the horses, and for the light, strong, and elegant structure of the chariots. Wine being abundant in Palestine, and wholly wanting in Egypt, was no doubt a principal means of repayment. Moreover, Solomon's fortifying of Tadmor (or Palmyra), and retention of Thapsacus on the Euphrates, show that he had an important interest in the direct land and river trade to Babylon, although we have no details on this subject. The difficulty which meets us is, to imagine by what exports, light enough to bear land carriage, he was able to pay for his imports. We may conjecture that he sent out Tyrian cloths and trinkets, or Egyptian linen of the finest fabric; yet in many of these things the Babylonians also excelled. On the whole, when we consider that in the case of Solomon the commercial wealth of the entire community was concentrated in the hands of the government, that much of the trade was a monopoly, and that all was assisted or directed by the experience and energy of the Tyrians, the overwhelming riches of this eminent merchant-sovereign are perhaps not surprising.

The visit of the Queen of Sheba to Solomon, although not strictly commercial, rose out of commercial intercourse, and may perhaps be here noticed. The territory of Sheba, according to Strabo, reached so far north as to meet that of the Nabathæans, although its proper seat was at the southernmost angle of Arabia. The very rich presents made by the queen show the extreme value of her commerce with the Hebrew monarch; and this early interchange of hospitality derives a peculiar interest from the fact that in much later ages—those of the Maccabees and downwards—the intercourse of the Jews with Sheba became so intimate, and their influence, and even power, so great. Jewish circumcision took root there, and princes held sway who were called Jewish. The language of Sheba is believed to have been strongly different from the literate Arabic; yet, like the Ethiopic, it belonged to the great Syro-Arabian family, and was not alien to the Hebrew in the same sense that the Egyptian was; and the great ease with which the pure monotheism of the Maccabees propagated itself in Sheba, gives plausibility to the opinion that even at the time of Solomon the people of Sheba had much religious superiority over the Arabs and Syrians in general. If so, it becomes clear how the curiosity of the southern queen would be worked upon by seeing the riches of the distant monarch, whose purer creed must have been carried everywhere with them by his sailors and servants.

(2.) Besides the great work which has rendered the name of Solomon so famous—the Temple at Jerusalem—we are informed of the palaces which he built—viz. his own palace, the queen's palace, and the house of the forest of Lebanon, his porch

(or piazza) for no specified object, and his porch of judgment, or law court [PALACE]. He also added to the walls of Jerusalem, and fortified Millo ('in the city of David,' 2 Chron. xxxii. 5), and many other strongholds. The temple seems to have been of very small dimensions—60 cubits long, 20 broad, and 30 high (1 Kings vi. 3)—or smaller than many moderate-sized parish-churches in England; but it was wonderful for the lavish use of precious materials. Whether the three palaces were parts of the same great pile, remains uncertain. The house of the forest of Lebanon, it has been ingeniously conjectured, was so called from the multitude of cedar pillars, similar to a forest. That Solomon's own house was of far greater extent than the temple appears from its having occupied thirteen years in building, while the temple was finished in seven. In all these works he had the aid of the Tyrians, whose skill in hewing timber and in carving stone, and in the application of machines for conveying heavy masses, was of the first importance. The cedar was cut from Mount Lebanon, and, as would appear, from a district which belonged to the Tyrians; either because in the Hebrew parts of the mountain the timber was not so fine, or from want of roads by which it might be conveyed. The hewing was superintended by Tyrian carpenters, but all the hard labour was performed by Hebrew bondsmen. This circumstance discloses to us an important fact—the existence of so large a body of public slaves in the heart of the Israelitish monarchy, who are reckoned at 153,600 in 2 Chron. ii. 17; see also 1 Kings ix. 20-23. During the preparation for the temple, it is stated (ver. 13-18) that 70,000 men were employed to bear burdens, 80,000 hewers of wood in the mountains; besides 3300 overseers. The meaning of this, however, is rather obscure; since it also states that there was a 'levy' of 30,000, of whom 10,000 at a time went to Lebanon. Perhaps the 150,000 was the whole number *liable to serve*, of whom only one-fifth was actually called out. From the large number said to 'bear burdens,' we may infer that the mode of working was very lavish of human exertion, and little aided by the strength of beasts. It is inferred that at least the Hittites had recognised princes of their own, since they are named as purchasers of Egyptian chariots from Solomon; yet the mass of these nations were clearly pressed down by a cruel bondage, which must have reacted on the oppressors at every time of weakness. The word **סֵבַע**, which is translated 'levy' and 'tribute,' means especially the personal service performed by public slaves, and is rendered 'task' in Exod. i. 11, when speaking of the Israelites in Egypt.

(3.) After the death of Nathan and Zadok, those faithful friends of David, although Solomon continued to celebrate with the same splendour all the exterior ceremonies of worship, it is hard to believe that much of that spirit of God which was in his father animated his ecclesiastical proceedings. Side by side with the worship of Jehovah foreign idolatries were established; and the disgust which this inspired in the prophets of Jehovah is clearly seen in the address of Ahijah the Shilonite to Jeroboam, so manifestly exciting him to rebel against the son of David (1 Kings xi. 29-39). The priests were too much under the direct domination of the crown to act an independent part; the prophets had little sympathy with the routine of pompous solemnities. Solomon himself, with all his erudition and insight

into man's nature, had little, as far as we are aware, of that devotional character and susceptible feeling which distinguished David; and however well meant his ostentatious patronage of divine worship, it probably could have produced no spiritual fruit, even if he had not finally neutralised it by his impartial support of heathen superstitions.

(4.) Concerning his general administration little is recorded beyond the names of various high officers. Among his chief ministers (1 Kings iv. 1-6) are named a son of Zadok and two sons of Nathan. There is a difficulty in the list, since it names Abiathar and Zadok as joint priests, at a time when Benaiah is already 'over the host;' although the latter event could not have been until after the death of Joab, and therefore after the ejection of Abiathar. The two sons of Nathan seem to be named as peculiarly eminent; for one of them, Azariah, is said to have been 'over the officers;' the other, Zabud, is called 'principal officer and the king's friend.' It is not likely that any other considerable changes were made in his government, as compared with David's, than such as peace and commerce, in place of war, necessitate. Yet it is probable that Solomon's peculiar talents and taste led him to perform one function which is always looked for in Oriental royalty—viz. to act personally as *judge* in cases of oppression. His award between the two contending mothers cannot be regarded as an isolated fact: and 'the porch of judgment' which he built for himself may imply that he devoted fixed portions of time to the judicial duties (see 2 Kings xv. 5 of Jotham). In all the older civilisation of the world, the quality most valued in a judge is the ability to detect truth in spite of the perjury of witnesses, or defect of (what we should esteem) legal evidence; a defect which must be of daily occurrence where the art of writing is little used for common contracts. The celebrity which Solomon gained for wisdom, although founded mainly perhaps on his political and commercial sagacity, must have received great popular impetus from his administration of law, and from his readiness in seeing through the entanglements of affairs which arise in commercial transactions.

(5.) For the harem of Solomon—consisting of 700 wives and 300 concubines—no other apology can be made than the fact that in countries where polygamy is not disreputable an unlimited indulgence as to the number of wives is looked upon as the chief luxury of wealth and the most appropriate appendage to royalty. Permission once being given and the taste established, nothing but poverty can set a limit; since an establishment of a hundred or a thousand wives is perhaps more harmonious than one of two or three. The only remarkable facts are, his marriage with an Egyptian princess, and his establishment of his wives' idolatry.

The commercial union of Tyre with Egypt, in spite of the vast diversity of genius between the two nations, was in those days very close; and it appears highly probable that the affinity to Pharaoh was sought by Solomon as a means of aiding his commercial projects. Although his possession of the Edomite ports on the gulf of Akaba made him to a certain extent independent of Egypt, the friendship of that power must have been of extreme importance to him in the dangerous navigation of the Red Sea; and was perhaps a chief cause of his brilliant success in so new an enterprise. That Pharaoh continued for some time on good terms

with him, appears from a singular present which the Egyptian king made him (1 Kings ix. 16): 'Pharaoh had gone up and taken Gezer, and burnt it with fire, and slain the Canaanites that dwelt in the city, and given it for a present unto his daughter. Solomon's wife;' in consequence of which Solomon rebuilt and fortified the town. In his declining years, a very different spirit is manifested towards him by Shishak, the new Egyptian king; whether after the death of the princess who had been the link between the two kingdoms, or from a new view of policy in the new king, is unknown.

The proceedings of Solomon towards the religion of his wives has been mildly or approvingly regarded by various learned men as being only what we have learned to name *Toleration*. But such a view seems to imply a want of discrimination between those times and our own; and besides, would require us to suppose the statements in the history to be exaggerated, as though they were highly improbable. The religions of antiquity, being essentially ceremonial, were of a most obtrusive kind. It is one thing to allow men in private to hold their conscientious sentiments, or indeed by argument and discussion to aim at propagating them, and quite another to sanction public idolatries, which appeal to and allure the senses of the ignorant, and scandalise the minds of the better taught; to say nothing of the impurities and cruelties with which these idolatries were almost always connected. The spirituality and individuality of religion were not as yet so developed as to allow of our ascribing Solomon's conduct to right and noble views of toleration. Besides, he was under no necessity to marry these foreign wives at all. Unless prompted by mere voluptuousness (as in the case of the concubines), he must have taken them from political motives; although distinctly knowing that the step would draw after it his public establishment of heathen sin and superstition. This is widely different from allowing foreigners, who for trade resided in the country, to practise their own religious ceremonies at their own prompting and expense; and yet even this, if permitted at all, would have been permitted only within walled and separated streets appropriated to the foreigners, by a king anxious to obey the law of Moses and of Jehovah in ever so liberal and unconfined a spirit. This is a topic of prime consequence in the history of the Jewish monarchy. Modern commentators, impressed with the importance of liberty of conscience, are naturally prone to suspect that the prophetic or priestly feeling under which the history of the kings was composed has misrepresented the more liberal policy of these monarchs. But granting, as we may, that it was not given to those prophets or priests to understand the Christian rule of universal toleration, it is certain that the times were not ripe for the application of that rule, and that the most earnest, devout, and spiritually enlightened men of those days were the most vehemently opposed to a public toleration of idolatry. Taking this merely as a great and unaltable *fact*, it was shortsighted policy in Solomon, as well as worldly want of faith, to seek to conciliate the foreign heathen at the expense of the devoted allegiance of God's chosen ones in Israel. He won at best a momentary goodwill from Ammonites, Moabites, or Sidonians, by such an affinity, and by such an introduction of their favourite idols: he lost the heart of the prophets of Jehovah, and, as a result, he could not

transmit to his son more than a fraction of his kingdom. It is no mere fiction of priestly prejudice, but a historical certainty, that David owed his rise mainly to the overruling and pervading power exerted on him by the pure and monotheistic faith of the prophets; while Solomon lost (for his posterity) the kingdom of the ten tribes, and perpetuated strife, weakness, debasement, and superstition, by preferring the attractive splendours of this world to that godliness which would in the end have been rewarded even in the present life.

(6.) The enemies especially named as rising against him in his later years, are Jeroboam, Hadad the Edomite, and Rezon of Damascus. The first is described as having had no treasonable intentions until Solomon sought to kill him, on learning the prophecy made to him by Ahijah. Jeroboam was received and fostered by Shishak, king of Egypt, and ultimately became the providential instrument of punishing Solomon's iniquity, though not without heavy guilt of his own. As for Hadad, his enmity to Israel began from the times of David, and is ascribed to the savage butchery perpetrated by Joab on his people. He also, when a mere child, was warmly received in Egypt, apparently by the father-in-law of Solomon; but this does not seem to have been prompted by hostility to David. Having married the sister of Pharaoh's queen, he must have been in very high station in Egypt; still, upon the death of David, he begged leave to depart into Edom, and during the earlier part of Solomon's reign was probably forming his party in secret, and preparing for that dangerous border warfare which he carried on somewhat later. Rezon, on the contrary, seems to have had no personal cause against the Hebrew monarchy; but having become powerful at Damascus and on its frontier, sought, not in vain, to aggrandise himself at its expense. In the long continuance of peace David's veterans had died, and no successors to them can have been trained; and considering the other great expenses of the court, it may be confidently inferred that the standing army had not been kept up in any efficiency. The revenues which would have maintained it were spent on a thousand royal wives. The king himself was unwarlike; and a petty foe, if energetic, was very formidable. Such were the vexations which darkened the setting splendours of the greatest Israelitish king. But from within also his prosperity was unsound. Deep discontent pervaded his own people, when the dazzle of his grandeur had become familiar; when it had become clear that the royal wealth, instead of denoting national wellbeing, was really sucked out of the nation's vitals. Having no constitutional organ to express their discontent, they waited sullenly until the recognition of a successor to the crown should give them the opportunity of extorting a removal of burdens which could not permanently be endured.

The picture of Solomon here drawn is far less favourable than could be wished, yet an endeavour has been made to keep close to the facts. Undoubtedly the book of Chronicles—which (contrary to custom) in this reign adds little or nothing to that of the Kings—by omission nevertheless gives a seriously altered view of this celebrated man; for not only are his numerous marriages, his idolatries, his oppressions, his vexatious enemies, and the grave rebuke of the prophet Ahijah, left out of

the narrative entirely, but his building of a special palace for his Egyptian queen is ascribed to his pious objection to her dwelling in the house of David, because of the ark having passed through it (2 Chron. viii. 11). From a mind of so sensitive scrupulosity no one could have expected an establishment of heathenish worship. This very circumstance will show how tender was the feeling of the Levitical body towards him, and how little likely it is that the book of Kings has in any way given a discoloured and unfair view of his lamentable worldliness of principle.—F. W. N.

SOLOMON'S SONG, one of the three canonical volumes—the other two being *Proverbs* and *Ecclesiastes*—which have come down to us by tradition as the production of the son of David.

1. *The Title of the Book and its Signification.*—The title of this book in the Hebrew is שִׁיר הַשִּׁירִים, which is literally translated by the Sept. ᾠδὴ ᾠδαίων; Vulg. *canticum canticorum*, and in the A. V. *song of songs*. Now, according to the Hebrew usage, which has its analogy in Greek, Latin, etc., of expressing the superlative in substantives denoting quality, by the construction of the same noun in the genitive, either with or without the article, song of songs denotes *the finest, the most beautiful, or the most excellent song*. For instances of this construction without the article comp. עֶבֶר עֲבָדִים, *servant of servants*—i.e. *most abject servant*, Gen. ix. 25; קֹדֶשׁ קִדְשִׁים, *holy of holies*—i.e. *most holy*, Exod. xxix. 37; xxx. 10; Num. iii. 32; and the Greek θεῶν θεῶν, ἑορτῶν ἑορτῶν; with the article see שְׁמֵי הַשָּׁמַיִם, *the heaven of heavens*—i.e. *the highest heaven*, Deut.

x. 14; אֱלֹהֵי הָאֱלֹהִים, *the God of gods*; אֲדֹנָי הָאֲדֹנִים, *the Lord of lords*, Deut. x. 17; 1 Kings viii. 27; 2 Chron. ii. 5; iii. 8, 10, and the Greek ὁ βασιλεὺς τῶν βασιλευμένων, Κύριος τῶν κυριευόντων, 1 Tim. vi. 15; Gesenius, *Gram.* sec. 119, 2; Ewald, *Lehr.* sec. 313 c. Hence the explanation of the

Midrash Jalkut בְּשִׁירֵי וְהַמְשֹׁכָה וְהַמְשֻׁבָּה, *the song which is celebrated and sublime among songs*—which is followed by Rashi, Rashbam, Ibn Ezra, Luther, and most modern commentators and lexicographers. The assertion of Kleuker, etc., that this interpretation of the Rabbins is more owing to their preconceived notion about the sublime contents of the book than to the real meaning of these words, is refuted by Rashbam and other Rabbins, who refer to the above-named examples to corroborate the superlative signification of this phrase, and not to the contents of the book. Hengstenberg's opinion that this poem is called by the superlative name—viz. *most excellent song*—because the subject-matter of it is the most glorious one, the heavenly Solomon, has no foundation whatever in the phrase itself, since the word שִׁיר, which the Sept. translates ᾠδὴ, ᾠδα, denotes any kind of song, either sacred or profane (Is. xxiii. 16; xxiv. 9; Prov. xxv. 20; Eccles. vii. 5 with Ps. xxxiii. 3; xl. 3, *al.*) Other explanations of the title '*song of songs*'—i.e. '*a song from the songs of Solomon*' (*Midrash Rabba on the Song of Songs*; Kimchi, etc.), '*a collection of songs*' (Kleuker), '*a chain of songs, a string of songs*,' comparing שִׁיר with the Chaldee שִׁירָא, שְׁרָא, Greek σείρα, *chain* (Velthusen, Paulus, Good, etc.)—are alike contrary to the Hebrew usage of the word שִׁיר and to the construc-

tion שִׁיר הַשִּׁירִים. That the Rabbinical explanation of this title is grammatically the only admissible one is admitted even by those who regard this book as a collection of separate songs (*ex. gr.* Döpfke, Magnus, Noyes, etc.)

2. *Design and Method of the Book.*—The design of this charming poem is to teach us a lesson of practical righteousness by the record of an extraordinary example of virtue in a young maiden in humble life who encountered and conquered the greatest temptations from the most exalted personage in the land. The simple story divested of its poetic form is as follows:—A village girl, the daughter of a widowed mother of Shulam, is betrothed to a young shepherd, whom she met whilst tending the flock. Fearing lest the frequent meetings of these lovers should be the occasion of scandal, the brothers of the Shulamite employ her in the vineyard on their farm. Whilst on the way to this vineyard she one day falls in with the *cortège* of King Solomon, who is on a spring visit to the country. Struck with her great beauty the king captures her, conveys her to his royal pavilion, then conducts her to Jerusalem in great pomp, in the hope of dazzling and overcoming her with his splendour, and eventually lodges her in his harem. But all is in vain. True to her virtuous love, she resists all the allurements of the exalted sovereign, spurns all his promises to elevate her to the highest rank, and in the midst of the gay scenes assures her humble shepherd, who followed her to the capital, that her affections are sacredly and inviolably pledged to him. Solomon, convinced at last that all his advances are in vain, allows her to quit the royal residence. Hand in hand the two faithful lovers return to her native place, and on their way home visit the tree under which their love-spark was first kindled, and there renew their vows of constancy and fidelity. On their arrival they are welcomed by their companion shepherds, and she is rewarded by her brothers for her exemplary virtue.

The method which the sacred writer adopts in relating this story, though it is like most poetic narratives of a similar kind in profane compositions, differs materially from all other books of Holy Writ. The *plot*, if such it may be called, develops itself gradually, and the thread of the argument is formed from the utterances of the Shulamite, the shepherd, the king, the court ladies, the inhabitants of Jerusalem, the brothers of the Shulamite, and the companions of the shepherd. All these interlocutors or ideal *dramatis personæ* are alternately represented as speaking, but without any such declarations as we find in the book of Job—viz. 'After this Job opened his mouth,' etc., 'then Eliphaz the Temanite answered and said,' 'then answered Bilad the Shuhite and said,' etc. etc.—and without separate names or initial letters of names to indicate the different speakers. It is this which makes it difficult to distinguish between the different persons, and has caused the diversity of opinion even among those commentators who agree about the design and method of the book, as to which of the speakers the several portions are to be assigned.

3. *Division, Contents, and Form of the Book.*—But notwithstanding the difficulties referred to, the division of the poem and the sundry interlocutors may be ascertained from the recurrence of different periods and phrases. Thus, for instance, the recurrence of the same formula three times (ii. 7; iii. 5; viii.

4), and the employment of another closing sentence (v. 1), divide the song into *five sections*. The heroine of the story is easily distinguished by the feminine gender of the verb, adjective, or noun, as 'I am swarthy but comely' (i. 5), where both adjectives, *swarthy* (שְׁחֹרֶה) and *comely* (נְאוֹה), are feminine and plainly indicate the speaker. Her beloved shepherd, when speaking, spoken to, or spoken of, is recognised by the *pastoral language* (i. 3, 4, 7; ii. 12; iii. 4, etc.); her royal tempter is distinguished by express allusions to his *exalted position* (i. 9-11; vi. 4-vii. 10); and her brothers are recognised by a comparison of ii. 15 with i. 6 and viii. 8, 9. The court ladies of the harem are known when speaking to the Shulamite by the phrase '*fairest of women*,' which they employ in addressing her (i. 8; v. 9; vi. 1), and when spoken to by the appellation '*daughters of Jerusalem*' (i. 5; ii. 7; iii. 5, 10; v. 8; viii. 4); whilst the inhabitants of Jerusalem (iii. 6-11), and the companions of the shepherd (viii. 5), are sufficiently indicated by the context.

(a.) THE FIRST SECTION (i. 2-ii.).—The Shulamite, forcibly brought into the gynæceum of Solomon's tent in the country, expresses in the midst of the court ladies her longing to be reunited with him whom she prizes above all things (i. 2, 3). She implores him to come to her rescue, for though brought by the king into his royal tent, her love is fondly doting on him who is the admiration of all upright maidens (4); she repels the scornful reflections of the court ladies because of her soliloquy (5, 6), and implores her beloved to tell her where he tends his flock that she may find him (7). The court ladies, in feigning sympathy for the Shulamite, reply to this entreaty (8). Meanwhile the king comes in and tries to win her affections by flatteries and promises (9-11); but it is in vain, for no sooner does the king retire to his table than she holds sweet converse with her beloved (12-ii. 6), and in an ecstasy adjures the court ladies not to attempt to persuade her to love any one else (7).

(b.) THE SECOND SECTION (ii. 8-iii. 5).—To account for the cause of the severity of her brothers, mentioned in chap. i. 6, the Shulamite relates that her beloved shepherd came one spring morning to invite her to the fields (ii. 8-14); her brothers having overheard the invitation gave her employment in the vineyard (15), out of fraternal solicitude for the reputation of their sister; she, however, consoled herself with the assurance, that though separated from her at that time, her beloved would come again in the evening (16, 17); and as he did not come she under difficult circumstances went to seek him in the night, and found him (iii. 1-4). Possessing him she again reiterates the adjuration to the court ladies not to persuade her to love any one else (5).

(c.) THE THIRD SECTION (iii. 6-v. 1).—The scene now changes; the pavilion in his summer residence is broken up, and Solomon, with the royal *cortège*, is returning to Jerusalem. As the splendid procession approaches the royal city the volumes of incense, the gorgeously-decorated palanquin, the magnificent body-guard, and the costly diadem of the sovereign, become the objects of general admiration, and are in turn discussed by the inhabitants of Jerusalem (iii. 6-10), who at last call out the ladies to gaze at that part of the scene which interests them most (11). The shepherd, who followed his beloved to the royal gynæceum in Jeru-

salem, stands at the foot of the seraglio talking to her; he praises her charms (iv. 1-5); she modestly interrupts him, and tells him that she is ready to escape with him that very evening (6); he proffers his assistance, declaring that her charms had inspired him with courage sufficient for the occasion (7-9), depicts these charms (10, 11), and praises her virtue and chastity (12-16). She declares that whatever she possesses is his (16); whereupon they fall into each other's arms (v. 1 a), and so touching is the scene of their momentary reunion that some of the court ladies, moved with sympathy, urge them on to take their fill of delight (v. 1 b).

(d.) THE FOURTH SECTION (v. 2-viii. 4).—The sympathies manifested by some of the court ladies for the Shulamite at the close of the last section encourage her to relate to them a dream which she had recently had. The purpose of this narrative is the description of the shepherd to which it leads, and which is necessary to the completion of the whole drama. As the Shulamite, in describing this beautiful and fickle dream (v. 2-7), entreated the court ladies that if perchance they should anywhere meet her beloved they are to let him know how she was languishing on account of her separation from him (8), these inmates of the gynæceum ask her what there is about him to cause such an attachment (9); and she, only too pleased to comply with the request, gives them a description of the shepherd (10-16). Struck with so charming a description of his personal appearance, the court ladies offer the Shulamite to go with her to seek him (vi. 1). To which she replies that her beloved as a shepherd is among the scenes of nature, and again reiterates her never-changing love for him (2, 3). On hearing that the beloved is being sought for, Solomon immediately presents himself, seeks to win the Shulamite's affections by extolling her beauty (4-7), by promising to elevate her to the highest dignity (8, 9), and by telling her that she is the admiration of all the court ladies (10). She explains how she came to be seen by the court ladies, and withdraws (11, 12); the king calls her back (13 b), and as she returns describes her charms, and wishes to enjoy the love of one so beautiful (vii. 1-9). She refuses the king's overtures, stating that her affections are sacredly espoused to another (10); then addressing herself to her beloved she entreats him to take her away from the court, and descants upon their rural pleasures (11-13). Remembering, however, that circumstances even at home prevented the full manifestation of her love, she longs for those obstacles to be removed (viii. 1, 2). She is completely overcome by these thoughts of her beloved, wishes that no one but her beloved may support her (3), and with the little strength she has left reiterates the refrain of adjuration that the court ladies should not persuade her to transfer her affections (4).

(e.) THE FIFTH SECTION (viii. 5-14) states the damsel's victory over all her temptations. The king, convinced that nothing could induce the Shulamite to transfer her affections, releases her from the gynæceum in the royal palace, and, accompanied by her beloved shepherd, she returns to her humble rural home. The companions of the shepherd, who are as much interested in the virtuous victory of the shepherdess as the court ladies were in the success of Solomon, welcome their arrival (viii. 5 a); the lovers on their way visit the tree under which they were first betrothed, and there

declare that the divine spark of love which had been kindled in their hearts is never to be quenched (5 6-7). The brothers are then made to repeat the promise which they gave their sister to reward her virtue (8, 9); the Shulamite alludes to her successful resistance of all allurements, and obtains the reward (10-12). The shepherd now asks his beloved shepherdess to sing for him and his companions, who come together to express their congratulations that one of their humble occupation has, by her extraordinary victory, brought such honour upon the whole class; and she repeats the same song which she had sung in sorrow (comp. ii. 17), but in a far different tone, for 'the mountains of separations' are now changed into the much wished-for mountains of pure delight, 'hills of aromatics' (13, 14).

As to its *form*, though the Song of Songs does not quite conform to the rules of the regular drama according to the modern notion of this term, yet there can be but little doubt that it possesses all the essential elements and the organic structure of an amœbean or dramatic poem. It has a plot in the Hebrew sense of the word, which develops itself gradually; it has *dramatis personæ*, who at certain intervals make their appearance and take their part in the intrigue, with this peculiarity, however, that they are reciting instead of performing what they are supposed to do; it has regular pauses or divisions marked by refrains, thus dividing it into distinct parts analogous to our acts or scenes; each act represents the heroine as going through some new trial, and terminates in the triumph of virtue over temptation; and all parts stand to one another in a definite order of sequence, embodying one concerted action, and tending to one conclusion. Moreover, it has a chorus, though it is somewhat different from the chorus of our dramas, inasmuch as it has no rigorous identity, but consists sometimes of the sympathising court ladies, sometimes of the citizens of Jerusalem, and sometimes of the shepherd's companions. The poem, however, was not designed to be acted on the stage of a theatre, as the Hebrews had no stage before the time of Herod, but was most probably intended to be recited on marriage-festivals, and other stated occasions, when the virtue of women was to be celebrated.

3. *Importance of the Book.*—If the purport of the Song of Songs were simply to celebrate the chaste connubial affections subsisting between the sexes, which God has sacredly implanted in our breasts, which are the basis of moral life and domestic happiness, and the figures of which he himself employs to exhibit his love to us, this of itself is a theme of paramount sublimity and importance, and would entitle it to a place in the canon of Holy Writ, which is designed to aid us in the virtuous enjoyments of the life that now is, as well as to prepare us for the life that is to come. We have, therefore, no hesitation in endorsing the sentiments of the eminent Niebuhr, contained in his reply to a young pastor who wanted to know why a love-song was admitted into the Biblical canon: 'As for me, I should believe that something was wanting in the Bible if there could not be found there any expression of the deepest and strongest of the feelings of mankind' (Renan, *La Cantique des Cantiques*, p. 147). The Song of Songs, however, does more than simply celebrate the tender affections subsisting between husband and wife. It depicts to

us, for our instruction in practical righteousness, the triumph of virtue over temptations most seductive and extraordinary, and tells us that the one who comes off more than conqueror is *a woman*—a humble village girl. The most cursory glance at the history and treatment of woman in olden times, and in some countries even to the present day, as well as an examination into the cause of this ill treatment, will show the need and importance of recording such an example of female virtue as is celebrated in the Song of Songs. The woman whom God designed as *the helpmate and counterpart* of man has been reduced by her guardian and protector to be the slave of his carnal lusts. He gives her no credit for virtue, and for this reason places her in the most inaccessible part of the house, sets dogs and eunuchs to guard the doors of her chambers, and makes the harem as impenetrable as a prison; none but the nearest relatives are allowed to see her, and when necessitated to pass through the street her countenance is thickly veiled, and eunuchs watch her movements. The conduct of Potiphar's wife, and of Bath-sheba with David, was calculated to confirm man in his opinion that woman was naturally unfaithful and incontinent, and that it was requisite to exclude her from society in order to preserve her morals. Now, the virtuous example of the Shulamite recorded in this poem strikes at the root of all the reproaches and wrongs of woman. If it was deemed of sufficient importance for our instruction to record in Holy Writ that a Hebrew slave was tempted by a woman of high rank, resisted the temptation, and though left to suffer for a season, was ultimately rewarded for his virtue (Gen. xxxix. 7, etc.); and if it was needed for our warning to relate that Bath-sheba, to whom, as the wife of an officer of rank and accustomed to wealth and luxury, temptation from high quarters could not have been very powerful, surrendered her virtue to royal blandishments—surely it is of paramount importance to celebrate the example of the Shulamite. A village girl—a humble shepherdess—to whom the promise of costly apparel and of elevation from a low and toilsome occupation to the highest rank, must have been an extraordinary allurements, through her womanly and sacred virtue is enabled to spurn all the blandishments of the greatest monarch, and triumph over all the temptations. And has this example ceased to be needed? The revelations of our divorce courts show that we might do well to 'read, mark, learn, and inwardly digest' the noble story of the Shulamite.

4. *The Interpretation of the Book.*—No book has furnished a wider field for the speculations and visionary projects of those who substitute their own imaginations and enthusiastic feelings for the teachings of Scripture than the Song of Songs. The varieties and absurdities of these so-called expositions are a solemn warning against departing from the established laws of language and the canons of historico-critical exegesis. As it would require a large folio volume to give a history of its interpretation, we can only give here a general classification of the main views about the import of the Song of Songs. Bating the great differences in the details, the interpretations may be divided into three general classes or schools—viz. i. *The Literal School*, which considers the description as real, maintaining that the words are to be taken in their obvious sense as delineating an historical fact or imaginary plot.

ii. *The Allegorical School*, which maintains that the description has no historical truth for its basis, and that the words contain some latent meaning. And  
 iii. *The Typical School*, which unites the other two views; it admits the literal meaning, but regards it as typical of spiritual truth.

i. *The Literal School*.—The literal interpretation of the Song of Songs was defended in the time of Christ by the school of Shammai, which maintained, in opposition to the school of Hillel, that Canticles and Ecclesiastes are uninspired productions. At the election, however, of R. Eleazar b. Azzariah to the presidency of the Sanhedrim (*circa* A.D. 90), it was ruled that the Song is inspired, and that it is of sublime allegorical import (*Ḥadajim*, iii. 5; *Edajoth*, v. 3; *Aboth de Rabbi Nathan*, cap. i.) This silenced the literalists among the Jews, till, about A.D. 1100, when they made themselves heard again, as is evident from the scolding exclamation of Ibn Ezra (1140): 'Far be it, far be it! to think that the Song of Songs is an amatory composition!' (*Preface to his comment on the Song*). With the progress of grammatico-historical exegesis in the 12th and 13th centuries, the literalists increased, and we actually find a MS. commentary of this period (*Bodleian Library, Oppenheim Collection*, N. 625) almost anticipating the results of modern criticism. The anonymous commentator maintains that *this Song celebrates the virtuous love contracted between a humble shepherd and shepherdess*, and regards Solomon as a *distinct person*, whom the shepherdess adduces to illustrate her deep and sincere attachment to her beloved shepherd, affirming that if this monarch were to offer her all the splendour and luxury of his court to transfer her affections to him, she would spurn it all and remain faithful to her humble lover. The literal interpretation had now such a phalanx of able defenders, that Isaac Abi Sahula, being solicited by his friends to write an exposition of this book (1284), felt it no easy task to decide between the powerful rivals (*Ginsburg, Comment.* p. 57). Salomon Löwisohn (1796-1821), however, was the first who elucidated the true design of this poem, showing that the Song of Songs *celebrates the victory of true and virtuous love in humble life over the blandishments of royalty*. This view gained strength from its being adopted by Dr. Herxheimer (1848), chief rabbi of Anhalt, and Dr. Philippson, chief rabbi of Magdeburg, and is now defended by almost all the literary Jews. In the church, the literalists, who appeared at a very early period, had at first to endure a harder fate than in the synagogue. As early as the days of Philastrius (*cir.* 387), the view entertained by some rabbins that the Song of Songs depicts a literal love-adventure of Solomon, found its way into the church, but unlike the heads of the synagogue, the bishop of Brescia (Brixia) branded these literalists as heretics (*Liber de hæres.*) The existence of those who defended the literal interpretation about this period is also attested by Gregory of Nyssa (*circa* A.D. 331-396). It is from Theodoret, bishop of Cyrus (*circa* 386-457), that we first learn the particular views of those who espoused the literal interpretation. He tells us that some assert that Solomon composed this song to celebrate his nuptials with Pharaoh's daughter. Amongst these was no less a person than Theodore, bishop of Mopsuestia (*circa* 350-429), who was at that time the most distinguished commentator in the Syrian church, and was κατ' ἐξοχήν, styled *interpres*. Others, who also maintained that it re-

cords a love-adventure of Solomon, substituted Abishag the Shulamite for Pharaoh's daughter. Whilst others again treated it with a little more reverence, and regarded it as a royal discourse, taking the bride to be the people of Israel, and the bridegroom the king. The thunders, however, of the councils, which were hurled against these heretics, quelled for centuries the literal interpretation, and it was only at the time of the Reformation that we find Sebastian Castellio (1515-1563), the celebrated translator of the Bible, venturing to remark on ch. vii. 1, '*Salamitha amica Solomonis et Sponsa*,' and urging the removal of the Song of Songs from the canon. But even in the Reformed church such an opinion was not to be tolerated, and, at the instigation of Calvin, the learned Castellio was banished from Geneva. For the first time we now hear an eccentric voice raised in England for the defence of the literal meaning of the Song, declaring that '*it was written by Solomon when he was wicked, and foolish, and lascivious, and idolatrous*' (Whiston, *Supplement to the Essay towards restoring the true text of the O. T.* pp. 5, 10, London 1723). In Germany the literal interpretation was defended with greater reverence, learning, and taste by the erudite Michaelis, who maintained, in the notes to Bishop Lowth's *Praelections*, that this Song *describes the chaste passions of conjugal and domestic love, that it is recommended as a pattern to mankind, and celebrated as a subject of gratitude to the great Author of happiness*. The honour, however, of first elucidating the true design of this book, as anticipated by the Jews of the Middle Ages, is due to Jacobi (1771), who showed that it does not describe the chaste passion of conjugal love, but *celebrates fidelity*. The ranks of the literalists in Germany were strengthened by the accession of Herder (1778), the pious poet, who, though mistaking its true design, denounced the allegorisers as violating common-sense and the laws of language, and maintained that *this Song celebrates true and chaste love in various stages*; by the learned Kleuker (1780), who held a similar view to that of Herder; by Ammon (1790); by the orthodox Umbreit (1820); and by the profound Ewald (1826), who in a masterly manner worked out the plan exhibited by Jacobi. Döpke, too (1829), though not defending this view, rejected the allegorical interpretation. In England, after an interval of nearly a century, the literal interpretation found a powerful defender in Dr. Pye Smith (*Scripture Test. to the Messiah*, vol. i. book i. cap. 11); the same opinion was defended in America by Dr. Noyes (1846), who maintained that the Song is a collection of erotic songs; whilst in Germany, where the exegesis of the O. T. is prosecuted more largely and successfully, the view that this poem celebrates the victory of virtuous love in humble life over the allurements of royalty was propounded by such critics as Heiligstedt (1848), Böttcher (1849), Meier (1854), Friederich (1855), Hitzig (1855), and Vaihinger (1858). This is also the view of Dr. Davidson (1856) in England, of M. Renan (1861) in France, of the Rev. W. Houghton (Trübner 1865), and it may now be regarded as generally prevailing among the best Biblical critics.

ii. *The Allegorical School*.—From the discussion in the Mishna already alluded to, there can be but little doubt that the allegorical interpretation was

the more prevalent one in the synagogue in the time of Christ, especially in the school of Hillel. According to the ancient allegorical explanation of the synagogue, 'the beloved' is *the Lord*, 'the bride' is *the congregation of Israel*, and the Song is a consecutive allegorico-prophetic history of the Jewish nation, beginning either with the exodus from Egypt or from the call of Abraham, and detailing their doings and sufferings down to the coming of the Messiah and the building of the third temple. This view, which is given in the Talmud and in the Midrash, is elaborately pounded in the Chaldee paraphrase (*circa* A.D. 600), and is consistently and uniformly set forth in all the allegorical commentaries till the 12th century; *ex. gr.* the comment. of Saadia Gaon (892-942), Rashi (1040-1105), Rashbam (1085-1154), Ibn Ezra (1088-1176), Ibn Aknin (1160-1226), etc. At the beginning of the 11th century, when the Arabic philosophy was largely studied among the Jewish literati, the traditional prophetic-historical allegory was exchanged for a philosophical allegory. Thus Ibn Caspi (1280-1340), maintains that Solomon depicts in this Song *the union between the active intellect (intellectus agens) and the receptive or material intellect (intellectus materialis)*. This view is also defended by Moses Ibn Tibbon (1244-1274); by the eminent poet and commentator, Immanuel Romi (1265-1330); Ralbag (1288-1342), etc. For about four hundred years this philosophical allegory disputed the field with the prophetic-historical allegory, when Don Isaac Abravanel started a new allegorical theory—viz. *that the bride is wisdom, with whom Solomon converses*. Leon Hebraeus, son of Abravanel, defended the same view (*De Amore dial. cap. iii.*) This seems to have been the finishing-stroke to the allegorical interpretation among the Jews, for it soon began to lose favour, and has now almost entirely been relinquished.

How or by what right the early fathers of the Christian church came to discard the authorised allegorical interpretation of the synagogue which obtained in and after the time of Christ, is difficult to divine. Suffice it to say that Origen (*circa* 185-254), as we see from the fragments of his commentary, exchanged the historico-allegorical interpretation, which he must have learned from his Jewish rabbi, for an allegory of his own, maintaining that the bridegroom is *Christ*, the bride is *the soul of man* created after the image of God, the companions of the bridegroom are *the angels and saints in heaven*, and the maidens are *the believers on earth*. Traces of the prophetic-historical allegory, however, are to be seen in the fragments of the Homily on the Paralytic Man of Cyril of Jerusalem (*circa* 215-386), where this father explains sundry passages of the Song. According to him, Solomon's palanquin (iii. 9) is *the cross*, its silver legs are *the thirty pieces of silver* which brought Christ to the cross, the purple cushion is *the purple garment* in which the Saviour was mocked, the nuptial crown is *the crown of thorns* (*Op. p. 314*, ed. Oxon. 1703). Athanasius of Alexandria (*circa* 296-373), the great opponent of Arius, an advocate of the deity of Christ, as might have been expected, saw in the Song of Songs nothing else than *a jubilee song of the church at the incarnation of the Son of God*. St. Jerome (*circa* 346-420), who, like Origen, learned to interpret the Song allegorically from his Jewish rabbi,

imported it into the Latin church. But he, too, discarded the authorised historico-allegorical interpretation of the time of Christ, and, like Origen, made it to celebrate the union of Christ with the soul of man or the church.

As the literal view was branded as heretical, the interpretations of Origen and St. Jerome became the authorised expositions for the Greek and Latin Churches, and the schoolmen of the middle ages found in the Song an unfathomable abyss of mysticism, into whose depths they could dive as deeply as their speculative minds and fertile imaginations prompted them. The continued and earnest study of the allegory disclosed to the students thereof, both in the Eastern and Western churches, new mysteries, and it was discovered that the bride is the Virgin Mary, and that the Song sets forth the blessedness of the Virgin above that of all other saints. This view now fairly occupied the field, and was propounded by the learned Greek physician, Michael Constantine Psellus (1020-1106), in his Greek and Latin metrical paraphrase of the Song of Songs (*Opp. vol. viii. p. 289*, ed. 1746); by Rupert of Deutz (*circa* 1076-1113), in his commentary on Canticles (*De Incarnatione Domini*, in seven books); by Richard of St Victor (+ 1173), and by all the Spanish prelates. The only other favourite interpretation with which the prophetic-mariolatry allegory had to compete, and into which indeed it was merged, is the prophetic-historical, started by Nicolas de Lyra (*circa* 1270-1340), maintaining that the bridegroom is God, and the bride the church under both dispensations, that chap. ii. vi. describes the history of the Israelites from the Exodus to the birth of Christ, and chap. vii. to the end *the origin of the Christian church, her progress, and the peace which she attained in the days of Constantine*. In the Reformed Church the prophetic-historical allegory was espoused in England by Brightman (1580), according to whom chap. i. iv. 6 describes *the condition of the legal church* from the time of David to the death of Christ, and chap. iv. 7-viii. 14 *the state of the Evangelical church* from A.D. 34 to the second coming of Christ; by Cotton (1642), etc.; and on the Continent by John Cocceius (1603-1699), Hennischius (1638), Puffendorff (1776), Hug (1803), Keiser (1825), etc. Luther, however, being dissatisfied with both these theories, as well as with the merging of these into one, advanced a new allegory altogether—viz., *'that the bride is the happy and peaceful state under the dominion of Solomon, and that the Song is a hymn of praise in which Solomon thanks God for the obedience rendered to him as a divine gift.'* This view was also espoused by John Brentius, the Suabian reformer.

The view started by Abravanel and Leon Hebraeus, that the bride represents wisdom, with whom Solomon is conversing, was now also introduced into the Christian church by no less a person than Rosenmüller (*Scholia*, ix. 270). In England, however, Mr. Thrupp, one of the latest allegorists (1862), has returned to the early patristic allegory, whilst Mr. Dunn, the last allegoriser (1865), espouses a modified form of Abravanel's view—namely, that the Song celebrates 'the union of the soul and divine wisdom, and the blessedness therefrom arising.'

iii. *The Typical or Mystical School.*—The view of Theodore of Mopsuestia, that the bride in this Song is Pharaoh's daughter, which was evidently derived from those literalising Jews who questioned

the canonicity of the book, seems to have been traditionally preserved in the East since the Jacobite primate, Abul-Farja (1226-1286) describes it in his Arabic history as a matter of course, that outwardly the Song is a dialogue between Solomon and his bride, Pharaoh's daughter. This typical theory gained special favour among our English Reformers, as is evident from the headings in the various editions of what is called Matthew's Bible (1537, 1549, 1551, etc.), which are as follows: 'A mystical device of the spiritual and godly love between Christ, the spouse, and the church or congregation, his spouse. Solomon made this ballad or Song by himself, and his wife, the daughter of Pharaoh, under the shadow of himself, figuring Christ, and under the person of his wife, the church.' This view, which evidently owes its origin to the want felt by the allegorisers of a *literal* basis whereupon to rear their speculations, was defended by the celebrated Grotius (1635-1645), the learned Bishop Bossuet (1690), and Calmet (1726), in France; and by Bishop Lowth (1753), Bishop Percy (1764), Durell (1772), Hodgkin (1786), Williams (1801), etc., in England; whilst in Germany, where the arguments of Calovius prevented this theory from taking root, Delitzsch (1851) offers a compromise, maintaining that the Song poetically describes a love-relationship formed by Solomon, that 'the idea of marriage is the idea of the Song,' and that it may figuratively represent the union of God with his people.

5. *The Arguments for and against the Allegorical Interpretation.*—A. The following arguments are urged in support of the allegorical interpretation:—

i. The insertion of this book in the sacred canon premises its *spiritual* import, since it would be contrary to the genius of the Bible, which breathes religious feelings filled with theocratic views of things, to suppose that it describes human love. But granting that it simply depicts the tender affections subsisting between a sacredly-espoused couple, we have only to quote the admission of an able allegorist, that a passion so strong, so universal, so essential to happiness—to the very existence of the human race—is worthy of a place in a revelation from God to man. 'It would be strange, indeed, if one of the most important and never absent phenomena in the moral and physical creation of man should never be noticed in a revelation to him from his Creator' (Dr. Stowe in Kitto's *Journal of Sacred Lit.* 1852, p. 831, etc.) Surely the pleasures of chaste love cannot be deemed less worthy of record than the sorrows arising from bereaved friendship (2 Sam. i. 17, etc.) The design of the book, however, as already shown, is not merely to celebrate love, but to record an example of virtue.

ii. It is urged that the language put by the sacred writer into the mouth of the bride shows that this poem is an allegory, because in its literal sense such language would be contrary to nature and the modesty of women. But if it be true that the language of this poem would outrage female decency and modesty, if taken to be addressed to *human love*, surely it must be far more outrageous when put into the mouth of a humble, penitent, and submissive church, as addressing *the Lord of lords*. Besides, the perusal of Oriental compositions of a similar nature will show that this poem is in perfect harmony with the habits and tastes of the people; and no less authorities than Bishop Bossuet

and Bishop Lowth, scholars of the highest culture and most refined taste, have bestowed unlimited praise on the truthfulness and beauties of the Song, regarded merely as a relic of ancient erotic poetry.

iii. The language and imagery employed in this Song, and the bridegroom and bride here introduced, are, it is said in other parts of the Bible, applied to the Lord and his people. Thus Exod. xxxiv. 15, 16; Lev. xx. 5, 6; Num. xv. 39; Deut. xxxi. 16; 2 Chron. xxi. 13; Ps. lxxiii. 27; Ezek. vi. 9, represent Israel as affianced to the true God, whom they could not leave for idols without incurring the guilt of adultery. In Is. liv. 5 God calls himself *husband*. Israel is called his *bride* in Is. lxii. 4, 5; comp. also Is. l. 1; Jer. iii. 1-11; xvi.; Hos. i.-iii.; Matt. ix. 15; John iii. 29; 2 Cor. xi. 2; Eph. v. 22-32; Rev. xix. 9; xxi. 2, 9; xxii. 17. But i. This only shows that if we had indubitable proof, as in the passages cited, that a whole book in the sacred canon is entirely devoted to symbolise, under the figure of *husband and wife*, the covenant-relationship subsisting between *God and his people*, it would be nothing strange but rather in harmony with these passages. Because some passages of Scripture distinctly tell us that in them the terms husband and wife symbolise the relationship between God and his people, are we therefore to attach this symbolical meaning to these terms whenever they are employed, and when their tropical use is not indicated? ii. The image of marriage was never used *before* the days of Solomon to denote a spiritual relationship. The phrase, '*to go a whoring after other Gods*,' to which reference is made, does not mean that Israel, by worshipping idols, commits *spiritual adultery* against the true God to whom they were affianced, thus presupposing God to be their *husband* and Israel his *wife*. It describes a *literal fact*, the libidinous orgies and prostitutions connected with the worship of idols (Num. xxv. 1; Hos. iv. 13, etc.), as is evident from Exod. xxxiv. 15, 16, where this phrase first occurs, and where it is applied to *heathen women* worshipping their *own* Gods. These women did not stand in such covenant-relationship to the God of Israel, and therefore could not incur the guilt of *spiritual adultery*, yet they are described as '*whoring after THEIR Gods*.' But even admitting that it does suggest a marriage relationship, the distance between a *suggestive phrase* of this kind and an *entire book* of marital descriptions is so great, that the one cannot reasonably be supposed to have suggested the other. And iii. There is no analogy whatever even between the language used by the prophets *after* the days of Solomon in the passages cited and that of this poem. In the former, the *wedded relation* forms the comparison; in the latter, *ante-nuptial* is the theme. In the former, the *general* idea of the figure is briefly used, without any particulars of the person, dress, scenery, etc., are minutely described. In the former, God is represented as the High and Holy One inhabiting eternity, and in his infinite condescension and compassion, loving, with the tenderness of a husband, Israel, who is represented as an unlovely, ungrateful, and unfaithful wife; in the latter, the bridegroom and the bride are placed upon an *equality*; nay, the bridegroom declares that his heart has been ravished by the charms and faithfulness of the bride. In the former we are *distinctly told* that the husband means the Lord, and the wife the people

of Israel, so that the most superficial reader is compelled to perceive it; in the latter we have *no intimation whatever* that the lovers are intended to represent God and his people, and no reader would ever gather it from the poem.

*iv.* It is urged that the 45th Psalm, which celebrates allegorically the union of the Messiah and the Church, plainly shows the allegorical import of the Song of Songs. But this Psalm itself is simply a congratulatory nuptial song, composed to celebrate a king's marriage with a princess of Tyre, and there is nothing in it which compels us to understand it allegorically. The quotation of the seventh and eighth verses in Heb. i. 8, 9, only proves that these verses refer in a higher sense to the Messiah, but not that *the whole* psalm is descriptive of him. Who would think of allegorising the 8th chapter of Isaiah because vers. 17 and 18 are quoted in the same epistle (Heb. ii. 13)? But granting that Ps. xlv. is an allegory, the two cases are still essentially different. In Ps. xlv. 7 the bridegroom is addressed as *God*, and this verse is quoted in the N. T., whereas there is nothing of this kind in the Song of Songs.

*v.* The pantheistic poetry of the Mohammedan Sufis, in which religious and devotional feelings are allegorically expressed, is adduced as another argument in support of the allegorical theory. But in the Islam and Hindoo poems the name of the Deity is distinctly mentioned, which is not the case in the Song of Songs; besides, some of the poems in question were allegorised at a later period, when the literal interpretation began to give offence.

B. We shall now give some of the reasons *against* the allegorical interpretation:—

*i.* In every allegory or parable employed in the Scriptures, as in every good human composition, something is wrought into its texture to indicate most unmistakably its allegorical design; that under the garb of an immediate representation is conveyed one more remote (comp. Judg. ix. 7-20; 2 Kings xiv. 9, 10; Ps. lxxx. 8-16; Is. v.; Ezek. xvi., xxxvii. 1-14; also the parables of Christ, Acts x. 10-17; Gal. iv. 22-31). If, therefore, the author of this poem had intended it to be understood allegorically, he would have given some indication to that effect, especially as the allegories occasionally used in this very book (Song iv. 12; v. 1; vii. 7, 8) are rendered plain and obvious. As there is, however, not the slightest intimation in the whole of this lengthy poem that it is designed to be allegorical, we are not warranted in assuming it. To take one entire book of the Scriptures to be allegorical, without even an obscure hint of its allegorical import in the book itself, is to violate the established laws of language, and to expose all other volumes of Holy Writ to a similar treatment. If one chooses to allegorise one portion without any internal evidence, another may choose to allegorise another portion.

*ii.* The fact that our Lord and his apostles never once refer to this book is against its allegorical interpretation. If this song, according to the first and last allegorisers, 'celebrates the glories of the Messiah, and all the mercies which through him flow to the people of God,' it is more spiritual and more evangelical than any other portion of the O. T., surpassing even the writings of Isaiah, who is called *the fifth Evangelist*, and is, in fact, what Origen calls it, '*The Holy of Holies*.' Is it possible that our Saviour and his apostles, who in their dis-

putations with the Jews so frequently quote the prophecies of Isaiah, and other passages of the O. T. which are far less evangelical and Messianic, would never refer to the Christology of this book? Is it possible that the apostle Paul, who so frequently describes the relation of Christ to the church by the union subsisting between husband and wife (2 Cor. xi. 2; Rom. vii. 4; Eph. v. 23-32), would be totally silent about the book which, above all others in the O. T., sets forth this union?

*iii.* Solomon is not the man from whom a production of such preeminent spirituality and evangelical truth can be expected. In looking at the Scriptures we see the same agreement between the inspired authors and their respective productions which exists between ordinary writers and their works. Inspiration, like Providence, selected the fittest instruments for its work. Thus between the history of Moses and his writings, of David and his writings, of Paul and his writings, of John and his writings, there is a natural uniformity. Accordingly we have not only to suppose Solomon to have been more spiritually-minded than any saint of the Jewish economy, but to have stood upon a level with the most enlightened and Christ-loving under the present dispensation, to have written in such a strain. Where is any such qualification in Solomon even remotely intimated in any part of the Scriptures? The wisdom which he asked, which he received, and for which he gained celebrity, was that displayed in his civil government, and the first fruits of which were given in the decision upon the litigation of the two mothers. The fact that the poetry which he wrote upon natural history, consisting of 1005 songs, was not deemed worthy of a place in the canon, shows that his muse did not indulge in a devotional strain. The extensive harem which he had displays his inordinate desire for foreign women, who in old age inveigled him into the worship of idols. Is he the man whose love-song is to be regarded as preeminently spiritual, and to be exalted as more evangelically rapturous than any other portion of Holy Writ? Who can conceive that he who caused an irreparable breach in his kingdom should *represent himself* as the Prince of Peace, or that he who was the embodiment of carnal propensities should describe under the figure of *chaste love* the union of Christ and his church? As David was not qualified to build the temple because he had been a man of war and shed blood, so Solomon was not qualified to write in such a strain about Christ and his church as the allegory presupposes, because he had been a man of lust and had turned aside to idolatry. This argument urged in our commentary weighed so heavily with Mr. Thrupp, one of the most recent allegorisers (*Introd. to his Comment.* p. 2, etc.), that he was obliged to give up the Solomonic authorship rather than abandon the allegory; forgetting however that in relinquishing the former, which has been handed down to us by the unanimous voice of both the synagogue and the church, he therewith sacrificed the only cogent argument for the allegorical interpretation—viz. that it has been traditionally transmitted by the church universal.

*iv.* But if even allegorisers are constrained to admit the incongruity of making Solomon the author of so sublime a song, surely it is equally incongruous to suppose that some other inspired writer composed this book to symbolise by Solomon the union of Christ and his church. To select

a man who revelled more in an eastern harem, and had a greater number of wives than any other individual mentioned in the O. T. (1 Kings xi. 1-8), in order to symbolise by his voluptuous love the most sacred love subsisting between God or the Messiah and his people, is as incongruous as it would be to select the most notorious and abandoned polytheist as a symbol of monotheism.

v. It is almost blasphemous to suppose Christ addressing his church in the language of chap. vii. 2-9, where the most indelicate desire for carnal intercourse is expressed. This is the blandishment of seduction, and not the language of him who was 'holy, harmless, undefiled, and separate from sinners,' and who spake as never man spake.

vi. The church universal has shown her consciousness of the indecency of this language at the sacrifice of consistency. Though, through the importation of it by Origen into the Eastern section, and by Cyprian, Augustine, and especially St. Jerome, into the Western section, she has espoused the ancient Jewish notion that this Song is allegorical, yet she has systematically abstained from ordering it to be read publicly. The oldest lectionaries exhibit no lessons from the Song of Songs: in the Anglican Church, which is pre-eminently based upon Scripture and the usage of antiquity, it is authoritatively excluded from the Calendar of Lessons, whilst the majority of the most able and pious allegorisers caution against the use of it. How is this fact to be reconciled with the view that this Song is the most evangelical and the most sublime in spiritual sentiments of all the O. T. books? How extraordinary that a book should be proscribed from the pericopes, a single passage of which, according to one of the most intelligent allegorisers, 'tells us of the resurrection of Christ from the dead at the early morning hour,' 'that no part had been spared, that the cup of misery had been drunk to the full,' and 'that for the sudden triumph of Christ's resurrection from the dead the body of the faithful had not been prepared!' (Thrupp's *Comment.* p. 198, etc.) Does not this show that the allegory is not a matter of choice, but deemed a necessity, and that the distinguished spiritual rank assigned to it above the rest of the O. T. books arises from the principle that where in its literal sense sin is believed to abound there in its spiritual acceptance grace must much more abound?

vii. What is, however, most subversive of the allegorical theory is the fact that *three* principal persons appear in this Song—viz. a shepherd, a shepherdess, and a king—and that it is the shepherd and not the king who is the object of the maiden's affection. This has been recognised by some of the most learned Jewish commentators of the middle ages (viz. Ibn Ezra, Immanuel, etc.), and must be evident to every unbiased reader of the Song of Songs.

6. *Author and Date of the Book.*—The inscription certainly assigns the authorship of this book to

Solomon. The  $\text{לְשׁוֹמוֹן}$  prefixed to  $\text{שְׁלֹמֹה}$  is the so-called *Lamed auctoris*, which is used in the titles of psalms and other Hebrew poems to describe the *author* (Ps. iii. 1; iv. 1, *al.*); whilst the additional  $\text{אֲשֶׁר}$ , not found in other inscriptions, is owing to the article in  $\text{שִׁיר הַשִּׁירִים}$ , which generally, though not always, is followed by this pronoun (Gen. xxix. 9; xl. 5; xlvii. 4; 1 Kings iv. 2; Gesenius,

*Gramm.* sec. 115, 1; Ewald, *Lehrbuch*, sec. 292 a).

Hence the rendering of  $\text{אֲשֶׁר לְשׁוֹמוֹן}$  by *respecting Solomon*, and the assertion that it denotes *the theme* or the person of the poem, are contrary to usage, and are rightly rejected by modern grammarians and lexicographers. The appeal to the Septuagint, which, according to the Vatican text, renders this phrase by  $\delta \epsilon \sigma \tau \epsilon \Sigma \alpha \lambda \omega \mu \acute{\omega} \nu$ , in support of the view that it indicates the *subject* of the song, is nugatory, inasmuch as  $\Sigma \alpha \lambda \omega \mu \acute{\omega} \nu$  is not the nominative but genitive (Winer, *N. T. Grammar*, sec. 10). But though the inscription ascribes the authorship to Solomon, internal evidence is decidedly against it, and leaves no doubt that the title owes its origin to the voice of tradition, as will be seen from the following reasons:—i. The author of the book invariably uses the abbreviated form  $\text{ש}$  of the relative pronoun, whereas the inscription has the relative  $\text{אֲשֶׁר}$  in its full and usual form. The homoeophony of the words  $\text{אֲשֶׁר}$  and  $\text{שִׁיר}$  is not sufficient to account for so extraordinary a divergence, seeing that no such homoeophony occurs in the book itself. ii. Solomon would surely not designate his own production by the appellation '*the most excellent song*.' iii. The description of the royal *cortège*, and the summons to the people to admire Solomon in his grandeur (iii. 6-11), cannot possibly be ascribed to him without accusing him of great conceit and vanity. iv. Tirzah is put in authoritative dignity on a level with Jerusalem (vi. 4), which undoubtedly shows that the Song of Songs was written after the revolt of the ten tribes, when these two cities were the rival capitals of the two kingdoms. v. It is a psychological impossibility that Solomon would have satirised himself by writing a poem to show how his artful blandishments to seduce a virtuous woman utterly failed. When Mr. Brown, in his excellent article 'Canticles' in Smith's *Dictionary of the Bible*, says that this does not militate against Solomon being the author of this book, and that 'his conduct could easily be traced to a spirit of generous self-accusation,' we can only reply that no such spirit is traceable in the book itself, and that chap. vii. 7-10 indicates the very reverse of such a spirit. The author must have been a member of the kingdom of Israel; a subject of the kingdom of Judah, where the Solomonic dynasty reigned, and where Solomon's memory was cherished, would never have ventured to write such a poem. This is also corroborated by the fact that the writer repeatedly mentions Lebanon (iv. 8) and places in the northern kingdom.

Though the exact *date* of the book cannot be ascertained, yet its powerful and fluent style, the originality of its figures, the freshness of its landscapes, its life-like descriptions of local circumstances, the imagery drawn from the royal court of Solomon, the horses of Pharaoh, the tower of David, the tower of Solomon, the pools of Heshbon, etc. etc., show that it must have been written in the most flourishing time of the Hebrew language, and *shortly after the death of Solomon*.

7. *Canonicity and Position of the Book.*—We have the same evidence for the canonicity of the Song of Songs as that which is commonly adduced for the canonicity of any other portion of the O. T. The very rejection of its allegorical import and inspiration by some in the school of Shammai (A.D. 80) proves that it formed a part of the canon in the days

of Christ. As this has been shown elsewhere in this Cyclopædia [GAMALIEL II.], it is needless to repeat it here. Hence it is found in the Septuagint, in the translations of Aquila, Symmachus, and Theodotion, in the catalogue of the canon given in the Talmud (*Baba Bathra*, 14 b), in the catalogue of Melito (Eusebius, *Hist. Eccl.* iv. 26), etc. etc. Those who in modern days have questioned the canonicity of this book have done so not from external evidence, but from misapprehension of its design.

The Song of Songs is the first of the five *Megilloth* (המשי מגילות) or scrolls which are annually read in the synagogue on five stated occasions. The reason for its occupying the first position in the present arrangement of the Hebrew canon is that the Feast of Passover, on which it is read, is the first in order of these five occasions.

8. *Literature*.—Besides the Septuagint, the Vulgate, and especially the Syriac version, which is superior to the other ancient versions, are to be mentioned the commentaries of Rashi, Rashbam, and Ibn Ezra, contained in the Rabbinic Bibles [RABBINIC BIBLES]. The best modern exegetical helps are—Mason Good, *Song of Songs, translated from the original Hebrew*, London 1803; Ewald, *Das Hohe Lied Salomo's*, Göttingen 1826; Döpke, *Philologisch-critische Commentar zum Hohen Liede Salomo's*, Leipzig 1829; Hirzel, *Das Lied der Lieder*, Zürich 1840; Magnus, *Kritische Bearbeitung und Erklärung des Hohen Liedes*, Halle 1842; Hitzig in *Kurzege. exegetisch Handbuch zum A. T.* vol. xvi. Leipzig 1855; Weissbach, *Das Hohe Lied Salomo's*, Leipzig 1858; Renan, *La Cantique des Cantiques*, Paris 1861. The most recent commentaries defending the allegorical view are by the Rev. A. M. Stuart, 2d ed., 1860; and the Rev. J. T. Thrupp, M.A. (Macmillan) 1862. A very excellent *Essay on the Canticles*, defending the literal view, has just been published by the Rev. W. Houghton, M.A. (Trübner) 1865. For analyses of most of the commentaries, as well as of the MSS. cited in this article, we must refer to our *Historical and Critical Commentary on the Song of Songs* (Longman) 1857.—C. D. G.

SOLOMON, WISDOM OF. [WISDOM OF SOLOMON.]

SONG. [POETRY.]

SOOTHSAYER. [DIVINATION.]

SOPATER (Σώπατρος), a Christian at Berea, and one of the party of brethren who accompanied Paul into Asia Minor from Greece (Acts xx. 4). He is supposed to be the same with the Sosipater (Σωσιπάτρος) named in Rom. xvi. 21; and, if so, was a kinsman of St. Paul. In some MSS. (A, B, D, E, and N) his father's name is given as Pyrrhus.

SORCERER. [DIVINATION.]

SOREK (שֹׂרֵק; Sept. σωρήκ), a vine of the finest and noblest kind (Is. v. 2; comp. Gen. xlix. 11, where שֹׂרֵקָה, *sorekah*, is translated a 'choice vine'; and Jer. ii. 21, where שֹׂרֵק, *sorek*, is rendered 'noble vine'). [VINE.]

SOREK, THE VALLEY OF (נַחַל שֹׂרֵק; 'אל-סוֹרֵקָה; Alex. χειμάρριος Σωρήκ; *Vallis Sorec*), a valley mentioned only in the sad story of Samson: 'He loved a woman in the valley of Sorek, whose

name was Delilah' (Judg. xvi. 4). It was evidently in Philistia, and doubtless one of those wadys which, descending from the mountains of Judah, wind across the fertile plain of the Shephelah. It was perhaps near Samson's native city Zorah. This appears to be the opinion of Eusebius and Jerome; for though they do not identify the wady, they mention a village called *Capharsorech* to the north of Eleutheropolis, near Saara (ZORAH; *Onomast.* s. v. *Sorech*). The word *Sorek* signifies a vine of a choice kind, and the name appears to be still extant in Arabic (Gesenius, *Thes.* 1343). It is rendered 'choicest vine' in Is. v. 2. Doubtless Wady Sorek took its name from its vineyards.

On the south side of the ridge on which the city of Zorah stood, and between it and Bethshemesh, runs a wide and fertile valley, whose shelving sides of white limestone are admirably adapted for the cultivation of the vine. It winds away across the plain, passing the sites of Ekron and Jabneel. This may possibly be the valley of Sorek. Its modern name, *Wady es-Surâr* (الصرار), bears some remote resemblance, at least in sound, to the Biblical *Sorek* (*Handbook*, p. 282).—J. L. P.

SOSIPATER. [SOPATER.] Another of this name is mentioned in 2 Maccab. xii. 19-24.

SOSTHENES (Σωσθένης), the chief of the synagogue at Corinth, when Paul was in that city on his second journey into Greece (Acts xviii. 17). He was seized and beaten by the people before the judgment-seat of Gallio, on account of the tumult raised by the Jews against Paul, of which he seems to have been one of the leaders. He is supposed to have been afterwards converted to Christianity, as a Sosthenes is mentioned by Paul as 'a brother,' and coupled with himself in 1 Cor. i. 1. This identity is, however, a pure conjecture, and not remarkably probable. Apart from it, however, we know nothing of this second Sosthenes. Eusebius makes him one of the seventy disciples, and later tradition describes him as a bishop of Kolophon.—J. K.

SOUTH. The country, or quarter of the heavens, which the Shemite, standing with his face to the east, supposes to be on his right hand. It is denoted by seven Hebrew words (1. נָנֵב; 2. דְּרוֹם; 3. מִיָּם; 4. יָמִין; 5. חֲדָר; 6. מְדִבֵּר; 7. מִיָּם), nearly all of which refer to some characteristic of the region to which they are respectively applied. 1. נָנֵב (root נָנַב in Syr. and Chald., *to be dry*), probably derived its name from the hot drying winds which blow annually into Syria over Africa and Arabia. 'In March,' says Volney, 'appear in Syria the pernicious *southerly* winds, with the same circumstances as in Egypt—that is to say, their *heat*, which is carried to a degree so excessive, that it is difficult to form an idea of it without having felt it; but one can compare it to that of a great oven when the bread is drawn out (*Voyage en Syrie et Egypte*, tom. i. p. 297; comp. p. 55; Luke xii. 55, 'When ye see the south wind blow ye say, There will be heat;') and see Kitto's *Physical History of Palestine*, month of March, pp. 221, 222). The word is occasionally applied to a parched or dry tract of land. Caleb's daughter says to her father, 'Thou hast given me a south,' or rather 'dry land;' אֶרֶץ הַנֶּבֶב (Vulg. *terram arentem*);

'give me also springs of water' (Judg. i. 15; comp. ver. 9). At other times the word refers to those arid regions, notwithstanding their occasional fertility, over which the south wind blows into Syria. So the Sept. and Vulg. understood the 'whirlwinds from the south' (Is. xxi. 1; ὁ δὲ ἐρήμου, *turbines ab Aphrico*). 'The burden of the beasts in the south' is rendered τῶν τετραπύδων τῶν ἐν τῇ ἐρήμῳ (Is. xxx. 6). At other times the word is rendered by νότος and λίψ, which latter is the Hellenised form of Libs, *Ventus ex Lybia*, the south-west wind, and, by metonymy, the quarter whence it blows. In several instances the Hebrew word is simply put into Greek letters: thus, τὴν Ναγέβ, Josh. x. 40; τὴν γῆν Ναγέβ, *Alex. τὴν Ναγέβ, al. Ναγέβ*, xi. 16; Ναγέβ, Cyr. Ἀγέβ, Obad. 19, 20; and once, probably by a corruption, it is ἀργάβ, 1 Sam. xx. 41, *al. νεγίβ, al. νεγέβ, al. ἐργάβ*. The Vulgate renders the word by 'meridies, australis plaga, terra meridiana, auster ab Aphrico, terra australis.' More than once the Septuagint differs widely from the present Hebrew text; thus in Ezek. xx. 47, it renders צפונה מננב by ἀπὸ ἀπηλιώτου ἕως βορρᾶ; Vulg. 'ab-austro usque ad aquilonem'; so also in Exod. xxvi. 35, פאת ננבה is rendered πρὸς βορρᾶν; Vulg. 'ad austrum.' It is also used in the geographical sense in Num. xxxiv. 3; Josh. xv. 2; 1 Chron. ix. 24; 2 Chron. iv. 4; Ezek. xl. 2; xlv. 9, etc. But a further and important use of the word is as the name or designation of the desert regions lying at the south of Judæa, consisting of the deserts of Shur, Zin, and Paran, the mountainous country of Edom or Idumæa, and part of Arabia Petrea (comp. Mal. i. 3; Shaw's *Travels*, p. 438). Thus Abraham, at his first entrance into Canaan, is said to have 'gone on toward the south' (Gen. xii. 9); Sept. ἐν τῇ ἐρήμῳ, Aquila νότονδε, Symmachus εἰς νότον; and upon his return from Egypt into Canaan, he is said to have gone 'into the south' (xiii. 1); Sept. εἰς τὴν ἐρημον; Vulg. 'ad australem plagam,' though he was in fact then travelling northward. Comp. ver. 3, 'He went from the south to Bethel,' Sept. εἰς τὴν ἐρημον; Vulg. 'a meridie in Bethel.' In this region the Amalekites are said to have dwelt 'in the land of the south,' when Moses sent the spies to view the land of Canaan (Num. xiii. 29), viz. the locality between Idumæa and Egypt, and to the east of the Dead Sea and Mount Seir [AMALEKITES]. The inhabitants of this region were included in the conquests of Joshua (x. 40). Whenever the Septuagint gives the Hebrew word in the Greek letters, Ναγέβ, it always relates to this particular district. To the same region belongs the passage, 'Turn our captivity as the streams in the south' (Ps. cxv. 4); Sept. ὡς χειμάρρους ἐν τῷ Νότῳ, 'as winter torrents in the south' (Vulg. 'sicut torrens in Austro'); which suddenly fill the wadis or valleys during the season of rain (comp. Ezek. vi. 3; xxxiv. 13; xxxv. 8; xxxvi. 4, 6). These are dry in summer (Job vi. 15-18). The Jews had, by their captivity, left their country empty and desolate, but by their return would 'flow again into it.' Through part of this sterile region the Israelites must repass in their vain application to Egypt (Is. xxx. 6; comp. Deut. vii. 15). It is called the Wilderness of Judæa (Matt. iii. 1; Josh. xv. 61; comp. Ps. lxxv. 6, Hebrew or margin; see also Jer. xvii. 26; xxxii. 44; xxxiii. 14; Ezra xx. 46, 47; xxi. 4; comp. Obad. 19, 20; Zech. ix.

7). Through part of this region lay the road from Jerusalem to Gaza, 'which is desert' (Acts viii. 26). Thus, as Drusius observes, the word often means not the whole southern hemisphere of the earth, but a desert tract of land to the south of Judæa. Sometimes it is used in a relative sense; thus, the cities of Judah are called 'the cities of the south' (Jer. xlii. 19), relatively to Chaldæa, expressed by 'the north' (i. 14; comp. iv. 6; vi. 1). Jerusalem itself is called 'the forest of the south field,' or *country*, like the Latin *ager* (Ezek. xx. 46; comp. Gen. xiv. 7) [FOREST]. Egypt is also called 'the south'; thus, 'the king of the south' (Dan. xi. 5) is Ptolemy Soter and his successors; comp. ver. 6, 9, 11, 15, 25, 29, 40; but in the last-named verse, Mede understands the Saracen from Arabia Felix (*Works*, pp. 674, 816). 2. דרום, which, according to Gesenius, is a word of uncertain derivation. It is rendered by λίψ, Sept. Deut. xxxiii. 23; by νότος, Eccles. i. 6; xi. 3; Ezek. xl. 24, 27, 28, 44, 45; xli. 11; and by θάλασσα, Ezek. xlii. 18. Vulg. 'meridies, auster, australis, ventus australis.' 3. תימן and its adverb תימנה, strictly what lies to the right; Sept. νότος, λίψ; and sometimes the word is simply put into Greek letters; thus, Θαμάν (Hab. iii. 3). Indeed all the three preceding words are so rendered (Ezek. xx. 46), 'Τὴ ἀνθρώπου, στήρσον τὸ πρόσωπόν σου ἐπὶ θαμάν, καὶ ἐπιβλεψὼν ἐπὶ δαρὸν, καὶ προφήτευσον ἐπὶ δρυμὸν ἡγούμενον ναγέβ: where perhaps the vocabulary of the translator did not afford him sufficient variety. The Vulgate here gives 'viam austri, ad aphricum, ad saltum agri meridiani,' and elsewhere renders the Hebrew word by 'meridiana plaga, ad meridiem.' It occurs in Exod. xxvi. 35; Num. ii. 10; iii. 29; x. 6; Job ix. 7; xxxix. 26; Ps. lxxviii. 26; Cant. iv. 16; Is. xlii. 6; Hab. iii. 3; Zech. ix. 14; xiv. 4. In Zech. vi. 6 it denotes Egypt. It is poetically used for the south wind, like Shakspeare's 'sweet south'; Ps. lxxviii. 26, νότον, *Africum*, and Cant. iv. 16, νότε; for the explanation of the latter see NORTH. Observe that תימנה and ננב are interchanged in Exod. xxvi. 18; xxxvi. 23; Ezek. xlvii. 1. 4. מִן, also meaning the right side and south. Thus Ps. lxxxix. 12, 'Thou hast made the north and the south'; Sept. θάλασσα; Vulg. *mare*. The word is evidently here used in its widest sense, comprehending not only all the countries lying south, but also the Indian Ocean, etc., the whole hemisphere. Aquila, βορρᾶν καὶ δεξιάν; Theodotion, βορρᾶν καὶ νότον. In some passages where our translation renders the word *right*, the meaning would have been clearer had it rendered it *south* (1 Sam. xxiii. 19, 24; 2 Sam. xxiv. 5; Job xxiii. 9). 5. חֶרֶר, 'Out of the south cometh the whirlwind' (Job xxxvii. 9), literally 'chamber' or 'storehouse,' ἐκ ταμείων, *interioribus*. The full phrase occurs in ch. ix. 9, חֶרֶרִי תִמֶן, *taiméi vñov, interiora austri*, the remotest south; perhaps in both these passages the word means the chambers or storehouses of the south wind. 6. מִדְבָּר, 'Promotion cometh not from the south' (Ps. lxxv. 6), literally 'wilderness,' ἀπὸ ἐρήμων, *desertis montibus*. 7. מִיָּם, 'And gathered them out of the lands, and from the south' (Ps. cvii. 3), θάλασσα, *mare*; where Gesenius contends that it ought to be translated 'west,' though it stands opposed to מִצְפֶּן, as it is indeed so translated under exactly the same circumstances in Is. xlix. 12. He refers to Deut. xxxiii. 23, and Amos viii.

12. It is also thus rendered in our version of the first of these references; and on the latter we can only refer to Archbishop Newcome's *Version of the Minor Prophets*, Pontefract 1809, pp. 51, 52. In the N. T. we have *vōtos* in the geographical sense, βασιλισσα *vōtou*, *regina austri*, Matt. xii. 42 [SHEBA, QUEEN OF]; and Luke xiii. 29; Rev. xxi. 13. The word *μεσημβρια* is also translated 'south' in Acts viii. 26, *κατὰ μεσημβρίαν*, *contra meridianum*. It is used in the same sense by Josephus (*Antiq.* iv. 5. 2). In Symmachus (1 Sam. xx. 41) for *צפון*. Hesychius defines *Μεσημβρία* τὰ τοῦ Νότου μέρος καὶ τὸ τῆς ἡμέρας μέσον. The south-west *λίψ* occurs in St. Paul's dangerous voyage (Acts xxvii. 12); 'a haven of Crete,' *βλέποντα κατὰ λίβα*, *respicientem ad africanum*, by metonymy the *wind*, for the quarter whence it blows. The south wind is mentioned ver. 13, *vōtos*, *auster*, and xxviii. 13 [WINDS].—J. F. D.

SOUTH RAMOTH. [RAMATH-NEGEB.]

SOWER, SOWING. [AGRICULTURE.]

SPAIN (Σπανία, Rom. xv. 24, 28; Ἰσπανία, 1 Maccab. viii. 3). This name was anciently applied to the whole peninsula which now comprises Spain and Portugal (Cellar. *Notit.* i. 51, *seq.*) In the time of Paul Spain was a Roman province, and many Jews appear to have settled there. It seems clear from Rom. xv. 24, 28, that Paul formed the design of proceeding to preach the gospel in Spain: that he ever executed this intention is necessarily denied by those who hold that the apostle sustained but one imprisonment at Rome—viz. that in which the Acts of the Apostles leave him; and even those who hold that he was released from this imprisonment can only conjecture that, in the interval between it and the second, he fulfilled his intention. There is, in fact, during the three first centuries no evidence on the subject, beyond a vague intimation by Clement, which is open to different explanations [PAUL]; and later traditions are of small value.—J. K.

SPANHEIM, FREDERIC, was born at Amberg, in the Upper Palatinate, in 1600. He was successively professor of philosophy and of divinity at Geneva, and professor of divinity at Leyden, where he died in 1649. He was a man of great learning and ability. His principal work is *Dubia Evangelica*, 3 parts, Genev. 1639. This work is devoted to the elucidation of obscure passages, especially in St. Matthew's Gospel, and to the confutation of errorists of various classes. It is a work of vast learning and great acuteness. Another Frederic Spanheim, son of the preceding, born at Geneva 1632, died at Leyden 1701, was distinguished for his ability and learning. In his collected works (3 vols. fol. Lug. Bat. 1701) are several treatises of interest to the Biblical student, especially relating to questions of chronology, geography, and history. W. L. A.

SPARROW. [TSIPPOR.]

SPEAR. [ARMS.]

SPEARMEN. [DEXIOLABOS.]

SPENCER, JOHN, D.D., a learned English divine, was born in Kent, 1630, and graduated at Corpus Christi College, Cambridge, where he took successively the degrees of B.A. (1652), B.D. (1659), and D.D. (1663), and of which he became

Fellow, and afterwards Master. In 1677 he was made Dean of Ely. Having previously published some works of minor interest, he in 1685 gave to the world the great work which has made his name famous: *De Legibus Hebræorum Ritualibus, et earum Rationibus, tres libri*. This was afterwards enlarged, especially by the addition of a fourth book; and still farther improved by Chappellow, who published a new edition with the author's last additions and corrections, in 2 vols. fol., 1727. This is usually regarded as the best edition, although that by Pfaff, 2 vols. fol., Tübingen 1732, is, in some respects, more desirable, as it contains a dissertation by the editor on the life of Spencer, the value of his work, its errors, and the authors who have written against it. The work is preceded by *Prolegomena*, in which the author shows that the Mosaic laws were not given by God arbitrarily, but were founded on reasons which it is desirable and profitable to search into, so far as the obscurity of the subject permits. The work itself is divided into three (in the second edition into four) books. The *first* book treats of the general reasons of the Mosaic laws, with a dissertation on the *Theocracy*. The *second* considers those laws to which the customs of the Zabeans, or Sabeans, gave occasion, with a dissertation on the apostolic decree, Acts xv. The *third* discusses the laws and institutions to which the usages of the Gentiles furnished the occasion, in eight dissertations:—1. Of the rites generally transferred from Gentile customs to the law; 2. Of the origin of sacrifice; 3. Of purifications; 4. Of New Moons; 5. Of the Ark and Cherubim; 6. Of the Temple; 7. Of the origin of Urim and Thummim; 8. Of the Scape-goat. The *fourth* book treats of the rites and customs which the Jews borrowed from the Gentiles, without, so far as appears, any divine warrant; with a dissertation on phylacteries. The great error of this learned and admirable work is its derivation, to an undue extent, of the rites and ceremonies of the Jewish law from the idolatrous nations around; but the error is one of excess, not of principle; for much that was incorporated in Judaism had been in existence from the earliest ages. The author, after a life of the closest study, died May 27, 1695, aged 65 years (see *Gen. Dic. Hist. and Crit.* vol. ix.; and Pfaff's ed. of *De Legibus*).—I. J.

SPICES. This word, which occurs very frequently in the A. V., has usually been considered to indicate several of the aromatic substances to which the same general name is applied in the present day. The Hebrew words so translated are NECOTH, BOSEM, and SAMMIM, the corresponding Greek being *ἀρώμα*. These may indicate different things, as the two first words, or be merely different names, as *spices* and *aromatics* in English may be applied to the same kind of substances. *Sammim*, rendered in Exod. xxx. 7 *incense*, and in ver. 34 *spices*, may be supposed to mean drugs and aromatics in general. When these are separately noticed, especially when several are enumerated, their names may lead us to their identification. Dr. Vincent has observed that 'in Exod. xxx. we find an enumeration of cinnamon, cassia, myrrh, frankincense, stacte, onycha, and galbanum, all of which are the produce either of India or Arabia.' More correctly, cinnamon, cassia, frankincense, and onycha, were probably obtained from India; myrrh, stacte, and some frankincense, from the east coast

of Africa, and galbanum from Persia. Nine hundred years later, or about B.C. 588, in Ezek. xxvii. the chief spices are referred to, with the addition however of calamus. They are probably the same as those just enumerated. Dr. Vincent refers chiefly to the *Periplus*, ascribed to Arrian, written in the 2d century, as furnishing a proof that many Indian substances were, at that time, well known to commerce, as aloe or agila wood, gum bdellium, the goagal of India, cassia and cinnamon, nard, costus, incense—that is, olibanum, ginger, pepper, and spices. If we examine the work of Dioscorides we shall find all these, and several other Indian products, not only mentioned, but described, as schoenanthus, calamus aromaticus, cyperus, malabathrum, turmeric. Among others, Lycium indicum is mentioned. This is the extract of barberry root, and is prepared in the Himalayan mountains (Royle on the Lycium of Dioscorides, *Linnean Trans.*) It is not unworthy of notice, that we find no mention of several very remarkable products of the East, such as camphor, cloves, nutmeg, betel leaf, cubebs, gamboge; all of which are so peculiar in their nature that we could not have failed to recognise them if they had been described at all, like those we have enumerated as the produce of India. These omissions are significant of the countries to which commerce and navigation had not extended, at the time when the other articles were well known (*Hindoo Medicine*, p. 93). If we trace these up to still earlier authors, we shall find many of them mentioned by Theophrastus, and even by Hippocrates; and if we trace them downwards to the time of the Arabs [SPIKENARD], and from that to modern times, we find many of them described under their present names in works current throughout the East, and in which their ancient names are given as synonyms. We have, therefore, as much assurance as is possible in such cases, that the majority of the substances mentioned by the ancients have been identified; and that among the spices of early times were included many of those which now form articles of commerce from India to Europe. This has been shown in the articles on the different substances [AHALIM; ALMUG; CHELBENAH; HOBNIM; KANEH-BOSEM; KETZIAH; KIDDAH; KINNAMON; LEBONA; LOT; MOR; NERD; NATAF; NECOTH].—J. F. R.

SPIDER. [ACCABISH; SEMAMITH.]

SPIKENARD. [NERD.]

SPIRIT, AND HOLY SPIRIT. The word for 'spirit' in the Hebrew is רִיחַ; in the Greek, πνεῦμα; and in the German, *geist*. It is one of the most generic terms in either the English, Hebrew, or Greek language. A somewhat extended reference to the *usus loquendi*, both of the O. T. and N. T., is necessary, in order to ascertain its Scriptural use and import.

Its leading significations may be classed under the following heads:—

1. The primary sense of the term is *wind*. 'He that formeth the mountains and createth the wind' (רִיחַ, Amos iv. 13; Is. xxvii. 8). 'The wind (πνεῦμα) bloweth where it listeth' (John iii. 8). This is the ground idea of the term 'spirit'—air—ether—air refined, sublimated, or vitalised: hence it denotes—

2. *Breath*, as of the mouth. 'At the blast of the breath of his nostrils (רִיחַ נֶפֶשׁ) are they con-

sumed' (Job iv. 9). 'The Lord shall consume that wicked one with the breath of his mouth' (רִיחַ πνεύματος τοῦ σόουματος, 2 Thes. ii. 8).

3. The *vital* principle which resides in and animates the body. In the Hebrew, נֶפֶשׁ is the main specific term for this. In the Greek it is ψυχή, and in the Latin *anima*. 'No man hath power over the spirit (בְּרוּחַ) to retain the spirit' (Eccles. viii. 8; Gen. vi. 17; vii. 15). 'Jesus yielded up the ghost' (ἀφῆκε τὸ πνεῦμα, Matt. xxvii. 50). 'And her spirit (πνεῦμα αὐτῆς) came again,' etc. (Luke viii. 55).

In close connection with this use of the word is another—

4. In which it has the sense of *apparition—spectre*. 'They supposed that they had seen a spirit,' i.e. spectre (Luke xxiv. 37). 'A spirit hath not flesh and bones, as ye see me have' (ver. 39; Matt. xiv. 26).

5. The *soul*—the rational immortal principle, by which man is distinguished from the brute creation. It is the τὸ πνεῦμα, in distinction from the ἡ ψυχή. With the Latins it is the *animus*. In this class may be included that use of the word spirit in which the various emotions and dispositions of the soul are spoken of. 'Into thy hands I commend my spirit' (τὸ πνεῦμά μου, Luke xxiii. 46; Acts vii. 59; 1 Cor. v. 5; vi. 20; vii. 34; Heb. xii. 9). 'My spirit hath rejoiced in God my Saviour' (Luke i. 47). 'Poor in spirit' (πτωχοὶ τῷ πνεύματι) denotes humility (Matt. v. 3). 'Ye know not what manner of spirit ye are of' (Luke ix. 55), where πνεῦμα denotes *disposition* or *temper*. 'He that hath no rule over his own spirit' (οὐκ ἔχει τὸν ἑαυτοῦ πνεῦμα, Prov. xxv. 28; xvi. 32; Eccles. vii. 9). 'The moral affections are denominated 'the spirit of meekness' (Gal. vi. 1); 'of bondage' (Rom. viii. 15); 'of jealousy' (Num. v. 14); 'of fear' (2 Tim. i. 7); 'of slumber' (Rom. xi. 8). In the same way also the intellectual qualities of the soul are denominated 'the spirit of counsel' (Is. xi. 2); 'the spirit of knowledge' (Is. xi. 2); 'the spirit of wisdom' (Eph. i. 17); 'the spirit of truth and of error' (1 John iv. 6).

6. The race of superhuman created intelligences. Such beings are denominated spiritual beings because they have no bodies like ours. To both the holy and the sinning angels the term is applied. In their original constitution their natures were alike pure spirit. The apostasy occasioned no change in the *nature* of the fallen angels as spiritual beings.

In the N. T. demonology, δαίμων, δαιμόνιον, πνεῦμα ἀκάθαρτον, πνεῦμα πονηρὸν, are the distinctive epithets for a fallen spirit. Christ gave to his disciples power over unclean spirits (πν. ἀκαθάρτων, Matt. x. 1; Mark i. 23; Luke iv. 36; Acts v. 16). The holy angels are termed spirits—'Are they not all ministering spirits?' (leitourgikὰ πνεύματα, Heb. i. 14). 'And from the seven spirits (ἐπτά πνευμάτων) which are before his throne' (Rev. i. 4).

7. The term is applied to the Deity, as the sole, absolute, and uncreated Spirit. 'God is a Spirit' (πνεῦμα ὁ Θεός). This, as a predicate, belongs to the divine nature, irrespective of the distinction of persons in that nature. But its characteristic application is to the third person in the Divinity, who is called the Holy Spirit (Πνεῦμα ἅγιον), because of his essential holiness, and because in the Christian scheme it is his peculiar work to sanctify the people

of God. He is denominated *The Spirit*, by way of eminence, as the immediate author of spiritual life in the hearts of Christians. The N. T. writers are full and explicit in referring the principle of the higher life to the Spirit. In the O. T. the reference is more general. The Spirit is an all-pervading, animating principle of life in the world of nature. In the work of creation the Spirit of God moved upon, or brooded over, the face of the waters (Gen. i. 2; Job xxvi. 13). This relation of the Spirit to the natural world the ancients expressed as *Ens extra—Ens super—Ens intra mundum*. The doctrine of the Spirit, as the omnipresent life and energy in nature, differs from Pantheism on the one hand, and from the Platonic soul of the world on the other. It makes the Spirit the immanent divine causality, working in and through natural laws, which work is called *nature*; as in the Christian life he is the indwelling divine causality, operating upon the soul, and through divine ordinances; and this is termed *grace*. The Spirit in the world may be considered as the divine omnipresence, and be classed among the doctrines which are more peculiarly theological. But the indwelling and operation of the Spirit in the heart of the believer is an essential doctrine of *Christianity*. The one province of the Spirit is nature, the other grace. Upon the difference between the two, in respect to the Spirit's work, rests the Christian consciousness. The general presence and work of the Spirit in nature is not a matter of consciousness. The special presence and work of the Spirit in the heart of the believer, by the effects which are produced, is a matter of which, from consciousness, there may be the most consoling and delightful assurance.

The words Spirit and Holy Spirit frequently occur in the N. T., by metonymy, for the influence or effects of his agency.

a. As a procreative power—'the power of the Highest' (Luke i. 35).

b. As an influence, with which Jesus was endowed (Luke iv. 1).

c. As a divine inspiration or *afflatus*, by which the prophets and holy men wrote and spoke (*ἐν πνεύματι, διὰ πνεύματος, ὑπὸ πνεύματος*). 'Holy men of God spake as they were moved by the Holy Ghost' (2 Pet. i. 21; Num. xi. 26; Neh. ix. 30; Ezek. iii. 12, 14). John in Patmos was wrapped in prophetic vision—was *ἐν πνεύματι* (Rev. i. 10; iv. 2; xvii. 3).

d. As miraculous gifts and powers, with which the apostles were endowed, to qualify them for the work to which they were called. 'Jesus breathed on them, and said unto them, Receive ye the Holy Ghost' (*λάβετε Πνεῦμα ἅγιον*, John xx. 22). 'And they were filled with the Holy Ghost,' etc. (Acts ii. 4). 'They were baptized with the Holy Ghost' (*ἐν Πνεύματι ἁγίῳ*, Acts i. 5; comp. Joel ii. 28 with Acts ii. 16-18, where the *רוח* of the prophet is translated *πνεῦμα* by the apostle).

But the phrase *Holy Spirit* is specially used to denote a *divine personal agent*. The Holy Spirit is associated, as a distinct person, with the Father and the Son in the baptismal formula and the apostolical benediction. The Father and Son are real persons. It is reasonable to think that the spirit who is joined with them in this solemn form of induction into the Christian church, is also a personal agent, and not an abstraction—a mere power or influence. The subject is baptized into

the belief of three personal agents. To suppose that, in this solemn profession of faith, he avows his belief in the Father and the Son, and the *power* or *influence* of God, is forced and frigid.

He is baptized into the *name* of each of the three—*εἰς τὸ ὄνομα τοῦ πατρὸς, καὶ τοῦ υἱοῦ, καὶ τοῦ ἁγίου πνεύματος* (Matt. xxviii. 19). The word *ὄνομα*, Heb. *שֵׁם*, is the appellation of a person. And when used tropically, as in Acts i. 5, it stands for persons, and not for their influence, or virtue, or power. So in the formula *ὄνομα=ἁγίου πνεύματος*, by the *usus loquendi* is required to be the designation of a personal agent. We are not baptized into the name of an influence or a power, but into the name of a person—of three real and distinct subjects, the Father, the Son, and the Holy Ghost.

In the apostolical benedictions, the Spirit, as a person, is associated in the same way with the Father and Son. 'The grace of our Lord Jesus Christ, and the love of God, and the communion of the Holy Ghost, be with you all' (2 Cor. xiii. 13). In this uniting of the three there is the recognition of the distinct personality of each, in the separate charisma which is appropriated to each. The *χάρις* is from Christ, the *ἀγάπη* from God—*i.e.* the Father—and the *κοινωνία* from the Spirit. The act of communion, of fellowship, implies a divine personal agent as really as does the grace or the love. The three are connected in a similar way in 1 Cor. xii. 4-6.

Distinct personal acts and attributes are ascribed to the Holy Spirit too frequently and fully to admit of explanation by the *prosopopeia*.

The Holy Ghost *speaks*, by *Isaías* the prophet (Acts xxviii. 25), expressly (1 Tim. iv. 1). He *teaches* (Luke xii. 12). He *reproves* the world of sin (John xvi. 8). The Spirit helpeth our infirmities, and maketh intercession for the saints (Rom. viii. 26, 27). He is *grieved* (Eph. iv. 30).

Apostles are set apart to him in the work of the ministry, and he appoints them to that work (Acts xiii. 2; xv. 28).

These are all acts which imply a personal agent. Speaking, teaching, reproof, grief, intercession, are predicable only of a personal subject, except in the language of poetry or eloquence. In serious didactic style, in the language of prescription, of promise, of permanent institution and instruction, where clearness and precision, and not strong figures, are expected, they must denote a *person*.

And these acts and attributes distinguish the Spirit from the person of the Father on the one hand, and from the personal subjects upon which he acts on the other.

The Spirit, as a personal agent, comes from the Father, is sent by the Father, and of course cannot be the Father. As sent by the Father, he maketh intercession for the saints, *according to the will of God*—*i.e.* the Father from whom he came. The Spirit searcheth all things, yea, the deep things of God (1 Cor. ii. 10). If there be no distinct personality of the Spirit separate from that of the Father, the real import of these passages must be, that the Father comes from himself, is sent by himself, makes intercession to himself, according to the will of himself, and that he searches the deep things of himself—which is the style of writing not to be ascribed to any rational man, and certainly not to inspired apostles. Nor can the personality of the Spirit, as Socinus affirms, be

taken for the subjects who are affected by the divine influence. He is as distinct from the disciples, to whom he was sent, as from the Father, by whom he was sent. The promise of Christ is, that the Father will give them another comforter, one to take his place as a teacher and comforter. And that comforter, he says, 'which is the Holy Ghost, whom the Father will send in my name, he shall *teach* you all things, and bring all things to your remembrance' (John xiv. 16, 26). This Παράκλητος, sent from the Father to teach, and guide, and comfort the disciples, is as manifestly distinct from the disciples whom he came to teach as the Father was, from whom he came, or as Christ was, who had been their teacher.

The procession of the Spirit may be considered as the intrinsic relation which he sustains to the Father and the Son, or with respect to the mode of his manifestation. In respect to the former, the procession (ἐκπόρευσις) of the Spirit has an implied reference to the generation (γέννησις) of the Son and the ἀγέννητος of the Father. The Father is unbegotten, the Son is begotten; the Spirit proceeds from the Father alone, says the Greek church, from the Father and Son says the Latin church. Christ says that the Spirit of truth proceedeth from the Father, παρὰ τοῦ Πατρὸς ἐκπορεύεται (John xv. 26). There is no such explicit statement in the Scriptures of the procession of the Spirit from the Son, yet equivalent expressions of the doctrine are supposed to be there. The Holy Ghost is called the Spirit of the Father, because he proceeds from the Father. For the same reason he is called the Spirit of Christ; because he proceedeth from the Father and the Son, because he is sent by both Father and Son: hence the formula of the Latin church has always been, 'Spiritus S. a Patre et Filio, non factus, nec creatus, nec genitus, sed procedens.' The addition of the Filioque to the Constantinopolitan confession of faith, by the Latin fathers, occasioned the division of the church into the Eastern and Western, or the Greek and Latin branches. It is from the relation implied in the procession, that the Spirit is called the third person in the Godhead. The Father is considered as *first* in the order, as the fountain and source of all things. The Son is the second person, as being begotten by the Father; and the Spirit is the third, as proceeding from and sharing the nature of both. 'These distinctive appellations denote,' says Augustine, 'the reciprocal relations of the three persons to each other, and not the substance itself, which is but one.' The order has relation to the distinction of persons; the unity of the divine nature has respect to the substance. The homoousia includes the three. The hypostasis applies to the distinctions. As to the homoousia, there is but one God; as to the hypostasis there are three persons. The subordination of the Spirit does not imply inferiority, but is a term of office or of relation. Thus it is that the Scripture doctrine, maintaining the unity of the divine nature as belonging to the Father, Son, and Spirit, and also the proper distinction between the three, closes the door equally against Arianism and Sabellianism.

The Spirit of God (1 Cor. ii. 11) is not a created spirit; and if uncreated, it must be divine in the highest sense; but this Spirit is the Holy Spirit, and a proper person; hence he is God.

As the author of regeneration, or of the new spiritual and incorruptible life in the heart of the

believer, he must be divine. This change, the Scriptures abundantly declare, is wrought by the Spirit and power of God.

Blasphemy against the Holy Ghost is the only sin for which there is no remission (Matt. xii. 31). This sin against the Holy Spirit, in whatever it may consist, is distinguished from all other sins by a degree of guilt which renders it unpardonable. If he be not in his nature truly God, there is nothing in him to give to sin against him such a peculiar aggravation. Although it is not simply because the Spirit is God that blasphemy against him is unpardonable—for then would blasphemy against the Father and the Son also be unpardonable—yet it is a sin against God, and, as being against the third person of the Godhead, it is aggravated to a degree of enormity which it could not receive if committed against any other being than God.

The divine and incommunicable attributes of the Deity are ascribed to the Spirit. These attributes belong exclusively to the divine nature; he who possesses them must have the divine nature and honour as God (for proof texts, see TRINITY).

Works truly divine are attributable to the Holy Spirit, as creation and preservation, and especially the work of sanctification. There are diversities of gifts, and there are differences of administrations, but the same Spirit. 'All these worketh that one and self-same Spirit, dividing to every man severally as he will' (1 Cor. xii. 4-11). Hence Peter calls the Holy Ghost, God (Acts v. 3, 4).

Of the office of the Holy Spirit, it is only necessary to say that it is not ministerial, like that of the angels and apostles, but it is the peculiar work in the salvation of man which he performs, as sent by the Father and the Son. Paul has developed the functions or charismata of the office with great clearness in 1 Cor. xii., in which he shows that the diversities of gifts are all by the same Spirit. Each charisma is the 'manifestation of the Spirit' (ἡ φανέρωσις τοῦ Ἁγίου Πνεύματος). This manifestation was in some particulars different in the apostolic age from what it was after Christianity was established. The gifts which were peculiar to that age, and which evinced the presence of the Holy Spirit by some immediate effect, remarks Neander, are called in the N. T. δυνάμεις, σημεῖα, τέρατα. That period, he says, was peculiarly the creative epoch of Christianity. Other gifts belong to the office and operation of the Spirit in every age of the church, for the perfecting of the saints and the edifying of the body of Christ. [SPIRITUAL GIFTS.]

The views of the first Christians respecting the Holy Spirit were vague and diverse. His power had penetrated and pervaded the early church, and yet, in general, no distinct and adequate conceptions of him were formed in the mind. Baumgarten says, 'The doctrine of the Holy Spirit remained a long time undecided. It lay near to the first church in a *practical* respect only. 'We see from this,' says Neander, 'how completely religion is a thing of life, before it can obtain for itself an adequate form of development in definite conceptions.' Some believed him to be a mere power; some confounded the idea of person with the charisma; others supposed him to be a creature; others believed him to be God; and others still were undecided. The practical recognition of him, however, as the principle of the divine life in man, was almost universal in the early church.

The more distinct conceptions of the nature of

the Spirit arose out of the baptismal formula, and the discussion of the doctrine of the Trinity, especially of the Arian controversy. Athanasius, Basil, and the Gregories believed in the equality of the Spirit, and contended that it was a common church doctrine from the beginning. The Council of Nice says: 'We believe in the Holy Ghost.' In the Constantinopolitan confession the deity of the Spirit was affirmed with more distinctness, and his procession from the Father alone implied. The council at Antioch rejected the homoousia in respect both to the Spirit and the Son. Under Theodosius the Scripture doctrine was restored, and it has since remained the catholic doctrine.—E. A. L.

**SPIRITUAL GIFTS** (τὰ πνευματικά suppl. χαρίσματα), a phrase used to denote those endowments which were conferred on persons in the primitive church, and which were manifested in acts and utterances of a supernatural kind.

The phrase is taken from 1 Cor. xii. 1, where the words *περὶ τῶν πνευματικῶν* are rendered in the A. V. 'concerning spiritual gifts.' The accuracy of this rendering is generally admitted; for though some would take *πνευματικῶν* as masculine, and understand it, as in xiv. 37, of persons spiritually endowed, the tenor of the entire passage shows that it is of the gifts themselves and not of the parties endowed with them that the apostle speaks in this chapter (comp. xiv. 1).

It is from the apostle's statements in this chapter that our information concerning the spiritual gifts of the primitive church is chiefly drawn.

1. The first thing to be noted is what may be called the fundamental condition and test of these gifts. This is the acknowledgment of Jesus Christ as Lord. 'I give you to understand,' says the apostle, 'that no man speaking by the Spirit of God calleth Jesus accursed, and that no man can say that Jesus is the Lord but by the Holy Ghost' (ver. 3). The denunciation of Jesus as an impostor, whether that came forth in the shape of an imprecation (*ἔστω ἀνάθεμα*) or in the shape of an assertion (*ἔστω ἀνάθεμα*), having reference to his having died as one accursed (comp. Gal. iii. 13), proved sufficiently that the party uttering it was not under the influence of the Spirit; whilst on the other hand the recognition of Jesus as the Lord—i.e. the admission of his Messianic claims and the submission to his supreme authority—formed the antithesis to this, and was a proof that the party was under the power of the Holy Ghost. The primary condition, then, of the possession of spiritual gifts was sincere adherence to Jesus as the Messiah. Apart from this there might be the arts of the magician or soothsayer, but no effects produced by the Spirit of God.

2. The source of these spiritual gifts was God's grace, and the agent by whom they were produced was the Holy Ghost. They were *χαρίσματα* or *grace-gifts*; and the apostle expressly says that amid diversity of gifts it is one and the same Spirit by whom they are bestowed, and amid diversity of services it is one and the same Lord by whom they are appointed, and amid diversity of operations it is one God who energises all in all (ver. 4-6).

3. When the apostle speaks here of *χαρίσματα*, *διακονίαι*, and *ἐνεργήματα*, the inquiry is suggested how these three expressions are to be taken.

Are they intended to mark off three distinct classes of spiritual gifts? or do they describe the same objects under different aspects? or is the first the generic class under which the other two are subsumed as species? Each of these views has found advocates. The Greek fathers generally regard these as simply different names for the same object (comp. Chrysostom *in loc.*), but most recent writers regard them as relating to distinct classes. (For different classifications on this principle, see Aquinas, *Summa Theol.* ii. 2, qu. 171; Estius on 1 Cor. xii.; Olshausen on do., etc.) The objection to all the arrangements on this principle is, that they are all more or less arbitrary, so that what is placed by one under one head is with equal plausibility placed by another under another. The opinion that *Charisma* is the genus of which *Diakonai* and *Energēmata* are species, is open to the objection that to make *diakonai* a kind of *charisma* is somewhat forced, and besides it does not accord with the parallelised structure of the apostle's statement, which plainly makes these three objects collateral with each other. The opinion which has most in its favour is that we have here only one object presented under different aspects. On this principle the three classes may be arranged thus:—These endowments of the primitive church are—1. *Gifts of divine grace*, as the principle of the new life which with its manifold capabilities is communicated by the indwelling Spirit of God; 2. *Ministries*, as means by which one member serves for the benefit of others; and 3. *Operations, effects* by which the *charismata* manifest their active power. This seems a highly probable explanation of the apostle's words; nor do we see the harshness in it of which Kling, from whom we have taken it, complains.

4. Side by side with this parallel arrangement of the gifts, the apostle places in another series of parallels the *agency* by which each of these is produced and sustained. The two series may be tabulated thus:—

CHARISMATA (given by) THE SPIRIT.

MINISTRIES (directed by) THE LORD.

EFFECTS (produced by) THE FATHER.

In the first two of these parallel propositions there is an ellipsis of the verb; but this the mind naturally supplies from the analogy of the last in which the verb is enunciated (see Henderson *on Inspiration*, p. 181).

5. It has appeared to some that there is a correspondence between the gifts enumerated in verses 8-10, and the church offices enumerated in ver. 28 (Horsley, *Serm.* xiv. appendix). The number of both is the same; there are nine gifts and nine offices. But beyond this the correspondence only very partially exists, and in order to give it even a semblance of existing throughout, not only must very fanciful analogies be traced but some palpable errors in interpretation committed (Henderson, p. 183).

6. The suggestion of Beza that the enumeration of gifts in ver. 8-10 is divided into co-ordinate groups, distinguished by the pronouns *ᾧ μὲν*, ver. 8; *ἐτέρῳ δέ*, ver. 9; *ἐτέρῳ δέ*, ver. 10, has been very generally followed by interpreters. Thus Meyer arranges them in the following scheme:

I. Charisms which relate to *intellectual* power.

1. *λόγος σοφίας*; 2. *λόγος γνώσεως*.

II. Charisms which are conditioned by *heroic faith* (Glaubensheroismus). 1. The *πίστις* itself;

2. The operation of this *in act*—a. *ἰάματα*; b. *δυνάμεις*; 3. The operation of this *in word*, *προφητεία*; 4. The critical operation of this, *διακρίσεις πνευμάτων*.

III. Charisms relating to the *γλώσσαι*. 1. Speaking with tongues; 2. Interpreting of tongues.

Henderson adopts substantially the same arrangement (*Inspiration*, p. 185, ff.), like Meyer, laying stress on the use of the pronoun *ἐτέρω* in place of *ἄλλω* by the apostle in his enumeration [*ἐτέρω* is selected because a distinct class follows; only thus can we account for the apostle's not proceeding with *ἄλλω*—Meyer; comp. Tittmann, *Synonymus*, ii. 28, E. T.] To all such attempts at classification De Wette objects—1. That *ὃ μὲν, ἐτέρω δέ, ἐτέρω δέ*, do not stand in relation to each other, but *ἐτέρω δέ* is always opposed to the nearest preceding *ἄλλω δέ*, so that neither can the one denote the genus nor the other the species; 2. If anything could mark a division, it would be the repeated *κατὰ τὸ αὐτὸ πνεῦμα, ἐν τῷ αὐτῷ πν.*, with the concluding *πάντα δὲ ταῦτα* of ver. 11, but even thus we should gain nothing; for in ver. 10 heterogeneous objects are united; 3. There is no reason to expect a classification, for the enumeration is not complete, see ver. 28; 5. The classification proposed [by Meyer] is in itself unsatisfactory; plainly the speaking with tongues is more closely akin to prophesying than to gifts of healing; and as Kling observes, the *διακρίσεις πνευμάτων* and the *ἐρμηνεῖα γλωσσῶν* relate to the understanding and not to heroic faith. In these reasons there is much force; and though the apostle's arrangement has the aspect of a classified scheme, we feel constrained to conclude with Kling that we must leave it undecided whether and how they can be classified. Neander, followed by Billroth and Olshausen substantially, without insisting on the apostle's words, contents himself with the obvious division of these charisms into two great classes—the one of which embraces such gifts as manifest themselves by word, and the other such as manifest themselves by deed; and each of these presents two subordinate classes, determined by the relation of the man's own mental culture and capacity to the working on him of the Spirit; so that in a man of high culture and intellectual power the *λόγος γνώσεως* would be manifested, while to one of less culture the Holy Spirit would come with a power which overwhelmed his self-consciousness and made him the almost mechanical utterer of what did not pass through the medium of his own intelligence (*Apostol. Zeitalt.* i. 174, ff.; E. T. i. 132).

7. Taking in order, as they stand in the text, the gifts enumerated, we have—i. The *λόγος σοφίας* and the *λόγος γνώσεως*. *Λόγος* is used here, as frequently elsewhere in the N. T., as = *sermo, discourse, utterance*. To *σοφία* and *γνώσις* various meanings have been attached. A common explanation is, that *σοφία* is the practical, and *γνώσις* the theoretical or speculative presentation of truth; but this, though adopted by Neander, Olshausen, and others, as well as the antithetical opinion advanced by Bengel, Storr, Rosenmüller, etc., that *σοφία* is the theoretical, and *γνώσις* the practical, is sufficiently refuted by the consideration that the practical and the theoretical apprehension and exposition of the truth, merely as such, cannot be properly regarded as coming among the miraculous gifts of the Spirit; such attainments are not *κατὰ*

*πνεῦμα* in the sense in which Paul uses that phrase here. Meyer makes *σοφία* the higher Christian wisdom as such; *γνώσις* the speculative, deeper, more penetrating knowledge of it; while Estius reverses this, making *λόγος σοφίας* 'gratiam de iis, quæ ad doctrinam religionis ac pietatis spectant, disserendi ex causis supremis,' and *λογ. γνώσεως* 'gratia disserendi de rebus Christianæ religionis ex iis quæ sunt humanæ scientiæ aut experientiæ,' i.e. of bringing principles of human philosophy or facts of human experience to bear on the illustration of divine truth. Henderson takes *σοφία* to be comprehensive of 'the sublime truths of the gospel directly revealed to the apostles, of which the *λόγος* was the supernatural ability rightly to communicate them to others;' and by *γνώσις* the possession by divine communication of 'an exact and competent knowledge of the truths which God had already revealed through the instrumentality of the prophets and apostles, in consequence of which those who possessed it became qualified, independently on the use of all ordinary means, forthwith to teach the church' (p. 188, ff.). Osiander makes *σοφία* the apprehension of divine truth in its totality, of the ends and purposes of God, of the plan and work of redemption, of the revelation of salvation through Christ in its connection, its divine system and organism; and *γνώσις* the penetrating knowledge of particulars, given by God, with their inward appropriation and experience (John vi. 69; xvii. 3; Phil. iii. 8). This last seems to be on the whole the least arbitrary and most probable interpretation—it being of course kept in view that the apprehension and experience of divine truth, whether as a whole or in its parts, as well as the power of giving this forth in discourse, is not such as mere human intelligence and study could attain, but such as was *κατὰ πνεῦμα*.

ii. *Πίστις*.—All are agreed that this cannot be understood of that faith which saves—justifying faith; and most regard it as a *fides miraculosa*, such as our Lord speaks of (Matt. xvii. 20; xxi. 21), and to which St. Paul refers (1 Cor. xiii. 2); a firm persuasion that on fitting occasions the divine power would be put forth to work miracles. Meyer thinks this too narrow, because under *πίστις* are ranked not only *ἰάματα* and *δυνάμεις*, but also *προφητεία* and *διακρίσεις πνευμάτων*. He would therefore understand by *πίστις* here 'a high degree of faith in Christ—a faith-heroism whose operation in some was in healings, etc.' As, however, such faith in Christ must mean faith in Him as the risen Lord, the source of miraculous power, whether exercised in healing diseases or in utterances of knowledge, this opinion seems to resolve itself into a substantial identity with the other.

iii. *χαρ. ἰαμάτων*.—This all are agreed in understanding as the power of healing disease directly without the aid of therapeutic applications. The plural is used to indicate the variety of diseases, and the various gifts of healing them possessed in the church.

iv. *ἐνεργήμ. δυνάμεων*.—This is generally referred to the working of miracles of a higher kind than the healing of disease—miracles which consist not in the performing without means what means may effect, but in the performance of what no means can effect, such as the raising of the dead, the exorcism of demons, the infliction, by a word, of death as a punishment, etc.

v. *προφήτεία*.—This refers not to ordinary reli-

gious discourses for the edification of the church, but to such a forth-speaking of the mind of God in relation to truth, duty, or coming events, as the inward action of the Holy Spirit on the mind may produce; Chrysost. *ὁ προφητεύων πάντα ἀπὸ τοῦ πνεύματος φθέγγεται*. That the gift of predicting future events was possessed in the early church, we see from such instances as Acts ii. 27, 28; xxi. 11, etc.; but the *προφητεία* of the N. T. does not generally relate to this; it usually has reference to the utterance of doctrine given by revelation from God (comp. 1 Cor. xi. 3; xiv. 26-33, etc.)

*vi. διακρίσεις πνευμάτων*.—From 1 Cor. xiv. 29 (comp. 1 Thes. v. 21; 1 John iv. 1) we learn that professed prophetic utterances were to be subjected to trial, that nothing unchristian or unedifying might pass under that name; and it is to this that the gift now before us relates. Even apostles would seem to have submitted their doctrine to the judgment of these gifted critics (1 Cor. xiv. 37).

*vii. γένη γλωσσῶν*.—That this refers to the *λαλεῖν γλώσσῃ* or *γλώσσαις* which existed in the Corinthian church, and indicates that of these *γλώσσαι* there were various kinds, is undoubted; but in what this gift consisted is a question involved in great difficulty, and to which very different answers have been given. We may at once dismiss some of these as not deserving serious consideration—viz. 1. That of Bardili and Eichhorn, who take *γλώσσα* in the literal sense of *tongue*, and suppose that the *λαλεῖν* was a sort of inarticulate babble, an ecstatic utterance of mere sounds made by the tongue—an opinion which is irreconcilable with the idea of this being a gift of the Holy Ghost, with the possibility of an *interpretation* of the sounds uttered, with what St. Paul says xiv. 18, and with the use of the plural in the phrase *γλώσσαις λαλεῖν*; 2. That of Bleek, who takes *γλώσσα* in the sense of *gloss*—i. e. archaic, poetical, or provincial word or idiom—a meaning which belongs to the technicalities of the grammarians, and is quite foreign to the language of the N. T.; and 3. That of Billroth, who supposes *γλώσσα* to mean a composite language formed of the elements of various tongues, and in its composition affording a symbol of the uniting power and universality of Christianity—which is at the best only a pleasing fancy. The only two opinions worth considering are the old view that these *γλώσσαι* were actual foreign tongues which the gifted persons spoke without having learned them; and the opinion, subject to various modifications, that they were new and divinely-inspired utterances of a kind transcending the ordinary capacity and intelligence of men.

Before entering on the consideration of these views, it may be well to state articulately the various peculiarities of this gift. These may be gathered from the statements of the apostle. From these we learn that it was a gift of the Spirit (1 Cor. xii. 11, 28, 30); that it belonged only to some in the church (xii. 11, 30); that it stood in some relation to the gift of prophesying—was inferior to it in point of utility, but afforded greater scope for display (xiv. 5, 6, 18, 19); that it was exercised in acts of prayer and praise (xiv. 2, 14, 15, 16, 17); that it was not exercised through the medium of the intelligence (*νοῦς*), and so was unintelligible without an interpretation, which the party exercising it might not be capable of supplying, as it was the result of a distinct gift, which might or might not accompany the other (xiv. 5,

6, 13, 16, 23); that it might appear to one unaccustomed to it a frenzy (xiv. 23); that it had the effect of an instrument giving an uncertain sound, or was no better than the speaking of a barbarian, or the clang of a cymbal, when not interpreted (xiv. 7-9; xiii. 1); and that its use was to serve as a sign [for evidence of God's presence] to those who did not believe (xiv. 22).

Let us now turn to the former of the two opinions above noticed: those who hold this to be *γλώσσα* in the sense of *language*; and they support their opinion by an appeal to our Lord's promise to his disciples that, as a sign of his presence with them, they should speak with new tongues (*καίνας γλώσσας*, Mark xvi. 17), and to the occurrences of the day of Pentecost when the apostles spake with other tongues (*ἐτέρας γλ.*; Acts ii. 4, ff.) This argument, it must be admitted, is not without force. It seems altogether probable that the event of the day of Pentecost was a fulfilment of the promise of Christ to his disciples, and if we assume (as the narrative seems to intimate) that on that occasion the apostles did receive the faculty of speaking foreign tongues through the agency of the Spirit, there is great plausibility in the conclusion that the gift of tongues bestowed on the primitive church consisted in the possession of this faculty. It is frivolous to object to this, as De Wette and Meyer do, that the speaking of a language one has never learned is psychologically impossible, for, if divine interposition be admitted, it is idle to set limits to its operation: 'with God all things are possible;' and He who caused 'the dumb ass to speak with man's voice,' could surely employ the organs of a man to utter a foreign tongue of which he was ignorant. In the way of the conclusion, however, above stated, that the gift of which the apostle treats in writing to the Corinthians is the *same* as that promised by our Lord, and received by the apostles on the day of Pentecost, there are many serious difficulties. For one thing, it must strike every one that if the apostles possessed the power of speaking foreign tongues miraculously, they appear to have made very little use of it for the purposes of their mission; for, with the exception of the instance of the day of Pentecost, we do not read of their ever using this gift for the purpose of addressing foreigners. The most serious objections, however, to the opinion that the Glossolalia of the Corinthians was a speaking in foreign tongues, are derived from what the apostle says about it in writing to them. 1. The use of the phrase *γλώσσῃ λαλεῖν* is not in accordance with this view; this phrase cannot mean 'to speak a foreign language.' 2. The Glossolalia was unintelligible to *every one* till interpreted (xiv. 2), which could not be said of a foreign tongue actually vernacular to certain people. 3. When the apostle (xiv. 9) specifies a speaking *διὰ τῆς γλώσσης*, he cannot be understood as referring to the tongue as the instrument of speech, which would give a most insipid turn to his words; he must refer to the Glossolalia as a gift, and in this case his statement becomes exceedingly vapid if we understand that gift to have consisted in the power of speaking foreign tongues. 4. This gift was used in individual prayer to God; and St. Paul, who possessed this gift above others, used it chiefly in secret: can we understand this of a speaking to God in foreign tongues? 5. The apostle places the

Glossolalia in opposition, not to speaking in the vernacular tongue, but to speaking intelligibly, or *ἐν ἀποκαλύψει ἢ ἐν γνώσει, ἢ ἐν προφητείᾳ, ἢ ἐν διδασκῇ* (xiv. 14, 15, 16, 6). 6. The apostle compares the glossai with foreign tongues, which assumes that they were not the same (xiv. 10, ff.) And 7. Had the apostle had the speaking of foreign tongues in view, he would have made the exercise of them dependent on the presence of those by whom they were understood, not on their bearing on the edification of the church.

On these grounds we are constrained to believe on the assumption that the *καὶ αὐαὶ γλῶσσαι* of our Lord's promise, and the *ἐτέραι γλῶσσαι* of the day of Pentecost, mean foreign languages; that the speaking with tongues of the Epistle to the Corinthians was a gift of a different kind. There are, however, some difficulties connected with that assumption which it is only fair to state. In proceeding to this we may remark *in limine*, that the terms *καὶ αὐαὶ* and *ἐτέραι* by no means necessarily indicate foreign existing tongues; they merely characterise the tongues in question as *new* and *different* compared with those with which the parties were already familiar. We are not, therefore, obliged to understand our Lord's promise as referring to the faculty of speaking *foreign* tongues. There seems also an *a priori* improbability that such a faculty would be miraculously conferred when it was one for which no special need existed, the Greek tongue being so widely diffused that the first preachers of Christianity were not likely to go where it was not known. This consideration is heightened by the fact already referred to, that, excepting on the day of Pentecost, there is no hint that they ever used this faculty in preaching to heathens. As to the day of Pentecost, it strikes one as noticeable that the gift of tongues came upon the disciples when they were alone, and when, therefore, there was not only no need to speak with foreign tongues, but very strong reasons why, even if they knew such tongues, they should refrain from using them. It is singular also that such a gift should be called into exercise in addressing persons all of whom understood a common language, and to all of whom at once Peter apparently spoke on the same day without an interpreter. Moreover, one cannot refrain from asking, How was this speaking in different foreign tongues conducted? Did the gifted persons all speak at once? or did they speak one after the other? If the former, would not the confusion of sounds be such as to render their speaking a mere babel? if the latter, would not a longer time have been requisite for the whole to speak than the conditions of the narrative allow us to suppose? In fine, supposing the disciples to have spoken intelligibly to these people in their respective languages, why should they have appeared to any of the bystanders as men filled with new wine? Does not this imply an excited utterance and gesticulation altogether foreign to the case of men who had simply to tell their fellow-men such truths as those which these disciples had to publish? To these difficulties in the way of the common understanding of this narrative, we do not attach so much importance as to suppose that they impugn its authenticity; now are we induced by them to accept the hypothesis of some that the disciples spoke in Greek or Aramaic, but were miraculously understood by the hearers each in his own language. But they do seem to lead to the

conclusion that, though the speaking of foreign languages might sometimes attend the gift of tongues, this was neither its invariable nor its peculiarly distinctive peculiarity.

This brings us to the consideration of the opinion that the tongues were new languages in the sense of being ecstatic utterances, inspired and dictated by the Holy Spirit, and of a kind above what the ordinary faculties of the individual could reach.

We may pass by the opinion of Rossteuscher and Thiersch, that these tongues were angel-tongues, and that the gift consisted in the privilege of communing with God as the angels do; for this is a mere conjecture without any foundation in the statements of the apostle; the allusion in xiii. 1 to the 'tongues of angels' being merely a rhetorical device to heighten the contrast the apostle is instituting. Schulz restricts the tongues to ecstatic utterances of praise to God; but this is too narrow a view, as is evident from 1 Cor. xiv. 13-17. Neander thus describes the state of the speaker with tongues: 'The soul was immersed in devotion and adoration. Hence prayer, singing God's praise, testifying of the great doings of God, were suited to this state. Such an one prayed in the Spirit; the higher spiritual and emotional life predominated in him, but a development to the understanding was wanting. The consequence was that since out of his peculiar feelings and views he formed a peculiar language for himself, he wanted the faculty of so expressing himself as to be understood by the mass' (*Ap. Zeit.* i. 179). Olshausen adopts substantially the same view, only he differs from Neander in supposing that the speaking of foreign languages was *included* in the speaking with tongues. Meyer understands by 'the *γλῶσσαι λαλεῖν* such devotional utterances in petition, praise, and thanksgiving, as were so ecstatic that the action of the person's own understanding was suspended, whilst the tongue, ceasing to be the organ of the individual reflection, acted independently of this, as it was moved by the Holy Ghost.' Hence he thinks the term *γλῶσσα* came to be applied to this gift, the tongue acting as it were independently of the understanding, and for itself. Hence also he accounts for the use of the plural *γλῶσσαι λαλεῖν*, and the *γένη γλωσσῶν*, as in such a case there would doubtless be varieties of utterances, arising from differences of degree, direction, and impulse, in the ecstasy. With this view in the main the majority appear to concur, and it appears to us to meet all the requirements of the case; only that with Olshausen we would include the speaking of foreign tongues as among the occasional manifestations of this gift. Its essence, however, lay in its being an ecstatic power of speech, the result of the man's being lifted out of himself and made to give utterance in broken, fragmentary, excited outbursts of thoughts and feelings, especially of rapturous devotion, beyond the ordinary range of humanity. Possibly there may be an allusion to such ecstatic devotions in the *στεναγμοὶ ἀλαλήτοις* of Rom. viii. 26.

viii. *ἐρμηνεῖα γλωσσῶν*. As the *γλῶσσα* translated the *νοῦς*, it could be made to convey edification to the hearers only as it was explained; and for this purpose the Holy Spirit gave some persons the faculty of comprehending it, and thereby of giving its meaning to others. This gift sometimes was bestowed on the same person who had the gift of tongues.

8. Such were the gifts of the Spirit enjoyed by the primitive church. They were different and variously distributed according to the sovereign will of the giver. But amid all this diversity the church remained one—the indivisible body of Christ pervaded and influenced by the one Spirit of all grace. Hence all these gifts were to be subordinated to the end of edifying the church; and more than all of them charity was to be sought (1 Cor. xii. 11-31).

SPOIL. [BOOTY.]

SPOUSE. [MARRIAGE.]

SPRING. [PALESTINE.]

STACHYS (Στάχυς), an unknown person, from his name apparently a Greek, a disciple at Rome and a friend of Paul (Rom. xvi. 9).

STACKHOUSE, THOMAS, a learned and laborious divine of the Church of England, born in 1680. He was at one time English pastor at Amsterdam, and after serving some cures near London, obtained the living of Beenham-Valence in Berkshire, where he died October 11, 1752. He took part in the disputations which were called forth by the wild notions of Woolston on the supposed allegorical character of the person and writings of Moses, and of the miracles of Jesus Christ, and published in 1730, *A fair state of the Controversy between Mr. Woolston and his Adversaries*. This was followed in 1731 by a *Defence of the Christian Religion*, of which there was a second edition in 1733. It was translated into French by Chais, The Hague 1738. A German translation by H. C. Lemker was also published at Hanover and Göttingen in 1750. But the chief work of Stackhouse was his *New History of the Bible from the beginning of the world to the birth of Jesus Christ*, which was published in 1732 in 2 vols. folio, and of which there have been several editions. That of 1752 is much esteemed on account of its engravings. He was the author of several other works.—M. H.

STACTE. [NATAF.]

STANDARDS. Standards and ensigns are to be regarded as efficient instruments for maintaining the ranks and files of bodies of troops; and in Num. ii. 2 they are particularly noticed, the Israelites being not only enjoined to encamp 'each by the standard of his tribe and the ensign of his father's house,' but, as the sense evidently implies, in orders or lines. It is clear, when this verse is considered in connection with the religious, military, and battle pictures on Egyptian monuments, that the Hebrews had ensigns of at least three kinds, namely—1. The great standards of the tribes, serving as rallying signals for marching, forming in battle array, and for encamping; 2. The divisional standards of clans (משפחות, *mishpachoth*); and 3. Those of houses or families (בית אבות, *beth aboth*); which after the occupation of the Promised Land may

gradually have been applied more immediately to corps and companies, when the tribes, as such, no longer regularly took the field. That there were several standards may be inferred from the uniform practice of the East to this day; from their being useful in manœuvres, as already explained, and as shown in the Egyptian paintings; and from being absolutely necessary; for had there been only one to each tribe, it would not have been sufficiently visible to crowds of people of all ages and both sexes, amounting in most cases to more than 100,000, exclusive of the incumbrance of their baggage. Whole bodies, therefore, each under the guidance of the particular clan ensign, knew how to follow the tribal standard; and the families offered the same convenience to the smaller divisions. It may be doubted whether these three were enough for the purpose; for if they were carried in the ranks of the armed bodies, it must have been difficult for the households to keep near them; and if they were with the crowd, the ranks must have had others to enable them to keep order, as we find that even in the Roman legions, thoroughly trained as they were, numerous vexilla were still held to be necessary. That there were others might be inferred (Is. xiii. 2; Jer. li. 27) from the circumstance of their being planted on the summit of some high place to mark the point where troops were to assemble; these last, therefore, were not ensigns of particular bodies, but signals for an understood purpose, such as both the Greeks and Romans employed when the general gave notice of his intention to engage by hoisting above his tent a red tunic, or when Agamemnon recalled his troops in order to rally them by the signal of a purple veil.

But what the form, colours, materials, and symbols of the Hebrew ensigns were, it is more difficult to determine, chiefly because there has been a great quantity of learned trifling among Rabbinical writers and more modern heralds, all equally bent upon fearless assertions, and with so little true knowledge of the customs of antiquity that they have uniformly described these ensigns as flags in shape like modern banners—a form not yet shown to have existed in the west of Asia or Europe anterior to the first invasion of the Huns, excepting on some naval medals of the empire. In a collection of drawings, now before us, of 124 Egyptian, a considerable number of Persian, Bactrian, Etruscan, and Greek ensigns, and a very large series of Roman, all are effigies, spolia of animals or plants, tablets, globes, vexilla, or dragons. The vexillary or labarum form is known to be of Oriental (Bactrian) origin, and the dragon similarly originated among the equestrian nations of the East. It consisted of a head of metal with an open mouth, which turned on a spindle at the neck, where a long bag of coloured stuff was sewn to it, and kept the open mouth to the wind, filling the bag with air, and causing it to flout and twist like a serpent's tail. It was the origin of the vane and pendant: when the metal head was omitted on account of its weight on the top of a spear, and the bag which formed the body and tail was cut open, or reduced to one breadth, the dragon became the flammula or pennon of more recent times. The vexillum was a substitute for a tablet ensign, being made of cloth, and spread upon a short bar, placed crosswise on the summit of a pole.

As early as the days of the exode of Israel, the Egyptians had ensigns of different kinds. We ob-

serve on the monuments\*—1. Thrones or palanquins, indicating the great and sacred centre of an army. 2. Royal fans attending the sacred centre; they are the '*Efthoudes* of India;' always carried by princes, or sons of the Pharaoh, on the summit of long poles, and therefore intended as signs of honour, not for use as umbrellas. 3. A long spar borne on the shoulders of a row of men, surmounted by a globe with an enormous double feather, apparently twelve or fourteen feet high, and four or five broad, coloured green, white, and red. This has been denominated the standard of Sesostris, and was most likely the signal ensign of encampment, which was fixed before the royal tent, and when set up must have been visible high above all

ensigns, with and without shawls beneath them, ensigns of particular temples, idols, cities, nomes. 7. Square tablets on poles borne by the file-leader of a tribe. 8. Ostrich-feather ensigns, carried as marks of honour by princes, and sometimes seen stuck at the back in a broad belt.

Ostrich feathers occur again as an ensign of the Lebanon people, or a nation of Palestine, which is represented submitting to Sesostris. These ensigns are not necessarily made of plumes of the bird, and they occur white, white with a black bar, and barred red and white, red, white and black, and red, white, and green; so that there were many belonging to different appropriations. Indeed this ensign is still in use in Yemen and the southern desert, where many sheiks have it borne on bamboo poles as the cognisance of their clans.

These details we have deemed necessary in order to show that at the time when Israel departed out of Egypt, most if not all of these kinds of ensigns were well known, and that therefore it is likely they were, under proper modifications, adopted by that people when about to become wanderers over desert regions where order and discipline, directing signals, telegraphs, and indications of water would be most useful; and as the Egyptians, in common with other organised nations, had a *tensa deorum*, or sacred centre for their gods and the royal tent, so also had the chosen race a sacred centre, the twelve tribes taking their well-known stations around it—that centre rendered the more awful and sublime by the cloud hovering, or the light shining, above it. [ENCAMPMENT.]

From the kind of service which each class of ensign was to render, we may take for granted

that the tribal standard (דגל, *degheh*), at all times required to be distinguishable 'afar off,' would be elevated on high poles with conspicuously marked distinctions, and that therefore, although the mottoes ascribed to the twelve tribes, and the symbolical effigies applied to them, may or may not have been adopted, something like the lofty flabelliform signa of Egypt most likely constituted their particular distinction; and this is the more probable as no fans or umbrellas were borne about the ark, and, being royal, no chief, not even Moses himself, could assume them; but a priest or Levite may have carried that of each tribe in the form of a fan, as the distinction of highest dignity, and of service rendered to the Lord. They may have had beneath them vittæ, or shawls, of the particular colour of the stone in the breastplate of the high-priest (although it must be observed that that ornament is of later date than the standards); and they may have been embellished with inscriptions, or with figures, which, at a time when every Hebrew knew that animal-forms and other objects constituted parts of written hieroglyphic inscriptions, and even stood for sounds, could not be mistaken for idols, the great lawgiver himself adopting effigies when he shaped his cherubim for the ark and balls for the brazen sea. In after ages we find typical figures admitted in the ships carved on the monuments of the Maccabees, being the symbol of the tribe of Zebulun, and not even then prohibited, because ships were inanimate objects. As for the 'abomination of desolation,' if by that term the Roman eagle was really meant, it was with the Jews more an expression of excited political feeling under the form of religious zeal, than of pure devotion, and

490. 1. Bactrian eagle; 2. Persian vexillum; 3. Standard of Sesostris; 4. Egyptian ensign set in a frame, signal of castrametation and of direction; 5. Telegraphic ensign, varying with each Pharaoh; 6. Subordinate Egyptian ensigns; 7. Tribal tablet; 8. Plume ensign used in temples.

the other signa. 4. Standards of lower elevation, always with two great feathers issuing from a globe, and the foot set in a portable frame; which we take to be the sign of castrametation and of direction, serving as temporary guiding posts, indications of wells, lines of front in camp, etc. 5. We have found several tablets on poles, similarly set in frames, but with particular symbols above the tablet, and two, three, or four arms holding objects that can be inserted or taken off, and the arms themselves apparently movable, the whole having the appearance of a complete telegraph. 6. Besides these there are very many varieties of effigial

\* See woodcut, Nos. 1, 2, 3, 4, 5, 6, 7, 8.

one of the many signs which preceded their national doom.

There is reason to believe that the *mishpachoth*, or ensigns of the clans, and מִשְׁכָּח (aotli), were, at least in the earlier ages, symbolical figures; and that the shekels ascribed to David, bearing an olive or citron branch, to Nehemiah with three lilies, to Herod Agrippa with three ears of corn, and to Tryphon with a helmet and star, were so many types of families, which may all have been borne as sculptured figures, or, when the purism of

491. 1. Egyptian fans of state attending the king, or stuck upon the sacred arks; 2. Tablet ensign of the Jews (?), as represented on the arch of Titus; 3. Globe signum of Augustus; 4. Dragon ensign, common to many nations; 5. Parthian standard; 6. State umbrella, on a coin of Augustus.

later times demanded it, may have been painted upon tablets, like the supposed family or clan motto on the ensign of the Maccabees (מַכְבֵּי). The practice was equally common among the heathen Egyptians, Persians, and Greeks; and perhaps the figures of those actually used in Jerusalem are represented in the sculptured triumphal procession on the arch of Titus, where the golden candlestick and other spoils of vanquished Judah are portrayed. A circumstance which confirms the meaning of the objects represented upon the Jewish shekels is, that on the reverse of those of Herod Agrippa is seen another sovereign-ensign of Asia—namely, the umbrella (*chattah*, *chutah* of India), always attending monarchs, and sculptured at *Chehel Minar*, and at *Nacshi-Boostan*, where it marks the presence of the king. It is still the royal token through all the East and Islam Africa; and it appears that in the Macedonian era it was adopted by the Græco-Egyptian princes; for Antony is reproached with joining the Roman Eagles to the state umbrella of Cleopatra:—

‘Interque signa (turpe!) militaria  
Sol aspiciet conopium.’—Hor. *Epod.* ix.

The ensign of the family or clan of the royal house then reigning, of the judge of Israel, or of the captain of the host, was no doubt carried before the chief in power, although it does not appear that the Hebrew kings had, like the Pharaohs, four of them to mark their dignity; yet from analogy they may have had that number, since the practice was also known to the Parthian kings subsequently to the Byzantine emperors, and even to the Welsh princes.—C. H. S.

STAR IN THE EAST. Matthew (ch. ii. 1, *seq.*) relates that at the time of the birth of our Lord there came wise men (magi) from the East to Jerusalem, to inquire after the newly-born king of the Jews, in order that they might offer him

presents and worship him. A star, which they had seen in the East, guided them to the house where the infant Messiah was. Having come into his presence, they presented unto him gifts—gold, and frankincense, and myrrh.

The solid learning and free conjecture of Christian divines have combined with the unfriendly daring of infidelity to cast a heap of difficulties on the particulars involved in this passage of Holy Writ. Our space will not allow us to review and examine what has been written by friends and enemies on the subject. We must content ourselves with a brief statement of what appears to us the right view of the case, referring in justification to the authorities whence we have drawn our materials.

These wise men were Chaldean magi. During many centuries the magi had been given to the study of astronomy, and for some considerable time before the birth of our Lord they had corrupted and disfigured their scientific knowledge by astrological speculations and dreams. A conviction had long been spread throughout the East, that about the commencement of our era a great and victorious prince, of the Messiah, was to be born. His birth was in consequence of words of sacred Scripture (Num. xxiv. 17), connected with the appearance of a star. Calculations seem to have led the astrological astronomers of Mesopotamia to fix the time for the advent of this king in the latter days of Herod, and the place in the land of Judæa. Accordingly, at the appointed time, two planets, Jupiter and Saturn, were in conjunction under such circumstances as to appear one resplendent heavenly body, and to marshal the way for the magi from their own homes to Jerusalem, Bethlehem, and the inn.

This view, which owes its origin to the astronomer Kepler, has been investigated and approved by some of the soundest minds of Germany. Under the influence of a conjunction of Jupiter, Saturn, and Mars, which took place in the year 1604, Kepler was led to think that he had discovered means for determining the true year of our Saviour's birth. He made his calculations, and found that Jupiter and Saturn were in conjunction in the constellation of the Fishes (a fish is the astrological symbol of Judæa) in the latter half of the year of Rome 747, and were joined by Mars in 748. Here then he fixed the first figure in the date of our era, and here he found the appearance in the heavens which induced the magi to undertake their journey, and conducted them successfully on their way. Others have taken up this view, freed it from astrological impurities, and shown its trustworthiness and applicability in the case under consideration. It appears that Jupiter and Saturn came together for the first time on May 20th in the twentieth degree of the constellation of the Fishes. They then stood before sunrise in the eastern part of the heavens, and so were seen by the magi. Jupiter then passed by Saturn towards the north. About the middle of September they were near midnight both in opposition to the sun, Saturn in the thirtieth, Jupiter in the fifteenth degree, being distant from each other about a degree and a half. They then drew nearer: on October 27th there was a second conjunction in the sixteenth degree, and on November 12th there took place a third conjunction in the fifteenth degree of the same constellation. In the two last conjunctions the in-

terval between the planets amounted to no more than a degree, so that to the unassisted eye the rays of the one planet were absorbed in those of the other, and the two bodies would appear as one. The two planets went past each other three times, came very near together, and showed themselves all night long for months in conjunction with each other, as if they would never separate again. Their first union in the east awoke the attention of the magi, told them the expected time had come, and bade them set off without delay towards Judea (the fish land). When they reached Jerusalem the two planets were once more blended together. Then, in the evening, they stood in the southern part of the sky, pointing with their united rays to Bethlehem, where prophecy declared the Messiah was to be born. The magi followed the finger of heavenly light, and were brought to the child Jesus. The conclusion in regard to the time of the advent is, that our Lord was born in the latter part of the year of Rome 747, or six years before the common era.

We have not presented this view from any leaning in favour of a rationalistic interpretation, believing that God could, had he so pleased, have created a heavenly body for the purpose. But it must also be said that the Divine Ruler of the universe is frugal (*absit invidia verbo*) of his instrumentalities, and might well, in the case before us, make use, for the gracious purposes of his providence, of cosmical arrangements which he had fixed ere the earth and heavens were made. They are, however, facts which have been set forth. As facts, they explain a passage on which many doubts and difficulties have lain. The reader will determine whether he finds the explanation satisfactory. Kepler's ideas may be found in the essay *De Jesu Christi servatoris nostri vero anno natalitio*, and more fully in *De vero anno quo aternus Dei filius humanam naturam assumpsit*, Frankfurt 1614. His view was taken up, and presented with approbation to the literary world, by a learned prelate of the Lutheran church, Bishop Miinter (*Der Stern der Weisen*, Kopenh. 1827). It also gained approval from the celebrated astronomer Schubert of Petersburg (*Vermischten Schriften*, Stuttgart 1823). The learned and accurate Ideler (*Handbuch der Chronologie*, Berlin; see vol. ii. p. 399, *seq.*) reviewed the entire subject, and signified his agreement. Hase and De Wette, however, have stated objections. A recent writer of considerable merit, Wieseler (*Chronolog. Synop. der 4 Evangelien*, Hamburg 1843), has applied this theory of Kepler's in conjunction with a discovery that he has made from some Chinese astronomical tables, which show that in the year of Rome 750 a comet appeared in the heavens, and was visible for seventy days. Wieseler's opinion is, that the conjunction of the planets excited and fixed the attention of the magi, but that their guiding-star was the aforesaid comet.—J. R. B.

STATER (στατήρ; *stater*; A. V. 'a piece of money,' margin 'stater').

The word *stater*, from ἵστημι, means a coin of a certain weight, and hence a standard, and was a term applied by the Greeks to coins of gold, electrum, and silver. The principal earlier gold staters were those of Cræsus (Κροσειοί), the Persian darics (στατήρες Δαρεικοί, Δαρεικοί), and those of Athens.

The didrachms of the Perso-Euboic, and the third a didrachm of the Attic talent. The staters of Cræsus, which were the earliest gold coins that came to Greece (Herod. i. 54), have about the same weight as the darics—i.e. 128 grains Troy—which weight is a little less than that of an Attic stater. The electrum staters of the west of Asia Minor were commonly called in ancient times Cyzicene staters (στατήρες Κυζικηνολ, Κυζικηνολ). They consist of about one-fourth part of silver and three-fourths of pure gold (Plin. N. H. xxxiii. 4, 23), and weigh about 248 grains troy. According to ancient authority (Demosth. in *Phorm.* p. 914), they passed on the Bosphorus, a little after the year B.C. 335, for 28 Athenian silver drachms, whilst the *stater aureus* of Athens, weighing 133 grains troy, was current at 20 (Xenoph. *Anab.* i. 7, 18, speaking of the daric); hence 20 : 133 :: 28 : 186+. The silver in them was evidently not counted, and this stater, which weighed 186+ grains, was equal to a low didrachm of the Æginetan talent. Other staters are mentioned as being in circulation in Greece; those of Lampsacus, which in all specimens we have seen have exactly the weight of a daric; of Phocæa (Thucyd. iv. 52; Demosth. in *Boeot.* p. 1019); of Corinth (Pollux, iv. 174; ix. 80); and those of Philip of Macedon and Alexander the Great, who issued them of the weight of Attic didrachms. The stater is thus always a didrachm. The name, however, was in later times applied to the tetradrachm of Athens (Phot. s. v. *στατήρ*; Hesych. s. v. γλαῦκες Λαυριωτικαί), and attempts have been made to prove that even in the time of Thucydides the tetradrachm bore the name of stater (Thucyd. iii. 70, Dr. Arnold's note). The term stater was also applied to the gold tetradrachms (commonly called octodrachms) of the Ptolemies. There seems then to be no doubt that the name stater was first applied to the didrachm and then to the tetradrachm, as a standard coin of both metals.

The word stater is only once mentioned in the N. T., in the account of the miracle of the tribute-money. On our Lord's arrival at Capernaum, they who received the didrachms (οἱ τὰ διδραχμα λαμβάνοντες) asked St. Peter if his master paid the tribute (didrachms, ὁ διδάσκαλος ὑμῶν οὐ τελεῖ τὰ διδραχμα; Matt. xvii. 24-27). Many commentators, both ancient and modern—and among them Augustine, Origen, and Jerome—have entirely missed the meaning of this miracle, by interpreting the payment as a *civil* one, which it certainly was not (Alford, *in loc.*) The didrachm refers to the sum paid annually by the Jews of twenty years old and upwards to the temple at Jerusalem (Exod. xxx. 13). This was half a shekel, called by the LXX. τὸ ἥμισυ τοῦ διδράχμου [DIDRACHM; SHEKEL]. Now, at the time of Augustus the Attic tetradrachm had fallen so as to be equal to the Phœnician didrachm, and to four denarii of the weight of that period, and the weights of the shekel and its half are the same as those of the debased Attic tetradrachm and its half [SHEKEL], the silver currency of Palestine consisting of tetradrachms of the cities of Syria and Phœnicia. In order to pay this tax, St. Peter was commanded by our Lord to cast a hook into the sea and take up the fish that first came up, inside the mouth of which was discovered a stater, which was to be paid for our Lord and himself. This stater must therefore have been a silver tetradrachm, as no

other stater was current in Palestine at the time. 'It is observable,' says Mr. Poole (art. 'Stater,' Dr. Smith's *Dict. of the Bible*), 'in confirmation of the minute accuracy of the evangelist, that at this period the silver currency in Palestine consisted of Greek imperial tetradrachms or staters, and Roman denarii of a quarter their weight, didrachms having fallen into disuse. Had two didrachms been found by St. Peter, the receivers of tribute would scarcely have taken them; and no doubt the ordinary coin paid was that miraculously supplied.' The tetradrachms of Syria and Phœnicia during the 1st century were always of pure silver, but afterwards the coinage became greatly debased, though Antioch continued to strike tetradrachms to the 3d century, but they gradually depreciated. It was required, as Mr. Poole has observed to me (*Hist. of Jew. Coinage*, p. 240), that the tribute should be paid in full weight, and therefore the date of the gospel must be of a time when staters of pure silver were current. In all probability the 'thirty pieces of silver' for which our Lord was betrayed were also staters or tetradrachms of the Greek cities of Syria or Phœnicia [PIECE OF SILVER].—F. W. M.

STEEL. The word so rendered in the A. V. properly means 'copper' [NECHOSHETH]. It is doubtful if the Hebrews were acquainted with the process of hardening iron into steel; for though the 'northern iron' of Jer. xv. 12 has been supposed by some to be 'steel,' this is by no means certain; it may have been only a superior sort of iron. The word פלדה, *palda* (Nahum ii. 3 [A. V. 4]), translated in the A. V. 'torches,' is also supposed to denote 'steel,' and to refer to the flashing scythes of the Assyrian chariots (Henderson, *in loc.*)—W. L. A.

STEPHANAS (Στεφανᾶς), a disciple at Corinth, whose household Paul baptized (1 Cor. i. 16), being the first converted to Christianity in Achaia (1 Cor. xvi. 15). From the last of these texts it would appear that Stephanas and his family, in the most exemplary manner, 'addicted themselves to the ministry of the saints;' which some interpret of their having taken upon them the office and duty of deacons; but which seems to admit of a larger sense—viz. that all the members of this excellent family ministered to the wants and promoted the comfort of their fellow-Christians, whether strangers or countrymen. That Stephanas was present with St. Paul when he wrote the first epistle to the Corinthians is evident from 1 Cor. xvi. 17. As 'the household of Stephanas' is mentioned in both texts, it has been supposed that Stephanas himself was dead when Paul wrote; but in verse 17 it is said, 'I am glad of the coming of Stephanas.'—J. K.

STEPHEN (Στέφανος), one of the seven first deacons, and the proto-martyr of the Christian church. It appears from his name that he was a Hellenist, as it was not common for the Jews of Palestine to adopt names for their children, except from the Hebrew or Syriac; though of what country he was is unknown. He is represented by Epiphanius (xl. p. 50) as one of the seventy disciples chosen by Christ; but this statement is without authority from Scripture, and is, in fact, inconsistent with what is there mentioned concerning him. He is spoken of by others as one of the first

converts of Peter on the day of Pentecost; but this also is merely conjectural. Jerome (on Is. xlv. 12) and others of the Fathers praise him as a man of great learning and eloquence. The first authentic notice we find of him is in Acts vi. 5. In the distribution of the common fund that was entrusted to the apostles (Acts iv. 35-37) for the support of the poorer brethren (see Mosheim, *De Rebus Christ. ante Const.* p. 118, and *Dissert. ad Hist. Eccles. pertin.*), the Hellenistic Jews complained that a partiality was shown to the natives of Palestine, and that the poor and sick among their widows were neglected. Whether we conceive with Mosheim (*De Rebus*, etc. p. 118), that the distribution was made by individuals set apart for that office, though not yet possessing the name of deacons; or with the writer in the *Encyclopædia Metropolitana* (art. 'Ecclesiastical History;' see also Archbishop Whately's *Kingdom of Christ*), we conclude that with the office they had also the name, but were limited to Hebrews; or whether we follow the more common view, as set forth by Bohmer (*Diss.* vii.; *Juris Eccles. Antiq.*), does not materially affect the present subject. The complaint of the Hellenists having reached the ears of the apostles, immediate directions were given by them with a view to remove the cause of it. Unwilling themselves to be called away from their proper employment of extending the bounds of the Christian community, they told the assembled multitude of believers to select seven men of their own number, in whose faith and integrity they might repose entire confidence, for the superintendence of everything connected with the relief of the poor. The proposal of the apostles met with the approbation of the brethren, who proceeded at once with the choice of the prescribed number of individuals, among whom Stephen is first mentioned; hence the title of first deacon, or first of the deacons, is given to him by Irenæus (Iren. i. 12). He is distinguished in Scripture as a man 'full of faith and of the Holy Ghost' (Acts vi. 5). The newly-elected individuals were brought to the apostles, who ordained them to their office, and they entered upon their duties with extraordinary zeal and success. The number of the disciples was greatly increased, and many priests were among the converts. In this work Stephen greatly distinguished himself by the miracles he performed before the people, and by the arguments he advanced in support of the Christian cause. From his foreign descent and education he was naturally led to address himself to the Hellenists, and in his disputations with Jews of the Synagogue of the Libertines and Cyrenians, etc. [SYNAGOGUE and LIBERTINE], he brought forward views of the Christian scheme that could not be relished by the bigots of the ancient faith. As they were unable to withstand his powers of reasoning, their malice was excited; they suborned false witnesses against him, and dragged him before the Sanhedrim as a blasphemer. The charge brought against him was, that he had spoken against the law and the Temple, against Moses and against God. This accusation was calculated to incite all parties in the Sanhedrim against him (comp. Acts xxii. 22); and upon receiving it the predetermined purpose of the council was not to be mistaken. Stephen saw that he was to be the victim of the blind and malignant spirit which had been exhibited by the Jews in every period of their history. But

his serenity was unruffled; his confidence in the goodness of his cause, and in the promised support of his Heavenly Master, imparted a divine tranquillity to his mind; and when the judges fixed their regards upon him, the light that was within beamed forth upon his countenance, and 'they saw his face as if it had been the face of an angel' (Acts vi. 15).

Benson (*History of the First Planting of the Christian Religion*) and others have considered the testimony of the witnesses against Stephen as in every respect false, and that we are not even to suppose that he had stated that Christ would change the customs which Moses delivered (Acts vi. 14), upon the ground of the improbability of more being revealed to Stephen than to the apostles, as to the abolition of the Levitical ceremonies. From the strain of the martyr's speech, however, a different conclusion may be drawn. His words imply, in various passages, that external rites were not essential, and that true religion was not confined to the temple service (Acts vii. 8, 38, 44, etc.) And there seems much plausibility in the conjecture of Neander (*Planting and Training of the Christian Church*, translated by Ryland, vol. i. p. 56, *seq.*), that Stephen and the other deacons from their birth and education were less under the influence of Jewish prejudices than the natives of Palestine, and may thus have been prepared to precede the apostles themselves in apprehending the liberty which the gospel was to introduce. The statements of Stephen correspond in more than one particular with what was afterwards taught by St. Paul.

His speech is well deserving of the most diligent study, and the more it is understood the higher idea will it convey of the degree in which he possessed the qualities ascribed to him in the sixth chapter. Very different views have been taken of it by commentators. Upon the whole we are inclined to follow that which is given by Neander in the work referred to. Even as a composition it is curious and interesting from the connection which may be discovered between the various parts, and from the unity given to the whole by the honesty and earnestness of the speaker. Without any formal statement of his object, Stephen obviously gives a confession of his faith, sets forth a true view of the import of his preaching in opposition to the false gloss that had been put upon it, maintains the justness of his cause, and shows how well founded were his denunciations against the impious Jews.

He first enters upon a historical statement, involving a refutation of the charges which had been made against him of hostility to the O. T. institutions; but at the same time showing that acceptance with God does not depend upon outward relations. Under the same form he illustrates the providential care exercised by the Almighty in regard to the Jewish people, along with the opposition exhibited by the Jews towards those sent to them by God. And he points the application of his whole discourse by charging his carnal-minded hearers with resisting, like their fathers, the Holy Ghost. The effect upon his auditors was terrible. Conscience-smitten, they united in wreaking their vengeance on the faithful denouncer of their guilt. They drowned his voice with their clamorous outcries, they stopped their ears against him, they rushed on him with one

accord in a tumultuary manner, they carried him forth, and without waiting for the authority of law, they stoned him to death as a blasphemer. [STONING.]

The frantic violence of his persecutors did not disturb the tranquillity of the martyr, and he died praying that his murderers might be forgiven (vii. 60). In his prayer he showed that a new spirit had been introduced into the world, and taught the Christians that the example of their Divine Master was to be followed even in circumstances that they might have conceived to be impossible. Nor was this prayer without effect. Saul of Tarsus, who consented to his death (viii. 1), and kept the clothes of them that stoned him (vii. 58), heard his words, mocking, doubtless, like the rest. But the prayer was heard, and to it we owe the ministry of the apostle Paul (Tillemont, *Mémoires*, vol. ii. p. 8).

The only other particular connected with Stephen, mentioned in Scripture, is, that 'devout men carried him to his burial, and made great lamentation over him' (viii. 2). No information is given respecting the time of his death, or the place of his burial. In the fifth century (415), however, the relics of the martyr were said to have been miraculously discovered by a Greek priest of the name of Lucian (Luciani Presbyteri *Epistola de Inventione S. Stephani*), and they were brought to Europe by Orosius. Evodius, Bishop of Myala, wrote a small treatise concerning the miracles performed by them; and Severus, a bishop of the island of Minorca, wrote a circular letter of the conversion of the Jews in that island, and of the miracles wrought in that place by the relics which Orosius left there. These writings are contained in the works of Augustine, who gives the sanction of his authority to the incredible follies they record (*De Civit. Dei*, xxii. 8).

Since the fifth century, Stephen's day has been celebrated on the 26th of December. The date is confessed by many Roman Catholic writers to be arbitrary, and is wholly without authority.—J. K.

STEPHENS, more correctly STEPHEN (ETIENNE), the family name of an illustrious succession of learned printers, of whom, however, we have to notice specially here only Robert. He was the son of Henri Etienne (Henricus Stephanus), the printer of the *Quincuplex Psalterium* of Le Fevre d'Estaples, Paris 1509, 1513, and who died in 1520. Robert was born at Paris in 1503. Having received a learned education, he devoted himself to the editing and issuing of carefully-printed editions of learned works. In 1545 he issued, under the simple title of *Biblia*, an edition of the Vulgate, with a new Latin translation of the Bible, printed in parallel columns, and in a type of exquisite beauty. Explanatory notes are added in the margin, and as some of these gave offence to the doctors of the Sorbonne as savouring of the Reformed doctrines, Stephens thought it prudent, on the death of his father, to remove to Geneva. Before leaving Paris, however, he had issued his edition of the Greek N. T., first in a small form (known as the *O mirificam* edition, from the first words of the preface), Paris 1546, 1549, and afterwards in fol. with various readings from MSS. collated by his son Henry. At Geneva he printed an edition of the Greek text with the Vulgate rendering, and that of Erasmus, 1551. This

edition presented the text for the first time divided into verses. Two editions of the Hebrew Bible were also printed by him, one with the Commentary of Kimchi on the minor prophets, in 13 vols. 4to, Paris 1539-43; another in 10 vols. 16mo, Paris 1544-46. It is to him we owe the *Thesaurus Lingue Latine*, 4 vols. fol.; as to his son Henry the *Thesaurus Ling. Græcæ* is due—two monuments of vast learning and unwearied diligence. Robert Stephens died at Geneva, 6th September 1559.—W. L. A.

**STOCKS.** Three Hebrew words are thus rendered in the A. V.—1. מִדְּפַכֶּת (Jer. xx. 2; xxix. 26; 2 Chron. xvi. 10). This is supposed to have been rather a sort of pillory in which the head and hands were fastened, than an instrument for fastening by the feet. But this is quite uncertain.

2. כַּר (Job xiii. 27; xxxiii. 11). As this is expressly described as a fetter for the feet it probably answered to our *stocks*.

3. עֶכֶס (Prov. vii. 22). This was probably a fetter fastened round the ankle. The same word is used for an anklet (Is. iii. 18). The ὄζλον (A. V. 'stocks') to which Paul and Silas were made fast (Acts xvi. 24) may have been 'stocks,' but was probably simply a bar of wood, to which they were chained by the feet.—W. L. A.

**STOICS AND EPICUREANS.** [PHILOSOPHY, GREEK.]

**STONING.** [PUNISHMENTS.]

**STORAX** (Στύραξ) occurs in Ecclesiasticus xxiv. 15 [as the rendering of στακτή. In Gen. xxxvii. 24 Aquila renders נִכְאֵת by στύραξ, as also xliii. 11, where he is followed by the Vulg.] Sweet storax is mentioned by various Greek writers, from the time of Hippocrates to that of Dioscorides. Several kinds of it were known, varying chiefly in the form in which it was obtained, or the degree of adulteration to which it had been subjected. Most of the kinds are still known in commerce. It is obtained by incisions made in the bark of the tree called *styrax officinale* by botanists. This tree is a native of Greece, Asia Minor, Syria, and Palestine, and is about twenty feet high, with leaves like those of the quince, and flowers somewhat resembling those of the orange. Storax was, and is still, much esteemed, both as an incense and for its medical properties. It consists chiefly of resin, a volatile oil, and some benzoic acid. It has a grateful balsamic odour, which no doubt made it valued in ancient times.—J. F. R.

**STORK** (חִסְדִּיָּה, *chasidah*). In Egypt, the two species collectively are called *Anaseh*; the white, more particularly, *Belari*; in Arabic *Zakid*, *Zadig* (?), *Abuhist*, *Heklek*, *Hegleg*, and *Hadji Luglug*, the three last-mentioned expressing the peculiar clatter which storks make with their bills, and *Hadji*, or pilgrim, denoting their migratory habits. This quality several of the Western names likewise indicate, while our word stork is an appellation which extends to the Icelandic, Danish, Swedish, German, Hungarian, Lette, and Wallachian languages, and is presumed originally to have been *Stor eger*—i.e. migrating *Heron*. Some would derive stork from the Greek *στοργή*, with which it agrees in sound, but has no affinity of meaning, though it corroborates the interpretation of *Cha-*

*sidah* in the Hebrew, similarly implying affection, piety, mercy, and gratitude. This name results from a belief, general through all ancient Asia, in the attachment of these birds to each other; of the young towards the old, and of the parents towards their young. Without, therefore, admitting the exaggerated reports, or the popular opinions of the East, respecting the stork, enough is shown to justify the identification of *Chasidah* with that bird; notwithstanding that some learned commentators have referred the word to heron, and to several other birds, though none upon investigation are found to unite in the same degree the qualities which are ascribed to the species in Lev. xi. 19; Deut. xiv. 18; Job xxxix. 13; Ps. civ. 17; Jer. viii. 7; Zech. v. 9.

492.

Storks are about a foot less in height than the crane, measuring only three feet six inches from the tip of the bill to the end of the toes, and nearly the same to the end of the tail. They have a stout, pointed, and rather long bill, which, together with their long legs, is of a bright scarlet colour; the toes are partially webbed, the nails at the extremities flat and but little pointed beyond the tips of the joints. The orbits are blackish, but the whole bird is white, with the exception of a few scapulars, the greater wing covers, and all the quills, which are deep black; they are doubly scalloped out, with those nearest the body almost as long as the very foremost in the wing. This is a provision of nature, enabling the bird more effectually to sustain its after weight in the air—a faculty exceedingly important to its mode of flight, with its long neck and longer legs equally stretched out, and very necessary to a migrating species believed to fly without alighting from the Lower Rhine, or even from the vicinity of Strasburg, to Africa, and to the Delta of the Nile. Storks build their nests in pine, fir, cedar, and other coniferous trees, but seem to prefer lofty old buildings, towers, and ruins. There are always several located on the tops of the isolated pillars at Persepolis; and they often obstruct the Muesim by nestling in their way, about the summits of the minarets which these servants of the mosques must ascend to call the congregation to prayer. Several modern writers still assert the filial affection of young storks, whom they describe as assisting their aged parents when they cannot any longer fly with vigour, and as bringing them food when unable to provide for themselves; but without entirely rejecting the fact of affectionate relations among these birds, it may be remarked that there is no evidence to support this assertion.—C. H. S.

STRANGER (תִּשְׁבִּי, נִכְרִי). This term is applied in the O. T. to a person stately resident in Palestine, but who was not of Hebrew descent. A distinction is made between such and the נִכְרִי, or *foreigner*—that is, a heathen usually resident in a country out of Palestine. Such belonged to the גֵּוִים or Gentiles. Distinct from both was the אֲזִיחַ, or native-born Israelite.

For the laws and usages of the Hebrews in relation to strangers, see MOSES, LAWS OF; and PROSELYTE.—W. L. A.

STRAW. [TEBEN.]

STREETS. [TOWNS.]

STRIPES. [PUNISHMENTS.]

STUART, MOSES, was born at Wilton, Connecticut, 26th March 1780. He was educated at Yale College, where he took his degree in 1799, with the highest honours. He was successively tutor in Yale College (1802-1804), pastor of a congregational church at New Haven (1806), and professor of sacred literature at Andover (1810), an office which he held until 1848, when his increasing infirmities constrained him to resign it. He died 4th January 1852. His life was one of incessant labour, devoted chiefly to Biblical literature. In this he led the way in his own country with most happy results. His own contributions to sacred learning are very valuable; but perhaps he did even more by the impulse he gave to Biblical study and the sound principles of Biblical exegesis which he instilled into the minds of his younger brethren, especially in America, than by the works which he himself published. His chief writings are *A Grammar of the Hebrew Language*, 1831, of which a 5th edition appeared at Oxford in 1838; a *Hebrew Chrestomathy*, 1832; *Course of Hebrew Study*, 1830; a *Grammar of the N. T. Dialect*, 2d edition, 1841; *Commentary on the Ep. to the Hebrews* (2 vols. 1827, reprinted London 1828), on the *Ep. to the Romans* (1832, London 1833), on the *Apocalypse* (1845, Edinburgh 1847), on *Daniel* (1851), *Ecclesiastes* (1851), and *Proverbs* (1852). He was also a large contributor to the *Biblical Repository* and the *Bibliotheca Sacra*. A monument has been erected to his memory at Andover, on which he is styled 'The Father of Biblical Science in his native country.'—W. L. A.

SUCCOTH (סֻכּוֹת; Σκηναι; Σοκχώδ; Alex. Σωχώ; *Socoth*), a town in the valley of the Jordan. It had its origin, as well as its name, in the temporary sojourn of Jacob on his way from Padanaram to Palestine. 'And Jacob journeyed to Succoth, and he built him an house, and made booths (*Succoth*) for his cattle; therefore the name of the place is called *Succoth* ('booths')." The writer has frequently seen such 'booths' occupied by the Bedawin of the Jordan valley. They are rude huts of reeds, sometimes covered with long grass, sometimes with a piece of a tent. They are much used by a semi-nomad people. Jacob probably remained for some time in this fertile spot, which must have reminded him of the banks of the Euphrates (Gen. xxxiii. 17). The situation is approximately indicated by the fact that Jacob was on his way from Peniel to Shechem. Peniel was apparently on the north bank of the Jabboc (xxxii. 22, 23); and it

would seem that after his interview with Esau on the south bank, he turned back to avoid farther intercourse with his dangerous brother; and instead of following him to Edom he recrossed the Jabboc and descended to the valley of the Jordan, where he resolved to rest for a time amid its luxuriant pastures (see however Kalisch, *ad loc.*; Ritter, *Pal. und Syr.* ii. 447).

The next notice of Succoth is in Joshua's description of the territory of Gad. To this tribe the middle section east of the Jordan was allotted, including the valley of the Jordan up to the Sea of Galilee [GAD]. Among the towns in the valley is *Succoth* (Josh. xiii. 27). Nothing more can be inferred from this than that it lay on the east bank of the river.

In the narrative of Gideon's pursuit of Zeba and Zalmunna it is said: 'And Gideon came to Jordan, *passed over* . . . and said unto the men of Succoth, etc.' (Judg. viii. 5). The tale there recorded of the mingled cowardice and perfidy of the inhabitants, and of Gideon's terrible vengeance, is one of the most harrowing in the Bible. At that period Succoth must have been a place of importance, when it ventured to refuse the request of Gideon. Its 'princes and elders,' too, are said to have numbered 'threescore and seventeen men.'

Though the rulers were slain the city continued to prosper, and in the days of Solomon it was well known. The sacred historian informs us that the brazen vessels of the temple were cast 'in the circuit (בְּכִכָּר) of the Jordan, in the clay ground, between Succoth and Zarthan' (1 Kings vii. 46; 2 Chron. iv. 17). Succoth gave its name to 'a valley' (עֲמֹק), probably a lower section of 'the circuit,' or great plain of the Jordan (cf. 'the vale of Siddim,' which was also called an *Emek* in 'the circuit of the Jordan,' Ps. lx. 6).

Jerome observes, in his notes on Genesis:—'There is to this day a city of this name (*Succoth*) beyond Jordan in the region of Scythopolis' (*Opera*, ii. 989: ed. Migne); but in the *Onomasticon* both Jerome and Eusebius merely state that it is the place where Jacob dwelt on his return from Mesopotamia, without indicating its site or appearing to know of its existence (s. v. 'Sceneæ').

Burckhardt on his way from Beisan to es-Salt forded the Jordan two hours (about six miles) below the former, and observes in a note (*Travels in Syria*, p. 345): 'Near where we crossed, to the

south, are the ruins of *Sukkot* (سُكُوت).' The ruins seem to have been on the east bank of the river, though he does not expressly say so. This may possibly be the Succoth of Jerome; but it is too far north to suit the requirements of the narrative in Genesis.

Robinson discovered another ruin called *Sákát* (سَاكُوت), which is radically as well as topographically different from the *Sukkot* of Burckhardt, situated on the west bank of the Jordan, about fifteen miles south of Beisan. Near it is a copious fountain, and the plain around it is covered with most luxuriant vegetation. The ruin is merely that of a common village, a few foundations of unhewn stones' (*Bib. Res.* iii. 309; cf. Van de Velde, *Travels*, ii. 343). Its position on the west bank prevents its being identified with the Succoth of the Bible, but it is just possible that the name may

have been transferred from the ancient town on the east side to a more modern village on the west (see also Ritter, *Pal. und Syr.* ii. 446).

2. Succoth was a station of the Israelites in the desert, the first after their departure from Egypt: 'And the children of Israel journeyed from Rameses to Succoth' (Exod. xii. 37). Probably here, too, the name may have been given to the spot from the temporary booths which some of the more delicate would naturally attempt to construct for themselves on that the first night of life under the open heaven. Succoth was still within the land of Egypt, or at least within a region of habitation and cultivation; for it was not until the close of their second march that they 'encamped in Etham, in the edge of the wilderness' (xiii. 20; cf. Num. xxxiii. 5, 6).

The exact position of Succoth has not been, and probably never can be, satisfactorily determined. The line of march which the Israelites followed will be discussed in another place [WANDERING, WILDERNESS OF].—J. L. P.

SUKKIIMS (סֻכִּיִּים; Τρωγούδιαι; Alex. Τρωγολούδιαι; *Trogoditæ*), one of the three great nations which composed the army of Shishak king of Egypt when he came up against Rehoboam in Jerusalem (2 Chron. xii. 3). They are only mentioned in the one passage; and the name seems to have been unknown to ancient geographers. Both the LXX. and Vulgate render the word *Trogodytes*; but upon what authority is unknown. It may be conjectured that, as they are joined with the Ethiopians, and as there were Trogodytes in Ethiopia (Herod. iv. 183), the ancient translators considered Sukkiim a proper name for them (Winer, *R. W.* s. v. 'Suchim'). Strabo states that 'the Trogodytes, in the latitude of Meroë, are distant ten or twelve days' journey from the Nile' (*Geog.* xvii. 786). It is more probable, however, that the Sukkiim were a nomad people, and were so called because of their living in tents [SUCCOTH]. This is the opinion of Gesenius (*Thesaurus*, p. 953).—J. L. P.

SUMMER. [PALESTINE.]

SUN (שֶׁמֶשׁ; ἥλιος). For the sun as a luminary, see LIGHT. For the worship of the sun, see IDOLATRY. For the standing still of the sun, see JOSHUA, BOOK OF.

SUPH (סֻפְּה), translated 'flags' in the A. V., means some aquatic plant. It is mentioned in Exod. ii. 3, 5; Is. xix. 6; Jonah ii. 6; but it is difficult to say whether it may not have been used in a comprehensive sense, as seaweed is with us, rather than have been confined to one of the plants growing in the sea. The word *suph* occurs in several other passages; these, however, have reference to the Red Sea, which by the Hebrews was called *Suph Sea*. Rosenmüller states that this, 'in the Coptic version of the Pentateuch and the Psalms, is called by its old Egyptian name, the *Shari Sea*.' But *Shari*, or, as the Greeks pronounced it, *Sari*, is the Egyptian name for tangles or seaweeds, of which there is great abundance in that sea. In Jonah ii. 5—'seaweed was wrapped around my head'—one of the *fuci* would seem to be indicated. Lady Calcott selects *zostera marina*, or sea-wrack, which resembles them in habit. It has by others been translated *juncus*, *arundo*,

*carex*, etc. Rosenmüller says there is no doubt that a species of *sari* is denoted by *suph*, which, according to Pliny, grows on the banks of the Nile. 'Fruticosi est generis sari, circa Nilum nascens, duorum ferme cubitorum altitudine, pollicari crassitudine; coma papyri, similique manditur modo.' This is supposed to be some reed, or grass-like plant. It is curious that the names *sar* and *sari* extend even to India. There is a species of *saccharum* growing in the neighbourhood of Calcutta which has been named *S. Sari* by Dr. Roxburgh.—J. F. R.

SURENHUSIUS (SURENHUYS), WILHELM, professor of Greek and Hebrew at Amsterdam, flourished in the end of the 17th and the beginning of the 18th century. He edited a beautifully printed edition of the *Mishna*, *sive totius Hebræorum juris, rituum, antiquitatum et legum oralium Systema, cum Maimonidis et Bartenoræ Commentariis integris*, etc. 6 vols. fol. Amsterdam 1690-1703; on the merits of which see Wolf, *Bib. Hebr.* ii. 886. He published also ספרה כשורה *sive Βιβλος Κατάλλαξης*, in quo secundum Vett. Theoll. Hebr. formulas allegandi et modos interpretandi, conciliantur loca ex V. in N. T. allegata, 4to, Amsterdam 1713, a work of unsurpassed value on the subject to which it relates.—W. L. A.

SURETYSHIP. [LOAN.]

SUS (סֹּס, ἵππος). It appears to be substantiated, that the Horse was derived from High Asia, and was not indigenous in Arabia, Syria, or Egypt. They are not mentioned among the presents which Pharaoh bestowed upon Abraham, and occur in Scripture for the first time when the patriarch Joseph receives them from the Egyptians in exchange for bread (Gen. xlvii. 17)—evidently as valuable animals, disposed of singly, and not in droves or flocks, like cattle and asses. They were still sufficiently important to be expressly mentioned in the funeral procession which accompanied the body of Jacob to his sepulchre in Canaan (Gen. i. 9); and, for centuries after, it does not appear that, under the domestic management of the Egyptians, unless the murrain had greatly reduced them, horses had multiplied as they would have done in a land more congenial to their habits, since only six hundred chariots appear to have pursued Israel (Exod. xiv. 7)—even admitting that there were other chariots and horsemen not included in that number. In the sculptured battle-scenes which are believed to represent victories of Sesostris, or of Thothmes II. and III., over nations of Central Asia, it is evident that the enemy's armies, as well as the foreign allies of Egypt, are abundantly supplied with horses, both for chariots and for riders; and in triumphal processions they are shown as presents or tribute—proving that they were portions of the national wealth of conquered states sufficiently valuable to be prized in Egypt. At a later period, the books of Deuteronomy (xvii. 16, for the future kings of Israel are forbidden to possess many) and Joshua (xi. 4) furnish similar evidence of abundance of horses in the plains of Syria; and in Job occurs a description of a perfect war-horse couched in the bold figurative language of inspiration, such as remains unequalled by any other poet, ancient or modern. Though the Israelites had chariots and horsemen opposed to them in the plain country from their first entrance into the land of promise; as in Judges iv. 15,

where we find Sisera with his chariots of war defeated at the foot of Mount Tabor; yet not being intended to make military conquests beyond the mountain-basin and the adjacent territory assigned them, they long remained without cavalry or chariots themselves (Deut. xvii. 16; 2 Sam. viii. 4): they obeyed the divine injunction to abstain from possessing horses, and, to the time of David, hamstrung such as they captured from their enemies. It appears, however, that a small cavalry force was raised by him; and as in all the military operations of Western Asia there was a tendency to increase the mounted force and neglect the infantry, on the full establishment of royalty, when the Hebrew government acquired a more political structure, the reign of Solomon displayed a military system which embraced a regular body of horse and of chariots, evidently become the more necessary since the limits of his sway were extended to the shores of the Arabian Gulf, and far into the Syrian desert (1 Kings x. 26). Solomon likewise acted with commercial views in the monopolising spirit which Eastern sovereigns have been prone to exercise in all ages. He bought chariots and teams of horses in Egypt, and probably in Armenia, 'in all lands,' and had them brought into his dominions in strings, in the same manner as horses are still conducted to and from fairs: for this interpretation, as offered by Professor Paxton, appears to convey the natural and true meaning of the text; and not 'strings of linen yarn,' which here seem to be out of place (2 Chron. i. 16, 17; ix. 25, 28).

The Tyrians purchased these objects from Solomon, and, in the time of Ezekiel, imported horses themselves from Togarmah or Armenia. On returning from the Babylonish captivity, the common possession of horses in Palestine was no longer opposed; for Nehemiah numbers seven hundred and thirty-six belonging to the liberated Hebrews (Neh. vii. 68).

All the great original varieties or races of horses were then known in Western Asia, and the Hebrew prophets themselves have not unfrequently distinguished the nations they had in view, by means of the predominant colours of their horses—and that more correctly than commentators have surmised. Taking Bochart's application of the Hebrew names, the bay race, אָדוֹם *adom*, emphatically belonged to Egypt and Arabia Felix;

the white, לְבָנִים *lebonim*, to the regions above the Euxine Sea, Asia Minor, and northern High Asia; the dun, or cream-coloured, שְׂרָקִים *serukim*, to the Medes; the spotted piebald, or skewbald, בְּרָדִים *berudim*, to the Macedonians, the Parthians, and later Tahtars; and the black, שְׁחֹרִים *shachorim*, to the Romans; but the chestnuts, אֲמֹץ *amutz*, do not belong to any known historical race (Zech. i. 8; vi. 2).

Bay or red horses occur most frequently on Egyptian painted monuments, this being the primitive colour of the Arabian stock; but white horses are also common, and, in a few instances, black—the last probably only to relieve the paler colour of the one beside it in the picture. There is also, we understand, an instance of a spotted pair, tending to show that the valley of the Nile was originally supplied with horses from foreign sources and distinct regions, as indeed the tribute pictures further attest. The spotted, if not real, but painted

horses, indicate the antiquity of a practice still in vogue; for staining the hair of riding animals with spots of various colours, and dyeing their limbs and tails crimson, is a practice of common occurrence in the East, and was exemplified in London when the late Shah of Persia presented the Prince Regent with several white and grey horses, all of which were ridden to Carlton Palace with their tails dyed crimson, as we ourselves witnessed. [CHAMOR.]

On the natural history of the horse there is no occasion to enter in this place; but it may be proper to notice that the riding-bridle was long a mere slip-knot, passed round the under jaw into the mouth, thus furnishing only one rein; and that a rod was commonly added to guide the animal with more facility. The bridle, however, and the reins of chariot-horses were, at a very early age, exceedingly perfect; as the monuments of Egypt, Etruria, and Greece, amply prove. Saddles were not used, the rider sitting on the bare back, or using a cloth or mat girded on the animal. The Romans, no doubt copying the Persian Cataphractæ, first used pad saddles, and from the northern nations adopted stimuli or spurs. Stirrups were unknown. Avicenna first mentions the *rikiab*, or Arabian stirrup, perhaps the most ancient; although in the tumuli of Central Asia, Tahtar horse skeletons, bridles, and stirrup saddles, have been found along with idols; which proves the tombs to be more ancient than the introduction of Islam. With regard to horse-shoeing, Bishop Lowth and Bracy Clark were mistaken in believing that the Roman horse or mule shoe was fastened on without nails driven through the horny part of the hoof, as at present. A contrary conclusion may be inferred from several passages in the poets; and the figure of a horse in the Pompeii battle mosaic, shod in the same manner as is now the practice, leaves little doubt on the question.—C. H. S.

SUSA. [SHUSHAN.]

SUSANCHITES (שִׁשְׁכִּי; Sept. Σουσάνχαιτοι), one of the nations settled by the king of Assyria in Samaria (Ezra iv. 9). The name has reference to Shushan. [SHUSHAN.]

SUSANNAH. [DANIEL, APOCRYPHAL ADDENDA TO.]

SWALLOW. [AGUR; DEROR; SIS.]

SWAN. [TINSEMEETH.]

SWEARING. [OATH.]

SWEAT, BLOODY. [BLOODY SWEAT.]

SWINE (חֲזִיר *chazir*). We have already noticed these animals [CHAZIR], chiefly as they occur in a wild state, and here refer to the domesticated breeds only, because they appear to have been repeatedly introduced and reared by the Hebrew people, notwithstanding the strong prohibitions in the law of Moses (Is. lkv. 4).

Egyptian pictures, the parable of the Prodigal Son, and Christ's miraculous cure of the demoniac, when he permitted swine to be possessed and destroyed by rushing over a precipice into the sea of Galilee, furnish ample proofs that during the dominion of the Romans they were kept around the kingdom of Judah; and the restrictive laws of Hyrcanus on this subject indicate that the Jews themselves were not altogether strangers to this

unlawful practice. Commentators ascribe this abundance of swine to the numerous Pagan sacrifices of these animals in the temples: but we do not deem this to be a sufficiently correct view of the case, since hogs of every denomination were less used for that purpose than oxen, goats, and sheep. May it not be conjectured that in those days of a greatly condensed population the poor found in swine's flesh, and still more in the fat and lard, melted for culinary purposes, as it still is in every part of pagan Africa, a most desirable aliment, still more acceptable than the salt fish imported from Sidon, to season their usual vegetable diet? 'When the melting fire burneth, the fire causeth the waters to boil' (Is. lxiv. 2); and, again, 'a broth of abominable things in their vessels' (Is. lxv. 4). For, although the Mosaic law justly condemned the use of swine's flesh, at the time of the departure of Israel out of Egypt, when the state of slavery the people had been in, there is reason to believe, had greatly multiplied leprosy, and, moreover, when it was important to enforce cleanliness among the multitude on many accounts; yet the reasoning of the ancients and of commentators, Rabbinical and medical, regarding the unhealthiness of sound pork, in moderate quantities, as a condiment, or more generally as an article of food, is entirely erroneous. For in some provinces of ancient Persia, the practice of curing animal food was known so early, that the procession of tribute-bearing deputies from the several satrapies, sculptured on the great stairs at Persepolis, represents at least one nation bringing preserved flesh meat, apparently hams; and already, before the conquest of northern Gaul by Cæsar, pork and various sausages were exported from Belgium to the Roman capital. Neither in the tropics nor in the East, during the first centuries of Christianity, or in the era of the Crusades, or among the Christians of the present day, are any ill effects ascribed to the use of swine's flesh; and the Moslem population, which is debarred the use of this kind of food, is, perhaps, more liable to disease and to the plague than others, because it lacks the stamina of resistance to infection, and that supply of digestive nutriment which keeps the alimentary system in a healthy condition. The rich Moslem supply the deficiency by vegetable oils and butter or ghee; hence, while the wealthy official class multiplies, the poorer classes, for want of a cheap supply of similar ingredients, diminish.—C. H. S.

#### SWORD. [ARMS.]

SYCAMINE TREE (*Συκάμινος*) is mentioned only once in the N. T., in Luke xvii. 6: 'And the Lord said, If ye had faith as a grain of mustard-seed, ye might say unto this *sycamine*-tree,' etc. From a slight similarity in name, this tree has often been confounded with the *sycamore*, both by ancient and modern writers. Both trees are, however, mentioned by the apostle, who must have had the technical knowledge necessary for distinguishing such things. Though the English version avoids translating the word, there can be little doubt of the mulberry-tree being intended; and it is frequently so rendered. Thus, Dioscorides says, *Μορέα ἢ Συκαμινέα*, etc., 'Mulberry or sycamine is well known.' Celsus shows (*Hierobot.* i. 290), by quotations from Athenæus, Galen, etc., that the Greeks called it by both names; and Corn. Celsus (*De Medicina*, iii. 18) says expressly: 'Græci morum

*συκάμινον* appellant.' But still even ancient authors confound it with the sycamore, and therefore modern writers may be excused when so doing. Dr. Sibthorpe, who travelled as a botanist in Greece, for the express purpose of identifying the plants known to the Greeks, says that in Greece the white mulberry-tree is called *μούρεα*; the black mulberry-tree, *συκαμινέα*. The mulberry, moreover, is a tree which we might expect to find men-

493. Black Mulberry—*Morus nigra*.

tioned in Scripture, since it is so common in Palestine. It is constantly alluded to by old travellers, and indeed is much cultivated in the present day, in consequence of its affording food for the silkworm; and it must have been common also in early times, or the silkworms would not have obtained suitable food when first introduced. As the mulberry-tree is common, as it is lofty and affords shade, it is well calculated for the illustration of the above passage of Luke.—J. F. R.

SYCAMORE is a species of fig, *N. Ficus Sycamoros* of botanists, and the same as SHIKMOL.—J. F. R.

SYCHAR (*Συχάρ*; and *Συχάρ*; *Sichar*, and *Sychar*). This name is but once mentioned, and it has created considerable controversy. Our Lord left Judæa for Galilee, 'and,' the evangelist says, 'he must needs go through Samaria. He cometh, therefore, to a city of Samaria which is called Sychar' (John iv. 5). The form of expression is somewhat peculiar. It would seem to convey the idea that the city was an obscure one, or else that, whilst Sychar was its popular name, it had another. The common opinion is that Sychar is only another name for the better known Sychem or Shechem. It is necessary to examine the evidence on which this theory is supposed to rest.

The position of Sychar is very clearly indicated in the gospel of John: 'It was near the parcel of ground which Jacob gave to his son Joseph. And Jacob's well was there.' The well was in the 'parcel of ground,' and it exists to this day in the entrance of the valley of Nâbulus, at the foot

of Mount Gerizim. But the well is a mile and a half from the site of Shechem, now Nâbulus; and the question arises—If Sychar and Shechem were identical, could it be described as *near* (πλησίον) the well, while at such a distance? The word πλησίον is indefinite. It is difficult to say what distance would be called 'near.' It would appear, however, that the city must have been a good way off, for the disciples had gone there to buy bread, and they were absent some time. It has been said that, as the woman came from the city to draw water at this well, Sychar could not have occupied the site of Nâbulus, because in that town there are numerous fountains. To one conversant with Eastern life and habits, such an argument has no weight. The mere fact of the well having been Jacob's would have given it virtue in the estimation of the old Samaritans. And even independent of its associations, some little superiority in the quality of the water would have attracted people to it from a still greater distance (*Handbook*, p. 342). No farther information is given by the sacred writer, and the question is thus left undecided.

The testimony of ancient geographers does not tend to remove the difficulty. Eusebius writes: 'Sychar, before Neapolis (πρὸ τῆς Νέας Πόλεως), near the field which Jacob gave to his son Joseph. . . . And to this day it is pointed out.' Jerome translates his words, and adds, apparently referring to the site, *ubi nunc ecclesia fabricata est* (*Onomast.* s.v. 'Sychar'). Of Sichem Eusebius says that it was shown as a desert place in the suburbs of Neapolis, where was also Joseph's tomb; and Jerome simply translates the words (s.v. 'Sichem'). Again, when describing *Luza*, Eusebius says: 'It lies beside Sichem' (παρὰκειμένη Σιχὲμ) in the *ninth mile* (Jerome has *third mile*) from Neapolis' (s.v. 'Luza'; cf. *Terebinthus*). According to the Bourdeaux Pilgrim, who travelled in A.D. 333, by Neapolis, at the base of the mountain, stood *Sichem*, beside Joseph's monument, in the field his father gave him; and a thousand paces farther was *Sychar*, whence the Samaritan woman came to draw water at Jacob's well.\* Thus these writers distinguish between Sychar and Sichem, and they make both distinct from Neapolis.

But Jerome gives an entirely different account elsewhere. Speaking of St. Paula's journey, he says: 'She passed *Sichem*, not as many erroneously read it *Sichar*, which is now called Neapolis.† And in his questions on Genesis, he says, that according to Greek and Latin custom, the Hebrew *Sichem* is written *Sicima*; but the reading *Sichar* is an error; and he adds that it is now called Neapolis.‡ So Adamnan writes of Arculf, who

travelled in the 7th century: 'He visited the town called in Hebrew *Sichem*, but by the Greeks and Latins *Sicima*, and now more usually *Sychar*' (*Early Travels*: Bohn, p. 8). In the 12th century Phocas says: 'Sychar was the metropolis of the Samaritans, and was afterwards called Neapolis' (Re-land, *Pal.* 1009).

The weight of ancient testimony therefore appears to be in favour of identifying Sichem, Sychar, and the Greek Neapolis.

Various theories have been advanced as to the origin and meaning of the name Sychar. It has been suggested that the Jews applied it as a by-name in scorn to the Samaritan capital. If so, it may be derived from שָׁכָר, *falsehood*, in allusion to the false Samaritan worship on Gerizim (cf. John iv. 22; Hab. ii. 18); or from שָׁכָר, *drunken*, with a reference to Is. xxviii. 1, where Samaria is called 'The crown of pride to the drunkards of Ephraim.' The son of Sirach speaks of 'the foolish people that dwell in Sikima' (l. 28. See in *Lightfoot, Opera*, ii. 586; Robinson, *B. R.* ii. 290; Lange, *Life of Christ*, ii. 337; Hengstenberg on *St. John* iv. 5).

It has been thought that Sychar may be identified with the little village of *Askar*, on the south-eastern declivity of Mount Ebal (Van de Velde, *Memoir*, p. 350; Thomson, *The Land and the Book*, p. 472). The etymology, however, is against it, and also the topography. Our Lord was on his way to Galilee. The great road runs past the mouth of Wady Nâbulus. Jacob's well is on the southern side of the opening; and Askar about half a mile distant on the northern side. The main road passes quite close to both. Our Lord sat down by the well while the disciples turned aside into the city to buy bread. Had Askar been the city this would have been unnecessary; for by continuing their route for a short distance farther they would have been within a few paces of the city. There is besides a copious spring at Askar. If, on the other hand, Sychar stood on the site of Nâbulus, then Jacob's well was the natural place for our Lord to remain until the return of his disciples. Besides, Eusebius and the Bourdeaux Pilgrim, if they are to be taken as authorities, locate Sychar at Jacob's well.—J. L. P.

SYCHEM (Συχέμ), the name for Shechem in Acts vii. 16, being that also used in the Septuagint version of the O. T. [SHECHEM].

SYENE (סֵנַי; Sept. Συήνη), a city of Egypt, situated in the Thebais, on the southern extremity of the land towards Ethiopia (Ptol. iv. 5; Plin. *Hist. Nat.* v. 10; xii. 8; Strabo, pp. 787, 815). Ezekiel, describing the desolation to be brought upon Egypt through its whole extent, says: 'Thus saith the Lord, I will make the land of Egypt utterly desolate, from the tower of Syene even to the border of Cush (Arabia);' or, as some read it, 'from Migdol to Syene,' implying, according to either version of the passage, the whole length of the country from north to south. Syene is repre-

\* 'Civitas Neapoli.—Inde ad pedem montis ipsius locus est, cui nomen est *Sechim*. Ibi positum est monumentum, ubi positus est Joseph in villa quam dedit ei Jacob pater ejus. . . . Inde passus mille, locus est cui nomen *Sechar*, unde descendit mulier Samaritana ad eundem locum, ubi Jacob puteum fodit, ut de eo aqua impleret' (*Itin. Hieros.* ed Wessel. p. 587).

† 'Transivit *Sichem*, non ut plerique errantes legunt *Sichar*, quæ nunc *Neapolis* appellatur, et ex latere montis Garizim extractam circa puteum Jacob intravit ecclesiam,' etc. (*Epist. ad Eustoch.*; *Opera*, i. 888; ed. Migne).

‡ 'Sicima juxta Græcam et Latinam Consuetu-

dinem, Alioquin Hebraice SICHEM dicitur, ut Joannes quoque Evangelista testatur; licet vitiose, ut *Sichar* legatur, error inolevit; et est nunc *Neapolis* urbs Samaritorum (*Opera*, ii. 1004; ed. Migne).

sented by the present Assouan, which exhibits few remains of the ancient city, except some granite columns of a comparatively late date, and the sekos of a small temple. This building has been supposed by late travellers to have contained the famous well of Strabo (*Geog.* xvii. p. 817), into which the rays of a vertical sun were reported to fall during the summer solstice, a circumstance, says the geographer, that proves the place 'to lie under the tropic, the gnomon at midday casting no shadow.' But although excavations have been carried on considerably below the pavement, which has been turned up in search of the well it was thought to cover, no other results have been obtained than that this sekos was a very improbable site for such an observatory, even if it ever existed; and that Strabo was strangely misinformed, since the Egyptians themselves could never in his time have imagined this city to lie under the tropic; for they were by no means ignorant of astronomy, and Syene was, even in the age of Hipparchus (B.C. 140, when the obliquity of the ecliptic was about  $23^{\circ} 51' 20''$ ), very far north of that line. The belief that Syene was in the tropic was however very general in the time of the Romans, and is noticed by Seneca, Lucan, Pliny, and others. But, as Sir J. G. Wilkinson remarks, 'a well would have been a bad kind of observatory if the sun had been really vertical; and if Strabo saw the meridian sun in a well, he might be sure he was not in the tropic' (*Mod. Egypt and Thebes*, ii. 286). The same writer adds: 'Unfortunately the observations of the ancient Greek writers on the obliquity of the ecliptic are not so satisfactory as might be wished, nor are we enabled, especially as La Grange's theory of the annual change of obliquity being variable is allowed to be correct, to ascertain the time when Assouan might have been within the tropic, a calculation or traditional fact in which, perhaps, originated the erroneous assertion of Strabo.' The latitude of Assouan is fixed by Wilkinson at  $24^{\circ} 5' 30''$ , and the longitude is usually given as  $32^{\circ} 55'$ .—J. K.

**SYNAGOGUE** (Συναγωγή, Προσευχή, Προσευκτήρια; Heb. בית תפלה, בית הכנסת; Moed Al; Aramaic כְּנִשְׁתָּא, כְּנִשְׁתָּא, כְּנִשְׁתָּא, the Jewish place of worship, wherein our Saviour performed some of his greatest miracles (Matt. xii. 9; Mark i. 23; Luke xiii. 11) and uttered some of his most sublime sayings (Luke iv. 16; John vi. 59).

1. *Name and its signification.*—Though the word συναγωγή is used in the Sept. to denote any kind of gathering, heap, mass, or assemblage, such as a gathering of fruits (for the Heb. אֶסְפָּה, אֶסְפָּה, Exod. xxiii. 16; xxxiv. 22), of water (מִקְוֵה, מִקְוֵה, Gen. i. 9; Lev. xi. 36), a heap of stones (גִּל, Job viii. 17), a band of singers (מִזְמֹר, Jer. xxxi. 4, 13), a mass or multitude of people or soldiers (אֶסְפָּה, Is. xxiv. 22; Ezek. xxxvii. 10), a tribe or family (בֵּית, 1 Kings xii. 21), etc. etc., yet its predominant usage in this version is to denote an appointed meeting of people either for civil or religious purposes, thus being synonymous with ἐκκλησία. This is evident from the fact that the Sept. uses συναγωγή 130 times for the Hebrew עֵדָה, and 25 times for קהל, which in 70 instances is rendered in the same version by ἐκκλησία. The synonymous usage in the Sept. of these two expressions is also seen in

Prov. v. 14, where ἐκκλησία and συναγωγή stand in juxtaposition for the Hebrew קהל and עדָה. This general signification of the term is also retained in the books of the Apocrypha, and it is not till we come to the N. T. that we find συναγωγή, like ἐκκλησία, used metonymically more especially for an appointed and recognised Jewish place of worship (Matt. iv. 23; vi. 2, 5; ix. 35, *al.*), and also for a Christian place of worship (James ii. 2; Rev. ii. 9; see also Ignatius, *Ep. ad Trall.* cap. v., *ad Polyc.* cap. iii.; Clement of Alexandria, *Strom.* 6; Trench, *Synonyms of the N. T.* sec. 1). It was only when the total separation between the Jewish synagogue and the Christian church was accomplished that the former retained the appellation συναγωγή, whilst the latter assumed the distinguishing name ἐκκλησία. More definite than the Greek term synagogue is the ancient Hebrew name

Beth Tephila (בֵּית תְּפִלָּה, τόπος προσευχῆς, or simply προσευχῆς) = House of Prayer (1 Maccab. iii. 46; 3 Maccab. vii. 20; Acts xvi. 13, for which the Syriac rightly has בֵּית צְלוּתָה; Josephus, *Vita*, liv.), which is now obsolete, or Beth Ha-Keneseth (בֵּית הַכְּנִסֶּת) = House of Assembly, which has superseded it. This definite local signification of the term synagogue among the Jews has necessitated the use of another expression for the members constituting the assembly, which is כְּנִישְׁתָּא, צְבוּר, to express our secondary sense of the word ἐκκλησία.

2. *Site, structure, internal arrangement, use, and sanctity of the Synagogue.*—Taking the temple as the prototype, and following the traditional explanation of the passages in Prov. i. 21 and Ezra ix. 9, which are taken to mean that the voice of prayer is to be raised on heights (בְּרֹאשׁ תְּקִרָה), and that the sanctuary was therefore erected on a summit (לְרֹמֶם אֶת בֵּית אֱלֹהֵינוּ), the Jewish canons decreed that synagogues are to be built upon the most elevated ground in the neighbourhood, and that no house is to be allowed to overtop them (*Tosiphtha Megilla*, iii.; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, xi. 2). So essential was this law deemed, and so strictly was it observed in Persia, even after the destruction of the temple, that Rab (A.D. 165-247 [RAB]) prophesied a speedy ruin of those cities in which houses were permitted to tower above the synagogue, whilst R. Ashi declared that the protection of Sora was owing to the elevated site of its synagogues (*Sabbath*, 11 a). The river-side outside the city was also deemed a suitable spot for building the synagogue, because, being removed from the noise of the city, the people could worship God without distraction, and at the same time have the use of pure water for immersions and other religious exercises (Acts xvi. 13; Joseph. *Antiq.* xiv. 10. 23; Juvenal, *Sat.* iii. 12, etc.; see also the Chaldee versions on Gen. xxiv. 62).

The building itself was generally in the form of a theatre; the door was always on the west, so that on entering the worshippers might at once face the front, which was turned towards Jerusalem, since the law is, that 'all the worshippers in Israel are to have their faces turned to that part of the world where Jerusalem, the Temple, and the Holy or Holies are' (*Berachoth*, 30 a). This law, which is deduced from 1 Kings viii. 29, Dan. vi. 10, and the allegorical interpretation of Song of Songs

iv. 4, also obtained among the early Christians (Origen, *Hom. v. in Num.* Opp. ii. 284) and the Mohammedans (*Koran*, *Sora* ii.) Hence all the windows were generally in the eastern wall, so that the worshippers might look towards the Holy City, in accordance with Dan. vi. 10. Like the temple, the synagogue was frequently without a roof, as may be seen from the following remark of Epiphanius: 'There were anciently places of prayer without the city, both among the Jews and the Samaritans . . . there was a place of prayer at Sichem, now called Neapolis, without the city in the fields, in the form of a theatre, open to the air, and without covering, built by the Samaritans, who in all things imitated the Jews' (*Contr. Hæres.* lib. iii. *hæres.* 80). It was this, coupled with the

fact that the Jews had no images, which gave rise to the satirical remark of Juvenal—

'Nil præter nubes, et coeli numen adorant.'

*Sat.* xiv. 98.

In some places there were temporary *summer* and *winter* synagogues; they were pulled down and re-erected at the beginning of each season, so that the style of building might be according to the period of the year (*Baba Bathra*, 3 b).

At the wall opposite the entrance, or at the Jerusalem end, stood the *wooden chest* or *ark* (תיבה) containing the scrolls of the law. It stood on a raised base with several steps (ספסל = *sub-stellium*, דרנא *Jerusalem Megilla*, iii. 1), which the priests mounted when they pronounced the bene-

494. Jewish Synagogue in Amsterdam.

diction (Num. vi. 24-26) upon the congregation.

Hence the phrase עלה לדרון, which was retained after the destruction of the temple to describe the act of giving the benediction to the people by the priests (*Rosh Ha-Shana*, 31 b; *Sabbath*, 118 b). It is necessary to bear in mind that the ancient name for this ark is תיבה (comp. *Mishna Berachoth*, v. 3. 4; *Taanith*, ii. 1. 2; *Megilla*, iv. 4, *al.*), the name afterwards given to it (ארון) being reserved for the ark of the covenant tables which was wanting in the second temple. There was a

canopy (בילת) spread over the ark, under which were kept the vestments used during the service (*Jerusalem Megilla*, iii.) In some places the ark or chest had two compartments, the upper one containing the scrolls of the law, and the lower the synagogical garments of the officers of the community. The ark was not fastened to the wall but was free, so that it might easily be taken out-

side the door of the synagogue in case a death occurred in the place of worship, in order that the priests should be able to attend the service, or be removed into the streets when fasts and days of humiliation were kept (*Mishna Taanith*, ii. 1 [FASTS]). In later times, however, a recess was made in the wall, and the ark was kept there.

This recess was called the *Sanctuary* (קדש, היכל). On certain occasions the ark was removed from the recess and placed on the rostrum (בימה = βήμα) in the middle of the synagogue (*Tosiphta Megilla*, iii.; Maimonides, *Iad Ha-Chesaka Hilchoth Lulab*, vii. 23. [TABERNACLES, FEAST OF.]

In the front of the ark was the desk of the leader of the divine worship; and as the place of the ark was amphitheatral, the desk was sometimes lower and sometimes higher than the level of the room. Hence the interchangeable phrases 'he who descends before the ark' (היורד לפני התיבה), and 'he

who ascends before the ark' (העובר לפני התיבה), used to designate the leader of divine worship in the synagogue (*Mishna Taanith*, ii. 2; *Berachoth*, v. 4; *Rosh Ha-Shana*, iv. 7; *Megilla*, iv. 3, 5, 7, *al.*)

The next important piece of furniture was the rostrum or platform (במה, מוגדל עץ) = βῆμα, (כורסיא), capable of containing several persons (*Neh.* viii. 4; ix. 4; *Joseph. Antig.* iv. 8. 12). On this platform the lessons from the law and the prophets were read, discourses delivered, etc. (*Mishna Sota*, viii. 8; *Babylon Succa*, 51 b; *Megilla*, 26 b [HAPHTARA]). There were no arrangements made at first for laying down the law whilst reading, and the one upon whom it devolved to read a portion of the pericope had to hold the roll in his hand till the second one came up to read, and relieved him of it. Afterwards, however, there was a reading-desk (אנלין) = ἀναλογεῖον on this platform, and the roll of the law was laid down during pauses, or when the *Methurgeman* (מתורגמן) = *Interpreter*, was reciting in the vernacular of the country the portion read (*Sota*, 68 b; *Megilla*, 26 b; *Jerusalem Megilla*, iii.). The reading-desk was covered with a cloth (פריסה), which varied in costliness according to the circumstances of the congregation (*Megilla*, 26 b). When the edifice was large this platform was generally in the centre, as was the case in the synagogue at Alexandria (*Succa*, 51 b).

There were also arm-chairs (קתדראות, מתדרין) = καθέδραι, קלטון (κλῆτρης), or seats of honour (πρωτοκαθεδρία), for the elders of the synagogue, the doctors of the law, etc. (*Matt.* xxiii. 2, 6; *Mark* xii. 39; *Luke* xi. 43; *Succa*, 51 b; *Maimonides*, *Hilchoth Tephila*, x. 4). They were placed in the front of the ark containing the law, or at the Jerusalem end, in the uppermost part of the synagogue, and these distinguished persons sat with their faces to the people, whilst the congregation stood facing both these honourable ones and the ark (*Tosiphta Megilla*, iii.). In the synagogue at Alexandria there were seventy-one golden chairs, according to the number of the members of the Great Sanhedrim (*Succa*, 51 b [SANHEDRIM]). In the synagogue of Bagdad 'the ascent to the holy ark was composed of ten marble steps, on the uppermost of which were the stalls set apart for the Prince of the Captivity and the other princes of the house of David' (Benjamin of Tudela, *The Itinerary*, vol. i. p. 105, ed. Ascher, London 1840).

There was, moreover, a perpetual light (נר תמיד), which was evidently in imitation of the temple light (*Exod.* xxvii. 20). This sacred light was religiously fed by the people, and in case of any special mercy vouchsafed to an individual, or of threatening danger, a certain quantity of oil was vowed for the perpetual lamp. This light was the symbol of the human soul (*Prov.* xx. 27), of the divine law (*Ibid.* vi. 23), and of the manifestation of God (*Ezek.* xliii. 2). It must, however, be remarked, that though the perpetual lamp forms an essential part of the synagogical furniture to the present day, and has obtained among the Indians, Greeks, Romans, and other nations of antiquity (Rosenmüller, *Morgenland*, ii. 156), yet there is no mention made of it in the Talmud.

Besides meetings for worship, the synagogues, or more properly the rooms connected with them, were also used as courts of justice for the local Sanhedrim (*Targum Jonathan* on *Amos* v. 12, 15;

*Jerusalem Sanhedrin*, i. 1; *Jerusalem Baba Mezia*, ii. 8; *Babylon Kethuboth*, 5 a; *Sabbath*, 150 a), and in it the beadle of the synagogue administered the forty stripes save one to those who were sentenced to be beaten (*Mishna Maccoth*, iii. 12, with *Matt.* x. 17; xxiii. 34). Travellers, too, found an asylum in the synagogue, meals were eaten in it (*Pesachim*, 101; *Bereshith Rabba*, cap. xlv.), and children were instructed therein (*Kiddushin*, 30 a; *Baba Bathra*, 21 a; *Taanith*, 24 b; *Berachoth*, 17 a; *Jebamoth*, 65 b). This, however, did not detract from its sanctity; for the synagogue once used for the divine worship was only allowed to be sold on certain conditions (*Mishna Megilla*, iii. i. 2).

3. *The officers and government of the Synagogue.*—The synagogues of the respective towns were governed by the elders (זקנים, πρεσβύτεροι, *Luke* vii. 3), who constituted the local Sanhedrim, consisting either of the twenty-three senators or the three senators assisted by four principal members of the congregation (*Megilla*, 27; *Joseph. Antig.* iv. 8, 14; *de Bell. Jud.* ii. 20. 5, with *Acts* vii. 5; xxi. 8), as this depended upon the size and population of the place [SANHEDRIM]. Hence these authorised administrators of the law were alternately denominated *shepherds* (פרנסים) = ποιμένες, *Jerusalem Psa.* viii. *Babylon Chagiga*, 60; *Sabbath*, 17 a; *Acts* xx. 28; *Eph.* iv. 11); the rulers of the synagogue, and the chiefs (ראשי הכנסת) = ἀρχισυνάγωγοι, ἀρχες, *Matt.* ix. 18, 23; *Mark* v. 22; *Luke* viii. 41; *Acts* xiii. 15), and *overseers* (ממונים) = προεστῶτες, *Mishna Taamid*, v. 1).

The president of the Sanhedrim was *ex officio* the head or chief of the synagogue, and was therefore ראשׁ הקהילה, the ruler of the synagogue (ראשׁ הכנסת) = ἀρχισυνάγωγος, *Mishna Sota*, vii. 1; *Sota*, vii. 7), whilst the other members of this body, according to their various gifts, discharged the different functions in the synagogue (1 *Tim.* v. 17), as will be seen from the following classification.

i. *The Ruler of the Synagogue* (ראשׁ הכנסת) = ἀρχισυνάγωγος, and his two Associates.—Though the supreme official, like the other two members of the local court, had to be duly examined by delegates from the Great Sanhedrim, who certified that he possessed all the necessary qualifications for his office (Maimonides, *Iad Ha-Chesaka*, *Hilchoth Sanhedrin*, ii. 8; [SANHEDRIM]), yet his election entirely depended upon the suffrages of the members of the synagogue. The Talmud distinctly declares that 'no ruler (פרנס) = ποιμήν is appointed over a congregation unless the congregation is consulted'

אין מעמידין פרנס על הצבור אלא אם כן נמלכים) בצבור, *Berachoth*, 55 a). But once elected the ruler was the third in order of precedence in the temple synagogue—i.e. first came the high-priest, then the chief of the priests (סגן), and then the ruler of the synagogue (*Mishna Sota*, vii. 1; *Sota*, vii. 7), whilst in the provincial synagogues the respective rulers were supreme, and had the principal voice in the decision and distribution of the other offices. His two judicial colleagues aided him in the administration of the law.

ii. *The three Almoners* (נבאי צדקה) = διακόντοι; *Phil.* i. 1; 1 *Tim.* iii. 8, 12; iv. 6).—The office of almoner was both very responsible and difficult, as the poor-taxes were of a double nature, and in periodically collecting and distributing the alms, the almoner had to exercise great discretion from whom to demand them and to whom to give them.

There were, first, *the alms of the dish* (תמחוי), consisting of articles of food which had to be collected by the officials daily, and distributed every evening, and to which every one had to contribute who resided thirty days in one place; and there were, secondly, *the alms of the box* (קופה), consisting of money which was collected every Friday, was distributed weekly, and to which every one had to contribute who resided ninety days in one place. Two authorised persons had to collect the former, and three the latter. They were obliged to keep together, and were not allowed to put into their pockets any money thus received, but were to throw it into the poor-box. The almoners had the power of exempting from these poor-rates such people as they believed to be unable to pay, and to enforce the tax on such as pretended not to be in a position to contribute. They had also the power to refuse alms to any whom they deemed unworthy of them. All the three almoners had to be present at the distribution of the alms. The greatest care was taken by the rulers of the synagogue and the congregation, that those elected to this office should be 'men of honesty, wisdom, justice, and have the confidence of the people' (*Baba Bathra*, 8; *Aboda Sara*, 18; *Taanith*, 24; Maimonides, *Iad Ha-Chezaka Hilchoth Mathenath Anjim*, ix.). Brothers were ineligible to this office; the almoners (פרנסין) were not allowed to be near relations, and had to be elected by the unanimous voice of the people (*Jerusalem Pea*, viii.).

iii. *The Legate of the congregation, or the Leader*

of divine worship (שליח צבור) = ἄγγελος ἐκκλησίας, ἀπόστολος).—To give unity and harmony to the worship, as well as to enable the congregation to take part in the responses, it was absolutely necessary to have one who should lead the worship. Hence, as soon as the legal number required for public worship had assembled (מניין), the ruler of the synagogue (פרנס = ποιμήν), or, in his absence, the elders (זקנים = πρεσβύτεροι), delegated one of the congregation to go up before the ark to conduct divine service. The function of the apostle

of the ecclesia (שליח צבור) was not permanently vested in any single individual ordained for this purpose, but was alternately conferred upon any lay member who was supposed to possess the qualifications necessary for offering up prayer in the name of the congregation. This is evident from the reiterated declarations both in the Mishna and the Talmud. Thus we are told that any one who is not under thirteen years of age, and whose garments are not in rags, may officiate before the ark (*Mishna Megilla*, iv. 6), that 'if one is before the ark [= ministers for the congregation], and makes a mistake [in the prayer], another one is to minister in his stead, and he is not to decline it on such an occasion' (*Mishna Berachoth*, v. 3). 'The sages have transmitted that he who is asked to conduct public worship is to delay a little at first, saying that he is unworthy of it, and if he does not delay he is like unto a dish wherein is no salt, and if he delays more than is necessary he is like unto a dish which the salt has spoiled. How is he to do it? The first time he is asked, he is to decline; the second time, he is to stir; and the third time, he is to move his legs and ascend before the ark' (*Berachoth*, 34 b). Even on the most solemn occasions, when the whole congregation fasted and assembled with the president and vice-president of

the Sanhedrim for national humiliation and prayer, no stated minister is spoken of; but it is said that one of the aged men present is to deliver a penitential address, and another is to offer up the solemn prayers (*Mishna Taanith*, ii. 1-4 [FASTS]). On ordinary occasions, however, the rabbins, who were the rulers of the synagogue, asked their disciples to act as officiating ministers before the ark (*Berachoth*, 34 a). But since the sages declared

that 'if the legate of the congregation (שליח צבור) ἄγγελος ἐκκλησίας, ἀπόστολος) commits a mistake whilst officiating, it is a bad omen for the congregation who delegated him, because a man's deputy is like the man himself' (*Mishna Berachoth*, v. 5); and moreover, since it was felt that he who conducts public worship should both be able to sympathise with the wants of the people and possess all the moral qualifications befitting so holy a mission, it was afterwards ordained that 'even if an elder (זקן = πρεσβύτερος) or sage is present in the congregation, he is not to be asked to officiate before the ark, but that man is to be delegated who is apt to officiate, who has children, whose family are free from vice, who has a proper beard, whose garments are decent, who is acceptable to the people, who has a good and amiable voice, who understands how to read the Law, the Prophets, and the Hagiographa, who is versed in the homiletic, legal and traditional exegesis, and who knows all the benedictions of the service' (*Mishna Taanith*, ii. 2; *Gemara*, *ibid.* 16 a, b; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, viii. 11, 12, with *i* Tim. iii. 1-7; Tit. i. 1-9). As the legate of the people, the most sacred portions of the liturgy (א. קריש, קדושה, ברכת כהנים, עננו), which could only be offered up in the presence of the legal number, were assigned to him (*Berachoth*, 21 b, and Rashi, *in loco*), and he was not only the mouthpiece of those who were present in the congregation on the most solemn feasts, as on the Great Day of Atonement and New Year, but he was the surrogate of those who, by illness or otherwise, were prevented from attending the place of worship (*Rosh Ha-Shana*, 35; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, viii. 10).

iv. *The Interpreter or Methurgeman* (תורגמן, מתורגמן).—After the Babylonish captivity, when the Hebrew language was rapidly disappearing from among the common people, it became the custom to have an interpreter at the reading desk (בימה) by the side of those who were alternately called up to read the several sections of the lessons from the Law and the Prophets [HAPHTARA]. This *Methurgeman* had to interpret into Chaldee or into any other vernacular of the country a verse at a time when the lesson from the law was read, as the reader was obliged to pause as soon as he finished the reading of a verse in Hebrew, and was not allowed to begin the next verse till the *Methurgeman* had translated it; whilst in the lesson from the prophets three verses were read and interpreted at a time (*Mishna Megilla*, iv. 4). The reader and the interpreter had to read in the same tone of voice, and the one was not allowed to be louder than the other (*Berachoth*, 45 a). The interpreter was not allowed to look at the law whilst interpreting, lest it should be thought that the paraphrase was written down. Like that of conducting public worship, the office of interpreter was not permanently vested in any single indi-

dual. Any one of the congregation who was capable to interpret was asked to do so. Even a minor—i. e. one under thirteen years of age—or one whose garments were in such a ragged condition that he was disqualified for reading the lesson from the law, or a blind man, could be asked to go up to the reading-desk and explain the lesson (*Mishna Megilla*, iv. 5; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, xii. 10-14).

v. *The Chazan, or attendant on the Synagogue* (חזן הכנסת = ὑπηρετής) was the lowest servant, and was more like the sexton or the beadle in our churches. He had the care of the furniture, to open the doors, to clean the synagogue, to light the lamps, to get the building ready for service, to summon the people to worship, to call out (עומר) the names of such persons as were selected by the ruler of the synagogue to come up to the platform to read a section from the law and the prophets [HAPHTARA], to hand the law to ordinary readers, or to the ruler of the synagogue, when it had to be given to the high-priest, in which case the ἀρχιερεύς took the law from the *Chazan*, gave it to the chief priest, who handed it to the high-priest (*Mishna Joma*, viii. 1; *Sota*, vii. 7); he had to take it back after reading (Luke iv. 17-20), etc. Nothing, therefore, can be more clear than the position which this menial servant occupied in the synagogue in the time of Christ and a few centuries after. The Talmud distinctly declares that the *Chazan* is the beadle or the sexton of the congregation, and not the legate or the angel of the church (חזן הוא שמש של הקהל ואינו שליח צבור); comp. *Tosiphta Joma*, 68 b; and *Mishna Berachoth*, vii. 1, for the meaning of שמש. The notion that his office resembled that 'of the Christian deacon,' as well as the assertion that, 'like the *legatus* and the *elders*, he was appointed by the imposition of hands' (Plumptre, in *Smith's Dictionary of the Bible*, s.v. 'Synagogue'), have evidently arisen from a confusion of the *Chazan* in the days of Christ with the *Chazan* five centuries after Christ. Besides, not only was this menial servant not appointed by the imposition of hands, but the *legatus* himself, as we have seen, had no laying on of hands. It was about A.D. 520, when the knowledge of the Hebrew language disappeared from among the people at large, that alterations had to be introduced into the synagogical service, which involved a change in the office of the *Chazan*. As the ancient practice of asking any member to step before the ark and conduct the divine service could not be continued, it was determined that the *Chazan*, who was generally also the schoolmaster of the infant school, should be the regular reader of the liturgy, which he had to recite with intonation (*Masecheth Sopherim*, x. 7; xi. 4; xiv. 9, 14; Graetz, *Geschichte der Juden*, v. 26).

vi. *The ten Batlanim or Men of Leisure* (בטלנים).—No place was denominated a town, and hence no synagogue could legally be built in it which had not ten independent men who could be permanently in the synagogue to constitute the legal congregation whenever required (*Mishna Megilla*, i. 3; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, xi. 1). These men of leisure were either independent of business because they had private means, or were stipendiaries of the congregation, if the place had not ten men who could entirely devote themselves to this purpose (Rashi on *Megilla*,

5 a). They had to be men of piety and integrity (*Baba Bathra*, 28 a; *Jerusalem Megilla*, i. 4). In the middle ages these ten *Batlanim* consisted of those who discharged the public duties of the synagogue, and were identical with the rulers of the synagogue described above. Thus Benjamin of Tudela tells us that the ten presidents of the ten colleges at Bagdad were 'called the *Batlanim*, the *leisure men*, because their occupation consisted in the discharge of public business. During every day of the week they dispensed justice to all the Jewish inhabitants of the country, except on Monday, which was set aside for assemblies under the presidency of R. Samuel, master of the college denominated '*Geon Jacob*,' who on that day dispensed justice to every applicant, and who was assisted therein by the said ten *Batlanim*, presidents of the colleges' (*The Itinerary*, vol. i. p. 101, ed. Ascher, London 1840). This seems to favour the opinion of Herzfeld that the ten *Batlanim* are the same as the ten judges or rulers of the synagogue mentioned in *Aboth*. iii. 10, according to the reading of Bartenora; *Horajoth*, 3 b, etc. (comp. *Geschichte des Volkes Israel*, i. 392).

4. *Time of Worship*.—As the Bible prescribes no special time for worship, but simply records that the Psalmist prayed three times a-day (Ps. lv. 18), and that Daniel followed the same example (Dan. vii. 11), the men of the Great Synagogue decreed that the worship of the synagogue should correspond to that of the temple. To this end they ordained that every Israelite is to offer either public or private worship to his Creator at stated hours three times a-day—i. In the morning (שחרית) at the third hour=9 A.M., being the time when the daily morning sacrifice was offered; ii. In the afternoon or evening (מנחה) at the ninth hour and a half=3.30 P.M., when the daily evening sacrifice was offered; and iii. In the evening (מעריב), or from the time that the pieces and the fat of the sacrifices, whose blood was sprinkled before sunset, began to be burned, till this process of burning was finished. As this process of burning, however, sometimes lasted nearly all night, the third prayer could be offered at any time between dark and dawn (*Mishna Berachoth*, iv. 1; *Gemara* *ibid.* 26 b; *Pesachim*, 58 a; *Jerusalem Berachoth*, iv. 1; *Joseph. Antig.* xiv. 4. 3). It is this fixed time of worship which accounts for the disciples assembling together at the third hour of the day (i. e. 9 A.M.) for morning prayer (שחרית) on the day of Pentecost (Acts ii. 1-15), and for Peter and John's going up to the temple at the ninth hour (i. e. 3 P.M.) for evening prayer (מעריב) (Acts iii. 1), as well as for Cornelius' prayer at the same hour (Acts x. 30). The statement in Acts x. 9, that Peter went up upon the house-top to pray about the sixth hour (=12.30 P.M.), has led some of our best expositors to believe that the hour mentioned in Acts iii. 11 and x. 30 is the time when the third prayer was offered. The two passages, however, and the two different hours refer to one and the same prayer, as may be seen from the following canon: 'We have already stated that the time for the evening prayer (מנחה) was fixed according to that of the daily evening sacrifice, and since this daily evening sacrifice was offered at the ninth hour and a half [=3.30 P.M.], the time of prayer was also fixed for the ninth hour and a half (=3.30 P.M.), and this was called the *Lesser Mincha* (מנחה קטנה). But as the daily evening sacrifice was

offered on the fourteenth of Nisan (ערב פסח) at the sixth hour and a half [= 12.30 P.M.], when this day happened to be on a Friday (ערב שבת) [PASS-OVER], it was enacted that he who offers his evening prayer after the sixth hour and a half [= 12.30 P.M.] discharges his duty properly. Hence, as soon as this hour comes, the time of obligation has come, and it is called the *Great Mincha* (מנחה גדולה); Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, iii. 2; *Berachoth*, 26 b). This mistake is all the more to be regretted, since the accuracy in such minute matters on the part of the sacred writers shows how great is the trustworthiness of their records, and how closely and strictly the apostles conformed to the Jewish practices. The prayers three times a-day were not absolutely required to be offered in public worship in the synagogue every day. The times of public worship were —i. Monday and Thursday, which were the two market days in the week when the villagers brought their produce into the neighbouring town, and their matters of dispute before the local Sanhedrim, which held their courts in the synagogue (*Jerusalem Megilla*, v. 1; *Baba Kama*, 32 a [SANHEDRIM]), and on which the pious Jews fasted (Mark ii. 18; Luke v. 33; xviii. 12; Acts x. 30 [FASTS]); ii. The weekly Sabbath; and iii. Feast and Fasts. But though not obligatory, yet it was deemed specially acceptable if the prayers were offered even privately in the synagogue, since it was inferred from Mal. iii. 16 that the Shechinah is present where two or three are gathered together.

5. *The Legal Congregation and the Synagogical Worship*.—Though it was the duty of every Israelite to pray privately three times a-day, yet, as we have already seen, it was only on stated occasions that the people assembled for public worship in the legally-constituted congregation, and recited those portions of the liturgy which could not be uttered in private devotion. *Ten* men at least who had passed the thirteenth year of their age (בר מצוה) were required to constitute a legitimate congregation (כנין) for the performance of public worship. This number, which evidently owes its origin to the completeness of the ten digits, is deduced from the expression עשרה in Num. xiv. 27, where it is said 'how long shall I bear with this (עדה) congregation?' referring to the spies. As Joshua and Caleb are to be deducted from the twelve, hence the appellation congregation remains for the ten, and this number is therefore regarded as forming the legal quorum (*Mishna Sanhedrim*, i. 6; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*, xi. 1). 'The *Shema* (שמע) must not be solemnly recited, nor must one go before the ark to conduct public worship, nor must the priests raise their hands to pronounce the benediction, nor must the lessons from the law or the prophets be read . . . . . unless there are ten persons present' (*Mishna Megilla*, iv. 3).

The most important features in the institutions of the synagogue are the *liturgy*, the reading of the law and the prophets, and the homilies. To know the exact words of the prayers which our Saviour and his apostles recited when they frequented the synagogue is to us of the utmost interest. That the Jews in the time of Christ had a liturgical service is certain; but it is equally certain that the present liturgy of the synagogue embodies a large admixture of prayers which were

compiled after the destruction of the second temple. Though the poetic genius of the Psalmists had vanished, and the temple music was hushed, yet numerous fervent and devout spirits were still unquenched in Israel. These earnest spirits made themselves audible in the synagogue in most devout and touching prayers, embodying the new anxieties, the novel modes of persecution and oppression which the Jews had to endure from the children of Christianity, the religion newly born and brought up in the lap of Judaism, who deemed it their sacred duty to heap unparalleled sufferings upon their elder brothers. These prayers, formed after the model of the Psalms, not only ask the God of Israel to pity the sufferers, to give them patience to endure, and in his own time to confound their enemies, and free them from all their troubles, but embody the teachings of the sages and the sentiments propounded by the *Hagadists* in the Sabbatic homilies. Hence, in describing the ritual of the synagogue it is most essential to separate the later element from the earlier portions. As it is beyond the limits of this article to trace the rise, progress, and development of all the component parts of the liturgy in its present order, we shall simply detail those portions which are undoubtedly the ancient nucleus, which beyond a question were used by our Saviour and his disciples, and around which the new pieces were grouped in the course of time.

i. *The Hymnal Group* (פסוקי זמירות).—Just as the temple building was the prototype for the synagogue edifice, so the temple service was the model for the ritual of the synagogue. Hence just as the temple service consisted of the priests reciting the Ten Commandments, pronouncing the benediction upon the people (Num. vi. 24-27), the offering of the daily morning and evening sacrifice, the Levites chanting Ps. cxv. 1-16; 1 Chron. xvi. 8-22 (הורו), during the morning sacrifice; and Ps. cxvi., 1 Chron. xvi. 23-36 (שירו) during the evening sacrifice, so the ritual of the synagogue consisted of the same benediction, the chanting of the sacrificial Psalms, as the sacrifices themselves could not be offered except in the temple, and sundry additions made by Ezra and the men of the Great Synagogue. It is for this reason that the ritual began with the temple Psalms. These were followed by the group consisting of Ps. c. [xix., xxxiv., xci., cxxxv., cxxxvi., xxxiii., xcii., xciii., cxlv.-cl.—those enclosed in brackets being omitted on the Sabbath—1 Chron. xxix. 10-13; Neh. ix. 6-12; Exod. xiv. 30-xv. 18, and sundry sentences not found in the Bible, denominated the order of the *Hymnal Sentences* (פסוקי זמירות). The use of this hymnal group as part of both the temple and the synagogue service is of great antiquity, as is attested by the *Sedar Olam*, xiv., and *Masceheth Sopherim*; see also *Sabbath*, 118 b, where we are told that הורו was ordained by David, and שירו by the *Sopherim* or scribes.

ii. *The Shema or Keriath Shema* (קריאת שמע) (שמע).—This celebrated part of the service was preceded by two benedictions, respectively denominated 'the Creator of Light' (יוצר אור) and 'Great Love' (אהבה רבה), and followed by one called 'Truth' (אמת), now expanded into אמת ויציב. The two introductory benedictions were as follows —a. 'Blessed are thou, O Lord our God, King of the Universe, who createst light and foremost darkness, who makest peace and createst all things!

He in mercy causes the light to shine upon the earth and the inhabitants thereof, and in goodness renews every day the work of creation. Blessed art thou, the Creator of light! <sup>7</sup> *b*. 'With great love hast thou loved us, O Lord our God; thou hast shown us great and abundant mercy, O our Father and King, for the sake of our forefathers who trusted in thee! Thou who didst teach them the love of life, have mercy upon us, and teach us also . . . to praise and to acknowledge thy unity in love. Blessed art thou, O Lord, who in love hast chosen thy people!' (*Mishna Tuamid*, v. 1; *Berachoth*, 11 b). Hereupon the Ten Commandments were recited, which however ceased at a very early period, because the Sadducees declared that this was done to show that this was the most essential portion of the revealed law (*Mishna Tuamid*, v. 1, with *Berachoth*, 14 b). Then came the *Shema* proper, consisting of Deut. vi. 4-9; xi. 13-21; Num. xv. 37-41; and which was concluded with benediction *c*. entitled 'True and Established' (*אמת ויציב*) as follows:—'It is true and firmly established that thou art the Lord our God and the God of our forefathers; there is no God besides thee. Blessed art thou, O Lord, the redeemer of Israel!' (*Mishna Berachoth*, i. 4; *Gemara* *ibid.* 13 a; *Mishna Tuamid*, v. 1; *Gemara* *ibid.* 32 b). There is evidently an allusion to the reading of the *Shema* in the reply which our Saviour gave to the lawyer who asked him, 'Master, what must I do to inherit eternal life?' when the lawyer forthwith recited the first sentence of the *Shema* (Luke x. 26).

iii. The third portion which constituted the ancient liturgy embraces the *Eighteen Benedictions* (*שמונה עשרה*), called *kar' ἑξοχῆ*, the *Prayer* (*תפלה*). They are as follows:—1. (*ברוך*) Blessed art thou, O Lord our God, the God of our fathers Abraham, Isaac, and Jacob, great, omnipotent, fearful, and most high God, who bountifully shewest mercy, who art the possessor of all things, who rememberest the pious deeds of our fathers, and sendest the Redeemer to their children's children, for his mercy's sake is love, O our King, Defender, Saviour, and Shield! Blessed art thou, O Lord, the shield of Abraham! 2. (*אחיה נבור*) Thou art powerful, O Lord, world without end; thou bringest the dead to life in great compassion, thou holdest up the falling, healest the sick, loosest the chained, and shonest thy faithfulness to those that sleep in the dust. Who is like unto thee, Lord of might, and who resembles thee?—a Sovereign killing and bringing to life again, and causing salvation to flourish—and thou art sure to raise the dead. Blessed art thou, O Lord, who raisest the dead! 3. (*אחיה קדוש*) Thou art holy, and thy name is holy, and the holy ones praise thee every day continually. Blessed art thou, O Lord, the Holy God! 4. (*אחיה חונן*) Thou mercifully bestowest knowledge upon men and teachest the mortal prudence. Mercifully bestow upon us, from thyself, knowledge, wisdom, and understanding. Blessed art thou, O Lord, who mercifully bestowest knowledge! 5. (*השיבנו*) Our Father, lead us back to thy law; bring us very near, O our King, to thy service, and cause us to return in sincere penitence into thy presence! Blessed art thou, O Lord, who delightest in re-

pentance! 6. (*סלח*) Our Father forgive us, for we have sinned, our King pardon us, for we have transgressed, for thou art forgiving and pardoning.

Blessed art thou, O Lord, merciful and plenteous in forgiveness! 7. (*ראה*) Look at our misery, contend our cause, and deliver us speedily, for thy name's sake, for thou art a mighty deliverer. Blessed art thou, O Lord, the deliverer of Israel! 8. (*רפאנו*) Heal us, O Lord, and we shall be healed, save us and we shall be saved, for thou art our boast; grant us a perfect cure for all our wounds, for thou, O Lord our King, art a faithful and merciful physician. Blessed art thou, O Lord, who healest the sick of thy people Israel! 9.

(*ברוך עלינו*) Bless to us, O Lord our God, for good this year, and all its kinds of produce; send thy blessing upon the face of the earth, satisfy us with thy goodness, and bless this year as the years bygone. Blessed art thou, O Lord, who blesest the seasons! 10. (*תקע*) Cause the great trumpet to proclaim our liberty, raise the standard for the gathering of our captives, and bring us together from the four corners of the earth. Blessed art thou, O Lord, who gatherest together the dispersed of Israel! 11. (*השיבה*) Reinstall our judges as of old, and our councillors as of yore, remove from us sorrow and sighing, and do thou alone, O Lord, reign over us in mercy and love, and judge us in righteousness and justice. Blessed art thou, O Lord the King, who lovest righteousness and justice! 12. (*ולמשינים*) \* Let the apostates have

\* The story of this much misunderstood prayer, which has been used as a watchword by Christians in their persecutions and massacres of the Jews, and the reason why there are now *nineteen* benedictions in what is called 'the Eighteen Benedictions,' are as follows:—After the Babylonish captivity, when the revival of religious life in the synagogue, like the periodical revivals of religion in the Church, brought in its train a number of heretical sects—*ex. gr.* the Samaritans, the Hellenists, the Sadducees, the Romanisers, etc.—who alternately disturbed both the political and religious peace of the commonwealth, the orthodox community, who had suffered so much in the defence of their ancestral faith, demanded a public reprobation of those heresies. To comply with this pious wish, the spiritual heads of the people compiled this prayer, which is no more than what St. Paul did when he declared those accursed who promulgated heresies (1 Cor. xvi. 22; Gal. i. 8, 9), and what we do to the present day when, in the Athanasian Creed, we exclude from salvation all who reject the doctrines therein enunciated. As it was more especially directed against the Sadducees, who were rampant during the period of the second temple, this prayer is called the *Sadducees' Benediction*, or the *Invocation against the Sadducees* (*ברכת צדוקים*; *Berachoth*, 28 b, 29 a). After the destruction of the temple, the want of another prayer was felt to entreat God speedily to rebuild Jerusalem. To this effect

benediction 14 a (*לירושלים*) was compiled. This, however, occasioned a difficulty, since it was questioned whether it was right to add to the ancient stereotyped number of benedictions in the litany. R. Simon Hapetuli, who introduced the present order (*הסדרה*) of the benedictions, was for omitting the prayer against the heretics altogether, maintaining that it was no longer applicable, since the heretics, with the destruction of the temple, had

no hope, and let those who perpetrate wickedness speedily perish; let them all be suddenly cut off, let the proud speedily be uprooted, broken, crushed, and humbled speedily in our days. Blessed art thou, O Lord, who breakest down the enemy and humblest the proud! 13. (על הנדריקים) On the righteous, on the pious, on the elders of thy people, the house of Israel, on the remnant of the Scribes, on the pious proselytes, and on us, bestow, O Lord our God, thy mercy; give ample reward to all who trust in thy name in sincerity, make our portion with them for ever, and let us not be ashamed, for we trust in thee! Blessed art thou, O Lord, the support and refuge of the righteous!

14 a. (ולירושלים) To Jerusalem thy city in mercy return, and dwell in it according to thy promise; make it speedily in our day an everlasting building, and soon establish therein the throne of David. Blessed art thou, O Lord, who buiddest Jerusalem! 14 b. (את צמח) The branch of David, thy servant, speedily cause to flourish, and exalt his horn with thy help, for we look to thy help all day. Blessed art thou, O Lord, who causest to flourish the horn of David! 15. (שמע קולנו) Hear our

lost their political power, whilst R. Gamaliel II. of Jabne (A.D. 50-116 [GAMALIEL II.]), who was patriarch at that time, was for retaining it with some slight alterations, so as to adapt it to the altered circumstances and to the new heretics. Having carried his point, Gamaliel asked R. Samuel the younger, who supported him in his opinion on this question, to make the necessary alterations. The difficulty of increasing the ancient number of benedictions was obviated by combining the newly-compiled prayer for the speedy rebuilding of Jerusalem, or benediction 14 a (ולירושלים) with benediction 14 b (את צמח) *Jerusalem Berachoth*, iv. 2). Afterwards, however, when the people and R. Samuel himself began to doubt whether they had done right in merging the two benedictions into one, the prayer for Jerusalem, or benediction 14 a, and the prayer for the kingdom of David, or benediction 14 b, were separated. But as the prayer against the heretics was not cancelled, hence obtained the present nineteen instead of the original eighteen benedictions. To satisfy their scruples about this increased number, the Talmudists appeal to Ps. xxix., where the name of God occurs nineteen times, including אל (*Berachoth*, 28 b; Duschak, in *Illustrirte Monatschrift*, i. 176, ff.) This sufficiently shows how unfounded is the charge that the twelfth benediction, which was recited several centuries before the rise of Christianity, was originally compiled against Christians, and how much Eisenmenger (*Entdecktes Judenthum*, ii. 107, ff.) and the more genial M'Caul, who repeats him (*Old Paths*, ch. xvii. xix.), have to answer for perpetuating the enmity against the Jews by the false description of this prayer. It is to be regretted that the learned and liberal Mr. Plumptre allowed himself to be misled by M'Caul's remarks, and inserted in so influential a work as Smith's *Dictionary of the Bible* (s. v. 'Synagogue'), the remark that the prayers contain 'curses against Christians under the name of Epicureans.' Both truth and the innocent Jewish blood shed by those Christians who believed this mischievous statement, alike call out that this error should be relinquished.

voice, O Lord our God, have pity and compassion on us, and receive with mercy and acceptance our prayers, for thou art a God hearing prayer and supplications. Our King, do not send us empty away from thy presence, for thou hearest the prayers of thy people Israel in mercy! Blessed art thou, O Lord, who hearest prayer! 16. (רצה) Be favourable, O Lord our God, to thy people Israel, and to their prayer; restore the worship to thy sanctuary, receive lovingly the burnt-sacrifice of Israel and their prayer, and let the service of Israel thy people be always well-pleasing to thee. May our eyes see thee return to Zion in love. Blessed art thou, O Lord, who restorest thy Shechinah to Zion! 17. (מודים) We thankfully confess before thee that thou art the Lord our God, and the God of our fathers, world without end, and that thou art the shepherd of our life and the rock of our salvation from generation to generation; we render thanks unto thee and celebrate thy praises. Blessed art thou, O Lord, whose name is goodness, and whom it becomes to praise!

18. (שים שלום) Bestow peace, happiness, blessing, grace, mercy, and compassion upon us and upon the whole of Israel, thy people. Our Father, bless us all unitedly with the light of thy countenance, for in the light of thy countenance didst thou give to us, O Lord our God, the law of life, lovingkindness, justice, blessing, compassion, life, and peace. May it please thee to bless thy people Israel at all times, and in every moment, with peace. Blessed art thou, O Lord, who blessest thy people Israel with peace!

These eighteen benedictions are mentioned in the *Mishna Rosh Ha-Shana*, iv.; *Berachoth*, iv. 3; *Tosiphtha Berachoth*, cap. iii.; *Jerusalem Berachoth*, ii.; *Megilla*, 17 a. We are distinctly told that they were ordained by the 120 elders of the Great Synagogue (*Megilla*, 17 b; *Berachoth*, 33 a; *Siphre* on Deut. xxxiii. 2), and we know that the representatives of the people (אנשי מעמד) recited them in the temple every day (*Sabbath*, 24 b), that the priests pronounced three of them upon the people every morning in the *Hall of Squares*

(לשכת הגזית) in the temple-court, and that the high-priest prayed the sixteenth (רצה) and the seventeenth (מודים) sections of this litany on the Great Day of Atonement (*Foma*, 68 b). There can therefore be no doubt that our Saviour and his apostles joined in these prayers when they resorted to the synagogue, and that when the apostles went on the top of the house to pray at the stated hour (Acts i. 13; x. 9), these benedictions formed part of their devotions. It must however be remarked that the three first and the three last benedictions are the oldest, that benedictions 4-15 were compiled during the Maccabean struggles and the Roman ascendancy in Palestine; and benediction 14 a was most probably compiled after the destruction of the second temple.

But though these three groups (viz. the Hymnal Group, the *Shema*, and the Eighteen Benedictions) constituted the liturgy of the Jews when engaged in public or private devotion during the period of the second temple, yet there were other prayers which could only be recited at public worship when the legal number (מניין) were properly assembled. The order of the public worship in the synagogue was as follows:—

(a.) *Morning Service*.—The congregation having

washed their hands outside the synagogue, and being properly assembled, delegated one of their number to go before the ark and conduct public worship. This *Legate of the congregation* (לְגַת הַקְּהִלָּה), who like the rest of the congregation was arrayed in his fringed garment, and with the phylacteries on his head and left arm [FRINGED GARMENT; PHYLACTERIES], began with reciting the *Kadish* (קְדִישׁ), the people responding to certain parts, as follows:—‘Exalted and hallowed be his great name in the world which he created according to his will; let his kingdom come in your lifetime and in the lifetime of the whole house of Israel very speedily. [Legate and congregation] Amen. Blessed be his great name, world without end. [Legate alone] Blessed and praised, celebrated and exalted, extolled and adorned, magnified and worshipped be thy holy name; blessed be he far above all benedictions, hymns, thanks, praises, and consolations which have been uttered in the world. [Legate and congregation] Amen. [Legate alone] May the prayers and supplications of all Israel be graciously received before their Father in heaven. [Legate and congregation] Amen. [Legate alone] May perfect peace descend from heaven, and life upon us and all Israel. [Legate and congregation] Amen. May he who makes peace in his heaven confer peace upon us and all Israel. [Legate and congregation] Amen. The similarity between this very ancient *Kadish* and the Lord’s prayer needs hardly to be pointed out. After this the legate recited in a loud voice the first sentence of the *Shema*, the rest being recited quietly by him and the congregation. Then followed the eighteen benedictions, for the third of which the *Kedusha* (קְדוּשָׁה) was substituted in public worship. It is as follows:—‘Hallowed be thy name on earth as it is hallowed in heaven above, as it is written by the prophet, and one calls to the other and says [congregation], Holy, holy, holy, is the Lord God of Sebaoth, the whole earth is filled with his glory! [Legate] Those who are opposite them respond: [congregation] Blessed be the glory of the eternal, each one in his station. [Legate] And in thy Holy Word it is written, thus saying: [congregation] The Lord shall reign for ever, thy God, O Zion, from generation to generation, Hallelujah! [Legate] From generation to generation we will disclose thy greatness, and for ever and ever celebrate thy holiness; and thy praise shall not cease in our mouth, world without end, for thou, O Lord, art a great and holy king. Blessed art thou, holy God and king!’ On Monday, Thursday, Sabbath, Feasts and Fasts, lessons from the law and prophets were read [HAPHTARA], and (with the exception of Monday and Thursday) discourses delivered by the Rabbins. The service concluded with the priests pronouncing the benediction (Num. vi. 24-27).

(b.) *The Afternoon and Evening Prayer*.—Some of the Psalms in the Hymnal Group were omitted, otherwise the service was similar to that of the morning. The public worship of the feasts and fasts is described in the articles on the respective festivals, and in the article HAPHTARA. The other prayers which now precede and follow the three ancient groups in the present liturgy of the synagogue are not described in this article because they are of later origin.

6. *The Authority of the Synagogue*.—As the officers of the synagogue were also the administrators of justice, the authority which each assembly pos-

sessed extended to both civil and religious questions. The Rabbins, or the heads of the synagogue, as it is to the present day, were both the teachers of religion and the judges of their communities. Hence the tribunals were held in the synagogue (Luke xii. 11; xxi. 12), and the *Chazan* or beadle who attended to the divine service had also to administer the stripes to offenders (Luke iv. 17-20 with *Mishna Maccoth*, iii. 12; and Matt. x. 17; xxiii. 34; Mark xiii. 9; Acts xxii. 19; xxvi. 11). The Rabbins who had *diplomas* from the Sanhedrim, and after the Sanhedrim ceased from the *Gaonim* of the respective colleges at Sora and Pumbadita [SANHEDRIM; SCRIBES], and who were chosen by the different congregations to be their spiritual heads with the consent of the assembly, selected such of the members as were best qualified to aid them in the administration of the communal affairs. These constituted a local self-governing and independent college; they issued all the legal instruments, such as marriage-contracts, letters of divorce, bills of exchange, business contracts, receipts, etc. etc. They had the power of inflicting corporal punishment on any offender, or to put out of the synagogue (= excommunicate) altogether (Matt. xviii. 15-17; John ix. 22; xii. 42; xvi. 2). The punishment of excommunication, however, was very seldom resorted to, as may be seen from the fact that though Christ and his apostles opposed and contradicted the heads of the synagogue yet they were not put out of the synagogue.

7. *Origin and development of the Synagogue*.—According to tradition the patriarchs Abraham, Isaac, and Jacob, instituted the prayers three times a-day (*Berachoth*, 26 b), and had places of worship (comp. the so-called Chaldee paraphrases of Onkelos, Jonathan b. Uzzel, and the Jerusalem Targum on Gen. xxiv. 62, 63; xxv. 27). We are assured that there were synagogues in the time of the pious king Hezekiah (*Sanhedrin*, 94 b); that the great

house (בֵּית גָּדוֹל) was a stupendous synagogue; that the many houses of Jerusalem (בְּתֵי יְרוּשָׁלַיִם), which Nebuchadnezzar burned (2 Kings xxv. 9), were the celebrated 480 synagogues which existed in Jerusalem (*Jerusalem Megilla*, iii. 1), and that in Babylon the synagogue was to be seen in which Daniel used to pray (*Erubin*, 21 a). And we have the testimony of Benjamin of Tudela, the celebrated traveller of the middle ages, that he himself saw the synagogues built by Moses, David, Obadiah, Nahum, and Ezra (*Itinerary*, vol. i. pp. 90, 91, 92, 106, 153, ed. Ascher, London 1840). It is in harmony with this tradition that St. James declares ‘Moses of old time hath in every city them that preach him, being read in the synagogues every Sabbath day’ (Acts xv. 21 with Philo, ii. 167, 630; Joseph. *Cont. Apion.* ii. 18; *Baba Kama*, 82 a; *Jerusalem Megilla*, iv. 1). But these are simply traditions, which love to invest everything with the halo of the remotest antiquity. In the O. T. itself we find no trace of meetings for worship in synagogues. Temporary altars, groves, and high-places were used alike by the Jewish saints and sinners for the worship of God and idols. The only pre-exile instance which seems to indicate that the devout in Israel were in the habit of resorting to pious leaders for blessings and instruction on stated occasions is to be found in 2 Kings iv. 23, where the Shunammite’s husband asks: ‘Wherefore wilt thou go to him (Elisha) to day?’

It is neither new moon nor Sabbath.' Yet 2 Kings xxii. 8, etc.; 2 Chron. xxxiv. 14, etc., testify undoubtedly against the existence of places of worship under the monarchy. It is during the exile, whilst the temple-worship was in abeyance, that we find indubitable proof of the systematic meetings on fasts for devotion and instruction (Zech. vii. 3, 5; viii. 19). Religious meetings were also held on Sabbaths, and fasts to instruct the exiles in the divine law, and to admonish them to obey the divine precepts (Ezra x. 1-9; Neh. viii. 1, 3; ix. 1-3; xiii. 1-3). These meetings, held near the temple and in other localities, were the origin of the synagogue, and the place in which the people assembled was denominated בית הכנסת, *the house of assembly*. Hence also the synagogue in the temple itself. The elders of this synagogue handed the law to the high-priest (*Mishna Joma*, vii. 1; *Sota*, vii. 7, 8); aided in the sacrifices (*Taanith*, v. 5); took charge of the palms used at the feast of Tabernacles (*Succa*, iv. 4 [TABERNACLES, FEAST OF]); accompanied the pilgrims who brought their first-fruits (*Tosiphta Bikkurim*, ii.); officiated as judges (*Maccoth*, iii. 12), and superintended the infant schools (*Sabbath*, i. 3). These synagogues soon became very popular, so that the Psalmist in depicting worship in the time of the Maccabees declares that the many meeting-places of God—or 'the synagogues of God' as the A. V. rightly renders it—have been laid waste (Ps. lxxiv. 8). Later on we find the Jews possessing synagogues in the different cities of Syria, Asia Minor, Greece, Egypt, and wherever they resided. We hear of the apostles frequenting the synagogues in Damascus, Antioch, Iconium, Thessalonica, Berea, Athens, Corinth, Ephesus, etc. etc. (Acts ix. 2, 20; xiii. 14; xiv. 1; xvii. 1, 10, 17; xviii. 4, 19; xix. 8). There were numerous synagogues in Palestine, in Nazareth (Matt. xiii. 54; Mark vi. 2; Luke iv. 16), Capernaum (Matt. xii. 9; Mark i. 21; Luke vii. 5; John vi. 59), etc. etc.; and in Jerusalem alone there were 480 (*Jerusalem Megilla*, iii. 1; *Jerusalem Kethuboth*, xiii.) to accommodate the Jews from foreign lands who visited the temple. There were synagogues of the Libertines, Cyrenians, Alexandrians, Cilicians, and of the Asiatics (Acts vi. 9; *Tosiphta Megilla*, cap. ii.; *Babylon Megilla*, 26 a). When it is remembered that more than 2,500,000 of Jews came together to the metropolis from all countries to celebrate the Passover (Joseph. *Antiq.* vi. 9. 3; *Pesachim*, 64 a), this number of synagogues in Jerusalem will not appear at all exaggerated. An idea may be formed of the large number of Jews at the time of Christ, when it is borne in mind that in Egypt alone, from the Mediterranean to the border of Ethiopia, there resided nearly a million of Jews (Philo, *Against Flaccus*, ii. 523); and that in Syria, especially in the metropolis Antiochia, the Jews constituted a large portion of the population (Graetz, iii. 282, 2d ed.)

7. *Literature.*—*Jerusalem Megilla*, cap. iii.; Maimonides, *Iad Ha-Chezaka Hilchoth Tephila*; Vitringa, *De Synagoga vetere*, Weissenfels 1726; Zunz, *Die gottesdienstlichen Vorträge der Juden*, p. 366 ff., Berlin 1832; by the same author, *Die Ritus des synagogalen Gottesdienstes*, Berlin 1859; Edelman, *Higajon Leb*, Königsberg 1845; Herzfeld, *Geschichte des Volkes Israel*, vol. i. pp. 24-30; 127, 391-394; ii. 129-134; 183-223; Nordhausen,

1855, 1857; Jost, *Geschichte des Judenthums*, vol. i. pp. 38 ff.; 168 ff.; 262 ff., Leipzig 1857-8; Duschak, *Illustrirte Monatschrift für die gesammten Interessen des Judenthums*, vol. i. pp. 83 ff., 174 ff., 409 ff., London 1865.—C. D. G.

SYNAGOGUE, THE GREAT (בֵּית הַנְּדוּלָה; Aramaic, כְּנִשְׁתָּא רַבְתָּא; συναγωγή μεγάλη, *Synagoga Magna*), *the Great Assembly*, or *the Great Synod*, according to Jewish history, denotes the council first appointed by Nehemiah after the return of the Jews from the Babylonish captivity to reorganise the religious life of the people.

1. *Name and its Signification.*—Though the verb בָּנָה, *to gather, to assemble*, occurs in the O. T. (Esth. iv. 16; 1 Chron. xxii. 2; Ezek. xxii. 21; xxxix. 28; Ps. cxlvii. 2), yet the noun בְּנִיָּת, *assembly*, *synagogue*, does not occur in Biblical Hebrew. In the Hebrew Scriptures the terms קָהָל, קָהָל, and אֲסֻפָּה are used for *congregation, assembly* [ECCLESIASTES], and there can be but little doubt that the non-biblical בְּנִיָּת is designedly employed to distinguish this assembly from all other gatherings. This is also the reason why the article is prefixed to the adjective alone, and not also to the noun—viz. בְּנִיָּת הַנְּדוּלָה, *the Great Synagogue*—inasmuch as this singles it out from the other בְּנִיָּתוֹת, *synagogues*, provincial or local, both great and small, which obtained at the same time, and which were designed for different objects. When Ewald asserts that 'in the Mishna language the substantive and the adjective never have the article together' (*Lehrbuch*, sec. 293 a, note), we can only refer to *Sabbath*, xvii. 4; *Joma*, iv. 3; *Taanith*, iii. 7; *Kethuboth*, vi. 7; *Nedarim*, iii. 11; *Nazir*, viii. 1; *Baba Bathra*, iv. 3, and to innumerable other passages in refutation of this assertion. According to the most ancient tradition, this assembly or synagogue was styled *great* because of the great work it effected in restoring the divine law to its former greatness, and because of the great authority and reputation which it enjoyed (*Jerusalem Megilla*, iii. 7; *Babylon Megilla*, 13 b; *Joma*, 69 b; *Erubin*, 13 b; *Sebachin*, 102; *Sanhedrin*, 14 a). The enactments of the Great Synagogue are often quoted in the name of אֲנָשֵׁי

בְּנִיָּת הַנְּדוּלָה, *the men of the Great Assembly*, or those who successively constituted its members during the long period of its existence. The abbreviated forms of these two names to be met with in Jewish literature are כְּנִשְׁתָּא הַנְּדוּלָה and אֲנָשֵׁי כְנִשְׁתָּא הַנְּדוּלָה = אֲנָשֵׁי הַנְּדוּלָה. Sometimes this assembly is also designated the 120 elders (בְּנֵי הַזֵּקֵנִים, *Megilla*, 17 b, 18 b).

2. *Number of Members and their Classification.*—We are told that Nehemiah organised the Great Synagogue (comp. Neh. x. 1-10 with *Midrash Ruth*, cap. iii.; *Jerusalem Shebiith*, v. 1), and that it consisted of 120 members (*Jerusalem Berachoth*, ii. 4; *Jerusalem Megilla*, i.; *Babylon Megilla*, 17 b). In looking at the register of the Great Assembly recorded in Nehemiah (x. 1-8), it will be seen that—i. Only 16 out of the 24 chiefs of the priests (1 Chron. xxiv. 7-18) are enumerated, and that for the 8 that are wanting 4 private persons are given—viz. Zidkijah, Daniel, Baruch, and Meshullam. ii. Of the 6 or 7 chief Levites—viz. Jeshua, Bani, Kadmiel, Hodijah, Sherebiah, Hashabniah—who returned with Zerubbabel and Ezra

(Neh. ix. 4, 5; Ezra v. 18, 19, 24), Bani is omitted, and 12 private individuals are mentioned who were undoubtedly the *doctors of the Law* (כֹּהֲנִים; Neh. viii. 7; ix. 3). *iii.* Of the 45 *chiefs of the people* (רָאשֵׁי הָעָם) only half are known as heads of families, and the rest are again distinguished private individuals. Here the families of David and Joab (comp. Ezra viii. 2, 9) are missing. And *iv.* Of the *representatives of the cities* there are only two mentioned—viz. Anathoth and Nebo—which plainly shows that others are omitted, since these two places did not at all distinguish themselves to be thus singled out. Now, in looking at the peculiar position in which they are placed among the heads of the people in the register of the exiles, it will be seen that the family of Hariph (Joseh) stand first; then follow the names of thirteen cities (viz. Gibeon, Bethlehem, Netophah, Anathoth, Beth-azmaveth, Kirjath-jearim, Chephirah, Beeroth, Ramah, Gaba, Michmas, Beth-el, and Ai); Nebo concludes the catalogue of the cities, and the family of Magbish follows upon it (Ezra ii. 18-30; Neh. vii. 24-33), which exactly corresponds with the order in the register of the Great Synagogue; Hariph begins, then come cities, *i.e.* Anathoth; Nebai comes last, and then again Magbish (Neh. x. 19, 20). There can, therefore, be no doubt that the above-named cities are to be inserted between Hariph and Anathoth. If we add to these 15 cities the other five specified in the register (viz. Lod, Hadid, Ono, Jericho, and Tekoa—Neh. vii. 36, 37), which were represented by this synod, we have in all twenty cities. We thus see that eight divisions of the priests are wanting—the family of Bani is missing from the Levites, seven families of the heads of the people have disappeared—and that thirteen of the representatives of the cities have dropped out. Now, if we supply those which have manifestly been dropped, and add them up with the private individuals mentioned in the register, we obtain the following representatives in the Great Synagogue:—28 priests, consisting of the twenty-four divisions and the four private individuals; 19 Levites, being the seven families and the twelve private persons; 50 Israelites, twenty-nine being chiefs of the people and twenty-one private persons—making in all 97, with Nehemiah 98, whilst the remaining 22 are the deputations of the cities. We thus obtain the 120 members of the Great Synagogue mentioned by the unanimous voice of tradition. It will also be seen from the above that these 120 members represented five classes, viz.—*i.* The *chiefs of the priestly divisions* (רָאשֵׁי בֵּית אֵב); *ii.* The *chiefs of the Levitical Families* (רָאשֵׁי הַלֵּוִיִּים); *iii.* The *heads of the Israelite Families* (רָאשֵׁי הָעָם); *iv.* *Representatives of Cities or the Elders* (וְקִנִּים; πρεσβύτεροι); and *v.* The *Doctors of the Law* (סוֹפְרִים; σοφισταί), from all grades. This number, however, was most probably restricted to the time of Nehemiah, as there can be no doubt that the assemblies which were afterwards held consisted of a smaller number, since, at the time when the Great Synagogue passed over into the Great Sanhedrim, the representatives consisted of seventy, which became the fixed rule for the Sanhedrim [SANHEDRIM].

3. *The work of the Great Synagogue.*—At its first organisation under Nehemiah, the representatives bound themselves by a most solemn oath (בְּאֵלֶּה

וּבִשְׁבוּעָה) to carry out the following six decisions, which were deemed most essential for the stability of the newly-reconstructed state:—*i.* Not to intermarry with heathen; *ii.* To keep the Sabbath holy; *iii.* To observe the Sabbatical year; *iv.* Every one to pay annually a third of a shekel to the temple; *v.* To supply wood for the altar; and *vi.* Regularly to pay the priestly dues (Neh. x. 28-39). The foundation for the reorganisation and reconstruction of the state and the temple-service being thus laid at the first meeting of this synod, the obtaining of the necessary materials for the successful rearing up of the superstructure and the completion of the edifice demanded that the synod should occasionally reassemble to devise and adopt such measures as should secure the accomplishment of the plan and the permanent maintenance of the sanctuary. To this end the members of the Great Synagogue, *vii.* Collected the canonical Scriptures. This was called forth by the effects of the first decision, which involved the expulsion of Manasseh, son of the high-priest Joiada, by Nehemiah and the synod for refusing compliance with that decision—*i.e.* to be separated from his heathen wife, the daughter of Sanballat (Neh. xiii. 23-29). In consequence of this, his father-in-law, Sanballat, obtained permission to build an opposition temple on Mount Gerizim, in which Manasseh became high-priest, and whither he was followed by many of the Jews who sympathised with him. This proceeding, however, compelled them to deny the prophets, because their repeated declarations about the sanctity of Jerusalem did not favour the erection of a temple out of the ancient metropolis. To erect a wall of partition between the Jews and these apostates, and to show to the people which of the ancient prophetic books were sacred, the *Sopherim* and the men of the Great Synagogue compiled the canon of the prophets. As the early prophets and the great prophets—*i.e.* Isaiah, Jeremiah, and Ezekiel—like the Pentateuch, were already regarded as sacred, it only remained for the Great Synagogue to complete the *prophetic canon* by inserting into it the twelve minor prophets, which this synod accordingly did, as may be seen from *Baba Bathra*, 15; *Aboth di Rabbi Nathan*, cap. i; 2 Maccab. xii. 13. And though some of these authorities are no longer clear about the books inserted into the canon, yet they all testify to the fact that Nehemiah and the members of the Great Synagogue were engaged in collecting the canonical books of the prophets. The Hagiographa were not as yet made up, as is evident from the fact that the younger Sirach did not even know the expression כְּתוּבִים, but used the general term τὰ ἅλλα to denote them (*Preface to Ecclesi.*), and that in Alexandria additions were made to the book of Esther, and other books were inserted in what we now call the Hagiographa, as well as from the circumstance that the canonicity of some of the Hagiographa continued to be a point of difference between the schools of Shammai and Hillel, which could not have been the case if the canon of the Hagiographa had been definitely made up. *viii.* They wrote or compiled the book of Esther, as Krochmal has most conclusively shown (*Keren Chemed*, v. 74, ff., Prague 1841). *ix.* They compiled the ritual for private and public worship [SYNAGOGUE]; and *x.* They introduced schools for the study of the divine law (בֵּית וְעַד), and defined the precepts of Holy Writ. The

whole of this is indicated in the epitome of the three grand maxims transmitted to us in the laconic style of the Mishna, 'The prophets transmitted the divine law to the men of the Great Synagogue, who propounded the three maxims, be cautious in judging, get many disciples, and make a hedge about the law' (*Aboth*, i. 1). The other work of the men of the Greek synagogue which has come down to us in the name of the *Sopherim* is given in the article SCRIBES.

4. *Origin, Date, and Development of the Great Synagogue.*—It is supposed by many that Ezra was the founder of the Great Synagogue, and that he in fact was its president. Graetz, however, has adduced the following most conclusive arguments proving that Nehemiah originated it after the death of Ezra:—i. The very name of Ezra is not even mentioned in the register of the representatives, and it is inconceivable to suppose that the originator would have been omitted; and ii. Nehemiah, as is well known, went twice from Shushan to Jerusalem to restore order—viz. in the 20th year of Artaxerxes' reign (B.C. 446), and after the 32d year of his reign (B.C. 436-428). On his second arrival, he found Jerusalem in a most deplorable condition: the chiefs of the families had formed alliances with Sanballat the Horonite and Tobiah the Ammonite, enemies of the Jews, the Sabbath was desecrated, and the law of God and the sanctuary were disregarded (*Neh.* xiii. 6-31). Now the convention of the Great Synagogue was held expressly for the removal of these very evils; and since the representatives distinctly bound themselves by a most solemn oath to abstain from mixed marriages, to keep the Sabbath holy, and to attend sacredly to the sanctuary and its requirements, there can be no doubt that the synod was convened by Nehemiah after his second visit to Jerusalem to devise means in order to meet these perplexing points, and that because these evils disturbed the order of the community, therefore they were made the principal and express objects of the first synod. It is the position of cap. x. recording the convention of the Great Synagogue which has caused this error. But it is well known that the book of Nehemiah is not put together in chronological order. Graetz has shown in a masterly manner the proper position of the different chapters (*Frankel's Monatschrift*, vi. 62).

As to its date, the convention of this Great Synagogue was most probably one of Nehemiah's last acts, and it must have taken place after the death of Artaxerxes, else Nehemiah could not have remained in Jerusalem, since even the second permission to visit Jerusalem was granted to him on condition that he should return to Shushan. It could not therefore have taken place before 424 B.C. The Great Synagogue was most probably held 20 years after the restoration of the walls, or 35 years after Ezra's return. Ezra was then dead, and this is the reason why his name does not occur in the register of the representatives. The whole period of the great synagogue embraces about 110 years (B.C. 410-300), or from the latter days of Nehemiah to the death of Simon the Just, who was the last link of the chain constituting the synod (שמעון).

הצדיק היה משירי כנסת הגדולה (*Aboth*, i. 2). It then passed into the Sanhedrim, when the whole of its constitution was changed [SANHEDRIM].

It only remains to be added that the existence of

the Great Synagogue, which is attested by the unanimous voice of Jewish tradition, was first questioned by Richard Simon (*Hist. Crit. du Vieux Test.* lib. i. cap. viii.) Jacob Alting with more boldness rejected it altogether as one of the inventions of tradition (*Synagoga magna enim nec uno tempore nec uno loco vixit, eoque synagoga non fuit, rerum commentum est traditionarium, qui nullum alioquin nexum παραδόσεως reperire poterunt*—Opp. v. 382). He was followed by F. E. Rau (*Diatrise de Synag. Magna*, p. 66, etc., Utrecht 1726), and Aurivillius (*De Synag. vulgo dicta magna*, ed. J. D. Michaelis, Gottingen 1790), in their elaborate monographs on this subject. De Wette (*Einleitung in das A. T.* sect. 14) contemptuously dismisses it as 'a tradition which vanishes as soon as the passages are looked at whereon it is based, and as not even being a subject for refutation.' Those who condescend to argue the matter reject this tradition because it is not mentioned in the Apocrypha, Josephus, Philo, or the *Seder Olam*, and because the earliest record of it is in the Tract of the Mishna entitled *Aboth*. But surely this argument from the silence of a few writers cannot set aside the express and positive testimony of the Mishna, the Talmud, and the earliest Jewish works. Besides, the Book of Ecclesiasticus in its catalogue of Jewish heroes (cap. l.) does not mention Ezra; Josephus never alludes to the tribunal of 23 members, and the earliest patristic literature of the Jews does not breathe a syllable about the Maccabæan heroes. Would it be fair to conclude from this silence that Ezra, the tribunal, and the Maccabees, are a myth? In confirmation of the records in the Talmudic literature about the Great Synagogue, the following circumstantial evidence is to be adduced:—The errors of the Samaritans became rampant after the death of Nehemiah, whilst of the high-priests between Eliashib and Onias I. some were insignificant men and others were reprobates. Judaism moreover has no record whatever of any distinguished persons during this period. We should therefore have expected the religion of the people to be at the lowest ebb. 'But instead of declining we find Judaism rapidly rising. No trace is to be found in the whole of this period of the disturbances, misconceptions, and errors which prevailed in the time of Ezra, Nehemiah, and Zerubbabel. The law and the precepts were preeminently revered. The ancient collection of Ben Sirach's sayings, which reflects the spirit of the people in the pre-Simonian age, breathes a fervent enthusiasm for the inspired law (comp. *Ecclus.* ii. 16; vii. 29; ix. 15; x. 19; xv. 1; xix. 17; xxi. 11; xxiii. 27, and especially cap. xxiv.) Who then has kindled and sustained such an enthusiasm and religious spirit, if not an assembly similar to that convened by Nehemiah?' (Graetz in *Frankel's Monatschrift*, vi. 63, etc.)

SYNTYCHE (Συντύχη), a female Christian named in Phil. iv. 2.

SYRACUSE (Συράκουσαι), a celebrated city on the south-east coast of the island of Sicily. It was a strong, wealthy, and populous place, to which Strabo gives a circumference of not less than one hundred and eighty stades. The great wealth and power of Syracuse arose from its trade, which was carried on extensively while it remained an independent state under its own kings; but about 200 B.C. it was taken by the Romans, after a siege rendered famous by the mechanical contrivances whereby Archimedes protracted the defence. Syracuse still exists as a considerable town under its original name, and some ruins of the ancient city yet remain. St. Paul spent three days at Syracuse, after leaving Melita, when being conveyed as a prisoner to Rome (Acts xxviii. 12).—J. K.

SYRIA, a province and kingdom of Western Asia, the name, extent, and boundaries of which have been subjects of no little difficulty to both sacred and classic geographers.

The name *Syria* does not occur in Hebrew; but in the A. V. it is the usual, though not the uniform, rendering of the word *Aram* (אַרַם). This creates considerable confusion in sacred geography. Thus in Gen. x. 22 *Aram*, the youngest son of Shem, is mentioned as the founder of the Aramean nation, from whom the whole country colonised by his descendants took its name. The country is therefore rightly called 'Aram' in Num. xxiii. 7; but the very same Hebrew word is rendered *Mesopotamia* in Judg. iii. 10, and *Syria* in Judg. x. 6.

Aram was a wide region. It extended from the Mediterranean to the Tigris, and from Canaan to Mount Taurus. It was subdivided into five principalities:—1. *Aram-Damascus* (called in the A. V. 'Syria of Damascus'); 2. *Aram-Maachah*; 3. *Aram-Beth-Rehob*; 4. *Aram-Zobah*; and 5. *Aram-Naharaim* (Mesopotamia in the A. V.) These have already been described [ARAM]. When the kingdom of Damascus attained to great power under the warlike line of Hadad it was called by way of distinction *Aram*, which unfortunately is rendered 'Syria' in the A. V. (2 Sam. viii. 5, 12; 1 Kings x. 29; xv. 18; 2 Kings v. 1; xxiv. 2, etc.) This lax method of translation was borrowed from the Septuagint and Vulgate versions. The Targums retain *Aram*; and it would tend much to geographical accuracy and distinctness were the Hebrew proper names uniformly retained in the A. V.

The region comprehended by the Hebrews under the name *Aram* was not identical with that which the Greek writers and the authors of the N. T. included under *Syria*. It embraced all Mesopotamia and Assyria, while it excluded Phœnicia and the whole territory colonised by the Canaanites. [ARAM; CANAAN.]

In the N. T. the name *Syria* (Συρία) is not employed with great definiteness. In fact it is doubtful if ever the Greek geographers were agreed as to the exact boundaries of the country so called. St. Matthew, after mentioning the mighty works and wondrous teachings of our Lord in Galilee, says: 'His fame went throughout all Syria,' alluding apparently to the country adjoining Galilee on

the north (iv. 24). St. Luke applies the name to the Roman province of which Cyrenius was governor, and which did not include Palestine (ii. 2). In the same restricted sense the word is used in Acts xv. 23. The apostles in Jerusalem wrote 'unto the brethren of the Gentiles in Antioch, and Syria, and Cilicia;' and afterwards it is said that Paul, setting out from Antioch, 'went through Syria and Cilicia' (ver. 41; cf. Gal. i. 21). A wider signification seems to be attached to the name in other passages. It is said of Paul when going to Jerusalem, 'that he sailed thence (from Greece) into Syria'—giving this general name to Palestine as well as the country north of it (Acts xviii. 18; xx. 3). In one passage taken from the Septuagint the name is employed as an equivalent of the Hebrew *Aram* (Luke iv. 27; cf. 2 Kings v. 20).

The origin of the word is not quite certain. Some make it a corruption of *Assyria*. Herodotus says: 'The people whom the Greeks call *Syrians* are called *Assyrians* by the barbarians' (vii. 63); and these names were frequently confounded by the later Greek writers (Xen. *Cyr.* vi. 2. 19; viii. 3. 24); and apparently also by some of the Latins (Plin. *Hist. Nat.* v. 13). A much more probable etymology is that which derives *Syria* from *Tsur* (צֹר), the Hebrew name of the ancient city of Tyre. The distinction between *Syria* and *Assyria* is very great in Hebrew. The Greek form of the name derived from *Tsur* would be *Tsuria*, but as this could not be expressed by Greek letters it was softened down to *Syria*. *Assyria* is in Hebrew אַשּׁוּר, and in Greek Ἀσσυρία, and sometimes Ἀρουρία.

A still greater distinction between the names is found in the Assyrian inscriptions, where Assyria is called *As-sur*, while the Tyrians are the *Tsur-ra-ya*, the characters used being entirely different' (Rawlinson's *Herodot.* i. 63, note). Tyre was the most important city along the Mediterranean coast. With it and its enterprising merchants the Greeks soon became familiar; and they gave to the country around it the general name *Syria*—that is, 'region of Tyre.'

It is interesting to observe that the connection between *Syria* and *Aram* is noticed by Strabo when commenting on a stanza of Pindar:—'Others understand *Syrians* by the *Arimi*, who are now called *Aramei*' (xiii. p. 626; and xvi. p. 785); and again, 'Those whom we call *Syrians* (Σύριοι) are by the Syrians themselves called *Armenians* and *Arammœans*' (Ἀραμμαῖοι; i. 2. 34).

The name *Syria* was thus of foreign origin. It was never adopted or acknowledged by the people themselves; nor was it ever employed by native authors except when writing in Greek for Greeks. At the present day it is unknown in the country. It has been seen that in ancient times the name *Aram* was specially applied to Damascus and its kingdom. There is something analogous to this in modern usage. *Esh-Sham* (الشَّام) is the name

now commonly given to both city and country, though in more correct language the former is styled *Dimishk esh-Sham*.

EXTENT AND BOUNDARIES.—Ancient geographers do not agree as to the extent of *Syria*. Herodotus makes it reach to the Black Sea on the north (i. 6); to Paphlagonia and the Mediterranean on the west (i. 72; ii. 12, 116); to Egypt on the

south (ii. 158, 159); and to Media and Persia on the east (vii. 63). He confounded Syria and Assyria, and hence arose the error into which he fell regarding the extent of the former. The same view is taken by Xenophon (*Anab.* i. 4. 11-19). Even Strabo states in one place that 'the name Syria seems to extend from Babylonia as far as the bay of Issus, and anciently from this bay to the Euxine. Both tribes of the Cappadocians—those near the Taurus, and those near the Pontus—are called to this day Leuco-Syrians.' It is clear, however, from a subsequent sentence, that he in this place fell into the error of Herodotus; for he thus remarks: 'When the historians of the Syrian empire say that the Medes were conquered by the Persians, and the Syrians by the Medes, they mean no other Syrians than those who built the royal palaces of Babylon and Nineveh; and Ninus who built Nineveh in Aturia, was one of these Syrians' (xvi. p. 737). It is clear that for Syrians the name *Assyrians* should here be substituted. The great similarity of the names no doubt tended to create this confusion.

When writing directly of the country of Syria Strabo is more accurate. He describes its extent, boundaries, and divisions with great minuteness. 'Syria is bounded on the north by Cilicia (cf. Acts xv. 23) and Mount Amanus; on the east by the Euphrates and the Arabian Scenitæ, who live on this side (west) of the Euphrates; on the south by Arabia Felix and Egypt; on the west by the Egyptian and Syrian seas, as far as Issus' (xvi. p. 749). Pliny gives substantially the same boundaries. He says, however, that some geographers divide the country into four provinces—Idumæa, Judæa, Phœnicia, and Syria (*Hist. Nat.* v. 13; cf. Joseph. *Antiq.* x. 6. 1).

Ptolemy confines Syria within the same limits on the north, west, and east; but he marks its southern boundary by a line running from Dor, at the base of Carmel, by Scythopolis and Philadelphia, to Alsadamus Mons (Jebel Haurân). He thus includes Phœnicia, Galilee, and a portion of Peræa, but excludes Judæa and Idumæa (v. 15).

In this article the name Syria is confined to what appears to be its more strict N. T. signification. Its boundaries may be given as follows:—Palestine on the south; the Mediterranean on the west; Cilicia and Mount Amanus on the north; and the Euphrates and desert of Palmyra on the east. Its length, from the mouth of the Litâny on the south to the bay of Iskanderûn on the north, is 250 miles, and its breadth averages about 130 miles. Its area may thus be estimated at 32,500 square miles. It lies between lat. 33° 13' and 36° 42' N., and long. 34° 15' and 38° E.

**PHYSICAL GEOGRAPHY.**—Syria, like Palestine, is divided into a series of belts, extending in parallel lines from north to south. 1. A narrow belt of plain along the seaboard. It embraces the plain of Issus, now Iskanderûn, on the north, extending as far as the bold promontory of Râs el-Khanzîr. South of the promontory is the fertile plain of Seleucia, now Suweidiyeh, at the mouth of the Orontes. Then follows the peak of Casius, which dips into the sea; and from its southern base down to the mouth of the Litâny stretches the plain of Phœnicia, varying in breadth from ten miles at Ladikiyeh to half a mile at Sidon. It is nearly all fertile; and some portions of it at Sidon, Beyrout, and Tripoli, are among the richest and most

beautiful in Syria. 2. A belt of mountains, the backbone of the country. It commences with the ridge of Amanus on the north; then follows Bargylus in the centre, and Lebanon on the south. 3. The great valley of Cœlesyria, and its northern extension the valley of the Orontes, form the next belt, and constitute one of the most remarkable features of the country. 4. The mountain-chain of Anti-Lebanon, though broken by the plain of Hamah, finds a natural prolongation in the ridge which rises in the parallel of the city of Hamah and runs northward beyond Aleppo. 5. Along the whole eastern border from north to south extends an arid plateau, bleak and desolate—the home of the roving Bedawîn.

**Plains.**—The plains of Phœnicia and Cœlesyria have been already noticed [PHŒNICIA; CŒLESYRIA]. The plain of Hamah is very extensive. It joins Cœlesyria on the south, and extends northward on both sides of the Orontes as far as Apamea, about seventy miles; while its breadth from the base of Lebanon to the desert is nearly thirty. Its surface is almost perfectly flat, its soil generally a rich black mould; water is abundant. Upon it once stood the large cities of Riblah, Laodicia ad Libanum, Emesa, Arethusa, Larissa, Hamath, and Apamea; all of which, with the exception of Hamath and Emesa (now Hums), are either in ruins or have dwindled down to poor villages. The plain of Damascus and its continuation towards Haurân on the south, are exceedingly fertile. [DAMASCUS.] The little plain of Issus between the mountains and the bay is now a pestilential marsh, on the borders of which stands the miserable village of Iskanderûn, the only seaport of Antioch and Aleppo. The plain of Suweidiyeh, at the mouth of the Orontes, is still a lovely spot, in part covered with orchards and mulberry plantations. On its northern border lie the ruins of Seleucia, the port from which Paul embarked on his first missionary journey (Acts xiii. 2-4), and once so celebrated for its docks and fortifications (Polybius v.).

**Mountains.**—The parallel ranges of Lebanon and Anti-Lebanon have already been noticed. [LEBANON.] At the northern end of the former is the pass called in Scripture 'the entrance of Hamath.' [PALESTINE; HAMATH.] Beyond it, in a line with Lebanon, rises the range of Bargylus, and extends to Antioch. It is a rugged limestone ridge, rent and torn by wild ravines, thinly peopled, and sparsely covered with oaks. Its elevation is much inferior to Lebanon, and does not average more than 4000 feet. In the parallel of Antioch the chain meets the Orontes, and there sweeps round in a sharp angle to the south-west, and terminates in the lofty peak of Casius (now Jebel Okra), which rises abruptly from the sea to a height of 5700 feet, forming one of the most conspicuous landmarks along the coast of Syria. The Bargylus range has received the name *Jebel en-Nusairiyeh*, from the mysterious and warlike tribe of *Nusairiyeh*, who form the great bulk of its inhabitants.

At the northern extremity of the range, on the green bank of the rapid Orontes, stand the crumbling walls and towers of Syria's ancient capital, Antioch, now dwindled down to a poor town of some 6000 inhabitants. A few miles west of it, in a secluded mountain glen, are the fountains and ruins of *Beit el-Ma*, which mark the site of the once celebrated Daphne (*Handbook for S. and P.* p. 602.)

The valley through which the Orontes breaks is here narrow and wild. Beyond it rises steeply another mountain-range, which runs northward till it joins the Taurus, and has an average elevation of nearly 6000 feet. The scenery of this range is very grand—deep ravines shut in by cliffs of naked rock; conical peaks clothed with the dark foliage of the prickly oak; and foaming torrents fringed with dense copses of myrtle and oleander. On the west it sends out the lofty promontory of Râs el-Khanzîr, which shuts in the plain of Suweidiyeh; and farther north the curve of the bay of Iskanderûn sweeps so close to the rocky base of the range as to leave a pass only a few feet broad between the cliff and the sea. Here are the ruins of an ancient arch marking the site of the celebrated *Syrian Gates*; to the north of it is the battle-field of Issus. The southern section of this range was anciently called *Pieria*, and gave its distinguishing name to the city (*Seleucia Pieria*) at its base; the northern section was called *Amanus*. The whole ridge is now usually called Jawar Dagħ, though the southern portion is perhaps more commonly known as Râs el-Khanzîr.

On the eastern bank of the Orontes, near the ruins of Apamea, rises another but much lower range of hills, which runs northward, not in a regularly-formed ridge, but rather in detached clumps, to the parallel of Aleppo. The hills are mainly calcareous, well wooded in places, and intersected at intervals by fertile plains and vales. They are interesting to the traveller and antiquarian as containing some of the most remarkable ruins in Syria (*Handbook*, 615 *seq.*) The southern section is called Jebel Riha, the central Jebel el-'Ala, and the northern Jebel Simân, from its having been the home of St. Simon Stylite.

*Rivers.*—The Orontes is the largest river in Syria. It is now called *el-'Asy* ('The Rebellious'), and also *el-Maklûb* ('The Inverted'), from the fact of its running, as is thought, in a wrong direction. Its highest source is in the plain of Bukâ'a (*Calesyria*), at the base of Anti-Lebanon, beside the ruins of the ancient city of Libo. It runs north-west across the plain to the foot of Lebanon, where its volume is more than trebled by the great fountain of Ain el-'Asy (the *Ain* of the Bible). [PALESTINE.] Hence it winds along the plain of Hamath, passing Riblah, Hums, Hamah, and Apamea. At Antioch it sweeps round to the west through a sublime pass, and falls into the Mediterranean at Seleucia. Its scenery is in general tame and uninteresting. Its volume above Hamath is less than that of the Jordan; but lower down it receives several tributaries which greatly increase it. Its total length is about 150 miles. The Litâny is the next river in magnitude. Its principal sources are in the valley of Bukâ'a, at Baalbek, Zahleh, and Anjar (the ancient Chalcis). After winding down the Bukâ'a to its southern end, it forces its way through a sublime glen, which completely intersects Lebanon, and falls into the sea a few miles north of Tyre. [LEBANON.] The rivers Eleutherus, Lycus, and Adonis have been noticed in the article *LEBANON*, and the Abana and Pharpar under *DAMASCUS*. A small stream called Nahr Kowaik rises near the village of Aintab, flows southward through a narrow glen to Aleppo, waters the town and its gardens, and empties itself in winter into a marsh some twenty miles farther south.

*Lakes.*—There are only two lakes of any im-

portance in Syria. One lies some miles north of Antioch, and is called *Bahr el-Abiad*, 'White Lake.' It is about twenty-five miles in circuit, but has a broad margin of marsh, which is flooded after heavy rains. The other is on the Orontes, west of Hums, and is called Bahr Kades. It is about six miles long by from two to three broad, and is in a great measure, if not entirely, artificial. It is formed by a dam built across the valley. The water is thus raised to an elevation sufficient to supply the town and irrigate the surrounding plain (Porter, *Damascus*, ii. 344).

*Cities.*—The principal cities and towns of Syria are the following:—Damascus, pop. 150,000; Aleppo, pop. 70,000; Beyrout, pop. 50,000; Hamah, pop. 30,000; Hums, pop. 20,000; Tripoli, pop. 13,000; Antioch, Sidon, and Ladi-kiyeh. Besides these, which occupy ancient sites, there were in former times Palmyra in the eastern desert; Abila, on the river Abana; Chalcis, He-liopolis, and Lybo, in the valley of Coelesyria; Laodicia ad Libanum, Arethusa, and Apamea, in the valley of the Orontes; Seleucia, Aradus, and Byblos [GEBAL], on the sea-coast, and many others of less importance.
